(*Mr. Pardon.*) I wish to state now that I find on more careful inquiry that we had in the course of 10 years two strikes, and not one as was alleged, both of which were on the question of our exceeding the number of one apprentice to three journeymen, which is all that the rules of the society permit the master to have. And on the occasion of the entrance of my own son into the machine room, for the purpose of acquiring a general knowledge of the practice of the room, a very grave remonstrance was made to me on the impropriety of the step I was taking; but after the men's conferring among themselves in that case, no strike was resorted to. So far, therefore, I was wrong on Wednesday, and I now wish to withdraw that statement; but we had two strikes on the question of apprentices in the 10 years.

(*Witness.*) But the Commissioners must bear in mind that when Mr. Pardon says that we allow one apprentice to three journeymen, directly there is a fourth journeyman we allow another apprentice.

19,916. (*Chairman to the witness.*) I find that the 25th rule in the rules and regulations of the Printing Machine Managers' Trade Society is this, "That in "offices where one journeyman is employed there be "allowed one apprentice, and two apprentices to four "journeymen, provided they (the journeymen) have "been employed in the machine room six months. "There must be three additional journeymen subject "to the foregoing regulations, for each extra ap- "prentice. That the time allowed for a lad to be on "liking be six weeks, but should he not be bound at "the expiration of that time members will be justified "in refusing to work with him." What is the meaning of that phrase, "that the time allowed for a lad to be on liking be six weeks"?—That means the time before he is apprenticed.

19,917. (*Sir D. Gooch.*) As I understand you, nine men will give three apprentices?—Yes, but one extra over the number gives you another apprentice.

19,918. Seven men will give you three apprentices?—Yes, directly you get over three you can have two, directly you get over six you can have three, directly you get over nine you can have four, directly you get over twelve you can have five.

19,919. (*Chairman.*) Does your society combine the purposes of a trade society and a friendly society?—Yes, to a certain degree. We allow 20*l.* at the death of a member, and 10*l.* at the death of a member's wife, but nothing in sickness. We allow 10*s.* a week when a man is unemployed, for 13 weeks in every six months; that is to say, in each half year he can have 13 weeks' allowance; but if a man gets discharged from any fault of his own, such as drunkenness or stopping away, he is deprived of that benefit for a month.

19,920. (*Sir D. Gooch.*) Do you see any objection to the separation of the funds for sick purposes and trade purposes?—No, I do not see any objection to it. Our system is rather a loose one, I think. Each member pays 2*s.* a month, but at the death of a member, when we give this 20*l.*, each member pays 6*d.*; and at the death of a member's wife each member pays 3*d.*

19,921. Does that give the amount?—No. We are 530 strong now; we used to pay 1*s.* at the death of a member, and when we got up to 400 strong and a little over we found that 1*s.* of course realized the 20*l.*, and we were getting up towards 500, so that each death proved positively a profit to the society's funds. Then it was altered to 6*d.* But we have no distinction of fund, it is all taken out of one common fund.

19,922. You have been acquainted with the working of these unions and benefit societies. Supposing that there is a benefit society in which the benefit goes beyond sickness, and has reference to an annuity, would you like to subscribe your money for the best part of your life upon the chance that the whole of that fund might be absorbed for some trade purpose, such as a strike?—No, I do not think that it would be advisable. I should like to see the funds separate.

19,923. And kept sacred for their particular purposes?—Yes, left sacred for the purposes they were devoted to.

19,924. You do not see any difficulty in separating them?—No, but I object to combining the principles together. I would rather have a pure trade society and a benefit society. We established this 20*l.* at death 12 years ago, but I was a strong opponent to it at the time, though I should not like to see it done away with now. I wanted it then as a separate fund, so that those who liked to belong to it could. But we have a benefit society established in our trade called the Machine Managers' Benefit Society, and it is a prosperous one. It is not in connexion with us, but a man must be a member of the trade society before he can join it. If, however, he leaves the trade society it does not affect him, he still remains a member. There they pay a separate subscription, and are allowed 1*l.* a week in sickness.

19,925. Then you do practically carry out a separation?—Yes, I should like to see a pure trade society and a benefit society kept distinct.

19,926. (*Mr. Roebuck to Mr. Self.*) Is it the case in your society also that when a man joins the benefit society he must be a member of your trade society; but if he ceases to be a member of your society does he according to your rules cease to be a member of the benefit society?—I believe there is a rule by which he would cease to be a member of the permanent sick fund. I am not at all prepared to express any opinion on that further than this, that those who started that society made it a condition. With respect to the widow and orphan fund that is in a totally different position. That embraces 600 or 700 members of the London Compositors' Society; but that is duly registered and certified, therefore any such rule as that could not operate at all in that case.

19,927. (*Chairman to the witness.*) Is there any any other point you wish to refer to?—Yes, there is another point in Mr. Pardon's evidence. He stated that when having his premises pulled down (which I know was recently done), and while they were being rebuilt, he could not carry on his business; and that he therefore put his work out to various other offices and was obliged to discharge his machine managers; that amongst them was a workman who had been in his employ some years, but had left the trade society, and that directly that man went to another house we hounded him out. I denied this on Wednesday, and now I can positively state that it was never done, but that Mr. Pardon must have heard of something that he has misinterpreted. I can assure Mr. Pardon that it was never done, and if he applies to the person himself he will contradict it.

19,928. (*Sir D. Gooch.*) Is he at work now?—He is working for Mr. Pardon again. I felt very much hurt by that statement, because any such conduct as that casts a stigma on our society and I should utterly disapprove of it. I have seen the person in question, and asked him whether anything he said to Mr. Pardon could have led him to come to such a conclusion. He said, "One day Mr. Pardon asked "me whether I was doing anything and had got any "employment, and I said, 'No, I have not got the "'chance.' I said, 'I had to leave the trade society "'when I was in your employment, and the trade is "'slack and I am not likely to have as good a chance as "'their own men.'" Shortly after that this man went into work and worked with society men, and worked with them for months. He was much respected in the trade; we were perfectly aware that he only left the society because he was Mr. Pardon's overseer, and we had no objection to his doing so.

19,929. (*Mr. Roebuck.*) Why should he leave the society because he was Mr. Pardon's overseer?—The employers think that the overseers, if they belonged to the trade society, would not act so impartially in any dispute as if they did not belong to the society. Mr. Pardon, I am sure, must have made that statement under a misapprehension of what must have been said to him, and I should certainly like it withdrawn because I know that it is utterly at variance with the facts.

(*Mr. Pardon.*) Of course in speaking of this matter as I did on Wednesday I cannot speak of my own knowledge as to the tyranny to which this man was subjected. All I know is that he told me so himself; and moreover he told me (which I omitted to mention on Wednesday) that but for his remaining in my service the strike of the men would have been successful on the former occasion, and their object would have been gained in the matter of that apprentice. Whether the man is under the influence of different feelings in withdrawing that which he told me I do not know. All I know is that he told me he was obliged to leave the house in which he was because he was not a society man, and that there were at that time some society men out of work, and he was obliged to give place to a society man.

(*Mr. Wyman.*) This is the rule that the association passed, "That, in the opinion of this committee, "it is not consistent with the duty of machine "overseers, or of any other persons holding the "office of overseer, to belong to any trade "association of workmen;" and the committee add, "It is obviously of much importance that, in case of "differences arising between employers and the large "and increasing body of machine minders, the over-"seers of machine rooms shall be regarded by their "employers not as opponents but as trustworthy "agents and confidential assistants." The overseers, if they belonged to the trade union and had subscribed to its rules, might naturally want to sustain those rules; and it was those very rules that might be in controversy.

The witness withdrew.

Mr. B. Pardon.

24 July 1868.

Mr. Benjamin Pardon further examined.

19,930. (*Chairman.*) I believe you have some further observations which you wish to make?—In the report of the Master Printers' Association for the year 1858 is this extract: "Your committee regret to have to report, "that the business of several firms has lately been "obstructed by an attempt on the part of the machine "minders to prescribe the number of apprentices "which employers shall be allowed to take. A request "having been made on their behalf that your committee "would receive a deputation from their body, your "committee consented. A deputation of six workmen "was accordingly received at the monthly meeting of "your committee on the 5th instant. Upon being "called on to explain their object in soliciting an "interview, their spokesman repudiated any intention "to go to law with the masters, asserting that the "money which they had from time to time collected "was intended for benevolent purposes, and had been "so used. He said that their object was to come to "some arrangement on the subject of the number of "apprentices which employers might take. They "were then requested to withdraw; upon which your "committee passed the following resolutions: 1. That "this committee having heard that attempts have been "made in various quarters to restrict the number of "apprentices at machine, entirely repudiate such "restriction. 2. That the following be the answer "given to the deputation: 'That in the opinion of "'this committee the question of the number of "'apprentices in each office is a question for each "'individual master to determine for himself; and "'this committee must decline any interference in "'the matter.'" And in that same year a member of the association "stated to the meeting that having "recently had occasion to discharge one of his "apprentices at machine for misconduct, and having, "in consequence, taken another from press, his machine "men had opposed this proceeding, and had all given "him notice to leave their work." That was in 1858. In the report for 1862 again there is a reference to the same subject: "A determined attempt was made to stop "apprentices being sent to machine, accompanied by "other obstructions to business. The firm consequently "reorganized the machine room, discharging the over-"seer of machines, and offering to the men either to "stay under the new rules (which especially provided "that no difficulty was to be made as to apprentices) "or to take a fortnight's notice. The men all left." I just mention those two instances in order to show the operations in restraint of trade in the department of machinery, and it might also be mentioned in reference to press, to which master printers have objected. I wish to correct a statement which I made on Wednesday, relative to the second strike in my machine room. There were two strikes, but the latter was on account of a lad's being introduced who was in excess of the number permitted. On the question of my son's being in the room, there was no strike—only a remonstrance.

19,931. (*Sir D. Gooch.*) Are not master printers now working under the rule of one apprentice to three men?—They do not regard themselves as bound by that rule, as is shown in the extract I have read.

19,932. What is the practice?—The practice is to consult the employer's own convenience; if he finds that he wants a fourth apprentice he takes him.

19,933. Do you know any cases in which there are more apprentices employed than one allowed by that rule?—I am not aware. I should hope that masters would do as I do myself, consult their own convenience.

19,934. You do not find that that rule has brought you much into collision?—Yes, I have had two strikes myself on the question. In two cases I have tried to bring in a fourth apprentice and have done so.

19,935. Is yours an exceptional case?—The secretary of the trade union said just now he thought that there had not been more than six in the course of 20 years.

19,936. (*Mr. Roebuck.*) Was that strike successful in regard to your introducing the fourth apprentice, is he there now?—The last of the two occasions was five years since, he is out of his time.

19,937. You kept him, did you?—Yes, such restrictions are to me so intolerable that I would rather close my house than yield to them. I should also like to mention the effect of the restriction as to the rate of wage. It is found that in our business there are many aged persons to whom the weekly receipt of a less sum than the minimum sum of 36*s.* would be a great boon; but if a man be aged and so incapable of doing more than perhaps half or two-thirds of what he was able to do in his prime, the master in his own interest is quite unable to keep that man, because he must give him 36*s.* a week. That I have always held to be a very unwise and very tyrannical procedure. I think that it would be better that the man whose industry is his only capital should be permitted to make his own terms with his employers, which he is unable to do in accordance with the rules of the trade union.

19,938. (*Chairman.*) You mean that the practical result is that the man is dismissed?—He loses his situation.

19,939. Because you are unable to employ him at a lower rate of wages than the 36*s.*?—Yes.

(*Mr. Self.*) I wish to point out to the Commission that our double system of work relieves the employer from the necessity of discharging the old workman, inasmuch as he can put him on the piece-work.

19,940. (*Chairman to Mr. Self.*)—That applies to the other societies?—Yes, the machinists and the pressmen.

19,941. (*Mr. Roebuck to the witness.*) I think the scale of the pressmen is not accepted by you as the scale of the compositors is?—Owing to the generally acknowledged improved state of printing, the old scale of 1810 has virtually become a dead letter, and a much higher rate is paid now as compared with that year in consequence of the superior style of printing; so that in point of fact the value of each man's work is determined between the overseer of the presses and the pressmen.

19,942. So that in fact the scale is null and void?—It is, except in regard to cards and posting bills that are pasted on the walls. The price of those items remains the same; but all book work is paid for on a greatly increased scale over that of 1810.

The witness withdrew.

Mr. J. Shreeve.

Mr. J. Shreeve further examined.

19,943. (*Chairman.*) You wish to make a further addition to your evidence, I believe?—I should wish to make an explanation with regard to the apprentice question. We had been some years endeavouring to grapple with this question, we felt that it was necessary to limit the number of apprentices, but we were afraid of making a disturbance in the trade. We solicited an interview with the employers, which they granted; but when our deputation stated their object, they said, "No, we will have as many as we like," and when our deputation left passed the resolution just read. This forced the matter forward, we were bound either to submit or take the matter into our own hands. We took the pressmen's scale that had been established many years, in regard to the number of apprentices they allowed, and fixed ours at the same.

19,944. (*Mr. Roebuck.*) Do you close houses where they have more apprentices than are permitted according to your rule?—Yes.

19,945. That in my phraseology, if not in yours, is a strike. Has that happened often ?—Only about six cases have occurred in 29 years; in fact the limit was not fixed till ten or twelve years ago.

19,946. (*Mr. Merivale.*) Up to that time the number had never been limited ?—Never; but we found that there were so many coming into the trade that we should be inundated with journeymen; and even now, with the limit there is, we have had 50 men recently out of work.

19,947. (*Sir D. Gooch.*) How many have you out now ?—Thirty. We find that they are increasing very much.

19,948. Is yours a fluctuating trade in regard to the amount of employment ?—It has been so recently. Our branch of the trade is a peculiar one. Very often when the compositors are slack we are busy, ours being a great deal of it stereo. work.

19,949. Do you not think that free trade between master and man is better for both than a limitation of the number of apprentices ?—The way in which we look at this apprentice question is simply this, that we have served our time to a business, and we wish to get a respectable living by it. We know that if there are four men to do two men's work the wages must come down.

19,950. (*Mr. Roebuck.*) You do not regard the outsider's interest ?—We admit him if he applies.

19,951. But if he still continues as an outsider his interest is eliminated from your consideration ?—We never interfere with him, even when he goes into a house that we have closed.

19,952. You put the employer to inconvenience; and do you not thereby interfere with the outsider ?—I do not see that we do. We may put the employer to an inconvenience, but then we have as much right to say to the employer, "We object to work for you "because you are doing something inimical to our "interests," as he has to say, "I will do as I like in my own place." *Mr. J. Shreeve.* 24 July 1868.

19,953. But whether the outsider gets work is not a consideration of yours; all your consideration is that your members get work ?—What is the use of bringing young people up to a business that it is impossible for them to get a living at when they are out of their time ?

19,954. What business is it of yours what I want to do with my children ?—But if you bring a competitor into the market that will interfere with me, I have a right to protect myself.

19,955. That is what I want to bring you to; you consider your interest and not that of the outsider ?—I consider that I have a right to protect my own interest. We never interfere with an employer when we leave his firm. I will challenge anyone to say that we have ever done so. There is no coercion or intimidation of any sort. That is the reason that I wanted Mr. Pardon to explain what he stated on Wednesday.

19,956. (*Chairman.*) Would you think it right to persuade other men not to go and work at a house which you had closed ?—No, our rules would forbid our own men to work there, and we never interfere but with our own men.

The witness withdrew.

Mr. William Hugh Blatchley further examined. *Mr. W. H. Blatchley.*

19,957. (*Chairman*). What further evidence have you to offer ?—The reason that I wish to be further examined is this—that the society I represent, that of the pressmen, is somewhat different from the one that Mr. Self has spoken of, as well as somewhat different from the one that Mr. Shreeve has spoken of. In the society that I represent the funds have been kept distinct. The members generally subscribe one penny per week to the union fund, and this union fund is used for the purpose of supporting the trade scale, as is the plan of Mr. Self's society; but as I mentioned on Wednesday incidentally that there is also a death fund attached, I may as well inform you that that fund is kept entirely distinct from the trade fund.

19,958. (*Sir D. Gooch.*) It is not allowed to be touched for trade purposes ?—No, it is kept in a separate bank. One is kept in a Birkbeck bank, and the other in a savings bank. In regard to the subscriptions I may say that there has lately been a revision of the rules. Originally in starting the death fund sixpence was contributed by each member at the death of a male and threepence at the death of a female. We now adopt a different plan; having saved up a hundred pounds since its starting, it was thought by myself and a few others that if we made it a positive payment of a shilling per quarter it would be better, with an entrance fee of 1*s.* under thirty years of age, under forty 2*s.* 6*d.*, under fifty 5*s.*; and that plan has only been adopted recently, so that I could not say positively to what extent it would rise or what effect it would have ultimately.

19,959. Do you collect this money through the same machinery as the trade fund ?—Not precisely.

19,960. Are you not the secretary ?—Yes, but it is collected by the secretaries of eight sections of the society, while the ninth section may belong to a "gift," as it is called in our trade, or they may not. There are eight of these gifts altogether, and they are situated in various parts of the metropolis to assist each other into employment (they hold their meetings at public-houses at present, which are called "houses of call"). From the east end as a matter of course it would take a long while for a man to walk to the west; while the plan I have described is very convenient for other purposes, because at the east end of the town what they call jobbing and commercial work is mostly done, while at the west end of the town a great deal of theatrical work takes place, and if men were transferred from one kind of work to another it would be very difficult for a man to compete with an east end partner or a west end partner, as the case may be, and we found that of these main sections the members in the various gifts are more likely to know each other's qualifications.

19,961. Your word "gift" applies, I suppose, to the gifts of the workman that has the power of doing a certain class of work well ?—It applies in this way. Originally these gifts were formed by means of a few; when one of the members became unwell and not able to follow his employment the others contributed a sum each per week, which was called a "gift," so as to prevent infringing upon any club they might belong to. In early times of course we had not quite so many pressmen as we have now. For instance, we have now over 400 men in our society, and at one time there was but one gift, and that gift seemed to rule the rest with regard to the affairs of the trade and maintaining the scale, their right to which our forefathers held very dear. The Queen's Head gift, as it was then called, began to get so large that it was found necessary to supply another and another until at last eight were formed. Some of them have 70 members in them, while others have only 27.

19,962. I thought you were explaining that the men in these respective gifts were more adapted for particular classes of work; that the man in a gift in the east end was not well qualified for the west end work ?—Not in all cases. This system was not a matter of necessity from the first onset, but it enables a man to pick out his fellow workman (for we mostly work in pairs), who will do him more justice than another might. For instance, I will admit as Mr. Self did that it might fall to the lot of a man belonging to our society to get a man as his fellow workman that would do him a great injury by not being able to perform the same sort of work so quickly.

19,963. Then it is really a classification of your men ?—Yes, because there are excellent men in our trade, while there are others not even worth the

Mr. W. H. Blatchley.

24 July 1868.

money that the employers pay them. At the same time there are others that receive a great deal less money than what they earn for the employers, if placed on the established wages of 36*s.* per week. The employers put us, for instance, on the establishment at times; but it is the best workmen generally speaking that are picked out for that purpose, for speed in some offices and for superiority in others. With regard to the observation which Mr. Pardon made with respect to old men, it would, in my opinion, have a very sad influence with reference to some of ours if the employer, for instance, were to choose himself what he should pay to our old pressmen, because in the first instance, when our men are young, they are made to perform their work quickly, 500 sheets in an hour in some instances, and it would be very wrong if a man who wore himself out in an employer's service were to be discarded for the rest of his life because he could not work as fast as he once could.

19,964. (*Mr. Roebuck.*) Is he not now in a position to be discarded if the employer thinks fit?—Yes, we are all free agents in our trade.

19,965. If the employer finds that it is not profitable to employ that man he gets rid of him?—Yes; an employer can discharge a pressman by giving him a fortnight's notice, or if engaged on the job on his completing such.

19,966. And he gets rid of him because he cannot apportion to him the sum that he can afford to pay him, and therefore he finds another man?—Just as you would get rid of a coat if it did not keep you warm enough.

19,967. If you did not interfere, the inefficient man who is inefficient from age would get a lower wage, but now he is turned out?—That remark does not apply. The elderly men are very efficient, but they may not be so speedy as they once were.

19,968. The elderly man is not so profitable to be employed by the master; but then you interfere and say, "That may be very true, but we insist upon "it that you shall give him as much as if he were a "perfect man." Thereupon the master says, "No, I "cannot do that, my only resource is to get rid of him "altogether and employ another;" whereas if you allowed the master to deal with him as his interest prompted him, he would continue to employ him?—That applies more to the machine managers' society than to the society which I am speaking for. I contend that it does not apply to the printers at any time. For instance, I can speak of one man who has been in Gilbert and Rivington's employment for over 50 years, working on our scale of prices; he has entirely worn himself out in the establishment. Mr. Rivington if he thought proper could get rid of him at any time by giving him notice. Therefore, that does not apply to our society, while it does apply to a certain extent to the other society that has been mentioned. But if there were a sort of free trade principle adopted, and our old men were to be paid what the masters chose, some of our unscrupulous masters would give as little as 12*s.* a week to a man who was perhaps a very efficient workman and who would earn for him at the same time 2*l.* a week, because of his applicability to the particular work that he was employed at. He would do it ever so much more carefully, and would save a great deal more of the master's material than a younger man.

19,969. Do you not think that the master looking to his own interest would not employ the young man in that case; is not the master himself a very good judge of his own interest?—Yes, undoubtedly; but you would in that case allow an unscrupulous master to employ one man at a guinea a week and another at 25*s.*

19,970. But you cannot now force him to employ the man according to your rules; he gets rid of him when he does not want him because you insist on it that the man shall get the full price?—That does not apply so much in our branch of the business, because our men only obtain what they can earn by their abilities.

19,971. (*Sir D. Gooch.*) Must not the master, having invested capital in the machine, look at the amount produced by the machine as well as by the man, so that a man working the machine slowly would involve a great loss; the profit on the interest of the machine being a great deal more than the profit on the man's labour?—Yes, that is why I am endeavouring to show that the argument hardly applies to our state of things, because all our energies are directed towards getting the best pay that we can for our labour, that is to say performing it quickly; for the quicker we do 500 sheets say, the more pay we get in the hour. There are some men in our trade that would only do 250 sheets, and not that, they are so slow; while there are other men who can do comfortably 500 an hour.

19,972. Only the machine enters into your case more than into the compositors' case, does it not?—No, ours is the hand press, at which we generally work in pairs, one rolling, the other pulling.

(*Mr. Shreeve.*) The same rule that Mr. Self said applied to their men with regard to putting them on the piece would apply to ours.

(*Witness.*) There is one observation that I wish to make as to Mr. Pardon's statement that it was compulsory upon men, and that the men in his house had been compelled to join the printers' society. I beg leave most emphatically to deny that any such compulsion was used in any one case, and I should like that portion of his evidence to be withdrawn, because that is a serious slur upon the men whom I represent; and I do not think that Mr. Pardon wishes to put before this Commission anything in the shape of offensive matter to us any more than we wish to put forward anything offensive to his society.

(*Mr. Pardon.*) I did not say that they were compelled to join the printers' union.

19,973. (*Sir D. Gooch to the witness.*) You said that the ninth section of your society differed from the others?—The ninth section happens to be composed of what they call union members only, and those need not belong to a gift.

19,974. Then in your society you have one set of men who subscribe both to the benefit and trade funds, and another set who subscribe to the trade fund only?—Yes; and the gifts pay about 2*s.* or 2*s.* 6*d.* per month as their subscription, while the subscriptions come in bulk from these sections of society to the union at the rate of 1*d.* a week each member, and also 1*d.* a week each member to the death fund; that is equal to 2*d.* They contribute 6½*d.* or perhaps 7*d.* per member to each of these gifts, and that supplies the funds. When people belonging to these gifts are out of work they get assistance, in some cases to the extent of 10*s.* a week, in others not so much, for so many months in every year. The ninth section that I drew your attention to have no such support when out of work, because they have not contributed.

The witness withdrew.

Mr. Charles William Henry Wyman further examined.

Mr. C. W. H. Wyman.

19,975. (*Chairman.*) You wish, I believe, to give some further evidence; will you confine yourself to explaining anything that may have been said by other witnesses?—On the last occasion Waterlow's case was mentioned, and I was not able to complete my observations on that case then. I will only say now that if Mr. Self says that Waterlow's men belong to the union, I do not wish to join issue with him on that, but I have the documents here which show the state of the case at the time I was alluding to. Then there has been a point made in reference to establishment wages and piece wages, and Mr. Self has very justly stated that the scale of the London Compositors' Society, admitting of both those modes of

payment, to a great extent supersedes the difficulty which might otherwise exist in the trade, and does exist in other trades, with reference to old servants. But the point which Mr. Pardon alluded to in expressing regret that he could not employ old men at a less rate than 36*s.* a week, was this, I apprehend, that the work done by piece hands is haphazard and irregular, and the work which Mr. Pardon thought might be given to old hands would be regular work not confined to the picking up of types, but work in which their age and experience might qualify them to be valuable to their masters, though not to such a degree as to be worth the 36*s.* There is no need to explain how disadvantageous it must be to have to pay a man 36*s.* because that is the minimum amount fixed, and irrespective of his working capacity and strength. But as a master, I am quite prepared to admit that there are advantages in defining a minimum, because otherwise unscrupulous masters, of whom there are some, might be glad to avail themselves of a minimum rate for special objects, and apply it generally, which would be unfair, and in the end would not tend to the advantage either of the masters or of the men; but that I think would be quite met (and it is a most important point) by a definition of the age of the person who might come into this "old man's" class, so to speak, because there are some very old men in the printing trade.

19,976. It would be difficult to define what an "old man" meant, would it not?—Such a clause as I point to would make it optional for a man being over a certain age to be put upon the establishment, both parties being agreeable, at a reduced scale.

19,977. Would there be any difficulty in a case of that sort in a master agreeing with the representatives of the union as to the employment of a man under such circumstances at a reduced rate?—I do not think that as unions are now constituted they would entertain that, for the reason I have indicated, that there would be a general jealousy lest it might be extended to improper cases. Reference has been made to the gauge of payment to our compositors, which is so much a thousand letters of type. The theory is that we pay a man for what he picks up in the hour, but he does much more than that; he distributes the type that has been composed and done with afterwards, and sets it out, and then corrects the proof that the reader has revised with the copy; so that the setting up of 2,000 stamps in an hour would not represent according to my knowledge and experience the ability of the man. There are many men of intelligence who do very much more than that. I may explain that we take it that the average of thickness of all letters composing the English language would be represented by the letter "n," and by experience we find it is sufficiently near; we say, "So many n's make a thousand," "n" being the standard. There was a reference made as to the reason why men were put on the establishment, and I alluded to the disadvantage, as I conceived, to the piece hands of having a certain class of work denied them on the piece in consequence of their views about standing advertisements. Mr. Self has referred to it again to-day. I still maintain that it is a disadvantage for any body of men to bar themselves from work by views which it is impossible for the masters to entertain. I cannot call upon my customer in reason or common sense to pay for setting up the same advertisement 52 times when he has in the first instance given me an order for an insertion every week of the year. The fact is you cannot go to the public and talk in that way, they do not understand the ins and outs of the matter; and it comes to this, that that work is done on the establishment, and that leads the master printer to force a number of men on his establishment, and his piece hands are frequently unemployed, while there is more work than the establishment hands can well do; and I say that it is against the policy and interests of the journeymen themselves to be barred from that work, because it is a physical impossibility that the master printers can do it on their terms. I do not myself know what the practice may be everywhere, but I believe that this "fat," as Mr. Self and I will agree to call it, does not reach the men on the piece. I think that they are very large losers by standing out as they do, added to which they have insisted on what I think is a monstrous thing, and they have done themselves harm in the estimation of the masters. I believe if this thing had been appreciated by the judges, and if it had not been a technical case, the decision would not have been what it was. I believe the ruling was under a misapprehension, and I shall always maintain that belief. With respect to apprentices, there is a limit imposed by the men in the machine room, as you know, and as has been stated by Mr. Shreeve. It operates in this way:—Our machinery is limited; a master has only room to put up so much machinery, perhaps only so much capital. Now-a-days more excellence is required in the quality of the work produced than formerly; so that in point of fact whereas formerly I might have got to work and produced a sufficiently satisfactory result for my customer in three hours, now he is more fastidious, and more labour is put into the production of a particular machine which hitherto has been manned by one skilful hand. I believe it would be in the interests of modern English printing, and it is found to be an absolute necessity of modern English printing, to put more skilled labour into the work of each printing machine, so that in fact we are getting to a time when more than one skilled man is wanted for each machine, and we often keep men entirely engaged in assisting the others to start. The master obviously ought to have the maximum of labour to the minimum of machinery; any man of sense must see that he cannot have too few machines and too many men for the machines, if he has room for them to work. I think, moreover, that it is dictation of the clearest and most distinct kind for a master to be told, "You shall not have more than so many apprentices;" what is its effect? that it does not secure a supply of the best workmen. The result is that men are half educated in the country, and they come to London and join the society and rank as machine printers, and we get them into our offices, and they do their work well or ill, as the case may be, and they are the men to enforce these very rules; but they are not all skilled workmen. More facility for the increase of apprentices is wanted to meet the increased demand for skilled machine minders required by a higher class of work, and the necessary wear and tear and loss of numbers, as well as the increase of machinery itself; the men do not promote their own interests in the matter, I believe, while they positively interfere with the excellence of printing. Reference has been made to union and non-union men working together. I do not wish to say anything uncivil or unkind, but I think it will be seen as a matter of common sense that a man who stood alone in a union house would not find his position a pleasant one. It speaks for itself, and I have generally understood that a man who did not care to join the union would find it for his comfort to go to some house where they were not unionists. I do believe that there is no system of picketing amongst us, but still that there is a strong moral pressure put upon men I think it is useless to deny. There is one point which I think our trade is entitled to have dwelt upon. Ours is in the first place a London business, our scale is a London scale, and the working of a business in London such as the printing business is does not bear analogy to such works as Mr. Hollins referred to, namely, pottery works, and the rules which might apply to an arbitration court there would naturally be very different from what they would be with us. And I think that the master printers enjoy one great advantage (coupled with some disadvantages) in the scale, namely, that it is an admirable basis for arbitration; it affords some common ground of agreement to start from. And in speaking of the scale I ought to say that while the scale of the compositors' work is a perfectly agreed scale, and is commonly accepted by masters

Mr. C. W. H. Wyman.

24 July 1868.

and men, we have no other agreed scale except the pressmen's, which you have heard has practically fallen into desuetude. There is no scale with the machine minders, who are never piece-workers.

19,978. Do you think that many of the points of difference which you have referred to as existing between yourselves and the men in your employment might be removed by a meeting between the employers and employed and their talking these matters over together (for there seems to be every reason to suppose that the men are amenable to reason, and would listen to anything that the masters had to say on these subjects), under some such system as Mr. Hollins proposed for the potteries, that is to say, six or a dozen on each side meeting together and talking matters over with a view of settling their differences? —The desire of the Master Printers' Association is as far as possible to look at things in a judicial way and to prevent collision, and in a great many cases they have done so; and I am happy to say that in many cases we have, as a society, acted as moderators. It was in that spirit that we said, "Let us have an arbi- "tration committee. These questions that arise with "us are always about a very small amount in their "initiation, though they may involve an important "principle to us working with each other. These "are not cases to be dragged into a court of law, let "us have a court of arbitration." But it must be obvious to every man of any self-respect that you could not be a party to having your decision to-day overruled to-morrow when the facts were all the same. For instance, take this question of standing advertisements. I do not think that any of the gentlemen who sat in that first case could have agreed to sit and discuss that same question again. Therefore we say, the arbitration court being constituted of half men and half masters, and presided over by a barrister, if its decision on a case is not to be accepted in another case precisely identical, it is mere stultification to talk of arbitration at all. That is why we say, let it be compulsory. Our feeling is, do not let us take any of our questions into a court of law. I am certain that we get worse served in a court of law, because it is impossible that these technical matters can be understood there. Masters and men can understand them, and know the weight to be attached to them.

19,979. The system of arbitration that was adopted in your trade was a system of arbitration in the case of disputes that had already arisen. Surely many of these differences which become disputes in the end might be settled by such meetings as Mr. Hollins referred to. Take this very question with regard to the advertisements; does it not appear to you that half a dozen employers and half a dozen men sitting together at a table and discussing that question would in all probability settle it?—I quite agree with that view. And I am able to state that whenever the masters have met the men they have never sought to establish any undue distinction, and the men have always conducted their case with considerable skill and acumen, as you could well believe from some of the evidence you have heard to-day; but at the same time the masters fancy that they are equally competent to advance their own views in a matter in dispute. The difficulty we find is this, that when we have convinced the men, the men commonly speaking having come unarmed with power to complete the treaty; the result is, that we get handed over to the tender mercies of a general meeting. These men composing the general meeting have not had the advantage of our persuasion and arguments, and eloquence if you will; and the result is that when their representatives go back to them with a declaration that they are convinced, or that their views are modified, it all amounts to naught; they are told, "You went "to accomplish so much, and if you do not get every- "thing we will not agree to it." Hitherto, in our experience the result has been, that while the masters have said to their representatives, "We give you full "powers to treat and close the treaty and finish the "question," the men from one cause or another (and it has happened more than once) impose a limitation on their representatives or delegates; they generally discover that their representatives have not done justice to the force of their case, and will not acquiesce in the arrangement. There is no question that it is desirable that the masters and men should agree together. You have heard Mr. Levey say (and I for myself admit it freely) that we regard the men as no more than properly paid. I would even say that I should like to see them better paid than they are at the present price per thousand of setting up stamps; but what was the argument of a large printer, "Do you "like your present supply of work at the present "wages, or will you have the wages that you ask "without the work?" I am astonished that so sensible a man as Mr. Self should have any doubt whatever that the work is leaving London, and that the London compositor is prejudiced by the fact. He has alluded to the number of men on his books as claiming relief; but there are a great many men who might claim on his books and do not, because they would only claim on his books as a last resource. There are plenty of compositors not half employed in London who do not go to Mr. Self and claim their 10*s.* a week; therefore, the statement that he has only 130 on his books out of 3,300 does not as I submit illustrate the state of the trade. I have only this to add, that in speaking as chairman of the Master Printers' Association I am able to state, and I wish to state it, that our object has been long since to promote more and more harmony between the workmen and their employers; and that we have sought in various ways the assistance of anybody who could contribute to bringing about a happier condition of the relations of labour and capital; and I should certainly like to read a paragraph from one of our reports, going as far back as 1865, in illustration of what we sought. "Your committee desire to draw the parti- "cular attention of the trade to a Bill introduced by "Lord St. Leonards into the House of Lords, entitled "'Masters and Operatives' Bill.' Its object is to "provide for the establishment of councils of concili- "ation, consisting of masters and workmen, in any "particular trade, to consider and settle disputes in "that trade, with legal power to enforce their awards, "but without authority to establish the rate of future "payments. Your committee do not undertake to "give any opinion upon the details of the Bill, but "they think its principle well worthy of consideration, "and likely to be beneficial if fairly carried out." Then we communicated with Lord St. Leonards and he wrote us this letter, which I think aptly illustrates the apathy of the public mind; for nine-tenths of those people who are now intensely alive to the question of the relations between capital and labour showed the most perfect apathy with regard to the question before. "Boyle Farm, 5th June 1865. Sir,—In reply to "your inquiry, I beg to inform you that I have no "intention of moving the second reading of my Bill "this session; nor shall I introduce it next session "unless I find a desire expressed by both masters and "operatives in favour of a court of conciliation, and "Parliament shows itself favourable to the measure. "I so stated in the House of Lords when I moved "the first reading of the Bill. A Bill for establishing "such a court, which was imperfectly drawn, passed "the House of Commons in 1861, and it was approved "of by both masters and operatives in the building "trade. I took charge of it in the Lords, and took "pains to make it correct. The Bill, however, found "no favour there, although out of consideration for "me it was read a second time and sent up to the "select committee, who looked at it with no favour. "This is the history of the Bill. I should not again "have brought it forward if it had not been that "during the late strikes both masters and operatives "expressed a desire to have a court of conciliation. "The Bill has been largely distributed, and they can "now see what sort of a court, if any, is likely to be "appointed. It depends on themselves whether such

" a Bill shall be pressed on the Legislature. Pray " bear in mind that such a court could not fix the rate " of wages, nor would it cause a strike to cease. A " strike is war, and it is sure to be fought out at a " pure loss to both parties and to the country. But " such a court would, it is hoped, prevent strikes, " by bringing masters and men together upon disputes, " and leading them to settle amicably many questions " which otherwise might lead to strikes. I have " written this in haste, but it contains my views, " and as other trades may desire to have the " information which it conveys, you are at " liberty to make use of it for that purpose." I wished to read that letter simply because it shows that we have been alive for years past to the desirability of treating these things in an amicable and friendly spirit, and because we have hitherto believed, and still believe, that there is no need for the violence of strikes and the extremities of trade unionism in order to come to a proper adjustment. And I could, if time permitted, give various instances to show that while as masters we have combined, we have sought to do justice to both masters and men, and have endeavoured, where we might, to do anything that could be done for the advantage of persons in our employment. In the year 1862, I find that we devoted our anxious attention to the subject of " The case of machine boys " who having passed the usual age of machine boys, " are obliged to be dismissed." This was a class of boys who earning disproportionately large wages up to a certain age were not skilled workmen. The question was, when they became beyond that age, what was to become of them. We felt that we were in duty bound to try and see what arrangements could be made, and it was a point that gave us very much anxiety. "A sub-committee was accordingly ap- " pointed for this purpose. They devoted their " anxious attention to the subject, and agreed upon, " and reported to your committee, a course of " proceeding which they considered calculated to " promote the object in view, namely, that of pro- " curing situations for such youths out of the busi- " ness. Their proposals were adopted and carried into " effect; advertisements having been inserted in " several publications containing lists, first of 12 and " afterwards of 18 youths whom, having received " satisfactory characters of them from their late or " present employers they deemed worthy of being " recommended. They greatly regret, however, to " have to report that their efforts have not been " attended with success ; and they now request you " to instruct them as to any further proceedings to be " taken ; for they cannot but consider the case of the " boys in question, without work, or the prospect of " procuring it, to be one of peculiar interest and com- " miseration, and that a considerate and thoughtful " attention to their condition on the part of the em- " ployers at large may lead to some measures by which " this painful state of things may be at least alleviated. " Your committee therefore ask for your advice and " co-operation, being themselves ready and anxious to " carry out any appropriate scheme which you may " propose." In our last year's report there is a question raised as to the turnover apprentices. We considered the matter at several meetings, and in the end printed Mr. Self's letter. " After discussing the sub- " ject on more than one occasion, and being desirous " of promoting the object which Mr. Self's communi- " cation had in view, namely, the proper teaching " of apprentices, your committee consider that they " would best promote that object by introducing Mr. " Self's communication into the present report, as they " have accordingly done." Therefore, that shows that while we have sought to direct and guide those who might want it in reference to our scale, we have looked at the moral welfare of those about us, and have in every sense sought to be as conciliatory as possible, and on all sorts of occasions we have preferred conciliation and arbitration to the arbitrament of the law, which we have invariably found very expensive and most unsatisfactory, and which, as the verdict was always given in favour of one side against the other, always left an embittered feeling on the part of one side against the other. I think that in justice I ought to make one more remark. Mr. Self stated the operation of their union with reference to disputes. Now two cases occurred during the last few weeks where the compositors claimed for matter which had not been composed by them as though it had been newly composed. The masters submitted the cases to our council, and we certainly felt that we could not subscribe to the doctrines of the men. Eventually the claims were withdrawn in each case, and there was no litigation, the old ruling and practice being adopted. I have a letter in my hand from one of the two masters, which I think I am bound to read ; it is as follows :—" Disputes as to prices.—As regards " the disputes respecting prices which have arisen " between me and the men in my employ, I have " every reason to believe from their own statement " that they were attributable to the advice given to " them by the council of their union " (that is Mr. Self's body). " In confirmation of this remark, " the case recently submitted by me to the Master " Printers' Committee may be adduced. Upon the " men being asked to state the ground upon which " the increase upon the charge made in former years " was based, they stated that they had been instructed " to cast up the work according to the scale as laid down " in certain authorized memoranda" (which is not ruled by the masters and the men, but by the men alone). " The men themselves had charged for what they had " done as in former years. Subsequently, they were " ordered by the council of their union to make the " demand for an increase in price, which led to the " dispute to which I have referred." It certainly was a very unfounded charge that was made, and I am happy to say it was withdrawn. And I believe that if the men and masters met together when they had these disputes, or met together periodically, or met as a social science association meet for discussions, in a broad spirit, and not in a purely local or particular spirit, the difficulties might be obviated. I very much dislike, for instance, the discussion of the question of apprentices, if I am at the moment particularly concerned in that question ; but I can discuss it with freedom if I am discussing it with masters and workmen who belong to other trades. I think that if we could establish such meetings as those I have indicated between capital and labour we should get the principles enunciated which ought to govern our relations, and when once we get a firm hold of principles I have not the slightest doubt of their making their legitimate influence felt in our daily practice.

The witness withdrew.

Adjourned.

COMMISSION.

VICTORIA R.

Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith.

To Our right trusty and well-beloved Councillor Sir William Erle, Knight; Our right trusty and right well-beloved Cousin Thomas George Earl of Lichfield; Our trusty and well-beloved Francis Charteris, Esquire (commonly called Lord Elcho); Our right trusty and well-beloved Councillor Sir Edmund Walker Head, Baronet, Knight Commander of Our most Honourable Order of the Bath; Our trusty and well-beloved Sir Daniel Gooch, Baronet; Our trusty and well-beloved Herman Merivale, Esquire, Companion of Our most Honourable Order of the Bath; Our trusty and well-beloved James Booth, Esquire, Companion of Our most Honourable Order of the Bath; Our trusty and well-beloved John Arthur Roebuck, Esquire, one of Our Counsel learned in the Law; Our trusty and well-beloved Thomas Hughes, Esquire, and Frederic Harrison, Esquire, Barristers at Law; and Our trusty and well-beloved William Mathews, Esquire, greeting.

Whereas it has been represented unto Us that it is expedient that inquiry should be made into the several matters herein-after mentioned.

Now Know Ye, that We, reposing great trust and confidence in your ability and discretion, have nominated, constituted, and appointed, and do by these Presents nominate, constitute, and appoint, you, the said Sir William Erle, Thomas George Earl of Lichfield, Francis Charteris, Esquire (commonly called Lord Elcho), Sir Edmund Walker Head, Sir Daniel Gooch, Herman Merivale, James Booth, John Arthur Roebuck, Thomas Hughes, Frederic Harrison, and William Mathews, to be Our Commissioners for the purposes of the said inquiry.

And We do hereby enjoin you, or any Four of you, to inquire into and report on the Organization and Rules of Trades Unions and other Associations, whether of Workmen or Employers, and to inquire into and report on the effect produced by such Trades Unions and Associations on the Workmen and Employers respectively, and on the Relations between Workmen and Employers, and on the Trade and Industry of the Country; with power to investigate any recent acts of intimidation, outrage, or wrong alleged to have been promoted, encouraged, or connived at by such Trades Unions or other Associations, and also to suggest any improvements to be made in the law with respect to the matters aforesaid, or with respect to the relations between Workmen and their Employers, for the mutual benefit of both parties.

And for the better discovery of the truth in the premises, We do by these Presents give and grant unto you, or any Four of you, full power and authority to call before you, or any Four of you, such persons as you shall judge necessary, by whom you may be better informed of the truth in the premises, and to inquire of the premises and every part thereof by all other lawful ways and means whatsoever.

And Our further Will and Pleasure is that you, Our said Commissioners, do, with as little delay as may be consistent with a due discharge of the duties hereby imposed upon you, certify unto Us from time to time, under your hands and seals, your several proceedings in the premises.

And We do further will and command, and by these Presents ordain, that this Our Commission shall continue in full force and virtue, and that you, our said Commissioners, or any Four of you, shall and may from time to time proceed in the execution thereof, and of every matter or thing therein contained, although the same be not continued from time to time by adjournment.

And for your assistance in the execution of these Presents We do hereby authorize and empower you to appoint a Secretary to this Our Commission, to attend you, whose services and assistance We require you to use from time to time as occasion may require.

Given at Our Court at St. James, the Twelfth day of February 1867, in the Thirtieth Year of Our Reign.

By Her Majesty's Command.

S. H. WALPOLE.

WARRANT.

Whereas an application has been made to me, the Right Honourable Gathorne Hardy, one of Her Majesty's Principal Secretaries of State, by the Right Honourable Sir William Erle, Chairman of the Commissioners acting under the Commission relating to the Trades Unions mentioned in the Trades Unions Act, 1867, to appoint any number of persons, not exceeding three, to inquire into any acts of Intimidation, Outrage, or Wrong, alleged to have been promoted, encouraged, or connived at by Trades Unions or Associations, whether of Workmen or Employers, in the Town of Manchester or its immediate Neighbourhood, that is, in the district round Manchester lying within Twelve Miles of the Town Hall thereof, and as to the causes of such acts, and of the complicity therein of such Trades Unions or Associations, in pursuance of the Power given by the Trades Unions Commission Act, 1867, and by the Act to extend the Trades Unions Commission Act, 1867.

Now know Ye, that I, Gathorne Hardy, one of Her Majesty's Principal Secretaries of State, do hereby upon such application, in pursuance of the powers vested in me by the said Acts, appoint you Percival Andree Pickering, Esquire, one of Her Majesty's Counsel learned in the Law, Thomas Irwin Barstow, Esquire, and George Chance, Esquire, all being Barristers-at-Law of not less than Ten Years' standing, with all the Powers, Rights, and Privileges conferred by the said Acts, to conduct the Inquiry into any Acts of Intimidation, Outrage, or Wrong, alleged to have been promoted, encouraged, or connived at by Trades Unions or Associations, whether of Workmen or Employers, in the Town of Manchester or its immediate Neighbourhood, that is, in the district round Manchester lying within Twelve Miles of the Town Hall thereof, and as to the causes of such acts, and of the complicity therein of such Trades Unions and Associations.

I do also appoint James Sheil, Esquire, Barrister-at-Law, to be a Secretary to the Trades Unions Commissioners to act specially in the Inquiry hereby entrusted to you, whose services and assistance you are to use from time to time as occasion may require.

Given under my Hand and Seal at Whitehall, this Twenty-third day of August 1867.

GATHORNE HARDY. (L.S.)

REPORT.

Sir William Erle, My Lords and Gentlemen,

We received our appointment as Examiners under "The Trades Union Commission Act, 1867," and "The Trades Union Commission Act Extension Act, 1867," on the 23rd of August 1867. We immediately caused advertisements to be inserted in the local papers, and notice to be given throughout the district over which the inquiry was to extend of the time when we intended to commence our Inquiry. In pursuance of such notice, we went down to Manchester, and began our Inquiry on the 4th day of September 1867.

We found that an association of masters had employed Messrs. Cobbett and Wheeler, attorneys at Manchester, to watch the inquiry on their behalf; and the interests of the members of several of the Trades Unions which might come under our notice, especially those of the brickmakers and bricklayers at Manchester, were placed in the hands of Mr. Roberts, an attorney of that city. We examined the witnesses ourselves, but at the close of the examination we put to each of them any question which was suggested on behalf of the masters or men.

To our Secretary, Mr. James Sheil, Barrister-at-law, we were very much indebted for the ability and energy manifested by him throughout the whole Inquiry. Mr. Ashworth, and the Committee of Management of the Assize Courts at Manchester, kindly placed those courts at our disposal for the purpose of the Inquiry. We were also much indebted to the Mayor and Corporation of Manchester, as also to the Mayor and Corporation of Salford, and indeed to all the authorities in the district over which the Inquiry extended, and to the several chief constables and police, for the facilities and valuable assistance they respectively rendered to us in carrying out the objects of the Commission.

We found that the members of several of the unions of the brickmakers and bricklayers throughout the district had, in expectation of the inquiry, destroyed their books containing the accounts of their expenditure and the minutes of their proceedings.

In the case of the Manchester Union of Brickmakers, Samuel Wood, the landlord of the Crown and Cushion Inn at Manchester, where that union held its meetings, having been served with a *subpœna duces tecum*, delivered to us five chests, one of iron and four of wood. Wood had the custody of these chests at his inn, and at first refused to deliver them up, stating that if he did so without the permission of the members of the union, they would kill him. But after a consultation with six or seven members of the union, he gave the chests up to the police officers who had been sent to fetch them. They were, however, all locked, and it was proved that those who had had the custody of the keys had thrown them away; and, though notice for that purpose was publicly given, no one came forward to produce them. We accordingly had all the five chests broken open, when it appeared that all books containing the accounts of the expenditure of that union and the minutes of proceedings, and other books and papers relating to the union, which might have been relevant to our inquiry, had been removed. It was proved that those chests were the usual place of custody for such books, minutes, and papers of the union.

We will now proceed to give an account of the cases which were brought under our notice.

The Stockport Operative Brickmakers' Union.

In the summer of 1864 Messrs. Thomas and William Meadows were carrying on business as brickmakers at Reddish, two miles from Stockport. In June of that year they made an improvement in the manufacture of bricks, by which they effected a saving in the cost of making of 10*d.* per thousand. The union men in their employment claimed for themselves the whole of the sum they saved. Messrs. Meadows offered 6*d.* This the men refused, and left their employment. A week after they had 1864.

left, three of them, *Thomas Wilde*, Humphrey Child, and William Fallowes, returned to work on the terms offered by the Messrs. Meadows. On the night of the 2nd of August Wilde, who is a brick-burner, was at his work when he was assaulted by six men, and beaten with "cart legs." His head, and face under the eye, were cut open, his leg much injured, and his right arm broken in several places. He was left on the ground, and as the party went away some of them said "he should burn bricks no more." He was in the Stockport Infirmary five or six weeks; and at the time he appeared before us he was evidently still suffering from the injuries he had then received.

Two men, named Holland Cheetham and William Slater, then respectively president and treasurer of the Stockport Brickmakers' Union, were tried at Manchester at the following winter assizes for this offence, and were convicted and sentenced to 20 years' penal servitude. The union paid the costs of their defence. After their conviction the members of the union made great efforts to procure their pardon or a remission of their sentence. They repeatedly urged Wilde to sign papers to the effect that the convicts were not the men who had assaulted him; but though they made him offers of money for that purpose, and were also willing to admit him as a member of the union, he constantly refused to sign any paper which could be construed into an admission that he had mistaken the men. On the 28th of March 1865, upon receiving from three men, calling themselves representatives of the Stockport Brickmakers' Society, a written guarantee that, on condition that he would sign a certain paper, they would "re-instate him to all the benefits" of the union, and give him five pounds, Wilde, having consulted an attorney, signed in his presence the above-named paper, of which the following is a copy:—

I, Thomas Wilde, of Small's Buildings, Regent Road, Salford, brickmaker, the prosecutor in the late prosecution against Holland Cheetham and William Slater, tried and convicted at the winter assizes for Manchester, 1864, and sentenced by Mr. Justice Blackburn to 20 years' penal servitude, do hereby testify that I believe the said Holland Cheetham and William Slater never have had any malice or desire to injure me personally or otherwise. And I further say that from Holland Cheetham I experienced at times great kindness, and when out of employment he exerted himself for me to obtain a situation. That William Slater I know but little, except as a workman in the same trade; that I never had any falling out or quarrel with him which would lead to a motive for his committing the offence for which he is now suffering; and I cannot ascribe to either Cheetham or Slater a motive for doing me an injury. Under these circumstances, and taking into consideration the uncertainty of the testimony I have given, for I may have been mistaken as to their identity (although I cannot say that I have), I trust that Her Majesty will be pleased to give the prisoners the benefit of any doubt upon the case, and if not liberating them, at least commute the punishment to a short period of imprisonment.

Dated this 28th day of March 1865.

(The mark of Thomas Wilde.)

(Witness to signature.)

The two convicts received a free pardon, and were released after having been in prison two years, four months, and seven days. Immediately upon their release Slater was elected to the office of president of the Stockport Brickmakers' Union, and was so at the time of our inquiry.

Wilde has ever since been the subject of persecution. He was afraid to reside at Reddish, Manchester, or Oldham. The union men refused to work with him, and he has now left that part of the country; and, having changed his name, and being undiscovered, he has succeeded in obtaining work.

The account given by Slater and Cheetham is that it had been settled at a full committee meeting, over which Cheetham presided as president of the union, that Wilde should be beaten. No details were then arranged; but afterwards, at a meeting of about eight members of the committee summoned suddenly in a brickcroft, on the 1st of August 1864, it was resolved that Wilde and Child were to be beaten that night. 14*l.* was voted for the purpose, and the execution of the business was entrusted to Slater. In pursuance of the above resolution, Slater went the same afternoon to Manchester to one James Kay, the "walking delegate" of the Manchester Brickmakers' Union, and Kay agreed for 14*l.* to bring down a gang of men to beat Wilde and Child; which he accordingly did. But Slater and Cheetham both denied that they were either of them present at the time Wilde was beaten. The money, as agreed, was paid to Kay by Joseph Brown, the Secretary of the Stockport Union. The minute book of the Stockport Brickmakers' Society, which, no doubt, contained entries relating to this and the following outrages, was burnt the day before our inquiry commenced.

1863, May 8th. *Mr. John Simpson* is a brickmaker, and for four years has carried on business at Stockport Moor, and before that time at Heaton Moor. As long ago as 1860 he had

difficulties and disputes with the Stockport Union, which resulted in his having to leave Heaton. In 1863 he was employing a non-union man, named Dunkley, as a brick-burner. On the 8th of May 25,000 bricks were destroyed by men trampling on them; his barrows, tressels, tables, and other tools were cut to pieces. Eight men were concerned in this outrage; their footsteps were traced to a place called Hillgate, where many members of the Stockport Union then lived. Immediate information was given to the police, but no one was apprehended.

After the destruction of the property in 1863, Mr. Simpson had the brickyard watched at night by one and sometimes by two or three men. Peter Platt was watching on the night of the 17th of June, when he was alarmed by the barking of his dog. As he opened the door of his cabin a man struck at him; he backed into his cabin, and immediately a gun was thrust through the window and discharged; he returned the fire with a revolver, and then went out; he saw two men knocking down the "green walls;" he fired at them, and they ran away. As he turned round he saw three other men setting fire to the shed; he called out to his lad to bring his gun, and the three men ran off. Seven men altogether were engaged in this outrage, but little damage was done, as they were so soon disturbed. This outrage on Mr. Simpson's property was resolved on at a special council meeting of the Stockport Brickmakers' Society, at which 12 or 13 members were present; 15*l.* was voted for the job, and the execution of it was entrusted to William Slater. 1863, June 17th.

In July 1864 *Mr. Thornley* was a master brickmaker at Heaton Norris; he would not employ union men. The same committee as in the last case resolved to destroy his property. Holland Cheetham, president of the Stockport Brickmakers' Union, William Slater, the treasurer, and the above-named James Kay, and two others, members of the committee, trampled on 40,000 or 50,000 bricks, and burnt Thornley's sheds, boards, and other implements. The party went provided with chips and matches, and Kay set the shed on fire. The party were paid 10*l.* or 12*l.* by either the treasurer or the secretary of the society. 1864, July.

The Manchester Brickmakers' Society claim an extent of four miles round Manchester in every direction, an area of 120 square miles, as their peculiar district, within the limits of which they permit no bricks to be made except by Manchester union men, nor any bricks to be used except those made within the district. They accomplish the latter object by means of an alliance with the Manchester Bricklayers' Union, the members of which will not set any bricks not made within the above-named district. Levenshulme is claimed by both the Manchester and the Stockport Unions, and is a kind of debateable ground between them.

In the summer of 1867, *Mr. Thomas Aitken* was building print-works at Levenshulme, and making the bricks for the building upon his own ground. In 1866 and the early part of the following year both the brickmaking and bricklaying were being done by Manchester union men. In consequence of the foreman putting on two Stockport bricklayers, all the Manchester men, both brickmakers and bricklayers, left their work. Mr. Aitken then contracted with one Joseph Rigby, a non-union man, to make bricks. On the night of the 15th June 4,500 bricks were trampled on and destroyed by five or six men. 1867, June 15th.

On or about the 28th of August 1867, at the same place, 19,920 bricks were trampled on by five or six men, who were traced from the brickyard in the direction of Manchester. 1867, Aug. 28th.

Messrs. Edward Barrett and *Peter Bailey* are brickmakers within the so-called Stockport district, at Didsbury and Heaton Norris respectively; they employ Stockport Union men, and are on good terms with the union. On the night of the 15th of June 1867, 40,000 bricks belonging to Mr. Barrett, and 47,000 belonging to Mr. Bailey, were destroyed. About 20 men were employed in each of these outrages. About a fortnight after this, Mr. Barrett had some boards burnt. They attribute this destruction of their property to the Manchester Brickmakers' Society. They each offered a reward of 200*l.* to any one who would give such information as would lead to the conviction of the offenders, but in both cases ineffectually. They were compensated for the loss they had sustained by the Stockport Brickmakers' Society, as they had suffered in consequence of the dispute between the two unions. 1867, June 15th.

We had no doubt from the evidence that the above outrages were done by members of the Manchester Brickmakers' Society.

The Ashton-under-Lyne Operative Brickmakers' Union.

The outrages committed in the district of this union arose almost entirely from the employment by the master brickmakers of non-union men.

About the year 1859 the union brickmakers struck for an advance of wages. The masters refused to give the advance demanded, and the men thereupon refused to work. The masters were compelled to seek hands elsewhere, and supplied the places of the union men with non-unionists. The employment of non-union men was against the rules of the society, and deputations from the Ashton Union waited upon the masters to remonstrate with them, and to require that they should employ union men only. The masters in general refused compliance with the demands of the union; whereupon they were subjected to a series of outrages, of which the following were proved before us.

1859, Nov. 4th. *James Taylor*, master brickmaker, had formerly a brickyard at Cockbrook, Ashton-under-Lyne. In the year 1859 he had in his employ several men who had entered or were on the point of entering the Ashton Union, which had been broken up, and was then being re-formed. In the summer of that year, Mr. Taylor, being dissatisfied with the manner in which his men did their work, paid them off as soon as they had finished the job for which they had been engaged, and took on a fresh set of men who were not members of the union. In October, Thomas Harrison, secretary to the Ashton Union, and another man whose name is not known, called upon Taylor, and asked him to take his former men back again. This he refused to do; upon which one of the two men said, "He (Taylor) must take what followed." Taylor resided within a short distance of his brickyard; and on the morning of the 4th November, between one and two o'clock, he was called up by an old man who was employed by him to burn bricks at night. He went down immediately to his yard, and found his sheds on fire. One of those sheds was in process of erection, and all the boards and spars had been laid ready to put on the following morning. These had all been removed into the old shed, and having been piled up in a heap, together with some barrows and screens, naphtha had been poured over them, and the whole set on fire. This shed with its contents was destroyed, and a considerable portion also of the new shed burnt down; but the fire having been discovered, further damage was stayed. A number of bricks were also destroyed at the same time. Five or six men, all members of the Ashton Union, were engaged in committing this outrage; and Charles Barlow confessed before us to having been one of the number.

Taylor continued to employ non-union men until the end of 1861; and then, from fear of further damage being done to him, he discharged them, and employed members of the union instead; from which time, until he gave over brickmaking in 1864, to use his own expression, he "went on comfortably."

1860. *Messrs. Clifford* were master brickmakers at Stalybridge, in the Ashton District. In the year 1860 they were employing non-union men. From time to time applications were made to their men to join the union, but they refused. Not long after, 15,000 to 16,000 bricks were destroyed by being trampled upon. This damage was proved to have been done by members of the Ashton Union. Five men were engaged in the act, one of whom was John Ensor, at that time president of the union. Thomas Barlow admitted that he also took part in it.

1860, Oct. In October of the same year, after a resolution passed at a meeting of the union that "something must be done to Cliffords," some members of the union paid a second visit to the brickyard. Messrs. Clifford were erecting a new shed, and there was a considerable quantity of materials and implements upon the premises. The men collected all the planks, tables, tressels, mouldings, boards, barrows, tubs, riddles, shovels, and everything they could find, added some dried grass or stuff which was on the ground, poured naphtha over the heap, and set it on fire. A man named Joseph Frith, who had been President of the Ashton Union, confessed to his having been concerned in this outrage.

1861. In the following summer 16,000 bricks belonging to Messrs. Clifford were trampled upon.

Notwithstanding these outrages Messrs. Clifford continued to employ non-union men.

1862, June 28th. On the night of the 28th June 1862, John Ward, John Ensor, Robert Ryan, John Toole, Thomas Barlow, Frederick Hipwell, —— Gregory, and Michael Burke, met at a shop behind Ward's house, to arrange another attack upon Cliffords' premises. They then separated, and met again about 12 o'clock at a fence near the brickfield; Ensor,

Ward, and Burke had each a pistol, the others carried bludgeons. Thence they proceeded to the brickfield. At the kiln, which was burning, there were a policeman and two or three other men, who were laughing and talking; the fire of the kiln prevented the union party from being seen, and they succeded in trampling upon some 20,000 bricks without being discovered. They then left, returning the same way they had come. On arriving at Small Shaw, a place about three miles from Clifford's brickfield, they were met by George Harrop, inspector of police, and police constable *William Jump*, who happened to be on duty there that night. When first seen by Harrop, the men were walking in a body on the footpath, but when they came within about 50 yards of the police constables they all left the footpath and walked in single file on the grass in the field. After they had all passed, with the exception of two, Harrop stopped before the last but one, and said, "My man, what is the meaning of all this?" He attempted to pass without speaking, whereupon Harrop said, "Nay, you have done nothing wrong, you need not fear," and put up his hand to the man's breast. The latter then seized Harrop by the arm and shoulder, and said, "Now men, now men, now," two or three times quickly. Harrop then seized tight hold of him with his left hand by the coat collar. He attempted to break Harrop's hold by going under his arm with his head stooping down. By this time the other men had collected together, and stood about six or eight yards from the spot where Harrop and the one man were struggling. Burke discharged a pistol at Harrop, the ball from which knocked the stick out of his hand, and struck him over the right eye; two other shots were fired in quick succession, the balls in each case passing close to Harrop's head. Then Ward and another man attacked him with bludgeons, and a desperate struggle ensued. Harrop having possessed himself of the bludgeon of the man whom he had first laid hold of, struck Ward on the head, who dropped and went on his hands and knees towards the left, where at this time constable Jump was engaged in a scuffle with three others of the party. He then struck the other man with whom he was struggling, and forced him to retire. At the distance of 15 or 20 yards stood a man, who threw large stones at Harrop, one of which struck him on the arm. Harrop went after that man, and while pursuing him he heard two reports of fire-arms in the direction in which he had seen Jump engaged. He returned, and found Jump crouched down against the stump of a tree. He had been shot in the breast, and died almost immediately.

Ward, Burke, Hipwell, Thomas Barlow, Ryan, and Toole were apprehended on suspicion of being concerned in this outrage. John Ward and Michael Burke were tried at the summer assizes at Liverpool, 1862, for the murder of Jump, and were convicted. Ward was hanged, and Burke sentenced to penal servitude for life. Gregory, Hipwell, Ryan, and Toole were discharged in consequence of the evidence not being sufficiently strong against them; additional evidence was subsequently obtained, but Gregory and Ensor had then left the neigbourhood, and Ryan and Toole could not be found. Thomas Barlow and Hipwell confessed to having been of the party, and Hipwell admitted that he was the man who threw the stones at Harrop.

The Ashton Union undertook the defence of the men charged with Jump's murder, and applied to the Amalgamated Brickmakers' Union for subscriptions towards defraying the expenses. This Amalgamated Union, comprising the Unions of Ashton, Manchester, Oldham, Stockport, Wigan, Liverpool, Sheffield, St. Helens, and Birkenhead, had been formed some time before, for mutual help and protection. Each union subscribed to the funds of the Amalgamated Society, and these subscriptions were usually paid at the quarterly meetings held at Manchester. Thomas Harrison, at that time president of the Ashton Union, attended the quarterly meeting of the Amalgamated Union, as delegate, for the purpose of obtaining contributions towards the expense of defending Ward and the other men. He explained to the meeting the object for which he sought their assistance, and the application was taken into consideration. Ultimately all the unions subscribed to the defence fund; but the amount raised proving insufficient, a second appeal was made by delegates from the Ashton Union, and further sums were obtained. The money subscribed amounted to 400*l.*, of which 200*l.* was paid to Mr. Roberts, the attorney for the prisoners, and the remainder spent in making Ensor and Gregory "secure," by getting them out of the way. The money was entrusted to John Barlow, the then secretary, and Thomas Harrison, the then president of the Ashton Union, for these purposes, but no entry was made in any of the books of the unions relating thereto.

We have no doubt that the Amalgamated Union subscribed towards the defence of the men charged with the murder of Jump with a full knowledge that the murder was committed by the men returning from Cliffords' brickyard, and that the outrage

committed by them on Cliffords' property was done in the interest and with the concurrence of the Ashton Union.

1861, May. *William Tetlow* was a brickmaker, and worked for his father, a master brickmaker, at Hurst Brook, Ashton-under-Lyne. The latter had offended the Ashton Union by employing non-union men. He had originally employed members of the union, but in consequence of their refusing to work for him unless he gave them the advance of wages demanded, he was obliged to put up with such men as he could find, and took on non-union men. In May 1861 needles were put into his clay. Upon this, Tetlow, who was not in a large way of business, ceased to employ strangers, and the work was done by members of his own family. An additional reason for not employing union men was, that he had no work for them in the winter, and if employed in the summer, they would look for their work in the winter, when Tetlow and his family could do all the work themselves.

1861. Nov. In November 1861 an attempt was made to blow up and burn Tetlow's house, by throwing bottles containing gunpowder and naphtha into it. Three bottles containing naphtha, with lighted fuzes attached, were thrown into a room downstairs, and exploded, setting the furniture on fire, and doing considerable damage. Two bottles filled with powder and nails were thrown at the window of the bedroom where Tetlow and his wife were sleeping, but, striking against the window frame, they exploded outside, shattering the framework. This outrage was proved to have been committed by seven members of the Ashton Union. Thomas Barlow and Hipwell confessed to having been of the party; Charles Barlow could not remember whether he was there or not, but he stated that "he had been concerned in so many of these affairs, that it had slipped his mind if he was there."

On other occasions, subsequent to this, Tetlow's bricks have been destroyed, and he has often been threatened by the union men, and shamefully ill-used.

1861, Nov. 15th. *John Rogers* was a master brickmaker in the Oldham Road, in the Ashton district. In 1861 he was employing union men; they demanded an advance of wages. Mr. Rogers was willing to give them half the sum demanded, but this they refused, and struck work. Their places were supplied with non-union men. Rogers's conduct was brought before a meeting of the union. Ensor and another member were sent to him as a deputation to endeavour to arrange matters with him, but without success. The matter was again brought before a meeting of the union, when it was suggested that something should be done to make him have union men. Rogers put a watchman, named Samuel Newton, on his premises, to protect them. On the morning of the 15th November 1861 Newton met a man as he was coming to his work, who said to him, "You are going to your work, I see; you had better stop at home, something might happen to you." On the following night, about 12 o'clock, a party of six or seven men, members of the Ashton Union, went to Rogers's brickyard, for the purpose of destroying his bricks. Two of the men were armed with pistols, and the party went determined to resist, in the event of being apprehended or disturbed. Newton was inside the shed when they arrived at the brickfield. Hearing a noise outside, as if an attempt was being made to loosen the board from the bottom of the shed, he went out. On going up to the end of the shed he came in contact with a man, and, putting his lamp in his face, he asked him what he was doing there, adding, "There was no road, and he might get into the brickpits." The man made no reply, but fired at him; the shot went close by the left side of his head. Newton said, "This is nice work, shooting at a man, and not speaking to him;" and then, stepping back, he drew a pistol out of his pocket, with the intention of firing it. Another man, at that instant, sprang up from the back of the shed, and shot Newton in the head as he was in the act of discharging his pistol. They all then ran away. A few days after a ball and slug were extracted from Newton's head, and it was eleven weeks before he was fit for work. Thomas Barlow and Charles Barlow confessed to having been concerned in this outrage also.

Joseph Barlow was a master brickmaker at Droylsden, in the Ashton district. He is brother to the above-named Charles Barlow, and uncle to Thomas and John. Joseph Barlow was in disfavour with the union, from not employing union men. A deputation was sent from the union to warn him; and one night, between 12 and 1 o'clock, two stone bottles, filled with gunpowder, were thrown at his bedroom window, but, striking against the woodwork, they exploded outside. He, with his wife and child, was in bed at the time. The following morning the fragments of the two bottles were found underneath the window, together with a third bottle, which

had not exploded. On another occasion, a quantity of clay sufficient to make 400,000 bricks, was "needled."

Mr. Barlow was compelled to place a watchman on his premises. One *John King Butterfield* was employed in this capacity, and it was also his duty to put coals on the fires at night. Some time in 1861 Butterfield was told by union men that something would be done to him if he watched or did the firing for Mr. Barlow. He continued his duties as before; and some time after the threat, about 12 o'clock at night, his horse was hamstrung in the stable, and otherwise so injured that it had to be shot. 1861.

In consequence of these repeated outrages Mr. Barlow was compelled to turn away non-union men, and to employ union men instead.

John Barlow and Thomas Harrison, at that time respectively secretary and president of the Ashton Union, admitted that these outrages were committed at the instance of the union, and had been paid for out of the union funds.

Thomas Shepley superintended the business of his father, who was a master brick- 1861, Feb.
maker at Hyde, in the Ashton district. A branch of the Ashton Union had been established at Hyde, for the convenience of the members living there, but this branch was subject to the rules of the parent society. In 1860 Shepley employed union men, but, on their striking for an advance of wages, non-union men were taken on in their place. Upon this, the usual request was made to Mr. Shepley by the union, to discharge the non-union workmen, but he refused to comply. In February 1861 a hut or cabin in his brickyard was broken into, and his men's tools and wheelbarrows destroyed. A paper was found pinned on the door of the hut, containing a notice threatening the men's lives if they continued to work for Mr. Shepley.

The May following a considerable quantity of clay was damaged by needles and 1861, May.
short nails being put into it.

Mr. Shepley had in his stable two valuable horses. One night in the following 1861, Aug.
August, between 11 and 12 o'clock, four men, who were members of the union, proceeded to the stable; two of them watched outside, while the other two entered the stable. One of these, with a razor which he had taken for the purpose, severed the hind-leg sinews of both horses, which afterwards had to be destroyed.

Amongst the non-union men who worked for Mr. Shepley was one named *Joseph Wyatt.* In the year 1860 Wyatt had been a member of the Ashton Union, but having been fined 30*s.* for expressing his determination to work at Shepley's yard independently of union men, he left the society. In 1861 he was made manager of the yard. Wyatt lived about two miles from the yard, and was constantly watched and threatened by union men as he was going to and returning from his work. On several occasions he found lying in his path apples and oranges which had the appearance of having been poisoned. Wyatt gave information of the circumstance at the time of its occurence, to the police authorities, but no examination of the fruit was made. He could, however, in no way account for these oranges and apples being so frequently and in such numbers placed in his way, except on the supposition that they were poisoned, and intended to injure him. 1861.

William Hibbert carried on the brickmaking business near Hyde. He employed 1861.
non-union men, and a bad feeling arose, in consequence, between him and the union. In 1861 a large quantity of needles were thrown into his tempered clay. In consequence of this, and from apprehension of further damage to his property, he discontinued the trade.

John Hartley was a master brickmaker at Dukinfield, in the Ashton district, who 1858 to
had always employed non-union men. During the years 1858 to 1863 damage was 1863.
done to his bricks upon five or six different occasions, but the actual loss sustained was not great. On one of these occasions, namely, in the year 1862, the outrage was committed by two members of the Ashton Union, Richard Brown and John Middleton Walker. These men were discovered in the act, were apprehended, committed, and sentenced to six months' imprisonment for the offence.

Thomas Hague had been a master brickmaker at Hyde for 16 years. He had 1861.
generally employed union men, but in the year 1861, in consequence of repeated turn-outs, he resolved not to employ them again, and supplied their places with non-unionists. Soon after this, about 7,000 of his bricks were spoiled, and both he and his men were frequently threatened. The non-union men employed by him were

continually going away, and when asked why they left, they said "they dare not work."

1861 On one occasion, in 1861, a man came to Mr. Hague as a delegate from the union. He said that "he (Hague) was much respected, but they had come to the determination to shoot him." Under the influence of this threat, and in fear of his life, Hague turned away the non-union men in his employ, and took on union men. With these he finished the "bit of clay" he had in hand, told them they must make bricks for themselves in future, and gave up the business.

1860, July. *John Warden* was a master brickmaker at Newton Wood, in the Ashton district, and was carrying on his business there in 1860. He employed non-union men. In the spring of this year he was solicited to join the Brickmakers' Union, but refused. In July, eight members of the union, three of whom upon their own confession were Frederick Hipwell and Thomas and Charles Barlow, went to his brickyard. They collected together the various tools, implements, and other things they found there, consisting of barrows, trestles, boards, and other materials, piled them together in a heap, poured naphtha over them, and then set them on fire. The then secretary and president of the Ashton Union admitted having paid 15*l.* out of the union funds to the perpetrators of the outrage.

1861, Feb. 19th. *William Henry Wylde* was a master brickmaker in Turner Lane, in the Ashton Union. The union men in his employ struck for an advance of wages, and he then took on non-union hands. On the night of the 19th February 1861, six or seven Ashton Union men went to Wylde's brickyard, and put a quantity of needles and broken glass into his clay.

1861. At that time Wylde had a man in his employ, named *Moorhouse*. The men, having destroyed the clay, proceeded to the shed to see if there was a watchman there. One of them knocked at the door; and Moorhouse, who happened to be inside, went to the door, and said, "Who's that; is it you, Ned?" meaning the watchman. Some one answered "Yes." He opened the door, and immediately one of the men attempted to fire a pistol at him, but it missed fire, and then the man struck him on the head with it. Moorhouse struggled and freed himself, and as he was running away he was fired at, but not hit. Charles Barlow confessed to having been one of the party.

Five or six months after this Wylde took the union men again into his employ, the non-union men either having left of their own accord, or having been enticed away by the union men. After the union men had returned Wylde had no further trouble with the union. He gave up business, however, about four years ago, in consequence of trade outrages. "They had reached," he said, "such a pitch that nothing could be done with it."

1861, Jan. *John Kirk* was a master brickmaker at Ashton. In 1861 he was employing non-union men, and in January of that year an attempt was made to set his house on fire. About one o'clock in the morning three bottles were thrown into the window of his bedroom, in which his father-in-law, an old man of 82 years of age, and a sister-in-law, were sleeping. He and his wife occupied an adjoining room at the back. Two of these bottles, which were of glass, contained naphtha; and the bottles being broken by the concussion, the naphtha was spilled on the floor, and fragments of the bottles flew about the room. The third bottle, which was of stone, and contained gunpowder, did not explode, as the fuse attached to it either had not been lighted, or, if lighted, had gone out. There was also a fourth bottle containing powder, which struck against the window frame and exploded outside, filling the room with smoke. Six members of the Ashton Union were engaged in this attack upon Kirk's house. One of them was armed with a pistol, and kept guard with another man, while the others threw the bottles into the house. Two of them, Charles Barlow and Frith, confessed their participation in the outrage; the latter, as has been before mentioned, having filled the office of President of the union.

1861, April. In the following April Mr. Kirk had a quantity of clay damaged by needles being put into it.

Messrs. Martin and Smethurst were master brickmakers at Guide Bridge, in the
1862, April. Ashton district. In 1861 they were employing non-union men. In the month of April 1862 from 5,000 to 10,000 of their bricks were destroyed by being trampled upon. This damage was done by members of the Ashton Union. Hipwell and Thomas Barlow confessed to having been of the party.

To prevent further damage being done to their property, Messrs. Martin and Smethurst engaged Richard Dunning to act as watchman during the night time. On the night of June 27th, in the same year, the night before police constable Jump was shot, two of their men were burning at the kiln in the brickyard. Dunning, armed with a gun, was watching; he saw two men come together into the brickyard; they separated; one went near to the kiln where the two men were burning, the other came on to the railway bridge, nearer to the spot where Dunning was standing. Dunning saw the former shoot at the kiln-burners, and immediately fired his gun at the man on the bridge. The two men then ran away. One of the kiln-burners was hit in the back with shot. 1862, June 27th.

At the time of these outrages Messrs. Martin and Smethurst were not making bricks for sale, but for their own use in building a cotton mill. They had supposed it would matter little to the trade whether they employed union or non-union men. We believe this outrage to have been committed by union men.

Thomas Blocksage was a master brickmaker at Dukinfield in the Ashton district. In 1860 he was employing union men. Some of the work not having been done to his satisfaction, he stopped a small sum out of their wages. In consequence of this they turned out, called a district meeting, and the union fined him 5*l.* for the loss of a day's labour to the men, who refused to return to work until the fine was paid. Mr. Blocksage at first refused to pay the fine, but subsequently gave way. Being annoyed, however, at the treatment he had received from the union, he threw up the contracts he had then on hand, ceased work for two years, and did not resume brickmaking until 1862.

On recommencing business he employed non-union men only; and in the summer of 1862, 50,000 to 60,000 of his bricks were trampled upon, and some of his walls of bricks pushed down. Seven men, members of the Ashton Union, were engaged in this work of destruction. Hipwell and Thomas Barlow admitted being of the party. The arrangement of this outrage had been entrusted by Thomas Harrison, the then president of the union, to James Kay, the delegate of the Manchester Brickmakers' Union, who received from Harrison out of the Ashton Union funds 25*l.* in payment for this and another outrage. In consequence of this outrage Blocksage's premises were placed under the protection of the police. On a subsequent occasion in the same year, late at night, a number of men were seen by a policeman concealed under a hedge in the immediate neighbourhood of the brickyard, but before any of them could be apprehended they made off. 1862.

In 1863 and 1864 deputations came to Mr. Blocksage from the union, to request that he would ask his men to join the society. His reply was, that if his men wanted to go into the union they might do so, and that he should not object to it. His men declined. Soon after a visit from one of these deputations in 1864, an attempt was made to set his shed on fire, and in the latter end of the same year one of his horses was stabbed in the stable. His men were often threatened by members of the union. 1864.

Notwithstanding the attacks made upon his property, Mr. Blocksage expressed his opinion that the union men "had dealt very leniently with him, as he had other property at stake by which they might have punished him severely."

John Clifford, at present a labourer, was in 1864 a brickmaster, carrying on business at Ridgy Lane, Stalybridge, in the Ashton district. In May 1864 several members of the Ashton Union called upon him, and complained of his employing non-union men, and of the wages he was then paying, which were a little less than the club price. They wished him to turn away the non-union men, and to take a gang of their men instead, adding that it would be better for him if he did take their men. Clifford refused to comply with their request. A few days after, on Whitsun Friday night, 11,000 of his bricks were trampled on. 1864. Whitsun Friday

In the beginning of the following November a shed was set on fire, and two-thirds of it destroyed. Some hurdles had been collected together, placed in the shed, and then fired. On the same night a valuable dog which was in the shed belonging to Clifford was killed, and upwards of 2,000 bricks destroyed. Clifford's house was situated about 200 yards from the brickyard. At the latter end of November, about 12 o'clock at night, a bottle filled with combustibles was thrown into the window of his bedroom, where he, his wife, and four children, were then sleeping. It caught the back of a chair, and then rebounded into the street, where it exploded. The bottle had been wrapped in a bit of rag steeped in gas tar. The next morning 1864, Nov.

there was found, buried in a heap of ashes about a quarter of a mile from the house, another bottle containing powder with a fuse attached, which probably there had not been time to throw, as Clifford immediately upon the explosion whistled for the police, six of whom came directly to the spot.

After this last outrage Clifford employed a watchman to guard his premises. He provided him with a revolver and two large dogs, the watchman refusing to undertake the duty unless he had them for his protection.

Clifford was abused and threatened by the union men, and dared not go to Ashton after dark. Believing his life to be in danger he gave up the brickmaking business in August of the following year, as, to use his own words, he "thought it better to "give it up than to lose his life."

1866. *James Harrison* and his brother were in business as brickmakers at Ashton in the year 1866. There was upon their property a considerable quantity of clay, which, when ground, was available for making bricks, but which, if not ground, was useless. There was clay sufficient to produce 100,000 bricks a year. In order to make this clay practicable Messrs. Harrison proceeded by way of experiment to grind it by machinery; but their men objected to its being ground, because they considered it was infringing upon their labour, although they had their own tables and stools to work it when ground. No sooner had Messrs. Harrison commenced grinding than they were waited on by a delegate from the Ashton Union, with two of their own men, who declared they would not work for them if they, Messrs. Harrison, "did like that." Messrs. Harrison said they should try it, and the men went away. As they were going, one of the men said, "Come, we have plenty of money in the box, "and thou wilt not always be master." This conversation took place in the middle of the week. Messrs. Harrison told their men to keep a sharp look out, as they thought they would be on them pretty quick; and on the Sunday following, about 12 o'clock at night, while the watchman was getting his supper, the shed was fired. The shed was fitted up with shelves, on which coals, chips, and other stuff had been crammed and set on fire. There was a considerable quantity of timber in the shed, and if the fire had not been discovered immediately it must have been burnt down.

1867. In the summer of the present year, 1867, *James Turner*, a neighbour of Messrs. Harrison, was going along the footpath by their brickyard, about 10 o'clock at night, when a man dressed in white clothes came up to him, struck him two very violent blows on the face and forehead with a stone, cutting his lip and breaking his nose, and then ran away, leaving him insensible. Turner and the watchman of Messrs. Harrison were about the same size, and the outrage could only be accounted for on the supposition that he was mistaken for the latter.

The greater number of the foregoing outrages committed in the Ashton district, already mentioned, were confessed to by parties—members of the Ashton Union—who were personally concerned in them; and it was also admitted by John Barlow and Thomas Harrison, who were respectively secretary and president of the society during the greater portion of the years 1860, 1861, and 1862, the period when these outrages were most frequent, that they had all been promoted by the officers of the Union, with the concurrence of a large majority of its members, and had been paid for out of the union funds. Neither Barlow nor Harrison was able to speak with accuracy as to payments made on each particular occasion. "There were so many jobs," they said, "that they could not remember whether they paid for them or not;" but they stated that "they had no doubt the outrages were all paid for either by themselves "or by the then acting officers of the union."

The Manchester Operative Brickmakers' and Bricklayers' Unions.

1862. In 1862 *Joseph Frith*, who at that time was a master brickmaker, and a member of the Ashton Union, sent some bricks from his premises, which were in the district of the Ashton Union, to Belle Vue Gaol, which is in the Manchester Union district. The two carters who went with the bricks were both beaten, and by the direction of members of the Manchester Union.

If a person in the Manchester district were to obtain bricks from another district no brickmaker in the Manchester district would supply him with any unless he sent

back what he had thus obtained in violation of the rules of the Manchester Union. This was represented to us as a common occurrence.

In the year 1864 there was a company called the *Ardwick Brickmaking Company*, which was in the Manchester district, and which made bricks by machinery. For some time they had been in the habit of having timber from Messrs. Bennett and Co., timber merchants, whose premises were in Hyde Road, Manchester. The members of the Manchester Union are all hand brickmakers, and it is against the rules of the union that bricks should be made by machinery. It seems that in consequence of their carters, who went with the timber to the Ardwick Brickmaking Company, being threatened, and also of one of their horses having had his throat cut, the Messrs. Bennett had refused to supply the company with any more timber. At the beginning of January 1864 the timber which was in the yard of the Ardwick Brickmaking Company, and which had come from Bolton, was covered with pitch and tar, and then set on fire, and, though not destroyed, was rendered useless for the purpose for which it had been intended. This was done at night by four men, and there was no reason for the outrage, but that the company made bricks by machinery. 1864, Jan.

The same company had also a gray mare, which was burnt to death in May of the same year 1864. The brickmakers who perpetrated this outrage broke open the stable door between 2 A.M. and 3 A.M., tied the mare fast by the head to the iron hay-rack, put shavings under her and all over the stable where she was, and then set fire to them. The fire was discovered by a neighbour in time to save the stable from being burnt; otherwise five other horses, which were in it, would have shared the same fate. The reason, why the gray mare was selected for destruction, apparently was, that this mare was usually employed in carrying timber to the machine brickmakers. 1864, May.

This same company had a boy of about 12 years old in their service, whose name was *Thomas Cole*. In August 1864 this boy was sent about 7 P.M. with some letters to the post office, which was about a quarter of a mile from the company's premises, and the way to which lay through a comparatively unfrequented district. As he went, he was seized by some brickmakers, who, one of them taking him by the shoulders, and the other by the legs, threw him into a pit of water. The pit was 40 or 50 yards in length, by 30 yards in breadth, and at that time was about 10 or 12 feet deep in water; the sides of it were steep, the banks being about 12 or 14 feet above the surface of the water. The men, after committing this outrage, ran away; and had it not been that a mechanic, who accidentally came up, and seeing what had happened, went into the pit, and got the boy out, the boy, being unable to swim, would have been drowned. 1864, Aug.

In November 1864 the same company had their joiners' shop set on fire at night by some brickmakers; and in the following month, December, a bottle of some combustibles was thrown into the cellar of the house of the manager of the company. The bottle contained gunpowder and a sort of flannel, which had been saturated with spirits, and before the bottle had been thrown into the cellar, two lots of hay and straw had been pushed through the cellar window. There was attached to the bottle a fuze which had been lighted, but had apparently gone out. There was in the cellar a quantity of firewood, very near to which the bottle had been thrown, and if that had caught fire, the house must have been burnt down. 1864, Nov.

The machinery, which this company used for brickmaking, was constantly breaking down, the cause of which was unknown; but the nature and frequency of the injuries were such, that the injuries could only have been done by some persons employed on the premises, and no reason could be given for them, or for any of the above-mentioned outrages committed against persons in the service of this company, except that they made bricks by machinery. It was in consequence of the persecution to which they were subject, and which was attended with such serious loss to them, that the company gave up their business.

William Alfred Atkins was a machine brickmaker in Cheetwood Lane, in Manchester; and after he had been repeatedly threatened because he made bricks by machinery, the roof of the engine house on his premises was blown off by gunpowder in February 1862. There was frequently something put into his machine, or the wheels of it, so that it often broke down; and sometimes the water had been let out 1862, Feb.

of the boiler, so that it might blow up. His bricks had frequently been damaged. The men he employed were non-union men, some of whom had been severely beaten with sticks; and no cart could come to his yard, but it was watched, and the carters threatened. Atkins himself had received a letter containing a sketch of a coffin, and telling him to prepare for death.

1863. A burner, named *Wood*, in the employ of Messrs. Atkins, and who was a married man with a family, had a bottle full of gunpowder and slugs, with a fuze attached to it, thrown into his bedroom window, about 11 P.M., some time in 1863. He was then living in Cheetwood Lane, in Manchester. Fortunately, though in the room, he was not in bed at the time; but he heard the crash, and, seizing the bottle, he threw it out of the window, when it exploded outside the house. The slugs were found all round the place where the bottle had exploded.

1863. In 1863 a carter, named *Wogden*, in the employ of Messrs. Atkins, had his hay-stack set on fire. This same carter had on two separate occasions been fined 5*l.* by the Manchester Brickmakers' Union, and had been obliged to pay the money, for having wheeled machine-made bricks. If these fines had not been paid, he would not have been allowed to work anywhere in the district.

This system of terrorism and outrage went on for two or three years, till at last Messrs. Atkins and Co. were obliged to give up their business.

1863. In 1863 *Messrs. Elliotson and Dickson* had six houses, which they were building near Regent Road, in Salford, pushed down, because they were using machine-made bricks. The houses had been built up to the first story, when 50 brickmakers went one night, and levelled them to the ground. We have no doubt that this was done by members of the Manchester Brickmakers' Union. The machine-made bricks which Messrs. Elliotson and Dickson had been using had been made by Messrs. Atkins and Co.

1863. The union district of Manchester and that of Ashton-under-Lyne are, as alleged by the members of the Manchester Union, divided by the canal at Droylsden. The members of the Manchester Union will not allow any bricks to be brought out of Ashton into their district. *Messrs. Bates and Co.*, who were builders and brickmakers, had one yard on the Ashton side of the canal, in the Ashton district, and two yards on the Manchester side, in the Manchester district, about a mile from the canal; but the Ashton Union disputed the boundary between the two districts, and asserted that the two yards of Messrs. Bates and Co. were within their district. However, because Messrs. Bates and Co. had carted some bricks made by themselves in their yard on the Ashton side of the canal into their own yards in the alleged district of the Manchester Union on the other side of the canal, a large quantity of their bricks were in 1863 trampled upon and spoilt.

1863, April. In April 1863 *John Lomas* was building some houses in the Manchester district, with bricks made by machinery. James Kay, the delegate of the Manchester Brickmakers' Union, came to him, and told him the union would "forgive him" if he carted the machine-made bricks back, and used only hand-made bricks in future. On Lomas refusing to comply with this demand, Kay replied, "If you do not send them back again, you may mark the consequences; I will shift your head:" by which expression Lomas understood him to mean he would blow his (Lomas's) head off. Shortly afterwards, the buildings on Lomas's premises were blown up, and set on fire by means of canisters full of gunpowder, which had been placed there for that purpose.

1863. In 1863, *Robert Ellerton*, a bricklayer, was building some houses in Crowther Street, Salford, with machine-made bricks, and had got them nearly a floor high, when at night the greater part of them were pushed down.

1864. In the spring of 1864 he was building some houses in Radnor Street, Manchester, and for that purpose was using bricks made by machinery as well as those made by hand. He was informed by James Kay, the delegate of the Manchester Brickmakers' Union, that measures would be taken to prevent him from carrying on his work, because he used bricks made by machinery; and the consequence was that Ellerton had to give up a contract he had entered into for building twelve

houses in that street. It was proved that it was better for a bricklayer to use machine-made bricks, as they were cheaper, and there was not so much waste in them.

Mr. Bramall was the contractor for the Assize Courts at Manchester, and employed men belonging to the Manchester Union. In April 1864 a strike took place among the bricklayers' labourers; and then the bricklayers themselves, and afterwards the joiners, also struck. The places of the men who had thus struck were filled up by non-union men. Members from the unions of the joiners, the bricklayers, and the labourers (all of which unions were at Manchester) picketed the men at work with Mr. Bramall; and, on the 22nd May 1864, three of the bricklayers, *Wilfred*, *Ratcliffe*, and *Upton* (who were union men, but who had stayed on when the others had left, and were at work at the Assize Courts), were waylaid as they went home, and very much injured. Two of the men, John Nolan and Thomas Daly, who had committed the assault, were taken up for it, and sent to be tried at the sessions. However, before the trial came on, the main witness—viz. Wilfred, who had been very badly used—was got out of the way, and taken up to London by some members of the Bricklayers' Union. The father of another witness, George Henry Carr, was paid ten guineas by some members of the same union to induce his son to refuse, at the trial, to swear to the identity of Nolan; and Nolan was consequently acquitted. Ratcliffe and Upton, the other two men who were assaulted, were also taken up to London by members of the same union, and got out of the way by the time the trial came on. 1864, May 22nd.

Daniel Callaghan, a bricklayers' labourer, had belonged to the union; but, because he could not pay the levy, which was 2*s.* 3*d.* every Saturday night, he was turned out of it. He was, by order of the committee of the Bricklayers' Union, stopped at his work; and on one occasion John Nolan, the delegate of the Bricklayers' Union, threatened to throw him into some boiling lime, and endeavoured to put his threat into execution, but was prevented doing so. Callaghan was afterwards violently assaulted, his eye much injured, and his teeth knocked out. From the injuries he received, from which he never quite recovered, he was for some time unable to do any kind of work, and he could not even walk in the streets without fear of being assaulted by the union men. Before some of the men, who had committed the assault, could be apprehended, the union paid the passage of one of them to America, and another left Manchester.

Benjamin Armitage was in 1864 building a new mill in Pendleton with machine-made bricks. He employed a watchman, named *George Goodie*, on his premises. About 12.30 P.M. in May 1864, Goodie was attacked by twenty or thirty brickmakers. They pulled the newly built walls of the mill down, and severely beat and injured Goodie, saying at the same time that they meant to kill him. Goodie was so injured that he was unable to work at all for 16 weeks, and has never recovered from the injuries he then received. 1864, May.

George Taunton, a master brickmaker, whose works were in the Manchester district, in June 1864 had some bricks spoilt, for which he could not in any way account, except that he had strongly advocated bricks being made by machinery. 1864, June.

John Ashworth, a master bricklayer, who carried on his business at Salford in the Manchester Union district, had in June 1864 a large quantity of bricks destroyed. There was no doubt that this outrage was committed by the members of the Manchester Brickmakers' Union; and the only reason why it was committed was because one of his sons, who was working for him, was not a member of the union, though all the other men who were working for him, including another son, were so. In addition to this destruction of his property, all the union men (excepting his son) left his service. A man, named Patrick Cullens, was taken up on suspicion of having been concerned in the destruction of Ashworth's property; and for that reason two members of the union, named George Mannering and James Kershaw, came to Ashworth and told him that he must pay 50*l.* to the union before he should be allowed to make any more bricks. Ashworth refused this demand, and from not being able to get any union men to work for him he employed non-unionists, and began to make bricks by machinery. The brickmakers and bricklayers then combined against him, and he could find no market for his bricks. This combination extended over the whole of the Manchester 1864, June.

district, but not beyond it. This state of things continued till August 1865, when Mr. Ashworth received the following letter:—

To Mr. Ashworth,

Dear Sir, Friday Morning, August 15, 1865.

I think it my duty to inform you that at a meeting of the Operative Brickmakers, held in their own hall yesterday, there was a committee appointed to consider the best means of shooting you, or otherwise putting an end to your existence. In writing this I put myself in quite as much danger as yourself, if it should come to the knowledge of this society of ruffians, and so beg that you will not let my trouble be thrown away, but put yourself upon your guard at once. Now, considering that I have done my duty, I beg to subscribe myself

A Well-Wisher.

P.S.—If you should value this communication any, please advertise the receipt of it in to-morrow's "Guardian" in the following words:—"Received, Well-Wisher's Letter.—J.A."

1865, Aug. 13th. There was a man of the name of *John Parkes*, who, in height, size, and dress, very much resembled one of Mr. Ashworth's sons. About 10 days after Mr. Ashworth had received the above letter—viz., on the 13th August 1865—about 11 P.M., Parkes was walking on the road, about 70 yards from Mr. Ashworth's house, when he was attacked by three men, and violently beaten on the head and elsewhere, so as to be rendered insensible for nine days. All the front of his head, and the whole of his left side, from the head to the foot, were injured. His eye, from the injury to which he has not recovered, was cut open. These injuries seem to have been done with a bottle, which was found near the spot, broken into many pieces. Another bottle was also found full of blasting gunpowder, with a fuze attached to it.

In consequence of what had happened, and his continued inability to sell his bricks, Mr. Ashworth gave up his business.

1866. The township of Whitefield is out of the Manchester district, but is the next township to it, and there is a bricklayers' union in that township. *Edward Hindley*, a builder, had in 1866 a contract for the bricklayers' work in constructing the Prestwich Reservoir. The work to be done was in the Manchester district, and he was using Manchester bricks. His workmen belonged to the Whitefield Union, and he had a boy, of the age of 17, who worked for him. The members of the Whitefield Union at first complained that the boy had not been bound as an apprentice; and said that, unless he became one, all the men should leave their work. Upon this Hindley had the boy bound to him. The Whitefield union men then said that the boy was too old, and that no one should be bound as a bricklayer's apprentice who had passed the age of 15. The men accordingly stopped work, and the Whitefield union men persuaded the Manchester Union men, both brickmakers and bricklayers, to prevent Hindley having any more bricks in the Manchester district.

1867, Feb. A man, named *James Dalton*, who was a married man, with a family of children, and had ceased to be a member of the union, had been severely beaten by members of the Manchester Union, and threatened to be thrown into a lime-pit for having carried bricks made by machinery. From the threats which were constantly made against his life, he had been compelled to leave Manchester for a twelvemonth. He returned, however, to Manchester in February 1867, when he was again beaten severely by members of the Manchester Union. On one occasion, when some members of the Manchester Union had come to his house for the purpose of beating him, and had not been able to find him, one of them struck his daughter, a little girl between 11 and 12 years of age, on the face with his fist, and knocked her down. In consequence of the persecutions to which he had been subjected by the members of the Manchester Union, he had been unable to get work in Manchester.

Dalton obtained a warrant against Fyland, the man who had threatened to throw him into a lime-pit, but Fyland absconded. Thomas Riley, who had severely beaten Dalton, was apprehended and sentenced to one month's imprisonment; and John Riley, Murray, Deffley, and McLaughlin, who also on another occasion had assaulted Dalton, were bound over to keep the peace. Fyland and all the men who had committed these assaults were members of the Manchester Bricklayers' Labourers' Union.

1867, July 6th. *Messrs. Nasmyth and Co.*, engineers at Patriscroft, whose works are in the Manchester district, were unable to procure bricks suitable for their purpose in that district, and accordingly sent to procure some from another. They were informed by members of the Manchester Union that no bricklayer would be allowed to set

bricks which had been brought into the Manchester district from any other. Messrs. Nasmyth and Co. then determined to make bricks for themselves with clay on their own property, and for that purpose employed a man named Twigg, who was not a member of the union. They were told that they should only employ members of the union, and that, if they did not do so, they must take the consequences. Twigg was offered 5*l.* to leave their service, which he refused to do. On the 6th July 1867, Messrs. Nasmyth and Co. had some bricks destroyed by being trampled upon.

We have no doubt that these outrages were all promoted and encouraged by the Manchester Brickmakers' and Bricklayers' Unions.

Colliers' Unions.

Mr. John Knowles was the managing partner of a firm who were colliery proprietors at Pendlebury, which is about four miles from Manchester. There is a trade union among the colliers at Little Lever, near Bolton, and the firm of *Messrs. Knowles* had not for the last 20 years employed union men. They had collieries also at Pendleton, Edge Croft, Clifton Hall, Clifton Moss, Stone Clough, Little Lever, Ratcliffe, and the Cleggs, near Rochdale. The hands in their employ were about 3,000 altogether. In November 1866 about 1,400 men left their service, and joined the union. At that time the colliery trade was in a depressed state, and the firm sent to other parts of the country for hands. They obtained about 300 men from Staffordshire, and 200 from Cornwall. The union men who had left the service of the firm had been tenants of cottages belonging to the firm; and as their tenancies could not be immediately determined, Messrs. Knowles prepared beds, and the necessary accommodation for the new hands, in their works and store rooms at Pendlebury. In March 1867 one of the store rooms there was set on fire; and, had not the fire been immediately discovered, the loss of hundreds of lives must have been the consequence. The store room, in which the fire took place, was full of oil, tallow, and hemp; and in the room adjoining, some of the new-comers were residing. Close to the spot where the fire had taken place, was a gasometer, with a large pressure of gas on it; and not very far from that, was a powder magazine, containing about a ton of gunpowder, and also a room in which gun cotton was kept. We have no doubt, from the evidence, that this was the work of an incendiary, and that it took place in consequence of the dispute with the union. As it was, the damage done was about 800*l.* 1867, Mar.

William Holford was one of the new hands employed by Messrs. Knowles. Between 11 and 12 o'clock at night a bottle, full of combustible materials, was thrown into the bedroom where he and his wife were sleeping. The bottle exploded, but fortunately did no injury. Holford had previously been frequently called "knobstick," and had been told by the union men that he should rue having come to Pendlebury.

Other non-union men in the employ of Messrs. Knowles were much insulted by the union men, and some of them were seriously injured. One man, *Henry Jones*, was knocked down and rendered senseless, and cut under the eye; and another, *Matthew Bodling*, was knocked down, and left for dead on the ground. His ear was split open, his skull knocked in, and his cheek bone broken; he was also severely kicked on his side. From the effect of these injuries he is never likely to recover.

The strike of the men in the employ of Messrs. Knowles cost the union about 16,000*l.* Many of the union men were allowed by Messrs. Knowles to return to their employment, but only on condition that they would give up all connection with the union; and at the time of our enquiry about 80 of those who had gone out on strike were still out of work, and receiving pay from the union.

Manchester Warpers' Union.

Charles Mason was a warper, living at Newcastle Street, Hulme, in Manchester; and there is a trade union of warpers at Manchester. Mason taught his wife and two of his sisters to warp. The members of the Warpers' Union remonstrated with him for this, and said they would not permit it, as it was against their rules to allow women to warp, for, if women were introduced into their market, the wages of the men would be reduced. In November 1857, about 11 P.M., Mason was persuaded to go into a public house in Manchester, where he found several members of the Warpers' Union. They offered him some ale, but on observing that the colour of it was unusual, and also that there was some sediment in it, his suspicions were aroused, and 1857, Nov.

he refused to drink it. He then left the public house, when the men followed him, one of them, named Doherty, forcing himself into conversation with him as he walked along the street. When he got near his own house, and was still in the street, a rush was made at him, and a man named Hall threw vitriol into his eyes. He suffered great pain, and for 12 months was unable to do any work at all. Hall and Doherty, both members of the union, were tried at the Liverpool Assizes for the offence; and, on being found guilty, Hall was sentenced to six years' penal servitude, and Doherty to four years'. In April 1861 Doherty was released, having completed his term of servitude; and a few days afterwards, without any application from Doherty, it was resolved by the union that a sum of 20*l.* should be given to him. In accordance with this resolution, the president of the union, at a meeting, when not less than 100 members were present, gave to Doherty the 20*l.*

The Oldham Operative Brickmakers' Union.

1858. *James Wrigley*, a brickmaker at Oldham, was employing a burner who was not a member of the union. In consequence of this, all his other men, who were members of the union, left his service; and shortly afterwards, in 1858, his shed was set on fire, and some of his barrows and planks were burnt. He had also needles put into his clay, and his bricks spoilt. The consequence was, that he turned away the non-union men in his service, who had done him no damage, and took into his employ union men, to whom he attributed the injuries he had received. He has never been disturbed in any way since.

1859. *John Holt*, who carried on business as a master brickmaker, at Royton, near Oldham, in 1859 had bricks destroyed, and needles put into his clay, for having employed non-union men. Those who did this outrage also collected all the tools, barrows, &c. they could find on Holt's premises, put them together into a shed, and then set fire to the shed. Some of Holt's workmen were seriously injured by trying to work the clay after the needles had been put into it.

We have no doubt, from the evidence, that these outrages were done by members of the Oldham Union.

1859 and 1860. *John Smethurst*, who was a master brickmaker in the Oldham district, had bricks destroyed in 1859 and 1860, for having employed non-union men. From the annoyances and injuries which were done to him from time to time, and from being kept continually in dread of something happening to himself or his property, he gave up his business in 1862, and has ceased to continue in the trade.

Isaiah Greaves, a master brickmaker in the Oldham district, took into his employ a man named Davenport, who had left the Oldham Union in consequence of having been fined. The members of that union came to him several times, and demanded of him that Davenport should be discharged from his service, but he refused to yield
1858. to their demand. In consequence of this refusal by him, Greaves in 1858 had his
1859. bricks destroyed, and needles put into his clay; and in October 1859 a grenade was thrown at him just as he was going into his house. It took a part of his trowsers, stocking, and a portion of his skin away, but, fortunately, did not do him more damage. The grenade was found to have contained knife-blades and horse-nails, and various
1863. sharp instruments. In 1863, when he was still employing Davenport, Greaves had his engine-house blown up. Those who did this outrage had taken off the cylinder top, and had put down a can of powder inside the cylinder, with a fuse attached to it, and had then screwed the cylinder down again.

In consequence of the demand that had been made upon Greaves to discharge Davenport, and of what had happened to him, a meeting of the master brickmakers took place, when they determined no longer to employ union men, and accordingly dis-
1859, Sept. charged all the union men in their service. *John Brooks* was one of the master brickmakers who had been party to this resolution, and had acted on it by discharging the union men in his service on the 17th September 1859. Afterwards, and in that same month, he had two stacks of hay set on fire, about 12 o'clock at night; but fortunately the fire was seen, and, on an alarm being given, was put out. In several places near the stacks were found lucifer matches and chips put together; and in the same field, where the stacks were, a card with the name of John Barker on it, a member of the Oldham Union, was discovered.

1859. In October or November of the same year some cows belonging to John Brooks were poisoned. One of the cows was opened and examined, and was proved to have

died from poison; and in the field where the cows were, were found a number of cakes, which, upon being analysed, proved to be made of meal or bran and water, mixed with arsenic.

In the following May, Brooks also had a quantity of bricks spoilt, and needles put into his clay. 1860.

We have no doubt that all these outrages were committed by members of the Oldham Union.

The Bolton Joiners', Masons', and Bricklayers' Unions.

Jonah Thompson carried on business as a builder at Bolton. In 1866 he had employed a man named Caton as a mason. Caton came to Thompson on the 15th of May 1866, and demanded his wages before, according to the usual course of business, they were due. He came with another man, named Williams, also a mason, who had never been in the employ of Thompson, but who, nevertheless, demanded money of Thompson. The reason they gave for this demand, was, that they wanted money to go on a "spree." Upon Thompson's refusing their demand, they collected a crowd of 300 or 400 persons in the street opposite his premises, and caused a great disturbance. Caton and Williams were taken up before the magistrates, and bound over to keep the peace. It appeared that Caton and Williams were members of the Masons' Union, and in consequence of the proceedings against them there was a strike of the masons in Thompson's employ. 1866, May.

In 1866 Thompson had also employed a man, named Clarkson, a member of the Builders' Union, who, about the 13th June 1866, on being discharged from Thompson's service in the middle of the week, demanded the immediate payment of his wages. Thompson refused to pay him before the usual pay day at the end of the week. Thereupon Clarkson assaulted Thompson's wife, and knocked her down. For this assault Clarkson was sentenced to a month's imprisonment. In consequence of the prosecution of Clarkson, and of the previous proceedings against Caton and Williams, delegates from the joiners', masons,' and bricklayers' unions drew off from their work about 44 of Thompson's men, and his premises were picketed. Thompson then supplied the places of the men who had left him by non-union men, who were exposed to much insult and injury. One of these men, *Charles Harris*, had his head cut open with a brick. The man who committed this assault, and also Charles Harris, were got out of the way by the bricklayers, so that no one was prosecuted for it. Thompson also stated, that at the time of the Inquiry both himself and his men were annoyed and threatened, wherever they went, by members of the joiners', masons', and bricklayers' unions. 1866.

There is a general union of joiners, called the "Operative Carpenters' Union," which extends all over the country, and consists of about 10,000 members. There are lodges belonging to the general union, in the different towns in England where there are joiners. In Bolton there are two lodges, as there are a great many joiners there. The committee of the general union, consisting only of a dozen members, meet in Manchester. The members of the committee are elected within a radius of six or seven miles of Manchester. At certain meetings, which are called delegate meetings, delegates are sent from the different lodges to represent them. The men who are members of the lodges or of the general union are not allowed to work with any men who are not at all events members of some union. The Joiners' Union, *i.e.* the general union, paid the men who picketed Thompson's premises. It was attempted to refer the dispute between the several unions and Thompson to a mediator between the parties, but the attempt failed; the unions demanding that all the expenses arising from the strikes, which appear to have amounted nearly to 1,000*l.*, should be paid by Thompson, and also that he should make an open acknowledgment that he was wrong.

The Bolton Self-acting Minders' Union.

The men who mind the self-acting mules in the spinning yarn trades are called self-acting minders. There is a trades union of them at Bolton. This union at Bolton is connected with other unions of the same sort, of which the central place is Manchester. There is a meeting at Manchester, every three months, of delegates from the several unions of minders. The delegates come from numerous places throughout the country where the unions exist. Cheshire, Yorkshire, and Derbyshire, besides

Lancashire, were mentioned as the principal counties from which delegates are sent These unions are all amalgamated. They will not allow a man to work below a given rate of wages, nor any of their members to work with a non-union man. If a master employs non-union men, he is put down as a "black," and then, it was added, "no respectable" man would go near his shop.

Messrs. John Thomason and Sons had a cotton mill at Bolton; and on the 15th of December 1866 the self-acting minders in their employ, who were members of the union, turned out of work, upon some complaint that the cotton was not good, and that they could not make good work of it. The number of men who thus left was 21, and Messrs. Thomason got in their places 21 hands who were non-union men. The consequence was that the premises of Messrs. Thomason were picketed, and every attempt was made by intimidation to prevent the non-union men from
1866. working. One of the non-union men, named *Winward*, was used very badly, being beaten by the unionists, and much hurt. Another named *Mason*, was insulted, and threatened with violence; and some stones, of about two or three pounds weight, were thrown between 2 A.M. and 4 P.M., through his bedroom window, but fortunately no damage was done to him or his wife, as, from their apprehension of danger, they were then sleeping in another room.

The Bolton Ironfounders' Union.

There is at Bolton a society which is called the Little Bolton Branch of the Ironfounders' Society of Great Britain and Ireland. There are general meetings of this society, both quarterly and special, and they are governed by an executive committee of the whole society in London. This committee is elected by seven branches of the society near London. The governing branch elect two members; Greenwich, one; East London, two; North London, one; and Chelsea, one. There are altogether about 107 branches, which exist throughout the country, in England, Wales, and Ireland. The rules of the society are, however, made at a meeting of delegates, which takes place about every five years, sometimes in London and sometimes in Manchester. There was a special general meeting of the society at Bolton, on the 1st of August 1866, at which it was resolved that there should be a demand for a rise in wages.

Jonathan Edge was an ironfounder in Bolton, and employed about 70 hands in 1866. In August of that year, in consequence of that resolution, a demand was made by the men in his employ for a rise in their wages. Mr. Edge refused to give it; and consequently the men in his employ, who were unionists, left his service. Their places were supplied by non-unionists, who were insulted and intimi-
1866. dated by the unionists upon every occasion. The premises of Mr. Edge were picketed, so that it was difficult for the non-unionists to get to their work; and for that purpose they had to be escorted by the police. Some of the non-unionists were assaulted, and one of them, named *Atkinson*, was very severely beaten and ill-used by a member of the union.

At the latter end of 1866, Mr. Marsden, of the Britannia Foundry at Bolton, gave his men notice that he should reduce their wages 2*s.* a week. The case was brought before the society at Bolton, who sent it up to the executive committee of the Ironfounders' Society in London. The committee there investigated it, and ordered the men to leave Mr. Marsden's service, which they did. Mr. Marsden at first withdrew his notice of reduction of wages; but afterwards, in consequence, it was stated, of some resolution of the masters, gave notice again for a reduction of wages, and the union men left his service.

There is a General Masters' Iron Association, the Lancashire Branch of which is in Liverpool. Mr. Marsden, on his men (about 32 in number) leaving his service on account of the reduction of wages, sent the names of these men to the secretary of the Lancashire Branch at Liverpool. The consequence of thus publishing their names was, that many of them were unable to get employment, and there were said to be 14 of these men who were at the time of this Inquiry out of work, and receiving pay from the union.

The Bolton Tailors' Unions.

There are two societies of tailors at Bolton (No. 1. and No. 2.) which are branches of a General Amalgamation Society. The General Amalgamation Society holds its

meetings at Manchester. In about 80 towns there are branches of the General Society, to which they subscribe. London has a separate Amalgamation Society of its own, and forms no part of the one which meets at Manchester. The subscription to the General Amalgamation Society at Manchester is 3*d.* a member per quarter; the contribution to the Branch Society at Bolton is 1*d.* a week. The funds of the branch are entirely at their own disposal. If a master wishes to reduce his wages, the matter may be brought before the branch, and they may direct a strike; but the proper course is to obtain the sanction of the Amalgamation Society. If a resolution is passed that a certain shop is to be "in block," as it is called, all the union men are drawn off, and no one is allowed to work for the offending master. In one of the books of the society were found the following entries:—"April 1867.—That the men be called from Mr. Roscoe's and Brook's shops until the machines be dispensed with." "That 300 bills be printed and circulated of the names of those who would not comply with the wish of the society." These bills were said to have contained the names of four men, and were published and sent round to the various towns within 12 miles of Bolton, with the object of preventing any members of the union from working with those men. It was stated that the reason why the union men were drawn off from Mr. Roscoe's was that the other men, who were working there, would not tell the union what wages they were getting. The union also regulates the hours at which their men should work. There was another entry in the following words:—"Moved, that the hours of work be from 7 A.M. to 7 P.M., and on Saturdays from 7 A.M. to 2 P.M." That resolution was passed because some men were working 20 hours a day, while others could not work 10 hours a day. Another entry, on 27 March 1867, was "that the society do not recognize machines," which was carried; and another that "masters dispense with machines on 6th of April." It was, however, stated that in the following July the opinion of the union was altered on the subject of machinery, and that the union men were allowed to work with masters who used machinery, provided they got what the union considered to be proper wages, and worked in proper hours.

Mr. Horrocks is a tailor carrying on business at Bolton. A strike took place among his men in November 1866, the reason of which was as follows. There are, as has been mentioned above, two branch societies of tailors in Bolton, No. 1. and No. 2. Mr. Horrocks employed men belonging to both these societies. No. 1. society struck because Mr. Horrocks employed men belonging to No. 2.; then the two societies met, and settled which should be a No. 1. shop and which a No. 2. throughout the town. It was settled that Mr. Horrocks should employ No. 1., though No. 2. wished to work for him. Under these circumstances Mr. Horrocks employed non-union men. A strike therefore took place, and Mr. Horrocks's shop was picketed by men from both No. 1. and No. 2. The non-unionists were insulted and assaulted; and one man, John Campbell, was sent to prison for a month for throwing stones and hitting one of the non-unionists. The violence and systematic intimidation were such that the police had to be employed to protect the workmen; and this state of things continued for about eight or ten weeks. 1866.

We have now given a statement of the principal cases which came under our notice.

We report that there has not occurred during the last ten years, within the district over which our Inquiry extended, any act of intimidation, outrage, or wrong, promoted, encouraged, or connived at by any association of employers.

The outrages which we have related, and which rendered life and property insecure, were, in our opinion, all of them instigated and sanctioned by the several unions in the districts in which they were respectively committed. They were all deliberately planned and executed in furtherance of a system, which had for its object the subjection of both masters and men to the rules of the union, and the destruction of the freedom of labour.

When the conduct of any master as to the mode in which he carried on his business, or as to the men he employed, was opposed to the regulations of the union, it was brought before a general or a special meeting. Sometimes a resolution was passed that the outrage should be committed. But, whether there was a distinct resolution to that effect, or the opinion of the meeting was unmistakeably ascertained, the measures to be adopted for carrying out the known purposes of the union in this

* The machines alluded to were sewing machines.

respect were usually left to the officers of the society, who had the union funds at their disposal for this object. There was no difficulty in finding persons ready to carry out such a purpose, whatever crime it might involve. The officers of the union usually selected one "trusty" individual, with whom the contract for the special service was made, and who found the men to perpetrate the outrage, and paid them for it.

The largest sum we found to have been paid for such a purpose was 20*l.*, and the share which fell to the lot of each man engaged in the transaction was generally about 1*l.*, though the amount varied, and was often more. James Kay, the member of the Manchester Union, whose name has been already mentioned, was said to have been constantly employed for this purpose; indeed, one witness said that Kay did nothing else, and lived only by such employment. This man, James Kay, absconded on the first morning the Commission met at Manchester; and, though every means have been used for his apprehension, he has never since been heard of. In several unions of the brickmakers, as we have already mentioned, the books relating to the accounts and the proceedings of the unions were destroyed, in order to prevent an examination of them at the time of our inquiry, and, of course, we are unable to say what entries those books contained. But, in the books which were produced before us, we found that the money paid for these outrages was frequently entered in the cash book as for "Certain expenses;" in other cases a sum total was put down in the money column without any explanation for what the money had been spent; and these modes of making up the accounts seem to have been so well understood that the auditors never objected to them, but passed the accounts.

The account books, as well as the minute books, were always on the table at the regular meetings of the union when business was conducted, and open to the inspection of the members; and, though few may have taken the trouble to inspect them, we have no doubt, that the expenditure of the money, and the object for which it had been made, were well known to every member of the union. It is but too evident that the members of the different unions, which came under our notice, considered that the outrages we have mentioned had been perpetrated, and the union money had been spent, in the promotion of a system which they sanctioned and upheld.

Dated this 10th of February 1868.

REFORM LIBRARY PALL MALL

FIRST DAY.

Assize Courts, Manchester, Wednesday, 4th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C.
THOMAS IRWIN BARSTOW, Esq.
GEORGE CHANCE, Esq.
JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, ESQ., Q.C., IN THE CHAIR.

(*Mr. Pickering.*) I wish publicly to state what is the nature of this Commission, which is now to be considered as opened. It is a Commission appointed under two Acts of Parliament, one of which passed on the 5th of April in this year, and which is intituled "An Act for facilitating in certain cases the proceedings of the Commissioners appointed to make enquiries respecting Trades Unions and other Associations of Employers and Workmen;" and a further Act was afterwards passed, which is intituled "An Act to extend the Trades Union Commission Act, 1867." Under those Acts there is a power to the Government, upon certain applications which I need not particularly specify, to appoint certain examiners, not exceeding three in number, who shall have power to inquire into any acts of intimidation, outrage, or wrong, alleged to have been promoted, encouraged, or connived at by trades unions or associations, whether of workmen or of employers, and into the causes of such acts and the complicity therein of such trades unions or associations; and the power to inquire is to extend over a period of not more than 10 years.

The Commission may now be considered as opened; but before we proceed to the examination of witnesses I should like to say a few words, not only upon the nature and object of the inquiry (which may be gathered from the words which I have already read from the Act of Parliament), but also upon the mode in which the inquiry will be conducted.

This is an inquiry which is intended not only for the benefit of the masters, but also for the benefit of the workmen, and I need scarcely tell you that it will be conducted in a fair and impartial spirit with reference to both parties—not for the benefit of one more than of the other, but for the benefit of both. Nor is it directed against any particular trades union. We are authorized to receive evidence (and we certainly shall receive it) which may in any way affect any trades union, club, or association which may have been implicated in unlawful practices. At the same time I would say that I hope it will not be considered that either the Legislature or the Government mean to denounce in any way whatever trades unions, associations, or clubs generally. The Legislature had no such object at all in view at the time they passed this Act. No one can deny the benefit which, it seems to me, may result from trades unions, clubs, or associations when they are formed for lawful purposes, and when they attempt to carry out those purposes by lawful means. Persons who have not the advantages of wealth can often only protect their interests and advance their comforts by associations and combinations of this nature, and when that is properly done and when the objects of such associations are carried out by lawful means they are perfectly legitimate; it is only when they trespass beyond their fair bounds and when they attempt by unlawful means to control the exercise of freedom of will and freedom of labour that they ought to meet with the condemnation of every right minded and honorable man. If there is any one right which it seems to me that any man ought to consider as his own, it is the right to the exercise of his own personal freedom, and it appears to me that any person or any body of men who attempts to control or to interfere with the exercise of that right is deserving of the greatest condemnation. I think that the workmen have as much right to have their own personal skill and industry protected on the one hand as the masters on the other hand have to be left uncontrolled in the conduct of their business. I therefore hope we shall have upon this occasion the hearty co-operation of all classes, both of masters and of men, with the view of carrying out the purposes of the Legislature in granting this Commission, and that our labours will tend in some degree to put down that social tyranny, which, while it has been attended with great injury no doubt to the masters has been also accompanied with the greatest misery to the workmen.

We shall receive evidence on both sides with the greatest impartiality, both from the masters on the one hand and from the workmen on the other; and although no one will be allowed to examine witnesses, that being a duty which is peculiarly entrusted to

FIRST DAY.
4 Sept. 1867.

ourselves, we shall receive with great readiness and great impartiality any suggestions from either one side or the other, either from the masters or from the workmen. I assure you that on our part there will be a most sincere desire to act impartially between the two, and whatever facility it is in our power to bestow will be most readily and impartially offered to both parties.

Let me say one word as to the powers which are conferred upon us by this Act of Parliament. We have power to compel the attendance of witnesses and to examine them upon oath, affirmation, or otherwise. And those witnesses who come here to give evidence will be allowed their reasonable expenses. But I wish to call attention to a particular provision of the Act, which it seems to me is well worth the consideration of everyone attending this inquiry. We have power to give an indemnity to every person who may come forward and make a full and true disclosure of all the matters in respect of which he is examined. And therefore if any person, whatever outrages he may have been a party to, or may know of, will only come forward and make a full and true disclosure, he will be saved from all further proceedings either of a civil or of a criminal nature respecting that of which he has given a full and true account. We have no doubt considerable information, and the names of many persons who may have been parties to these outrages are known to us, but nevertheless, if they choose to come forward on this occasion and to make a full and true disclosure of any such acts to which they have been parties, or of which they have been cognizant, they will be safe from any sort of prosecution, and they will remain without any fear or possibility of punishment. I cannot help thinking that this is an opportunity of which, if they are wise, they will gladly avail themselves, for such an opportunity is not likely to occur again. It should be remembered also that the best atonement which such men can make for the past, and the best service that they can do, not only to themselves, but to their fellows, is to make a full and true disclosure of any acts of intimidation, outrage, or wrong which they may have themselves committed, or which they may know of, and also to show to the world by whom such acts have been promoted or encouraged.

We will now proceed to examine the witnesses.

Mr. T. Meadows.

Mr. Thomas Meadows sworn and examined.

1. (*Chairman.*) What are you?—I am a master brickmaker.

2. Have you any partners?—My brother.

3. That is your brother William, I think?—Yes.

4. Where do you live?—At Stockport.

5. Where are your works carried on?—At Stockport.

6. How long have you been a master brickmaker?—About eight years, I think.

7. Have you carried on your business at the same place all the time?—No.

8. Where were you carrying it on in the year 1864?—At Reddish, near Stockport.

9. How far is that from Stockport?—Two miles.

10. Was your brother a partner with you then?—Yes.

11. Were you carrying on your business there somewhere about June 1864?—Yes.

12. You were still then, were you not, a master brickmaker and a contractor?—Yes.

13. How many men do you usually employ in your work?—We employed about 24 union men there, but about 100 altogether.

14. Were all these men that you speak of as being union men members of one and the same union?—They were members of two unions.

15. Will you mention the names of the unions?—Stockport and Oldham.

16. Were there as many in one as in the other?—There were only three from Oldham.

17. Three in the Oldham union?—Yes.

18. And the rest were in what union?—And the rest in the Stockport union.

19. Is that a brickmakers' union or a bricklayers' union, or what is it?—A brickmakers' union.

20. Where did that union hold its meetings?—At the "Pack Horse" in Stockport.

21. Give me the name of the landlord of the "Pack Horse"?—John Taylor.

22. Do they still continue to hold their meetings there?—I do not know, but I know that their lodge is held there.

23. Do you mean that both the unions hold their meetings there or only one union?—One union.

24. Which union?—The Stockport union.

25. Where did the other union hold its meetings?—At Oldham.

26. How far is Oldham from Reddish?—About nine miles.

27. You had you say about 100 men in all, and 24, I think you said, were union men?—Yes.

28. How long had these 24 union men been working for you?—Between three and four months.

29. What wages did they have?—From 30*s.* up to 50*s.*

30. Had they worked for you long?—No, it was a new place that was commencing—the building of a large mill.

31. Did you somewhere about June 1864 make an alteration in the shape of your bricks?—Yes.

32. What was the purpose for which the alteration was made?—So that they would fit a hand machine.

33. Did you effect any saving of labour by that alteration?—Yes.

34. Can you tell me at all the amount of saving in money which you made by that operation?—About 10*d.* for every thousand of bricks.

35. In consequence of that alteration was anything said by any of your workmen?—Yes.

36. Will you explain what took place?—They wanted something extra; they considered that it was a saving of 10*d.* a thousand, and that we might make them if we would give them the 10*d.*

37. Who spoke to you upon the subject?—It was some of the workmen; I do not just remember their names.

38. Was it any of the 24 union men, or was it the others?—Some of the 24 union men employed by us.

39. Some of these men spoke to you upon the subject?—Yes.

40. You know that it was some of the union men?—Yes.

41. Just try to recollect the names of those who spoke to you upon the subject?—I daresay one would be Jackson.

42. Had you more than one man named Jackson?—Yes, we had more than one.

43. Can you tell us the christian name of the one that spoke to you?—I do not just remember it now, but I believe it was John Jackson.

44. Was he alone when he spoke to you?—No, there were others present, three or four of them.

45. What others were present at the time he spoke to you?—I think if I mention John Jackson and William Potts I should be safe on those two.

46. Were they Stockport union men or Oldham union men?—Stockport union men.

47. How many men came up to you to speak?—There would be perhaps half a dozen altogether.

48. What time of the day was it when they came?—The morning part.

49. Can you not remember the names of the other four?—George Bailey would be one.

50. Is he a Stockport union man?—Yes.

51. Now we have three, there are only three left you know. Try again if you can remember some more?—I do not just remember their names now, or

else there were all the brickmakers that came, at least there were six out of the eight.

52. Six out of what eight?—Brickmakers. Six out of the eight came, but I do not just remember their names.

53. What do you mean by out of eight, because they were all brickmakers, were they not?—No, there are only eight that attend. Every brickmaker employs about five men and boys.

54. Do you mean that you only had eight brickmakers in your employ at Reddish?—We had 24 that are called brickmakers that belonged to the union.

55. Then six out of these 24 came to you?—Yes.

56. I do not quite understand what you mean by taking six out of eight?—Because the brickmakers were the leaders. They employ about three men and two boys, and they spoke for the others.

57. Were these 24 men all brickmakers and in your employment?—They all belonged to the union, they did not all make bricks.

58. How many of them made bricks?—Eight of them.

59. And six out of the eight came to you?—Yes.

60. And the only three you are sure of are the three whose names you have mentioned?—There are only three whose names I can just remember just now.

61. Did they all take part in the application to you?—Yes.

62. And they all said something?—No, there were only about two of them, Jackson and Potts.

63. Jackson and Potts were the orators?—Yes.

64. Now will you tell us as far as you can recollect, the substance of what they said?—They said we might make the bricks if we would give them 10*d.* per 1,000*l.*

65. That is to say whatever you saved you were to give to them?—Yes; I offered them 6*d.* and they refused to take it, and in consequence they turned out, and they were out three weeks.

66. How many men turned out?—24.

67. And they were out three weeks, were they?—Three weeks.

68. After the end of the three weeks did any of them come back?—Before the end of the three weeks three of them came back again.

69. Three out of these eight?—Yes, in a week after.

70. Will you mention the names of the three who came back out of the eight?—Humphrey Childs, James Fallowes, and Thomas Wild.

71. Did they come back and work for the same wages as before?—I gave them the 6*d.* that I proffered them.

72. Were these three union men?—Yes.

73. Stockport union men?—One belonged to the Oldham union.

74. Which belonged to the Oldham union?—Humphrey Childs.

75. And the other two belonged to the Stockport union?—Yes.

76. They were out for three weeks?—Yes.

77. And when was it that these men came to you?—It would be in June.

78. Do you remember what day it was?—I do not remember what day.

79. Then it would be in July I suppose when they came back?—In July.

80. How long did they continue to work with you after they came back before anything else happened?—It would be approaching three weeks, but not quite.

81. Did any of the union men come to you after that time with reference to these three men having returned to you?—Yes.

82. Do you remember when that was?—They came about a week before they agreed to go in again.

83. How long had Wild, Childs, and Fallowes been working with you upon their return before these men came to you again?—A little over a week.

84. Who came to you?—I believe Cheetham was one, I do not know the others.

85. How many came?—Three.

86. Have you since ascertained who the others were; was Slater one?—No; Slater did not come the first time, he did come once.

87. But, however, Cheetham was one; was Bailey one?—I believe George Bailey was one.

88. Was Singleton one?—No.

89. Do you remember Brown?—I do not know him.

90. Was one man who came to you George Bailey?—Yes, George Bailey.

91. You do not remember the third?—No.

92. Was it another Bailey?—I do not know the third.

93. And you have not since ascertained?—No.

94. They came to you about a week after these men had returned?—Yes.

95. What did they say to you then?—They asked me if I was going to give them the 10*d.* per 1,000.

96. Then they were three of the men who had been working with you before?—Yes.

97. And they were Stockport union men?—Yes; they asked me if I was going to give them the 10*d.* per 1,000.

98. What did you say?—I said I would give them what I had offered, 6*d.*, but I should not give them any more.

99. Upon that did they go?—Yes.

100. Did they say anything more at that time?—No.

101. When did they or any of them come again to you?—I sent for a lot more non-union men to put in their place, and as soon as they heard of the non-union men they offered to come in at our terms.

102. How long afterwards was that?—It would be three weeks.

103. Three weeks after these men had returned?—Yes, three weeks from the commencement of the strike.

104. Then they came to you and offered to come back?—Yes, on condition that we would turn these three men away.

105. What did you say to that?—I refused to do it.

106. Did they go away then?—They said they could not settle it there, they would have another meeting that night, and they would leave a letter to say whether they would agree to my terms or not.

107. After the night had passed on which the meeting was to be, did you receive a letter?—Yes.

108. Who brought it to you?—I received it from the place where the union is held.

109. Is that the "Pack Horse?"—Yes.

110. Did Taylor the landlord give it to you?—His daughter gave it to me.

111. Did you get it the next morning after the meeting?—I got it the same night.

112. Have you that letter, or is it lost?—I have not got it.

113. What was the purport of the letter?—They agreed to go in on our terms, that was nearly all that they said. These men were to stop at their work.

114. Do you remember by whom this letter was signed?—By the committee.

115. Who were they?—I do not know.

116. The words which were used were "the committee?"—The words which were used were "the committee."

117. There were no names?—No.

118. The committee of the Stockport union?—Yes.

119. Did anything more happen with regard to their requesting that these three men should be given up, or did those come back?—There was nothing said afterwards.

120. Did they come back?—Yes, they never went away.

121. Wild, Childs, and Fallowes returned, but did the other men come back?—Yes.

122. How many came back?—21 I think.

123. Do you remember the day on which these men came back?—I do not just remember that.

FIRST DAY.

Mr. T. Meadows.

4th Sept. 1867.

124. Was it about the beginning of August, the 1st or 2d of August?—It would be before that.

125. Do you think it was in July?—It would be in July.

126. Did they continue to work then?—Yes.

127. Upon these terms?—Yes.

128. You giving them the 6*d.*?—Yes.

129. You do not exactly recollect the day on which they returned, do you?—No, I do not.

130. Childs and Fallowes were with you?—Yes.

131. What was Wild's duty generally?—He was up at night burning.

132. Do you remember the 2d of August?—Yes.

133. Was it Wild's duty to be up that night burning?—It was Wild's duty to be up that night.

134. Burning at the kiln?—Yes.

135. Was it the duty of any of these other men to be up also?—No.

136. Was it the duty of Childs to be up that night?—It was his duty to be up, but he is not bound to be up without he has a mind. He works what hours he likes; he works piecework, I think.

137. But was he usually up at night?—Yes; he works very late at night.

138. He seems to have had the liberty. Was that the time when he seemed to prefer being there at night; was he usually in the habit of being there at night?—Yes, late at night and early in the morning.

139. Was it Fallowes' duty to be up at night?—No.

140. Was it the duty of Fallows to be up that particular night, the night of the 2d of August?—No.

141. Nor Childs?—He works his own hours, does Childs. I do not bind him at all.

142. You say Wild was up that night. When did you first hear of anything having happened to Wild on that night?—About 1 o'clock in the morning, I think it was.

143. Were you roused?—Yes.

144. By whom?—By his wife.

145. Where was their sleeping place, was it on the premises?—No, at a farm close by.

146. Then his wife came, as I understand, and roused you up at about 1 o'clock in the morning?—Yes.

147. Did you get up?—Yes.

148. Where did you go to?—I went to his house.

149. To Wild's house?—Yes.

150. Did you see him there?—Yes.

151. In what state was he?—He was in bed with his legs badly hurt, and also his head and arms.

152. Did you see anybody else on that occasion beside Wild and his wife. Did he mention to you how it happened?—No, he could scarcely speak when I went in.

153. You saw that he was very much hurt?—Yes.

154. Did you see anybody else at all that night as you went to Wild's house or as you came from it?—There were two or three in the house.

155. In whose house?—In Wild's house.

156. Do you remember who they were?—I do not; they were women.

157. Did you see anybody at all about your premises that night?—No.

158. Nor early the next morning?—Early next morning I did.

159. At what time?—Nearly 2 o'clock. I had to send a man in his place.

160. At two in the morning?—Yes.

161. Whom did you send in his place?—Charles Walworth and William Sykes.

162. Whom did you see about the premises at about two in the morning?—No one.

163. Was it the duty of any other of your workmen to be about the premises at night besides Wild?—No.

164. Then I understand you that no one had any right to be about the premises at night excepting Wild?—Childs had a right to be there; he works what hours he likes. He has so much work to do and he gets it done when he likes.

165. But except Childs no one else had a right to be there?—No.

166. Now did you give evidence at the trial of Cheetham and Slater?—Yes.

167. I believe they were apprehended the next day, the 3rd of August, were they not?—Yes.

168. And you gave evidence at the assizes in Manchester?—Yes.

169. And they were convicted I believe?—Yes.

170. I understand that the sentence has been commuted: had you anything to do with that commutation of sentence?—No.

171. Were you at all requested to interfere in their favour?—No.

172. Were you asked to sign any petition?—Afterwards I was.

173. When were you asked?—I think it is about 12 months since.

174. We are now in 1867, and you think it was last year?—Yes.

175. Who asked you?—William Potts.

176. Was he one of the spokesmen on the occasion you mention?—Yes.

177. He asked you to sign a petition for a commutation of sentence?—Yes.

178. And what was your answer?—"No."

179. Did anybody else ask you?—I have been asked three or four times, but I do not know them. Different parties have been to me.

180. Were the people who asked you union men?—Most of them were union men.

181. You were asked three or four times?—Yes, and I refused.

182. I think your expression was that most of them were union men, who asked you?—Yes.

183. Are you sure that you were ever asked by a person who was not a union man?—Yes.

184. Who was that?—I do not know his name.

185. Was he a labourer or a master manufacturer, or what was he?—I could not tell.

186. What became of Wild afterwards. Did he come back to work for you?—Yes.

187. When?—He was working for us for something like six months after that.

188. How long was he ill of his wounds?—I do not remember how long he was ill.

189. But after he was well he came back to you did he?—Yes.

190. And worked with you six months?—Yes.

191. Did these other men continue to work with you?—Yes.

192. Slater and Cheetham were apprehended of course, but the other men you say continued to work with you?—Yes.

193. Did the 19 other men continue to work with you?—Yes.

194. Did you say that Slater had been working with you?—No.

195. Had Cheetham been working with you?—No.

196. Then did all the 21 come back and work with you?—Yes.

197. Then did Wild leave you after six months?—He left somewhere about that time.

198. Do you know why he left you; was there any reason assigned?—No, he never said anything to me only what I could judge.

199. But did he seem in terror or fear, or was there anything you could judge of from his manner?—I judged that that was the cause why he left.

200. Do you know of anything that he was subjected to while he was with you?—No.

201. But you judged that that was the cause of his leaving?—Yes.

202. Did you after he left your service see him anywhere else?—No, I have not seen him since.

203. Did these 21 men continue to work with you?—Yes.

204. Are they working with you now?—There is one of them, that is all.

205. What is his name?—Childs.

206. Childs is still working with you?—Yes.

207. Fallowes is not working with you, is he ?—No.

208. Do you remember on one occasion discharging some brickmakers for drinking ?—Yes.

209. How long had they been drinking so as to be unable to work ?—Four days.

210. You mean that they had been in such a state that they could not work ?—Yes, they had not been at their work for four days.

211. Upon that occasion after they had been unable to work, or at all events away from their work for four days, did you receive any deputation or suggestion or statement from any brickmakers' association ?—Yes.

212. When was this ?—I do not just remember.

213. Was it this year, or last year, or when ?—It was the year after—no, it was the same summer.

214. 1864 ?—Yes, 1864.

215. What did they say to you ?—They wanted me to take the men in again.

216. What did they say ?—Did they make use of any threat or anything of that kind if you did not do it ?—No.

217. Did you take the men back ?—Yes.

218. What made you take them back ?—Well, we could not get anybody else at that time.

219. Are you now building any houses for yourselves ?—Yes.

220. Are they let to a contractor named Josiah Hill ?—They were.

221. Can you tell us shortly whether anything happened to you respecting those houses ?—Yes, the men turned out, the bricksetters.

222. How many turned out ?—Five.

223. How came they to turn out ?—Because I and my brother set a brick.

224. Do you remember at whose instigation they turned out ?—No, I do not.

225. Do you know a man named Clark ?—I know him by sight.

226. Is he the secretary to the Stockport bricklayers' club ?—I do not know that. I have heard so.

227. You know the man ?—Yes, I know him by sight.

228. Did you see him on the premises at all ?—No.

229. After the men had turned out were you requested to pay any money ?—Yes.

230. What were you asked to pay ?—2*l.* 10*s.*

231. What for ?—For setting a brick.

232. You were requested to pay that to whom ?—To the union.

233. Who asked you to pay it ?—It was our own men who told me that we should have to pay it. No one asked me to pay. They said we should have to pay before we could go on with our work.

234. Your men said that before they should come back you would have to pay that money ?—Yes.

235. Did you pay that money ?—I paid it three weeks after.

236. How much did you pay ?—2*l.* 10*s.*

237. Was any more money asked of you ?—No, not then.

238. Did you at first refuse to pay it ?—Yes.

239. Until you had paid that sum the men did not come back, did they ?—No.

240. How long do you say they kept out ?—About three weeks.

241. Did they meet you to demand this 2*l.* 10*s.*, or how came you to pay it ?—I sent for them.

242. Who came to you ?—I do not know his name.

243. But how many ?—One.

244. Was he the secretary ?—No.

245. What did he say to you when he came ?—He said we might start if we paid the 2*l.* 10*s.*

246. Did he say that you had broken any rule ?—No ; we paid him the money with the understanding that if we could prove we were not in the wrong we could have the 2*l.* 10*s.* back again.

247. Were you assumed to be in the wrong, or did you pay this money on the chance of being in the wrong ?—We paid it on the chance of being in the wrong.

248. Has it since been investigated, and have you turned out to be what is called in the wrong ?—It has not been investigated.

249. Was nothing said to you as to whether you had broken any rule of the union or not ?—No.

250. Is it still going on ; is it going to be investigated ?—They have promised me that it shall be investigated, but they have not done it yet.

251. How long ago is that ?—Some two months.

252. Was any other money paid ?—No.

253. Did you employ a contractor ?—Yes.

254. Did they demand any money of him ?—Yes.

255. How much did they demand of him ?—About 2*l.* 10*s.*

256. 2*l.* 10*s.* of you, and 2*l.* 10*s.* of him ?—Yes.

257. Did he pay it ?—No.

258. Did he continue the building on which he was engaged ?—No ; he was doing two houses, but he left before he had paid the 2*l.* 10*s.*

259. Did he cease to be your contractor in consequence of this dispute with the union ?—Yes.

260. In consequence of the dispute with the union, and their demand from you, he left you ?—Yes.

261. That man is Josiah Hill, I think, you told me before ?—Yes.

262. And the whole of these works were stopped, and he lost his job, and you lost your men because you put a brick ?—Yes.

263. What did you really do ; is it that you being a brickmaker did the work which they say belongs to a bricklayer. Is that so ?—They say that no man who is not a bricksetter is allowed to set a brick.

264. Was that the offence which they accused you of having committed, and for which your men turned out, and for which you had to pay the 2*l.* 10*s.*, and your contractor had to lose his job ?—Yes.

265. How much work had you done ; you call it setting a brick, but had you done any amount of bricksetting work ?—No ; it was only about one brick which I set in the key of the door hatch.

266. And that was all ?—Yes.

267. Josiah Hill was your contractor ?—Yes.

268. How came you to go there to assist in putting this key in ?—He asked us to do it.

269. Josiah Hill asked you ?—Yes ; it is an understood thing that if we set a brick we give them an allowance ; that is why we set the brick.

270. It is an understood thing between you and the contractor ?—It is a general rule about buildings ; if you set a brick, and if you have nothing to do with it, you pay them some money.

271. That is as between you and the contractor ?—Yes.

272. Then you set the brick with a view of giving them a treat ?—Yes.

273. What was the sort of treat that you would have given ?—It was not so much ; half-a-crown.

274. You set the brick with a view of giving them a treat of half-a-crown, and because you did that it was considered an offence by this association, and you were fined in the way you mentioned, and the contractor lost his job ?—There was a bricksetter passing at the time we set this brick, and I suppose he drew the men away without asking what was the reason of our setting this brick.

275. You say that you were asked to pay, and did eventually pay 2*l.* 10*s.*; had you before that been asked to pay a less sum ?—We have never been asked to pay anything only what the men told us ; they had a meeting, and at the meeting they said we were to pay 16*s.* 6*d.* before the men were to be allowed to come to work again.

276. And you refused ?—Yes, we refused.

277. And then they raised the demand to 2*l.* 10*s.* ?—Yes.

278. At the meeting, do you know at all from your men whether the reason of your setting this brick

FIRST DAY.

Mr. T. Meadows.

4 Sept. 1867.

had been explained?—Yes, I suppose they explained it; Josiah Hill went down on purpose.

279. Josiah Hill went down on purpose to give the explanation?—Yes.

280. And in spite of that explanation they insisted on your paying this money?—Yes.

The Chairman stated that if any person appearing for the masters or the workmen wished to put questions to the witness it might be done through the court.

Mr. Cobbett, who stated that he was instructed by the Manchester branch of the General Builder's Association said, that during the strike to which the witness had referred, he (the witness) was prevented from obtaining bricks anywhere in the whole neighbourhood.

281. (*Chairman to the witness.*) During this last strike which was in consequence of your setting this brick and which is the one to which I understand the question alludes, were you prevented from getting bricks anywhere else?—Yes.

282. For how long a time where you prevented?—Over a fortnight.

283. Did you endeavour to get bricks anywhere else, and were you prevented?—Yes.

284. Where did you endeavour to get them?—At a place called Bradshaw's yard.

285. Is that near you?—No, it is about two miles from our place.

286. Did you try anywhere else to get bricks?—Ludlow's.

287. Anywhere else?—Yes, Holt's and Atkinson's and two or three others; I do not remember the names.

288. And you were unable to get any?—Yes.

289. In consequence of your being unable to get bricks, were you prevented from fulfilling any contract?—No, it was our own property that we were building upon.

290. But you were prevented from going on with that, I suppose?—Yes.

291. I understand that you are both a brickmaker and a builder?—Yes.

292. Did they give any reason for the refusal at the time of your applications at these different places?—They said they would not be allowed to send any bricks until we had settled the strike.

293. That was the answer that was given you at each place where you applied?—Yes.

The witness withdrew.

T. Wilde.

THOMAS WILDE sworn and examined.

294. (*Mr. Barstow.*) You are a brickmaker, are you not?—A brick burner.

295. In June 1864 were you working for the Messrs. Meadows?—Yes.

296. At that time were you a member of the Stockport brickmakers' union?—A contribution man.

297. That means, I believe that you had paid so much for every thousand?—I paid 1*s.* a week for working.

298. But you had no benefit from the union?—No.

299. Do you remember on the 18th of June 1864 something happening, owing to which you left Mr. Meadows' employment?—Yes, I left to go to Manchester.

300. Can you say what the cause of that was?—Because I did not want to work among them; because they kept throwing the slack.

301. I am speaking now of 1864?—Yes.

302. Do you remember there being some dispute about the men wanting 10*d.* a thousand more?—Yes.

303. Did you leave at that time?—I left when they turned out.

304. Do you remember what time that was. Was that on the 18th of June 1864?—I do not know I am sure.

305. But you turned out at that time?—Yes.

306. Did Messrs. Meadows make you an offer of 6*d.* in the thousand?—No, I had nought to do with the thousands.

307. You were paid so much a week, were you?—Yes.

308. How much a week had you?—6*s.* a day.

309. Did you go in again?—I went in along with Humphrey Childs and James Fallowes.

310. How long were you out?—I was out about five weeks.

311. Do you remember the other men coming in?—Yes.

312. How long was that after you had gone in with Humphrey Childs and James Fallowes?—About a fortnight.

313. You do not remember the day of the year, I suppose?—No.

314. Were you burning the kiln the night that they returned?—Yes.

315. Who had any business about the premises besides yourself?—Humphrey Childs should have been there pressing.

316. Anyone else?—Two more.

317. Who were they?—One should have been pressing and the others should have been picking up; there were three of them.

318. Who were those other two?—John Whittaker was one.

319. Who was the other?—I do not know exactly the other's name.

320. What was his business?—They called him "Yorky" for a byname.

321. What was "Yorky's" employment?—Sometimes he was pressing and sometimes kiln-wheeling.

322. What is kiln wheeling?—It is wheeling the bricks to the clamps.

323. What was Whittaker's business?—The same.

324. These men ought all to have been there?—They should have been there but they were not.

325. They were all away?—Yes.

326. And you were left alone?—Yes.

327. We all know that something happened to you that night. You must tell us what it was?—Well, I had my right arm broken.

328. But were you attacked by any men?—Yes, six.

329. At what time was that?—At 12 o'clock.

330. What were you doing when you were attacked?—I had just been breaking some coal.

331. How were you first attacked?—A man came and shouted "Eh, mister, can you let me and my mate have a lie down for an hour or two."

332. Did you know who that man was?—Yes, I knew him when I got up to him, but I did not tell that I did.

333. Who was it, what was his name?—William Slater.

334. Was there another man with him?—There were five more.

335. But he said, "Can you let me have a lie down, me and my mate." Was there another man with Slater at the time he spoke?—There were five men rushed out, and the second man was Cheetham.

336. Did you know any of the others?—No.

337. You did not know them then?—No.

338. Do you know now?—No.

339. Have you ever heard since who they were?—Not rightly.

340. Has anyone ever told you who they were?—No.

341. Do you know a man named Hills?—There is a Hills, a labourer, but he never said nought.

342. He has never told you who they were?—No.

343. And you have never been told since who they were?—No.

344. And you do not know now who they were—No, not the other four.

345. Who struck you first?—Cheetham.

346. What did he strike you with ?—A lump of wood.

347. What do you mean by a "lump of wood ?"—A piece of wood he hit me with.

348. What sort of a piece of wood ?—A cart leg.

349. Did they all strike you ?—Slater pulled me down and they all set at me then.

350. What did they do to you ?—Some kicked me and some hit me, but I struggled away about 30 yards and they attacked me again in the end of the shed.

351. They attacked you a second time ; did they attack you after that ?—Yes, they attacked me a second time in the end of the shed.

352. Did they attack you after that second time ?—I said, "Lord have mercy upon me, they have finished me !" and as they were going away one made answer and said, "I should burn no more bricks."

353. What did you do ?—As soon as I had just like come round a bit, I tried to get home.

354. How far is your home from the yard ?—About 280 yards. I knocked Thomas Meadows up, the "gaffer."

355. He lives at the "Grey Horse ?"—He lives at the "Grey Horse."

356. Did you do that yourself ?—Yes.

357. Was the "Grey Horse" on your road home ?—Yes, I had to go by it.

358. What injuries did you receive ?—A cut under the right eye and a broken shin, and my right arm broken in several places.

359. You do not mean that your leg was broken ?—No.

360. I believe you were taken to the Stockport Infirmary ?—Yes.

361. How long were you there ?—About five or six weeks.

362. Cheetham and Slater were prosecuted, were they not ?—Yes.

363. They were tried here and convicted ?—Yes.

364. And sentenced to 20 years' penal servitude ?—Yes.

365. Did you see anyone at the "Grey Horse ?"—I did not see anybody. Then my missis went after.

366. Did you see anybody in the street on your way from the brickfield home ?—No.

367. Did you see a man named Fallowes ?—No.

368. Are you sure he was not there ?—I did not see him.

369. You had no conversation with him ?—No.

370. You say you had no conversation with him ; are you sure that he was not there ?—I never saw him.

371. Well, but you would know whether he was there or not ?—I never saw him.

372. Did you see anyone ?—No.

373. I believe Slater is now at large, is he not ?—Yes, he is.

374. Is Cheetham at large ?—Yes.

375. Were you asked at all to sign any memorial in Cheetham's favour ?—Yes.

376. Who asked you ?—Several brickers asked me.

377. Have you worked with Cheetham ?—No.

378. Had you known him ?—Yes, I had known him from seeing him at the "Black Horse."

379. Had you ever had any quarrel with him ?—No.

380. Nor with Slater ?—No.

381. There was no private reason why they should assault you ?—No.

382. What do you think was the reason why they assaulted you ?—Nay, I do not know.

383. In your opinion, what was the reason why they assaulted you ?—I am sure I do not know what was the reason.

384. You must have thought what was the reason which induced them to beat you in that brutal manner ?—Well, it must be from my going on again, I reckon.

385. Do you know who Slater was ?—Yes.

386. What was he then ?—He was a brick-wheeler.

387. Do you know whether he was a member of the union ?—Oh, yes, he was a member of the union.

388. Do you know whether he held any office in the union ?—No, not that I am exactly aware of, only that he was a big man like among them.

389. You were asked to sign a memorial in Cheetham's favour, were you not ?—Yes.

390. Were you pressed more than once ?—I was pressed many a time.

391. I want the names of all who pressed you ?—Humphrey Hulme, and William Potts.

392. Did anyone else press you ?—Humphrey Childs.

393. Anyone else ?—There were several more, but I do not exactly know their names.

394. Was Joseph Brown one ?—He was one when I signed the paper.

395. Was George Bailey one ?—No, George never asked me.

396. Was a man named Singleton one ?—No.

397. Was George Hulme one ?—No, not that I know of.

398. Ainsworth ?—No.

399. Paulett ?—There was one they called "Bill," but I do not know what was his other name.

400. You do not know his surname ?—No.

401. Are you sure it was not William Paulett ?—He is a moulder.

402. A man they call "Bill," who is a moulder ?—Yes.

403. Do you know whether his name is Paulett or not ?—No, I do not exactly know what his name is.

404. When was the first time that they asked you to do this ? How long was it after the trial ?—It is 17 or 18 months since.

405. That would be in the beginning of last year ; was that so ?—It was before I left Reddish.

406. But I do not know when that was ; was it the beginning of last year ?—I have been from Reddish this side of two years.

407. Then it is more than two years ago ?—Yes ; they were at me to get me to sign at Manchester here.

408. More than two years ago would be, of course, in the summer of 1865 ?—Yes.

409. Did you refuse at first ?—Yes, I refused many a time.

410. Did they threaten you ?—No.

411. Did they hold out any inducement to you to sign ?—They never threatened me about signing.

412. Did they offer you any money if you would sign ?—Well, they reckoned they would guarantee me 20*l.* if I signed that. I did not know them. I went to an attorney to sign that paper.

413. Who made you that offer ?—Humphrey Hulme. It is on the paper there.

414. Where was that ?—At Salford.

415. Whereabouts in Salford ?—Regent Road, Small's buildings.

416. Where you were living ?—Yes.

417. At your house in Small's buildings ?—Yes.

418. Was there any one present ?—William Potts.

419. William Potts was present when Humphrey Hulme made this offer ?—Yes, and Humphrey's "missis."

420. That is to say there were four altogether, you and Humphrey Hulme, and William Potts and Humphrey's "missis" ?—Yes.

421. Were those all who were present ?—Yes.

422. What did you say then when they made you that offer ?—I told him it was more than I durst do.

423. Then you did not sign anything at that time ?—No.

424. They left you ?—Yes.

425. Was that the first time they had been to you ?—No, the second time.

426. When was the first time ; who asked you the first time ?—It was in Regent Road. Humphrey Hulme and William Potts came.

427. Anyone else ?—Humphrey's "missis."

FIRST DAY.

T. Wilde.

4 Sept. 1867.

428. That was the first time?—Yes.

429. The same people asked you before?—Yes.

430. Was that at Reddish, or where?—At Salford.

431. Then I suppose they asked you afterwards?—Yes.

432. How did they come to you to ask you to sign this paper?—They came and said if I signed that paper which came down from London from Mr. Watkin's it would do no harm.

433. They said it had come down from London from Mr. Watkin?—Yes.

434. Do you recollect which of them said that?—Humphrey and William Potts.

435. Both of them?—Yes.

436. Did they ever get you to go into any public house with them to talk it over?—Yes, the day that I signed to get the 5*l.*

437. The day that you signed they took you to a public house?—Yes.

438. Did they ever take you to a public house before?—They had tried to get me there, but I would not go.

439. But you tell us that you signed some paper?—Yes.

440. Take that paper in your hand (*handing a paper to the witness*). Have you seen that paper before?—Yes.

441. What is it?—It has their names on. It is their signatures while I should not work among them.

The following paper was read:

"March 28th, 1865. We, the undersigned, as the "representatives of the Stockport Brickmakers' "Society, do guarantee that on condition that Thomas "Wyld signs the paper in question we will reinstate "him to all the benefits of the brickmakers' union, "and further that we recompense him in the sum "of 5*l.* including expenses of this day. (Signed) "Humphrey Hulme, Joseph Brown, and William "Potts (his mark)."

442. (*Mr. Barstow to the witness.*) Where did you see that paper that has just been read. Did they give you that paper in the public house?—In the public house.

443. In what public house?—At the "Swan" in Deansgate.

444. For what were you to have that 5*l.*?—For signing.

445. It was for signing some paper, was it not?—For the day's work they called it.

446. What paper was it that you were to sign?—To say that I did not know the men.

447. And did you sign a paper?—Well, I signed a paper to that effect in front of a lawyer, Mr. Andrews, in Deansgate. I would not sign without going before a lawyer.

448. Who was that lawyer?—They called him Andrews, an attorney.

449. Where did you sign it?—In his office.

450. In his office, where?—He wrote to that effect.

451. But where was his office?—It was in Deansgate; I do not know where it may have been since.

452. I only want to know where it was then. You have seen that paper; just take in your hand (*handing a paper to the witness*). Is that the paper which you signed?—This is a copy of it, but the paper went up to London.

453. Have you seen that paper before?—Yes.

454. Had Humphrey Hulme that paper with him at the time?—This is a copy of it.

455. How do you know that it is a copy?—Because Jabez Britton wrote a copy of it.

456. Who is he?—A paperhanger.

457. Did you refuse to sign it unless you went before an attorney?—Yes.

458. And you took Jabez Britton for a witness?—Yes.

459. And you saw him take that copy?—Yes.

460. What became of the paper from which this is a copy?—It went to London.

461. Do you know in whose writing that paper was?—Well, I went to Mr. Watkin's office at Bank Top yonder, and I saw Mr. Watkin with it in his hand.

462. You saw there the paper from which this was copied?—Yes.

463. Did you see your signature to that paper in Mr. Watkin's hand?—Yes.

464. You had signed the paper from which this was copied?—Yes, with a cross.

465. You had made your mark upon it?—Yes.

466–7. Did you see that mark on the paper which Mr. Watkin had?—Yes.

The following paper was read:

"I Thomas Wyld of Small's Buildings, Regent "Road, Salford, brickmaker, the prosecutor in the late "prosecution against Holland Cheetham and William "Slater, tried and convicted at the Winter assizes for "Manchester, in 1864, and sentenced by Mr. Justice "Blackburn to 20 years penal servitude, do hereby "testify that I believe that the said Holland Cheetham "and William Slater never have had any malice or "desire to injure me personally or otherwise; and I "further say that from Holland Cheetham I ex-"perienced at times great kindness, and when out of "employment he exerted himself for me to obtain a "situation. That William Slater I know but little "except as a workman in the same trade; that I "never had any falling out or quarrel with him which "would lead to a motive for his committing the "offence for which he is now suffering, and I cannot "ascribe to either Cheetham or Slater a motive for "doing me an injury. Under these circumstances, "and taking into consideration the uncertainty of the "testimony I have given, for I may have been mis-"taken as to their identity, (although I cannot say "that I have,) I trust that Her Majesty will be pleased "to give the prisoners the benefit of any doubt upon "the case, and if not liberating them at least commute "the punishment to a short period of imprisonment.

"Dated this 28th day of March 1865.

"(Witness to signature,)

"(The mark of Thomas Wyld.)'

468. (*Mr. Barstow to the witness.*) When you were at the "Swan" I suppose you had a glass with these people?—Yes, I had a glass, and cheese and bread, and my "missis" was with me.

469. What had you to drink?—A glass of beer.

470. Nothing else?—A sup of gin.

471. You and your "missis"?—Yes.

472. That was before you consented to sign it?—Yes.

473. Were you quite sober when you signed it?—Oh yes! as sober as I am now.

474. How often do you think they had tried to get you to sign a paper of that sort?—Above ten or a dozen times throughout, first one and then another.

475. And you had always refused up to this time?—Yes.

476. What was your reason for refusing?—Because I thought I should get into a hobble, being no scholar.

477. Why should you get into a hobble?—I am no scholar.

478. Had you ever any doubt that Slater and Cheetham were the men who beat you?—No, never.

479. You have no doubt now?—No.

480. And you would not have signed that paper except for the promises made you by Humphrey Hulme and Potts?—No.

481. You say you went to Mr. Watkin's; who took you there?—Humphrey Hulme, and Slater's wife.

482. Were you at Mr. Watkin's more than once?—No, they wanted me to go again and to say before Mr. Watkin, they would guarantee me 20*l.* to say I did not know them. They said it would do me no harm. I said I might get a rope.

483. By "they" you mean Slater and Cheetham?—Yes.

484. Was this after you had been the first time to Mr. Watkin ?—Yes.

485. And after you had seen the paper in his possession ?—Yes.

486. Had you any conversation with Mr. Watkin ?—No.

487. You said nothing ?—I said naught about signing anything at his place.

488. What took place then when you went there ?—They kept bothering and bothering me to go to Mr. Watkin and see Mr. Watkin.

489. And so you went and saw Watkin ?—I went and saw Watkin to please them.

490. You only saw him and came away ?—That is all. He said he thought the paper would do a deal of good.

491. Did Watkin say anything to you ?—No.

492. He did not say a word to you ?—He only said he thought I had been badly hurt.

493. Was there any conversation in your presence between Mr. Watkin and Humphrey Hulme and Mrs. Slater ?—He wanted to know if I was sure they were the right men, and I said " Yes."

494. You are quite sure of that ?—Yes.

495. At this time was that paper that you had signed in Mr. Watkin's hand ?—Yes.

496. Was it read then ?—Yes, he read it over.

497. Did he read it to himself or did he read it aloud ?—He read it up. He said he thought it would do a deal of good.

498. He read it aloud so that you could hear ?—Yes.

499. Then when was it that he said it would do a deal of good—was it when he had finished reading it ?—Yes.

500. Was it after that that he asked you whether you were sure ?—He asked me when he read it whether I was sure they were the right men, and I said, " Yes."

501. Was it before or after he had read the paper that he asked you if you were sure they were the right men ?—He asked me after he had read it.

502. The first thing that he said after he had read the paper was that it would do a deal of good, was it ?—Yes.

503. Upon your saying that you were sure that Slater and Cheetham were the men who assaulted you, did Mr. Watkin say anything ?—He asked me if I knew if they were the right men and I said, " Yes."

504. Did he say anything after you said that ?—He wanted to know if I knew they were the right men, and I said, " Yes."

505. But after that did he say anything ?—He made no remarks.

506. He said nothing ?—No.

507. I do not know whether you know what became of that paper that Mr. Watkin had in his hand ?—I do not.

508. You left Mr. Meadows's employment after having worked for him six months I believe ?—Yes.

509. What made you leave his employment ?—Because I was like frightened for one thing.

510. What should you be frightened of ?—Of their doing me an injury.

511. What should they do you an injury for ?—They threatened to set fire on the place at Reddish.

512. Who did you fear would do you any injury ?—The brick men.

513. Why should the brick men do you an injury ?—I do not know, because I had stood to the men I suppose.

514. How do you mean " stood to the men ?"—It is because I swore to the men and would not be turned off.

515. By " the men " do you mean Slater and Cheetham ?—Yes.

516. You told us that they threatened you ?—Yes.

517. What threats did they use ?—George Bailey told John Smith the farmer.

518. That is the man with whom you lodged ?—I hired a place of him at Reddish. George Bailey told John Smith the farmer that if he did not get shut of us he would set fire to the house.

519. Were you present when he said that ?—No, I was not.

520. Who told you ?—My " missis " had heard of it.

521. Did John Smith tell you ?—John Smith would not have anything to do with it.

522. But did John Smith tell you that he heard George Bailey saying so ?—He told my " missis."

523. Do you know whether John Smith lives in the same place still ?—No, I do not.

524. You left Meadows ?—Yes.

525. Did you change your name ?—Well, I was going under another name, but it is not to be known like.

526. We will not ask you that, but what is the reason of the change ?—To keep myself quiet. When I was living in Regent's Road, Small's Buildings, they came and punched the panels of the door and broke it.

527. Have they done anything else besides that ?—They told me to come out and they would wash their hands in my blood.

528. Do you know who it was that said that ?—No I do not. It was a Manchester brickmaker in the Salford Road.

529. Do you know that the man was a Manchester brickmaker, who said that ?—Yes, he is in the Manchester club, but I do not know his name.

530. Have they done anything to you ?—No they have never done aught to me, only they forced me to two summonses on Saturday.

531. Have they put anything into your bricks while you were working ?—No.

532. Have they done anything to you while you were at work ?—No.

533. Have they threatened you except this time that you tell us of ?—No.

534. They have not threatened you besides that ?—No.

535. Would you know this Manchester man if you saw him ?—Well, I cannot say.

536. Was he a man whom you had seen before ?—No.

537. You had never seen him before this time ?—No.

538. (*Mr. Chance.*) You say that you were not a member of the union, except by way of contribution; could you have belonged to the union if you had asked ?—No, it was only contribution.

539. They would not let you belong to the union ?—No.

540. By any payment ?—No.

541. (*Mr. Barstow.*) Did you ever try ?—Yes: I tried a time or two.

542. And they refused ?—Yes.

The witness withdrew.

Mrs. Sarah Wilde sworn and examined

Mrs. S. Wilde.

543. (*Mr. Chance.*) Are you the wife of the last witness, Thomas Wild ?—Yes.

544. Do you remember your husband being assaulted ?—Yes.

545. Was that about the month of August 1864 ?—Yes, on the 2nd of August.

546. Was the first information you had of it seeing him in his injured state ;—Yes, he came to the bottom of the steps and called out, " My wife ! my wife ! my wife !" three times over. I got down and says, " Whatever is to do ?" and I took hold of his hand and felt it was wet.

547. Where was this ?—At Reddish, Stockport, at our own home.

548. Did he come home by himself ?—Yes.

FIRST DAY.

Mrs. S. Wilde.

4 Sept. 1867.

549. Where was he when he called out to you?—At the bottom of the steps.

550. Then you went down to him?—Yes.

551. Just tell us the state in which you found him?—He was leaning over the steps. There are 10 steps to go up to our door, and he was leaning over the steps. Says I, "Whatever is to do? Hast thou fallen "off the top of the kiln?" I took hold of his hand and he said, "Oh!" His arm was bleeding and it dripped on to my hand. I got him up into the house. I said, "Whatever is there to do? and I laid him down on the floor and went out and knocked his master up. He was insensible and could not tell me, and he did not tell anyone till he told the policeman he knew two of them.

552. You say that he was insensible. Did you hear him tell the policeman who had done it?—Yes, he kept being insensible all the night.

553. How long after was it before he told the policeman who had done it?—I think it was near 5 o'clock in the morning before we saw the policeman.

554. At that time had your husband recovered his senses?—Yes, he kept being insensible at times. I think he was sensible at the time he told the policeman.

555. That was about 5 o'clock in the morning?—Yes, it might be a little before five.

556. Who did he tell the policeman had done it?—I did not hear him tell who, the policeman said, "You must not tell anyone."

557. Did you hear him tell the policeman who had done it?—No, I did not hear him say any name.

558. Was your husband's arm broken?—His arm was broken.

559. In more than one place?—His arm was broken here (*describing the same*), and I think his finger was broken. I cannot say whether it was broken in more than one place or not.

560. What other injury was done to him?—His head was cut, and under his eye, and it affects him now, and his leg was hurt.

561. Was his leg broken?—No, it was only cut.

562. How long was he ill?—He was ill a long time. I think he was in the infirmary about five or six weeks, or it might be more.

563. Do you remember Cheetham and Slater being tried and convicted?—Yes.

564. After that do you remember any men coming to your husband to ask him to sign a paper?—Yes, our master forgets things, but the first paper they brought to him was on the Christmas after.

565. After the conviction?—Yes, but he forgets a deal of things.

566. Who came to him then?—There was Slater's wife, Cheetham's wife, and some more. I do not know who they were.

567. Slater's wife?—Yes.

568. Cheetham's wife?—Yes.

569. And how many other people?—I cannot tell, three or four men, but I cannot tell who they were.

570. Had you ever seen any of these men before?—Not to the best of my knowledge.

571. Did you hear any of their names mentioned when they came to you?—No.

572. Have you seen any of them since?—I cannot say that I have; they took him to a beerhouse.

573. What beerhouse was it?—Mrs. Taylor her name was, then in Reddish.

574. What was the name of the beerhouse?—I cannot say, only Mrs. Taylor's.

575. Mrs. Taylor's in Reddish?—Yes.

576. Did you go with them?—I followed them.

577. Why did you follow them?—Because they wanted him to sign a paper, and I wanted to know what it was he was signing.

578. Had they asked him to sign a paper before they left to go to the beerhouse?—No, not before, that I know of.

579. What made you follow them?—Because I saw these strange men and their wives with him coming from his work.

580. Did you go to see what they would do?—Yes.

581. Did you follow them to the beerhouse?—Yes.

582. Did you see them go into the beerhouse?—Yes.

583. And you followed in after them?—Yes, they asked him to sign the paper.

584. Did they let you go into the room?—Yes.

585. (*Chairman.*) You say they asked him to sign the paper?—Yes.

586. (*Mr. Chance.*) Do you know the kind of paper they asked him to sign?—It was like a letter. I cannot say that I can tell; I can tell you what it had in.

587. What did they say to him?—They asked him if he would sign the paper.

588. Did they say what the paper was?—No. I said, "What is it?"

589. Before you said anything did he say anything?—No. I said, "What is it? because we can neither "of us read writing, and he must not sign anything "except it is read." We fetched a young man to read this paper for us, and he read it several times.

590. The young man did?—Yes.

591. Who was it?—I cannot tell you what his name was.

591*a*. He lived in Reddish?—He said, "I shall not sign this paper."

592. Did you hear the young man read the paper over?—Yes, several times.

593. Now tell us what it was the paper contained?—He says, "I shall not sign the paper."

594. Tell us what the paper contained?—It said: "I Thomas Wyld have committed these men. I have "committed them wrongfully. Had I it to do again "I would not do it. I have been compelled by a "neighbour."

595. Were those the words or the substance of what the paper contained?—It is as near as I can tell. I fetched Smith, the policeman, and I believe he took the papers and said if there was any paper signed it must go to the police office to be signed.

596. Did you fetch Smith, the policeman, when the paper was read?—Yes. I think Smith took the paper; I am not certain, and we went before the magistrate the same time, the day after at Stockport, and he said if he signed any paper to that effect he was liable to be put in prison. I went to the police myself with Smith.

597. Did he refuse to sign the paper altogether?—Yes, he did not sign it, not for many a time coming: they found us wherever we was living.

598. Did he have any beer?—No, he had a drink of porter with them, and they offered me some porter.

599. Had any threats been made?—No.

600. Did they make any promises to him?—No, not at that time.

601. Then he refused to sign it and you all went before the magistrate?—I and Smith went.

602. Not your husband?—No, my husband went to his work the next day and did not go.

603. Was there any other occasion after that on which any men came to your husband to ask him to sign the paper again?—Yes, several times.

604. What was the next occasion which you can remember?—I cannot remember what day of the month it was.

605. How long after this first occasion did it occur?—It would be many a month after we went to live at Manchester, and they found him there. He went to work for Mr. Ashworth, and they found us perhaps three months after.

606. Why did you and your husband go to Manchester?—We went out of the road of the men so that they would not bother us to sign the paper. I was afraid of him doing something he should not do.

607. Were you afraid of being injured at all by the men at Reddish?—That was one thing.

608. That was one reason of your going?—Yes.

609. The other was that you did not want to be bothered about signing the paper?—Yes.

610. When you got to Manchester did any of these people or anybody come to your husband to ask him

to sign the paper again ?—Yes, to sign another paper for their time to be shortened.

611. What do you mean by "for their time to be shortened"?—They thought 20 years was too long for them.

612. You mean the time for which they sentenced Cheetham and Slater to penal servitude ?—Yes.

613. Who came upon this occasion ?—I do not know who came the first time.

614. How many people came ?—About three came, but I do not know many of the brickmakers.

615. Were any of them people that had come on the first occasion ?—No.

616. Neither Cheetham's wife nor Slater's wife ?—No, not at that time.

617. Were they men or women ?—Men.

618. What did they say to him then ?—They wanted him to sign the paper, and he said he would not.

619. Was that at your own house ?—Yes. I said any paper we signed we would have written by an attorney, and then we should know what we were doing. We did not care to sign a paper for the time to be shortened without knowing what we were signing.

620. Was that paper read over to him ?—We did not sign any then.

621. Was it read over to him when he was asked to sign it ?—The paper at the beerhouse do you mean ?

622. No ?—They did not show us any paper then.

623. What took place on that occasion ?—Nothing ; they went back again.

624. What was the next occasion on which they came to your husband ?—They came again and wanted him to sign another paper.

625. How long after was that ?—About a fortnight.

626. Who came then ?—Slater's wife and Cheetham's wife and Humphrey Hulme's wife and Humphrey.

627. That is four. Who else came ?—I cannot say the others. I did not know their names.

628. How many more were there besides those four ?—Two or three more.

629. Were they men or women ?—Men.

630. Were they the same men that came to you on the first occasion ?—No.

631. Where was it that they came to you ?—To our own house, Small's Buildings, Regent Road.

632. What time in the day or night did they come? —In the afternoon.

633. What did they ask your husband to do then ? —They asked him if he had made up his mind to sign the paper ; I said he had not, and would not do it.

634. Did they bring any paper ?—I did not see any.

635. Did they say what they wanted him to sign ? —No, only that it was a petition that was going to London to have their time shortened.

636. They mentioned that ?—Yes.

637. Did they say to whom that petition was going ? —No.

638. Did he refuse to sign on that occasion ?—He did not see them that time ; no one saw them but me. I told them he would not do anything.

639. Did they then leave ?—Yes, and they came again.

640. How long after did they come again ?—About another week.

641. Was it at your own house ?—Yes, I was not with them. They met Mrs. Ward, Humphrey Hulme, Joseph Brown, and Humphrey Hulme's wife, and they came up for me and I went and met them.

642. Did you go by yourself or with your husband ? —By myself at that time.

643. Where did you go to ?—We went to Andrews' office.

644. Is that Andrews the lawyer ?—Yes, whether it was Andrews or not it was the lawyer. I went to him to sign the paper when he was in the infirmary for them to come out on bail.

645. You went with them to Andrews' office ?—Yes.

646. Did your husband go with you ?—No.

647. Who had said anything about going to Andrews, did any of them say anything to you about it ?—I proposed to go to some attorney to see whether he could do anything.

648. You proposed to go with them ?—Yes, I did not propose anywhere.

649. Was it in order to protect your husband in signing what he was signing ?—To prevent him signing or doing anything wrong we went, and he ordered us to come again next day and our master went and he signed that paper.

650. You mean your husband went ?—Yes.

651. Who went with him ?—Jabez Britton.

652. Did you go too ?—Yes.

653. Was any one else there except you, Britton, and your husband ?—Mrs. Ward of the "Grey Horse" Reddish, Humphrey Hulme, Joseph Brown, and another man or two, but I cannot tell you who.

654. Was there any paper produced then for him to sign ?—Yes.

655. What paper was that ?—The paper you have got a copy of.

656. Do you mean the large paper ?—Yes.

657. Had you seen the paper that was produced just now, the large paper ?—Yes, that was a copy of it. We took it to our home with us.

658. Was it read over to him at Andrews' office ? —Yes, they wanted him to say that he was mistaken, and Andrews said if he wrote the paper to say he was mistaken, it would be more than his place was worth. He said he would write one to do as much good as it could without doing each side any injury.

659. Who said this ?—Andrews.

660. He referred to the paper which has been read here to-day ?—That was a copy of it.

661. Was that the paper you refer to (*holding up a paper*) ?—Yes.

662. Did your husband sign it ?—My husband put his cross to it at the public-house.

663. I am speaking now of Andrews' office ; did he sign it at Andrews' office ?—He put a cross on the one that went to London, but not in Andrews' office.

664. Your husband did not sign the paper at Andrews' office ?—No, he signed it at the public house.

665. Did he refuse to sign there ?—They never asked us there. They went out when they had done speaking to the public-house, and they said, if he would sign it they would give him 5*l.* for his day's work. Mr. Britton said they must not sign it without signing a paper as to whose names were there that gave it to him.

666. To what place did you go from Andrews' ? — I cannot say ; I was a stranger.

667. Was it at a public-house ?—Yes.

668. You do not know the name of it ?—No.

669. Did the same people go to the public-house who were in Andrews' office ?—Yes.

670. Did you all go together to the public-house ? —Yes.

671. When you got to the public-house what took place there ?—They asked him if he would sign it, and they said they would pay him for the loss of his work, and give him all the preference of their society, and take him in again and let him work at 6*s.* a day. He said, "Well, he did not care what he did, but he "did not want to do himself any hurt, and he did not "mind if that paper would do him no hurt, and do "them any good in signing it," and they gave him the 5*l.* towards the expenses he had lost and his work, and they said they would take him into his club again.

672. Did they give him 5*l.* ?—Yes, they gave it to me, not to him.

673. Did they give the 5*l.* before or after he signed? —Before he signed it for his day's work.

674. It was the same paper that had been taken into Mr. Andrews' office ?—Yes, that was a copy of it.

FIRST DAY.

Mrs. S. Wilde.

4 Sept. 1867.

675. Had Andrews advised him not to sign?—Andrews did not advise him either to sign or not, but he said that it was as much as his place was worth for him to do it.

676. After the 5*l.* had been paid to you, did your husband sign the paper?—Yes, he put his cross on it. He was willing for the time to be shortened.

677. Did your husband suppose that the paper contained only a request that the time should be shortened?—There was every word that is on that paper.

678. Was the paper read out at the public-house?—No; only Mr. Britton wrote that off it.

679. The paper was read out at Andrews' office?—Yes.

680. Did you hear it?—Yes.

681. And your husband too?—Yes, and Andrews said it would do him no harm.

682. (*Chairman.*) Was Britton there when the paper was read out loud?—Yes, all the time.

683. (*Mr. Chance.*) Do you believe also that it only contained a request that the time might be shortened?—That he was willing for the time to be shortened, if not liberated; he did not care if they were at home next morning.

684. Was it in consequence of the 5*l.* and the promises made that your husband signed the paper?—He thought he was doing some good by shortening the time.

685. It was your belief that the paper contained only that?—We thought we were doing good by shortening the men's time.

686. (*Chairman.*) Was it your belief after hearing the paper read that it was only a request to have their time shortened?—To have their time shortened.

687. Nothing else?—Nothing else.

688. Do you remember whether the paper said anything about his being sure or mistaken about the men?—Yes, he said he could not say he was mistaken in his identifying them. The paper said so.

689. That was the way in which you understood it?—Yes.

690. That he was not mistaken about the men, but he had no objection to the time being shortened?—Yes.

691. That was the way in which you understood it?—Yes.

692. (*Mr. Chance.*) You did not understand at all when he said he would take 5*l.*, that he had any doubt about them?—We did it only to shorten the men's time.

693. That was the only object you had in signing the paper?—Yes.

694. (*Chairman.*) Never to express any doubt about the men?—No, they did not ask us, they only asked us whether we were willing to have their time shortened and we said, "Yes, we were, or else liberate "them, we did not care."

695. (*Mr. Chance.*) When you signed, did you all leave then?—Yes, we left them there and went home.

696. At that time were you living in Manchester?—Yes.

697. Have you since that time removed?—We left Manchester.

698. You have gone out of the district of Manchester?—Yes.

699. Did you leave Manchester because you were in fear of being illtreated?—No, we left for work.

700. (*Mr. Barstow.*) And could you not get work in Manchester?—No, the brickmakers would not give him any work.

701. (*Chairman.*) Your husband is going under a feigned name, is he not? I do not want to know the name, but it is not his own name?—No.

702. (*Mr. Barstow.*) They gave you 5*l.* and offered him the benefit of the union?—Yes.

703. To put him on the union?—He went to Oldham to work and got a job there, and everyone put their jackets on and would not work with him.

704. They offered him the benefit of the society?—Yes.

705. Has he ever been made a member of the society?—No.

706. He did not have the benefit of the society?—No.

707. In that respect they have broken their word to him?—Yes.

708. (*Chairman.*) Is he going under a feigned named not only to get work in another district, but also because he is afraid of being injured?—Yes. There are club men there as well as here, and we do not wish it known.

The witness withdrew.

W. Singleton.

WILLIAM SINGLETON sworn and examined.

709. (*Chairman.*) What are you?—A working brickmaker.

710. How long have you worked at brickmaking?—A dozen years on and off.

711. Are you a married man?—Yes.

712. Have you any family?—Yes.

713. How many?—Four children living.

714. Where do you live?—In Stockport.

715. You have been in the brickmaking trade for the time you have mentioned?—Yes, but I have been off it sometimes.

716. Are you now working for anybody?—Yes.

717. Whom are you working for?—James Ludlow.

718. Where are his works?—In Reddish.

719. How long have you been working for him?—Since the 2nd of January.

720. This year?—Yes.

721. Whom did you work for before?—Thomas and William Ludlow.

722. How long did you work for them?—Something better than one year.

723. Whom did you work for before that?—Samuel Ludlow.

724. How long had you been employed by them?—Off and on about six years. We had not full employment in the winter and we had to break off work.

725. Are you in pretty good work now?—Yes.

726. You are a member of the Stockport union now?—Yes.

727. What office do you fill?—I am treasurer now. I was made treasurer yesterday.

728. Whom did you succeed as treasurer?—Thomas Holt.

729. How long had he been treasurer?—Three months. We are only on three months at once.

730. How long had he been treasurer?—Three months.

731. Who was before him?—I think it was me three months before.

732. How long were you treasurer before that?—Not for several years before that.

733. You had been?—Yes.

734. Three or four years before that?—Yes.

735. What does the treasurer do; does he keep the money?—He draws the money and locks it up in a box and pays it out for the purposes wanted.

736. Before any money is wanted have you a general meeting and resolutions passed?—No, we have rules to go by.

737. Who is the judge about the rules, is it the treasurer for the time being?—These are the rules (*handing in the same*).

738. You are the treasurer and have been so a long time, and you are just the person to tell us about this. You have the funds in your hands have you not?—We have a box that we keep the books and moneys in. I never carry any money about with me. I only lock it up in the box.

739. Before you pay away any money do you bring it before the meeting?—We pay it according to the rules.

740. Supposing a person comes and says, "I want money for such a purpose," are you the judge as to whether it is within the rules or do you put it before the meeting?—I never pay any money except the rules justify it.

741. Now and then there is a little extra; is not that in consequence of a resolution?—Yes, by the rules in the books. I am no scholar myself. They tell me how much money is wanted.

742. You can understand what you are told about money or you would not be treasurer?—Yes.

743. Supposing that there is any money wanted for any particular job, is there a resolution of the meeting, and are you instructed to pay it?—I cannot answer you upon a question of that kind, because I am not acquainted with any except from our rules.

744. Is not there sometimes money paid in consequence of some resolution of the meeting?—No, they come and tell me they want so much money and I pay them.

745. Is that the only mode in which you pay money according to the rules?—Yes, I only draw the money and sit there to receive it as it is paid on the club nights, and they tell me what they want and I pay it.

746. They tell you that they want money for what?—They say they want so much money and I pay it.

747. Supposing a man is a member of the club and he comes and says that he wants money, I suppose he says what he wants it for; he must tell you that?—Yes, there is a meeting and they read it up and tell me how much they want.

748. Do the men want it for being out of employment?—Yes, sometimes for being out of employment, and sometimes for funerals.

749. If a man tells you that he has been so many weeks out of work you pay him according to the scale?—Yes.

750. If he says that he has done any work for the society do you pay him for it?—Yes, if he has been an efficient and excellent member.

751. If he has been an efficient and excellent member you pay him something as a reward for it?—Yes.

752. You pay him for work done?—Yes.

753. If a man comes and says he has done work for the society you pay him?—Yes.

754. Are your accounts audited now and then?—Every quarter.

755. Do you put down in a book all that you have paid?—Yes.

756. You keep a regular account?—Yes.

757. Have you got your books here?—I think some of our members will have the books. I am not able to keep books. I am no scholar.

758. Who does that job for you?—The secretary.

759. Who is the secretary?—A man of the name of Joseph Brown went off and Samuel Moss is secretary now. He will be the changed man coming in yesterday.

760. Did you change all your officers yesterday?—Yes, we change them once a quarter.

761. How came you, if they change once a quarter, to have been six years treasurer?—I have never been more than three months at once.

762. Are you about to be re-elected?—Yes.

763. So therefore, although you change once a quarter, the same man may go back?—No, not until he has been out. He goes out of office, and he can be elected in a quarter or half-year afterwards.

764. Who was the secretary before, because you changed all your officers yesterday, and have got a new set in?—I cannot say.

765. You must know the man who has been writing and keeping the accounts?—I do not attend every meeting. I am three or six months sometimes and never go to club.

766. Where do they come to you for the money, at the club, or at your house?—I pay the money at the clubhouse.

767. You must go pretty regularly if you have to pay?—Yes, they bring their books.

768. You must be there to receive them?—Yes, when I am in office.

769. Is your union called the Stockport union?—Yes.

770. How many members are there in it?—Perhaps about 200.

771. How often do you hold your meetings?—Once a fortnight in summer, and once a month in winter.

772. In the evenings?—At 6 o'clock at night we commence, and go on till 9 o'clock.

773. Do your meetings last three hours?—Some live a good way off, and we stop for them.

774. Is there a little speaking done at the meeting? No.

775. Who is the president who was elected yesterday?—William Slater. He has not been changed, it was not his day.

776. Is that Mr. William Slater who has been in prison?—Yes.

777. When did he come out of prison?—Just the beginning of the year; I cannot say exactly. I did not take particular notice.

778. You recognized him as an old acquaintance when he came out?—Yes, of course.

779. You have re-elected him as president since he came out?—Yes.

780. When had he the honour of being re-elected?—A quarter before yesterday.

781. When did he come out of prison?—It would be some time in the beginning of the year; I cannot say exactly when.

782. The next quarter did you re-elect him as president?—Yes, he was re-elected as president.

783. Had he been president before?—He had been president before.

784. Before he "got into trouble?"—Yes.

785. How long had he been president before?—I cannot say.

786. Do you remember whether he was president in 1864?—He was president, but I cannot say how long.

787. But he was president in the year 1864?—Yes, perhaps two or three months.

788. But he was president in the year 1864?—Yes.

789. Were you in office then?—No.

790. You were a member of the union?—Yes.

791. But not in office?—No.

792. When had you the honour of first being elected to office?—Perhaps it might be five years since, perhaps it might be longer.

793. You were out of office in the year 1864, having been elected in the year 1862; you were in office in 1864, were you not?—I cannot say to be confident.

794. What offices have you filled in the union?—I have never filled any other office.

795. You have always had the money?—I have been treasurer nine months in my time.

796. Five years ago you were in office?—Yes.

797. What was the office which you first filled?—A district man.

798. What are the duties of a district man?—Going about measuring the gauges.

799. And looking after the men belonging to your union?—Yes, and anything that is necessary.

800. Anything that you consider necessary from observation?—According to the rules.

801. You go round the district and look after the men belonging to the union?—We take a few yards.

802. What are you paid for that?—Sixpence a quarter, or something like that.

803. How often do you hold your meetings?—Once a quarter; they are quarterly meetings.

804. I understand a quarterly meeting will be held once in a quarter; but how often do you hold your

FIRST DAY.

W. Singleton.

4 Sept. 1867.

meetings besides. How often do you meet together and have a council or committee meeting?—Once a fortnight.

805. Are those meetings in the evening?—Yes.

806. Do you hold them at the "Pack Horse"?—Yes.

807. You have held them sometimes at the "Pack Horse?—Yes.

808. Taylor is not a member of your society; we understand that he is the landlord?—Yes.

809. You have a private room then?—A club room that is used for other purposes.

810. How many of you generally meet there once a fortnight?—If the men were all there there would be nearly 200.

811. I am able to follow you there. Of course if they were all there there would be 200; but as a general rule how many do you muster?—They would all wish to come there.

812. Then you generally muster 200?—They are there very seldom.

813. Are they fined for non-attendance?—Yes.

814. That is one of your rules, is it?—There is a fine of course.

815. And you as treasurer look after that?—I receive the money when they give it to me.

816. And you ask them for the money?—No.

817. Is it not your duty to collect it?—I receive it.

818. A man may collect and receive. Do you go round and collect?—No; they bring it to me.

819. You were a member of the union in 1864?—Yes.

820. Were you in office in 1864. I think you were?—If I was it would be at the latter end of the year after the men were imprisoned. I believe it would be after they were imprisoned.

821. Were you not in office before the year 1864?—No.

822. Not at all?—No.

823. After your services began in 1862, and they knew the value of them, they would surely go on re-electing you. Were you not in office in 1864?—I cannot say whether I acted as district man or not, to tell you correct.

824. You may have been in that sort of office in the year 1864?—I will not say; I might have been in the beginning of the year.

825. You know Mr. Meadows?—Yes.

826. Have you a committee? You always have a committee, have you not?—No, we have no committee.

827. Have you what they call an executive committee, and an active committee?—Sometimes they might have a special meeting.

828. Then I will call it a council?—Sometimes a master wants something done different from the rules, and then we have a meeting.

829. Then you might want something different?—Sometimes we call the members together for something of that sort.

830. You know Mr. Meadows, do you not?—Yes; I know two Meadows.

831. The two partners together?—Yes.

832. Did you know them in 1864?—I was not acquainted with them much then. I have been better acquainted with them since.

833. You know that they existed at the time?—Yes.

834. You know that they had some works at Reddish?—Yes.

835. Did you hear of a dispute between them and their men in 1864?—Yes, there was some dispute.

836. It was brought before a meeting, I suppose, at one of your regular meetings?—Yes; there was a dispute and there was a turn out.

837. It was brought regularly in the ordinary business way before your meetings of the union?—Yes.

838. And the whole thing was properly discussed?—Yes.

839. Did you understand what the dispute was about? Was it as to making 10*d.* in 1,000 more, and the men wanting the 10*d.*?—I believe the dispute was about making bricks of different dimensions.

840. So as to save in the cost of them 10*d.* which the union men said ought to be divided amongst them; that was it, was it not?—Yes, I think it was.

841. And there was a turn out in consequence?—Yes, until the question was settled.

842. You did not work at Mr. Meadows', did you?—No, not at that time.

843. Then we understand that part of the men went back to the works, Wild, Child, and Fallowes, is that so?—There were some that went back.

844. Those were the three, there is no doubt about it?—Perhaps they were; I was not much acquainted with them.

845. You heard that they went back?—Yes, some of them did.

846. Did you hear of Wild being ill used?—Yes, I heard talk of it, and the men were taken up.

847. You say they had discussed the cause of the turn out, and also had discussed the fact that some of the men had gone back?—I never heard anything discussed at the union about that affair.

848. You say that you heard the discussion at the union that there had been a dispute about making the bricks?—Yes.

849. Had you heard it discussed at the union?—Yes.

850. You heard that the master had offered to give the men 6*d.*, and that it had been refused?—Yes.

851. You heard, of course, that in spite of that three of the men had gone back to work; you must have heard that at the union?—I never heard of it at the union.

852. But you did hear of it?—Not at the union.

853. You did hear of it?—Yes, I heard of that.

854. It was common talk amongst you, surely?—When we are working at the other side of the town we do not hear every particular.

855. But you heard something that is particular, you heard that the men had gone back?—Yes, some part of them.

856. Did you hear also that Wild had been ill-used?—Yes, I heard him tried.

857. Before the trial took place did you not hear that he had been ill used?—Yes, I heard them speaking about taking men up, that was the next day.

858. You understood that they took up Slater and Cheetham?—Yes.

859. Slater at that time was the president?—No, he was the treasurer.

860. He had your office?—I think he was treasurer.

861. Was Cheetham a member?—Yes, he was the president.

862. Cheetham was the president and Slater was the treasurer?—Yes.

863. You heard of their being taken up, did you not?—Yes, I heard it the next day.

864. You did not hear anything discussed about the ill-usage of Wild before it took place?—No, not in the least.

865. You are quite sure of that?—Yes.

866. What was the district that you were the district man of?—In Hampshire Lane, the other side of Stockport.

867. Was this out of your district?—It would be three miles.

868. Who was the man in that district?—The district man?

869. Who was the district man at that time?—I cannot say, to tell you true. I cannot say who he was.

870. There is no doubt that there would be one?—Yes, there would.

871. When you talked at the meeting, had not the district man reported that some man had gone to work against the rules of the union?—I cannot remember it.

872. Is it not your duty, as a district man, to mention to the meeting if any man is working against the

rules?—Sometimes they do and sometimes they do not.

873. If they do their duty they mention it?—Mr. Meadows came and stated his grievance himself about the turn-out to the society.

874. Where were you on the night of the 2d of August 1864?—Would that be the night——

875. That was the night Wild was hurt.—I was at home and in bed.

876. What time did you go to bed?—Perhaps about 9 o'clock—between 9 and 10.

877. When did you first hear that Wild had been injured?—The day following.

878. Early in the morning?—No, about 4 o'clock in the afternoon.

879. On the 1st of August or on the 2nd of August was there a meeting of your club?—No, not in August, not that I am aware of.

880. How can you say that there was not?—Not that I am aware of.

881. Can you swear that there was not?—I cannot say, to tell you true, whether there was or was not.

882. Can you refresh your memory?—I cannot remember whether there was or not. There might have been, but I cannot say that there was.

884. Have you sometimes a meeting at other places than the "Pack Horse," got up in a hurry?—Sometimes, on bits of cases. Sometimes a man leaves his work, and we have to get a change of men, and different things of that kind.

885. There is a meeting, is there?—We get a man to fill his place, or something of that sort.

886. You sometimes have a meeting in the yard in the open air as well as at the club room of the "Pack Horse?"—Yes.

887. Now, I ask you whether there was not a meeting of that sort on the night of the 1st or the 2nd of August; take care how you answer?—There might have been on the day before, but I cannot swear to that.

888. Will you swear that there was not?—No, I will not.

889. Will you swear that you were not present at a meeting the night before, namely, the 1st of August 1864?—Before the 2nd?

890. The 1st or the 2nd of August, I will put either?—Yes.

891. Were you present at that meeting?—I was present at no meeting.

892. I am not talking of a meeting of the club at the "Pack House," but were you present in company with the men belonging to your union at a meeting either on the 1st or 2nd of August?—I was at no meeting either on the 1st or the 2nd.

893. Were you in the company of several of your union men in the club on the 1st or 2nd of August?—Only with the men I work with in the field.

894. That you swear, will you?—Yes.

895. Take care what you are about?—Yes. The next field to us there were men at work. There were a good deal of men altogether, and I might have been in their company.

896. Of the union men?—Yes.

897. Had you a meeting together in which matters were talked of and discussed. I am not talking of working in the field?—I cannot remember any meeting.

898. Will you swear that you were not in company of several of the union men on the night of the 1st or 2nd of August 1864, call it a meeting or call it what you like?—I was never in a house at any meeting.

899. I am not speaking of a house. In the field or yard?—I cannot remember it.

900. You will not swear that something of that sort did not take place at which you were present?—A meeting? No, sir, I cannot swear that.

901. Do you remember on the night of the 1st or 2nd of August 1864 about talking about Wild and these other two going to work against the union rules?—No, I cannot remember that.

902. Will you swear that you did not?—I cannot remember it, there being no meeting.

903. Will you swear that you did not?—I cannot remember.

904. We are not talking of anything being called a meeting. I talk of several of you coming together and talking over that matter. Just let me remind you of the Act of Parliament. If you know the truth and refuse to tell us, we have power to send you to prison, and we mean to exercise that power. At the same time if you make a full and true disclosure of the matters in which you may have been implicated, or with which you have been in any way connected, we have power to give you a certificate of indemnity, so that you shall never be molested in any way, or troubled by any civil or criminal proceeding. I warn you first as to what you may expect. I tell you it is your duty to mention everything you know upon the subject. I promise you upon the part of myself and my learned friends that if you make a full and true disclosure (that is the condition) of all that you know of in the matter you will have perfect indemnity, and will never be liable to be punished in any way whatever. Now I ask you again if you do not remember meeting together with these people and talking over this matter of Wild, Childs, and Fallowes having gone back to work at Meadows' on the 1st or the 2nd of August 1864?—I remember our having a meeting and talking and discussing the question about the men being at work, and letting the men go to work again. That was with a few men working together in the next field.

905. Was that the night of the 2nd of August?—That was the 1st of August I think.

906. Who were there?—The men that worked in the next field.

907. Was Slater there?—No; I am not aware that he was.

908. Will you swear that he was not?—He might be, but I cannot say that he was.

909. You will not swear that he was not?—I cannot.

910. Tell me the men who were there?—I can tell the men working in the field.

911. Tell me the men who were there with whom this conversation took place. I insist upon knowing. You must know who they were?—There were a good many men there that worked in the field.

912. Tell me the names of some of them?—There was James Ludlow, the man that worked with me, and a man of the name of Samuel Bray.

913. Is Samuel Bray a member of the union?—He was not a regular member.

914. Tell me the union men that were there?—There was Thomas Holland, Humphrey Hulme, and Thomas Hulme. They worked in the same field. I cannot say whether they were all there. There might have been some missing.

915. You say you cannot tell. Do recollect a little and tell me who were there. Are you sure that George Hulme was not there?—No, I think not.

916. Will you swear that he was not?—I cannot swear whether he was or was not. I cannot tell you correctly how many men were there.

917. I do not ask you how many, I ask you to tell me the names of some who were there; you must remember?—I cannot just think of the men's names.

918. Yes, you can mention some names; was not George Hulme there?—He does not work in the next field.

919. I do not care where he worked, was not he there?—I cannot be confident.

920. Yes, you can?—He might be there.

921. Was not he there?—I cannot say to that.

922. Had you seen him there?—There was no meeting, no more than one or two.

923. Never mind the meeting, was George Hulme there?—I cannot say.

924. Had you seen him that evening?—I cannot say that either; I do not know that I did.

925. Where was he working, how far off from you?—About a mile.

FIRST DAY.
W. Singleton.
4 Sept. 1867.

926. Was George Bailey there?—I think he went through the field the same day.

927. As he went through did you talk with him or he with you?—Yes, I spoke to him.

928. You spoke to him no doubt; do you remember the subject of your conversation?—There was a little conversation about the men going to work again.

929. There was?—Yes, that was all; it was no meeting.

930. We have given up the meeting and do not trouble ourselves about meeting. This was in the field?—Yes.

931. Was Joseph Brown there?—Yes he was.

932. Was Potts there?—No; I think there was no Pott there.

933. I am talking about Potts?—Yes.

934. Was he there?—No.

935. How was it that George Bailey came through the field?—I think he was looking round for employment.

936. He did not work in the field?—He worked there when there was a day for him.

937. There was no day for him then?—Yes, when they wanted a man to assist in getting the bricks together they employed him.

938. He was not employed then?—I do not know whether he had not been working the week before.

939. The week before, but he was not employed on that day?—He was coming round looking.

940. What time was it, was it in the evening?—Yes.

941. And he was looking in the evening for work. What was Joseph Brown doing there?—He worked in the next field.

942. How came they to come from the next field?—They are both together, there is no fence between them, it was in one field that we were getting clay out that we were using.

943. There was no fence between them, it was practically one field?—No, it was pulled down, there was no fence.

944. Was Slater there?—I cannot say whether he was in that field that day or not.

945. Will you swear one way or the other whether Slater was there? Take care what you are saying, I warn you.—Whether he came to the field that day I do not know; he might do.

946. Will you swear that he did not come and talk to you on that day; he is the president?—I cannot recollect it on that day.

947. On that day or the next, the 1st or the 2nd of August, will you swear that Slater was not there in that field?—No, I cannot.

948. Was Cheetham there?—No, I never saw Cheetham.

949. That you swear, will you?—Yes.

950. Slater did not work in that field or the next?—No, he would be a mile away.

951. But you will not swear that he was not there? What time in the evening was it when you had this conversation?—It was at dinner time as we just saw one another.

952. You had a talk about these men who were going back to work?—It was about letting the men go to work again, about taking the offer that Mr. Meadows had made.

953. You talked about taking the offer, then this must have been on the 1st?—Yes.

954. You say the 1st?—Yes.

955. Was Robert Bailey there?—No, I cannot say whether Robert Bailey was there or not; there were generally five or six working on the ground.

956. Was John Bray there?—I am not aware that he was.

957. Will you swear that he was not?—He might have been in the field.

958. Was he working in the field?—No, he was not working where I was.

959. Was he working in the next field?—I think he was out of employment.

960. Still you will not swear that he was not there?—He might have been there looking round.

961. Was Henry Hill there?—No.

962. Will you swear that he was not there?—I never saw him there.

963. Did you see Humphrey Childs there?—On the 1st?

964. Yes.—I cannot remember; he might be in the field, but I cannot say whether he was or not.

965. You say at this meeting you discussed about the men going back and accepting the terms?—Yes.

966. Who spoke about going back?—It was about the men walking about.

967. Who took a part in the discussion?—On the 1st?

968. Yes, on the 1st.—George Bailey came and asked whether there could not be something arranged so as to go to work?

969. He wanted to know whether something could be arranged so as to go to work?—Yes, and take the money that Mr. Meadows had offered us.

970. "Offered us"?—Offered them.

971. You said "us;" you yourself then were a party to it in some way as being a union man; that was what Bailey said, was it?—Yes.

972. Whom did George Bailey address; did he address you and the others?—There were three or four of us, and we were talking altogether.

973. Who were the others who were talking altogether? Who else was talking?—Two or three men working along with me.

974. You all took part in it?—Yes.

975. What did you say? I should like your opinion, you were the district man.—I was not the district man. We thought it would be proper to take the 6*d.* which he had offered us to go to work.

976. Did you give that opinion?—Yes.

977. Who else took part in the discussion?—The men that were there.

978–9. How many men were there?—Not very many; a man owns two or three stews.

980. How many were there of you?—About eight or nine.

981. All union men?—One was not a union man.

982. Who was he?—A man named Bray; he was working along with me.

983. He stood by listening to you?—He heard it; it was no secret.

984. "No secret amongst friends." Were all friends there?—Yes.

985. How many men work at a stew?—Three.

986. That would make nine men?—Yes.

987. There was something said, I suppose, about those other three men who had gone back continuing to work?—No, I cannot remember whether there was anything said about their being at work particularly.

988. Just tell us not very particularly what was said?—I rather think they were given over again.

989. What do you mean by "given over again?"—They had ceased work again, these three men.

990. Was it said that they should cease work in order to enable the other men to go back?—I think they had ceased in order to go to their own part of the work.

991. I do not understand you?—I think they were not working.

992. They were working at Meadows' at the time; you surely knew that Wild was working there?—Yes, he was working there.

993. Was anything said about what would become of Wild if they went back?—No, I did not hear Wild's name mentioned.

994. Did they mention them as "those fellows that have gone back"?—I rather think they had given over again until they had compromised the question.

995. What do you mean by saying "they had given over again"?—Till they could all go to work together.

996. If these men were at work, the question was whether the other men were to go back?—Yes.

997. Were your men to go back if Wild continued

to work there?—Yes; these men that went back were not to work along with him.

998. Had this matter about Wild, Fallowes, and Childs going back to work been discussed at more than one of your regular meetings?—I never heard it discussed at any meeting I was at.

999. I understood you to tell me that you had heard this subject discussed at one of your meetings?—Nothing more than about the wages and about the men going back that were turned out.

1000. Was not anything discussed about the three men who did go back?—They said they would give over and go to their own work and the men would work along with them. That was the discourse we had in the field, and there was no more discourse of any affair that I am aware of.

1001. When was the first time that you heard of Wild being injured?—About 4 o'clock the next day.

1002. When was your next meeting of the club after this had occurred?—I cannot say just to a day or two.

1003. About a week?—More than a week.

1004. Did you meet at the "Pack Horse" inn?—Yes, there was a meeting at the "Pack Horse."

1005. Of course you discussed about your treasurer having been apprehended?—Yes, I think it would be about a week after.

1006. That was the subject of discussion at your meeting?—Yes.

1007. Who was president then?—The treasurer and president were apprehended.

1008. Did you find the funds for their defence when they were tried?—Yes, of course it was found, part of it, and part by their friends.

1009. It was found by the union men?—Yes.

1010. Would that appear regularly entered in the book?—Yes, I should think it would be entered in a book.

1011. Would it be their duty to put down for the defence of the treasurer and president whatever money was spent?—Yes, and the accounts every quarter are entered up and then they are done away with, only the money that we have in hand.

1012. Do you know how much money was spent in their defence?—No, I cannot tell that.

1013. Were you active in trying to get a petition up for a commutation of the sentence?—I went to see the men at different times.

1014. In prison?—Yes.

1015. After they had been convicted?—No, before they were convicted.

1016. Did you take your instructions from them for the defence?—No, I merely called to see how the men were.

1017. How often did you do that?—Twice.

1018. Did you do it officially in that capacity?—Yes, I did just call to and see the men.

1019. What was your office in the union?—I was the treasurer then.

1020. You became the treasurer when Slater was apprehended?—I took his place.

1021. You went in your capacity as treasurer to ascertain the proper mode of defending them?—We took as peaceable means as we could do.

1022. Did you try to get up a petition for a commutation of the sentence after they had been sentenced to 20 years' penal servitude?—I believe there was a petition. I took no active part about it.

1023. Did you take a quiet part?—I had something to do with it.

1024. There was something done by you; the treasurer is a man of importance; what did you do?—I was out of office then.

1025. You were not out for two years?—Yes, I was.

1026. Were you out for two years after the sentence: they were convicted in 1864, I understand?—Yes.

1027. You were not out of office in 1865 and 1866, were you?—I went into office when they were apprehended.

1028. I want to know how it was that you took part in trying to get a commutation of the sentence?—I cannot exactly say. There were several petitions got up, but not being a scholar I could not take much active part in it.

1029. Oh yes you could; you have a tongue, and you could take an active part in that way; it does not require a scholar?—There was a petition got up.

1030. Did you go about in order to get it signed?—No.

1031. Did you ask anybody?—Yes, I asked individuals that I was acquainted with.

1032. Did you see Wild on the subject?—No.

1033. Did you see anybody else on the subject?—I saw many that were going round getting the petition signed.

1034. Whom did you speak to upon the subject of getting a commutation of the sentence?—A man that lives in Heaton Lane was getting up a petition first; I forget his name now, he was a shoemaker. He was the first man that went with the petitions.

1035. Was your reason for taking what part you did in getting up this petition that these were two of your men, the president and the treasurer?—Yes.

1036. You knew the sort of injury Wild had sustained?—I had seen Wild; I did not know the man. I never spoke to him in my life.

1037. I did not ask you that; you had heard the sort of injury Wild had sustained?—I saw him when he was in the court where they were being tried.

1038. You were present at the trial?—I went to see him.

1039. You heard a statement of his injuries?—Yes; the first day he was poorly, and did not speak, and I did not hear his statement.

1040. You heard that he had been attacked by six men, his right arm broken in several places, injured under the eye, and his leg hurt?—Yes, I heard the statement that he made.

1041. You heard of it before he made it. You heard that he had been attacked by six men?—I heard he had been ill-used.

1042. Had you any doubt why he was ill-used?—No.

1043. You had no doubt?—No.

1044. What was the reason he was ill-used?—I cannot say.

1045. You do not understand me. You really say you cannot tell why he was ill-used?—I cannot answer that.

1046. In the discussions that took place afterwards in your meetings there was no reason suggested why he had been so cruelly used?—No.

1047. None whatever?—I cannot give you a fair answer to that.

1048. You have no notion at all?—I cannot say.

1049. Did you think it was private malice, or what?—I cannot say.

1050. You had no notion why he had been injured?—No.

1051. It was never mentioned, or suggested at any of your meetings, why he was ill-used?—It was never suggested at any of the meetings about any one ill-using him.

1052. It appeared to you a very strange affair that he had been ill-used. You had not the slightest notion why he had been ill-used?—We knew that he had been ill-used.

1053. You had not the slightest notion why?—No.

1054. Not at all?—No.

1055. Not the slightest?—No; the man went to his work when he came round again.

1056. Do you know now why he was ill-used?—I know he had been ill-used. I heard of it.

1057. What had you heard?—I heard that he had been ill-used.

1058. Had you heard why?—No.

1059. You have not the slightest notion now why he had been ill-used?—No; he was at his work.

1060. Do you think that was the reason why he was ill-used?—I cannot say.

1061. Have not you known of other outrages for

FIRST DAY.
W. Singleton.
4 Sept. 1867.

which you cannot account besides this?—I cannot account for that.

1062. You cannot account for it at all?—No.

1063. Have you heard of others that you cannot account for? Did you hear of any other outrages in the year 1864 besides this one while you were a member of the Stockport union? Do you know a person of the name of Thornley?—Thornley?

1064. Yes; John Thornley. Did you ever hear of him?—Yes; in Heaton-Mersey.

1065. He was a brick manufacturer, was he not?—Yes.

1066. Did you hear that in July 1864, he had 40,000 bricks destroyed?—I heard that there had been something of that sort done, but I never saw it.

1067. You did not see it done, did you?—No; I did not see it at all. I did hear there had been some damage done by some party.

1068. Did you hear that at the time that he had the 40,000 bricks destroyed he happened to be employing non-union men?—I think he was not employing union men.

1069. He was employing men who were not union men?—There might be some. I cannot say.

1070. You have no idea why the 40,000 bricks were destroyed?—I remember them being talked about at the time.

1071. Were they talked about at the "Pack Horse"?—No; not particularly in company.

1072. In your company there?—No; I never heard it talked of at the "Pack Horse."

1073. In the company of the union men it was talked of?—Not particularly the union men.

1074. It was talked of in the company of the union men?—I was told by parties that there had been damage done.

1075. You had not the slightest notion why the damage was done?—No, I had no notion at all.

1076. Do you mean to swear that it was quite an astonishment to you that the 40,000 bricks were destroyed?—I swear I knew nothing about it.

1077. I am not asking you whether you were a party to it. Take care what you are at. You heard of it in 1864?—I heard that some damage had been done. That was all that I knew.

1078. Do you know a man of the name of Simpson?—Yes.

1079. Is he a brick manufacturer?—Yes, I believe he is a brick manufacturer.

1080. Did you ever hear of any damage being done to his bricks?—Yes.

1081. When was that?—I cannot say how long since. I remember its being talked of that some damage has been done, but I cannot say justly how long it is since.

1082. Was there any complaint made about Simpson as to the union?—He had no union men.

1083. And some how or other that was an extraordinary coincidence. He had no union men and his bricks were injured?—I cannot say what his bricks were injured for.

1084. I do not ask you that, but that is the point; he had no union men and his bricks were injured?—He had no union men that I know of.

1085. That I quite understand, but he had no union men and his bricks were injured. The two things sometimes go together, that the man has no union men and his bricks are injured?—I heard of his bricks being spoiled.

1086. You heard that he had no union men?—I did not know of any that were working there.

1087. Do you know Bailey, a brick manufacturer at Heaton Mersey?—Yes.

1088. Had he any sort of disturbance with the union?—No.

1089. Was there any complaint about his employing non-union men?—No, he has all union men.

1090. Was there any sort of complaint between him and his workmen then?—Not that I am aware of.

1091. Did you hear of his bricks being destroyed?—Yes.

1092. Do you mean to tell me that there was no complaint between him and his men; he had union men as I understand?—Yes.

1093. Was there any complaint at the time?—No, I never heard of any complaint.

1094. You have not the slightest notion why he had 50,000 bricks destroyed?—I never heard of any complaint at all.

1095. It is surprising that bricks are destroyed in this district in this way; have you heard of his bricks being destroyed on more occasion than one?—I do remember about some being spoiled years back, but it is some years since.

1096. Did you hear of injury being done to his bricks on more than one occasion?—Not lately.

1097. I do not ask you about lately, but within the last 10 years?—I think it will be more than 10 years.

1098. Then you heard of it?—Yes, it would be more than 14 years since.

1099. (*Mr. Barstow.*) You have told us that you have been three times treasurer of this society?—Yes.

1100. You call yourselves "The Stockport Brickmakers' Friendly Association?"—Yes.

1101. You know the rules pretty well, do you?—Yes, I know the rules, or the greatest part of them.

1102. You tell us that you really have no committee?—There is no committee at all now.

1103. Did you ever have a committee?—Yes, there have been committees.

1104. How long ago was there a committee?—Perhaps three or four years since. There might have been one since.

1105. There was a committee three or four years since?—Yes, and there has been one since.

1106. What I mean is, is there a committee regularly elected from quarter to quarter?—Sometimes, and sometimes they are not.

1107. Sometimes there is a committee regularly elected?—Yes, but I think the district men sit as a committee.

1108. Can you tell me how it is that a committee is sometimes elected and not at other times?—Sometimes the men will alter their opinions. They will not lay out their money in that way, and it saves a few shillings a quarter. They give 1*s.* a quarter to sit on the meetings. They do not want them in the winter time, and they save the money.

1109. Do you hold regular general meetings?—Yes, every quarter.

1110. Every quarter there is a regular general meeting?—Yes, every quarter, to examine the books and regulate them.

1111. I suppose then every member is warned?—Generally, sometimes they are and sometimes they are not.

1112. You tell us that you have fines for non-attendance?—Yes.

1113. What is the fine for non-attendance?—1*s.*

1114. What business goes on at these general meetings?—Transacting the business of the society.

1115. I know that general meetings transact business, but I want to know what business is transacted?—Sometimes there arises disputes with the masters; and the masters sometimes come and we decide the question when their own men cannot do it. It is to settle the disputes with the masters.

1116. Such things as making bricks not according to gauge perhaps?—Yes, or anything that might occur between the workmen and the masters.

1117. Paying wages below the scale fixed by the union?—It is not often a case of that kind occurs.

1118. But it does occur?—Sometimes.

1119. All those things are discussed?—Anything that occurs between the masters and the men the masters can come and discuss.

1120. Such a question as a man being out on strike?—Yes.

1121. I suppose they could not go in again without the authority of the general meeting?—We go by the rules; and if not, we call a general meeting and

the masters come to it and we compromise the question.

1122. Can your men go in without the authority of the general meeting?—That depends upon their wages.

1123. I do not understand you. If they have made a claim upon the masters which the masters have refused, and the men in consequence have turned out, could they go in again on the masters' terms without the authority of the general meeting?—Yes, if they come to terms without. They do sometimes. If he is infringing the rules sometimes a turn-out takes place.

1124. But could the men go in again on the masters' terms without the authority of the general meeting?—Yes.

1125. They could?—Yes.

1126. Do you mean to say that is ever done?—Yes, if they come to terms without.

1127. If the masters come to the men's terms; but I ask you can the men go in on the masters' terms?—If they have been turned out and we think it is right and just, then they go to work again.

1128. Who decides that?—Then we have a general meeting.

1129. Does it not come to this—that the men cannot go in on the masters' terms without the authority of the general meeting?—Not always.

1130. How is the practice?—Sometimes the men might have turned out wrongfully.

1131. Who thinks the men have turned out wrongfully?—They call together a few of the men working in some other district.

1132. Do you mean that a few men called together in a district can give men authority to go in again on the masters' terms?—Yes, if they have gone in behind the rules.

1133. Have you ever known a case of that sort?—Yes.

1134. Which case was that?—One at Mr. Meadows'.

1135. Which is that?—In Reddish.

1136. What case do you mean?—It was a general strike.

1137. When was that?—Some time in the last summer but one; 12 months since or 14 months perhaps.

1138. What was the strike about?—Over walling bricks.

1139. You mean putting up so much in a day, walling too many bricks in a day?—No, he was not paying the proper wages.

1140. Upon what terms did the men go in?—He said he would pay legal wages and the men went in again.

1141. Then they went to work?—They went to work again.

1142. And they struck because Mr. Meadows did not pay them legal wages?—Yes.

1143. Mr. Meadows paid them the legal wages and then they went in?—Yes.

1144. That is going in on their own terms, not upon Mr. Meadows' terms?—Yes.

1145. Have you ever known a case where the men on strike have gone in on the masters' terms without the sanction of the general meeting?—No, it is a general meeting. I said a general meeting.

1146. Have you ever known an instance of their going in by themselves?—No.

1147. You tell us that at this meeting in the brickyard, which you speak of, there were eight men present where you were at work?—Yes.

1148. And you told us that the object of the strike at Mr. Meadows' was discussed?—Yes.

1149. Do you mean to tell us that the men went in to work with Mr. Meadows in consequence of the sanction of that meeting?—No, I do not.

1150. But they went in the next day?—They went in a few days after.

1151. They went in the next day?—Yes, in that case.

1152. By what sanction did the men go in?—By Mr. Meadows giving the wages they turned out for.

1153. No, that is not so?—It was understood so.

1154. It was not so. He offered them 6*d.* and they demanded 10*d.*?—That was for another strike.

1155. No, it was not; it was the strike on which the men went in on the 2nd of August 1864. We have had Mr. Meadows and Mr. Wild here. The men demanded 10*d.* for every thousand and Messrs. Meadows offered 6*d.* a thousand?—Yes, they went in at 6*d.*

1156. Then they went in at Mr. Meadows' own terms?—Yes.

1157. Who sanctioned their going in?—The general meeting.

1158. Where was the general meeting held?—I cannot say the day of the month.

1159. When was it held? They were out on the 1st of August and they went in on the 2nd of August, and you had a meeting in the brickcroft?—No, not on that occasion.

1160. Yes, it is on that occasion.

(*Chairman.*) You certainly said so.—No, the men came round to see if they could do something, and we thought there should be a general meeting called.

1161. (*Mr. Barstow.*) When was the general meeting called?—A few days after.

1162. It could not sanction the men going in because they had gone in at that time. You say that the men went in with the sanction of the general meeting. Now I ask you, who became treasurer a few days afterwards, when was that general meeting called?—I cannot say when it was called. I cannot say how long they were out.

1163. I want to know when the general meeting was called in consequence of which the men went in on the 2nd of August. You know when there was a general meeting called?—I cannot say the day of the month. There was a general meeting I know.

1164. How long was it before the men went in?—I think there were two general meetings.

1165. And there was one at which their return to work was sanctioned; how long was that before the men went in?—I cannot say.

1166. You cannot say the day of the month, but you can say about your being present at it?—Yes, I was present.

1167. Can you say when it was?—It was at night.

1168. I suppose it was at night. You know what I ask you. How long before they went in was it held, was it a fortnight before they went in?—They might be out about a fortnight; I cannot say exactly.

1169. That is not what I ask you. I ask you how long the general meeting that sanctioned their return to work was held before they went in to work; that is before the 6th of August?—Perhaps it would be a fortnight.

1170. What occasion was there then for this meeting of the eight people in the brickcroft to sanction their going in?—They did not sanction it, they were only suggesting. They thought it was proper that they should go to work. It was sanctioned at the meeting.

1171. It was sanctioned according to you. Why should the men stay out any time after their return to work was sanctioned: why should they stay out a whole fortnight?—They were out a fortnight before.

1172. You told us just now that the general meeting was held a fortnight before their return to work was sanctioned; is that true or not?—Yes; I think there was one held, and they went to work as soon as it was held.

1173. You told us it was a fortnight before they went to work?—There was one before the men turned out.

1174. That is not the meeting I am speaking of. I ask when was the meeting that sanctioned their return to work held? You answer me a fortnight before they returned to work. I ask you now why they remained out a fortnight after their return to work was sanctioned?—They did not after the sanction to go to work was given.

FIRST DAY.

W. Singleton.

4 Sept. 1867.

1175. Then when did the sanction come for them to go to work?—I cannot say exactly. They were turned out about a fortnight.

1176. Then it must have been less than a fortnight after the general meeting was held before they went to work; how long was it?—I cannot say, a few days; I cannot recollect exactly. I did not put down the day of the month or anything of that sort.

1177. You remember this time, because directly after this time the treasurer was arrested for the outrage upon Wild, and you succeeded him, and therefore you recollect the time as well as anything in your life. Now I want to know when the meeting was held?—The meeting before they went into their work?

1178. Yes.—I suppose it would be just before they went into their work. I cannot recollect that. I cannot give you a proper statement of that.

1179. Was it the day before?—I cannot say.

1180. Two days before?—I cannot say.

1182. Was it less than a week before?—I cannot say; I should think it would be.

1182. They went to work again on the 2nd of August; was it some days before the 1st of August that the meeting was held which sanctioned their return to work?—It must be.

1183. It was then?—It must be before they returned to work.

1184. Why should it be the subject of discussion at the meeting of eight members that took place in the brickcroft?—It was at the time they were out that the meeting was that I refer to in the brickcroft.

1185. You told us that it was on the 1st of August?—I may have been mistaken as to the day of the month.

1186. (*Chairman.*) I asked you several times?—I tell you no untruth if I am aware of it.

1187. (*Mr. Barstow.*) Was that meeting before or after the meeting when the return to work was sanctioned?—The general meeting?

1188. Yes.—The general meeting would be before they returned to work.

1189. The day before they returned to work you had a meeting of eight members in the brickcroft?—It was not a meeting; it was just discoursing about their going. The general meeting was got together, and the question was arranged and the men went to work.

1190. Then what was the use of talking of it at the meeting of the eight in the brickcroft?—It was before the general meeting.

1191. You told me just now that it was after the general meeting?—I might be mistaken about the day of the month.

1192. You must not shuffle in that manner. You said it was the day before the men went to work, that is the 2nd of August; therefore it must be the 1st; you cannot be wrong about the day, that is fixed?—I cannot say the day of the month.

1193. No, but we can. I want to know what you talked about at this meeting of eight?—No further than we thought it wise for the men to go to work at the 6*d.* a thousand advance that Mr. Meadows offered.

1194. They had agreed to that already?—It was the meaning of the discussion at this meeting.

1195. You had agreed to that already at the general meeting?—It was before the general meeting.

1196. You have told us very often indeed that it was not?—I must have misunderstood.

1197. You told us it was the day before the men went to work, and we know that was the 2nd of August?—Then I mistook the day of the month, that is how it is.

1198. That is impossible. The day before the men went to work is the 1st of August. It is impossible that you can be mistaken as to the day of the month. At this meeting that was held in the croft were the names mentioned of the men who were at work?—No.

1199. That you swear?—Yes.

1200. You swear that their names were not mentioned?—Yes.

1201. Although you discussed the propriety of going in at 6*d.* a thousand, and these men were already working at 6*d.* a thousand, do you mean to tell us that their names were never mentioned?—We had no more discussion at the meeting than that we thought it far better for them to go to work than to be walking about.

1202. Was nothing said about the men already at work?—I cannot remember any more discussion at the meeting.

1203. Upon your oath, in that meeting was nothing said about the men who were at work?—I never heard anything said.

1204. Upon your oath you never heard anything said about the men who were at work—Wild, and Childs, and Fallowes?—Not to my recollection.

1205. You can recollect quite well, you know. You have as clear a memory as anybody. Upon your oath was nothing said about them at that meeting?—No, not that I am aware of.

1206. You heard all that went on?—I do not know that I did. I might not hear everything that was said.

1207. There were only eight of you?—I never heard it mentioned at the meeting. All they discussed was that the men should go to work.

1208. You remember Wild being beaten?—I heard of it the next day at 4 o'clock.

1209. Had you at that time any doubt why he was beaten?—No.

1210. You had no doubt?—No.

1211. Had you the slightest doubt that he was beaten because he went in to work at Mr. Meadows' terms?—I cannot say what he was beaten for.

1212. You cannot say for certain, but in your own mind tell us what he was beaten for?—I cannot.

1213. You must have some notion what he was beaten for?—The man went to work at the same place when he was round again. He was off work a few weeks.

1214. Have you any doubt in your own mind why he was beaten?—No.

1215. Do not you know that he was beaten because he went in to work at Mr. Meadows' terms when the other men were out?—He was turned out and he had his pay.

1216. He went in when the others were out?—I cannot say anything about that. I cannot answer you.

1217. For what else could it be?—I cannot say.

1218. You know Slater very well?—Yes.

1219. And you know Cheetham very well?—Yes.

1220. Had they any private quarrel with Wild?—Not that I am aware of.

1221. You do not know that they had?—No.

1222. What could be their reason for beating him?—I cannot say.

1223. (*Mr. Chance.*) Was there not a deputation to Mr. Meadows to discharge those three men, Wild and the other two?—I cannot say.

1224. Do you know anything about a note being left at the "Pack Horse" for Mr. Meadows?—No.

1225. Did you take part in the general meetings that were held at that time?—There are meetings sometimes and I am not at them.

1226. Do you remember whether there was more than one meeting called on that occasion?—Yes, I think there were two.

1227. Between the time of the dispute with Mr. Meadows and the outrage upon Wild, was there more than one meeting called?—On the question of the men being turned out?

1228. Yes.—Yes, there were two general meetings.

1229. There were two general meetings held between those times?—Yes.

1230. Were you present at them?—I was present at one, and one I was not present at.

1231. Which were you present at, the first or the second ?—I think the first.

1232. Upon that occasion, was there a note sent by the meeting or the committee to Mr. Meadows offering terms ?—I think Mr. Meadows was at that meeting himself.

1233. At the first meeting ?—Yes.

1234. At that meeting was the name of Wild and the other two mentioned ?—No.

1235. Are you sure of that ?—Yes, I never heard them mentioned.

1236. Were you present ?—I was the first part of the time ; I never heard the names mentioned.

1237. What was discussed ?—About the wages question.

1238. Then was not a note to be left at the "Pack Horse," telling Mr. Meadows the terms on which the men were to go back ?—There might be.

1239. Do remember whether there was such a letter sent ?—No.

1240. Have you heard anything about its being sent since ?—No, not that I can give any straightforwardness about it.

1241. At the first meeting was any conclusion come to about the terms to be arranged with Mr. Meadows ?—No, we did not come to terms ; we wanted 10*d.* and he offered 6*d.*

1242. The meeting broke up without anything being arranged ?—Yes.

1243. You do not remember anything being said about a note ?—No.

1244. After that meeting was there not a deputation to Mr. Meadows ?—Yes, there might have been.

1245. Do you remember a deputation going to Mr. Meadows ?—I heard some talk about one, but I was not there.

1246. You heard some talk about one ?—Yes.

1247. Did you hear what the deputation went to Mr. Meadows about ?—No.

1248. Was it for the purpose of asking him to discharge these three men ?—I cannot say that.

1249. What was it for ?—I cannot say.

1250. You heard something about a deputation being sent ; was it not for the purpose of his starting these three men ?—We do not take particular notice about things in other districts. I cannot answer that question.

1251. You say that you had a meeting in reference to the dispute with Mr. Meadows. Was not that deputation for the purpose of asking him to discharge these three men ?—I was at no meeting at which it was ever passed.

1252. Is it the custom in your trade to commit outrages upon men for no reason whatever ?—There are no meetings about outrages.

1253. Wild is attacked by six men, and you say that there was no quarrel, and you can form no opinion as to the cause. Is it the practice among the brickmakers to injure men without any reason whatever ?—I cannot give you an answer to that question.

1254. Was it not because it was a trade matter ?—I cannot answer you.

1255. Did you discuss the matter at a meeting afterwards, when Cheetham and Slater had been taken up ?—Yes, the case was talked about—their being apprehended.

1256. Who do you suppose had done it ?—We do not know.

1257. It was done by six men ?—I did not know who did it.

1258. Did you denounce or pronounce any indignation against those who had done it ?—We could not tell who had done it.

1259. Did you express any anger against the men who had done it ?—I did not know who had done it to express any anger.

1260. (*Chairman.*) I asked you some questions about Peter Bailey ?—Yes.

1261. Be cautious how you answer these questions. You told me you never heard of any of his bricks being destroyed ?—Yes, I heard of his bricks being destroyed this summer.

1262. Did you hear of his having 50,000 destroyed at one time on the flats, and then the walls being knocked down ?—Was that this summer ?

1263. I did not ask you that ; perhaps you may know more about it than I do. When did you hear of it ?—I heard his having some bricks destroyed talked about some years back.

1264. Did you hear of as many as 50,000 bricks being destroyed on the flats and also of some walls being knocked down ?—I cannot say how many.

1265. Did you hear that there were a good many ?—Yes.

1266. On the flats, and did you also hear of the walls being knocked down ?—Yes.

1267. Did you hear of his plant being injured ?—I heard something about breaking his materials, or something of that sort.

1268. Do you know how it was done ?—No.

1269. Was a saw used in doing it ?—I cannot say.

1270. Had you a saw at that time ?—I do not know ; I generally have a saw.

1271. I ask you upon your oath, and you are bound to answer me, whether you were not present when that plant was injured, and whether you did not use the saw and also injure that plant at Peter Bailey's ?—Yes.

1272. You did ?—No, I did not use any saw.

1273. Were you there when it was injured ?—No.

1274. Will you swear that you were not there ?—Yes.

1275. Will you swear solemnly that you were not present when that plant of Peter Bailey's was injured ?—Yes.

1276. That you swear ?—Yes.

1277. I ask you again, were you not present, and did you not use a saw in helping to destroy that plant ?—Yes.

1278. You mean to say that you did not ?—Yes, I did not.

1279. You were not present at all ?—No.

1280. That you swear ?—Yes.

1281. You cannot misunderstand me. You mean solemnly, upon your oath, to swear that you were not present when Mr. Peter Bailey's plant was injured ; is that what you mean to swear in one respect ?—I never——

1282. Were you present when any plant or property of Mr. Peter Bailey's was injured ?—No, I never was present at all.

1283. And you never used a saw for that purpose ?—No, nowhere.

1284. Do you know, or have you ever heard, who destroyed Peter Bailey's plant ?—No.

1285. You have never heard ?—No.

1286. You have not the slightest notion about it ?—No, I never heard who destroyed it.

1287. You never have heard that ?—No.

1288. And you swear that you did not see it done ?—Yes.

1289. That you have sworn already ?—Yes.

1290. I have cautioned you before. You have answered the question, and that is your answer. Now, I give you another opportunity to answer again if you like ?—I know nothing about his plant being destroyed, or his bricks either, or who did it.

1291. You were not present when it was done ?—No.

1292. And you never used a saw for that purpose ?—No, I never did.

1293. Did you ever hear of barrows being destroyed belonging to Peter Bailey ?—I cannot say what there was destroyed.

1294. Did you ever hear of barrows belonging to Peter Bailey being destroyed ?—I heard that there was a rumour that they were cut or broken up, or something.

FIRST DAY.

W. Singleton.

4 Sept. 1867.

1295. You say they were cut?—I cannot say; I never saw them.

1296. But you heard that they had been cut?—Yes.

1297. You were not present when they were cut?—No, I was not.

1298. And you did not use a saw for that purpose?—No, I did not.

The witness withdrew.

W. Slater.

WILLIAM SLATER sworn and examined.

1299. (*Chairman.*) Are you on a ticket-of-leave now, or has your sentence been altogether commuted?—I have an unconditional pardon.

1300. How long were you in prison?—Two years four months and seven days altogether.

1301. At which assizes were you convicted?—At the winter assizes.

1302. We understand that since you have come out of prison you have been made president of the same society, namely, the Stockport Union?—Yes.

1303. You are now president?—Yes.

1304. In 1864 were you then president?—No.

1305. Were you treasurer?—Yes, I was treasurer.

1306. Did you then know Thomas Meadows?—Perfectly well.

1307. Have you ever worked for him?—No.

1308. What are you?—A brickmaker.

1309. Have you been so all your life?—Twelve or 14 years; I never was in any other trade.

1310. In June 1864, you were treasurer of this society, were you not?—Yes.

1311. Do you remember the dispute between the workmen and Mr. Meadows, about the 10*d.* a thousand being saved in making the bricks?—There was a dispute. I do not know exactly what it was over; whether it was 10*d.*, or what the money was exactly.

1312. The dispute was made the matter of discussion at your union club, was it?—Yes, I believe it was.

1313. You, I suppose, as treasurer, regularly attended the meetings, did not you?—Yes.

1314. At the "Pack Horse?"—Yes.

1315. Were those meetings every fortnight?—Every fortnight to receive contributions.

1316. And quarterly for your general meetings?—Yes, there might be a general meeting between.

1317. You remember, at one of those meetings after this dispute, the whole matter being brought before the meeting?—I cannot say whether it was brought before the meeting.

1318. There was a discussion about it?—It was either a council meeting or a general meeting, which I cannot say.

1319. What is a council meeting?—Some few picked out to rule the body.

1320. Was that so in the year 1864?—Yes.

1321. How many of these men were picked out to rule the body?—Thirteen.

1322. Were you one of the thirteen?—I was treasurer, and was compelled to be there.

1323. You were, by virtue of your office, one of the council?—Yes.

1324. And Cheetham was present, we hear?—At the same time.

1325. Was this subject of the dispute between Meadows and the men the subject of discussion at more than one meeting?—Yes, I believe it was.

1326. Did you come to a resolution that they should not go back, except upon the terms which you thought right?—Yes.

1327. Do you remember those terms being that 10*d.* being saved in making 1,000 bricks, the 10*d.* was to be divided amongst your men?—I believe it was 6*d.*

1328. Sixpence was offered, and 10*d.* was saved, and you claimed the whole 10*d.*?—No, I believe it was 6*d.*

1329. Tenpence was saved in the labour, and Mr. Meadows offered the union men who were working for him 6*d.*, and they refused that, and demanded the whole 10*d.* Do you remember that?—It might be so.

1330. You remember it being the subject of discussion at your meeting?—Yes.

1331. And you came to the resolution that until your terms were adopted, your union men should not work there?—Yes.

1332. Do you remember whether you had 21 men in the Stockport union, and three men in the Oldham union working for Mr. Meadows at that time?—There was only one non-union man working at that time.

1333. How many of your union men were working at that time?—Upwards of 20; I cannot say exactly.

1334. And you remember that Messrs. Meadows having offered 6*d.*, three men, Wilde, Childs, and Fallowes, went back to work?—Yes.

1335. And their going back to work without the sanction of your union, while the others remained away, was against the rules of your union?—Yes, it was.

1336. Did you have a meeting at which it was agreed that a letter should be sent to Messrs. Meadows upon this subject?—I believe there was a letter sent to Mr. Meadows, but I did not attend that meeting.

1337. It was upon the subject of that dispute?—Yes.

1338. And you remember that you came to a resolution that the other men should go back provided Wild, Childs, and Fallowes, who had gone back against your rules, were sent off?—I believe that resolution was passed; I am not certain.

1339. Do your books keep an account of the resolutions which you pass, and so on?—All resolutions that are passed they do not put down.

1340. How do they make the selection as to which shall be put down and which shall not?—There are plenty of resolutions made which are immaterial.

1341. But this is a remarkably material one. Would this appear in your books?—No, I believe not.

1342. That is a sort of thing that you do not want to appear in your books, is it? Have you got your books here?—I have two books present.

1343. Are you sure that this resolution would not appear in these books?—No; these are new books made within the last 12 months.

1344. Would it appear in the old books?—I cannot say.

1345. Are the old books here?—No.

1346. Where are the old books, in Stockport?—Yes.

1347. In the natural course of business would a resolution of this kind appear in the books?—No, I do not think it would.

1348. Would the payments to the men out on strike appear in the books?—Yes.

1349. And the reason, or only the money?—Only the strike.

1350. Would the entry be "for being on strike so much?"—Yes.

1351. That would appear?—Yes.

1352. You were not one of the men who attended the meeting?—No.

1353. When you came to that resolution that your men should return, provided Wilde, Child, and Fallowes no longer continued on your work, it was refused, was it not?—I cannot say for Fallowes and Child, but for Wild I can.

1354. It was refused?—Yes.

1355. In consequence of that resolution had you another discussion about it at any of your meetings?—We might have.

1356. In the natural course of things you would have?—Yes.

1357. Did you come to any resolution at any of your meetings that you would go back and work

while Wild was there, and take the 6*d.* offered you Mr. Meadows?—It was passed.

1358. It was passed as a resolution?—Yes.

1359. Do you remember the men going back to work on the 2nd of August?—They went back before the 2nd of August, I believe.

1360. Was it about that time, not fixing you to the day?—Yes, a fortnight before.

1361. It cannot be. The men returned on the 2nd of August according to Mr. Meadows, who must remember, and they all admit it; you may be mistaken?—No, I am not mistaken.

1362. You think that 21 men went back to work a fortnight before the 1st of August?—No, not 21 men, because he stopped two jobs altogether.

1363. Did the 20 men go back to work a fortnight before the 1st of August?—Near upon a fortnight before.

1364. Are you sure of that?—Yes.

1365. Do you know Singleton?—Yes, perfectly well.

1366. You knew him at that time?—Yes.

1367. Do you remember seeing him in the field upon the night of the 1st or the 2nd of August?—On the forenoon of the 2nd of August.

1368. You saw him?—Yes, not at night.

1369. Where was it?—In Turn Croft Lane.

1370. Who were there besides?—George Hulme was one.

1371. Who else?—George Bailey and William Singleton and Thomas Holland.

1372. And Joseph Brown?—And Joseph Brown.

1373. Any of the Pauletts?—No, not that I am aware of.

1374. John Bray?—No.

1375. Was Cheetham there?—No.

1376. Was this after any general meeting that had sanctioned the return of the men, or when was it?—I cannot say exactly whether it was or no.

1377. You told me, as I understood you just now, that you were sure the men returned a fortnight before the 1st or 2nd of August?—The men had returned to work before we had this meeting.

1378. Nearly a fortnight before?—Yes.

1379. It was in consequence of a resolution of your club?—Yes.

1380. What passed at the time when you all met; in what way was it discussed?—It was chiefly over Thomas Wild.

1381. I suppose you all took a part in the discussion?—Yes.

1382. Was it there settled that measures should be taken against him?—It was.

1383. Those measures were carried into effect on the next night?—I believe they were.

1384. We have heard that he was attacked by six men?—Yes.

1385. You and Cheetham were two of them?—No. I can speak for myself; I cannot speak for Cheetham.

1386. Will you swear that you were not there?—Yes.

1387. Can you tell me whether at this meeting, when it was agreed that measures were to be taken against Wild, it was settled who was to carry those measures into effect; it must have been?—Yes, it was.

1388. Who were the men that were to do it?—There was no Stockport man, not one.

1389. Tell me who were the others who were to carry it into effect?—I cannot mention more than one name.

1390. Who was he?—James Kay, from Manchester.

1391. He was to carry into effect those measures which you settled were to be done to Wild?—Yes.

1392. Cannot you mention another?—No.

1393. Was he one?—I was sent to James Kay personally.

1394. That was after this meeting?—Yes, from this meeting.

1395. Kay was in Manchester?—Yes, I went to his residence.

1396. Did you tell him the result of what the meeting had come to?—Yes.

1397. And he was to see it done?—Yes.

1398. Then you saw Kay; did you see him the same day?—The same evening.

1399. Did you see him at Manchester?—Yes.

1400. You are here now to speak the truth, and it is an opportunity which you ought to be glad to avail yourself of?—I came purposely.

1401. Tell us what passed between you and Kay, and what was then settled?—I can hardly think of every word that was said.

1402. I only ask you the truth in substance; I do not ask you for every word?—I told him there had been a resolution passed between a few of our members that Wild was to have a good beating, and he agreed to find the men to do it.

1403. Was it agreed how much money should be given for the job?—Yes.

1404. How much?—10*l.*

1405. Your club was to find the money to pay Kay?—I expect so.

1406. That was the understanding?—Yes.

1407. Was anybody present when you and Kay settled it?—I think not.

1408. Are you sure?—I cannot be sure, there might be somebody in the same room but not to hear the conversation.

1409. Was anybody present at all hearing and taking part in the conversation?—No.

1410. Where was it that it took place?—In Manchester.

1411. Manchester is a large place, what room?—A jerry shop close to where he lives.

1412. Where does he live?—Just off the Rochdale Road.

1413. Did you speak to him in a whisper so that if there were any other persons in the room they should not hear it?—They could not hear it.

1414. Who is James Kay?—A delegate for the Manchester brickmakers.

1415. He has been so for some time?—As far as I know he has.

1416. Were the names mentioned whom Kay was to employ?—No.

1417. No name was mentioned?—Not that I am aware of.

1418. You left him to procure the men to give Wild a good beating?—Yes.

1419. At the meeting which took place as you have described, did anybody offer to be present, did any man whose name you have mentioned offer to help Kay?—No.

1420. Whether they did or not you do not know?—I cannot say whether they did or not.

1421. You never heard any of them say that they did?—No.

1422. You were apprehended the next day, were not you?—Yes.

1423. Was the 10*l.* paid for the job?—I cannot say for that.

1424. Have you heard from members of the union whether it was or not?—No, not since I came back I have not heard, I was taken the day following.

1425. Would that payment as a matter of business appear in the books in another way?—No, I do not expect it would.

1426. Still the treasurer would have to account for the 10*l.*?—Yes.

1427. Singleton was made treasurer as soon as you were taken up?—I do not know.

1428. I suppose no other hand but that of the treasurer pays the money as a matter of business?—I do not think it would.

1429. You have been treasurer yourself?—I am treasurer at the present time.

1430. And before he pays it he must know for what it is to be paid?—Yes.

FIRST DAY.

W. Slater.

4 Sept. 1867.

1431. Would such a sum being so paid have to be sanctioned by a resolution at a meeting of the club?—No.

1432. Who has authority to sanction the payment of such a sum of money as that?—The council, as I mentioned before.

1433. How many members formed the council at that time?—13.

1434. Had there been a resolution of the council for that purpose?—No.

1435. Then how was it sanctioned? Did you guarantee that there should be a resolution of the council for that purpose?—By these few that met in the brickyard.

1436. Were they all members of the council?—I believe they were at the time.

1437. I forget how many there were?—I did mention the names, I believe there was no one else.

1438. Can you tell me how many there were that met?—Somewhere about six or eight, I am not certain.

1439. Six would not be a majority of 13, eight would be; there was a majority of the council that met?—I daresay there was.

1440. You could not come to a resolution of that sort without the majority of the council meeting. Six out of the 13 would not do?—Eight would. I think there would be about eight there.

1441. How would that 10*l.* as a matter of business appear in the books; you say that it would not appear in actual words what it was?—I do not think it would appear in the books at all.

1442. The treasurer would have to account for the money, or else he would be a defaulter to the amount of 10*l.*; surely it would be paid according to some resolution of the council?—I cannot answer you that.

1443. You have been treasurer?—Yes.

1444. And have paid money. Whenever you have paid money do you put it down "Money paid by resolution of council" so much, "Resolution of the meeting" so much, or "Money paid to A or B" for particular work?—I never put it down in that way.

1445. If you had continued treasurer and had not been apprehended, how should you have put it down?—I cannot say that exactly; I might do it a different way, and perhaps never enter it at all.

1446. But then you would have appeared a defaulter to the amount of 10*l.* How would you make the book up; would you put it down "10*l.* by order of the council"?—I cannot answer that.

1447. Did you when you were treasurer put down any amount of money which you had paid by the resolution of the whole meeting or by order of council?—No.

1448. No case of the kind has occurred?—No.

1449. You do not know if you had continued treasurer how you would have entered it?—No.

1450. The books are audited regularly, are they not?—Every quarter.

1451. Who would be the person whose duty it would be to audit them after the 2nd of August?—I cannot tell you at present, I could tell you to-morrow, I cannot tell you to-day.

1452. Is the auditor a regular officer in the —No.

1453. Do you appoint a man to audit the accounts from time to time?—Every quarter he is picked.

1454. Every quarter you nominate a man to audit the accounts?—Yes.

1455. Who was the man who audited the next quarter after you were away, you do not know?—No.

1456. Does the president or the treasurer sign the accounts when audited?—The secretary, I believe, signs them.

1457. Now I ask you, do you mean solemnly to swear that you were not present when Wild was injured?—Yes, upon my solemn oath.

1458. You say that you were wrongly convicted?—Yes.

1459. You have no idea of it beyond what you have told us; you were not there at all that night when Wild was injured?—No, I was not.

1460. Where were you?—I was at home.

1461. Are you a married man?—Yes.

1462. Where do you live?—Broomhall Lane, Stockport.

1463. How far is that from the place where Wild was injured?—Perhaps two or three miles.

1464. What time did you go to bed that night?—It would be after 11.

1465. What makes you remember that you went to bed at 11 o'clock that night?—Because my wife was confined a few days before.

1466. That will not make you recollect?—I was taken the day following, makes me recollect it.

1467. She had been confined three days before?—Yes.

1468. Who was nursing her?—Mrs. Rachel Hulme.

1469. Had you any other grown-up person in your house besides yourself, your wife, and Rachel Hulme?—Not that I am aware of.

1470. You went to bed you say after 11; do you mean before 12?—Yes.

1471. You did not get up till when?—A quarter past five.

1472. When was the first time you heard about this injury to Wild?—When Mr. Smith, the policeman, came and apprehended me at a quarter to five in the afternoon.

1473. He told you why you were apprehended?—Yes.

1474. We understand that the union defended you?—Yes, I daresay it did; I believe it did.

1475. Were there any other men's names mentioned at the meeting, for the purpose of carrying this into effect, besides Kay's name?—No, not that I am aware of.

1476. You have told us the names; I forget how many were present at the meeting; you have only given me five?—I was asked whether Bray was there and I said no.

1477. There were six there, can you give me the names of the other men?—I was not certain whether there were six or eight.

1478. I know you were not certain. It is obvious there must be more than six; remember who was there. Was Robert Bailey there?—No.

1479. Or Henry Paulett?—I do not know that man.

1480. Was Potts there?—No.

1481. Or Ainsworth?—No.

1482. Cheetham, I think you mentioned?—No, Cheetham was not there.

1483. Was Hill there?—No.

1484. You say you were apprehended on the afternoon of the 3rd of August, were you taken before the magistrates?—Yes, on the 4th I was taken before the magistrates.

1485. Did you tell them the story you have told us to-day?—No, I told them nothing.

1486. Were not you called upon for your defence?—I had an advocate there.

1487. Who was he?—Mr. Roberts.

1488. Did not Mr. Roberts make any statement in your defence, to the effect that you were not there but were at home that night?—I think he did.

1489. Did he or not?—I am not certain.

1490. You do not know whether he said anything?—On the 4th I was remanded.

1491. When did you come up again?—I was remanded three different times.

1492. Did you tell Roberts what you have told us?—No.

1493. You never told him?—No.

1494. On any occasion when the case went before the magistrates, did you or Roberts then mention to the magistrates what you have told us?—No.

1495. On the trial at this place, at the assizes, was Rachel Hulme called?—Yes.

1496. She was called as a witness, was she ?—Yes.

1497. Was she called before the magistrates ?—Yes.

1498. How came she to be called; I understand you to say that you did not tell Roberts what you told us; perhaps you misunderstood me. Did you tell Roberts that you had gone home to-bed the night before at 11 ?—Yes.

1499. Did he make that statement to the magistrates; did they call Rachel Hulme ?—Yes.

1500. You were defended by counsel before Mr. Justice Blackburn, and then the same statement was made before him and Rachel Hulme was called ?—Yes.

1501. Was anybody else called in your behalf ?—Yes.

1502. Who ?—James Wall for one.

1503. Why was he called ?—He was called because he was with me at half-past 12 the same night.

1504. Where ?—At home at my own house.

1505. Who else was called ?—I believe that was all that were called.

1506. Then your defence upon that occasion was totally different to Cheetham's, the other man ?—Yes.

1507. You had nothing to do with Cheetham's defence ?—No.

1508. You say that you met in the lane; did you meet by agreement ?—No.

1509. Do you mean to tell me that seven or eight of you, all members of the council, all met by accident ?—No, I was eating my dinner, and a man came to me when I was having my dinner, and told me I was wanted in Turn Croft Lane; so I went and met the others there.

1510. That was the way you were summoned ?—Yes.

1511. Was that the first intimation you had of the meeting ?—Yes.

1512. Who was the man that came to you ?—George Bailey.

1513. One of the men ?—Yes.

1514. Do you know whether any warning was given by any of you to Child not to be there upon that night ?—No.

1515. You do not know that one way or the other ?—No.

1516. That was not at all a matter of conversation ?—No, it was never mentioned in my hearing.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

REFORM CLUB
PALL MALL

SECOND DAY.

Assize Courts, Manchester, Thursday, 5th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C.
THOMAS IRWIN BARSTOW, Esq.
GEORGE CHANCE, Esq.
JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

WILLIAM SLATER recalled and further examined.

1517. (*Chairman.*) Who is the secretary of your society, the Stockport union, now ?—Samuel Moss.

1518. Is he the man who was elected two days ago? —On Tuesday.

1519. Who was the secretary before that ?—Joseph Brown.

1520. Are the books of your society here relating to the year 1864 ?—I believe Joseph Brown has them.

1521. Can he produce them when we want them ?—I believe so.

1522. Are you at all able to tell us this morning what you did not quite recollect yesterday: whether six or eight members of the council attended that meeting on the 1st of August ?—I am not quite certain whether they were all members of the council that were there.

1523. But can you mention the names of any others besides the six that you mentioned yesterday ?—No, I cannot.

1524. None whatever ?—Not that I am aware of.

1525. According to the rules of your society, when there is a council appointed, as there was then, is there a particular number which constitute a quorum; or must there be, as I was thinking yesterday, a majority of the 13 which you mentioned as the number ?—13 is the number.

1526. In order to do an act which you have authority to do according to your rules must there be a certain number present, must there be a majority of that 13, that is to say, not less than seven, or do any particular number constitute what is commonly called a quorum ?—Not that I am aware of.

1527. Then any two, or three, or four, or five, as it may be, if they met together, might order an act to be done which would be binding on the union ?—Yes.

1528. They can ?—Yes.

1529. How many is the least number that you have known to meet under these circumstances to do an act which has been recognized and sanctioned by the union ?—I never knew one before this last.

1530. Then what makes you say that the council can act; what is the authority of the council, how can any small number bind the union ?—I do not quite understand the question.

1531. What is the object of the council of 13 being appointed; what are they to do ?—To rule the body.

1532. Now I ask you how many of them ought to meet properly to rule the body ?—13.

1533. But supposing they were not all present, as they were not on this occasion, how many ought to be there to make a rule which would be binding on the body ?—I cannot answer that question.

1534. Strictly speaking we assume that all the 13 ought to be present, and you say that they are to bind the body; you cannot always get the whole 13 together. How many were you in the habit of getting generally to the council ?—13 always.

1535. But if you could not get the 13 you nevertheless came to a resolution, did you not? Have you met as a council with a less number than 13 on other occasions ?—Yes.

1536. How many is the smallest number that you have known to meet ?—I do not exactly know.

1537. When you have met what is the sort of thing you have done with a view of binding the body ?—Different things have been brought before them.

SECOND DAY.

W. Slater.

5 Sept. 1867.

1538. Acts of this sort, I suppose, sometimes?—Not that I am aware of.

1539. Have you come to resolutions as to persons working against the rules of your society?—Yes.

1540. And I suppose you have also come to resolutions that measures should be taken to stop that?—No, not before the whole council. We have drawn men out on strike. Those have been the measures we have adopted.

1541. Have you done that often?—Yes.

1542. Has that been done by the council?—That is a general rule.

1543. As a general rule it has been done by the council?—Yes, but it is a general rule as well.

1544. It is a general rule that the council have met together and gone into a case which has been said to be a violation of these rules, and come to a determination what to do; is that so?—Yes.

1545. Has that been often done?—I cannot say that.

1546. With regard to this money, did you on that night in question pay any part of the 10*l.* to Kay?—No.

1547. It was all promise on your part?—That was all.

1548. Are you quite sure that no names were mentioned between you and Kay, either by you or by him?—Not that I am aware of.

1549. Just think again. Will you swear that no names were mentioned of persons to carry out the intention?—Yes.

1550. You will swear there were no names mentioned?—I cannot swear whether any names were mentioned or not.

1551. Then you will not swear that no names were mentioned?—No, I cannot swear that.

1552. Have you employed Kay on other occasions for the union purposes?—Yes.

1553. What was the occasion last before this case of Wild in which you had employed Kay?—That is a mistake of mine; I never did engage him or employ him before.

1554. Whether it is a mistake of yours or not, or whether you employed him or not, have you known him to be employed for the purposes of the union before?—Yes.

1555. How long before this case of Wild's had you known him to be employed?—A few days.

1556. Do you remember which of your men employed him?—No, I do not.

1557. But you were made acquainted with the fact that he had been employed?—Yes.

1558. Who told you?—I cannot say exactly who told me.

1559. You were the treasurer, and naturally everything would be told you?—Yes.

1560. You do not remember who told you?—No.

1561. Was it mentioned at one of the fortnightly meetings?—No; it was mentioned by some of the council.

1562. At a council meeting?—I do not know exactly whether it was a council meeting or no.

1563. At all events when you were together?—Yes.

1564. What was it for—where was he employed a few days before?—In Thornley's case.

1565. What was he employed to do?—To spoil bricks.

1566. Where was that?—At Heaton Mersey.

1567. What was he to have for that job?—I cannot say.

1568. You were the treasurer. Was it not ever mentioned?—I forget at the present time.

1569. But tell me as nearly as you can remember. You are here to speak the truth you know?—I cannot say how much he had.

1570. Was it as much as he had for the other job, was it 10*l.* or 5*l.* or what?—I think it would be more.

1571. Would it be as much as 20*l.*?—I cannot say.

1572. Are you sure it was more than 10*l.*?—I cannot swear that.

1573. But is it your belief that it was more than 10*l.*?—Yes.

1574. That was to destroy Thornley's bricks?—Yes.

1575. And you know that they were destroyed, do you not?—Yes.

1576. Do you remember how many bricks were destroyed?—Not exactly; 50,000 or 60,000 I think.

1577. Do you know whether Kay was to employ any of your union men for that?—No, I do not know whether he was to employ anyone.

1578. Or whether he was to do it himself, that you do not know? You were the treasurer; were you apprehended before the money was paid?—Yes.

1579. Otherwise you would have had to pay it?—Yes.

1580. On what other occasions have you known Kay to be employed?—None.

1581. Will you swear that?—Yes.

1582. On what other occasions have you known works of this sort to be done while you were a member of the union?—None; only there was one of Mr. Simpson's.

1583. Before I come to that, let me just ask you when were you first a member of this union?—In June 1857 I believe it was.

1584. Is it a union of brickmakers only?—That is all.

1585. Not of bricklayers?—No.

1586. What was the day on which you came out?—On the 14th of December.

1587. December last?—December last 1866.

1588. Now I will go to that case of Simpson's which you say you remember, that was in the year 1864, was it not?—Yes.

1589. At that time were you the treasurer?—I believe I was.

1590. You say you believe it. You have no doubt about it I suppose; that is the usual expression?—Yes.

1591. Was Simpson a manufacturer?—Yes, of bricks.

1592. Where was he a manufacturer?—It is either Green Lane or Black Lane.

1593. Close to Stockport?—It is in Stockport.

1594. Was there some resolution of the council that his bricks or tools should be destroyed?—Yes, there was.

1595. What had he done to give you offence?—I do not know exactly what it was.

1596. Surely you must recollect what it was that was said to be his offence against the union?—He would not give our price for making the bricks.

1597. Then there was a meeting of the council and you came to the resolution that his bricks and tools should be destroyed?—I cannot say all the council were together.

1598. But there was a meeting?—Yes.

1599. And who was employed to do that job?—I do not remember.

1600. Were you one?—Yes.

1601. And as you were one you can tell me who went with you to do it?—Yes, I cannot perhaps mention every one's name.

1602. But I dare say your memory will be refreshed as you get on. Tell me those whom you do remember at this moment?—There was George Hulme for one, Thomas Holland, and a man of the name of Garner.

1603. (*Mr. Barstow.*) What was his Christian name?—James.

1604. (*Chairman.*) Was he a union man?—No.

1605. Were the other two that you have mentioned, Hulme and Holland, union men?—Hulme was; Holland was not at that time, but he is now.

1606. Who else was there besides Garner?—A man of the name of Jackson, but I think he is out of the country altogether.

1607. What is his Christian name ?—I do not know.
1608. Was it John Jackson, do you think ?—No.
1609. Was he a union man ?—No.
1610. Who else was there ?—That was all I think.
1611. How many were there altogether ?—I believe there were five.
1612. That makes the five. Did you go at night ?—Yes.
1613. And did you destroy some bricks ?—I think there was a few destroyed.
1614. May I ask how many you call a few ?—I do not think there were above 1,000 destroyed altogether.
1615. Not above 1,000 ?—I believe not.
1616. Can you say for certain whether they were or were not bricks on the flat or bricks on the wall ?—On the wall.
1617. Were any tools destroyed ?—Not that I know of.
1618. But you must have known if you were there ?—I could not see them all in the dark.
1619. But did you see any ?—No, I did not see tools.
1620. Then were you all employed in some act of destruction ?—Yes.
1621. One went to one part and one went to another, and so you did it all ?—Yes.
1622. What month was this in ?—I do not know exactly what month it was.
1623. Was it a dark night ?—Yes.
1624. Was it in the winter or in the summer ?—In the summer.
1625. Was the shed set on fire ?—Yes, I believe it was.
1626. Who did that ?—I do not know exactly who did it.
1627. What did you do, may I ask, since you seem to have been one of the five ?—I helped to knock down some part of the wall ; the green brick in the walls.
1628. Is that all you did ?—All that I am aware of.
1629. But you must be aware of it if you did it. Do you mean to swear that that was all that you did that night. Take care ; you are now upon your oath. I ask you what it was you did ?—I helped to knock the walls down.
1630. And you did not injure any of the tools ?—No.
1631. But you saw the shed set on fire ?—Yes.
1632. Then you must know who set it on fire if you saw it set on fire ?—I cannot say that.
1633. You told me just now that you saw it set on fire, and dark as the night was you were near enough to know who did it ?—We were all together.
1634. How was it set on fire ?—By naphtha.
1635. You carried that with you of course on purpose ?—Yes.
1636. Who carried it ?—I cannot say who carried it ; I did not.
1637. What size jar was it in ?—It was a large bottle.
1638. A two-gallon bottle ?—Perhaps it might be.
1639. If it were a two-gallon jar you must know which of you five carried it ?—I saw it there, but I did not take particular notice who carried it. Some one of us carried it.
1640. Did you carry it ?—No.
1641. Did you carry it any part of the way ?—No.
1642. However you saw the shed set on fire with naphtha ?—Yes.
1643. Does Simpson keep a watchman ?—Yes.
1644. What is his name ?—Peter Plant.
1645. Did you know he kept a watchman when you went there ?—Yes.
1646. Did you threaten to shoot him ?—No.
1647. Was there a threat to shoot him ?—No, not to my knowledge. I never heard any threat.
1648. Had any of you a gun ?—Yes, there were two guns, I believe.
1649. Who carried the guns ?—This Garner carried one, and I believe Holland carried the other.
1650. You did not carry one ?—No.
1651. You never touched them of course ?—No.
1652. Garner carried one and Holland carried the other ?—I believe so.
1653. Were they loaded ?—I believe they were.
1654. Did you see the watchman that night ?—No, I did not see him.
1655. Did you hear him ?—Yes, I heard him shout.
1656. Did any of your party shout first ?—I do not know.
1657. Do you mean to tell me that you did not hear any of your party speak or shout to the watchman. You have come here to tell the truth ?—I have come here to tell nothing but the truth.
1658. We will see ; you must have heard some of your party say something to the watchman ?—They might say something.
1659. Probably they did. My question to you is whether they did ?—Perhaps they might do for anything I know.
1660. But did they ?—I cannot say.
1661. Do you mean to swear that these two men who went there for the purpose of destroying bricks, and who had naphtha to set the shed on fire, which they did, two of them having loaded guns, said nothing to the watchman ?—He was not outside, he was in the house in the yard.
1662. Did he speak to you or shout, you say that he did ?—Yes.
1663. What did he shout ?—I heard him shouting in the lane.
1664. You said that he was in the house ?—Yes, but afterwards.
1665. When you first heard him shout where was he ?—He was in the house.
1666. What did he shout ?—I cannot say what he said.
1667. Did he call out "Hulloa !" or what expression did he use ?—I cannot say.
1668. But you heard him shout ?—Yes.
1669. What answer was made when he shouted out ?—I cannot tell you what the answer was.
1670. Was there any threat about shooting him ?—Not that I know of.
1671. Do you mean to swear that you and your party having deliberately taken two loaded guns to this place, there was nothing said with reference to those guns ?—The guns were taken for the dogs.
1672. How many dogs were there ?—One.
1673. Two guns for one dog ?—Yes.
1674. Did you say anything to the watchman at all ?—No.
1675. Did you hear anything said ?—No.
1676. Did you see the watchman ?—I believe not.
1677. When you destroyed these bricks and set the shed on fire, was no alarm given ?—Yes.
1678. Who came out ?—I heard him go in the lane shouting.
1679. He shouted to you of course ?—No, he was shouting down the road to get some one there.
1680. To get some one there to help him ?—Yes.
1681. And you swear that nothing was said ?—No, I do not swear that nothing was said. I never said anything.
1682. I do not ask you that ; I ask you if you heard anything said ?—No, I did not.
1683. You will swear that the guns were not fired ?—No.
1684. Were they fired, either of them ?—I believe they were.
1685. Both of them ?—No, I cannot say that, I heard the report of guns.
1686. Can you tell me who it was that fired them ?—No, I cannot.
1687. Must it have been one of these two, Garner and Holland ?—Yes.
1688. You never saw the guns change hands ?—No.
1689. They were in the hands of those two ?—Yes.
1690. Did they fire after the watchman had shouted ?

SECOND DAY.

W. Slater.

5 Sept. 1867.

—No, I cannot say, I never heard them go off after the watchman shouted in the lane.

1691. But before he came out of the house did you hear any gun fired?—I cannot say, I was down in the croft.

1692. But was it after you heard him shout at all, that you heard the gun fired?—Yes.

1693. Did you hear where he was from the direction in which the voice came?—Yes.

1694. You did not see the gun fired?—No.

1695. And was it just after you heard his voice that the gun went off?—Yes.

1696. Only once?—There was above one report.

1697. Were they in succession, quick one after the other?—Not long between.

1698. Had the shed been set on fire before the gun was fired?—No, but we were off when the gun was fired. I believe so, but I am not quite certain.

1699. Was the shed destroyed?—No.

1700. It was set on fire, but not destroyed?—No.

1701. Were you disturbed, then, before you had done all the damage you meant to do?—Yes.

1702. Were you disturbed by this watchman?—Yes.

1703. Or else your intention was to have done more damage?—Yes.

1704. Did the watchman fire at any of you?—I cannot say.

1705. You said, did you not, that there were men employed in this affair who were not union men?—Yes.

1706. What were they to have for the job?—I believe it was 15*l.* altogether.

1707. That was to be divided among how many?—I am not certain exactly whether it was five or six.

1708. But were you all to share in it?—Yes.

1709. You were to have some of it?—Yes.

1710. Then you were to pay yourself: you were treasurer, you know?—Yes.

1711. Did you afterwards pay the men?—Yes.

1712. Then altogether, what went out of the funds of the society, including what you got yourself?—It was to be about 15*l.*

1713. If there were five men, that would be about 3*l.* each?—Yes.

1714. That was what you got?—I cannot say whether it was five or six, but we all shared alike.

1715. 15*l.* was the money?—Yes.

1716. Did you make any entry of that in your books?—No.

1717. When your accounts had to be audited, how did you, as treasurer, account for that 15*l.*?—I was apprehended before the time.

1718. How would you have entered it?—I should have had to tell the auditor about it.

1719. How would it have appeared in the book? Would it have appeared as "sundries"?—I should have put nothing in the book.

1720. But after telling the auditor how would it have been put down in the book?—I do not think it would have been put down in the book at all.

1721. Was there an understanding between you and the auditor, so that it would not have appeared in the books at all?—No.

1722. But if you say in your books that you have received so many hundred pounds, and if you put down on the other side what you pay, how would you have managed it so that the accounts would balance?—I am not the secretary; I do not keep the books.

1723. Then he is the man who would tell us how the books are managed?—Yes.

1724. Have you ever been secretary?—Yes.

1725. Have you never had a job of this sort to enter as secretary?—No.

1726. How long were you secretary?—Six months.

1727. When was that?—I believe it was in 1861.

1728. While you were secretary did you make a clear entry of every 6*d.* you paid?—Yes.

1729. Under the regular name of what the money had been paid for?—Yes.

1730. There was nothing of this sort during those six months in 1861?—No.

1731. Who was secretary at this time in 1864, when this 15*l.* was paid?—Joseph Brown.

1732. Then he will know how that will appear in the book?—Yes.

1733. Who were the auditors then?—I cannot say who they were; you asked me that yesterday, but I could not tell you.

1734. But you have had a night to refresh your memory?—The books will be here to-day I expect, and they will show you.

1735. The ordinary practice is, I suppose, that the auditors sign the book?—Yes.

1736. (*Mr. Barstow.*) To certify that the accounts are correct?—Yes.

1737. (*Chairman.*) What other case has there been in your knowledge?—None.

1738. Do you mean to swear that the only cases you know are Wild's case and Simpson's case and Thornley's case?—Yes.

1739. You do not know any other?—No.

1740. How long have you known Kay?—It is four years, I think, since I knew him first; between three and four years.

1741. Have you had much intercourse or communication with him?—No.

1742. In what character have you known him?—As a delegate from the Manchester brickmakers.

1743. Then if your Stockport club wanted to have communication with the Manchester brickmakers you would communicate with Kay?—Yes.

1744. Have you had frequent communication with him upon these subjects?—Upon these two subjects.

1745. On which two subjects?—Thornley's and Wild's.

1746. On no other?—No.

1747. But you have had general communication, I suppose, as to men working and so on?—No.

1748. Do you mean to say you have told us the only cases that you are acquainted with, where money has been paid by the society for things of this description?—Yes.

1749. That you will swear, will you?—Yes.

1750. Now you know, do you not, that there has been a dispute between the Manchester brickmakers' club and your club, the Stockport club, as to what the two districts are, as to whether such a place is within your district or within theirs?—Yes.

1751. Now as to Levenshulme, there has been a dispute as to whether that was in the Stockport district or in the Manchester district, has there not?—There has.

1752. Do you remember some destruction of property at Heaton Mersey?—Yes.

1753. That has happened since you have come out this year, has it not?—Yes.

1754. Will you state what that was?—It was a case of spoiling bricks.

1755. Whose were they?—Peter Bailey's and Barrett's.

1756. Where is Bailey's place?—I do not know exactly whether it is Heaton Mersey or not.

1757. Had he some bricks destroyed?—Yes.

1758. How many?—About 40,000 I believe.

1759. When was that, was it last June?—Yes, I believe it was.

1760. How far is Heaton Mersey from Stockport?—About three miles.

1761. Is there any dispute about whether this place of Bailey's is within your district or within the Manchester district?—No.

1762. Do you know who destroyed these bricks?—No.

1763. That is in the Stockport district, is it?—Yes.

1764. In consequence of that destruction of property did he make any claim upon your club?—No, he made no claim.

1765. But was any resolution come to to pay this

money?—Yes, we paid him for the damage that was done.

1766. I believe you wrote him a letter to that effect?—Yes.

1767. Is that your letter (*handing a letter to the witness*) ?—Yes.

(The following letter was read.)

" Stockport, June 20th.

" Sir,—This is to inform you that we, the Stockport " brickmakers, have come to the conclusion that we " will pay the damage you have received with your " brickyard, namely, 20*l.*, providing you let your men " commence work in the morning, and two men will " wait on you to-morrow with the money.

" W. Slater, President."

1768. (*Chairman, to the witness.*) You were president at that time, were you not?—Yes.

1769. And there was a resolution to that effect, which you carried out in that way?—Yes.

1770. How did you come to the resolution for the payment of that 20*l.*?—He stopped his men working for one thing.

1771. What men?—His own brickmakers.

1772. Will you explain to me more fully why, because he stopped his own men, you, as a club, came to a resolution to pay him 20*l.*?—Because the damage had been done on our side.

1773. Is it because you considered that the damage was done by another union, or by somebody else, that you, the Stockport union, said you would pay him 20*l.*?—Yes.

1774. By whom did you believe the damage to be done that made you come to that resolution?—I did not know who it had been done by.

1775. But you must have had some belief on the subject. It is not because anybody does damage to another person that I suppose the Stockport union come readily forward and pay money. What was the belief at the time you came to that resolution?—We thought we should have a bother with the Manchester brickmakers.

1776. Did you imagine that the Manchester brickmakers had done the damage?—We could not exactly imagine that: we thought it was through that.

1777. I do not know why you could not imagine it. Did you consider that it was in consequence of a dispute between your club and the Manchester club that the damage had been done by somebody?—Yes.

1778. Why should damage be done by anybody to Mr. Bailey who was within your district. Had he employed Manchester men?—No.

1779. What was the supposed reason for damage being done to Mr. Bailey's bricks?—Because there had been a misunderstanding between the Manchester brickmakers and the Stockport brickmakers.

1780. But because there is a misunderstanding between the Manchester brickmakers and the Stockport brickmakers, why is a man who is clearly in the Stockport district to have his bricks injured?—I do not see that.

1781. But you must have had some reason for giving him the 20*l.* I ask you the reason?—I cannot explain it any different from what I have said.

1782. You must have some belief about it. At the time when this was discussed a resolution was come to to give him 20*l.*, and you as president wrote that letter. You must have had some belief as to the reason?—Yes.

1783. You say you imagine the damage was done in consequence of a dispute between the Manchester and the Stockport men?—Yes.

1784. Then why should he have his bricks damaged in consequence of that dispute?—The Manchester brickmakers took it to revenge themselves that way.

1785. Now you have answered the question. You say the reason was because you imagined the Manchester union had taken their revenge that way?—Yes.

1786. Then it was on your belief that the Manchester union men had had their revenge in that way, and caused that destruction, that you recompensed him to the extent of 20*l.*?—Yes.

1787. Did you pay the 20*l.*?—Yes.

1788. Did you pay it?—No.

1789. Were you one of the deputation?—No.

1790. Who were the two that were sent?—Joseph Brown was one. I believe it was Thomas Holland and Joseph Brown.

1791. Is the dispute between your union and the Manchester union men still going on?—For anything I know of it is.

1722. But you are president, and you must know?—Yes, for anything I know of it is.

1793. Has it led to any other outrage as far as you have heard?—No.

1794. Is this the only case of the destruction of property which has happened since you have been in office; since your return last December?—I have heard that there was a destruction last week at Levenshulme, I have heard so.

1795. You have pretty good channels of communication generally for what you hear, have you not, you have people looking out for you in the different districts?—Yes.

1796. Then you say you have had information that some damage was done last week at Levenshulme?—Yes.

1797. Did you understand that it was done in consequence of this dispute that is going on between your union and the Manchester union?—I cannot say that; I never have any communication with the masters. It might have been so.

1798. Is it an offence, according to your rules, that any person in the Stockport union district should employ Manchester men?—No.

1799. Do I understand that any master manufacturer who lives in your Stockport district, may employ, if he pleases, Manchester brickmakers or bricklayers?—I cannot say for bricklayers.

1800. You can tell me one way or the other. Is it an offence against the rules that he should employ men of that description who belong to another district?—As long as the Stockport brickmakers are out of employ, according to our rules we do not allow them to get brickmakers anywhere else.

1801. I suppose this is the sort of course you adopt if they do not yield to you in that way. Supposing you have brickmakers out of employ and they do choose to employ brickmakers elsewhere, you put a stop to it in this way?—Generally.

1802. You have mentioned that your union is a brickmakers' union?—Yes.

1803. Is there any other brickmakers' union in the Stockport district but yours?—No.

1804. Is there a bricklayers' union?—I believe there is.

1805. Where is that; what is the name of it?—It is held at the " Sun " public-house in Stockport.

1806. You have constant communication with them, I suppose?—Yes.

1807. Do you know how many they consist of?—No.

1808. You are not a member of that society, are you?—No.

1809. At Manchester, in this district, I presume there are brickmakers' unions and bricklayers' unions?—Yes.

1810. What other unions exist in Stockport besides those that you have mentioned. Is there a builders' union?—I do not know of any.

1811. Do you know of any other?—No.

1812. As you have been a member of this union so long and you have mentioned the fact of a council existing, before any act is done by resolution of the council do you always see the president of the society, although he may not happen to be present at the meeting?—In anything that I have had anything to do with we have.

1813. I mean before any money is to be paid you would naturally ask the president?—Yes.

SECOND DAY.

W. Slater.

5 Sept. 1867.

1814. Then although a council came to a resolution that a certain amount of money should be paid, if the president was not there they ought to come and communicate with him first before they made the agreement to pay?—They ought to do so.

1815. And that is usually done, is it?—Yes.

1816. Then on the day in question, on the 1st of August, when that council meeting or whatever it was, came to the resolution that 10*l.* was to be paid to Kay to do this job, before you communicated with Kay and made the bargain, of course you saw the president?—Yes.

1817. The president at that time was Holland Cheetham, was he not?—Yes.

1818. Where did you see him?—At Mr. Birch's brickyard in Withington.

1819. About what time?—About 4 o'clock in the afternoon.

1820. And of course you communicated with him and got his sanction to make the bargain you describe?—Yes, I had not cash enough.

1821. And you got it from Cheetham?—Yes.

1822. You got his assistance, and agreed on the amount of money?—That was agreed on before.

1823. But you got his sanction?—Yes.

1824. You have mentioned to me a good deal about Simpson's case, and you have said that there had been a division in the council before you went?—Some part of the council.

1825. Tell me what part?—I do not know that I can mention.

1826. Tell me how many?—I cannot mention that.

1827. You must have some idea. You have told me that five men went?—Five or six I said.

1828. Can you tell me how many were present?—It is so long since; I cannot just think of it.

1829. Three years is not a very great time to recollect, and you have recollected a good deal. Where was the meeting held?—I believe it was held at the "Pack Horse."

1830. In the evening I suppose?—Yes.

1831. That is your regular place of meeting?—Yes.

1832. How many were present?—There might be all there, or there might be some few short.

1833. Of course there might be anything. Have you any books containing the minutes of those meetings?—Yes.

1834. Then there would be a book mentioning the number, and who were present I suppose?—Yes.

1835. Then your book for the year 1864, if produced, would show how many were present at this meeting of the council before Simpson's property was injured?—It will not state how many were present; it will state how many were on the council, and the names of them.

1836. But would not your book show who were present at any meeting?—No.

1837. Will it not show how many were present?—No.

1838. Do you mean to tell me that your book is not usually kept in that way to show how many were present?—No.

1839. Then how do you know how to fine the absent men?—They would be put down in the fine book.

1840. Does it appear how many were present, and therefore from how many of the absent ones you have to collect fines?—Yes; it appears in the fine book who was absent.

1841. You must be able to give me some notion how many of the council were present at the time the resolution took place in 1864 to do this at Simpson's?—I cannot upon my oath.

1842. Were there eight or 10?—There might be all the 13 there for anything I know; there might be one or two short.

1843. Who else was at the meeting on that night besides yourself?—I am not sure whether it was the night before, or it might be a week or two before.

1844. Whenever it was when the resolution was come to, who were present?—I cannot give them all.

1845. You can mention some of them, at all events?—Yes; I can mention some of them, but it will appear in the minute book who were there.

1846. Now, you tell me that it will show who were there?—It will state the number of the council, and the men's names.

1847. But it will not state, according to what you have said, who were there at the time when this resolution was come to?—No.

1848. Then granted that there were 13 members of the council, how many of them were present when the resolution was come to?—Well, I say they might all be there, or there might be one or two short.

1849. You must recollect who were there at the time?—I can mention some of them.

1850. Then mention them?—There would be George Hulme, Thomas Holland, Joseph Brown, and I am not sure whether David Potts was there. I believe David Potts was there.

1851. And who else. Was Cheetham there?—Yes; I believe Cheetham was there.

1852. Was he the president then?—Yes.

1853. You mean Holland Cheetham?—Yes.

1854. He has a brother, has he not?—Yes.

1855. What is his brother's name?—William.

1856. Is he a brickmaker?—Yes.

1857. Is he a member of the union?—Yes.

1858. Was he there?—No.

1859. Who else was there?—I cannot say who else was there for certain.

1860. That is five, and yourself makes six. There were more than six you know?—There were more than six.

1861. Then who else was there?—I think Robert Bailey was there.

1862. Was George Bailey there?—I do not know.

1863. Was Singleton there?—I think he was.

1864. Have you any doubt whatever that William Singleton was there?—I am sure I cannot say for certain.

1865. But you just said that you believed he was there?—Yes; I do believe he was there.

1866. Have you any doubt about it?—I have no doubt that I know of.

1867. Have you any doubt whatever that William Singleton was there?—I cannot say for certain whether he was there. I believe he was there, but I am not sure.

1868. Just think again, and see if you have any doubt about it. Was he in office at the time?—No.

1869. He was a member of the council, was he not?—Yes, I believe he was.

1870. Now, have you any doubt whatever that he was there?—I cannot say whether he was there or not, to speak the truth.

1871. I am only asking you to do that, but you believe he was there?—I cannot swear whether he was or no, but I believe he was.

1872. Was Paulett there?—I do not know a man named Paulett.

1873. Was John Bray there?—No.

1874. I think you mentioned Robert Bailey?—Yes.

1875. And George Bailey?—Yes, George Bailey, I believe, was there.

1876. Was Henry Hill there?—No.

1877. Do you remember any other name?—I cannot.

1878. How long was it before the attack upon Simpson's property that you think this meeting took place?—Somewhere about three weeks.

1879. And during the course of those three weeks were you watching your opportunity?—Yes.

1880. Were the union men, of whom you were one, and who went there, selected at the meeting? Did you volunteer, or did they elect you?—It was voluntary.

1881. And to whom was it left to find these other men to do it, who were not union men?—To me.

1882. Then at the meeting was a resolution come

to as to how much money should be spent in all upon the job ?—No.

1883. Then was that left to you?—Yes.

1884. I suppose in consultation with Holland Cheetham the president ?—I do not know.

1885. You consulted him, of course, upon the subject ?—I am not sure whether I did or not.

1886. But there was something said about the money at the meeting, was there not ?—Yes, there was something mentioned.

1887. Was the 15*l.* mentioned ?—No, not then.

1888. Was it mentioned afterwards ?—Yes.

1889. When was it mentioned afterwards ?—I believe it was on the club night.

1890. Was that on the night of the quarterly meeting ?—No, it was the fortnightly meeting.

1891. There were a good many people there then I suppose ?—Yes.

1892. Was Holland Cheetham there ?—Yes, he was there.

1893. Then was it agreed that 15*l.* should be the sum altogether ?—Yes.

1894. Then when you made your bargain with Garner and the other men, who were not union men, I suppose you told them how much they would get ?—Yes.

1895. Did you say how many men were to be employed on the job ?—No.

1896. It depended upon that, you know, because if you had had twenty men, they would have had less, and if you had had five men, they would have had more. Did you tell them how many were to be employed ?—Yes, I told them six or seven.

1897. And you told them the sum would be 15*l.*, and they would share it ?—No.

1898. Not at that time ?—No.

1899. However, you told them that there would be a good round sum, and that six or seven men would be employed in the job, and that you would all share alike ?—Yes.

1900. What is Garner, is he a brickmaker ?—No, he is a labourer.

1901. He has nothing to do with you ?—No.

1902. He only went for the money ?—Yes.

1903. And so with the other ?—Yes.

1904. Did you, at this meeting, where it was resolved that the work should be done as you describe, settle what was to be done, and how it was to be done ?—No.

1905. Then was it left to you to manage all that ?—Yes.

1906. Then you arranged it. Did you arrange it by yourself, with your own head, or in consultation with others ?—In consultation with others.

1907. Who were the others with whom you consulted as to the mode in which it should be carried out ?—George Hulme.

1908. Did you consult with anybody else ?—No, I believe not.

1909. Are you quite sure ?—Yes, I think no one else besides.

1910. Then you arranged with George Hulme that there should be a couple of guns and naphtha taken ?—Yes.

1911. Who was to get the guns ?—The men that went with us.

1912. Of course ; but did you undertake to get the guns ?—No.

1913. Who was to get the guns ?—Thomas Holland got one gun.

1914. You agreed with him that he should take one gun ?—That he must take one gun with him.

1915. And you agreed with Garner, the other man, that he should take another gun ?—Yes.

1916. Do you know whether they had the guns, or whether they had to hire them ?—They had guns of their own.

1917. Did you find them the powder and shot ?—No.

1918. They had each of them that ?—I expect so.

1919. You understood so ?—Yes.

1920. They said so ?—Yes.

1921. Then you had arranged with George Hulme that there should be a little naphtha taken ?—Yes.

1922. Who got that ?—I believe George Hulme got the naphtha.

1923. Did you ?—No.

1924. Do you know what it cost ?—Yes.

1925. Was he paid for it ?—Yes.

1926. How much was he paid for it ?—I do not know what it cost exactly. I cannot think of it just now.

1927. But, however, you were treasurer were you not ?—Yes.

1928. And you paid him ?—He was paid out of the 15*l.*

1929. You say you watched your opportunity. Did you go out several nights for the chance of it before you did it ?—Once before.

1930. All in the same way with the guns and the naphtha ?—There were no guns before.

1931. There were no guns the first time ?—No.

1932. There was naphtha, was there ?—Yes, there was naphtha.

1933. The night that you went you say two men carried the guns. There were only three men; do you mean to say that you do not know who carried the naphtha ?—They might carry the gun and the naphtha as well for all I know.

1934. But the naphtha was in a large bottle ; you would not let one man carry a gun and the naphtha, surely ?—I cannot say to that.

1935. You say you did not ?—Yes.

1936. Do you mean to swear that you yourself only knocked down a part of the wall ?—Yes.

1937. That is all you did ?—Yes.

1938. You were disturbed, I think you said ?—Yes.

1939. You proceeded to Simpson's place. What time was it when you got there ?—Somewhere about 12 o'clock.

1940. At night ?—Yes.

1941. How did you dispose of yourselves, where did the men with the guns go ?—To the dog-kennel.

1942. Is that close to the house ?—Yes.

1943. And was the watchman called out ?— Yes.

1944. And they went there ?—Yes, we all went to the dog-kennel first.

1945. Was the dog there ?—Yes.

1946. Did he call out in his own way ; did he bark at you so as to rouse attention ?—Yes, he growled.

1947. But did no one shoot at the dog ?—No, he never came out of the kennel.

1948. You did not shoot at him ?—No.

1949. The guns were fired at something else ?—I heard the guns fired afterwards.

1950. Where were the people when the guns were fired ?—They were somewhere close to the cabin.

1951. Is that the watchman's cabin ?—Yes, by the sound of the report.

1952. You were not very far off I suppose ?—I was knocking the walls down at the time.

1953. But that was not very far off ?—Not so far.

1954. And the shots you heard fired were close to that cabin ?—Yes.

1955. Were the bricks destroyed before the shed was set on fire ?—Yes.

1956. Do you mean to swear that you do not know what the guns were fired at ?—Yes, I do.

1957. You told me before that you heard the watchman shout out, and that the guns were fired in somewhat quick succession one after the other and that they were not fired at the dog. Have you any doubt in the world that they were fired at the watchman ?—I cannot say for that.

1958. You have told me that it was after the watchman shouted out, and that the guns were not fired at the dog which was in the kennel, and that you heard a report close to the watchman's cabin ?—I believe there was only one gun fired.

1959. Have you any doubt in the world that that was fired at the watchman ?—No.

SECOND DAY.

W. Slater.

5 Sept. 1867.

1960. Do not let me misunderstand. You believe that it was fired at the watchman ?—Yes, I do.

1961. Did you hear the second shot ?—I dare say I heard half a dozen shots or very near it, and I believe some came from the watchman.

1962. Was there any difference between the sound of the report of that which you say you believe came from the watchman and that which came from the guns of Holland and Garner ?—Yes.

1963. Was the sound of the report which you think came from the watchman like the report of a revolver ?—Yes, like the report of a revolver.

1964. Then how many sounds did you hear which you thought came from a revolver ?—I cannot say.

1965. But it was pretty sharp on both sides I suppose ?—Yes.

1966. Had Holland and Garner extra powder and shot with them ?—I cannot say. The guns were loaded when we met them.

1967. Did you see them load again ?—No.

1968. You heard as you say several shots fired from a gun as I understand ?—No.

1969. Did you hear more than two shots fired which were reports of guns ?—They might be for anything I know. I could not say exactly.

1970. Tell me one way or the other, were more than two of the shots which were fired the reports of guns ?—I cannot answer that question.

1971. You cannot tell me one way or the other ?—No.

1972. Then was it this firing, partly from the watchman and partly from your two men, that disturbed you and made you go away ?—Yes.

1973. Then was it before the firing began on either the one side or the other that the shed was set on fire ?—It would be after the firing of the guns.

1974. After the firing of the guns you set the shed on fire ?—Yes.

1975. Where were you when the shed was on fire ?—I was close to it.

1976. Then you must know who set it on fire ?—I cannot say who lighted the match.

1977. But after the match was lighted who set the shed on fire by the naphtha ; who put the naphtha on the shed ?—I threw some of the naphtha on the shed.

1978. Then you were entrusted with the job ?—Yes.

1979. Did anyone else throw naphtha on besides you ?—I cannot say ; somebody else for aught I know.

1980. But you do not know that anybody else did besides you ?—No.

1981. Who had the matches ?—I do not know.

1982. Had you ?—No.

1983. Then one of those other two men I suppose had the matches ?—We were all together.

1984. But the other two men were occupied with the guns ?—This was after the gun firing was over.

1985. But still they had the guns with them. I suppose they brought them away ?—Yes.

1986. And you had both your hands at liberty I suppose, and your feet too ?—Yes.

1987. And after the guns were fired you set fire to the shed ?—Yes.

1988. And then you made off ?—Yes.

1989. Where did you throw the naphtha ?—On the boards in the shed.

1990. Did you empty the jar ?—No.

1991. Did you bring away the jar ?—No.

1992. You left what was then in it ?—Yes.

1993. Now with regard to this money. You paid the money and it was allowed by the auditors ?—I cannot say ; I was apprehended before that.

1994. But do the auditors as a matter of course allow what has been sanctioned by the council and the president ?—They generally do.

1995. And the auditors are selected from the body ?—The auditors are selected from the body.

1996. Are they in office any given time ?—Yes, six months—two quarterly nights.

1997. I suppose the auditors would have no power to disallow money which has been spent by order of the president ?—Yes.

1998. They have no power surely to disallow what has been done by authority ?—If they mentioned it to the body, and the body did not agree for it to be done, it could be altered.

1999. You were a member of the union the year before this case of outrage at Simpson's, were you not ?—Yes.

2000. Do you remember another outrage taking place somewhere in the year 1863 before this one of Simpson's ?—No.

2001. Let me try to remind you. Do you remember some bricks and barrows and spades being destroyed before Simpson's case ?—No.

2002. Do you remember some footmarks being traced from the place where those bricks were destroyed, very near your house ?—No, I do not.

2003. Do you remember whether there were footmarks as if stockings had been drawn over boots, which came from the direction of the place where the bricks were destroyed and went in the direction of your house ?—In the year 1863 ?

2004. At any time.—No, never.

2005. You do not remember anything of the sort ?—No.

2006. Are those cases which you have mentioned—Simpson's, Thornley's, and Wild's—the only outrages of which you have been aware ?—Yes.

2007. You will swear that you do not know of any others ?—No.

2008. There have been no others that you are aware of brought before the consideration of your union ?—Not that I am aware of.

Mr. Ernest Jones stated that he appeared on behalf of the Manchester and Salford Operative Brickmakers' Burial Society.

The Chairman explained to Mr. Jones the form of procedure which the Court had adopted, and inquired if any person wished to suggest questions to be put to the witness.

The witness withdrew.

H. Cheetham.

HOLLAND CHEETHAM sworn and examined.

2009. (*Mr. Barstow.*) Before I examine you I must caution you. I am aware that you have already suffered for one matter which is part of our inquiry. For that you are in no peril at all. But we have also information that you have been concerned in other things, for which you are in peril. We have the power if you tell us the whole truth of giving you a certificate which will free you from all fear in respect of any consequences for any crime you have committed, and about which you will be examined here to-day. That certificate is dependent upon you yourself telling the truth and the whole truth ; and if you tell us the whole truth you will be a perfectly free man in regard to those transactions in which you have taken part. The object of this inquiry is not to cause the punishment of any person for any crimes which they have committed about which we are to inquire, but to get at the truth of them. What are you ?—I am a brickmaker.

2010. Are you a member of the Stockport brickmakers' union ?—Yes.

2011. How long have you been a member ?—Five years.

2012. You have several times held offices in that union ?—I have in respect of the chief offices.

2013. How often have you been president ?—Once.

2014. Not more than once ?—No.

2015. When was that ?—In 1864.

2016. Have you held any other office ?—Not any, being a district man.

2017. Have you been on the committee or council ?—I have.

2018. Is that the same thing as being a district man ?—Partly the same; they have a little more power to act.

2019. You say you were president in 1864, that was at the time that there was a dispute between Mr. Meadows and his men ?—It was.

2020. And also at the time some damage was done to Mr. Simpson's property ?—It was.

2021. Were you present as president at all the meetings of your society both council meetings and others that were held at that time ?—I was not.

2022. Were you present at most of them ?—I cannot say. I lived at a good distance from the place where the society is kept, consequently I was not called to every meeting.

2023. Not to every meeting ?—No.

2024. Were you at many of the meetings ?—I was.

2025. Were many meetings held about that time ? Generally speaking there are always meetings at different times belonging to the brickmakers' association.

2026. Were there any special meetings held ?—There were.

2027. Where were those held ?—I believe there was a council meeting held.

2028. Wait a minute. I will ask you first were there any special general meetings held about that time ?—Not that I am aware of.

2029. Special council meetings ?—There was one.

2030. Not more than one ?—Not that I can speak to, nor to tell the truth.

2031. I hope you will not tell us anything else ?—That is my intention.

2032. Do you know when that special council meeting was held ?—I believe it was about between a fortnight and three weeks before this affair took place that I have suffered for.

2033. I presume you were in the chair at that meeting ?—I was.

2034. And sat at the end of the table and the members of the council each side of you ?—I did.

2035. And you heard all the proceedings ?—I did.

2036. And will be able to tell us of course all that took place ?—Yes. It was a council meeting. It was agreed on that night that Wild should be beaten.

2037. Was the beating of Wild the only subject that engaged the attention of the meeting ?—I cannot say.

2038. You do not remember whether anything was said at the meeting with reference to Simpson's affair ?—I do not.

2039. You know whether it was or not ?—I believe it was not that night.

2040. You, perhaps, can tell us now when Simpson's affair was determined on ?—I cannot, though I was the president.

2041. How so ?—Because it was done without my knowing.

2042. You were president, you must explain to us how that happened ?—It was in consequence of my living so far away from the place where the meetings are held. I was not called to every meeting that was held ; that job was done without my knowing anything about it.

2043. Do you know now whether Simpson's affair was determined on at the special general meeting ?—It was not in my presence. I believe not.

2044. Do you know whether it was determined on at the special council meeting ?—Simpson's affair ?

2045. Yes.—Yes I do now, it was. I remember now that they said it must be done, but there was no specified time when it must be done.

2046. It was decided that Simpson's job was to be done, but not decided at what time it was to be done ?—It was not.

2047. When did you first hear that Simpson's affair was determined on ?—I cannot say whether it was at the council meeting on Wild's affair or one previous to it, I cannot say to be certain.

2048. I understand you to say that you were not present at the meeting which determined Simpson's affair ; you heard of it at some subsequent council meeting ?—I did, but I cannot say to be certain when I did hear it, but I did hear that it was to be done.

2049. Was it spoken of openly in the room ?—Not in the presence of all the body, it was at the council meeting.

2050. It was spoken of in the council meeting ?—Yes.

2051. It was a matter discussed in the council meeting ?—It was ; I remember it being discussed, and I remember it being decided that it must be done, but my recollection has almost gone out of my head about that affair.

2052. I do not quite know which was the first in order of time, was Simpson's the first ?—I believe Simpson's was the first.

2053. Now I will take that first ; you were not present at the council meeting when Simpson's matter was decided on ?—I heard it discussed, but I was not present at the time they decided it must be done.

2054. It was subsequently discussed in your presence ?—Yes.

2055. Who were present when it was discussed ?—I believe William Slater was there, Thomas Holland, and I believe William Singleton was there.

2056. When you say you believe, have you any doubt ?—I should not like to swear when I say that, because it is so long since, the recollection of that affair has almost gone out of my head, but I must speak the truth.

2057. Still it is a very remarkable affair ?—I had no interest in that, or very little ; I had no interest in it at all in a manner of speaking, though I was president, in consequence of my living so far off. I have no doubt there was a good deal done at that tim that I did not get to know of.

2058. Still you were present and did know of this ?—I did know that it was to be done, but I did not know when it was to be done.

2059. We do not ask you about that, but you were present when the question of doing some injury to Mr. Simpson was discussed ?—I was.

2060. I presume even among you brickmakers the subject of doing injury to property cannot have been a very common thing to discuss ?—No.

2061. Did not that make an impression upon you ?—I was a very young member at that time.

2062. Did not that make an impression upon you ; were you present ?—I was, though I was a young member at the time, I had not got to know the ins and outs at that time.

2063. How many men were present in the council meeting when Simpson's matter was discussed ?—12 or 13.

2064. You have given us three names, and your own makes four ?—Yes.

2065. You must try and remember some more, you must know who were on the council at the time ?—If I must be put to my oath I cannot remember them all.

2066. I suppose not, but you can remember more than three ?—If I am not mistaken Robert Bailey was there.

2067. Why do you say if you are not mistaken, you must be sure whether he was there ?—I cannot recollect.

2068. The same men were in the council when Simpson's affair was on and Meadow's affair ?—I cannot say that.

2069. Was George Hulme there ?—I believe George Hulme was there.

2070. Was Joseph Brown there ?—He was.

2071. You might as well tell us ; we know most of the names ?—I have not the least doubt you do, but being so long since I cannot remember, and being out of the society between two and three years a man's recollection does leave him, and therefore you will allow that I hope.

2072. Then you have good cause to remember ?—

SECOND DAY.

H. Cheetham.

5 Sept. 1867.

Yes, but my mind has been occupied upon another subject to that altogether.

2073. Was George Bailey there?—I believe George Bailey was one of the council.

2074. Was he there that night?—I believe he was.

2075. Was a man named Potts there?—Which of the Potts, there are so many of them?

2076. William Potts.—I cannot say to speak the truth.

2077. Can you give us any other name?—I cannot.

2078. Those are all you can remember?—They are.

2079. What was said at the council with reference to this affair of Simpson's?—At that council meeting there was very little said beyond that it was to be done, the thing was to be done and it generally settles in that way when there is a council meeting for that night.

2080. That is all that is said?—There is some discourse takes place.

2081. Some discourse as to who is to do it?—It very seldom comes to that.

2082. It does not come so close as that?—No, not as to who is to do it.

2083. How is it settled?—Generally two or three belonging to the council agree to do that when they get outside.

2084. You knew who agreed to do it in this case?—I did not know in Simpson's job.

2085. At the council meeting in which Simpson's job was spoken of was anything said about money?—It was settled how much it was to be.

2086. What was said about money?—I believe there was 15*l.* granted for that job to be done.

2087. How long after this council meeting was the job done?—It would be some weeks after no doubt; it was some weeks after.

2088. Some weeks is rather a long time?—It was some weeks after; the time was not specified when it must be done.

2089. So we have been told, but how long after?—It might be three, four, or five weeks, it was some time after I know.

2090. Had you anything to do with the doing of the job?—I had not.

2091. You were not there?—No.

2092. Nor near it?—Nor near it.

2093. Were you in your own house when it was done?—I believe I was, I must be; I was not there nor did not know when it was to take place.

2094. You did not know when it was to take place before it was done?—No.

2095. Then before it was done you did not know that that job was going to be done?—I did not.

2096. Upon your oath, were you in Simpson's brickcroft on the night when that job was done?—Upon my solemn oath I was not.

2097. Were you anywhere in the neighbourhood?—I was not.

2098. Were you on the look-out at all for the parties who were to do it?—No.

2099. Were you doing anything to create a diversion for them in any other place?—I was not.

2100. Did you know at the time it was done that it was being done?—I did not.

2101. You knew, however, after it was done?—Yes.

2102. How soon after?—The day following.

2103. How did you come to know it?—By hearing it discussed from one brickmaker to another in Turn Croft Lane.

2104. Do you remember where you were on the night that that was done at Simpson's?—I do not know the time it was done; if it was late I should be in bed.

2105. You have spoken to us about the day after?—Yes.

2106. Where were you that night when it was done?—I should be in bed.

2107. You swear to us that you were in bed?—I swear upon my oath that I was neither near nor encouraged it. At that time I did not know that it was going to be done.

2108. That is not my question. You say you were not there; I ask where you were?—I should be in bed at home.

2109. Were you at home in bed?—Yes.

2110. You say you "should be;" were you?—I was in bed at home.

2111. Was anything said to you about the payment of money for this job at Simpson's after it was done?—No, nothing.

2112. Nothing?—Not a single word.

2113. And you had nothing to do about paying the men after it was done?—No.

2114. Do you know how that money was paid?—No.

2115. Had you no control over the funds of the union?—No.

2116. At that time you had not?—At that time I had not.

2117. Was your consent necessary for the payment of any money from the union box?—At the council meeting before this job happened?

2118. Your consent for the money being paid was necessary?—Yes.

2119. But no one applied to you for payment?—No one applied to me for payment.

2120. You know as a matter of business from the union who would make the payment?—The treasurer would have to make the payment.

2121. Who was the treasurer at that time?—I believe William Slater was the treasurer.

2122. Now we will come to this affair of Wild's. You were in the chair when it was agreed that Wild should be beaten?—I was.

2123. Who were present at that meeting?—I was present.

2124. What members of the council were present at the meeting at which it was determined that Wild should be beaten?—There would be me for one, William Slater was the other, and I believe William Singleton was another, and Joseph Brown was another.

2125. Do you remember any others?—Thomas Holland.

2126. And yourself, five?—Yes.

2127. Was that all?—I believe George Hulme was one.

2128. It that all? Was not there a man named George Bailey there?—There was.

2129. Anyone else?—I cannot say whether there were any of the Potts there or not.

2130. But these names you have given us you are sure of?—Yes.

2131. You are positive that Slater, Singleton, Holland, Brown, Hulme, and Bailey were there?—Yes, I am.

2132. Why did you determine to beat Wild?—I believe it was because he returned to work previous to the union men at the time that they were on turn-out pay.

2133. Was it settled at the meeting who was to beat him?—It was not.

2134. Was nothing arranged about it?—No, no more than what was to be granted for the job.

2135. We have heard that it was 10*l.*; is that the amount?—I was going to say I would not be sure whether it was 10*l.* or 12*l.*

2136. (*Chairman.*) Or 14*l.*?—No, I would say that it was not more than 12*l.*, but I should not have said, to be certain, whether it was 10*l.* or 12*l.*

2137. (*Mr. Barstow.*) You are aware that some other men were working with Wild?—Yes.

2138. Why was Wild fixed upon to be beaten rather than the others?—I do not think he was fixed upon singly.

2139. Were they all to be beaten?—No, I believe there was two of them to be beaten.

2140. Which were the two?—Humphrey Child and Wild.

2141. Those were the only two men of those three whose business it was to be up at night?—I was not aware that it was Child's business to be up at night. I was aware that it was Wild's business to be up sometimes, but I was not aware that Child was up.

2142. Are you aware whether any warning was given to Child?—I am not.

2143. Did you know at any time beforehand when this beating was to take place?—The same day.

2144. On the same day that it took place you knew that it was to take place?—I did.

2145. How did you know that?—About half-past 2 in the afternoon on the 2nd of August William Slater came to me and asked me whether I knew where James Kay lived. I says, "Yes; it was but the other "day that he was at our house. He left me his direc- "tion, and he has invited me to go over."

2146. Who invited you to go over?—James Kay invited me and my wife to go over some Sunday to tea. Slater says, "You must tell me where he lives."

2147. What had Kay to do with this business of Wild's?—He says, "Wild is going to be up to-night "to burn some bricks; it has been agreed to-day that "he is to be beaten." I did not live 200 yards from where I was working. We went together as far as the house, and I left him the direction, and then I returned to my work.

2148. Who is Kay?—I believe he is a gauger or delegate from Manchester.

2149. A delegate for what?—He is chiefly gauger to go round gauging the moulds.

2150. What is he a delegate for?—To stop Manchester being infringed on in any way in what he sees going wrong. He goes up and down Manchester, and anything he sees wrong taking place against their rules he tries to stop.

2151. Against whose rules?—Against the Manchester Brickmakers' Association's rules.

2152. There was a quarrel at this time between the Manchester and the Stockport brickmakers?—I cannot say.

2153. You are aware that there was a quarrel between them?—I cannot say at that time whether there was.

2154. Not at that time?—I cannot say.

2155. How came Kay to come to your house?—Because he was a gauger to go round the Manchester brickyards.

2156. You are not in the Manchester district?—I live on the border of it. He had to pass our house, and he called one night when I was in at my tea, and he invited me and my wife over to Manchester some Sunday, and he left his direction; that is how I came to know him.

2157. Had you seen him before?—Yes, many a time.

2158. He was a friend of yours?—Yes, I saw him occasionally; I knew him.

2159. You knew that Wild was to be beaten the night that he was beaten?—The same day.

2160. That same afternoon?—Yes, it was on the 2nd of August.

2161. He was beaten on the 2nd of August, and at half-past 2 in the afternoon you knew that he was to be beaten?—That was the time, as far as I can recollect.

2162. And you assisted Slater to arrange for him being beaten?—Slater wanted Kay's direction, and I gave it to him. I never heard anything more about it until the 3rd of August.

2163. Did he tell you for what purpose he wanted his direction?—He said Thomas Wild was to be beaten, and he was to go to Kay to find some persons to beat him.

(*Mr. Ernest Jones.*) I would ask whether he knows that of his own knowledge.

(*Chairman.*) No; it is what passed between him and Slater.

2164. (*Mr. Barstow to the witness.*) Did you know that he was beaten that night?—I knew the next day.

2165. Upon your oath were not you one of the persons who beat him?—I was not.

2166. That you solemnly swear?—Yes, I solemnly swear it, if it is the last word I speak.

2167. Are you aware that Wild has sworn that you were there?—Yes, but he has sworn false.

2168. He says you struck him first?—I am aware he swore that, but he is wrong. I never heard any more about it till the next day after me and Slater went into the yard where I was working. I never saw nor heard anything about it till the next day when I was told.

2169. Where were you on that night?—The same night that he was beaten?

2170. Yes.—I was at home, and in bed.

2171. Who were in your house that night?—There was no one in my house at that time.

2172. Are you married?—Yes, my wife was in.

2173. No one except your wife?—No. I was seen, too, but I was not aware I was seen at the times I was on that night; it would be a quarter to half-past 9 when I left work on the 2nd of August. It was a quarter to 10 when I went into the house. I lived in a garden at that time at Stone Barnage Lane that night. I was talking to Mathew Jackson and another man. It was a quarter to 10 when I shook hands with Mathew Jackson, and went into my house at 10 minutes past 10. I had my jacket and waistcoat off, and I had just smoked a pipe of tobacco. I turned myself round to look at the clock. I said, "We will be in bed at half-past 10." That was to my wife at the same time. I did not know Miss Bradshaw was passing the window and saw me, but the next night she told my wife that she had seen me. I turned my head, and she thought I was looking at her, at the same time I was looking at the clock.

2174. Was this evidence given before the magistrates?—It was.

2175. Was Miss Bradshaw called before the magistrates?—In this court she was called, in the assize court.

2176. You were arrested on the Monday?—Yes.

2177. And the next day you were before the magistrates?—I was.

2178. Did not Miss Bradshaw come forward to say that she had seen you that very night?—No, her brother said that he had seen me come through the brickyard at the time. She was a very nervous young woman, and I had very hard work to get her to come after she had stated that she had seen me. It was very hard work to get her up. I had to subpœna her.

2179. Are these the only two outrages that you have any knowledge of, Simpson's and Wild's?—No.

2180. Do you know of others?—Yes.

2181. Tell us of those?—It was one that was concerned in an outrage at Thornley's.

2182. Thornley is a master brickmaker?—Yes.

2183. Where did he then carry on business?—In Heaton, I believe.

2184. Is that Heaton-on-Mersey?—It is through Burnage.

2185. There is Heaton Norris and Heaton Chapel. Which Heaton is this?—It would be Heaton Mersey, I suppose.

2186. Is Heaton Mersey in the Stockport brickmakers' district?—Yes.

2187. What was the cause of the outrage upon Mr. Thornley?—I believe it was in consequence of him not employing union men.

2188. I just ask you what year was this?—It would be in 1864, I believe. I do not know whether it was a week or a fortnight before Thomas Wild's case took place.

2189. It was at the time you were president of this union?—I believe it was.

2190. Was Thornley's case brought before the council?—I cannot say whether it was brought in my presence or not, not to speak true.

2191. You cannot tell whether it was brought in your presence, but are you aware whether it was brought before the council at all?—I believe it was

SECOND DAY.

H. Cheetham.

5 Sept. 1867.

brought before a meeting. I recollect now it was brought before a meeting.

2192. Were you present or not present?—I was present.

2193. What was said about Thornley at the meeting?—He was to have some damage done to him.

2194. Why?—In consequence of not employing union men.

2195. That is what was said at the meeting?—Yes.

2196. I suppose this council was a council of the usual character, was it not?—Yes.

2197. About the same number of persons as on these other occasions that you have spoken of?—Yes.

2198. And the same people I suppose?—The same council would be on then as was on for Wild's case.

2199. I will read the names. Do you remember who were at the meeting on this occasion. Was Slater there?—I cannot say to be certain.

2200. Was Brown there?—Brown would be there.

2201. Was Singleton there?—I believe he was.

2202. Was Holland there?—I cannot say.

2203. Was George Bailey there?—I cannot say that.

2204. Was George Hulme there?—Yes, George Hulme was there.

2205. Then you are only sure of Singleton, Brown, and Hulme?—I am not sure of any more.

2206. Those are the only men that you are sure of?—They are.

2207. Was anything said about who was to commit the outrage?—There was not.

2208. I suppose there was something said about the sum to be paid?—I am not sure whether it was 10*l.* or 12*l.*

2209. 10*l.* or 12*l.* Was that the amount fixed upon to be paid?—Yes.

2210. The time that Thornley's job was to be done was not fixed at that meeting?—No, sir. Well I will not say to be certain whether it was fixed or not.

2211. At some subsequent meeting the time was settled, both the time and who were to do it?—Yes, it was.

2212. When was that?—It would be between a week and a fortnight before I was taken, I know.

2213. A week or a fortnight?—Yes, it was.

2214. Just tell us how that meeting came about?—It was one that met. There was me and William Slater, George Hulme, David Potts, and James Kay.

2215. That is the man that you have spoken of as a Manchester delegate?—Yes. We met at a public-house on Heaton Norris. I do not know the sign; close by Heaton Norris church. They met there and then they proceeded to the place.

2216. And you went together from there?—Yes, we did; we all went together.

2217. How far was that from Thornley's brickyard?—Three or four miles.

2218. Did you go armed with anything?—No.

2219. None of you had sticks?—No.

2220. No guns?—No, not that I am aware of, with the exception of what they call a screw wrench; that is all I saw.

2221. (*Chairman.*) You say not that you are aware of?—That is all that I saw; a screw wrench.

2222. (*Mr. Barstow.*) Did you yourself carry anything?—No, I did not. Yes, I believe I carried a staff.

2223. What sort of a staff?—Made of wood.

2224. What sort of a staff?—About that length (*explaining the same*).

2225. Like a policeman's staff?—Yes, something similar.

2226. You have been a policeman, have you not?—I have.

2227. And you know how to use a staff?—I do not know that I ever used one often.

2228. You know how to use it?—We all know how to use it occasionally, I dare say.

2229. You did not see an axe, or a saw, or anything of that sort?—I did not. Yes, I beg pardon, I saw a little bill about that length (*describing the same*).

2230. Who had it?—Kay had it; it was a kind of axe.

2231. What time did you get to Thornley's?—Between 11 and 12 o'clock, I daresay.

2232. What did you do when you got there?—We spoilt what bricks we could on the flat.

2233. Had all of you your shoes on?—Yes.

2234. Were they covered with anything?—They were not; I can answer for my own; mine were not.

2235. Was there any watchman?—Not that I am aware of.

2236. Was there a dog?—Yes, I saw a dog; but I did not think it belonged to the yard.

2237. Was it in the yard?—Yes, it was loose.

2238. Did it bark?—No, sir.

2239. Did it fly at any of you?—No, it did not.

2240. Do you know how many bricks were destroyed?—No, I do not. I heard afterwards that there was about 40,000.

2241. Do you know about what the value of that would be?—Not just now.

2242. You are a brickmaker; can you give us a rough guess what the value of the 40,000 bricks in the flat would be?—Perhaps between 15*l.* and 20*l.* I daresay.

2243. You destroyed them by trampling on them?—Yes.

2244. And you met with no opposition?—No.

2245. And came away?—And came away.

2246. And no one has ever been punished for it?—I believe not.

2247. And no one apprehended?—Not that I am aware of.

2248. There were how many of you, five, I think?—That would be about the number.

2249. You get this sum of money which was voted paid among you?—Yes.

2250. Who did you get it from?—I will not be certain whether we got it from Joseph Brown or not now.

2251. I should think you remember whom you got the money from?—I cannot say to speak the truth. I know we did get it. I think it was Joseph Brown that had to pay the money at the time, but I am not certain.

2252. Was it the treasurer of the union, whoever he was?—I do not think it was the treasurer who paid us the money.

2253. Your present opinion is that it was Joseph Brown?—I will not be certain whether it was the treasurer or secretary now, not to speak the truth.

2254. You do not remember?—I do not.

2255. Do you remember whether you were paid?—I do not know whether I was paid that night.

2256. Were you paid that night?—I cannot say that.

2257. You neither know who paid you or whether you were paid?—Not now; I know that I did get it.

2258. It is a matter of three years ago?—It is turned three years, I believe. I have no recollection whether I was paid or who gave it to me.

2259. Is that the only answer we are to take, that you do not remember who paid you?—I cannot tell, not to speak the truth.

2260. What is your belief about it?—I did get the money.

2261. What is your belief about who paid you?—It would either be the treasurer or secretary, and whether it was Joseph Brown or Slater that paid us I cannot say.

2262. It would be either Slater or Joseph Brown?—Yes.

2263. And you never used your staff?—No, I did not.

2264. Was the bill used at all?—No, I believe not.

2265. Were some barrows chopped up?—Not that I am aware of.

2266. You never heard of that before?—No.

2267. What did Kay carry a bill for, do you know?—I do not know.

2268. It is not a thing in use in the brickmakers' trade?—It is not.

SECOND DAY.

H. Cheetham.

5 Sept. 1867.

2269. What do you now suppose that he carried it for?—To do what damage he could.

2270. What damage would you do with a bill?—I do not think he came across anything that he could do damage to; it was a very small bill.

2271. What would a man, going on such an errand, use a bill for?—He would break what barrows he could.

2272. In brickmaking they use benches?—Yes; what we call tables.

2273. Would a bill destroy those?—Not that bill that he carried that night.

2274. It is was not large enough?—No.

2275. Are you aware whether Mr. Thornley's sheds were set on fire that night?—They were; the reason I do not know that there was any barrows broke or anything of that sort is, that we got separated in the yard some short time.

2276. You no doubt talked over this matter with others of the party?—Yes, afterwards.

2277. But afterwards on your way home, had you no conversation as to what was done?—Not particularly.

2278. You surely had some?—I think the men were getting too fresh in liquor to say much; I know I was myself.

2279. You walked back together?—Yes.

2280. And had you no conversation as to what was done?—Yes, they said they had done him a good 'un.

2281. Was there any conversation about setting the sheds on fire?—Yes, there was.

2282. Do you know who set the sheds on fire?—I believe it was Kay.

2283. Why do you believe it was Kay?—Because I saw him.

2284. How did he set them on fire?—By putting small pieces of timber and lighting a match and setting fire to them under the boards in the shed.

2285. Had he matches with him?—Yes.

2286. Do you know whether much damage was done by the fire?—I do not; I never saw it afterwards.

2287. You did not hear whether much damage was done or not?—I heard that there was not much done by the fire.

2288. Have you told us all that you know about the damage done at Thornley's?—I have.

2289. You do not know whether anyone took chips with him?—I cannot say; I believe there were chips taken.

2290. Who took the chips?—I cannot say; I believe there were chips taken.

2291. Did Kay take the chips?—I cannot swear who took them.

2292. Did you see him use his bill to chop wood in the yard?—No, I did not.

2293. But I understand that some of the party took chips with them?—There were some chips taken.

2294. You say that you have told us all that you know about the affair at Thornley's?—Yes.

2295. Is there any other business in which you have been concerned?—No, there is not.

2296. Is there any other of which you have heard when you were a member of the union?—Not to my recollection.

2297. Was there any other but these three, Wild's, Thornley's, and Simpson's, discussed at any meetings that you have been present at?—Not to my knowledge.

2298. On your oath you do not remember any other?—Upon my oath I do not.

2299. Were you in the union in 1862?—I believe that was the year I entered; the latter end of the summer.

2300. Had you been a brickmaker before you entered the union?—Yes.

2301. Do you know a man named Renshaw, a brickmaker?—No.

2302. You do not know anything about him?—I do not.

2303. You swear that these three cases that you have just now told us of are the only cases of outrage that have been discussed in the council in your presence?—They are to my knowledge.

2304. You swear that?—I will.

2305. These are all matters resulting in outrage; have you decided in your council to use any threat towards either masters or men who have infringed the laws of your union?—Not in my presence.

2306. You do not know of that being done?—I do not.

2307. Kay came from Manchester to assist in carrying out the decrees of your union; are you aware whether the Stockport men ever go to Manchester to assist Kay in carrying out the decrees of the Manchester society?—I do not know.

2308. You do not know of such a thing being done?—I do not.

2309. Have you told us all that you know about trades outrages in the brick trade?—To the best of my knowledge, I have.

2310. Then you have nothing more to tell us?—I have not.

2311. (*Mr. Chance.*) How much did you get as your share of the money in Thornley's case?—I believe it was 2*l.*

2312. That was your share?—Yes.

2313. You did not tell us what was the cause of your doing injury to Mr. Simpson's property?—No, I do not know what was the cause of that.

2314. But you were present at the meeting when it was discussed?—Yes, but was not present at the time it was decided how it must be done.

2315. Was not the cause spoken of afterwards?—No, no further than employing non-union men.

2316. That was the cause?—Yes.

2317. You heard that spoken of afterwards?—It was spoken of many a time at the council meeting.

2318. At the meeting?—Yes.

2319. Was that to the best of your knowledge the only cause why the injury was done to Mr. Simpson's property?—There was not any other that I know of.

2320. Are there any other brickmakers' unions in Stockport besides that to which you belong?—No.

2321. Is yours the only one?—Yes.

2322. What number of members are there in the union?—Perhaps 200, there might be a few over, I will not swear to a few.

2323. (*Mr. Barstow.*) If I understand you, Mr. Simpson would not employ union men at all?—I never asked him.

2324. Do you know whether that is so or not?—I do not know whether he would or would not.

The witness withdrew.

J. Brown.

Joseph Brown sworn and examined.

2325. (*Mr. Chance.*) Are you a brickmaker?—Yes.

2326. At Stockport?—Yes.

2327. You are a member of the Stockport brickmakers' union?—Yes.

2328. How long have you been a member of that union?—14 years.

2329. And at different times have you held office in that union?—Yes.

2330. What offices have you held?—Nearly all at different times.

2331. President?—Yes.

2332. Secretary?—Yes.

2333. Treasurer?—I have never been treasurer.

2334. You have been president and secretary?—Yes, at different times.

2335. And you held office in that union in the year 1864?—Yes.

2336. What office did you hold in that year?—Secretary.

2337. Do you remember there being a dispute

SECOND DAY.

J. Brown.

5 Sept. 1867.

between the Stockport union and Mr. Simpson?—His yard was not in the union; there was no dispute that I know of.

2338. His yard was not in the union?—No.

2339. Was there any cause of quarrel in any way between Simpson and the Stockport union?—Not that I know of.

2340. Was there any determination of the union in the year 1864 to do any injury to Mr. Simpson's property?—Not that I know of, though there was some done.

2341. Do you know that some injury was done to his property?—Yes.

2342. When was it?—Three or four years since.

2343. Was it in 1864?—Very likely it might be.

2344. Do you remember, before any injury was done to his property, the subject being discussed at one of their meetings?—No.

2345. Just think?—I do not remember anything of that discussion.

2346, Do not you remember the subject being discussed at any meeting at which you were present?—No.

2347. Do you remember being present at the time with Slater and Holland and Robert Bailey and George Hulme and George Bailey who were present?—No, not about that.

2348. Were you a member of the council in 1864?—Yes, those that are in office are on the council.

2349. Were you in office at that time?—Yes, in 1864.

2350. Did you, as a member of the council, and being in office, attend the meetings of the council?—Yes, but one cannot attend to all.

2351. Just recall Simpson's matter to your mind and tell me whether some two or three weeks before the injury was done to Simpson's property you were not present at a meeting at which the subject was discussed?—I was not; I do not remember any discussion about it.

2352. Did you never hear anything at all about the injury being done to his property?—I think there was some done.

2353. Did not you hear that there was some to be done?—No.

2354. Are you sure of that?—Yes.

2355. Because we have heard that you were present at a meeting at which it was discussed?—I was not present at a meeting and did not hear it discussed: I knew it afterwards.

2356. When was the first time that you heard it?—Immediately after it was done.

2357. Do I understand you to say that you did not hear anything of it before it was done?—Yes.

2358. Is it likely that something of that kind would be discussed and that you would not hear of it?—Yes, it might be discussed and I not be there.

2359. But supposing that it was not discussed at one meeting at which you were present, would not you be told of it at the next meeting?—I might be, if it was brought on the carpet at the next meeting.

2360. How many meetings of the council were held about that time?—I cannot tell; we have a great many foolish meetings, very often.

2361. After the injury was done to Simpson's property, what did you hear about it?—I had to book the amount for doing it.

2362. How much was it?—I have forgotten now, something like 5*l*. I will not be certain; I cannot give exactly the sum.

2363. Was not it 10*l*. or 12*l*.?—No; I cannot be certain of the amount exactly.

2364. Did you hear at the time who the men were that had done it?—No, all that I thought was that Slater knew something about it.

2365. When you say you thought that Slater knew something about it, I do not understand you?—I say that I thought Slater knew something about it.

2366. Did not you hear anybody say who had done it?—No, only that Slater knew something about it; he was the man that had paid for it; he told me to book it.

2367. Who told you to book it?—Slater.

2368. Were you secretary at that time?—Yes.

2369. Would it be your duty to put in a book the money that was paid?—Yes.

2370. Did you put it in a book?—I do not know whether it was put down as sundry expenses or omitted being put down at all, though we had to give an account of it to the auditing man.

2371. Was it put down?—I believe it was.

2372. You were secretary, and it was your duty to put it down?—Yes.

2373. Did you put it down?—I do not know. I put down so many sundry expenses that I cannot say whether it was put down as sundry expenses or was put down at all.

2374. Have you got your books?—I have got some of the books here.

2375. Have you got the book in which that ought to appear?—No.

2376. Where is it?—In the box.

2377. (*Chairman.*) Where is the box; it shall be produced?—At the club house at Stockport.

2378. Were not you summoned to come here?—I was not at home when the summons was sent.

2379. (*Mr. Chance.*) Have you a book containing entries in 1864?—No, not here.

2380. Why did not you ask for those books?—I was away from home when I was ordered to come here.

2381. I suppose it will appear in those books whether an entry is made or not?—It might appear as sundry expenses.

2382. I want to know whether it does appear?—I cannot say; certain things we do not write down and some we do.

2383. Did you write that down there?—I cannot say. I said that it is put down as sundry expenses or else it was omitted entirely to be put down. I cannot remember.

2384. Have you auditors of your books?—Yes.

2385. How are they appointed?—They are appointed by the body.

2386. How often?—Every three months.

2387. You cannot tell me whether you put it down at all, or whether you put it down as sundry expenses?—I cannot.

2388. I suppose we shall have your books to-morrow?—I cannot get at them, because I do not hold the key now.

2389. When you had to put down the sum of 5*l*. did not it strike you as being a strange thing?—Yes.

2390. Did you make any representation of it to the union?—I have done frequently.

2391. Did you at that time?—Yes.

2392. What did you say?—I said it was a wrong thing.

2393. To whom did you say that?—To the whole body.

2394. Not at a meeting of the council?—At a general meeting.

2395. At what general meeting did you say that?—I have said it at different general meetings.

2396. Did you say it at the general meeting immediately after the outrage upon Simpson's property?—I have almost spoken of it at every general meeting we have against such like proceedings.

2397. You say you spoke of it at the general meeting; was the outrage to be done upon Simpson's property brought before the general meeting?—The amounts were read up.

2398. Was the outrage upon Simpson's property brought before the general meeting?—No, I have spoken against such like proceedings at general meetings.

2399. Did you speak about the outrage upon Simpson's property at the general meeting?—No, no particular outrage as outrages generally are spoken of.

2400. Have you ever spoken about outrages generally?—At nearly all the general meetings.

2401. Are there many outrages of which you have spoken against at general meetings?—There have been down the country.

2402. I am speaking now of your own union?—There have been two or three.

2403. You say you have spoken at a general meeting against the payment of this 5*l.*?—Not exactly against the payment of the 5*l.*, but against outrages generally.

2404. I asked you about the 5*l.*; you say you were acquainted with the fact after the outrage had been done upon Simpson's property?—Yes.

2405. And that you spoke against it at a public meeting?—No, I did not speak against it, but against the thing generally.

2406. I want to know what you did when you found money paid for that outrage?—I said it was wrong.

2407. Why did you say so?—I cannot say just at present.

2408. Did not you bring it before the council or the general meeting?—Not that particularly, I did not.

2409. Why did not you?—Because I spoke of the thing generally.

2410. Were not you, being secretary, astonished that 5*l.* had been given for the outrage upon Simpson's property?—I was.

2411. Did not you mention that at the council or the general meeting?—Not exactly that particular one.

2412. Was not it your duty to do so?—I do not know exactly; you cannot do everything that we know is our duty.

2413. When you found that this 5*l.* had been so paid you did not complain to the general meeting or the council?—No, not of that particularly.

2414. Do you remember in the same year a dispute with Mr. Meadows?—Yes.

2415. Was that dispute with reference to having 10*d.* a thousand saved in making bricks?—Yes.

2416. Did they turn out in consequence?—Yes.

2417. Wild, Child, and Fallowes, we understand went back again to work for Mr. Meadows?—Yes.

2418. Upon that was there any council held of your union?—Not about that exactly, not that I know of.

2419. Just think?—It was not exactly a council meeting.

2420. Was there a meeting?—Yes.

2421. And in reference to that dispute with Mr. Meadows?—Yes.

2422. Who were present at that meeting?—There was myself, James Ludlow, William Slater, George Bailey, Thomas Holland, William Singleton. I do not know of any more.

2423. Were they members of what you call the council?—Yes.

2424. Did you discuss the terms that you had arranged with Mr. Meadows there?—It was discussed, though I did not hear it, and I was present too.

2425. You were present and it was discussed, and you did not hear it?—Yes.

2426. How was that?—Because they came to a resolution what to do.

2427. Is that the reason you did not hear it, because they came to a resolution?—The reason I did not hear it was because I sat on one side.

2428. Why did you sit on one side?—Because I did not want to hear it.

2429. You did not want to hear it?—No.

2430. Why did you not want to hear it?—Because I did not take interest in it.

2431. But you were secretary of the union at that time?—Yes.

2432. Why should not you take any interest about that measure being discussed?—Because I thought it was wrong.

2433. What was wrong?—The discussion that they had on.

2434. You say you did not hear it?—No, I did not hear it, but I knew the resolution though.

2435. How did you know it was wrong if you did not hear it?—I heard part of it at the beginning, I knew what they had to meet about.

2436. But you took no part in it?—No, only by being near to it.

2437. Do you mean to say you did not know what the resolution was?—I did know it after.

2438. Did you not, upon your oath, take part in that resolution and agree to it?—No.

2439. Let me warn you, we have information, and you stand in a perilous position; if you tell the truth you will be protected?—I tell you I did not hear it.

2440. If you tell the truth you will have protection from any proceedings that may be taken against you, if you do not tell the truth you stand in peril?—I do not wish to tell a lie, that is the reason I have been thinking.

2441. At that meeting you say you were present and the question was discussed and a resolution passed?—Yes.

2442. Do you adhere to your answer that you did not know what that resolution was?—I must have known it after.

2443. Did you not take part in that discussion?—I tell you, No.

2444. Did you not take part in that discussion?—No.

2445. On your oath did you not?—I did not.

2446. If you did not take part in the discussion, knowing what it was, did you remonstrate against that resolution being passed?—I did not.

2447. Then you allowed it to be?—I could not help myself.

2448. Have you not a vote?—I have a vote, but I did not vote.

2449. Why did you not vote?—Because it was foolishness voting against so many.

2450. Was that your reason for not voting, because it was foolishness voting against so many?—Yes, it was.

2451. Did not you even express your opinion against the resolution?—No.

2452. Then as you were present I suppose it was thought you concurred in the resolution?—Yes.

2453. And you did concur in it?—I do not know what you mean by concurring in it.

2454. And you agreed with it?—I was like to be, I could not stop the proceedings.

2455. You told me just now that you did not agree to it?—I did not in my own mind.

2456. What was the resolution?—That measures were to be taken to give Thomas Wild a good thrashing.

2457. That was the resolution that was passed?—Yes, for receiving turn-out pay, and working in opposition both at once.

2458. When the resolution was passed that Thomas Wild was to have a good beating, you objected to it, but did not raise your voice against it?—I did not hear it while it was passing.

2459. You told me just now that you did hear it?—You misunderstood me or else I misunderstood you.

2460. You told us you knew what the object was, but you took no part in it?—Yes.

2461. Now I ask you, knowing what the object of the resolution was, do you mean to say that you did not lift up your voice against it?—I did not.

2462. You stood silent?—Yes.

2463. How long was it before Wild was beaten that that meeting took place?—It would be about a day before.

2464. Where was this meeting held?—In Ludlow's brickyard, the Croft Lane.

2465. Who asked you to attend the meeting?—I cannot say exactly, there were two yards close together, and they got together the men.

2466. Some one came to ask you to attend the meeting?—Yes, I believe it was George Bailey, I will not be certain.

2467. Did he tell you what you were to attend the meeting for?—Yes, to discuss about what must be done with Thomas Wild.

SECOND DAY.

J. Brown.

5 Sept. 1867.

2468. What was the nature of the resolution about beating Thomas Wild, what was to be done?—That somebody was to be appointed to give him a good thrashing.

2469. Who was to be appointed?—Slater undertook to find somebody for it.

2470. Did he say whom he was to find, or did he say he would find someone?—Jim Kay was mentioned.

2471. Was anything said about the money to be paid for it?—Not then.

2472. Had anything been said about the money to be paid for it before that time?—No.

2473. Was no mention made at any time of the money to be paid?—I believe Slater made some arrangement with Kay about some money.

2474. I do not speak about the arrangement with Kay, but at the meeting was anything said about the amount of money to be paid?—No.

2475. Are you sure of that?—Yes.

2476. Was nothing said at all at that meeting about money being paid?—I did not hear of any.

2477. You were present?—I never heard of any money, no amount, not then.

2478. Were you secretary at that time?—Yes.

2479. After the beating of Wild took place, was any money paid?—Yes.

2480. How much?—I believe it was 14*l.*

2481. Who paid it?—I paid the money.

2482. To whom did you pay it?—James Kay.

2483. How came you to pay that money to James Kay?—Because Slater should have paid him, but he was taken into custody before he had the chance to pay him.

2484. Why did you pay him?—Because I and George Hulme were appointed by the same two yards the next night to go to Mr. Roberts, of Manchester.

2485. You said just now that you disapproved of the resolution?—Yes, I disapproved of the resolution.

2486. How was it if you disapproved of this resolution that you paid the money?—I was telling you, but I cannot get to it yet. I and George Hulme were appointed to see Mr. Roberts and we had power to get 10*l.* from the landlord of the club to pay him with, and when we got to the club there was a lot of men who wanted to see William Slater, those who hurt Wild, I expect, and they saw George and me with plain clothes, and they thought we were two brickmakers, and they asked us who we were, and we told them, and through my name being mentioned, I being secretary, they knew me, though I did not know them, and they told us they wanted this money they agreed for with Slater.

2487. Who were these men, what were their names?—I did not know any except Kay; so we asked them what the amount was, and they said 14*l.* There were seven of them, 2*l.* a head, when we got it we paid it them.

2488. You got it?—Yes, from the landlord of the clubhouse.

2489. Who is he?—John Taylor, of the "Pack Horse."

2490. Do I understand you that he lent you the money?—Yes, on the society's account. On a note from the secretary he will lend any amount.

2491. Did you give him that note?—Yes.

2492. I suppose he has the note that you gave him?—Yes, but every time we pay the money back again he delivers the note to us.

2493. Did you pay the money back to him?—Yes.

2494. What did you do with the note?—Burned it, I expect.

2495. If you disapproved of this resolution how was it that you paid this money?—Because I was appointed to pay it.

2496. You were appointed to pay the money?—I was appointed to go to Mr. Roberts, and these men asked for their money. I knew Slater was in custody and could not give it them.

2497. If you disapproved of the payment of the money why did not you remonstrate and refuse to pay the money?—It was no good refusing.

2498. Do you mean if authority is given by your society to do a bad action that you immediately submit to it?—I did then.

2499. Do you mean to tell us that you paid this money and yet objected to the resolution?—Yes.

2500. Did you make any remonstrance on that occasion?—No.

2501. On no one occasion?—Not of any one thing in particular, but as a general thing.

2502. You paid this money without making any remonstrance to either the council or the general meeting?—Yes.

2503. You paid it perfectly voluntarily?—Yes.

2504. Did you make an entry of it in your book?—Yes.

2505. Under what head did you enter it?—"Sundry expenses."

2506. Will it appear in your book under the head of "Sundry expenses"?—Yes.

2507. Have you many entries of that kind?—Yes; but not of that description, only headed similar to that.

2508. Do you remember injury being done to the property of Mr. Thornley?—I remember the time.

2509. Was it after Wild's?—Before Wild's. I do not know exactly the time, but I remember the circumstance.

2510. That was at Heaton Mersey, was it not?—Yes.

2511. Before the injury was done to Thornley's property, was there any meeting called in reference to that affair?—I do not know. I was not on at that time.

2512. You were not on the council?—No; not at that time.

2513. What time are you speaking of?—The time of it being done at Thornley's.

2514. Wild was injured on the 2nd of August?—Yes.

2515. Was Thornley's before that time?—Yes.

2516. Was it before Simpson's?—I cannot be certain.

2517. Are you sure you were not secretary at that time?—At the time Thornley was done I was not.

2518. Had you ceased to be secretary then?—Yes; I was not on at that time, we are only appointed for six months as secretary.

2519. When in 1864 were you appointed?—In March.

2520. Then you would be secretary for six months from March?—Yes.

2521. Then you must have been secretary at that time?—Yes.

2522. In Thornley's time?—No; not in Thornley's time.

2523. But if you were secretary in March you would be secretary up to September?—Yes.

2524. You remember Simpson's property being injured?—Yes.

2525. The injury upon Thornley's property took place in July; you say that you were elected secretary in March, and that you were elected for six months, therefore you must have been secretary in July?—Yes; I must have been.

2526. (*Mr. Barstow.*) You know very well that you were?—What I mean is this. I do not know anything concerning Thornley's job.

2527. (*Mr. Chance.*) That is not my question. You told me just now that you were not secretary at the time Thornley's outrage took place?—I say it was in the same year. I was secretary in 1864 for six months.

2528. Before Thornley's outrage took place was there any meeting called in reference to Thornley?—Not that I know of.

2529. Was not there a meeting at which Joseph Brown (that is yourself), Singleton, and George Hulme were present?—No; not about Thornley's job.

2530. If Cheetham says that you were there he is not speaking the truth?—He is not speaking the truth when he says I was there. I have no recollection of it at any rate.

2531. You were secretary then. Does not the

secretary attend all these meetings of the council?—No; sometimes he might be out of town.

2532. Do not you remember anything being said on any occasion about the outrage upon Thornley?—No.

2533. Upon your oath?—Upon my oath, no.

2534. When did you first hear of it?—I saw some placards up in the streets.

2535. Might it not be possible that you might be there at the time Thornley's case was mentioned?—I might have been present, but I have no recollection.

2536. Is it your habit not to pay attention to discussions and resolutions that are passed?—I give very little attention to those things.

2537. Then Cheetham may be quite correct?—I may have been there; I have no recollection of it.

2538. You cannot forget a thing of this kind?—I cannot recollect it, therefore I say I cannot have been there.

2539. You say you might have been?—I might have been, but I have no recollection of it.

2540. Do not you recollect a meeting taking place at which the outrage upon Thornley was talked of?—No, I do not.

2541. Did you know that there was any dispute about Thornley?—Yes.

2542. You did know that?—Yes.

2543. Was anything ever said about taking any measure in consequence of that dispute?—Not that I know of.

2544. Did you take any interest in the matter when you heard that there was something amiss between the union and Thornley. What did you hear?—I did not hear anything.

2545. You said just now that you did?—I think it was done. Afterwards I saw it in the papers.

2546. I ask you whether you heard that there was a dispute with Thornley?—I heard that he had been employing non-union men.

2547. Then there was a dispute?—If you call that a dispute there was.

2548. You heard that before the outrage took place?—Yes.

2549. Was not it brought before the union?—I do not know that it was.

2550. How did you hear of it?—I saw it in the placards.

2551. You did not see in the placards that he employed non-union men?—No.

2552. When did you first hear that Thornley only employed non-union men?—It was regularly so.

2553. Was it brought up before the meetings of the union?—If it was, it was brought up at some council meeting when I was not present.

2554. Do you mean to say upon your oath that you were not present when the matter was discussed?—I mean to say this, that I have no recollection of it.

2555. Do you know who did the injury to Thornley?—I do not.

2556. Have you never heard?—No.

2557. Did you never hear who injured Thornley?—No.

2558. Do you know now?—No.

2559. Was any money paid to anyone for the injury done to Thornley?—There might be; I do not know.

2560. You were secretary at the time?—I did not write everything down. Sometimes I am out of town, and there is a man in my place.

2561. Were you out of town then?—I cannot say. I have no recollection about it. I am very often out of town.

2562. If it was put down, it will appear in your books?—Yes.

2563. You do not know whether you put it down or not?—No.

2564. You do not know whether any money was paid?—I do not.

2565. (*Chairman.*) You are not in office at this moment?—No.

2566. When did you cease to be in office?—Upon Tuesday last.

2567. What was the office you filled on Tuesday last, when you resigned?—I was secretary.

2568. How long had you been secretary?—Six months.

2569. And before that time how long had you been in the union?—14 years.

2570. And you filled nearly every office?—Yes, except the treasurer's, at different times.

2571. And how many times have you been secretary?—Five or six times.

2572. Have you had many occasions to make an entry of "sundry expenses?"—Yes.

2573. Had you any notion what they were for?—Yes.

2574. Have those entries of sundry expenses always been for matters of this sort that you have been describing? Take care how you answer these questions.—We booked "sundry expenses" to the money paid to these two men's wives when they were in prison.

2575. I am not asking you about that. You say that when you have been secretary you have had several times occasion to enter the expression "Sundry expenses." I ask you, were all those entries made for matters of the description you have been speaking of?—They were entered as sundry expenses if they were entered; sometimes they were omitted altogether.

2576. That is not the question. You say that you have made an entry, "Sundry expenses," several times: when you have made that entry has it invariably been for matters of this sort that you have been describing?—No, there are other matters which we put "sundry expenses" for.

2577. What?—The money paid to these women while the two men were in prison.

2578. What was that for?—To keep them.

2579. What for; what had their husbands done?—It was for Slater and Cheetham's wives.

2580. That I understand. What other reason is there for putting "sundry expenses" besides these matters which you say you disapproved of?—I do not know what the reason was for writing it, but I believe the secretary before me wrote it.

2581. What was the reason you wrote it that way?—Because the other secretary had done so.

2582. Now, I ask you again, when you wrote "Sundry expenses," was it for matters of this description that you have been describing?—For matters of this description it was written down "sundry expenses" when it was written down.

3583. All the amounts you wrote, ——, "sundry expenses," for, with the exception of money paid to these men's wives, were for matters of this description that we have been talking of?—No, money paid to the lawyer was put down as sundry expenses.

2584. Why was it put down as sundry expenses and not law expenses?—Because we are not proficient in book-keeping.

2585. Could not you write the words "law expenses" as easy as "sundry expenses?"—Yes.

2586. I ask you now whether these entries of sundry expenses have been for matters of outrages?—They are put down as sundry expenses.

2587. All matters relating to outrages were put down as sundry expenses?—Yes, when it was written down.

2588. And you wrote it down several times while you were secretary?—Yes.

2589. When you were secretary you wrote it down several times?—Yes.

2590. Have you ever filled the office of walking delegate?—No.

2591. What are the duties of a walking delegate?—Our walking delegate was a gauger.

2592. What are the duties of a gauger?—To gauge the moulds and see that they are all of one size.

2593. Is it part of their duty to see whether your union men obtain what you think the right wages, or that non-union men are not employed?—No, it is their duty to gauge the moulds and to warn meetings.

SECOND DAY.

J. Brown.

5 Sept. 1867.

2594. That is to summons the members to attend?—Yes.

2595. Is it part of their duty also to see what men the brickmakers are employing?—No.

2596. It is not?—No.

2597. Whom do you employ for that purpose?—No one.

2598. Are there not persons in certain districts to see whether union men are employed or whether non-union men are employed?—No, every moulder sees that the men who are with them are union men.

2599. Whose duty is it in your society to keep the books?—The secretary's.

2600. Who is the present secretary?—Samuel Moss.

2601. Has he the custody of the books of the society of 1864?—He has the key belonging to the box, they are in the box.

2602. Where is the box kept?—At the "Pack Horse."

2603. And the secretary keeps the key?—He has one.

2604. And who has the other?—The president and the treasurer.

2605. How many boxes have you containing books?—There is only one box and a little cash-box.

2606. Where are the books in which the entries are made for the year 1864 when you were secretary?—They are in the box.

2607. They ought to be there?—Yes.

2608. And the secretary ought to have the key?—Yes.

2609. When did you see them last?—Last club-night but one.

2610. When was that?—A fortnight since last Saturday night.

2611. Did you see your old book in which you had made these entries in the year 1864?—I cannot say whether I saw it or not.

2612. But it would have been there?—Yes.

2613. Are you now one of the members of the council?—No, there is no council now.

2614. But were you a member of the council at the time of Wild's business?—Yes, by virtue of being secretary I became one of the council.

2615. You told my learned friend that you and George Hulme were appointed to see Roberts?—Yes.

2616. What is Roberts?—A solicitor.

2617. What did you go to see him for?—To defend these men.

2618. That was before the trial?—Yes.

2619. You had power to get 10*l.* for him?—Yes.

2620. You say that you went to the landlord of the public-house and you there saw about seven men altogether including Kay, and that you believed that they were the men who had beaten Wild?—Yes.

2621. You got the money?—Yes.

2622. Did you pay to each of those seven men a proportionate part of that sum?—No, we gave it to Kay.

2623. Did you take any money to Roberts?—Yes.

2624. What did you take?—I took that 10*l.*

2625. Did you take any more?—Yes, at different times.

2626. How much did you take altogether?—I cannot tell, nearly all that we had.

2627. But you must have some notion about how much?—Something like 100*l.*

2628. That is an answer. It was before you saw Roberts, I understand you, that you went to Taylor's public-house to get money to pay these men, was it not?—Yes, I don't understand you.

2629. When you went to the "Pack Horse" to get money to pay these men?—Yes.

2630. That was before?—Yes.

2631. When was it that you went there?—The day after the outrage.

2632. That is to say on the 3rd of August?—Yes.

2633. Then you say you found Kay there with six men?—Yes.

2634. And did you give the lump sum to Kay for him to distribute?—Yes.

2635. You did not know any of the men, did you?—No, they were all strangers except Kay.

2636. Which was the day that you saw Roberts to give him the 10*l.*?—On the 3rd.

2637. Then was it after you had seen Roberts that you went to the "Pack Horse" to pay the men?—No, I paid the men before I saw Roberts.

2638. What time of the day was it when you paid the men?—It might be about 3 or 4 o'clock.

2639. On the 3rd of August?—Yes.

2640. And what time was it when you saw Roberts?—About 9 at night.

2641. Had you ever seen any of those men before?—No, only Kay.

2642. Had you seen him before on any transactions of this sort?—Yes, he has been busy in a transaction of that sort before.

2643. And you were secretary and would, of course, naturally have to do with him?—At that time.

2644. I mean at that time. While you were secretary had you ever paid Kay money before?—No, I had never paid any money before that.

2645. Had you given him an order for any money?—No.

2646. What are the transactions to which you allude, which you say you have had with Kay before that?—He had been over to our society at different times as a delegate.

2647. What had you to do with it. Had you any money to pay to him for transactions of this sort before?—Not that I had paid him.

2648. You say you often paid money which you entered in your book as "Sundry expenses"?—I never paid any money, only that.

2649. But you have told me on your oath that you have several times made entries of "Sundry expenses" and on one occasion you mentioned that that money had been paid for similar doings?—It had been paid, but not by me.

2650. When have you known it to be paid?—At different times.

2651. At whose request or suggestion did you make the entry of "Sundry expenses"?—Slater's.

5652. Did Slater tell you at the time you had to make the entry what it was for?—Yes.

2653. Tell me what was told you at the time when you made the entry for "Sundry expenses"?—He told me what it was for.

2654. I have not the slightest doubt he did. I insist upon your telling me what he told you. What did he tell you it was for?—That so much money had been expended for these jobs.

2655. For which job?—For the job you are talking about.

2656. This job we understand, but I am talking of other jobs. We understand that for Wild's job 14*l.* was paid?—Yes.

2657. That was not told you by Slater. Slater was in custody, was he not?—I wrote that by my own instigation.

2658. Then I suppose you gave the 14*l.* at your own suggestion did you?—No, Slater made an engagement with them, but I did not know what it was at that time.

2659. When did you know that the 14*l.* was to be given?—On the 3rd.

2660. Who told you it was 14*l.*?—Kay.

2661. Had you known before by any meeting or resolution what was the amount of money to be given?—No.

2662. Then did you take Kay's word for it?—Yes.

2663. Will you swear that the amount of money to be given was not mentioned at the meeting when it was resolved that Wild should be beaten?—I will swear I never heard any.

2664. Were you there?—Yes, I was near to.

2665. What sized room is it?—It was a field.

2666. But was there any meeting in a room at which it was discussed how much money was to be

given for beating Wild ?—I never heard of any discussion in any room.

2667. Now I ask you whether you were not present at any meeting in a room (I will come to the field presently) at which there was a discussion and a resolution passed that Wild was to be beaten ?—I never heard of any.

2668. That is ambiguous. Do you mean to say that you were present and knew it was going on ; but shut your ears that you should not hear it ?—That was in the field. I never heard of it in any room.

2669. Will you swear you were not present at any meeting in a room at which a resolution was come to that Wild was to be beaten ?—Yes, I will swear it.

2670. Are resolutions usually put from the chair at those meetings ?—Yes.

2671. The president puts it, and those who are of one opinion say one thing, and the others the other ?—Yes.

2672. Is that resolution usually put by a show of hands ?—Yes.

2673. Were you ever in a room at which a resolution was come to about Wild being beaten ?—I never was.

2674. Nor the subject discussed ?—No.

2675. Nor anything about Wild ?—Not about his being thrashed.

2676. Was there any discussion at all in a room about any matter relating to Wild's working at Meadows' ?—Yes ; about his working.

2677. When was that ?—I cannot tell exactly ; it was some time at the latter end of July.

2678. That you heard ?—Yes ; that he was working and receiving turn-out pay at the same time.

2679. You heard that discussion ?—Yes, I heard that part discussed.

2680. Was nothing said about the punishment of this man ?—No, not in the room.

2681. Did you slip on one side when that came to be talked about ?—I did not hear.

2682. You will swear you did not hear ?—Yes.

2683. And that there was merely a discussion in the room about Wild having done that, and nothing was said about his deserving to be punished for an infraction of your rules ?—I never heard of any.

2684. That you will swear will you ?—Yes.

2685. Then when that discussion took place, or when a discussion took place about the punishment of Wild, it was in a field you say ?—Yes.

2686. Was that on the morning he was beaten, on the 2nd of August ?—No, the day before.

2687. How came you to be there ?—Because I was working close to.

2688. Who else were there ?—George Hulme, George Bailey, and William Slater.

2689. Were you sent for ?—Yes.

2690. Who came for you ?—George Bailey.

2691. And George Bailey having come for you I suppose you were told the purpose which you were sent for ?—He said he wanted us to get together to discourse about Wild.

2692. Now having got together for this very purpose, what was discussed ?—The resolution was come to. That must be what was discussed.

2693. Of course ; and what was the resolution ?—To give him a good thrashing.

2694. And you were present at the time ?—Yes.

2695. And you heard it ?—I did not hear it.

2696. You slipped on one side when they came to that resolution ; is that what you mean to swear ?—I mean to say I was on one side nearly all the time.

2697. Which side were you on ? Were you for the beating or not ?—Not on the side of the beating. I was a little away.

2698. Do you mean to tell me that when you were summoned for the express purpose of considering whether Wild was to be beaten or not, you came there and slipped on one side so as not to hear what passed ?—That is it.

2699. You did not hear anything at all ?—No.

2700. What made you go to the meeting then ?—Because I was warned.

2701. But if you went for that purpose do you mean to say that you were allowed to be on one side, and not to take part in it, and not to listen ?—Yes.

2702. How far were you off ? — Maybe about eight yards ; I cannot tell exactly.

2703. Were you quite separate from the others ?—No.

2704. Who was with you ?—James Ludlow.

2705. He did not hear of course ?—No.

2706. Was there anybody else who did not hear ?—I do not know ; there were only him and me talking together.

2707. Did you hear the resolution put ?—No, I did not hear it put.

2708. But you heard it discussed ?—No.

2709. Not in a field ?—No.

2710. That you swear ?—Yes.

2711. Then you went to the meeting and stood about eight yards off, and heard nothing. Is that what you want us to believe ?—Yes, that is it.

2712. And that you swear, will you ?—Yes.

2713. And you never knew anything of it till afterwards ?—No.

2714. You have told us already that you never were present at any meeting when Simpson's matter was discussed ?—Yes, I was.

2715. Was it discussed in your presence ?—Yes.

2716. In a room ?—Yes.

2717. Did you hear it ?—Yes.

2718. What was the resolution come to then ?—That means must be taken to destroy his bricks.

2718*a*. You heard that ?—Yes.

2719. Was somebody appointed at the meeting to see that it was carried out ?—Yes.

2720. Who was it ? — I believe it was William Slater.

2721. Was the amount of money to be given for the job mentioned ?—Well, I cannot be certain.

2722. Will you swear that 15*l*. was not mentioned as the sum to be given for it ?—Well, I do not know how much it was exactly.

2723. But you will swear something was said ? — Yes.

2724. Now what other occasions were there for you to make that entry of "sundry expenses ?" — No other.

2725. How many times did you make the entry of "sundry expenses ?"—Nearly every fortnight.

2726. It came as a regular thing to make an entry of "sundry expenses" when you were secretary, did it ?—Yes, concerning those women.

2727. But besides the money paid to those women you say you repeatedly made an entry of "sundry expenses." I ask you did you make the entry of sundry expenses respecting the 15*l*. ?—Yes, if it was 15*l*.

2728. Did you make the entry for that 14*l*. as "sundry expenses ?"—Yes.

2729. Did you make the entry for the money paid in Thornley's case as "sundry expenses ?"—I do not know that.

2730. You were secretary at the time, in 1864, were you not ?—Yes, but I am not always at the meetings.

3731. But it is your duty to make the entry, is it not, or to see it made ?—Yes, or the man that I put in my place when I am away.

2732. Your book ought to show, I suppose, whether it is in your handwriting or not ?—Yes.

2733. If it is entered it would be entered as "sundry expenses" I suppose ?—Yes.

2734. On what other occasions have you entered "sundry expenses" except in those cases that you have mentioned ?—None that I know of.

2735. Then I suppose you know your book of 1864 well ; we shall have it produced afterwards ?—I should think so.

SECOND DAY.

J. Brown.

5 Sept. 1867.

2736. Can you tell me now without seeing the book whether there is any other entry in the year 1864 which is in your handwriting?—You know if a man was in my place it would be in his handwriting though I should be secretary at the time if he sat for me.

2737. Can you tell me now without seeing the book whether that happened, or whether all the entries to the best of your belief are in your handwriting for the year 1864?—To the best of my belief they are not.

2738. That we will see. You recollect the conviction of Cheetham and Slater, do you not?—Yes.

2739. Did you take an active part in getting up the petition for the commutation of the sentence?—Yes.

2740. Were you present when any money was offered to Wild for signing the petition to get a commutation of the sentence?—Yes.

2741. I believe the money was offered by George Hulme was it not?—No; Humphrey Hulme.

2742. How much was it, was it 20*l.*?—5*l.*

2743. Were you present when any larger sum was offered, such as 20*l.*?—No, I was not.

2744. Then 5*l.* was the utmost of the money offered whilst you were present, was it?—Yes.

2745. That was to make him sign the petition, was it not?—Yes.

2746. Where was he when you asked him?—He was in a public-house in Manchester.

2747. What is the name of it?—I have forgotten, the "Swan" I think.

2748. Had you given him something to drink before you asked him?—No, not before; he had some after.

2749. Did he sign it or did he not?—He put a cross to it.

2750. Had you asked him often before?—I had not. I believe he had been asked to.

2751. But you yourself had not asked him?—Not before that.

2752. Never?—No, not before that.

2753. Had you been for the purpose of endeavouring to see him to ask him?—Only that time.

2754. Your memory seems to have been a little refreshed in the course of the examination. Do you remember being present at any meeting when the injury to Thornley's property was discussed?—No.

2755. Just recollect then; it was in 1864?—I cannot recollect it,

2756. Then you may have been present, but have forgotten it?—Yes.

2757. Am I to understand from you that you were present at so many meetings where discussions of this sort took place that you cannot remember one more than the other; is that so?—No, not exactly that.

2758. Then was it so uncommon a thing?—To the best of my opinion I was not there, but I cannot say positively you know.

2759. Is it a usual or an unusual thing to have matters of this sort brought before your meetings, and for discussions to take place as to whether persons' property ought to be injured or not for having broken your rules?—No, it is not a common thing.

2760. Then would you not recollect it in this particular case?—I might do so, but I have no recollection of it.

2761. That you swear?—Yes.

2762. I will try you. Do you remember Singleton and Hulme being present when any discussion took place about Thornley's matters?—No.

2763. You heard of the injury to Thornley's property?—Yes, I heard of it afterwards.

2764. How soon after it had taken place did you hear of it?—I cannot tell, a day or two after.

2765. You paid the money for it, I suppose?—No, I did not.

2766. How came that, you were secretary?—The secretary does not pay all moneys.

2767. Did you make any entries about it?—I do not know that I ever did.

2768. We will see your book. Was it in the natural course of business that you, the secretary, should make those entries if any moneys had been paid for the injury of the property?—Yes.

2769. Do you remember William Slater, or George Hulme, or David Potts, or James Kay, asking you for 10*l.* or 12*l.* for doing that injury?—They never asked me for it.

2770. That you will swear, will you?—Yes.

2771. Do you remember any sum being paid for the injury to Thornley's property?—No, I do not.

2772. Have you ever on any other occasion besides the one you have mentioned paid James Kay money?—No.

2773. That you will swear, will you?—Yes.

2774. To how many persons do you think you have paid money while you have been secretary for matters of this sort?—Only that once to Kay.

2775. In Simpson's case you say you did not pay the money?—Yes.

2776. That you can swear?—Yes.

2777. Slater you say paid the money?—Yes.

2778. In Thornley's case you do not know who paid?—I do not know,

2779. But in the natural course of things it was your duty to make the entry provided the money was paid?—Yes.

2780. How many offices have you served since 1864?—Only one. I have been secretary twice, I believe, since then.

2781. Is that the only office you have served since 1864?—I have been a district man once for three months, I believe that is all.

2782. While you were district man did you report any cases of master manufacturers employing non-union men?—No.

2783. None at all?—No.

2784. Or underpaying the union men?—No.

2785. You will swear that, will you?—Yes.

2785. What was your district?—Brinnington.

2787. How long were you a district man?—Three months.

2788. (*Mr. Barstow.*) What sort of box is it that your books are kept in?—A big box, like a clothes box.

2789. Is it a safe?—No.

2790. What size is it?—It is about three feet long and two feet broad.

2791. Of what is it made?—Deal I think, it is wood.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

THIRD DAY.

Assize Courts, Manchester, Friday, 6th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C. | GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq. | JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

GEORGE HULME sworn and examined.

2792. (*Chairman.*) What are you?—A brickmaker.

2793. How long have you been so?—All my life.

2794. How old are you?—I am 33.

2795. Where do you live?—Higher Hillgate, Stockport.

2796. Are you working for anybody now?—Yes.

2797. For whom are you working?—Mr. Charles Marhew.

2798. How long have you been working for him?—Six years.

2799. Are you a member of the Stockport brickmakers' union?—Yes.

2800. How long have you been a member of that union?—14 years.

2801. Do you fill any office at this moment?—No.

2802. Have you ever filled any office in the union?—Well it is years back; I once was treasurer.

2803. When was that?—I cannot speak to that, it is seven or eight years since, I think.

2804. Do you remember who was president when you were treasurer?—I cannot tell you now.

2805. Were you treasurer more than once?—No.

2806. That was for three months I suppose?—Yes.

2807. Had you to pay much money during that time?—No.

2808. Used you to pay what money was wanted?—Yes.

2809. We understand that there was a council. Were you a member of the council in the year 1864?—Yes, I believe I was.

2810. We understand that there were 13 of you, is that so?—Yes.

2811. And you were one, were you?—Yes.

2812. Do you remember at any meeting of the council a talk about Simpson's case?—Yes.

2813. Was that sometime in June or July 1864?—I do not know what month it was.

2814. It was in the summer, was it?—Yes.

2815. Where was the meeting; was it at the "Pack Horse"?—Yes.

2816. A meeting of the council?—Yes.

2817. And you were there, and was Thomas Holland there?—Yes.

2818. And was Joseph Brown there?—Yes.

2819. And Potts?—Yes.

2820. And Holland Cheetham?—Yes.

2821. And George Bailey?—Yes.

2822. And William Singleton?—This is a council meeting you are talking about?

2823. Yes.—I think he was there.

2824. And Slater?—Yes.

2825. And you had a talk about Simpson's case?—Yes.

2826. What had Simpson been doing that made you talk about the case?—He employed no union men.

2827. Then that being the subject what was the resolution to which you came?—That there must be summat done.

2828. I suppose to destroy his property?—Yes.

2829. Then was Slater the person to carry that out?—Yes.

2830. And how much did you vote for the job; was it about 15*l.*?—Something of that sort it was.

2831. Then Slater was the person to carry it out; and did you agree to go with him?—Yes.

2832. Do you remember who else?—Yes, there was James Garner, Slater, and Thomas Holland.

2833. Jackson?—No.

2834. How many were there of you altogether do you think?—Five or six, I am not sure.

2835. You know Slater would be one, and you would be two, Thomas Holland would be three, and Garner would be four. Now do you remember any others?—A chap of the name of Jackson, I never knowed him much.

2836. Do you remember the other?—No I could not say.

2837. Then you went. Was it as much as three weeks before you did anything after the resolution?—Yes, I think it was about that time.

2838. Had you to wait your opportunity?—Yes.

2839. Had you tried once to do it, do you remember, before you did do it?—Not to my recollection.

2840. But, however, you were watching your opportunity for three weeks?—Yes.

2841. Then you started at night; do you remember what time it was?—It would be about half-past 11 or 12 o'clock.

2842. Had Holland a gun?—Yes, Holland had.

2843. Was it a double-barrelled gun?—A single barrel.

2844. Had Garner a gun?—Yes.

2845. Was it a double-barrelled or a single-barrelled gun?—Single.

2846. Were they their own guns, or did you find them?—They were their own guns.

2847. We are told that somebody carried some naphtha. Who carried that?—I think it was me.

2848. In what sized bottle was it?—About three quarts.

2849. And you carried that?—Yes.

2850. That makes three of you then. Had the other two any sticks or anything of that sort?—Not that I am aware of.

2851. Then you got there, and then you went into the yard. There was a watchman there of the name of Platt, was there not?—Yes.

2852. Was he in a little cabin which they called the watchman's cabin?—Yes.

2853. Had you begun to do any damage before he shouted out?—No.

2854. Then he shouted out?—Yes.

2855. Did the two fellows with the guns go up to the cabin?—Yes.

2856. Did they threaten him?—Yes they threatened him.

2857. They threatened him if he came out?—Yes, there were those dogs.

2858. There was only one dog, was there?—Yes, we saw two.

2859. Did they keep out of your way by keeping in the kennel?—No, we turned one wrong side upwards.

2860. You turned the kennel wrong side upwards?—Yes.

2861. And the dog was inside at the time, so that you kept him safe?—Yes.

THIRD DAY.

G. Hulme.

6 Sept. 1867.

2862. Then there was one dog left, what did you do with him? I understood you to say that there were two dogs there?—Yes, there were two, and one was in the cabin, and the other was in the kennel.

2863. Did the two men with the guns stand by the cabin and threaten the watchman if he came out?—Not that I am aware of.

2864. I understood you to say that the two men with the guns went towards the watchman's cabin?—Yes.

2865. Then what did you do, because you had no gun?—I stood watching them.

2866. Watching the men with the guns?—Yes.

2867. Did the watchman shout out?—Yes.

2868. What did he shout?—He kept shouting out.

2869. Then you shouted out too, I suppose?—No.

2870. Not you, but the men with the guns?—Not that I am aware of.

2871. But I understood you to say that they threatened if he came out to fire at him?—No.

2872. What did they do with the guns; did they say nothing?—I never heard them speak.

2873. After watching them some time, what did you do?—I went down the lane.

2874. But what was done to the bricks or the clay?—There was nothing done to the clay.

2875. Was there anything done to the bricks?—There was about a thousand knocked off the walls.

2876. Did you help to do that?—Yes.

2877. Then there was your naphtha; what did you do with that?—We went and threw it on the shed.

2878. Then you had matches with you to light it?—Yes.

2879. And some chips?—No, not that I am aware of.

2880. Then which of you lighted it?—I do not know who lighted it.

2881. But you saw it lighted?—I saw them throw it on.

2882. Did you hear any shots fired?—Yes.

2883. Did you hear any shots fired by your men with the guns?—No.

2884. Did the shots you heard come from the direction where those men were standing near the watchman's cabin?—Yes.

2885. And have you any doubt that your men fired?—No.

2886. You believe they did?—No, I believe they did not.

2887. Do I understand you to say that they never fired at all?—They never fired at all.

2888. Neither Holland nor Garner?—No.

2889. Who did fire then?—This watchman.

2890. How many times did he fire?—I am sure I cannot tell you; seven or eight times.

2891. Could you tell from the report whether it was the report of a gun being fired or of a revolver?—A revolver.

2892. All the shots?—Yes.

2893. Will you swear you did not hear the report of a gun or guns while you were there?—Yes.

2894. Will you swear that your men Holland or Garner did not fire?—I will.

2895. Then if Slater has told us that you did, you think it is not true?—Yes, I do.

2896. What did you take the guns for?—To shoot the dogs.

2897. And that you will swear, will you?—Yes.

2898. Then did they stand by the watchman's cabin and threaten to do to him if he came out?—I do not know that they ever did threaten him.

2899. I understood you to say just now most distinctly that they did threaten the watchman if he came out?—No I did not, you have mistaken me.

2900. But they stood near the cabin?—Yes, but the dogs were close against the cabin.

2901. What made you come away so soon?—Because he was getting outside.

2902. And that made you go off did it?—Yes.

2903. Then you meant to have done more damage?—No.

2904. Do you mean to say you had done all you intended?—Only setting the shed on fire.

2905. And destroying some bricks?—There was but about a thousand spoiled in the whole.

2906. But still you spoiled them?—Yes.

2907. Was it a dark night?—Yes.

2908. How far were the walls of the bricks which you helped to spoil from the watchman's cabin?—40 or 50 yards I daresay.

2909. Then when you were standing and spoiling the walls of bricks you could not see the men at the watchman's cabin?—No.

2910. Then was it while you were spoiling the walls of bricks that you heard the six or seven shots?—No, we had got to the bottom of the shed then.

2911. How far is the shed from the watchman's cabin?—One part of it very nearly comes up to it.

2912. But could you on a dark night, while you were at the shed with the naphtha, see the watchman's cabin?—No.

2913. Then you have sworn to having heard six or seven shots fired?—Yes.

2914. Then is it because you imagine or think that those reports were the reports of a revolver that you say your men did not fire?—Yes.

2915. That is the reason, is it. Did you see the revolver?—No.

2916. Then all you say is that having heard the reports you think they were the sound of the report of a revolver, and not the sound of the report of a gun?—Yes.

2917. And is that your reason for saying that neither of the two men that were with you fired?—Yes.

2918. You could not see them, you say, and it is because you believe that the reports you heard were the reports of a revolver being fired, that you say you believe the guns were not fired, is that your reason?—No.

2919. What is your reason?—He did fire.

2920. Who did fire?—This watchman.

2921. What is your reason for saying that you believed the watchman fired all these six or seven shots?—Because one of those men was with me with the gun.

2922. But you said they were standing near the watchman's cabin, and while you were spoiling the walls of bricks or setting fire to the shed you could not see the men with the gun?—No, we were all together then.

2923. Where was the watchman then?—He was outside the cabin.

2924. But did the men with the guns leave the watchman's cabin and come to you?—Yes, one of them. We never saw the other after; Holland did.

2925. You did not see Garner after?—No.

2926. Then the last time you saw Garner was when he was near the watchman's cabin?—Yes.

2927. And what became of him then, you do not know?—No.

2928. Then whether he fired or not——? He never fired.

2929. So you say; but whether he fired or not your reason for saying so is because you think the reports you heard were the reports of the revolver?—Yes.

2930. But he was out of sight at the time you heard the firings?—Yes.

2931. Was Holland in sight during the time that you heard all the firing?—Yes.

2932. Had you ever at any time the guns in your own hand?—No.

2933. Neither of them?—No.

2934. Then you never had either gun in your hand at all?—No.

2935. You have mentioned five names, and Garner you say you never saw afterwards. Did you four go home together?—No.

2936. Which way did you go ?—Through the fields.

2937. Alone ?—No, Holland was with me.

2938. The man with the gun ?—Yes.

2939. And the others went home, you do not know how ?—No.

2940. Did you get your share of the 15*l.* for this job ?—Yes.

2941. How much did you get ?—I am sure I cannot tell you. It was 2*l.*, or something like that.

2942. Then it was divided between you all ?—Yes.

2943. And your share came to 2*l.* ?—I might have had 2*s.* or 3*s.* more.

2944. Was the naphtha paid for out of the money first ?—No, it was bought about a fortnight.

2945. Who bought the naphtha. It was you who carried it ?—I bought it.

2946. What did you give for it ?—16*d.* I think.

2947. Were you repaid the 16*d.* for the naphtha ?—No.

2948. Then did you pay it out of the money that you got paid for the job ?—Yes.

2949. Did you carry the naphtha all the way ?—I am sure I cannot tell you whether I carried it all the way or not.

2950. Do you remember Wild's case shortly afterwards ?—Yes.

2951. Was there a meeting of the council about that ?—No, not a council meeting.

2952. Was there a meeting at the "Pack Horse" about it ?—No, not that I am aware of.

2953. Were you present at any meeting at which any resolution was come to, first of all at the "Pack Horse," about it ?—No, not at the "Pack Horse."

2954. Were you present at a meeting in the fields on the 2nd of August ?—Yes, in the brickyard.

2955. Down Croft Lane ?—Yes.

2956. Who summoned you to the meeting ?—George Bailey came to our house.

2957. That was in the middle of the day, was it not ?—Yes.

2958. You were summoned. When you got there whom did you find there. Did George Bailey go with you ?—Yes.

2959. And was Thomas Holland there ?—Yes, he was working at the same yard.

2960. Was he present ?—Yes.

2961. And Joseph Brown ?—Yes.

2962. And William Singleton ?—Yes.

2963. And Slater ?—Yes.

2964. Then you were council men at that time, were you not ?—I think we were.

2965. Did you come to a resolution that Wild was to be beaten ?—Yes.

2966. You all came to that resolution together ?—Yes.

2967. Were you all together at the time ?—Yes.

2968. There were not some apart from you at all; you were all together ?—No, there were two or three of them. Bailey went away.

2969. That was afterwards, but you were all together when you came to the resolution that Wild was to be beaten ?—Yes.

2970. Although you are a little deaf you heard all that passed ?—Yes.

2971. And all present must have heard too, if you heard, I should think ?—Yes, all the rest that were there heard.

2972. Then was Slater the man to carry it out ?—Yes.

2973. Did you come to an agreement how much money was to be given for the purpose ?—Yes.

2974. Was it 10*l.* or 12*l.*, or 14*l.* ?—14*l.*

2975. And Slater went off to carry it out ?—Yes.

2976. Do you know James Kay ?—Yes.

2977. Have you had anything to do with him yourself ?—Well, I have once.

2978. You did not go to Wild's, did you ?—No.

2979. You were not one of the party ?—No.

2980. Do you know the men who did it ?—No.

2981. Excepting Kay ?—No.

2982. You say that you once had to do with Kay, tell us what that was. Remember you are bound to speak the truth or else you may be punished very heavily for it, and if you have had anything to do with any of these outrages we can give you an indemnity, provided you will tell the truth. Now tell us what you had to do with Kay ?—Why it was over that job of Thornley's.

2983. Now you remember that job of Thornley's ?—Yes.

2984. That was brought before the meeting I suppose before it was resolved upon; you settled that Thornley's bricks should be destroyed, did you not ?—Yes.

2985. Who were present at the meeting when you settled that ?—I am sure I cannot tell you.

2986. Was Slater there ?—Yes.

2987. Was Singleton there ?—I think he went away.

2988. But he was there part of the time ?—I think he was.

2989. And Joseph Brown ?—Yes.

2990. And Holland Cheetham ?—Yes.

2991. You then came to a resolution that Thornley's bricks were to be destroyed ?—Yes.

2992. Were you treasurer then ?—No.

2993. What was it to be given for that job, 10*l.* or 12*l.* ?—Yes.

2994. Which was it ?—I am sure I cannot speak to it which it was now.

2995. You went and took part in that job, I understand ?—Yes.

2996. You and Slater ?—Yes.

2997. Did David Potts go ?—Yes.

2998. And James Kay ?—Yes.

2999. Did you go at night ?—Yes.

3000. And you destroyed some bricks, did you not ?—Yes.

3001. Do you remember how many you destroyed ?—No.

3002. You destroyed all that you could, perhaps ?—Yes.

3003. Then had you your share of the money for that ?—Yes.

3004. Who paid you ?—Slater, I think.

3005. What was Slater then, was he president or treasurer ?—I think he was treasurer then.

3006. But he paid you your share ?—Yes.

3007. Now you have had to do with James Kay on other occasions, have you not ?—No, no others.

3008. No others at all ?—No.

3009. What other jobs of this sort have you done; you had better speak the truth ?—I know no other jobs.

3010. Do you mean to tell me that you have never been concerned in any attempt to injure or any injury to property besides those that you have mentioned ?—No.

3011. Any thrashing of men ?—No.

3012. Needles ?—No.

3013. Nothing of the sort ?—No.

3014. That you will swear, will you ?—Yes.

3015. Now just think; you had better be careful. You have been a union man for 14 years, you say ?—Yes.

3016. You have known other cases brought before the union, I suppose ?—No, I do not.

3017. Do you mean to tell me that they do not constantly bring before the unions cases where the masters have been taking non-union men, or refusing to take union men; that is a very common thing, is it not ?—Yes.

3018. How do you generally punish the men who will not take your union men ?—As I stated to you.

3019. As you did in Simpson's case ?—Yes.

3020. Then you have known that done before ?—Simpson's case ?

THIRD DAY.

G. Hulme.

6 Sept. 1867.

3021. The same sort of thing as was done in Simpson's case?—No.

3022. But you say that you have known cases of that sort brought before the union where men had refused to take your union men to work, and then it is brought before the union at a meeting of course?—I do not know that.

3023. But you have heard it done, have you not?—I have heard what I have been speaking about.

3024. But have you not heard other cases brought before the union?—No.

3025. Do you mean to tell me that these are the only cases that you have known brought before the union?—Yes.

3026. That you swear, will you?—Yes.

3027. You have never heard of any other cases at all brought before the union?—Not that I can remember.

3028. But try; your memory will get better as you go on. You must have known cases in such an active union as yours of some master refusing to take your union men. Surely you must have known cases of that sort brought before the meetings?—I cannot speak to it as I know of.

3029. Now come, you must know some cases?—I do not.

3030. Do you mean to tell me that you have never known another case brought before a meeting except those cases that you have mentioned, Simpson's case, Wild's case, and Thornley's case?—Yes.

3031. Are those the only cases?—Those are all the cases I know aught about.

3032. Have you ever heard them talked about?—No.

3033. Never at all?—No.

3034. What do you do at these meetings?—Well, it is not only over these cases, you know.

3035. I do not suppose it is, but if there is a case of this sort, of a master refusing to take union men, surely you have it brought before your meeting and discuss it?—Of course that is right enough.

3036. If it is right enough, by which I suppose you mean that it is reasonable, you must remember some other cases being brought before the meetings besides these three. I see you are thinking; just try and remember. Was there any case at Didsbury, for instance?—No.

3037. At Levenshulme?—No.

3038. Was there any other case at Heaton Mersey besides Thornley's?—No.

3039. You must have known cases of that sort?—I cannot tell you aught. It will be a lie.

3040. I am sure I should be very sorry if you told me anything but the truth; I do not wish you to do anything but speak the truth?—That is all I know.

3041. When you were treasurer had you ever to pay any money for these things?—No.

3042. It is the duty of a treasurer to pay, is it not?—Yes, of course.

3043. The treasurer paid you your share in Simpson's case, and did he also pay you your share in Thornley's case?—No, Slater took that, and Slater paid us; we had nought about the treasurer.

3044. I have already warned you that if you have not told the whole truth you will not be entitled to a certificate of indemnity; if you tell the whole truth it will be given to you at once. There are other witnesses coming. I just give you that warning before putting another question to you. I ask you now if you know of any other outrage which has been sanctioned at a meeting at which you have been present, and if so I ask you to tell us about it?—I do not know.

The witness withdrew.

Mr. J. Simpson.

Mr. JOHN SIMPSON sworn and examined.

3045. (*Mr. Barstow.*) You are a brickmaker, I believe, in Stockport Moor?—Yes.

3046. How long have you made bricks there?—Four years.

3047. Have you ever in any manner contributed to the brickmakers' union?—I used to employ union men.

3048. But have you yourself ever been a contributing member, as brickmakers sometimes are I believe?—I never was a brickmaker myself.

3049. You are a master brickmaker?—I am in another business. I am a master brickmaker and coal merchant.

3050. But master brickmakers do sometimes I believe contribute to the brickmakers' union?—Yes.

3051. You do not?—No.

3052. I believe that in the year 1864 you were in dispute with the brickmakers' union?—Yes.

3053. What was the reason of that?—I have had disputes previous to that.

3054. There was one in 1863, I think?—Yes, but the dispute commenced previous to that.

3055. I do not quite know what it is. Did that dispute result in an outrage of any kind?—No, it resulted in my having to pull down all my sheds, and everything. The men left me and I had just erected new sheds, and I had to pull them all down.

3056. (*Chairman.*) When was that?—That was in 1860. That was at another place altogether—that was at Heaton Moor.

3057. (*Mr. Barstow.*) Will you tell us what that dispute in 1860 was about?—The dispute originated in this way. I employed all union men and the burner's name was George Bailey, and he told me that he would destroy all my bricks that were in burning.

3058. Is George Bailey a member of the Stockport brickmakers' union?—Yes.

3059. Why should George Bailey tell you he would destroy all your bricks?—George Bailey at the time that I took this yard was recommended to me by the person that owned the land. I had only had it a few months before this person that owned the land gave me a reason to leave and set the brickmaking to George Bailey, and he wanted me to give the yard up to his next employer.

3060. George Bailey wanted you to give up the yard?—Yes.

3061. And you declined to do so?—Yes.

3062. And he said then that he would destroy your bricks?—Yes, and I had also complained about his not kilning the bricks when they were dry, and wanted to go into the kilns. There were several things of that sort.

3063. He was not a satisfactory servant?—No, he was not.

3064. What resulted upon that dispute between you and Bailey?—I tried to discharge him, and I called a meeting of the men about it in the yard, and they held a meeting in Parson's Lane; but then I was asked to attend a general meeting to be held at the "Pack Horse" in Stockport, and I did not hear what was said in the room. I was asked to retire every time that Bailey was to speak. But however the finish of it was that I was to take him back again, and that if he did destroy the bricks they would discharge him.

3065. Whom do you mean by "they"?—The union.

3066. How many were present at the meeting?—I should think there were 100.

3067. It was a general meeting then?—Yes.

3068. Did Bailey continue in your employ?—Yes.

3069. And how did he go on after this?—I had occasion to go to Liverpool to the assizes, and when I came back I could almost see over the top of the kiln. It should be about 12 feet high, but he had run it so low that I could almost see over the top. He burnt it too much.

3070. The long and the short of it is that he did not burn the bricks properly?—No.

3071. Then did you discharge him?—He went away then. I forget almost how he went, but, however, they sent me another man in his place.

3072. Who are "they"?—The union.

3073. You could not then take another man yourself?—Oh no.

3074. Did you try to do so?—Well, I tried to employ my own moulders at the commencement, but it was no use trying again. They told me there was only one burner out of employment, and that was a man they called Joseph Tomlinson, I believe his name is, and I had to take him.

3075. Did you look about yourself for another burner or did you go to the union for another burner?—The men that I had in my employ told me that there was only Tomlinson out, but I am not aware that I did look for anyone.

3076. You went directly to the union for a burner?—No I did not go directly to the union for a burner. I asked my own men that I employed who else I could have, and Tomlinson came to me, and said he was the only man out of employ, and I engaged him, but I knew before he came that he was the only one. It is always known who is out of employ and who is not.

3077. What happened after that?—After this, as I told you I had notice to leave this place, and I had a large quantity of clay cast, and I put up sheds to make this clay before I went away, but after working three weeks in these sheds they fined one of the moulders 5*l.* for having a boy carrying off and paying him 6*s.* a week. That was against the rules. They should pay them 9*d.* a thousand at that time, and because he would not pay they said I must pay it, or the yard should not go on.

3078. And you did not pay I suppose?—No.

3079. And then the men struck?—Yes,

3080. When the men struck did you try to get other hands?—I did not, I kept expecting them to come back.

3081. Why did you not try to get other hands?—I was daily expecting them to come back. They came back in about a fortnight and they demanded from 30*l.* to 40*l.* before I could have anyone back again to pay the wages and the fines.

3082. The men demanded the fine and their wages for the time they were out of work?—Yes.

3083. And you would not pay it?—No.

3084. That amounted to between 30*l.* and 40*l.*?—Yes.

3085. Did you then try to get other hands?—I tried to get men to burn the bricks that they had left. They left all the bricks that they had made unburned.

3086. What sort of men did you try to get?—Brickmakers.

3087. Union men?—No, I did not try to get union men.

3088. Did you try to get non-union men?—Yes.

3089. Did you succeed?—No.

3090. You could not get them?—No.

3091. How long did you try?—For eight or nine weeks.

3092. How was it that you did not succeed?—There was no one durst come near the place to burn.

3093. How do you know that?—Because I asked a brick burner that was breaking stones on the road. I do not know his name, but he was a stone-breaker in the neighbourhood of Heaton, and he was an old brick burner, but he durst not come he said. He would have got five or six times the wages that he was getting at his own work, but he dared not come.

3094. Do you remember trying anyone else?—I do not; I know I was endeavouring, but I cannot say that I asked anyone else; and I know I was listening out all the time, but the bricks were many of them kilned, and there was no fire put to them, and they were spoiling; at last I got the moulder who was fined and who continued in my employ to burn them. He was my foreman in the yard.

3095. Why could not you have done that at first?—He was the same as everyone else; he was afraid. I had to stop up with him then and get three or four men to be with him then all the time that he was burning.

3096. Then did you burn all the bricks you had kilned?—Yes.

3097. Had you any difficulty in disposing of them?—No; I used them myself for my own buildings.

3098. Did anything happen upon that between you and the union men?—No.

3099. Then is that the end of the story of 1860?—Yes, that is the origination of my dispute with the union men. I never had a dispute with them about the wages in any shape or form.

3100. You have always paid union prices?—Yes, I had never had any dispute with them about wages up to that time; I do not pay them now.

3101. That was at Heaton Moor, was it not?—Yes, near Heaton Chapel.

3102. Then you left Heaton Moor and came to Stockport?—Yes.

3103. In what year did you come to Stockport?—In 1863, in the beginning of January.

3104. You seemed to have been troubled by the union very soon after you came to Stockport?—Yes.

3105. How was that?—I and my father-in-law bought two fields, and we were told that we could not make bricks until we settled this claim of the union, so we sent the bricks to be made by a man of the name of Thomas Dunkley.

3106. Is Thomas Dunkley a member of the union?—No; I paid him the club price and 4*d.* per thousand for management over the club price.

3107. At this time did you employ union men as well as non-union men?—Not at the first. After they had been at work a few weeks, the union men had several meetings, and they consented to come to work with him. They worked with him a few days, and then left again. They promised at last to take Dunkley in, and I lent him money to enter the society, but when he got to the club room they would not admit him in nor have his money, and they sent him back.

3108. Was that the only cause of dispute between you and the union in 1863?—That was the only cause.

3109. I believe some injury was done to your property early in May 1863?—On the 8th of May 1863.

3110. Will you describe that?—Early on the 9th of May I was awakened and told that all the bricks in the yard were destroyed. That was on the morning of the 9th of May. I was knocked up.

3111. Did you go to the yard?—Yes.

3112. What did you find there?—We found about 25,000 bricks damaged and spoiled entirely. About 12,000 of them we made use of, which were only partly spoiled.

3113. What was the money value of those bricks?—Perhaps there was 12*l.* worth of damage done to the bricks and about 15*l.* worth of damage to materials. It is not altogether the damage to the bricks, but you have the labour of removing them and preparing your ground over again.

3114. Then you estimate the whole amount of damage done to you on that night at 27*l.*?—Yes, from that to 30*l.* At the same time they cut my barrows to pieces. I had six new barrows made, and they cut each strain in two, and the trundles were all cut, and the tables and tressels were cut with a saw. They were all cut, everything that we use.

3115. You gave information to the police, I suppose?—Yes.

3116. And was anyone apprehended?—No.

3117. You have no information as to who did it?—We had our suspicion.

3118. Had you your suspicion of any individual man?—We had suspicion of three or four men who have been up here, and we communicated our suspicion to the police at the same time.

3119. Then no one was apprehended?—No; we traced the men across the fields; at that time you know the grass is growing and anyone could trace

THIRD DAY.

Mr. J. Simpson.

6 Sept. 1867.

them through the grass. We traced them within 20 yards of where George Hulme and Slater lived.

3120. Did George Hulme and Slater live near together?—Yes.

3121. How many men had been engaged in this?—Well, there were footprints and different marks of I should think seven or eight of them. Their shoes were lapped with rags, and some were in their stockings, and some one way and some in another: and we found spade handles and things that they had carried for truncheons in the hedges in the neighbourhood of where George Hulme and Slater lived, not far from their houses.

3122. How many men do you think there were?—We thought at the time that there would be six or seven.

3123. That is all you can tell us about May the 8th 1863, is it?—Yes.

3124. The second outrage was on the 17th of June 1864, was it not?—Yes, it was either on the night of the 17th or the morning of the 18th.

3125. That we now know something about?—Yes.

3126. You had a watchman in your employment named Platt, had you not?—Yes.

3127. You had not a watchman in 1863?—No.

3128. When did you put a watchman on?—After the 1863 outrage I got a man to watch the place, and I have had one ever since; sometimes two and sometimes three.

3129. That is of course a very considerable expense to you?—Yes.

3130. What was the first you heard of the damage to your property in 1864?—Very early in the morning the watchman came and shouted out; I heard him before he got to the house shouting out.

3131. How far is your house from your brickyard?—About half a mile.

3132. Did you happen to hear any shots fired?—No.

3133. That watchman is here I believe to-day?—Yes.

3134. You went with him to your brickcroft?—I followed him; he went as hard as he could go back and I followed him. I was there nearly as soon as he was.

3135. Did you find that your sheds had been set on fire?—Yes.

3136. Did you find that any of your bricks had been destroyed?—Yes, very few. They had not destroyed very many.

3137. There was part of a wall thrown down, was there not?—Yes, that was a wall made of green bricks which had been made on the flats.

3138. Were there about a thousand bricks thrown down?—Perhaps about a thousand, not more.

3139. Did the watchman then give you an account of what had happened?—Yes.

3140. At the time?—Yes. I found the watchman's window blown out.

3141. Did you examine his cabin?—Yes; it is a sort of cabin with a fireplace in.

3142. In what state did you find it?—One of the panes of glass had a hole pushed through, and he said that a man stuck a gun and poked it through the place. He saw the gun barrel.

3143. Could you tell whether the window had been broken from the inside or the outside?—The police and myself found the glass inside.

3144. I suppose you can tell us about it without any detail. Could you see that it had been broken from the outside?—Yes, we could.

3145. Had any gun been discharged inside the cabin?—Yes.

3146. Were there marks of a discharge?—We found some small sparrow-shot and some burnt paper.

3147. But you know if a gun was poked through the window of the cabin and discharged in it, you would find a mark on the opposite wall?—Yes, it was very slightly marked just by the side of the chimney-piece; there was not much mark, but there was a slight one.

3148. What was the inside of this cabin, was it plaster or what?—No, it was only brick.

3149. And the bricks, you say, were slightly marked?—Yes.

3150. They were slightly marked on the wall opposite the window?—Yes, just at the angle; they were very slightly touched, and we found a few of the pellets on the mantelpiece.

3151. Were the marks on the wall such marks as small shot would have made?—They were.

3152. From what you say it seems to have been only very small shot?—Yes, it was only sparrow-shot.

3153. Your dogs were not shot, were they?—No. The watchman had just been out. He had a little cur dog, a very small one, and he had just been out, and he had a slip round his neck. There was a kennel round the door, and some one toppled the kennel over, so that it could not get at any one. That was the first alarm we heard. The dog could not get round to bite any one if he had tried. It is a dog that he walks round the yard with just to alarm people. We had a larger dog, but it was one that does not make any noise—one that would not bark at any one, but it would bite fast enough if it could get a chance.

3154. That dog was chained up was it?—Yes, it was chained all the time.

3155. You extinguished the fire at the sheds I suppose?—The man did. The man put the fire out the first thing he did.

3156. Before he came to you?—Yes. That was the reason the men had got away. I was expecting the shed to be fired. I had been waiting up for nearly three months previous to this myself, and I had not been for about two nights, and I told him if they ever fired the shed to put it out the first thing.

3157. Do you know whether you had been watched yourself at all?—Yes, I had been watched.

3158. Do you know who watched you?—I do not know his name. On the morning after we turned out of the house many of the neighbours got up and came out of their houses, and a man walked out of the hedge in front of our door. He would not make them any reply. They spoke to him many a time, but he would not answer.

3159. Did you see the man?—I did not.

3160. Then how do you know?—Because the next door neighbours saw him.

3161. Who lived in the next house to you?—Both in the next house and the next house but two they saw him. I just forget one man's name, but he was a stonemason, and he spoke to him repeatedly. They called out to him and wanted to know the reason of his being there and why he was there, but they durst not go near him to look in his face.

3162. Why dared they not go near him?—I do not know. I suppose they were afraid of being thrashed.

3163. Is that your only reason for saying that you were watched?—Yes, it is.

3164. I think you have told us all about your yard?—We found that our man had shot through the window. Directly the shot was fired he fired, and there was a bullet-hole in the glass. I found a large quantity of paper that they had had for the wadding of the gun which was inside the hut. That shows that the gun must have been close to or that wadding would not be in.

3165. If we suppose that the gun-barrel was really in at the window before it was fired of course the whole contents of the gun must have been inside the cabin?—Yes, we found the burnt paper.

3166. Is that all you can tell us about the yard?—That is all I can tell you about the outrage. Of course I cannot have my bricks used. I have a yard for the bricks and no one will set them.

3167. (*Chairman.*) At this moment?—Yes.

3168. (*Mr. Barstow.*) How do you mean?—The brickmakers pay the bricklayers their wages at any time not to set our bricks.

3169. You cannot sell your bricks?—No.

3170. Your trade is interrupted by the brickmakers?—Yes, it is.

3171. That continues at the present time, does it?—Yes, it is continued to a very great extent.

3172. Have they followed your carts?—Yes, they have followed my carts. I am building a building in Port Wood now, and they followed the carts and called the bricklayers off the job a few weeks since. That is a building for myself.

3173. That is to say, the brickmakers have done so?—Yes.

3174. And called the bricklayers off the job?—Yes; the bricklayers were working for another master, but it was my work. I had let the job to Mr. Henry Barlow.

3175. Is that the only outrage of which you can tell us?—That is the only outrage. I could mention scores of things in connexion with other things.

3176. In all probability they are not within the scope of our inquiry?—No. I may mention this, that Mr. Walford persevered in using our bricks, and they would not allow his carts either to go into the yard or to cart bricks for himself or anyone else. There are master brickmakers in Stockport that are bricklayers, and they sent them notices that if they used our bricks they should not allow them to have any more men. I made the best bricks and they made the commonest.

3177. The other brickmakers told a man who was building that if he used your bricks to front with, they should not have any more inferior bricks from them; is that so?—Yes.

3178. Have you ever been threatened?—No, I have not.

3179. Have you never received a threatening letter?—No. I once met three of the men in the lane and one of them as I passed put his hand on his breast, saying that he would stop my games.

3180. It was only just for you to see I suppose?—That was all.

3181. No names were mentioned?—No names were mentioned. They were looking straight at me all the time and sneering all the time of course. I have had to bring men from other places to do my brickwork. There is a letter I think in court that Joseph Brown sent to Manchester.

3182. To whom was this letter addressed?—I do not know to whom it was addressed. It has no name on, but it was brought to Manchester by two delegate brickmakers.

3183. (*Chairman.*) To you?—No; to men employed by me.

3184. (*Mr. Barstow.*) Did you see them?—I saw the men, but I did not see the letter before the men that were employed by me gave it to me. They took it from this man.

3185. This is only a copy apparently?—No, that is the original; that is Mr. Brown's writing.

3186. (*Chairman.*) Was this letter shown you by them?—Yes, they had gone from my building to a public-house, and one of those men happened to pull this letter out, and one of my men got hold of his arms and the other took it out of his hand, and they ran away and brought it to me. They did not know what it was.

3187. You had men in your employ to whom that letter was addressed?—No, that letter had been sent to some one in Manchester.

3188. (*Mr. Chance.*) Did you give any date upon which this last outrage outrage occurred?—The 17th of June 1864.

3189. Did I rightly understand you to say that you had been up for three months expecting that your shed would be set on fire?—I am not certain exactly how many months, but I had been there for a long time. I had been there somewhere approaching to three months, I know it was long enough before they commenced making bricks outside, because I had been stopping up previous to the summer season commencing.

3190. Are your brickworks going on now?—They are going on now.

3191. Are you employing non-union men there?—Yes, they have several times admitted my non-union men into the club to take my men from me.

3192. You mentioned that in the year 1860 your moulder was fined 5*l.*?—Yes.

3193. Did your men at that time know that you had nothing to do with it. They knew very well that I had nothing to do with it. They said I could make him pay if I thought proper. The reason was that he was my foreman, and since then we have been in other ways connected.

3194. (*Mr. Barstow.*) Then do I understand you that your non-union men had become union men and left your service?—Some of them.

3195. And you had had to get fresh hands?—Yes, and they have offered to take some of the men that I have now into the union.

3196. (*Chairman.*) How many hands do you employ?—I only employ seven or eight at the present time; but at the time of the outrage I employed perhaps 13 or 14; that is to say in brickmaking. I may mention that we found a two-gallon bottle about half full of naphtha after the 1864 outrage, and a large can which they had been throwing it on with, and a lot of gingerbeer bottles.

3197. Did you find any bottles?—Yes.

3198. Did you examine the contents of them?—Yes.

3199. What did they contain?—Naphtha, all the bottles had had naphtha in.

3200. How many bottles did you find altogether?—There would be nearly a gallon of naphtha left in the two-gallon bottle.

3201. How much was there in the other bottles?—The other bottles were all empty.

3202. How many were there of the other bottles?—I should think there would be half a dozen altogether.

3203. Half a dozen empty, and one you say half full?—Yes.

3204. Those you found you say the morning after the outrage?—Yes, the police took them all to the police office.

3205. (*Mr. Barstow.*) I suppose they had poured the naphtha out of the large can into those small bottles for the convenience of pouring the naphtha on the shed?—Yes, the man saw them pouring it out of bottles or a can on to the shed, and we found a large leather lace which they had used to sling it with.

3206. (*Mr. Chance.*) Those bottles had not been left by your men on the premises?—No, the two-gallon bottle had the name on of "Baker, spirit merchant, Stockport," and "two gallons" it said on the bottle. The men that retreated in 1864 went exactly the same way that the men in 1863 did. We traced them all the way, both I and the police. It is impossible for a stranger to have gone up those roads, because it was a bye road, a near cut to the top of Hillgate, in which anyone unacquainted with it would have been quite lost.

3207. (*Mr. Barstow.*) George Hulme told us that he lived at the top of Hillgate?—George Hulme, and Slater, and 20 others I could name live in that direction.

3208. (*Chairman.*) Have you ever on any other occasion had an attempt to set your buildings on fire?—We have never had them set on fire.

The witness withdrew.

PETER PLATT sworn and examined.

3209. (*Mr. Chance.*) Are you a brickmaker?—Yes.

3210. Are you in the employment of Mr. John Simpson of Stockport Moor?—Yes.

3211. Were you in his employ at Botchton in the year 1864?—That was when they first commenced.

3212. Were you a watchman in his employment in the month of June 1864?—Yes.

3213. Did you live in the brickyard?—Yes.

3214. Was there a sort of cabin in the brickyard?—Yes.

THIRD DAY.
P. Platt.
6 Sept. 1867.

3215. Did you live there by yourself?—No, my son was with me.

3216. What is the age of your son?—He is 17 years of age.

3217. Do you remember the outrage upon Mr. Simpson's property upon the night of the 17th of June?—Yes.

3218. Was your son in the cabin with you at that time?—Yes.

3219. On the night of the 17th of June did anything disturb you?—Yes.

3220. What was it that disturbed you?—It was the dog that first disturbed me.

3221. One dog?—Yes.

3222. (*Chairman.*) Is that your cur?—It was one that I had at the door.

3223. A little dog?—Yes.

3224. (*Mr. Chance.*) How many dogs had you on the premises?—Two.

3225. Where was the other dog?—We had three dogs.

3226. Where were the other two dogs?—There was one at the end of the shed and the other at the back side of the shed.

3227. Were those other two dogs in kennels?—Yes.

3228. Both of them?—Yes.

3229. About what time of night was it that you were disturbed?—I cannot positively say what time it was. We had no clock in the place.

3230. Was it late at night?—It was late at night; whether it was turned 12 or not I could not say.

3231. Was it dark?—It was very dark; it had been moonlight, but the moon had got overcast.

3232. Were you in bed at the time?—No, I was sitting by the fireside at the time.

3233. Had you any arms with you?—Yes.

3234. What had you?—A revolver and a gun.

3235. Were they loaded?—Yes.

3236. Had you them in the room with you?—Yes, close by me.

3237. How many rooms has the cabin?—Only one.

3238. And how many barrels had the revolver?—Six.

3239. Were they all loaded?—Yes.

3240. With ball?—Yes.

3241. And what was the gun loaded with?—With pillets.

3242. Does "pillets" mean shots?—Yes.

3243. When you were disturbed by the dog, what did you do?—When I was disturbed by the dog I got up and opened the door to see what was the matter. When I opened the door there was a man came and struck at me with a thing which appeared to be about a yard long and bade me go in again.

3244. (*Chairman.*) Was it a stick?—Something like a stick.

3245. (*Mr. Chance.*) Did you see whether there was more than one man there?—Yes, I could see the shadow of two men.

3246. Upon his telling you that what did you do?—Then there was one man made his way up to the window.

3247. You say they told you to go in, did you go in?—Yes, I backed forward into the place then.

3248. And did you shut the door?—I closed the door.

3249. Had you your revolver with you?—Yes.

3250. Then what took place?—Then one of those two played to the window, popped his gun barrel through the glass, and fired inside the place.

3251. At the time that the gun was put into the window, where were you?—I was just at the back side of the door.

3252. But you were in the room?—Yes.

3253. The door opens into the room, does it?—Yes.

3254. What took place after that?—When he fired inside the room I had the revolver placed on a dresser close to, and I picked up the revolver and fired back through the window at them. Then I fired back again at them. Then they took themselves back to the place where they upset the dog's kennel, and they stood outside there; as soon as they stood there I got outside as soon as I could and I fired again at them there.

3255. With what?—With the revolver. As soon as I fired out again at them there, they then played off through the fence and down the broad road for taking their way off.

3256. When you went out and fired at them, did you see more than two men?—No; when I went out and fired at them, I fired at them there, and they then took their way off towards the broad road and went through the fence there and down the broad road; then I turned my head again and I saw two men knocking the green walls down. I played off towards them. They were knocking the green walls down, and as soon as I thought I was within shot of them I fired at those two, but they ducked under the green walls and went off as hard as they could drive. I then turned my head again, and cast the shadow of three men in the shade of the fire at the bottom end. I then called to this boy of mine, and said "Jonathan, bring that gun out." He ran out with the gun, but just as he got out he tumbled over a lump of coals with the gun and the gun got lost, and I could not find the gun for some time. He lost the gun out of his hand, and I could not find it for a minute or two. Then I played out of the shed again and as soon as I thought I was within shot again I fired there again, and as soon as I fired there those three played off altogether.

3257. Where were those three?—They were at the bottom end of the shed, setting in the shade of the fire. (I could see the shadow of them) with a degging-can pouring out the naphtha, the naphtha being all on fire. So soon as they did that I played off then to the dog kennels, and I loosed all the dogs. Then I made my way into the broad road and looked round awhile to see whether things were settled, and as soon as I thought things were settled I pulled my shoes off and then I ran to the master's house as hard as I could run.

3258. Then you went to your master and told your master what had happened?—I went and knocked at the door as hard as I could knock. I did not stop to tell him what had happened, but I made my way back again as hard as I could, and he came running after me in the course of a short time.

3259. Then you succeeded in putting out the fire?—Yes.

3260. Do you know how many men there were altogether there that night. How many did you see?—I saw the shadow of seven of them; there was two at the door, two knocking the green walls down, and three at the shed.

3261. Are you sure you were not mistaken about that, could you be deceived by the shadows?—No; I am almost positive that there were seven of them.

3262. Did you know any of them?—No, I did not, not to swear to them.

3263. Then did you look after them to see what there was; did you find any vessels of any kind in the shed afterwards?—We found some bottles and things that they had had their naphtha in.

3264. What was it that they had their naphtha in?—They had half-a-gallon bottle for one, and two or three small bottles. It was a half-gallon or gallon bottle.

3265. Was there naphtha in the gallon bottle?—Yes, in the large bottle.

3266. Did you find any matches there?—No.

3267. Do you know how many times you fired the revolver altogether?—Yes.

3268. How many times did you fire the revolver altogether?—Three times.

3269. And how many times did you fire your gun?—Once.

3270. And there were four shots fired by you altogether ?—Yes.

3271. You are sure of that ?—Yes.

3272. How many times was the gun fired by the men who came upon the premises ?—Only once ; only that time as they put it through the glass.

3273. We have been told that there were slight marks of shots upon the wall of the room ; was that so ?—Yes, there were, such as sparrow-shot would make.

3274. Did you notice what had been done to the kennels where the other two dogs were ?—There was nothing done to the dogs.

3275. Or to the kennels ?—Nor to the kennels ; only that dog kennel that was at the house ; they up-ended that dog's kennel.

3276. But how was it the other two dogs did not give any warning ?—There was one dog, it is not a one for to make alarm ; it is more for taking hold. If he gets hold he will stick there.

3277. (*Chairman.*) Did the other dog bark ?—No, the other dog was inside the end of the shed.

3278. Was he a dog that barks ?—There was only this dog that made any alarm at the door ; the others were at the far off end about 50 yards off.

3279. (*Mr. Chance.*) When they fired the gun through the window you must have been in the room ?—Yes.

3280. That was the only place that you could be in when they fired the gun ?—Yes.

3281. After you went back after their threats did you try to come out again ?—Yes.

3282. Did you try to force the door open ?—Yes.

3283. Was it held by some man on the other side ?—It was held for a small time, just while he shot through the window, and then they made their way off.

3284. It was after you tried to get out and to force your way through that the shot was fired through the window ?—Yes.

3285. Were you in Simpson's employ when the bricks were destroyed in the year 1863 ?—No ; I was put on at the time after it was done.

3286. How long have you been in his employ altogether ?—About four years.

3287. (*Chairman.*) You say you saw one man who was near the cabin with the gun. Did you see more than one of them ?—I saw the shadow of two men.

3288. With guns ?—No, not with guns.

3289. One of them fired through the window ?—Yes.

3290. Did you see any of the other men with the gun ?—No.

3291. It was very dark, was it ?—Yes, at that time it was. They had picked their opportunity when the moon was just gone overcast.

3292. Had you been aware of any attempt being made before that ?—No, I was not aware of anything occurring of the sort.

3293. Have you been a watchman there long ?—About four years.

3294. And are you in the habit of having your revolver loaded every night ?—Yes.

3295. And a gun besides ?—And a gun besides.

3296. Was it a single-barrelled gun ?—It was a single-barrelled gun.

3297. What makes you keep them loaded ; is it for fear of outrages ?—Yes.

3298. And how long have you been in that fear of outrages ?—Ever since I was put on. I was put on after the first damage was done.

3299. (*Mr. Barstow.*) Have you ever been disturbed except this time ?—No.

3300. Did you show the inside of the cabin to the police ?—Yes.

3301. To what policemen ?—Fosbrooke was one, and George Marshall another.

The witness withdrew.

WILLIAM SLATER recalled and further examined.

3302. (*Chairman.*) Did you go last evening to the "Pack Horse ?"—Yes.

3303. You told us that you are president of the Stockport union, and as president have you the key of the box containing the books of the society ?—Yes.

3304. And the secretary possesses the other ?—No, the treasurer, Singleton.

3305. Singleton the treasurer has the other key ?—Yes.

3306. Whom did you go with ?—With Detective Sudley.

3307. You went to the "Pack Horse ?"—Yes.

3308. Did you bring the box ?—We helped him with it to the cab.

3309. That is the box, is it ?—Yes.

3310. Ought that box to have contained all the books of your club ?—Yes.

3311. And you brought it here ?—No, I did not bring it here.

3312. You gave it to him to bring in the cab ?—Yes.

3313. You did not see it opened ?—Yes, I saw it opened.

3314. Here ?—No, not here.

3315. Where ?—At the "Pack Horse."

3316. Before it was brought to-day ?—Yes.

3317. At the time it was opened was that book in it ?—No.

3318. It ought to have been there ?—It was taken out on Wednesday morning.

3319. By whom ?—Me and the other officer, Singleton.

3320. Why did you take it out ?—We gave it to another man to take care of.

3321. What was the name of the other man ?—Matthew Ainsworth.

3322. Why did you do that ?—We did not want to bring it here.

3323. Did you take out any other book ?—Yes.

3324. What book ?—A small minute book.

3325. This book (*showing the same*) ?—No, I believe that it has been made away with.

3326. You have not seen it since ?—Not since Wednesday morning.

3327. You took out that book also ?—Yes.

3328. To whom did you give it, to the same man ?—Yes.

3329. Who is he ?—A brickmaker.

3330. A member of your union ?—Yes.

3331. Where does he live ?—In Heaton Norris.

3332. How many books did you give him ?—Two.

3333. This one and the other minute book ?—Yes.

3334. Does that minute book contain the entries of the meetings that were held of your club ?—Yes.

3335. Is it a minute book of the meetings ?—Of the resolutions passed by the body.

3336. How many years did it go back ?—I cannot say.

3337. Can you give me any idea ; did it go back as far as 1860 ?—I daresay it did.

3338. Little more ?—I am not sure.

3339. Would it go back as far as 1857 ?—I cannot say.

3340. It might ?—I had nothing to do with it in 1861.

3341. No, but you knew the book ?—Yes.

3342. Did you never have the curiosity to look at it to see where it began ?—No.

3343. You think that it would go back as far as 1860 ?—Yes.

3344. That would contain an account of all the meetings and resolutions passed ?—Yes.

3345. The council meetings as well as the regular meetings ?—No, not every resolution of the council meetings.

THIRD DAY.

W. Slater.

6 Sept. 1867.

3346. But the quarterly and fortnightly meetings?—The quarterly meetings.

3347. Would it contain the fortnightly meetings?—No.

3348. What book would contain the council meetings?—That book would contain part.

3349. If you had a council meeting in a field and not at the "Pack Horse," would that book contain it?—No.

3350. Was it not the duty of anyone to enter it after it took place?—I never knew it to be entered.

3351. If any council meeting happened at the "Pack Horse," it would be the duty of some one to enter it there?—Some meetings, not all.

3352. You say it would be the duty of some one to enter the fact of a council meeting and the resolutions that took place at the "Pack Horse?"—Not every resolution.

3353. What difference did you make?—There were some resolutions which did not matter anything.

3354. Which were unimportant?—Yes.

3355. But such a resolution as to do the things which we have been talking of in Wild's case or Simpson's case would naturally appear there?—No.

3356. Is that of no importance?—Yes; but we only put regular minutes to go by for the future.

3357. What was the object you had in taking away a minute book of that sort, unless it contained something you did not wish to bring here. Now, I ask you what it did contain, you must know?—It contained a deal of things.

3358. There were some things in it, that you did not wish us to see or the world to know of, as the book was taken away. What is the nature of things that it contained which you did not want the world to know of, and for which you took it away. You must know, and you must answer that question, everybody will have an opinion about it and you had better answer it at once?—I cannot answer.

3359. You can surely, you and Singleton did not want that book to be brought here, and did not want us to see the nature of the resolutions passed at your meetings. Now I ask what was the nature of the resolutions which you did not want us to see?—By referring to the cash-book it would tell you.

3360. Is there any doubt whatever that resolutions in reference to any outrage would appear in that book?—I never saw one in.

3361. What was it you wanted to conceal?—We might have had some bother with the masters not allowing the men to go to work again.

3362. Would those appear in the book?—Yes.

3363. If you came to a resolution which you did at regular meetings of that sort, that Simpson's property was to be injured or Wild thrashed, did not you put it down?—No.

3364. There was no allusion to the name of Simpson or Wild in that book?—Yes; but not as to destroying his bricks.

3365. It would appear in the book as some resolution with respect to Simpson and Wild, but what was to be done did not quite appear, is that so?—There was a resolution passed that the men should not work for Mr. Simpson till he had paid the fine that was put on to him, but there was nothing about his property being destroyed.

3366. Supposing there had been a resolution that his property was to be destroyed would nothing appear at all of it?—No.

3367. Nothing at all?—No.

3368. What was your reason for wishing us not to see it?—It was not my objection personally.

3369. You had a strong desire if you helped to take it away. You must know what was the desire operating in your own mind that made you help to take it away. You must be consistent and tell the truth. It is obvious that you had some reason?—That was all the reason, because there were some things in it against the masters which we did not wish to be seen.

3370. There were resolutions against the masters which you did not wish to be seen?—Yes.

3371. Whenever there was any resolution for any outrage it would not appear?—No.

3372. Would a resolution appear for the payment of money for an outrage?—No.

3373. You came to a resolution that 15*l.* should be given in the case of Simpson?—Yes.

3374. Would nothing appear at all in the book about the resolution as to that amount of money?—No, there would not.

3375. Nor in any of the cases?—No, there would not.

3376. You have been secretary?—Yes.

3377. In what year?—In 1861 I believe I was; I am not sure.

3378. You were secretary in 1861?—Yes.

3379. This book begins in 1862. Where is the book of the disbursements of 1861; is it here?—I do not know.

3380. It ought to be in the box?—Not that I am aware of. It may have been done away with while I was away.

3381. What I ask you is this. Ought there not to be a book containing those entries of payments in 1861?—Yes, there ought.

3382. There are some entries before 1862; but I do not see myself the date of 1861. It is fairer to you to ask you to look at it and see if I am right. There are some entries previous to 1862 without a date?—(*The Chairman handed the book to the witness.*)

3383. Is there any part of that which you are now looking at in your handwriting. Look at the beginning because that is nearer to 1861. What year are you in now?—In 1867.

3384. Did you write anything in 1867?—Yes, there are some few items here in my writing.

3385. There is no entry there of yours in 1861, is there?—No, I cannot see one.

3386 The first date written is 1862?—Yes.

3387. Why were you afraid of this book being seen?—There was a deal of money paid that we could not explain what it was paid for.

3388. There was a deal of money that may not have an explanation on the face of it as to why it was paid, but is there anything which appears in the book that you are afraid of being seen; you must know?—Not that I am aware of.

3389. What made you take the book away; you were expecting this inquiry to take place. You went to the box with this other man, Singleton having the key of the box, and you took out two books and no more?—Yes.

3390. You told me why you took away the minute book; now I ask you why you took away this book. You must know; you had better tell at once?—There are things in it we did not wish anyone to see.

3391. Now as you say there are things in the book you do not wish anyone to see, and the book being here I ask you to point them out. (*The Chairman handed the book to the witness.*)

3392. Are they in your handwriting?—No, there are none in my handwriting, it was whilst I was in prison.

3393. Are those the only entries you did not wish to be seen?—Yes, it was not me personally who did not wish them to be seen.

3394. You helped to take it away. Who did not wish them particularly to be seen, Singleton?—I cannot say Singleton particularly. On Wednesday everybody met.

3395. Who met?—Every one summoned here met on Wednesday morning.

3396. You being one?—Yes.

3397. Was Singleton one of them?—Yes.

3398. Was Joseph Hulme one of them?—No, he was out of town at the time.

3399. Was Bailey one of them?—Yes, George Bailey.

3400. Was Holland?—Yes.

3401. And Holland Cheetham?—Yes.

3402. And you met on Wednesday morning?—Yes.

3403. Previous to coming here?—Yes.

3404. Was Robert Bailey there?—Yes.

3405. And you then discussed as to what books you would leave in the box and what you would take away?—Yes.

3406. And you settled that these two books should be taken away?—Yes.

3407. And you were not the person who particularly wished to take them away. Who proposed that the books should be taken away?—I cannot say.

3408. Was it the general feeling, did all of you agree?—Yes.

3409. What was the reason, you had better tell us; some of the others will tell us, if you do not tell us the truth?—There were some of the entries of sundry expenses which we could not explain.

3410. Somebody said there were so many items about sundry expenses?—Yes.

3411. Who do you think said that?—I cannot say.

3412. Yes you can, somebody we have no doubt heard it?—I do not know whether there was anyone there who should hear it.

3413. There were several items of sundry expenses which you did not wish to be seen?—Yes.

3414. We were told yesterday by Joseph Brown that when money was paid for an outrage, such as Simpson's case, it was put down under the head of "sundry expenses," that is so, is it not?—I do not know.

3415. Do not you know that it was? Was it known only to Joseph Brown, who told us yesterday that when payments were made for outrages such as in Wild's, Simpson's, and Thornley's cases, they were put in the book under the head of "sundry expenses"?—I have never seen it in this book.

3416. But you have seen it in a book?—No, I never have.

3417. Your only reason is what was given at the meeting of you all that this book should be taken away because there were entries in that book of sundry expenses that you did not wish the world to know?—It might have been since those three outrages that I had anything to do with.

3418. You told me that in the meeting on Wednesday last it was stated that that was the reason why the book should be taken out of the box, because there were entries of sundry expenses in it that you did not wish the world to see. That you have told us?—Yes.

3419. Have you any doubt of the sundry expenses being what Joseph Brown told us they were yesterday?—No.

3420. Have you looked through that book?—Yes.

3421. Can you now point out the entries of the sundry expenses in the book?—Yes.

3422. Show me one?—(*Here the witness handed the book to the Court.*)

3423. "Sundry expenses 2*l.*" Whose handwriting is that in?—Joseph Brown's, as near as I can tell.

3424. And "sundry expenses" on the opposite side of the page "4*l.*" that is in his handwriting?—Yes.

3425. "Sundry expenses" a little lower down "2*l.*," now this is July 29th, 1865. Sundry expenses I see on the page before 3*l.* 15*s.*, is that all the same handwriting, it looks to me the same?—I believe it is.

3426. "Sundry expenses 1*l.* 15*s.*, Sundry expenses 1*l.* 15*s.*, Sundry expenses 1*l.* 15*s.*," all those that are put down under that head relate to outrages you tell me?—No, I will not say that.

3427. You just said so?—I will not say it was every one.

3428. You have been both secretary and treasurer?—Yes; there was never any sundry expenses booked when I was secretary.

3429. You never made any entry of this sort of thing?—No, there has been money paid to mine and Cheetham's wives while we were in prison.

3430. That I am aware of. "Sundry expenses 1*l.* 15*s.* Sundry expenses 3*l.* 15*s.*, 1*l.* 15*s.*," and so on. Besides payment to your wife while you were in prison you have told me the sundry expenses you understood had been money paid for outrages. You told me so just now?—It perhaps might have been booked in that way.

3431. Have you any doubt about it?—I cannot be sure that it is so.

3432. Have you any doubt about it?—Yes, I must have a doubt about it.

3433. If the money was merely money paid to your wife for her support while you were suffering imprisonment that would not be the reason for taking away the book and preventing the world seeing it. Was that the reason alleged, that it contained these heads of sundry expenses which were money paid for outrages?—I daresay it is.

3434. Were not you treasurer in August 1864?—Yes.

3435. You were apprehended on the 3d of August. Supposing there was an item of 50*l.* drawn from the bank at any time, ought it to appear in that book?—I believe it ought.

3436. You were apprehended at the time and probably you would know, but if on the 5th of August 1864, you being apprehended on the 3rd, 50*l.* was drawn from the bank, that ought to appear in this book?—Yes.

3437. Whose duty would it be to enter it?—The secretary's.

3438. Who was the secretary at that time?—Joseph Brown.

3439. If on the 18th of August another 50*l.* was drawn, that ought to appear in the book?—Yes.

3440. In fact, whatever sum of money was drawn from the bankers ought to appear on this side as a receipt in the book?—Yes.

3441. If money was paid for an outrage, as far as you know, it must appear in some form or other to make the balance right before the auditor would allow it?—It ought to do.

3442. So I should have imagined. Now, as to the meeting on Wednesday, what time did you meet in the evening?—In the morning, previous to coming here.

3443. What else took place at that meeting besides the arrangement to take away two of the books?—Receiving money to defray the expenses for coming here.

3444. What else? Did you discuss the evidence you were to give?—No, I believe that was never mentioned.

3445. Are you quite sure?—I cannot swear to it.

3446. You were all of you union men who were acquainted with some of these outrages which have been mentioned; do you mean to say that you did not discuss them?—I believe not; me and Cheetham discussed them between us two selves.

3447. When did you do that?—On Wednesday.

3448. At this general meeting where you were all present, and agreed to take away two of the books, do you mean to say it was not there mentioned about the outrages that you would be called to speak upon?—No.

3449. There was nothing said?—Not that I can think of.

3450. Think again?—Not as to giving any evidence.

3451. There was some little discussion about the thing, no doubt; never mind the evidence, but there was some discussion about Simpson's case?—No, there was not.

3452. Wild's case of course you talked about?—No.

3453. Did you talk about Thornley's case?—No.

3454. Or any other?—No.

3455. Was the sole discussion then as to what books you should leave in the box, and what books should be taken away?—Yes, and receiving of money.

3456. From whom?—From the treasurer.

3457. Do you mean to say you have been paid by your treasurer?—Yes; we drew the money to defray our expenses here.

3458. You drew money from the treasurer of the union to defray your expenses here?—Yes.

THIRD DAY.
W. Slater.
6 Sept. 1867.

3459. How much ?—*5l.*

3460. Was that the sole discussion that took place, namely, the amount of money you were to draw from the union for coming here, and what books you were to take away ?—Yes.

3461. How long were you about it ? — Perhaps half-an-hour.

3462. You say that you had some conversation with Cheetham about the evidence you were to give here ?—Yes.

3463. Had you conversation with anybody else ?—I believe not.

3464. Will you swear you had not ?—I cannot swear, perhaps somebody overheard me.

3465. Have you since you have given evidence had some conversation with people about the evidence you have given ?—Yes.

3466. Have you seen Singleton since, and told him what you said ?—Yes; he saw it in the paper what I said.

3467. Never mind what he saw in the paper; have you yourself told him what you said ?—Yes.

3468. Have you told Joseph Brown ?—Yes.

3469. Whom else have you told ?—I believe I have told them all.

3470. Then you have had a meeting ?—No; we have all gone off together at night.

3471. And you told them what you said ?—Yes.

3472. You had this talk with Cheetham as to what you should say ?—Yes.

3473. You were examined the other day about Thornley's case ?—Yes.

3474. I think you stated at that time that you were present at the meeting before the injury took place ?—Yes.

3475. You, and Brown, and Singleton, and Hulme ?—I believe it was. I am not sure whether Singleton was there or not; I believe he was.

3476. Just remember yourself. We understand that you and George Hulme, and David Potts, and James Kay, were at a public-house at Heaton Norris ?—Yes.

3477. And you went together to the place ?—Yes.

3478. That was about three or four miles off ?—Yes.

3479. You were present when those bricks were destroyed ?—Yes.

3480. It is true that George Hulme, and David Potts, and James Kay were also present ?—Yes.

3481. I asked you about Simpson's case. I am not going to examine upon it again, because you told us in detail about it, but were you concerned in any damage to Simpson's property in the year before in 1863 ?—You asked, and I told you I did not know.

3482. You were not concerned in it ?—No; I never heard of it.

3483. You were not present at any resolution that you remember that took place about it ?—No.

3484. Is Hyde in the Stockport union district ?—No; it is not.

3485. I ask you again, have you told us all the outrages in which you were concerned ?—Yes.

3486. And all the meetings that took place at which they were proposed ?—Yes.

3487. Were you in office in 1863 ?—No, I was not in office at all in 1863.

3488. Do you remember the council ?—I do not remember whether a council was formed in 1863.

3489. What is this book (*handing the same to the witness*) ?—It was first bought for the Amalgamation Society between Manchester, Oldham, and Stockport. That has been broken up some years.

3490. Was that book in the box; did you take it out ?—No.

3491. Was it kept in the box ?—Yes.

3492. What were those leaves torn out for ?—I do not know.

3493. Did you ever notice the leaves torn out before now ?—No, never.

3494. Did you ever hear of an outrage at Adswood ? It is near Stockport, is it not, on the property of a person named John Potts ?—Yes, long before I entered the society.

3495. I mean a more recent one; three or four years ago ?—No.

3496. When was that ?—It was 12 years since, I dare say.

3497. I do not want to go into that, but did you hear of one three or four years ago at Adswood ?—No.

3498. Did you hear of an outrage at Adswood while you were a member of the society ?—No.

3499. Will you swear that you do not recollect anything of the sort ?—I do not recollect it now.

3500. I mean three or four years ago ?—I do not.

3501. Do you remember whether John Potts had any property injured about that time ?—No, I believe not.

3502. (*Mr. Barstow.*) You say you never heard that any outrage was committed upon Mr. Simpson's property in 1863, until you heard of it here ?—No, never.

3503. Have you asked anything about it since you were examined here ?—Yes.

3504. Of whom have you asked anything about it ?—With any of these that were summonsed with me from Stockport.

3505. Have you heard anything about it ?—No.

3506. Does anyone know anything about it ?—No.

3507. You live in Upper Hillgate, do not you ?—Yes.

3508. You lived there in 1863 ?—Yes.

3509. And was no inquiry made of you at that time ?—No.

3510. You have not spoken to anyone who knows anything about it, since you were examined here ?—No.

3511. (*Mr. Chance.*) Are your books open to the inspection of any of the union men ?—Yes.

3512. Can they see them at any time they like ?—Yes.

3513. That is, by asking for the key ?—At any meeting they can.

3514. There is an item of 30*l.* to A. A. A. Do you know what that is for ?—No.

3515. There is another sum some time ago of 10 guineas to a certain party ?—I have seen both of them.

3516. Do you know what they are for ?—No.

3517. (*Chairman.*) Do you know whose handwriting they are in ?—No.

3518. Just look at them and see; that is that one "A. A. A." (*The book was handed to the witness.*) —No—"to a certain party."

3519. Whose handwriting is that ?—It is very much like John Jackson's.

3520. Is he a member of the union ?—Yes.

3521. Has he been secretary ?—Yes.

3522. What year is that entry made ?—1862.

3523. Was he secretary then ?—He followed me as secretary in 1861.

3524. You were secretary in 1861, and he was secretary in 1862 ?—Yes.

3525. Look at the one "A. A. A.," whose handwriting is that in ?—I believe it is the same.

3526. (*Mr. Barstow.*) Is that the same John Jackson who was concerned in Simpson's job ?—No, that was Joseph Jackson. I believe I heard yesterday that Joseph Jackson was dead.

3527. (*Chairman.*) John Jackson is alive ?—Yes.

3528. (*Mr. Chance.*) Is that in 1862 ?—Yes.

3529. Have you seen those items before ?—Yes, at the "Pack Horse."

3530. Have you ever asked any thing about them ?—Yes.

3531. Whom have you asked about them ?—Joseph Brown, the present secretary.

3532. What did Joseph Brown say they were for ?—He said he could not make out what they were for.

3533. When was the first time that you saw them ?—Since I came home this last four months.

3534. Do you mean to say that you never saw those items before you were convicted ?—No.

3535. That book, as I understand, was in your

possession as secretary?—No; I was secretary in 1861.

3536. Were not you secretary after 1861?—No, I was treasurer.

3537. Were you never secretary between 1861 and 1864?—No.

3538. You had that book as treasurer as well as secretary?—If I had wanted to see if there was anything in it I could have it.

3539. Did not you take the trouble as treasurer to see the items in the book?—No, not to look back at them.

3540. Do you mean that you never looked at the book to see what the items were?—No.

3541. Though you were treasurer?—No, I did not.

3542. Can you conceive what the 30*l.* could have been paid for?—No.

3543. Must it not have been paid for some outrage of some kind?—I do not remember any outrage being committed at the time.

3544. If paid for any proper object, the matter would have been put down for which it had been paid?—It ought to have been.

3545. Do not you believe that the 30*l.* must have been paid for some improper object?—It looks very much like it; I cannot say whether it was or not.

3546. As to the 10*l.* to a certain party, I suppose as a general rule the party's name is given to whom the money is paid?—Yes, it ought to be.

3547. Do not you believe that that money paid to a certain party was paid for some improper object?—Yes.

3548. That was in the year 1862?—Yes.

3549. Do not you know what it was paid for?—No, I do not.

3550. On your oath you do not?—No.

3551. Have you not had conversation with members of your union as to what the 30*l.* was paid for?—No.

3552. Have you never heard Joseph Brown, or any other man, say what it was paid for?—No.

3553. That you are certain is in Jackson's handwriting?—No, I am not certain, but it is very much like his handwriting.

3554. Are there any other items in the year 1862 in that book put down to names not mentioned, or for sundry expenses?—I do not know.

3555. How much has your wife received; how much did she receive a week while you were away?—12*s.* 6*d.* a week.

3556. And Cheetham's wife the same?—No; I believe Cheetham's was 7*s.* I had two children and he had none.

The witness withdrew.

JOSEPH BROWN recalled and further examined.

3557. (*Chairman.*) When were you secretary or treasurer?—Secretary I was.

3558. When?—The last six months.

3559. Have you been so before?—Twice before.

3560. What years were those?—In 1864 it was.

3561. Six months in 1864 you say?—Yes.

3562. What were the other times?—I forget the dates now.

3563. In 1864 were you present at a meeting of the council when it was agreed that two books should be taken out of the box?—No, I had been away from home all the week; but I want to correct one little error I made yesterday, as to that cash-book: the last time I saw it was on Saturday last the 1st of September; I said a fortnight before.

3564. You saw this book last on the 1st of September?—Yes.

3565. You were not there on the Wednesday when it was taken out?—I was not.

3566. There are entries here in 1864, when you were secretary. Look at that; here is January 1864 (*handing the book to the witness*). Is that your handwriting?—Yes.

3567. Turn over through 1864, page by page, as far as you have gone; is it all in your handwriting?—Yes, up to here.

3568. What date?—Some of this is mine and some is not.

3569. Up to what date is yours?—The 5th of June.

3570. Did not you go on afterwards in 1864?—This is my handwriting again.

3571. What is the date?—June 25th.

3572. Go on and look how long your handwriting goes on; does it go on through August?—Yes.

3573. July, August, and September, I suppose?—Yes.

3574. It does?—Yes.

3575. Was it the order of business while you were secretary that the treasurer should tell you the money that he had paid, and that you put it down?—Yes.

3576. Is there any entry there of the payment of the sum of 15*l.* in the month of July or August 1864?—How much money?

3577. I said 15*l.*—I do not see any.

3578. Supposing 15*l.* had been paid for Simpson's case as is proved to have been, how would it appear in that book; you were secretary and all those entries are in your handwriting?—If it had been in, it would have been in "sundry expenses."

3579. Is there any entry there of "sundry expenses" at that time?—No, I see none.

3580. Then how was the book managed so as to make the expenditure of 15*l.* not appear there?—Because everything was not put in.

3581. How did you manage the balance?—I do not know.

3582. You ought to know?—It was done so that it would not be seen.

3583. If it was done so that it would not be seen, you must know how it was done. I beg that you will tell me; you were secretary at the time?—It was done by the bringing an incorrect balance over.

3584. Do you mean by making 15*l.* short on the one side, so that 15*l.* was not wanted on the other side to balance; is that what you mean? Take care what your answer is. You must know how it was done?—I cannot tell. In the month of July or August do you mean?

3585. Supposing 15*l.* was paid for the outrage in Simpson's case, as has been proved to be done, I ask you, all those entries being your handwriting, how it would appear in that book? You say that you tried to make entries as sundry expenses?—If it had been in I should put it down as "sundry expenses."

3586. Did you put it down in a lump sum or in small items as they happened?—In a lump.

3587. Then how can you account for it not being there when the money has been proved to have been paid by the union?—I cannot tell.

3588. You must tell; you know all about it?—I know there was money paid for that job.

3589. You keeping the books and being secretary, and the whole of that being in your handwriting, I ask you if it appears in the books?—I cannot see any items in it.

3590. Nor can we, and I want you to point out how it is. It is quite true that you cannot see it, because it is not there?—It would not be put in, and there would be a false balance.

3591. Do I understand you that there was 15*l.* omitted from the receipts of your members, and that therefore there was not 15*l.* to be accounted for on the other side?—I expect that must have been the way.

3592. You expect; you must know how it was done. If 15*l.* was omitted from the receipt side, then 15*l.* was not wanted to make the balance on the payment side. Was that the way it was done?—That must have been the way, to the best of my knowledge.

THIRD DAY.

J. Brown.

6 Sept. 1867.

3593. You have more knowledge than anyone else about it. I ask you, was that the way it was done?—I can only say that I think so.

3594. You put down a false balance?—Yes.

3595. You were secretary all through August?—You must understand that the secretary was sick at one time, and I do not know whether it was at that time or not.

3596. I speak of that which is in your handwriting. If money was paid—10*l.*, 12*l.*, or 14*l.*—for the outrage upon Wild, was that concocted in the same way? I expect it was.

3597. If money was paid for Thornley's case, 10*l.* or 12*l.*, was that done in the same way?—It would be.

3598. If there were any other outrages committed you would take good care that the payment of them should not appear in that book?—Yes.

3599. When you receive money from the bankers is it your duty to enter it?—Yes, it is my duty to enter what is expended, not what we take from the bank.

3600. The entries on both sides are yours?—Yes.

3601. There is an entry on one side of the receipts. You enter them in the course of your duty?—Yes.

3602. Your duty was to enter both the receipts and the expenditure?—Yes.

3603. On the 5th of August 1864 I find in your banker's book 50*l.* was drawn. That is the banker's book of your society?—Yes.

3604. Who drew the 50*l.*?—Three of us.

3605. You being one?—Yes.

3606. Who were the other two?—At that time James Jackson and John Gordon.

3607. You being one of the three that drew it, you told me that that money ought to appear on the receipt side of that book. Does it appear? You may look a long time, I think?—I cannot say whether it is in or not.

3608. Yes you can?—It should be in.

3609. It should be on the receipt side if you had it before you entered what it was expended for. Should not it be put down there that you had got the money out of the bank and got it into your hands?—It is generally put down there.

3610. Does it appear at all in that book that you received 50*l.* from the bankers on the 5th of August 1864? Are you looking at the right place? Look at the 5th of August 1864 for the money that was taken to hand and received by you and was being drawn by you. Does that appear in the book?—I cannot see it.

3611. Have you any doubt that that money was received by you?—I have no doubt.

3612. None whatever?—No.

3613. Have you any doubt that that money went in the payment of these outrages?—I have no doubt but what some did go.

3614. If 15*l.* was paid for Simpson's case and 14*l.* for Wild's that is 29*l.*, and 10*l.* is 39*l.*, does the balance of 11*l.* appear as received at that time. Does any money appear in that book as being received by you from the bankers by check?—I do not know. I have always entered everything to the best of my abilities.

3615. Yes, we understand your ability. Does any part of that 50*l.* appear in that book?—It might further on.

3616. It might or might not. Look as far on as you like. You have looked pretty hard, have you found anything?—No.

3617. Now I find on the 18th of August another item of 50*l.* was paid. Does it appear in the books?—It does not appear as drawn.

3618. Were you one of those who drew it?—Yes.

3619. How is it that it does not appear in the book? Did that go in outrages?—It has gone in other ways.

3620. That is a payment. I ask about the receipt side. If you kept the book right there would be on the 18th of August "received 50*l.*" and the other side would show how the money was spent?—The way I have made these books was so as not to alter the balance of what money we drew from the bankers or put in the books; the expenditure and income all went as one.

3621. That book professes to contain on each side the money that you received and had in hand. If you drew from the bank on the 15th of August the sum of 50*l.*, ought not it to appear in the book? You say, in the other case on the 5th of August, it would, but you thought it was spent in outrages. Do not you think the same of the second 50*l.* as well as the first?—No; money drawn from the bankers is generally put at the end by itself.

3622. Take the beginning, the middle, or the end of the book. Does it appear there what money you received from the bankers?—At that time it appeared to me there were more leaves in.

3623. There have been some leaves taken out, have there?—There has been more writing than there is here.

3624. You did not notice that those leaves were out on Sunday last, when you first saw the book?—No, I did not. I have not had it in my possession lately.

3625. Do I understand you to say, that though that book professes to contain the receipts on one side and payments on the other, you actually would enter a sum of money like 50*l.* at the end of the book as having been received, and not in its proper place?—Yes.

3626. Just lend me the book; just let me understand. You know that on this side is your income?—Yes.

3627. The money you received?—Yes.

3628. And this side your disbursements?—Yes.

3629. If you had a certain amount of money received from the bank, surely it appears on that side. Here is September, received from Ashton, 10*l.*, and Manchester 25*l.*, from Sheffield 27*l.*; contributions so much, and the carriers' fund so much. All the moneys that you receive are put down on one side. Do not you put on this side the money that you draw from the bank?—I do not.

3630. Never?—I cannot say that I never did.

3631. How did it appear in this book which is to check the bankers' book; did you have any check at all in this book as to the money you received from the bank?—At the end.

3632. You say at the end there ought to have been entered what money you drew from the bankers?—Yes.

3633. The leaves have been torn out, you account for it in that way?—I thought there were more entries.

3634. I understand that leaves have been torn out, and that is the reason why we cannot find them?—I mean I thought there were more entries there than what I see.

3635. Have leaves been torn out?—Not that I know of.

3636. Then ought there to have been an entry made, if you had done it according to your usual plan, at one end of the book or the other of this 50*l.* which you drew out on the 5th of August, and of the 50*l.* that you drew out on the 18th of August?—Yes.

3637. Is it your belief that that second sum of 50*l.* was spent in unlawful purposes which you did not wish the public to know of?—It is my belief that it was not.

3638. You say your belief is that the other 50*l.* was?—I think it might have been, part of it.

3639. It has been proved and sworn to that a certain sum of money was paid for Wild's, Simpson's, and Thornley's outrages. I cannot find them in the book, nor do I find an entry that you had this in hand. I ask you if it is not your belief that that money went in payment of outrages?—It is my belief that some of the items were not put down.

3640. I know that, but I ask you why they were not put down. Is it your belief that why they were not put down is that they were paid in outrages?—Yes.

3641. 100*l.* appearing to have been drawn on the

15th and 18th of August, I ask you how it is that you account for the non-appearance of the whole 100*l.*?—Would it be the time that we engaged Mr. Roberts?

3642. It might be that some part of it was for the payment of Roberts?—Yes.

3643. I find the payment of Roberts appearing. There is no object in concealing that; I have found it somewhere. Here is the payment to Mr. Roberts on October the 25th, 1864, 21*l.* You see the entry there?—Yes.

3644. There would be no object in concealing that?—No, I do not wish to conceal anything.

3645. There would be no object in concealing it from the books. There is no reason if you paid Mr. Roberts money why you should not put it down?—No.

3646. That does not explain the absence of your putting down the receipt of this money. You told me yesterday, that instead of entering the word "law expenses" you entered "sundry expenses," and the reason of that was that you being no scholar made the entry of the law expenses as "sundry expenses?"—Yes.

3647. Is that so?—Yes.

3648. What greater difficulty have you in writing "law" and writing "sundry;" one is a little longer if anything than the other?—It was done to mix these outrages altogether so that no one would know.

3649. And you have done it effectually in that way?—Yes.

3650. So that we do not know, looking at the book, anything about it?—No.

3651. Having told us this clever mode, tell us how you did it. You separated the money and put it under different heads so that no one might know?—Yes.

3652. So that nobody can tell anything by looking at that book?—That is the way we did it.

3653. Then there may have been a good deal more money paid for these outrages that we cannot find out. I find now 100*l.* that is not accounted for; you may as well tell us about it?—Very probably Mr. Roberts can tell you; he has had more than 100*l.*

3654. Never mind Mr. Roberts.—He has had more than 100*l.*

3655. Can you, looking at your own handwriting, give us an account of about how much there is for outrages, which we do not understand?—Altogether?

3656. Yes.—It is a long time since; I cannot tell exactly.

3657. It would be done in that sort of way, so as to hide it?—Yes.

3658. But surely you can mention to me what other outrages there were if you choose?—I do not know of any.

3659. Yes you do?—I know there have been outrages done.

3660. So do we. Simpson's case, Wild's case, and Thornley's case have all been spoken of?—There were some more years back.

3661. I do not want to go back more than 10 years.—I do not know of any others.

3662. Do you know anything of Simpson's in 1863?—Yes.

3663. What was paid for that?—I have forgotten the dates.

3664. In 1863 what was paid; were you secretary then. Just see?—No, I was not then.

3665. Can you tell by looking at the entries of those sundry expenses, about May or June 1863, whose handwriting that is?—George Mycock's.

3666. Is that his handwriting?—Yes.

3667. Was he secretary then?—Yes.

3668. Look at May 1863?—May 1863 is in my handwriting.

3669. You are at home in that. Is there anything appearing there?—No, nothing.

3670. Nothing suspicious?—That is not my writing further on.

3671. Is there anything there which leads you to expect that there was some regular money paid in 1863; are there any sundries?—I see none here.

3672. Any payments to "certain parties;" do you see the payment to "A. A. A."?—No.

3673. Have you gone through 1863?—No, not yet.

3674. Have you got through the months of May and June?—I see none.

3675. Are there entries there in the regular course of business?—It is not my writing.

3676. But you can read?—Yes.

3677. Are there any sundry expenses?—I see none.

3678. And nothing of that sort?—No.

3679. (*Mr. Barstow.*) You see no irregular entries in the months of May and June; is that so?—I was just looking for any items I was asked about.

3680. You see no entries which are not in the regular course of business?—I do not see any.

3681. (*Chairman.*) Now look at that entry; whose handwriting is that; is that Jackson's?—Yes, John Jackson's.

3682. There is an entry there, "A. A. A. 30*l.*" Does not that look rather suspicious?—Yes.

3683. It is very suspicious?—Yes.

3684. Have you any doubt that it was paid for some outrage?—This is the month you were talking of.

3685. No, it is 1862?—It is John Jackson's writing.

3686. You have no doubt that that is a payment for an outrage?—I have no doubt but what it is something of that sort.

3687. Turn to a few pages on where the paper is put in, do you see a payment there to "a certain party?"—Yes, "10*l.* 10*s.* 0*d.*"

3688. Have you any notion who the certain party was?—No; that is Jackson's writing again.

3689. Have you any idea now?—Yes, it is for the same purpose in my opinion.

3690. It is for the same purpose you think?—Yes.

3691. Have you any idea who the certain party was?—No.

3692. That is 1862, is it not?—Yes.

3693. What month is it?—They have not put the day of the month, but it must be September, because October comes immediately after.

3694. When you became secretary you assumed a different plan; you did not put "payment to a certain party," but you did it in the way you mention?—Yes.

3695. (*Mr. Chance.*) To those two items there is a cross in blacklead pencil; did you put that there?—No.

3696. Who was treasurer at that time?—In 1862?

3697. Yes.—I cannot say, it is so long since. We change the treasurer every three months.

3698. Have you any document by which you can give us the names of the council at that time; were you a member of the council then?—There was a minute book that had the names in it.

3699. Were you a member of the council at that time?—I cannot say.

3700. How long have you been a member of the union?—About 14 years.

3701. Did you attend the meetings that took place in the year 1862 and 1863?—There are general meetings regularly in the summer season especially, and every general meeting we all have to attend.

3702. Did you ever see those books during 1862 or 1863?—Yes.

3703. You did?—Yes.

3704. You saw the items contained in those books?—Yes.

3705. Then you saw those items to which your attention has just been called?—Yes.

3706. Have you ever made any inquiry as to what those items were paid for?—I do not know that I have particularly.

3707. Did you do so not particularly?—I cannot say.

3708. 30*l.* is a large item to appear in that way?—Yes.

3709. Did not you make an inquiry as to what it was paid for?—I cannot say that I did.

THIRD DAY.

J. Brown.

6 Sept. 1867.

3710. Can you say that you did not?—I cannot say that I did not.

3711. You say that you noticed the amount, do not you know whether you asked what the items were paid for?—I should do if I were the president.

3712. You saw them although you were not the president?—I have seen these items many a time which you have in that book.

3713. Surely you have asked what the items were paid for?—I suppose for the purpose just mentioned.

3714. But if you supposed it was for the purpose you mentioned, why did not you inquire for what purpose it was? You saw them, as I understand, in the very year in which they were entered?—Yes.

3715. And you inquired for them in that year for which they were entered?—I did not say that.

3716. Did you not hear in 1862 of any outrages having been committed?—Where were they?

3717. I do not know. Did you not hear of any outrages committed in the year 1862 in connexion with your union?—Simpson's would be in 1863, I think.

3718. I speak of 1862?—There was one at Burchenall's.

3719. Where is that?—In Heaverly, Stockport.

3720. Was that about the year 1862?—I do not know whether it would not be longer since.

3721. Might it have been in 1861?—Yes, it might be.

3722. Do you know whether money was paid for that outrage?—Yes, I believe money was paid for that.

3723. Might that 30*l.* have been paid for that outrage?—It might.

3724. Then if that 30*l.* had been paid for that outrage, it would have been permitted by your union?—Yes.

3725. Did you never speak of that outrage to any person about that time?—No.

3726. Was that item of "A. A. A. 30*l.*" in 1861 or 1862?—1862.

3727. And 10 guineas to a "certain party" was in 1862, was it not?—Yes.

3728. The 30*l.* is before that?—Yes, it is before that; there is no month or date here.

3729. Yet do you imagine from that book that it would be in the year 1861, or in the same year 1862?—I cannot tell, there is no date; it is not my writing.

3730. I understand that the outrage you speak of did not take place then, but there must have been some outrage for which the 30*l.* was paid. Now what was that?—I cannot tell.

3731. Have you any notion of what the outrage was, for which the 10 guineas was paid?—I have no idea.

3732. Has your curiosity never induced you to ask who the "certain party" was?—No.

3733. Have you allowed yourself to remain in ignorance as to what it was paid for?—Yes.

3734. You have noticed the items several times?—Yes, I have seen the items.

3735. Have you ever asked what it was for?—I might have done, I know it is Jackson's writing.

3736. Can Jackson tell us?—He would be the likeliest man.

3737. (*Mr. Barstow.*) You say that you are aware that an outrage was committed at Simpson's in 1863?—Yes, I believe it was in 1863.

3738. Do you know that another outrage was committed at the same place in 1864?—Yes, I know there were two, I do not know the dates exactly.

3739. I am now on the outrage committed at Simpson's in 1863, the first?—Yes.

3740. Did you hear it at all talked of before it was committed?—Yes, I do not know whether it was in 1863, but that was the first one.

3741. Where did you hear it spoken of?—In the club room.

3742. Did you hear it concerted?—Yes.

3743. That was in the club room?—Yes.

3744. Was it then concerted who was to carry it out?—Yes.

3745. Was it then concerted what money was to be paid for it?—I believe it was, but I forget the amount.

3746. Who was to carry it out?—William Singleton.

3747. Was William Singleton there?—I do not know.

3748. I mean was William Singleton in the club-room when it was concerted that he was to cary it out?—Yes.

3749. Was any other name mentioned except William Singleton as the person who was to carry out that outrage?—No.

3750. No one?—No.

3751. I suppose it was left to him to get whomever he could or whomever he chose to go with him to do it?—Yes.

3752. You do not remember what sum was named?—No.

3753. But some sum was mentioned?—Yes.

3754. Could you say about what sum it was?—About 10*l.*

3755. Are you aware whether that sum was paid?—I believe it was.

3756. Do you know whether it was paid?—I do not know.

3757. You do not know anything about how it was paid or who paid it?—The treasurer would pay it to Singleton.

3758. Do you know who was the treasurer at the time?—In 1862?

3759. On the 8th of May 1863.—I cannot say now.

3760. Could you tell from the book?—No, I have no idea.

3761. (*Chairman.*) Just look at that letter (*handing the same to the witness*). Is that your handwriting?—Yes.

3762. Who was Schofield, the person mentioned in the letter?—I do not know.

3763. I think you said that it was your handwriting?—So it is.

3764. To whom is it written?—James Kay.

3765. What was your object in writing to him?—According to what that says.

3766. Who is Schofield, the person mentioned here?—I do not know him.

3767. How came you to write the letter?—I had instructions to write it.

3768. From whom?—I forget now.

3769. From the union?—Yes, either from the brick-makers or the bricklayers.

3770. It is 1863 or 1865, October 21st was the date of the letter?—Yes.

3771. Then you had instructions from the union to write this letter?—Yes.

3772. "I am informed that there is an execution "out against Schofield," what do you mean by that?

The letter is as follows:

"Stockport, Oct. 21st 1865. Sir—There is a man "in the name of Schofield with his two sons brick-"laying near the Stockport Railway Station, at a "place where there is a strike of our bricklayers on "acct. of the amalgamation between them and our "society, and I am informed that there is an execu-"tion out against Schofield. Please to enquire and "if so give information, it will be a means of taking "him away."

In the first place I ask you what was the information you had about the execution against Schofield?—He was out of the way for a debt.

3773. Who was Schofield?—I do not know.

3774. He was a bricklayer apparently from this letter?—Yes.

3775. "If so give information, it will be a means "of taking him away," where from?—His work.

3776. What work was he at?—He was using Simpson's bricks. I wish you to understand that the masters were continually upon us to see what means could be done to compel Simpson to pay as much for his bricks as they did.

3777. The masters were continually upon you to see if they could compel Simpson to pay as much for

his bricks as they did, is that what you say?—Yes, that was one cause of some of these outrages.

3778. How was Simpson not paying as much money as the others?—He did not pay as much for his labour.

3779. Then if Simpson was not paying as much for his labour as others, he employed non-union men?—Yes.

3780. And the other masters employed union men and paid more for their labour?—Yes.

3781. Was Schofield working for Simpson?—Yes.

3782. You were instructed to ask for information and wrote to James Kay for that purpose, that if he gave that information he would be the means of taking Schofield away from the work that was going on for Simpson; that is the meaning of the letter?—Yes.

3783. You tell me that you wrote this letter at the request of your society?—Yes.

3784. Had you a meeting for the purpose?—There must have been some kind of a meeting.

3785. Was it in consequence of some resolution of your own union meeting?—It would be a meeting of the bricklayers and brickmakers.

3786. It was a meeting of the two?—Yes, there must have been some conversation between the two.

3787. It says "at a place where there is a strike of our bricklayers on account of the amalgamation between them and our society?"—Yes.

3788. Do I understand you to say that there probably had been a joint meeting of the bricklayers and brickmakers, and that in consequence of that you wrote for information to James Kay with a view of getting Schofield away from Simpson?—I cannot say whether there was a joint meeting or not, but there must have been a kind of meeting.

3789. That is what you mean?—Yes.

3790. Did your union act of its own accord, or did it act according to the suggestion of any other union?—Yes.

3791. It was a suggestion of your own union?—Yes.

3792. It was because the masters who ought to have employed your union men paid higher wages than Simpson who employed the non-union men that you wanted to get Schofield away?—Yes.

3793. Your object was to stop Simpson having any labour?—Yes.

3794. (*Mr. Barstow.*) I understand you to say that this letter was written at the instigation of the masters?—No, not that letter.

3795. Then I am wrong, it is my mistake?—Yes.

3796. (*Mr. Chance.*) Do you know of a place called Port Wood?—Yes.

3797. Do you know a brickmaker of the name of Bromilow there?—Yes.

3798. Did you hear of an outrage being committed upon him?—Yes, sometime since.

3799. Do you remember about how long it is since it was committed?—Eight or nine years.

3800. Was that an outrage committed in connexion with your union?—I do not know.

3801. Do you know whether it was an outrage committed at the instigation of any union in Stockport?—I do not know.

3802. You know no particulars about it?—I do not.

3803. You do not know whether any money has ever been paid in respect of that outrage?—I do not.

3804. Have you heard it spoken about?—I have heard it spoken about that his shed was partly burnt.

3805. Then you have heard it spoken about?—Yes.

3806. Have you discussed it with other persons?—No.

3807. How long ago is it since you heard about it?—Eight or nine years since.

3808. Did you hear of it at the time it took place?—Soon after.

3809. Then your attention was called to it?—Yes, by talk.

3810. Can you remember whether it was talked of as being in connexion with your union?—I cannot tell.

3811. Just think?—I do not know.

3812. A thing of that kind would strike you when you heard of it?—Yes, it would strike me, but I know nothing about it.

3813. What is your belief? Do not you believe that it was in connexion with your society?—It is my opinion that it was.

3814. It is your opinion that it was in connexion with your union?—Yes, as far as I think.

3815. Do you know a place called Gatley?—Yes.

3816. Do you know a person named Thomas Clayton, a brickmaker?—Yes.

3817. Did you hear of any outrage being committed upon him?—Yes, there was one on him once.

3818. You have heard of more than one?—I cannot be certain whether there was more than one.

3819. There may have been more than one?—Yes.

3820. Within what period according to your own recollection did those occur?—Four or five years ago I cannot tell exactly.

3821. Can you speak of your own knowledge whether those were in connexion with your union?—To the best of my opinion they were.

3822. Do you know what those outrages were?—No.

3823. Do you know for what the injury was done?—No.

3824. Were you a member of the union at that time?—Yes.

3825. Were you in office at that time?—I cannot tell.

3826. Can you tell us who committed those outrages?—I cannot tell.

3827. Do you not know who was believed to have committed them?—No.

3828. Now think?—I cannot tell at all.

3829. But you believe that they were committed by members of your union?—Yes, I do believe so.

3830. Do you believe they were committed in consequence of some dispute of some kind with your union?—Yes.

3831. And that they were in fact union outrages?—I believe so.

3832. Do you know a place called Bradbury, near Stockport?—Yes.

3833. Do you know Samuel Wilkinson, a builder?—Yes.

3834. Have you heard of any outrages having been committed upon any property belonging to him?—Yes.

3835. How long ago were those committed?—I cannot tell.

3836. About how long?—Seven or eight years.

3837. Do you believe those to have been outrages in connection with your union?—I do.

3838. Can you tell us who the people were who committed those outrages?—No.

3839. Do you recollect whether more than one was committed?—I cannot now. I rather think there was more than one.

3840. Do you remember at all what the nature of the injury was that was committed?—Trampling bricks.

3841. Anything else?—I cannot remember now.

3842. Can you give us any notion as to who the people were who committed that outrage?—No.

3843. In that case you believed them to be in connexion with your union?—Yes.

3844. And that they were outrages committed for trade purposes?—Yes.

3845. I suppose in all these cases you had discussed and talked about them?—They have been discussed, no doubt.

3846. Can you tell us whether any money was paid for them by any members of your union, whom you know of or have heard of or have seen: I will take the cases at Bradbury?—I do not know, but I believe money was paid.

3847. Do you believe it from the probability that it was, or had you heard that it was?—From the probability.

3848. And it was money paid for the outrage at Gatley, near Cheedle?—Yes, I think so.

3849. Is that for the same reason, or have you any

THIRD DAY.

J. Brown.

6 Sept. 1867.

reason for knowing that money had been paid?—It is from the same reason.

3850. And you say the same for Bromilow and Port Wood?—Yes.

3851. And you believe that all these outrages were outrages in connexion with trades and with your union?—Yes.

3852. Can you give us no further particulars as to those outrages?—No.

3853. Can you give us the names of the members of your union who were in office at those times?—I cannot.

3854. Have you no means by which those names can be furnished to us?—There was a minute book in the box, and it had a list of the men's names when they were in office.

3855. To what time did that minute book extend?—Almost up to the present time.

3856. From what time?—I cannot say when they commenced.

3857. Did that go back so far as 10 years?—I think not.

3858. Did it go back as far as eight years?—Probably it might.

3859. Do you know where that minute book is?—I expect it is in the box.

3860. It is neither of the books we have here?—No.

3861. Is it a larger book than we have here?—Yes.

3862. A thicker book?—Yes, it is larger and thicker than the biggest.

3863. When did you last see that book?—Last Sunday.

3864. Was it in the bottom of the box?—Yes.

3865. When you went to look at the box, who was with you?—The officers and the auditors.

3866. Who took the book out of the box?—I cannot tell.

3867. If it is not in the box, it has been taken out since you saw it?—Yes.

3868. (*Chairman.*) Were you in office in July of this year?—Yes.

3869. Did you pay any money to a person named Edward Barrett?—There were two of us; the other man carried the money.

3870. Who was the other?—Thomas Holland.

3871. You and Holland paid some money to Barrett in July of this year?—Yes.

3872. How much?—20*l.*

3873. What for?—For recompense for the damage they had done.

3874. Barrett had received some damage?—Yes.

3875. What sort of damage; had his bricks been destroyed?—Yes.

3876. And you and Holland paid him some money out of the union fund?—Yes.

3877. How came you to pay him for that damage?—Because there was him and Mr. Bailey; they had two yards close to, and they said they would stop their jobs if they had not some recompense made. They did not like to go on with the work and run the risk of being spoiled, so we offered to make them this remuneration provided they let the men work.

3878. How is it they expected their work to be spoiled?—They expected retaliation from the Manchester brickmakers.

3879. They were in anticipation of the Manchester brickmakers spoiling their work?—Yes.

3880. Was that at Didsbury?—Yes.

3881. What was the reason of their expecting that the Manchester union men would destroy their works? Because we had taken a yard at Levenshulme which they would not work on, and we went to work on it, and the Manchester men did not like it, and we think that the Manchester men thought that they had done it for retaliation.

3882. Levenshulme is a middle place between you and the other union?—Yes.

3883. You dispute to which district it belongs?—It is the bricklayers' dispute.

3884. There is that dispute between you?—Yes.

3885. Barrett said that he would not stop to work there because if he did he expected the Manchester brickmakers would injure his work?—Yes.

3886. Therefore you went in to guarantee him that you would pay for any of his property that should be injured?—Yes.

3887. Had some property of his been injured when you paid him this money?—Yes.

3888. Therefore you paid him 20*l.*?—Yes.

3889. Did he employ any Stockport union men?—Yes.

3890. You, believing that the damage to his property had been done by the Manchester men, recompensed him to the extent of 20*l.*?—Yes.

3891. (*Mr. Barstow.*) Do you know whether Barrett or Bailey had sold bricks from the Stockport district into the Manchester district?—I believe Bailey had. There were bricks from that district going into the Manchester district, and the Manchester district did not like it.

3892. Is there a rule among the brickmakers that the brickmakers of one district may not sell their goods in the other?—It is in Manchester, not with us.

3893. Is it the case that a Manchester man may sell his bricks in Stockport, but a Stockport man may not sell his bricks in Manchester?—It is like two questions; I cannot answer them both together.

3894. You say there is such a rule in Manchester?—I think so.

3895. You think there is a rule in Manchester among the brickmakers that no man, not making his bricks in the Manchester district can sell his bricks in Manchester?—That bricks made out of the Manchester district are not allowed to come into Manchester to be sold.

3896. I understand you now to say that you have no such rule in Stockport?—No, we let them go anywhere.

3897. Consequently, bricks made in Manchester may be sold in Stockport?—Yes, sold and sent to Stockport.

3898. Do masters ever insure their brickyards in your union?—No.

3899. Do they make you any consideration for which you guarantee them from any damage done to their bricks?—We have guaranteed them now that if damage is done to yards at Levenshulme we will pay them two-thirds.

3900. They do not make you any payment?—No, we have asked them.

3901. You guarantee them without any payment being made?—Yes, it is only our society.

3902. (*Mr. Chance.*) Is it a general guarantee, or is it confined to Levenshulme?—Any outrage that might be done by the Manchester men on account of our infringement, we guarantee to pay two-thirds.

3903. Does it apply to other places besides Levenshulme?—Yes, to any master in our district.

3904. You say that this injury was done by the Manchester people; can you give us the names of any people who were likely to do it?—No, we only think that it is done.

3905. You do not know of any names of those whom you believe have done it?—No, only this Kay.

3906. Do you know who it was that did the injury to Bailey or Barrett?—No, I do not.

3907. (*Chairman.*) Do you know a place called Bramhall, near Stockport?—Yes.

3908. There is a Mr. Thornley living there, not the same Thornley who lives at Heaton Norris?—I know John Thornley who lives there.

3909. What is he, a brickmaker?—No, a publican.

3910. Is there any brick manufacturer there of that name?—No, there was a few years ago.

3911. He is a different man from the one who lives at Heaton?—Yes.

3912. Do you remember an outrage being committed there some years ago?—Yes.

3913. How many years ago?—10 or 11.

3914. Do you think it is more than 10?—Yes.

3915. Are you sure?—No, not quite sure.

3916. As you are not quite sure I may ask you what was the nature of that outrage; was it damage to bricks?—Yes.

3917. Were you a member of the union?—Yes.

3918. Do you remember any resolution about it?—No.

3918*a*. You do not know anyone who did it?—No.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

FOURTH DAY.

Assize Courts, Manchester, Saturday, 7th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C.
THOMAS IRWIN BARSTOW, Esq.
GEORGE CHANCE, Esq.
JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

JOSEPH HIBBERT sworn and examined.

3919. (*Chairman.*) You understand what you have come here for?—I am aware of that.

3920. I want to tell you that if you speak the truth and make a full and free disclosure of all you know, you will be entitled to have, and we shall readily give you, an indemnity for any offences which you have committed; but if you tell what is false you are still liable to be not only prosecuted for perjury, but liable to be prosecuted for any of the offences to which you have been a party. Let me warn you as I have done at starting, and also warn you that we have some information that you are not aware of. What are you?—A brickmaker.

3921. How long have you been so?—I have been nearly 40 years in the brick business.

3922. You are a contractor?—I contracted for this job.

3923. You seem to have an acute notion of the job you are going to be asked about. I have not spoken of any job yet. Are you a member of the Manchester trade union?—Yes, and have been above 30 years.

3924. Do you fill any office there now?—No, and never did.

3925. Never in any way, have you?—No.

3926. Have you been in the habit of attending their meetings?—Yes.

3927. How often do they hold their meetings?—There is pay night in summer every Saturday night, and once a month in winter.

3928. And when you meet for your pay night is there a meeting in which you discuss these things?—No, there is not. It is a burial society that we pay money to.

3929. But in addition to money for that purpose which nobody finds fault with, is it also a society for the protection of your labour?—There is a general meeting.

3930. For that purpose?—Yes.

3931. How often do those meetings take place?—They take place the same as they might take place in this matter, when a man falls on edge with the master when the master engages men the same as I did in Levenshulme, that was on the 7th of May.

3932. Do not go into particulars. I ask about the general course of business, have you meetings in which you discuss all trade business?—Yes, and there was a meeting then.

3933. You have general meetings on trades business?—Yes.

3934. How often do you hold them?—When it is necessary.

3935. What do you mean by necessary. When you have heard of anything affecting your trade you call a meeting?—Yes, the parties who are disinterested.

3936. Disinterested?—Yes, there are parties that are interested and parties disinterested, and they meet together to consider what is to be done.

3937. Does it often take place?—When these things occur.

3938. Do these things occur often?—Not very often.

3939. Do they occur pretty often?—Yes.

3940. Have you any council?—I never saw any council myself.

3941. Having been a member of the union club for 30 years, do you mean to say that you do not know whether there is a council formed or not?—No, I have never heard of it.

3942. Have you heard of the committee?—It is a district man; there is what we call a key and a box, and there is a safe, and the safe is inside the box; there are six keys to the lock, and each man holds one key, and we call them so many committee men.

3943. Are there six committee men?—Yes.

3944. Are these six committee men in the habit of meeting?—They never met to my knowledge, except when they took money on Saturday night.

3945. Were you ever on a meeting?—No.

3946. When any person interested or disinterested wants to talk of the trade are you summoned to the meeting?—No, I think the whole body at large knows.

3947. You know from communication with each other?—Yes, one tells another.

3948. In order to meet you must agree upon a day to meet?—Yes.

3949. Who has the authority of fixing the day?—These committee men I suppose.

3950. If there is anything to be done of that sort, the whole body is called together by some member of the committee, and you meet and discuss the question?—Yes.

3951. Have you a book in which you enter the resolutions come to at those meetings?—I cannot say.

3952. Yes, you can. You must have seen the book?—I have not.

3953. You must have done so?—There is a book where the parties' names are in whom we pay our money to.

3954. What do you keep in the box for which there are six keys?—The whole of the money until we take it to the bank.

3955. Do you keep books?—Yes.

3956. What books have you got besides those with the names of the subscribers?—A ledger and cash-book.

3957. There is no minute book of these meetings?—No.

3958. You never heard it spoken of?—No.

3959. Have you a book in which payments are regularly entered?—Yes.

FOURTH DAY.

J. Hibbert.

7 Sept. 1867.

3960. Whose duty is it to keep it ?—The president and secretary.

3961. Who is president at the present moment ?—I could not tell that although I am a member.

3962. Have you ever known a single president whose name you remember ?—Yes, one.

3963. Who was the last president but one ?—I could not tell you his name, because from my being contracting I have not been there.

3964. When did you last attend a meeting of the club ?—This week.

3965. Who was in the chair ?—I could not tell you his name.

3966. How many attended would you say ?—I cannot tell, speaking correctly.

3967. When was that last meeting held which you attended ?—This week, on Thursday night.

3968. We are now on Saturday, so that it was two days ago ?—Wednesday or Thursday night ; it was Thursday, I think.

3969. And upon your oath you state that you do not know who was in the chair ?—No.

3970. How many were there ?—A great many.

3971. 100 ?—More.

3972. 200 ?—More.

3973. Did you discuss this inquiry that was coming on ; of course you did ?—There was something said about it ; it was more on my case.

3974. I suppose you made a speech ?—No.

3975. Did you say anything ?—No, I never spoke at all.

3976. Who did ?—Several parties.

3977. Tell me one ?—I could not mention their names.

3978. You can mention them ?—I could not.

3979. You do not mean to tell me that you have been 30 years a member of the club, and that a meeting having taken place on Wednesday or Thursday night last you cannot tell the names of the persons who were present ?—I could tell a good many.

3980. Was Kay there ?—No, he was not there. I had two sons there.

3981. Never mind your sons. You cannot say who was in the chair ?—No.

3982. Who is secretary ?—I cannot tell.

3983. You swear that you cannot ?—Yes.

3984. Have you a treasurer ?—There is a secretary and president and a sub-secretary.

3985. Where do you have your meetings ?—In our own place.

3986. Which is your own place ?—A small hall built in Lower Millgate ; it is a public-house.

3987. What is the name of the public-house ?—The "Crown and Cushion."

3988. Is the box kept there ?—Yes.

3989. Who is the landlord of the public-house ?—They call him Samuel Wood.

3990. And the box is regularly kept there is it ?—Yes.

3991. In your room where you meet ?—No, it is kept in another room ; we meet in our own place but we take the money there.

3992. When I asked you where you meet I understood you to say in the "Crown and Cushion," in Millgate ?—To take payments.

3993. Wait a moment ; is the "Crown and Cushion" in Millgate ?—Yes, it is.

3994. Is it the place where you take payments ?—Yes, it is.

3995. Is there any other place where you meet for any other purpose besides the "Crown and Cushion"? —Yes.

3996. Where ?—At the hall that we built.

3997. Where is that hall ?—A few yards from the "Crown and Cushion."

3998. Then the box is kept at the "Crown and Cushion" ?—Yes.

3999. Is it brought each night to the hall which you built ?—No, it is never brought ; not that I have seen.

4000. Can you tell me the name of any one man on the committee ?—No, I cannot ; I have been three or four years and have not been there at all.

4001. That is immaterial. I ask can you tell me the name of any man now on the committee ?—No, I cannot.

4002. What is Wood's christian name ?—Samuel, I believe ; that is the name over the door.

4003. You have not any meetings at the "Crown and Cushion," but your meetings are held in that hall ?—Yes. I have never been to a meeting since 20 years ago.

4004. You do not know the name of any man on the committee now ?—No.

4005. I ask you again to tell me the name of any one man who was there on Wednesday or Thursday night ?—There were a great many there that I know, and there were a great many there that I did not know. I can mention an odd one or two that were there ; there was John Saunders there.

4006. Did he speak ?—No, I never heard him speak.

4007. You mention the silent men ; cannot you mention those who spoke ?—There were a great many that I do not know.

4008. But there are many that you must know; being a member for 30 years and attending a meeting two or three nights ago, you mean to say that you cannot tell me who was there ? Your own case was discussed in which you took an interest ?—It was not discussed.

4009. You said it was mentioned ?—I went there on account of it and I could not get it on.

4010. They had other things on, they did not come to your case ?—No.

4011. What did they talk about ?—Many a thing, such as funerals, about a man being blind, that was struck blind by the thunderstorm.

4012. I daresay ?—It is a fact.

4013. I do not dispute it. What else did they talk about, you were not deaf on that night ?—No.

4014. You heard what took place ; do you mean to swear that nothing was said about the inquiry which was about to come on or which had come on, and nothing was said of any cases connected with your union ; take care what you are about, you must know. Your memory is very good as to something having been said about a funeral, but very deficient about anything else ?—The first Monday in September was our quarter day. I was not there, it was an adjourned meeting till last Thursday night there was ; very little business done then, only choosing officers ; it was adjourned till last Thursday night, and then adjourned again. It was not adjourned but it got to 12 o'clock, and they closed it. They only settled their business last Thursday night for quarter day.

4015. You mean to swear that nothing at all was said about your case or any case of that description ? —I did try to mention my case.

4016. What did you say ?—I will tell you the truth and nothing but the truth. I wanted my case brought on, it was on the 7th of May when I struck, and I wanted paying for my labour and my men wanted paying. Mr. Roberts is here : he has my contract.

4017. I am not asking you about that, I ask you about the Manchester Union Club, what it the name of your club ?—Sick and funeral society.

4018. The Manchester Sick and Funeral Society ? —Yes.

4019. I want the name right, is it the Manchester Sick and Funeral Society ?—"The Manchester Brickmakers' Burial Society," and then we have a sick fund in each district.

4020. Is the name "The Manchester Brickmakers' Burial Society" ?—Yes, but each district keeps its own secretary.

4021. Is that the whole name ?—Yes.

4022. What did you say about your own case there ?—I could not get it on. I only named it to certain parties.

4023. What did you say ?—I named that the strike being on the 7th of May I thought it was high time

that I was paid by these parties. That is Aitken Brothers.

4024. Was anything said about the evidence which you were to give here?—I was not aware that I was coming here.

4025. Have you a brother?—Yes.

4026. What is his christian name?—William.

4027. Is he a member of that club?—Yes, and he is a brickmaster.

4028. How long has he been a member of the club?—20 years or more.

4029. Was he ever on the committee?—No, he never was, not in our trade.

4030. This club I speak of?—Of this brickmakers' club?

4031. I speak of that.—My brother belongs to the Brickmakers' Protection Association as well.

4032. But he is a member also of this club?—Yes.

4033. Is he in any office in this club?—No.

4034. Or has he ever filled any?—No, he never has.

4035. You were employed, were you not, as contractor to make some bricks for Mr. Aitken?—Yes.

4036. When was it, in May of this year?—Yes, May, and April I commenced.

4037. It was in May this year when you began to make the bricks?—Yes, in April.

4038. Was this at Levenshulme?—Yes.

4039. Is there a dispute between your club and the Stockport club as to which district Levenshulme is in?—Yes, I believe there is.

4040. Has there been a dispute for some time?—I believe only last season, and that was the first I heard of it; I have made bricks there 500 yards further 20 years ago.

4041. Never mind that, answer my question. There has been a dispute between your club, the Manchester club, and the Stockport union as to whether Levenshulme is in the one district or the other?—Yes, I believe there was with the bricklayers.

4042. And with the brickmakers?—It was through the bricklayers that the brickmakers struck. This is the truth.

4043. It had better be the truth for your own sake; there has been a dispute between the two clubs as to which district it was in?—None till then.

4044. The first time you heard of the dispute was in April or May this year?—It was when I was connected with the town.

4045. I do not ask that, I ask was that the first time you heard of the dispute between the two clubs?—Yes, on the 7th of May.

4046. You never heard of it before?—Yes, I heard of it when a man named Cox——

4047. Never mind that; when did you first hear of the dispute between the two clubs about the Levenshulme district?—I took that job in January.

4048. It was in January that you first heard of it?—Yes, when I first took the job. I must tell the truth.

4049. You need not make such constant assertions about telling the truth, because if you do not you will be liable to punishment.—It was on the 26th of January 1867.

4050. That was the first time that you heard of the dispute between the Manchester and the Stockport clubs as to which district Levenshulme was in?—Yes; it was the time that Mr. Aitken objected to sign my paper which is here. I should like your honour to see it.

4051. It was in April that you began to make bricks for Aitken?—Yes.

4052. How long did you continue making bricks?—Till the 7th of May.

4053. How many weeks; two or three weeks?—Five or six I think it is, from the 6th of April to the 7th of May.

4054. What made you stop?—A bricklayers' delegate and a brickmakers' delegate came round and asked——

4055. Wait a moment. A bricklayers' delegate came round. Who is that?—I do not know him. I never saw him in my life.

4056. Who told you that a bricklayers' delegate had come round?—He came himself to me.

4057. You know him by sight?—I can tell him if I see him.

4058. You never saw him before or since?—No.

4059. What did he say to you?—He went to the bricklayers——

4060. Never mind that. What did he say when he came to you?—I went round with him after.

4061. Never mind that. I ask you what he said when he came to see you?. It is no use shuffling.—I am not shuffling. He would not say anything to me till he went round to the bricklayers. It was our delegate who spoke to me.

4062. Who is your delegate?—A man named Kay.

4063. What is his duty as a delegate?—To go round, I suppose, and look after business.

4064. What do you call business?—To see that things are conducted rightly.

4065. What do you call rightly?—Looking after a man getting paid, and that his wages are right.

4066. To see that the wages which you think right are paid?—Yes.

4067. Kay came to you?—Yes, and Lister too.

4068. Kay came to you?—Yes, and Lister.

4069. What is Lister?—It seems he is a bricklayers' delegate.

4070. Is he the man you spoke of, whom you said you did not know just now?—I know him no more than this, when our delegate told us his name was Lister——

4071. I asked the name just now, and you said you did not know, but that you should know the man if you saw him again.—Yes, I might know him again if I saw him.

4072. You just now mentioned his name. Is Lister the name of the man? You said just now that you did not know, though you might know him again.—This Kay told me.

4073. You might have mentioned that before.—I was not aware of it.

4074. You understood from Kay that Lister was the name of the bricklayers' delegate who came to you?—Yes.

4075. And Kay came to you?—Yes.

4076. What did he say to you?—He said we must stop work.

4077. How many men had you at work then?—I had two moulders and their gangs, and my men three in a gang, and a boy and a woman, at each job, and then I had two men and a boy at my own.

4078. Altogether how many were there?—Thirteen or 14.

4079. Kay told you that you must stop work?—Yes.

4080. Did he say why?—I said I would not.

4081. But he said why, did he not?—It was this Lister said that.

4082. What did Lister say?—Lister and me went to see this bricklayer.

4083. Did he say anything?—No, he said, "You come along with me."

4084. Did you know why Kay told you that you must stop work?—I did not at first.

4085. You had no notion why Kay told you you must stop work?—I do not know particularly.

4086. Without being particular, did you know it?—I had heard through Cox going away from this job, and Luke Robinson going too.

4087. What was the reason that Kay told you you must stop work?—On account of these men not drawing their card out of the Stockport club.

4088. The men you were employing?—No, the bricklayer's men.

4089. The bricklayer's men who were employed at this same job?—Yes, they were employed under the same firm.

4090. In consequence of the bricklayer's men not drawing their card out of the Stockport club?—Yes, and Lister went round and asked each man.

FOURTH DAY.

J. Hibbert.

7 Sept. 1867.

4091. Never mind that. I ask you the reason, what do you mean by drawing a card out of the Stockport union?—Drawing a card out of the Stockport union and throwing it into Manchester. The men had finished that job; they could draw it out of Manchester, and throw it into Stockport without any expense.

4092. The complaint was that the bricklayer's men had been drawing their card out of the Stockport club?—Yes.

4093. What does drawing a card out of the Stockport union mean?—It means that they were members of the Stockport union.

4094. These men were members of the Stockport union, and Kay came and recommended that you should not work with them?—Yes.

4095. Does drawing their card mean anything more than that they are members of the Stockport club?—No; we thought if we could compromise the matter about the strike we would see this Robinson.

4096. Never mind that; I want to know what passed?—We went to Robinson, and Lister asked each man.

4097. You, and Lister, and Kay went away together; where did you go to?—I have not done with that; because we went to Robinson; when we went to Robinson he flew up and said he would have nothing to do with it. He is a contractor for the bricklayers.

4098. Is he a Stockport union man or a Manchester union man?—The old man is no union man himself, though he had bricklayers of Stockport union working.

4099. Who spoke to him?—I did.

4100. You must remember what you said?—I said, Cannot we settle this matter? The clerk of the works was with me, and Robinson huffed up his leg and went away, and there was no more said.

4101. He did not give you any answer?—I do not think he spoke.

4102. What did Kay and Lister do upon that?—We struck work.

4103. You obeyed Kay's orders?—Yes.

4104. You and your 14 men struck work?—Yes.

4105. That was the reason why you struck?—Yes.

4106. Having struck work you did not take it up again at all?—I went to have my work measured up, they proffered to pay me, but we never came to any terms.

4107. Where are you working now?—Mr. Higgins's, at the back of the assize court.

4108. You do not know at all who were in office at any time while you were a member of that club?—I knew plenty, but there are many dead.

4109. Is nobody living?—Yes.

4110. You knew the dead ones and not the living ones?—Yes, I know one that is living.

4111. Out of the 200?—There are above 1,400.

4112. All you know is one living out of 1,400, besides Kay and your brother?—I know many of the members, of course.

4113. Have you ever heard this matter talked of at the meetings, about the Stockport men being employed at Higgins's works?—Yes.

4114. You have heard it talked of at a meeting of the Manchester club?—Yes, I was there myself; I have every right to be.

4115. You were there?—Yes.

4116. When did you hear it talked about?—Very soon after the strike we had a meeting.

4117. Was it before you struck work at Aitken's?—No, it was after.

4118. You never heard it talked of before?—No further than when Mr. Aitken signed that paper.

4119. When was that?—He signed it on the 26th of January.

4120. Did you hear it talked of then?—Mr. Aitken said he would sooner have Manchester men than Stockport men. He said it was rather strange that Manchester brickmakers should be making bricks in this field, and his works were only the width of the cart road off, and to be setting the bricks by Stockport bricklayers, and he wished the two unions to come to a decision which should have it, and he signed my document and I drew the money that day and they specified in the paper that if any strike should arise in the building trades that the said contractor should be paid. Mr. Aitken signed that; it is here, and you can look at it if you think proper.

4121. Then after you had struck work you remember a discussion being brought on at your club about it?—Yes, of course.

4122. You remember a discussion afterwards at the club about this strike?—Yes.

4123. How long after was that?—Soon after.

4124. The strike took place at what time?—On the 7th of May.

4125. And soon after that there was a meeting of the club?—Yes.

4126. Was it a large meeting?—There were not so many, there might be a couple of hundred.

4127. Did you speak there?—Yes, I called the meeting.

4128. What is the mode of calling a meeting?—I called it on my protection.

4129. Did you issue cards for it?—No; me and my two sons went round and called a meeting.

4130. Whom to?—We went to the men and warned them.

4131. To above 200 men?—Yes.

4132. Now you know who was the president?—No, not then; not his name.

4133. How long had you known his face?—I had known him long.

4134. 30 years?—No, there is a great many young ones got up since I entered it.

4135. Is the president a young man or an old man?—A young man.

4136. How long had you known him?—Not long.

4137. Five years?—I did not know him at all, not particularly, because I had not been to any meetings.

4138. You summoned him?—Warned him.

4139. Warning is summoning, surely; you must know his name, or did you only warn him because you knew his face; you had better be careful what you are about; you are trying to evade every question, and are giving a great deal of unnecessary trouble, and other persons will come and show the sort of character you are. You are now on your oath, and you tell me that you do not know who was in the chair that night, or who the president was, although you actually warned him to come to the meeting?—No, I did not know the man myself.

4140. Nevertheless you warned him to come?—No.

4141. You said so?—Perhaps I might warn him, and yet there might be another president, the man is ill and does not attend.

4142. Still the man who came there and sat in the chair that night was the man you yourself warned?—Yes, perhaps I might have warned him.

4143. Do you mean to tell everybody that you do not know what his name is?—No.

4144. Where does he work?—Yes, I know that.

4145. Where?—On Ashton Road.

4146. Was he there when you warned him?—No, he was drinking when I warned the job.

4147. Where was this man when you warned him who was in the chair that night, whose face you know, and whose name you say you do not know?—He might have been in some beerhouse.

4148. That is no answer. Where was he when you warned him?—I do not know; we warn one and the one warns the other.

4149. Did you or not warn the man that was in the chair?—We call it warning.

4150. Did you warn him or not?—I did not see him till I was down at the meeting, we call it warning a job, one man tells another.

4151. How many men did you warn yourself, leaving them to tell the others; there were 200 present?—There might be more.

4152. How many men did you yourself warn, 50?—I am bound I did.

4153. You do not know who was in the chair;

what did you say that night?—I told them how I was situated and about these parties striking, and I thought it very hard. I had a large family and I wanted some recompense, and I asked what way I had better act to get my money.

4154. What did they say?—They said I must leave it over.

4155. Did they agree to give you anything?—No, I never received a penny.

4156. You have been at meetings before when there has been a talk of about how much money a man was to have; you have been at meetings of the club when there has been a resolution passed about the men receiving some money?—No, not in my presence.

4157. That you swear?—Yes, I was never at a meeting in which there was anything of that sort.

4158. And never heard any outrage talked of?—No.

4159. Where you have been you never heard it?—I never was at any outrage.

4160. I did not ask you that, have you been there when some of the men have talked about it?—No.

4161. Did you ever hear of what was called the Rusholme outrage?—Yes.

4162. When was that?—A good many years ago.

4163. Can you give me any notion, is it about five years ago?—It will be more, near 1851, very likely.

4164. Do you remember anything of that sort in the year 1862?—No.

4165. Have you ever heard of any outrage or disturbance at Rusholme during the last 10 years?—I heard it reported that some men went into Mr. Smith's brickyard to spoil some bricks.

4166. Is that near to Rusholme?—Near it.

4167. When did you hear of it?—Lately, when it occurred.

4168. When did it occur?—About that time, in 1862. Mr. Smith was a brickmaker, in Rusholme.

4169. You remember hearing of that outrage?—Yes.

4170. How many bricks did you hear were destroyed?—There was none.

4171. Did not they attempt to do it?—No, it was not an attempt.

4172. Were some men apprehended?—I believe two or three at the "Red Gate" insulted the police.

4173. There were some apprehended?—There were some at Rusholme apprehended. I heard of that.

4174. You did a little more than hear of it?—No, I did not.

4175. Did not you try to bail them out?—No, my brother bailed them out.

4176. That was five years ago you think?—I believe it is.

4177. I believe Rigby succeeded you in your job, did not he?—Yes, I believe he did, Rigby and Hill.

4178. (*Mr. Barstow.*) In your club can anyone who likes call a meeting?—If they are members. Some men are in the habit of getting drunk, they spend the man's wages, and does not pay him, then we call a meeting and make him pay him.

4179. My question is, can any member of the club call a meeting when he likes?—Yes, if he has any grievance.

4180. Can he whether he has a grievance or not?—No, not that I am aware of. I only think not. If he has a grievance he calls a meeting.

4181. He calls a meeting if he wants a meeting?—Yes.

4182. How does he call a meeting?—He goes round and warns them of it as I have explained.

4183. That is all that is necessary to call a meeting, to go round and warn them of it?—Yes.

4184. Whom does he warn?—He warns those that are members.

4185. Does he warn all the members?—Sometimes they are out of a job, and he cannot warn them.

4186. How does he warn them?—He runs round warning them; perhaps it takes a day or two to warn them.

4187. 1,400?—There may be about that number.

4188. Has every member notice when a meeting of this kind is called?—If he lights on them at the work; sometimes they are at beerhouses drinking, and they do not know of the meetings.

4189. Then some know of the meetings, and some do not know?—Yes, they warn one another.

4190. It seems to me in practice that a man may summon to a meeting anyone he chooses to summon?—Yes; they should all come, but sometimes they do not all come; sometimes they are off drinking. There have been many meetings that I have not heard of; sometimes I have been four years and never heard of a meeting.

4191. (*Mr. Chance.*) You told us that you knew many men who are now dead who have been officers of your society?—Yes.

4192. You also said that you knew one living?—Yes.

4193. Who is the man living that you know?—I think Jonathan Lomas was one.

4194. What office did he hold?—I think he was president.

4195. (*Chairman.*) When?—It is sometime ago.

4196. (*Mr. Chance.*) How long ago was he president?—It will be a couple of years ago.

4197. Two years ago?—Yes.

4198. You know some others who were either president or secretary?—Yes; there is a party in Manchester, Samuel Owen, who was president; he is a blind man now.

4199. You remember them now very well?—There are others I do not know.

4200. When was he president?—I should say that is 10 or a dozen years since; he has been a publican since then; he is a living man now.

4201. You know who has been president?—No, I was away in South Wales four years, in Cardiff.

4202. How long ago is that?—About five years ago.

4203. You have been a member of the union for the last five years?—I was a member then all the time.

4204. You have attended meetings the last five years?—I was never out of being a member, or out of benefit for 32 years.

4205. Are you constantly seeing the workmen?—Yes.

4206. And working with them?—Yes.

4207. Do you know the names of the men whom you generally employ?—Yes.

4208. Have you ever seen any of the men whom you work with act as president of the society?—No.

4209. Is there any reason why they should not be president?—No, they get elected by a majority which shows who stands.

4210. When you go to the meetings, do you go there in good time before the meeting begins?—Nine o'clock is the opening time.

4211. What is the course of proceedings when the members meet together, is some one called to the chair?—The president takes the chair.

4212. Is his name called out, Mr. So-and-so shall take the chair?—No, I never heard the name; there are parties who go in there, and do not know who is president or secretary.

4213. Supposing the president is not there?—Another man takes it.

4214. Then his name is mentioned, is it not?—No; they never mention that, not whenever I have been.

4215. How is it said? A certain party is to take the chair, or how is it done?—There are three that sit together, the president, secretary, and sub-secretary, and perhaps a friend takes the chair.

4216. Was the president there on the 7th of May when you warned the people to attend?—Yes.

4217. Who was he?—I do not know.

4218. Had you ever seen him before?—Yes; I had seen him before, but not to know him personally.

4219. Have you ever spoken to him?—No; there are many hundreds in our concern that I do not know at all.

4220. At the meeting of the 7th of May you asked

FOURTH DAY.

J. Hibbert.

7 Sept. 1867.

what was to be done?—No; it was not the 7th of May; it was when we struck work, and our meeting would be sometime in June.

4221. When did your meeting take place after the striking?—It would be about the 15th of May or some days shortly after the strike.

4222. You said just now that it would be in June?—No, some malicious damage had been done on the 15th of June.

4223. When did the meeting take place the first time after you struck?—Shortly after.

4224. About the 7th of May?—It was not the same week, it was the week after we struck, and we struck on the 7th of May.

4225. And it was a meeting that you called together?—Yes.

4226. At that meeting which you called together you complained of the injury which had been done to you?—Yes.

4227. And you asked them what should be done, is that so?—Yes.

4228. Were any suggestions made as to what should be done?—No, they said I must abide by my own loss. I must stand it, and I said I would sue the parties for damages.

4229. Did any man suggest any other mode of procedure?—Yes, two or three, but it did not carry.

4230. What did the two or three say?—That I should be recompensed, and it passed off.

4231. I dare say the other members had some other proposition?—Yes, they said it was a hard thing that I should lose the summer's or year's work which I should have done. I should have had 120*l.* to have drawn, and I had nothing.

4232. There was no other suggestion?—No, I came out. I never went to a meeting till last Thursday night again.

4233. Were there any hard words said against the Stockport union?—The delegates, Kay and Lister, and some of them went over to Stockport at that time; I did not go with them.

4234. Did Kay and Lister go after the meeting?—They went to Stockport to have a meeting there.

4235. Did they go to Stockport after the meeting?—Yes, Lister and Kay, and the president of the bricklayers' association.

4236. Who is he?—I do not know.

4237. It was after the meeting which you warned?—Yes, they went to Stockport and had a meeting, and came back again; they had a council meeting in Stockport, the bricklayers altogether.

4238. Was any meeting called after the 14th or the middle of May about a dispute between the Stockport and the Manchester unions?—Not that I am aware of; there might be delegates attending backwards and forwards to Stockport. I never went to one.

4239. Was anything said at this meeting you speak of about doing anything to the Stockport men?—No, I never heard anything.

4240. On your oath?—On my oath I never did.

4241. Was there any proposition?—No propositions that I heard of when I was in, but Kay and these parties went to Stockport and they would not have me with them.

4242. You heard of the damage being done to the bricks?—Yes. Mr. Aitken sent me a letter.

4243. Do you know by whom it was done?—No.

4244. On your oath?—No, I wanted to draw my money, and Aitken said to me, What about the bricks? I said, What had I to do with the bricks, when I made the bricks for you they were counted on the flats.

4245. When was that?—After the 15th of January, when the first outrage was committed, and 4,500 bricks were damaged.

4246. (*Chairman.*) Where?—At Levenshulme. I went to him and he said, What about the bricks. I said What have I to do with the bricks; when I made the bricks you counted them on the flats, and it would be very likely some of the men did it. He offered to give me 13*l.* provided I signed a paper, and I would not do so.

4247. Did he accuse you of having damaged the bricks?—No.

4248. Do you know who did some of that damage?—No, I do not.

4249. On your oath were not you there yourself?—I do not know who did it; if the men had gone to do the damage they might have done 100 times more, but to go and spoil 4,600 bricks was another thing. There is no doubt that Mr. Aitken would have paid me that money that day if this damage had not been done.

4250. Was not that damage done in consequence of some dispute between the Manchester and the Stockport unions?—I really think that the Stockport union men did it themselves, though I cannot prove it; that is my opinion about the job.

4251. Are you a member of the Manchester union?—Yes.

4252. Why should the Stockport people have destroyed the bricks?—I cannot say; that is only my opinion. I cannot prove it.

4253. Is it often the case that bricks are destroyed without any reason?—No, I never did hear tell of any.

4254. What reason was there for the Stockport men destroying their bricks?—I think on account of them forcing themselves on. They came there after. Mr. Aitken engaged them.

4255. Why should the Stockport men destroy the bricks?—It is only my opinion; I only think it.

4256. You must have some reason; what is it?—Because they agreed to pay me, and that work was carried on for three weeks out of the Stockport club.

4257. That is no reason why they should destroy the bricks?—No, but to cause us ill-feeling.

4258. Have you not heard it spoken of among the men as to who destroyed the bricks?—No, I do not think they who destroyed the bricks would tell me, the contractor. They kept everything from me, I being the contractor.

4259. (*Chairman.*) I understand you to say that you attended a meeting which you called on the 15th of June 1867 about some malicious damage that was done?—No, it was on the 15th of June that it was done.

4260. Is that the damage of which you have been speaking?—Yes, the 4,600 bricks.

4261. Did you attend the meeting that took place afterwards?—It was before that that the meeting was which I attended.

4262. Was there any meeting afterwards?—No, not that I am aware of. I never attended any meeting till last Thursday night.

4263. You never attended any meeting in which anything of this sort was discussed?—No.

4264. Where did you live in the year 1862?—In the same place that I live in now, Saville Street, opposite the City Gaol.

4265. Where does your brother live?—I made a mistake. We lived opposite the City Gates, and we have shifted.

4266. Did your brother live at the same place as you in 1862?—No, he lived in Clew Street.

4267. Where you lived in 1862 was opposite the City Gates?—Yes.

4268. You lived there at that time?—Yes.

4269. You mentioned that your brother bailed the men who were apprehended?—Yes.

4270. Who were the men that were apprehended?—One of the name of Donnelly and Thornley.

4271. There were two?—I do not know of any other. It was for insulting the police.

4272. They were apprehended?—Yes, and a man named Ellis, he was apprehended in Rusholme.

4273. Where did these men, Donnelly and Thornley, live?—At Dalton Bridge.

4274. Near you?—Perhaps half a mile off.

4275. Where is Clew Street?—At West Gorton.

4276. Half a mile off you you say they lived; did

they all live in the same place ?—Donnelly and the others lived in Gorton Bridge.

4277. Was Peter Manning the man that was apprehended ?—He lived in Gorton Road.

4278. Was James Kelly apprehended ?—Yes.

4279. Did he live in Ardwick ?—Yes.

4280. Where did Donnelly live ?—At Gorton Bridge.

4281. Was a man named Comer apprehended ?—He was apprehended.

4282. Where did he live ?—In Ashton Road.

The witness withdrew.

JOSEPH RIGBY sworn and examined.

J. Rigby.

4283. (*Mr. Barstow.*) What are you ?—A brickmaker.

4284. Are you a member of any union ?—No.

4285. In June of this year were you employed to make bricks for Messrs. Aitken and others ?—Yes.

4286. At Levenshulme ?—Yes.

4287. Were Messrs. Aitken engaged in any building there ?—Yes, they were putting some buildings up yonder for printworks and dyeworks, I think.

4288. You contracted to make their bricks for them, did you not ?—Yes.

4289. How many men did you employ ?—Sixteen besides me and my partner.

4290. That is to say there were 18 altogether ?—Sixteen, lads and all.

4291. Do you know whether any of them were union men. You employed both union and non-union men, did you not ?—They all paid into the Stockport union at the time.

4292. They were all members of the Stockport union ?—Yes.

4293. Do you remember some bricks being destroyed ?—Yes.

4294. When was that ?—It was somewhere about the 15th of June, I think; somewhere there.

4295. When did you first hear of the bricks being destroyed ?—One Sunday morning.

4296. How soon after they were destroyed ?—The day but one after. I do not know whether they were destroyed on the Friday night or the Saturday morning; it was on Sunday morning that I heard of it.

4297. Did you go and see ?—I went to see them on Sunday morning.

4298. Could you tell how they had been destroyed ? They had been destroyed by trampling on them.

4299. How many people had been engaged in trampling upon them ?—There looked to be about five or six footmarks.

4300. How many bricks were destroyed ?—4,500.

4301. What was the value of them ? What amount of damage was done ? — They cost me 7*s.* 8*d.* per thousand, and it cost me 2*l.* to take them away again.

4302. 2*l.* of damage was done ?—Yes.

4303. Was any of your plant destroyed ?—No.

4304. At that time were you aware of any difficulty between the Stockport and Manchester union ?—There was a disagreement between the Stockport bricksetters and the Manchester brickmakers.

4305. Were those bricksetters in the employment of Messrs. Aitken ? — They were employed under Luke Robinson.

4306. They were building, however, for Messrs. Aitken ?—Yes.

4307. What was the dispute ?—The Manchester brickmakers and bricksetters wanted to take that place. They thought it belonged to their union, and the Stockport brickmakers thought it belonged to them.

4308. You used the word "bricksetters" just now; are they the same as the brickmakers ?—No; the brickmakers and the bricksetters are different.

4309. The bricksetters and the bricklayers are the same, are they not ?—Yes.

4310. Then both the Manchester brickmakers and the bricksetters thought that the work ought to be done by Manchester men ?—Yes.

4311. Do you know to what union the bricksetters belonged ?—Upon Messrs. Aitken's work ?

4312. Yes.—To Stockport.

4313. Both belonged to Stockport ?—The bricksetters did.

4314. Did the bricksetters and brickmakers both belong to Stockport at that time ?—Yes.

4315. Did the Manchester men make any attempt to get the work of making the bricks there ?—Not that I am aware of. They never attempted anything while I had been there.

4316. How do you know then that they claimed it ?—When first I went to it there was a strike, and the men came to me and wanted to know whether I would engage to make the bricks there.

4317. And who was the man that was there before you ?—Joseph Hibbert.

4318. Joseph Hibbert had been making bricks there for Messrs. Aitken ?—Yes.

4319. And his men were Manchester men ?—Yes.

4320. Then the Manchester men went away, and you came with the Stockport men ?—Yes.

4321. How long was that before those bricks were spoiled ?—Well, I am sure I cannot tell you. I think I started making bricks somewhere in May or the beginning of June. I believe it was in June when I first started making.

4322. Do you know a man named James Kay ?—Yes.

4323. Did you see him about this time ?—He has been into the yard several times.

4324. Had you any talk with him about this dispute ?—No, he never said anything to me all the time he came in.

4325. Did you ever hear him say anything ?—I did hear him say once that he could hang all the Stockport union for 100*l.*: that is all I ever heard him say.

4326. What did he mean by that ?—I cannot tell you any more; that is all that I heard him say.

4327. Was that an angry expression; had it any meaning ?—He turned himself round and walked away as soon as he said it. I cannot tell you any more.

4328. Did you hear him say anything about the Stockport Old Church ?—No.

4329. Have you had other bricks damaged ?—Yes, last Wednesday night but one, or else Thursday morning.

4330. What damage was done ?—19,920 bricks were damaged, but we saved what we could out of them.

4331. Have you any idea what that was for ?—I have no idea what it was for, except it is the same as the other was.

4332. Did you examine the spoiled bricks ?—Yes.

4333. I suppose they had been trampled on ?—Yes.

4334. What amount of damage in money was done ?—It cost me 7*l.* 13*s.* 4*d.*

4335. Did you give information to the police ?—Yes.

4336. Did they detect anyone ?—Not that I have heard of yet.

4337. How many people had been engaged in it ?—There was about six or seven different footmarks.

4338. Could you trace the people any way ?—We could trace the people going across the corner of the brickyard and crossing the Gorton Brook Road, just about 30 yards. We could not trace them further.

4339. Could you trace them all the way along the road to Gorton ?—No, we could not trace them any further.

4340. Did you trace them in the direction towards Gorton ?—Yes.

4341. Had you any quarrel with anyone ?—No.

4342. You are good friends with all your neighbours are you ?—Yes.

FOURTH DAY.

J. Rigby.

Sept. 1867.

4343. And you can give no reason for this damage being done to your property except on account of the dispute between the two unions?—No.

4344. Have you ever sold bricks out of the district?—Mr. Aitken has not that I am aware of.

4345. You do not sell bricks?—No.

4346. You do not know that Mr. Aitken has ever sold bricks out of the district?—No, not that I am aware of.

4347. Have you had any dispute with the Stockport men?—No.

4348. They are all working with you now?—Yes.

4349. (*Mr. Chance.*) Do you suppose that the damage done to the bricks was done by a member of the Stockport union?—I cannot say who it was done by.

4350. Was there any reason why the Stockport men should have done the damage?—No, not that I know of. There was no reason with me that I know of.

4351. There was no reason why the Stockport union should do the damage?—No.

4352. But was there any reason why the members of the Manchester union should do the damage?—There was no reason but this dispute between them.

4353. It was a dispute between the Manchester and Stockport unions?—Yes.

The witness withdrew.

P. Johnson.

PETER JOHNSON sworn and examined.

4354. (*Mr. Chance.*) Are you in Messrs. Aitken's service?—Yes.

4355. Are you working for Mr. Rigby?—I am working for Mr. Aitken.

4356. Mr. Rigby is the contractor for Mr. Aitken, is he not?—Yes.

4357. And you are working in Mr. Aitken's employ?—Yes, I work for Mr. Aitken.

4358. Were you working for Mr. Aitken in June of this year?—Yes. I was working for Messrs. Aitken in June and after Whitsun week when this first lot of bricks was spoiled. I engaged with Rigby as a night watchman to watch for about four or five hours a night, from 10 till 2, and when the nights got rather longer from 10 till 3 o'clock.

4359. Are you a Stockport man?—No, I am a Levenshulme man.

4360. Are you a member of any union?—No.

4361. Neither of brickmakers nor of bricklayers?—No.

4362. Do you remember some damage being done to Mr. Rigby's bricks?—Yes.

4363. That was on the night of the 14th of June, was it not?—It was from Whitsun Friday night to Saturday morning that the bricks were destroyed.

4364. Had you heard previously to that of any damage being likely to be done?—Well during the time that I was watching there was a watchman that Mr. Aitken employed to watch over the works.

4365. Who was that?—His name was Anderton, and he was along with me from 10 to 3 or from 10 till 2 in the morning, and he told me this after the first lot was spoiled. There is a cabin in the brickyard, and we were both standing by the cabin door.

4366. When was the first lot destroyed?—The first lot was destroyed on the 14th of June.

4367. But before that destruction had you heard anything about any damage being likely to be done?—No, not before the first lot was spoiled. It was after the first lot was spoiled that I engaged watching with Rigby.

4368. Then you had not been watching before the first lot was spoiled?—No, it was after.

4369. Had you been in Mr. Rigby's employ at all before the 14th of June?—Yes, I had worked there for a few months.

4370. But not as a watchman?—Not as a watchman.

4371. You are sure you heard nothing about it until the 14th of June?—Yes.

4372. You are quite certain about it?—Yes.

4373. What was the first time that you heard anything about this matter?—It was a fortnight after Whitsun Sunday when I started watching, and as we stood at the side of the cabin door, he said, he had had word sent him and we must be cautious and watchful for they would come again. Well, the first time he told me I took very little notice of it, and laughed it off, and then he told me again a day or two after that they would come, but he did not know when they would come, and with that I put it off with a laugh again, and at last I said, "Who told you?" and he told me that it was a man of the name of Cox, that had used to live in a house belonging to the works, besides Mr. Aitken's front gates; he was a contractor of bricksetting, and he contracted first in Aitken's business at Levenshulme.

4374. He said Cox told him?—Cox sent him word that he must be very careful and mind and keep his eyes open, for they would come again some night, but we did not know when.

4375. Did he say who they were that would come?—No, he never said who they were.

4376. Are you sure that this was after that lot had been destroyed on the 14th of June?—Yes.

4377. Did you tell this to anybody?—Yes, I told this to Rigby, and I told it to Hill.

4378. Who is Hill?—Hill works in the brickyard under Rigby.

4379. Is he a brickmaker?—He is a brickmaker; he works along with Rigby.

4380. Has not the name of any person been given to you as having given this notice?—No name was given to me, only Cox had sent him word that we must be very careful minding.

4381. Was Cox at that time in Aitken's employ or in Rigby's employ?—No, Cox never worked under Rigby; Cox is a man of himself; he is a bricksetter, and Rigby is a brickmaker.

4382. Cox is a bricklayer?—Cox is a bricklayer.

4383. For whom was Cox working?—I do not know for whom he was working when he sent word.

4384. Where was he working?—He was working somewhere about Manchester or Salford, but I do not know where.

4385. Is he a Manchester bricksetter?—Yes.

4386. He has nothing to do with Stockport, has he?—Not that I am aware of.

4387. Do you know Cox's christian name?—I think his name is Edward, Ned.

4388. Did you say "Anderson" or "Henderson"?—Anderton.

4389. Is Anderton any relation to Cox?—Not that I am aware of. He was a neighbour of Anderton's, the next-door neighbour.

4390. Who was?—Cox was, when he was working for Aitken.

4391. And you do not know whether he was any relation?—No, I do not know.

4392. You do not know whether he married Cox's daughter?—No; Anderton is a far older man than Cox.

4393. Did you give any information of this to Aitken or Rigby?—I mentioned it to Rigby.

4394. How long after you had mentioned it did it happen?—It might be a week; I did not tell him straight on there, and then because in fact I took very little notice of it; I took very little notice of it after the second time of his telling me, but I thought if they happened to come and lame one, and so on, I would tell him so that they might be aware and have somebody to fly to, but I never knew any further.

4395. And you have no further information to give us about that outrage?—I have not.

4396. There was another outrage after that on some of Rigby's bricks, was there not?—There was some bricks spoiled the other week; last week I think it was, a week on Thursday morning, it was last Thursday

week or Wednesday night week, between Wednesday night and Thursday morning.

4397. Who was acting as watchman for Mr. Rigby then?—I do not know that he had any watchman at that last time that the bricks were spoiled. It was the beginning of August when I gave over watching for Rigby.

4398. (*Mr. Barstow.*) Had you mentioned to Rigby this conversation between you and Anderton?—Yes, I mentioned it both to Rigby and to Robinson.

4399. To Luke Robinson?—Yes.

4400. Did they do any thing upon that?—Not that I am aware of.

4401. Do you happen to know Cox. Is he a neighbour of yours?—No, he is not a neighbour.

4402. How far does he live from you?—I live in Back Levenshulme, near the works.

4403. But what distance was there between your houses at that time?—I should say 250 yards, or from that to 300, where Cox was living when he was up at Levenshulme, when he was under Aitken.

4404. Do you know him at all?—Well, I have seen him, but he is a person that I have never had any conversation with, more than half a dozen words; I do not know that I have spoken more than half a dozen times to Cox altogether.

4405. Did you ever ask him where he got his information from?—No, I never mentioned it to Cox or Cox to me, because I never saw him before yesterday.

The witness withdrew.

EDWARD COX sworn and examined.

E. Cox.

4406. (*Chairman.*) What are you?—A bricksetter.

4407. How long have you been so?—Something like 25 or 26 years I suppose.

4408. Do you belong to any club?—Yes, I belong to the bricklayers.

4409. What is the name of it?—I am sure I do not know the name of it; it is off the Liverpool Road.

4410. Do you mean near here?—Yes, at Manchester.

4411. You must have some notion of the name surely?—I never took any notice of it. I have heard the name, but I have never taken any notice of it.

4412. Do you mean to swear you do not know the name of the club of which you are member?—I never go near it unless to take my money.

4413. Be careful! you must surely know the name of the club?—I am upon my oath, and I do not know the name of the club.

4414. I warn you to be careful! How long have you been a member of the club?—About 20 years.

4415. You mean to say you do not know the name of it?—I do not just this minute.

4416. Then you did the last minute?—I have not got it in my head.

4417. You must know the name of it?—I will tell you when I can think of it.

4418. I will give you a little time then. (*After a pause.*) For what purpose is the club?—It pays money for protection I suppose, and for accidents.

4419. And for protection. That is if men are out on strike you pay them, is that your notion of protection?—I do not pay anybody.

4420. I am not asking you that. Is that the object of the club? Is that what you mean by protection? Is it the protection of your trade?—Yes, we pay the hands who are out of work at lodge, and for accidents and funerals, and such like.

4421. And protection?—Yes, though we do not get it altogether.

4422. Do you attend the meetings often?—No.

4423. Have you ever been there lately?—Sometimes when I have been taking money, and sometimes I sent a message.

4424. Is it your duty to take the money?—You can either take it or send it.

4425. But are you in any office in the club?—No, nor never was.

4426. Have you a president?—We must have a president, or else we could not conduct the lodge, but I do not know his name.

4427. I asked you whether you had a president, your answer might have been "Yes." Who is the president now?—I do not know.

4428. When did you last attend a meeting?—I was there on Monday night.

4429. Who was in the chair?—I will swear I do not know his name.

4430. Have you known him for some time?—No.

4431. Is he a young man or an old man?—He is something about the same age as myself.

4432. You swear you do not know his name?—Yes.

4433. Have you any secretary?—Yes, I expect we have.

4434. Have you any doubt about it?—I do not know any of their names.

4435. I am not asking you the name, I asked if you had a secretary to the club?—Oh yes.

4436. Have you a treasurer?—Oh yes. I have been robbed many a time with them too.

4437. Who have been robbed?—The society.

4438. Robbed by whom?—The treasurer.

4439. Is that what you mean?—Yes.

4440. Who is the treasurer now?—I do not know. I am a very poor scholar, and I do not keep things in my head.

4441. But you know the man's name, surely?—There is a good deal of our trade going backwards and forwards, and we cannot pretend to know men that are coming in and out every day.

4442. But you might know a man's name?—Yes, if they are in the town I might know the name.

4443. Can you tell me the name of any man who during the last five years has been president, secretary, or treasurer of your club?—Yes, there is one named Brown.

4444. What is his christian name, because Brown is not an uncommon name you know?—I cannot tell you his christian name I am sure, I have worked with the gentleman, and we called him Brown, that is all I know of him.

4445. Is he a bricksetter?—Yes, I worked with him for Mr. Barker.

4446. Was he president?—I do not know whether he is not treasurer, he was president.

4447. Is he treasurer now?—I think he is.

4448. Now we are getting on. Where does Brown live?—I do not know.

4449. Where does he work now?—I do not know that, we work in one place one day and we are off another.

4450. Have you known any man who was secretary?—I am such a good scholar that I never take notice who is secretary or anything.

4451. Do you not remember anybody whoever was secretary?—No, I dare say Brown is; I do not know whether he is or not.

4452. But he would not be secretary and treasurer at the same time, would he?—He may be, but I am such a good scholar I do not know much about it.

4453. You do not know any other man do you?—No.

4454. Come, you know a man who has been president, do you not?—It is very seldom that I go there; I do not think I have been there four times these six years.

4455. When was the last time?—I was there on Monday night, and the man that I saw on Monday night I do not think that I ever saw but about twice or three times in my life before.

4456. And you do not know his name?—No.

4457. How many of you met on that night?—There would be a good many there, but I could not tell how many.

4458. 100?—I daresay there would. They were going in and out.

FOURTH DAY.

E. Cox.

7 Sept. 1867.

4459. Where did you meet?—I can tell you where the public-house is.

4460. Did you meet in the public-house?—Yes, our lodge is kept there at the public-house.

4461. What is the name of the public-house?—I am sure I cannot tell you.

4462. You are not scholar enough to know the name of the public-house?—No, and I do not take much notice of a public-house; I do not drink much. I have been six years and not taken any drink, and that makes me not take much notice of the names; they are bad places to go to.

4463. But do you mean to swear that you do not know the name of the public-house in which you had your meeting on Monday night?—I mean to swear that I do not know the name now; I took so little notice of it.

4464. You know the place?—I know the way to go to it.

4465. Which is the way?—Right up Gas House Street and across Liverpool Road.

4466. What is the name of the street?—I do not know the name of the street.

4467. Is it north, south, east, or west?—I do not understand north, south, east, and west; my father never taught me it.

4468. But you mean to swear you do not know the name of the street in which it is?—Yes, it leads out of the Liverpool Road.

4469. What does?—The street in which it is.

4470. As you get out of this street is the public-house on your right or your left, you know your right hand from your left, do you?—Yes, it is on the right hand coming from Deansgate, and on the left coming from Water Street.

4471. What did you discuss on Monday night—There were several things agreed.

4472. I daresay there were. What did you discuss?—I do not know, I could not tell you.

4473. Yes you do know; your memory cannot be so bad as all that, it is only five days ago and you are a sober man too?—Yes.

4474. You must remember surely what took place that Monday night?—I was in, I daresay, a couple of hours on Monday night.

4475. Did you talk about the inquiry that was going to come on here?—No, I never heard your name mentioned.

4476. I am not asking that; but did you never hear there was going to be an inquiry?—No, I never heard it mentioned, I went to pay my contribution, and I went down and came home again.

4477. Did you receive any information that some injury had been done to some bricks at Levenshulme a short time ago, last June?—No.

4478. Do you know John Henderson, the watchman, at Messrs. Aitken's?—Yes, I know him particular well; I know him as for this, going out to do a job for Mr. Aitken there.

4479. Did you send him any warning?—Oh no.

4480. Did you send him any communication at all?—No.

4481. That you will swear, will you?—Yes.

4482. Did you hear anything of an outrage going to be done before it was done?—No.

4483. You knew the bricks were destroyed afterwards?—I knew there had been some destroyed, but I never knew what day it had been done on or anything.

4484. You heard they had been destroyed?—Yes.

4485. But did you hear before they were destroyed that they were going to be destroyed?—No.

4486. You swear that?—Yes.

4487. And you never sent any warning to Henderson?—No. I have never been that road since.

4488. I am not asking that. You know you do not know the roads very well. Did you send anybody to go to give warning?—No.

4489. That you swear?—Yes.

4490. Did you tell your wife about it?—No.

4491. Did she tell you anything about it?—No.

4492. That you swear, do you?—Yes.

4493. Nothing of the sort took place?—No.

4494. Did you know that there was any quarrel between the Manchester and the Stockport unions?—No, not that I am aware of.

4495. Have you ever heard of it?—No.

4496. Where do you live yourself?—I live in Salford, at the side of Broughton Bridge.

4497. Did you work at Levenshulme last June?—I cannot tell you when I came away and when I went.

4498. Were you at work at Levenshulme last summer?—Yes, for a short time.

4499. Where were you working at Levenshulme last summer?—I was working for Mr. Aitken.

4500. How came you to leave?—I got sacked and it was time to leave when we got sacked.

4501. How do you mean "sacked"?—We got bagged at a minute's notice. We got the dirty kick out.

4502. You mean you were told to go?—Yes.

4503. Who told you to go?—The draughtsman.

4504. What is his name?—Johnson.

4505. Johnson told you to go, did he?—Yes.

4506. Was that last summer?—Yes.

4507. Was that Peter Johnson?—I do not know his other name.

4508. He told you to go?—Yes, he stopped all the men.

4509. How many men were stopped?—Three and myself.

4510. And he told you to go at once?—Yes.

4511. And off you went?—He said if they would not comply to his rules he had a note down that they were to be stopped. So I told the labourers to come out on Monday morning and pack the scaffolding up, but he said I had better stop another week and see whether Mr. Aitken would come to or not, and so I did. I thought I would not be as saucy as him, but he would not come to, so we gathered up our tools and flitted.

4512. What do you mean by Mr. Aitken "coming to"?—To see if he would either allow us walking time in the morning or pay lodgings.

4513. Was the complaint that he would not pay enough?—He would not either pay lodgings or allow walking time.

4514. And that according to your rules you ought to have been paid?—Yes, and I think it is a very good rule if a man has to walk six miles in the morning.

4515. And because he would not pay that you went off with your tools and went away?—Yes, he allowed me everything and I had got a load of coal and everything, and then he wanted us to do it without.

4516. And Johnson came and gave you the orders to be off, and you were off immediately?—No, I stopped a week there, but I was not that savage with them as they were with me. I stopped a week for his orders to see whether he would allow either lodgings money or walking time, and he would not.

4517. Is Johnson one of your delegates?—No, he is one of Aitken's delegates.

4518. But how is it that Johnson gave you the order to be off?—I suppose Mr. Aitken told him. He gave us orders to be sacked if we would not work their rules.

4519. Johnson did?—Mr. Aitken gave Johnson these orders to work on. According to what he told me he had a letter from Mr. Aitken that we were to work from 6 o'clock in the morning, and until 1 o'clock on Saturday, and 6 o'clock on other nights, otherwise they would get fresh men, and so we had to leave.

4520. Was Johnson in Aitken's employ?—He is in Aitken's employ. I suppose he is a draughtsman for Aitken. He draws plans out for machinery and such as that.

4521. Is he the foreman or what is he?—I do not know; he is the draughtsman and all I reckon. I was the foreman, but he took my stripes off me. He lost me about 60*l.* and it is not a bad stripe that, and he owes it me if he would pay me.

4522. Have you demanded either of Johnson or

Aitken to have this walking time or this lodging money ?—He gave it us. He knew our rules.

4523. How long had he been giving it you ?—I worked about a fortnight or three weeks until I got tired.

4524. How long had he been giving you either the walking time or the lodging money ?—About a fortnight.

4525. Then did he cease to give it you ?—Yes.

4526. And then after he had ceased giving it you you ceased working ?—Yes.

4527. Did he give you the option of going on at the time without the walking time or the lodging money ?—Yes, if I would take it on piecework, but I could not do it. I told him on the first onset before I went to the job that it could not be done by piecework at all, and therefore I said before I would take piecework that I would have nothing to do with it, because there was so much pulling down and building up that I could not take it. I said I might give a rambling statement but I would not take it on piecework, so I went up with him and looked at the job, and I saw that it could not be done without a deal of machinery shifting and a deal of pulling down and building up, and I said that it could not be taken as piecework, and I would not have anything to do with it as piecework, but I would do it as day work if he had a mind. He said, "Very well, get some men there the first thing on Monday morning." So I got the brickmakers out and a lot of labourers out, and got them there, and got them all agate at work. I walked out there every morning and he begged me to go out and live and I got my furniture down, and got a load of coal down, and as soon as I had got nicely settled they wanted to knock the walking time off.

4528. You refused piecework ?—Yes.

4529. You started receiving lodging money or having walking time ?—Yes.

4530. How long did you receive lodging money or walking time ?—About three weeks.

4531. Then they ceased to pay it and you continued one week after and then came out ?—Yes.

4532. Do you live at Salford ?—Yes.

4533. Have you a right according to your rules to go and work at Levenshulme ?—Yes, or at any other place.

4534. Have you a right according to your rules to work in the Stockport district ?—Yes, at any place. We can work in any town wherever we can get a job.

4535. According to your rules, then, a Stockport man may come and work within your district ?—Yes, or a London man either ; and there are London men working here now, and Manchester men working in London.

4536. Do they get permission from you before they begin ?—No they bring their cards with them from the London lodge.

4537. They leave a card with you first. Do they not get any permission from you first ?—No, they have nothing to do but to get a job and start.

4538. Where they can ?—Yes, they stop wherever they can get work.

4539. Would it have been against your rules if you had gone on working at Levenshulme without having the walking money or lodging time allowed you ?—Yes, we do not fancy it.

4540. That is another matter ?—I would not do it.

4541. But I ask whether it is against your rules to do it ?—Yes.

4542. Not taking the lodging money or the walking time would be against your rules ?—Yes.

4543. You would not let him do that I suppose ?—You cannot help it if he does it.

4544. Do you mean to say no attempt would be made to prevent him ?—I do not.

4645. But it has been done by your club ?—Oh yes.

4546. (*Mr. Barstow.*) I suppose if you had consented to stay with Mr. Aitken upon the terms of giving up lodging money and walking time, you might have done so ?—I do not know. I did not ask him that. He said he would not have me at any price.

4547. He never gave you the option ? — No, he wanted me to take it at piecework but I would not.

4548. Did he give you any reason for turning you away ?—Yes, he bagged my men first.

4549. What do you mean by "bagging your men ?" —He sacked them, stopped them, or at least his draughtsman did.

4550. Before he stopped your men did he give you any option of going on on other terms than those you were working on ?—No, the draughtsman told me that Mr. Aitken was very proud of the way I was carrying on the work, and he said he would make me a handsome present at the finish, and the next thing I heard was that the men were stopped about the lodging money and walking time.

4551. Had there been any dispute about lodging money or walking time before you were stopped ?—No, not that I am aware of.

4552. Then, according to your account, he simply turned you away without a shadow of a reason ?—Yes, the draughtsman told us when he was paying us that he had got in a letter from Mr. Aitken that we would either have to do without lodging money or walking time, and come to their rules, or otherwise they would get fresh men.

4553. Then if you had chosen to have come to his rules you might have stayed. You did not comply with those rules ?—No ; I said it was very strange that Mr. Aitken did not acquaint me about it, and he said, "Well, will you keep on another week and see Mr. Aitken about it ?" and I said, "Yes."

4554. You told us that before. You say that Mr. Aitken wanted you to take this job by piecework ?—Yes, at first.

4555. Did you make out an estimate as to what you would do it for ?—No, Mr. Belcher, the architect, made it out for me.

4556. Did you ever make out an estimate ?—Never ; I generally get it done by the architect. Mr. Belcher has generally done mine.

4557. (*Mr. Chance.*) You say it is against your rules to work without having lodging money or walking time. Is that a printed rule of which you speak ?—There are rules signed by the Master Bricklayers' Association. They have made starting-places for themselves where we must all start at.

4558. But there are certain printed rules belonging to your union ?—Yes, the masters have them and all.

4559. Is it on the printed rules of which you have spoken that you are entitled to have either walking time or lodging money ?—Yes, it is on the printed rules for the masters and all.

4560. Have you a book of those rules ?—No, I never carry one with me unless I am going to start a job, and it is out of the town.

4561. What month in the summer was it that you were working for Mr. Aitken ?—I am sure I cannot tell you. It was just at the beginning of the spring. I took brickmakers out there to start casting.

4562. When was it that you left him ?—I was only there about five or six weeks or so working for him.

4563. You would have been away from him before May, I suppose ?—I dare say I should.

4564. (*Mr. Barstow.*) Do you know what men succeeded you. Where did they come from ?—They came from Manchester.

4565. You went away. Who took your position at Mr. Aitken's work after you came away ?—I think his name was Robinson. He lives in the neighbourhood.

4566. Is he a Manchester man ?—He is a Levenshulme man. I had to flit. I asked the same man for a job, and he would not give me a job. I said I had my things there, and it was very awkward, but he would not give me a job.

The witness withdrew.

FOURTH DAY.

Mrs. T. Cox.

7 Sept. 1867.

Mrs. Tamar Cox sworn and examined.

4567. (*Chairman.*) You are the wife of the last witness, are you not?—Yes.

4568. Do you remember your husband working at Mr. Aitken's works at Levenshulme in the summer?—Yes.

4569. He was at work sometime in the summer of this year, was he not?—Not this year; last year.

4570. He had left about May, I think, had he not?—He had left before May, I think; but, to tell you the truth, I do not know what day of the month it was.

4571. He left somewhere about May?—Yes, it would be somewhere about that.

4572. Where did you live then, at Salford?—No, close to the office door at Mr. Aitken's.

4573. Did you continue to live there after he ceased to work?—Yes, we lived there till August, the latter end of August.

4574. Was John Henderson the watchman there?—Yes, the old gentleman.

4575. His name is John Henderson, is it not?—Yes.

4576. We understand some outrage or destruction of bricks took place there some time in June, did it not?—I do not know.

4577. But you have heard that there was some destruction of bricks there?—I never heard till I went over to Mr. Henderson's.

4578. But you heard it then?—I heard it when I was there.

4579. When was that?—It will be five or six weeks ago, I cannot tell exactly to the day.

4580. Had you heard before anything was done that it was probable that it would be done?—No.

4581. Had you had any intimation given you that something of that sort was in contemplation?—No.

4582. Did you send any warning or message to Henderson, the watchman?—No.

4583. You never spoke to him upon the subject?—No.

4584. Did you speak to anybody else on the subject?—No, only when the old gentleman told me that there had been some bricks spoiled. He is very old; and I said to him, "Well, Mr. Henderson, if I were you I would take care of myself."

4585. But before the bricks were spoiled had you made any remark or sent any message to him?—No, not the slightest; I did not know till I went.

4586. But did you ever hear or send any intimation of the sort, that it was likely to be done?—No, I did not in the slightest.

4587. Were the bricks spoiled more than once?—I do not know.

4588. But you heard of their being spoiled, did you not?—I have not heard anything but what I have heard this last week.

4589. But you have heard about the bricks being spoiled more than once, have you not?—I have heard nothing about their being spoiled since I have been here that is all; that is since yesterday.

4590. Did you hear whether they had been spoiled more than once?—No, I did not hear that they had been spoiled.

4591. And you will swear that you never sent any warning of any kind or description?—Yes, I will.

4592. Did anybody ever talk to you on the subject?—Not the slightest.

4593. And you have not the slightest notion about it?—No, indeed I have not.

4594. Your husband left off working there in May, did he not?—I think it was in May; he was only there for five weeks.

4595. Do you know why it was he had left off?—Not exactly. I do not know what had been between the master and him.

4596. But surely you know why he had left?—I never scarcely interfere between the master and him.

4597. But did he tell you why he had given up?—No, no further than he had had some words with Mr. Aitken.

4598. You did not hear of any disturbance between the unions?—No.

4599. Nor any disturbance with regard to the club?—No, I never go to the club.

4600. Are women members of the club?—I do not suppose they are.

4601. Then women do not go to the club?—No.

4602. You never heard anything about this matter?—No.

4603. And you never sent any warning to Henderson either directly or indirectly about it?—No.

4604. That you will swear?—Yes.

4605. (*Mr. Chance.*) The club meets at a public-house, does it not?—Yes, I believe it does.

4606. What street is it in?—I do not know the street, for I am not acquainted with the part it is in exactly. It is somewhere towards Liverpool Road.

The witness withdrew.

Mr. T. Aitken.

Mr. Thomas Aitken sworn and examined.

4607. (*Mr. Barstow.*) What are you?—A calico printer.

4608. At Levenshulme?—We are building works at Levenshulme; at present we are at Chorley in Lancashire.

4609. You are building works at Levenshulme?—Yes.

4610. You are building upon your own land?—Yes.

4611. And making bricks yourself upon your own land?—Yes, we started last year to make the bricks.

4612. Did you contract with a man named Hibbert?—No, I did not, another man did it last year; we contracted with a man of the name of Hibbert this year. I do not know who was the contractor last year, it was another member of the Manchester union of brickmakers.

4613. You know that he was a member of the Manchester union?—Yes.

4614. He left you?—No, not till the end of the season.

4615. He completed his contract?—He completed his contract.

4616. This year Hibbert came?—Yes.

4617. He seems to have made bricks for you until when?—About the middle of May or so.

4618. The 7th of May?—Yes, the 7th of May.

4619. What was the cause of his leaving you?—The Manchester union stopped him.

4620. The Manchester union stopped him?—Yes, they did.

4621. How do you know that?—From hearsay only.

4622. Did Hibbert tell you?—No; although I know every particular about the case, I do not know personally because everything is brought before me, but it is my brother, the manager, who met with Hibbert and the other people connected with the works.

4623. Last year and so long as Hibbert was your contractor the bricks were being made by members of the Manchester union?—Yes.

4624. Were the bricklayers also Manchester men?—We commenced with a man of the name of Cox, and our arrangement with him was to give him 2*s.* a week extra to superintend the other hands employed.

4625. He was to be a sort of a foreman?—Yes.

4626. And had 2*s.* a week extra?—Yes.

4627. Did you make any arrangement with him about walking money or lodging money?—I never heard of it till after he started work.

4628. You are speaking now of what is within your own knowledge, are you?—Not of my own knowledge as coming in contact with Cox.

4629. Did you pay Cox and his men weekly?—Yes.

4630. When you paid them did you hear anything about lodging money or walking money?—Yes, after they started.

4631. Before?—No, our arrangement was so much per week for each man without walking money or lodging money having been mentioned to us until after they started.

4632. Were you aware of any rule in the union by which lodging money and walking money was to be paid exclusively of the agreement of so much a week? —No.

4633. How long was Cox in your employment before you heard anything of lodging or walking money?—I should think the first week.

4634. As a matter of fact did he claim it the first week?—I cannot pay.

4635. When did you first hear of it?—Shortly after he started; the first week or two after he started.

4636. Did you agree to give it him?—No, that was the point upon which we separated.

4637. He was with you altogether about five or six weeks?—Yes.

4638. And although you declined he continued working for you those five or six weeks?—Yes.

4639. Did he continue during all that time making his claim for lodging?—Yes. In answer to that question of how I knew that the Manchester union stopped the brickmakers, I should say that I knew from the delegates from the Manchester union who waited upon me and told me they would stop them.

4640. The Manchester delegates waited upon you? —Yes.

4641. At what time was this?—Sometime before they stopped them.

4642. We are speaking of the period of five or six weeks?—Yes, I am talking of the present year.

4643. Do you remember about what time it was the Manchester delegates called upon you?—I cannot say the day: it was when the fine weather began.

4644. Early in May probably?—Yes, when the fine weather began.

4645. Do you know who those delegates were?— I do not know them by name.

4646. How do you know that they were Manchester delegates?—They represented themselves as such.

4647. What conversation had you with them with reference to this business?—Which year are you alluding to?

4648. This year I suppose. I understand you to say it was early in May?—Last year, after Cox gave up we got an estimate from a neighbour, a Levenshulme man who employed men belonging to the Stockport union.

4649. Did any outrage follow upon that last year? —No, but the delegates waited upon us several times about this and threatened to stop the brickmaking last year.

4650. What reason did they give?—Because the district belonged to the Manchester union, that it was within the bounds of the Manchester union.

4651. Then the man who preceded Hibbert as the contractor to make bricks was not a Manchester bricklayer?—Yes, he was; the bricklayers after Cox left were Stockport men.

4652. Did not Cox leave this year?—No, last year.

4653. Why should the Manchester brickmakers object to the brickmaking going on if the bricklayers were from Stockport?—That was one of the rules; they will not allow any bricks made in one district to be used in another district; they must be made within a circle of four miles from Manchester.

4654. Did they explain to you that that was the reason?—Yes.

4655. And it is from their explanation that you know that is the rule?—Yes.

4656. We have had enough of last year; now do you remember some bricks being destroyed this year? —Yes. Perhaps I may mention that before the bricks were destroyed and while Hibbert was making the bricks for us this year we had sold some 25,000 or 30,000 bricks to a gentleman in Levenshulme, and we had to cancel the sale because the Manchester bricklayers would not use the bricks, although they were claiming the district as being in Manchester.

4657. Although it was in the Manchester district the Manchester bricklayers would not allow them to be used?—No.

4658. (*Chairman.*) Why not?—We cancelled the sale on that account because he said they were not used in the Manchester district; that was the only answer he gave.

4659. (*Mr. Barstow.*) Hibbert left your employment this year?—Yes.

4660. Why was that?—Because the contractor who had the work previously put two extra hands on in the beginning of May belonging to the Stockport union; the Manchester brickmakers and the Stockport bricklayers were getting on quietly enough till we asked for more hands to be put on when the fine weather came, and because he put on two extra hands this disturbance arose.

4661. How do you know that that was the cause of Hibbert leaving you?—The delegates told us that was the cause.

4662. Which delegates were those?—The delegates from the brickmakers, bricklayers, and labourers of the Manchester unions.

4663. Had you an interview with them?—Yes.

4664. I did not catch from what unions you said? —Brickmakers, bricklayers, and labourers.

4665. They called upon you?—Yes.

4666. When was this?—At the beginning of May, I think.

4667. Were these delegates from Manchester?—Yes.

4668. What did they say to you?—They said that unless Robinson discharged the two men he had taken on and put on two belonging to the Manchester union they would stop the brickmaking.

4669. They were all present together when they said that?—Yes.

4670. Was anyone besides you there on your side? —Yes, I dare say there would be; it was in a public office at the warehouse.

4671. They came to the office in the warehouse?— Yes.

4672. Then I suppose you, like Robinson, did not consent to put on Manchester men?—No.

4673. And the Stockport men continued to work? —Yes.

4674. I understand that shortly after that Hibbert left your employment?—Yes.

4675. Joseph Rigby came in his place?—Yes.

4676. How soon after Rigby came did anything happen to your bricks?—I should think within a fortnight; my bricks laid for more than a fortnight exposed to the atmosphere without anything being done to them; all that were in the field.

4677. I think we have got all the details from Rigby. Was there any further difficulty between you and the Manchester union between the first and the second time of the bricks being destroyed?—No.

4678. Nothing more?—No, we have never had any difficulty with the union; it has always been between the two unions.

4679. The Manchester delegates came to you?— Yes, for us to use our influence with the Manchester men, or to discharge them.

4680. You had a watchman named Henderson, had you not?—Yes.

4681. You put him on after the first time your bricks were destroyed?—We put him on from the time we purchased the property.

4682. He has been there all along?—Yes.

4683. You thought it necessary from the first to have a watchman to protect your property?—Yes.

4684. Why was that?—To prevent petty thefts going on.

4685. Did he say anything to you about a visit being expected to your brickyard?—Last Tuesday I was told.

4686. That is in this month?—Yes. I was told last Tuesday that he had said that word had been sent to him from Cox, or Cox's wife, sometime before the last outrage, that he had better keep out of the way or

FOURTH DAY.

Mr. T. Aitken.

7 Sept. 1867.

his life would be taken, as a great many more were coming this time than came before.

4687. (*Chairman.*) That was what you had been informed was told to Henderson?—Yes; I went the next day and saw Henderson and he told me the same thing.

4688. (*Mr. Barstow.*) On Wednesday last you saw Henderson?—Yes.

4689. Henderson then told you that he had received a message to the effect you have already mentioned from either Cox or Mrs. Cox?—Yes; they had told his daughter-in-law and his daughter-in-law had told Henderson.

4690. Who is the daughter-in-law?—His son's wife, Mrs. Henderson; he was to inquire and let me know. I made a mistake, it was last Friday. I went down to him yesterday week; his daughter-in-law was from home and would be home on Saturday, and he was to inquire of her and let me know whether it was Cox or his wife had told her and he sent me up word that it was Mrs. Cox.

4691. When did Henderson send you word?—A day or two after by our manager.

4692. Is your manager's name Johnston?—No, Dean is the name; Johnston is a superintendent of the works.

4693. He sent word by a man named Dean that it was Mrs. Cox that had told her?—Yes.

4694. Do you remember whether she said that that message was given to her to tell Henderson?—I have never seen her.

4695. Have you heard from Dean?—No.

4696. You have told us all you know upon that subject?—Yes.

4697. You have not told us if you know the names of any of these delegates who called upon you?—Not one of them; they gave me the address of their place of meeting; during the first disturbance they wanted us to go down and meet their union and discuss the matter with them, but we always kept out of it. The address they gave me was Charles Lister, Bridgewater Arms, Knott Mill.

4698. (*Chairman.*) What was the date of the last outrage, the 15th of June?—I think so.

4699. (*Mr. Barstow.*) The last outrage was last Wednesday?—Yes.

4700. In respect of which outrage was it that Henderson told you he was warned?—The one last week.

4701. I understand you to say that Henderson told you that Mrs. Cox had sent a message to his daughter-in-law by a man named Dean?—No, I did not say he told me that Cox, or Cox's wife, his daughter-in-law, had been at her house, and had told her to tell him to keep out of the way or his life would be taken, as a great many more men were coming than had come before; that was sent by Cox or Cox's wife through Henderson's daughter-in-law to Henderson.

4702. What was the case about Dean?—Well, he was to let me know whether it was Cox or Cox's wife who had told the daughter-in-law, and Dean said it was Cox's wife; he was to inquire from his daughter-in-law when she came home which it was, she was from home when I saw him.

4703. Dean is your foreman?—Yes.

4704. (*Mr. Chance.*) Did Johnson say anything to you?—No.

4705. Did he not give you information about it?—No, it was the one that was discharged from the works that told me.

4706. Is that your brother?—No, Mr. Johnstone.

4707. He gave information to Mr. Johnstone?—I understand so.

4708. Was Henderson the watchman discharged in consequence of his not having told it?—Yes, he has been discharged for not letting us know beforehand.

4709. (*Mr. Barstow.*) Who discharged Henderson from your employ?—Mr. Johnstone, the manager at the works; we have a man who has full charge of all the offices.

4710. Which Mr. Johnson is that?—He has not been mentioned before; Johnson has been mentioned before, but this is Johnstone.

4711. He would be the man who sent away Cox, according to Cox's account?—Yes.

4712. Can you tell us whether Henderson, when discharged, admitted that he had had this information?—I never asked him again; he admitted to me that he had had the information, and upon that I told Johnstone to discharge him.

4713. Henderson admitted to you that he had had the information, and upon that you discharged him?—Yes.

4714. When you discharged him he did not remonstrate, and say he had not in fact any information?—No.

The witness withdrew.

Mrs. E. E. Henderson.

Mrs. Ellen Ellensworth Henderson sworn and examined.

4715. (*Mr. Chance.*) What is the name of your husband?—William.

4716. Is he a son of Henderson, who is watchman in Mr. Aitken's employ?—Yes.

4717. Are you the daughter of Edward Cox?—No.

4718. Do you remember any injury being done to Mr. Aitken's bricks in the month of June?—Yes; I remember it well.

4719. Do you remember any injury being done to his bricks afterwards?—Yes; I was from home, but I was told when I came home about it.

4720. When you came home was anything told you about any of these injuries?—Yes; I was told there had been some more damage done.

4721. Was anything said to you about them by Edward Cox?—I never saw Edward Cox; when I went to Edward Cox's house he was not at home, and I never saw him.

4722. Was anything said to you about them by Mrs. Cox?—Nothing, only by friendship; she began to ask me about the family, and how we were getting on. She said, "Is poor old father watching still?" and I said, "Yes, he is watching the brickcroft still." She said it was a dangerous work for an old man like him to watch in the croft; that was what Mrs. Cox said to me.

4723. Did she say why it was a dangerous thing to watch in the croft?—No.

4724. Just think?—No; those were just the words she said to me.

4725. Did not you ask why it was dangerous to watch in the croft?—No; I had seen and heard so much about damages and ill-treatment and that, that I did not need to ask.

4726. You believed that it was a dangerous thing?—Yes; and I did not like my father-in-law to be in that place because it was not a fit place for him.

4727. What danger did you think there was?—Because I was uncertain of these brick men.

4728. But did you expect the brickmakers to be doing him some injury?—Yes; I did think it myself.

4729. Did Mrs. Cox say anything to you about doing him any injury?—No, she never did; that was all that I told you.

4730. Did she say that she had heard that injury might be done to him?—No; I have told you the truth of what I had to say, and nothing but the truth, and I do not wish to say anything further; there was nothing else said. I have nothing else to say.

4731. Did you tell your grandfather what she said to you?—I told all of them, not him personally. She did not send any word to grandfather for me to tell him; she told me myself, and I pleased myself whether I told him or not.

4732. What did she talk about?—She asked about the family. She asked me, "Was poor old grandfather

watching?" I said "He was, and he had to watch in the brickcroft as well as the works," and she said to me, "It is no fit job for an old man like him to be in the croft," and neither was it.

4733. And did you tell him that, or did you cause it to be made known to him?—When I got home I told what had passed when I was out.

4734. Did you go home the same day that you talked to Mrs. Cox?—Yes.

4735. And you saw your grandfather?—Yes.

4736. And then you told him what Mrs. Cox had said?—I told them altogether, not him particularly.

4737. You told them that amongst other things?—Yes; I told it at the house.

4738. It rather affected your mind if he was in that dangerous position?—Yes, it is not fit when there is mischief and disturbance in the croft like that for an old man 85 years of age to be watching and preventing a lot of men coming. He did not know when they would come, or how they would come, and he is a very old man, 85 years of age.

4739. It was very kind of Mrs. Cox to mention it?—She only spoke through the kindness, she did not tell me to tell him.

4740. She wished you no doubt to tell Henderson that there was some danger?—She did tell me to do it, but I told what passed among us.

4741. She sent a message to Henderson?—I do not know whether she wished me to tell him or not. I cannot read her mind.

4742. She told you that some danger might happen to him?—She did not. I told you what she said and that is all. I did not come here to tell lies.

4743. Did she say who the brickmakers were who were likely to do it?—No.

4744. She said that it was likely to come from the brickmakers?—I thought the same as other people think, I suppose they think it is the brickmakers among themselves.

4745. And you think so too?—I think the same as other people. I have told you the truth and nothing but the truth, and I do not wish to be asked any more questions that is not right; it is not in me at all to sit and tell lies.

4746. Nothing was said to him at the time about telling him?—No.

4747. (*Chairman.*) Did she say that they might come in greater numbers next time?—No, if I may never go out of this place she never did.

4748. (*Mr. Barstow.*) Do you remember old Mr. Henderson being discharged from watching for Mr. Aitken?—Yes.

4749. What was he discharged for, was not he told what he was discharged for?—I do not know, I had nothing to do with it; you must ask him.

4750. You do not know whether he was told or not what he was discharged for?—Him and my master are discharged, and he had nothing to do with watching, and we are discharged out of the house.

4751. (*Chairman.*) You have no idea what you were discharged for?—No.

4752. Have any of you been to see Mr. Aitken about it?—No.

4753. (*Mr. Barstow.*) Why did not you stay and ask what is was for?—My master did not think he had done anything wrong, he had always done his duty, he did not think that he ought to go begging in again.

4754. That was a reason for seeing Mr. Aitken about it?—He knows it.

4755. He never did remonstrate about being discharged?—They told him that he must leave at the week end.

4756. Neither your father-in-law nor your grandfather have ever said to Mr. Aitken that they were discharged unjustly?—No.

4757. Were they told what they were discharged for? No, Mr. Johnson told my master that he had a message to deliver to him that he was to be out this week end and that Mr. Aitken said if he wanted to know what it was for he must see him, but he has not seen him or he had not when I came away.

4758. He did not go and see him?—No he did not.

4759. (*Mr. Chance.*) I suppose you talked over this matter with Mrs. Cox?—What matter?

4760. You talked about Henderson being discharged?—I had nothing to do with Mrs. Cox about Henderson being discharged.

4761. Have you seen Mrs. Cox?—Of course I have seen Mrs. Cox outside here.

4762. Had you a talk with her?—Yes.

4763. You talked the matter over with her?—I have told her that we were discharged and were leaving the house.

4764. When you saw her this morning you were talking together about the matter?—I told her that we were discharged, that is all.

4765. You have seen Mrs. Cox this morning?—Yes.

4766. You have been talking to her about this matter?—I tell you I have told her about it.

4767. Did you ask her how she remembered it?—She remembers naught about it that I know of.

4768. Did she say so?—No, she had no need to say so.

4769. Did you tell her what you remembered about what she had told you? You have been talking to her this morning about what she told you that night?—No, not about that, not to-day.

4770. Mrs. Cox has been here?—I know that.

4771. Did not you talk to her about what she said to you that night?—I have told you all Mrs. Cox said to me.

4772. Did you talk to her about what she said that night?—I told her we were discharged.

4773. That is no answer to my question. Have not you been talking to Mrs. Cox this morning about what she said to you that night?—I do not know that I have to-day.

4774. You say that you do not know. You do know?—We were sitting and spoke about it yesterday.

4775. You spoke about it yesterday?—Yes, but not to-day. I have not spoken to her about it to-day.

4776. Now tell me what you said about it yesterday?—I said nothing, but when we met I said, "This "is a fine job; we are getting all bagged away from "the house through this job, and nothing more to do "with it any more than a child unborn," and neither had we. "I little thought that my coming to your "house and your coming to us would get us into all "this bother!" I do not know that there was any more said.

4777. What did she say?—She said nothing, only the same as I should have answered. She answered me in the same way back.

4778. You agreed what it was?—Yes.

4779. Did you agree as to what was said?—Yes, I am sure that I said nothing of any harm, only what was said between her and me.

4780. She did not tell you that you had better be careful what you say here?—No, she did not.

The witness withdrew.

Mr. Edward Barrett sworn and examined.

Mr. E. Barrett.

4781. (*Chairman.*) I believe you are a brick manufacturer, are you not?—Yes.

4782. On the 15th of June last had you some bricks destroyed?—Yes.

4783. How many?—40,000.

4784. When did you first hear of their being destroyed?—On the Sunday morning, the 15th.

4785. Who gave you the information? — The policeman.

4786. That was Kelly? — Yes, Sergeant Kelly, early in the morning about 5 o'clock.

FOURTH DAY.

Mr. E. Barrett.

7 Sept. 1867.

4787. What were the men that you had employed? Were they Stockport union men or Manchester union men?—All Stockport union men.

4788. Have you any notion how your bricks came to be destroyed?—No.

4789. Have you no idea at all why you should have incurred the anger of some evil-disposed people and got 40,000 bricks destroyed?—I was told that it was some dispute between the Manchester operatives and the Stockport operatives.

4790. But Didsbury is in the Stockport union, is it not?—Yes.

4791. Then how came you, being in the Stockport union, to be mixed up in this dispute between the Manchester union and the Stockport union?—According to what I could learn the Stockport union men and the Manchester union men were at loggerheads together, and they came to destroy our bricks for vexation, or something of that sort.

4792. You mean to say from what information you could gather that the Manchester union men came and destroyed your bricks because you were in the Stockport union?—Yes, that is all that I could learn.

4793. Have you employed any brickmakers at all who were against what they say to be their rules?—Not that I know of.

4794. Are all the men that you employ Stockport union men?—Yes, every one.

4795. Had you heard of this dispute between the two unions as going on for some time?—Well, we had heard some flying words at different times.

4796. Had you any dispute at all with the Stockport union?—No, not a bit.

4797. You employed none but Stockport union men, did you?—Not one besides.

4798. And you had no quarrel or disturbance with them?—No.

4799. Had you any quarrel with any other person at all?—None whatever, nor ever had that I know of.

4800. You have been at peace with all mankind?—Yes.

4801. And, nevertheless, you had 40,000 bricks destroyed?—They did it.

4802. And as far as you can make out you are merely the victim of a dispute between those two unions?—That is all that ever I could learn.

4803. What was the dispute?—There was a dispute about this yard at Levenshulme.

4804. But you are not at Levenshulme?—No, but the dispute arose about that.

4805. The dispute being about that, the Manchester union did injury to different persons who are in the Stockport district?—Yes, that is just it.

4806. That is the way you understand it?—Yes.

4807. Could you as a master manufacturer, being in the Stockport district, employ Manchester men?—No.

4808. Not either bricklayers or brickmakers?—No.

4809. Can you sell out of your district?—No.

4810. Do I understand you that you must sell your bricks in your own district?—That is all.

4811. What size is that district?—I hear many different tales about it, but I should say it is about four miles from Manchester.

4812. That is to say, you must not sell within four miles of Manchester?—No.

4813. And do you take Manchester to be about three miles in diameter?—About $3\frac{1}{2}$ or $3\frac{3}{4}$ miles from where they take their line.

4814. Then it is four miles beyond those three miles that they call their district?—Four miles from the Manchester Exchange is called their district.

4815. Then it is four miles in a circle all round?—Yes, it is supposed to be.

4816. And you must not come within that territory?—No.

4817. That is a pretty good large area, is it not?—Yes, for Manchester limits.

4818. But it is a pretty large area equally for you to be excluded from?—Yes, we have plenty of room to sell ours to.

4819. What is the area of your district?—About three miles from Stockport Old Church.

4820. Then is Didsbury within that distance?—Yes, just within the distance.

4821. Have you known any other destruction of property which you attribute to the same cause as that of yours?—Yes.

4822. Mr. Bailey's?—Yes, the same night.

4823. How near does he live to you?—Perhaps about 400 or 500 yards off.

4824. How long has this dispute been going on?—I have never heard so much about it before this season.

4825. You have had reason to hear about it if you have lost your bricks, you know?—Yes, I have.

4826. How long has it been going on?—The first commencement, according to what I have been informed was the beginning of this last January.

4827. Had any of the Manchester delegates been to you?—No.

4828. Then you have seen nothing of them?—No, I have never seen or heard tell of any of them.

4829. Do you keep any watchmen on your premises?—No.

4830. Then you do not know at all the men who committed the outrage?—No.

4831. You can only attribute it to the cause you have mentioned?—Yes.

4832. Did you get some money from the Stockport union in consequence of the damage?—Yes, 20*l.*

4833. I believe you offered a reward, did you not, for the discovery of the offenders?—Yes, 20*l.*

4834. Have you discovered them?—No.

4835. How long has the reward been offered? Ever since June?—Ever since the 15th or 16th of June.

4836. Then you are on pretty good terms with the Stockport union, I suppose?—Yes, and always was.

4837. Is this the only damage that you have suffered?—Yes, I think it is. There were some boards burnt about two weeks afterwards.

4838. Where were they?—They were against the kiln?—

4839. In your yard?—Yes.

4840. Were they set fire to in the night?—It was in the night that they were fired.

4841. Could you form any opinion as to how they were fired?—Were they fired by means of naphtha or anything?—They were fired by the kiln fire.

4842. The kiln was burning, and some one had come there and got a fire from there and burnt the boards?—Well, I always thought somebody had come.

4843. Were they near enough to get burnt of themselves?—No, they were not.

4844. Somebody must have got the fire, or would it have burnt?—It was either somebody did it, or accident, because they could not have burnt of themselves.

4845. Were they near enough to the kiln to be exposed to such accidents?—They were about two feet from the kiln, as they have been this many a year.

4846. Then was it possible to have been a mere accident?—Yes, it was possible.

4847. How, by fire from the kilns?—No, the iron bars might have tumbled down, and then the boards would fall too.

4848. Were they near enough for that purpose?—They were near enough for that purpose, provided the iron bars had fallen.

4849. Could you at all tell whether the iron bars had fallen?—One of the iron bars that was put to keep them from the fire was driven out.

4850. That would not drive out of itself, would it?—I should think not.

4851. Then did it appear to you that somebody must have taken the iron bar out?—Yes.

4852. Have you any doubt that it was wilfully done?—Yes, were I to speak my own mind I should think it was wilfully done.

4853. How many boards were destroyed?—10*l.* worth.

4854. Were the boards so placed that the fire could have communicated to any shed?—No, they were only put against the kiln to screen the water from it.

4855. Then the destruction would be the destruction of those boards alone ?—Yes, only of them.

4856. Have you had many other outrages in your district since this dispute arose ?—None since that.

4857. I do not mean you individually, but in the district ?—Yes, Mr. Bailey and I are in the same district.

4858. But, besides those have there have been any outrages since that ? — None such as that in our district.

4859. Nor near you ?—No nearer than Levenshulme.

4860. You do not know anything I suppose of the Ashton district ?—No.

4861. Nor of the Hyde ?—No.

4862. You have had no damage done to your property by anything being put in the bricks or the clay, have you ?—No.

4863. Has that been done in your district ?—Not that ever I could remember.

4864. You have heard of its being done in the Manchester district ?—Oh yes.

4865. That you have heard of several times ?—Oh yes ; many a time.

4866. Does that do great injury to the bricks ?—Well, when they put things in the clay they cannot work it you know.

4867. Can you at all form any opinion of the number of men that would be employed in doing that injury to 40,000 bricks ?—I should think 20 men.

The witness withdrew.

Mr. Peter Bailey sworn and examined.

Mr. P. Bailey

4868. (*Mr. Barstow.*) You are a brick manfacturer at Heaton Mersey, are you not ?—Yes.

4869. Heaton Mersey is within the Stockport union is it not ?—Yes.

4870. Do you employ Stockport union men ?—Yes.

4871. Have you had any dispute with the Stockport union ?—No, none whatever.

4872. Nor with anyone else ?—No.

4873. I believe on the 15th of June you had a very large number of bricks destroyed ?—Yes.

4874. How many ?—About 47,000.

4875. What would be the value of those bricks ?—About 20*l.*

4876. When were you informed of this injury ?—Between 3 and 4 in the morning of the 16th.

4877. Did you go there ?—Yes.

4878. And examined the place where the damage had been done ?—Yes.

4879. How many men did you judge had been there ?—Well, we could count perhaps from 10 to 12 or from 12 to 14 different footprints, and some of them we have now.

4880. You have the impression upon the bricks now ?—A portion of them that we could get clear.

4881. You gave information I suppose to the police ?—It was Sergeant Kelly who first told me, he saw me first.

4882. Did you offer a reward for detection ?—Yes, 20*l.*

4883. Has anyone been apprehended ?—No.

4884. Are you aware that at this time there was a dispute between the Stockport and Manchester brickmakers unions ?—Yes, I did hear of it.

4885. We have heard what the dispute was about, and therefore, I will not ask you that. To what do you attribute this damage that you sustained ?—I cannot say.

4886. You do not know ?—No.

4887. Can you form no opinion ?—No, only the dispute between the two unions.

4888. Do you wish us to understand that you believe this damage was done by members of the Manchester union, in the prosecution of their quarrel with the Stockport union ?—Yes, we traced them in the direction of Manchester.

4889. How far did you trace them ?—Half a mile or three quarters of a mile across the fields in the direction of Manchester.

4890. Did you make any claim upon anyone for the damage you sustained ?—Well, we made a claim so far as this, I said we should discontinue brickmaking until the damage was made good.

4891. You told your men so ?—Yes.

4892. What followed upon that ?— There was a meeting called after that at the "Buckley Arms," Stockport, which I attended, and five or six brickmakers of Stockport, I think, attended the meeting. They first offered 10*l.* or 15*l.*, and I said I would either have the 20*l.* or pay it all myself, and I received a letter from them afterwards offering the 20*l.*, conditionally that I would start my men again, which letter I think you have.

4893. Who paid you that 20*l.* ?—Joseph Brown and two others.

4894. Thomas Holland was one, was he not ?—Thomas Holland and John Jordan.

4895. Did you put your men on again ?—Yes.

4896. Have you met with any injury since ?—Not since.

4897. (*Mr. Chance.*) Was the damage done on the night of the 15th or the morning of the next day ?—I think it would be about 12 o'clock when the men were seen.

4898. About 12 o'clock on the night of the 15th ? —Yes.

The witness withdrew.

John Clent sworn and examined.

J. Clent.

4899. (*Mr. Chance.*) Are you a sergeant in the police force ?—Yes.

4900. Where are you stationed ?—At Long Side, in this county.

4901. On the night of the 15th of June were you on duty at Longside ?—I was.

4902. In the course of the night whilst you were on duty did you see a large body of men ?—I did, at 2 o'clock on the Sunday morning.

4903. How many men did you see ?—I counted 20.

4904. Were they walking along in a body ?—Yes, coming from the direction as I thought of a place called Ladybarn.

4905. In what direction were they going ?—Towards Gorton. They came down a road that is called Birch Lane, and there they crossed the Stockport Road, and inclined a little to the right, and then they took another turn to the left which leads on to the high road, and then you can get to Gorton, or Ashton, or different parts.

4906. And would that also be the road to Manchester ?—Yes, and also to Manchester.

4907. Do you know the place where Mr. Barrett had a brickyard ?—I never was in his croft, but I know tolerably well whereabouts it is situate.

4908. Would that be the road from Mr. Bailey's brickyard towards Gorton and Manchester ?—It would be the straight direct road I should think.

4909. Did you speak to them ?—I did. One of them told me they had been to a supper, and I kept talking to one a bit till he perhaps got some 40 or 50 yards behind the body, and then I commenced whistling with my whistle. The whole of the body then ran away, and I stopped this man, and I asked him his name, and I asked him what business he had been on that drew him there at that time in the morning, and I also took him to the police office at Rusholme, for I suspected something was wrong by the man's appearance. His trousers were quite wet up to his

FOURTH DAY.

J. Clent.

7 Sept. 1867.

knees, and there was a great deal of clay on his boots. In fact the whole of them were in that way.

4910. You were able to notice that?—Yes, they appeared to have been dirty, and then they appeared as though they had been trying to wash it off. The trousers were wet up to the knees.

4911. What distance did you walk along with this body of men?—I should say I walked between 200 and 300 yards.

4912. So that you had plenty of time to observe?—I had plenty of time to observe.

4913. You say you apprehended this man, did you ask him his name?—Yes.

4914. What name did he give?—He gave me the name of David Hendry.

4915. Did he give you any address?—Yes; No. 4, Wilkinson's Buildings, Regent Road, in Salford.

4915. Did he tell you where he worked?—Yes, he told me he worked for a person of the name of Collins, a brickmaker, in Salford.

4916. How long was he detained in custody?—I believe he was detained in custody from that time till after 7 o'clock in the morning.

4917. And then what became of him?—He was allowed to go, as there had been no information sent to the office of any outrage having been committed.

4919. He was not taken before the magistrate?—No.

4920. No information appeared, and he was let go?—He was let go.

4921. The next day did you make any inquiry to see whether any person of the name of David Hendry lived at the address given to you?—Yes, I did.

4922. What was the result?—There was no person of that name.

4923. Did you also make inquiry at the place where he said he worked?—I did.

4924. And could you hear nothing further?—I could not.

4925. You say you had every opportunity of observing him?—Yes.

4926. Did you observe him particularly?—I did.

4927. Did you observe any peculiarity about his face?—He had lost two fingers off the left hand. That I noticed when I was at Rusholme because I looked at him particularly, and I said, "You are a hard-working man," and I asked him to lift his hand up, and I noticed his two fingers were off, and I believe it was the left hand.

4928. Did you also observe his face?—Yes.

4929. Did you also notice any peculiarity about his face?—I did not notice any peculiarity about his face.

4930. Should you know the man again?—I should know him again if I saw him.

4931. It would be almost light at that time, would it not?—It was just coming daylight.

4932. So that you had a good opportunity of seeing him?—Yes, and another thing; I walked with him very nearly a mile from the office to the lock-up.

4933. Have you any reason for believing that that man was any person in particular?—I have no idea, only what I have heard.

4934. Do you know whether any of those men were or were not union men?—That I could not tell, but I should judge by their going in a body that they were union men.

4935. Could you tell at all whether they were brickmakers?—All of them appeared to be of that class, I believe, what I call navvies or brickmakers; they had just that appearance.

4936. You are not able to speak to any of the others?—No.

4937. Did you have any conversation with any of the others?—I spoke to several of the others, and there was only that one spoke, who said that they had been to a supper. I asked him to stop a time or two, and one or two of them turned round and said we had come far enough, and I thought I had better whistle.

4938. (*Chairman.*) You noticed nothing about the eyes of this man, did you?—No, I did not.

The witness withdrew.

M. Ainsworth.

MATHEW AINSWORTH sworn and examined.

4339. (*Chairman.*) What are you?—A labouring man sometimes, and sometimes a brickmaker.

4940. Where are you employed now?—At Cheadle Hulme.

4941. Are you a member of the Stockport union? Yes.

4942. Have you been so long?—Two years, or two years and a month or two.

4943. Have you attended their meetings during that time?—Sometimes.

4944. We understand that on Wednesday last two books were given to you by the Stockport union men, by Slater and somebody else?—Yes.

4945. Who was the other man, it was Singleton, was it not?—I cannot say who they were, but there was two books given to me.

4946. You gave up one book did you not?—Yes.

4945. What did you do with the other?—I made it away.

4948. How did you make it away?—Because it encumbered me. I could not carry it.

4949. But how did you do it?—I burnt it.

4950. When did you burn it?—On Wednesday, some time.

4951. The books were given to you on Wednesday, were they not?—Yes, they were.

4952. Slater gave you the two?—Somebody gave me the two.

4953. Were you told to keep them quiet?—I was told to take them with me; they thought they would not be wanted.

4954. And so they gave them to you?—Yes.

4955. Where were you when they gave them to you?—I had just lit on them before they set off to come here. I was at the "Pack Horse."

4956. Were you at the "Pack Horse?"—I was there a few minutes.

4957. Had you met them by agreement?—No.

4958. It was mere accident?—Yes.

4959. What time of day was it?—From 8 to 9 in the morning.

4960. What sort of book was the one that you made away with, that was so inconvenient to carry?—Perhaps nine inches square.

4961. Can you read?—Yes.

4962. Did you take a look at it?—No.

4963. You looked inside a little, did you not?—No, I did not.

4964. Where did you burn it?—In the fire.

4965. But when did you burn it?—In the forenoon.

4966. How long after you got it?—Well, to tell the truth, I cannot say.

4967. You got it between 8 and 9, did you not?—I burned it before mid-day.

4968. What fire was it that you burned it at?—It was in a public-house.

4969. What was the name of the public-house?—I called in to have some beer. To tell you the truth I had been in several public-houses.

4970. But you can tell me the name of the public-house that you burned the book in?—Well, it might be the "Pack Horse."

4971. It might be, but was it?—Well, I have a very poor recollection.

4972. It was at the "Pack Horse," was it not?—Well, it might be.

4973. It was, was it not?—Well, I might as well say it was as it was not.

4974. Of course you might. Who was present at the time; was the landlord present?—No, he was not.

4975. Which of the union men?—Well, I do not know. I would not have hindered them if they had done it. I would have hindered a stranger. They took no part in it. I would not carry it.

4976. Who were in the room?—There were some of the party that were coming there, but I could not say.

4977. Was Slater there?—I did not put their names down, but they might be there.

4978. But you have a very good head. Who was there?—It was some of the parties who came here.

4979. But was Slater one of them?—I do not think he was.

4980. Singleton?—I do not think he was.

4981. George Hulme?—I should not wish to tell a lie.

4982. Of course not, I know that. Was George Hulme there?—I will not say, because I cannot, to tell the truth; it is no use, I cannot tell anything but the truth.

4983. It is no use if you cannot, but I think with such a good head as you have you can think?—Well, I had had some beer, and I cannot say.

4984. Sometimes you know your wits are improved by the beer. Was there somebody like George Hulme there?—I do not think there was, but I had had some beer before, and I should not like to tell a lie.

4985. But the effect of beer might be that you would see double, and that you would see two George Hulmes?—Then there would be more company in the house.

4986. You must know who was there?—I do not know who were coming here, nor what all their names are.

4987. But was George Hulme there?—I do not know whether he was there or here.

4988. But was he in the room?—I think I almost durst say he was not in the room.

4989. Will you swear that?—I dare not quite swear it, though I durst almost swear it.

4990. You know Joseph Brown?—Yes, I know him.

4991. Was he there?—No, he was not.

4992. How many people were there?—Perhaps from three to four, or something like that.

4993. Were they union men?—Yes, of course they were. You may term it union, but it is not so on our cards.

4994. No, it is a club. They were all there and had you a little talk about the book before you put it on the fire?—Not a word, only I said I shall not carry this, and it was so late at the time to put it in the box.

4995. Then you had a little talk with them about it?—They had not time to take it and put it by, and they asked me to take it with me. There was one that would fit my pocket and the other would not, and I carried it under my arm and I thought I might lose it, so I thought I would make away with it.

4996. You thought it would be a pity to lose it, so you burnt it. Now was that book an old friend of yours; did you know it at all?—No, I did not.

4997. Was George Bailey there?—I do not know.

4998. Do you think he was?—He might be or he might not, but I cannot tell; some were gone out of the house, and some were in the house. I cannot tell you who is in a big public-house.

4999. But this was not in a large room, was it?—It was not as big as this, but it was a very large room for a public-house.

5000. I do not know what that is?—It was a large room for a tavern.

5001. Was George Bailey there?—I think he was not there.

5002. Nor Robert Bailey?—No, nor Robert Bailey.

5003. Cannot you give me any name at all, or has it all slipped out of your memory?—Yes, I can give you a name I daresay when you get to it.

5004. I want you to get to it?—I thought you knew them all.

5005. Was Holland there?—There was Thomas Holland and a brother of mine, and now you have got the lot.

5006. Was Holland Cheetham there?—No, he was not.

5007. Was Potts there?—No.

5008. You know that this book was kept at the "Pack Horse," do you not?—I know it had been previously.

5009. And you knew that the book was very likely to be wanted here did you not?—Yes; well, they had got a fresh one, and I did not think it would be wanted at all. There was a new one, and there had been some time.

5010. This was an old one, was it?—It was an old original.

5011. How far did it go back?—I do not know; I am a new hand in the town.

5012. How did you know it was old?—By its appearance; it was rather ragged.

5013. How did you burn it, did you tear the leaves?—I never tore out the leaves.

5014. How did you burn it?—I let it have its road in the fire.

5015. Did it take long to burn?—Well, I did not watch it so very long.

5016. Where did you keep the book between 8 o'clock in the morning when it was given to you till mid-day, when you burnt it?—Under my arm; I had nowhere else to put it.

5017. But you could not work with it under your arm?—I was not working; I was having some ale, and I kept it there till I got shut of it.

5018. And then you went to some other public-house?—I was not going to be encumbered with it at all; if I had lost it somebody might have got it, and might have something to do with it.

5019. What did they give you for taking care of it?—Nothing at all.

5020. Did not they promise you any money for taking care of it?—Not a halfpenny.

5021. (*Mr. Barstow.*) How was it that you came to the "Pack Horse" so early that morning?—Well, it had been raining, and when it has been raining over night we cannot start work till mid-day. I had had a gill or two of ale the night before, and I thought it was the likeliest place to have a gill more in the morning.

5022. Where do you live?—At Heaton Norris.

5023. How far is Heaton Norris from the "Pack Horse?"—Perhaps a mile or three-quarters of a mile.

5024. Did any one send for you there?—No.

The witness withdrew.

Adjourned to Monday next at 11 o'clock.

FIFTH DAY.

Assize Courts, Manchester, Monday, 9th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C. | GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq. | JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

FIFTH DAY. 9 Sept. 1867.

(*Mr. Pickering.*) Before we begin this morning I wish notice to be taken of this. I wish to announce that we have the box belonging to the Manchester union. That box can only be opened, we were told by the witness, by three keys, and I give notice that if those who have those keys choose to come forward and be at this building by 10 o'clock on Wednesday morning next, so that the box can be opened in that way, well and good; but we shall certainly get access to it, and unless it is so opened by those who must know that we are wanting to open it and that we have got it, we shall have it broken open. Let that be distinctly understood. There is plenty of time for communication to be made to everybody, and we are determined to do it.

G. Harrop.

GEORGE HARROP sworn and examined.

5025. (*Mr. Chance.*) Are you an inspector of police?—I am.

5026. At what place are you stationed?—At Droylsden.

5027. Is that in this county?—It is.

5028. How far is it from Manchester?—About four miles.

5029. How far is it from Ashton-under-Lyne?—It will be about three miles, I think.

5030. Were you on duty on the 28th of June 1862?—I was.

5031. Was that at Droylsden?—At Small Shaw, Ashton-under-Lyne.

5032. How far from Ashton-under-Lyne would that be?—About a mile and a half.

5033. And who was on duty with you?—Constable William Jump.

5034. Were you on duty together that night?—We were.

5035. How far was the place where you were on duty from Clifford's brickyard?—About three miles, as near as I can remember.

5036. When you were on duty did you see any number of men coming along?—I did.

5037. In which direction were the men coming?—From the direction of Clifford's brickyard, a cross country route.

5038. In which direction would they be going?—They would be going in the direction of the Oldham Road, which is a road leading between Ashton-under-Lyne and Oldham.

5039. How many men were there?—Eight.

5040. Did you notice whether they were armed or not?—I did.

5041. What had they?—They seemed to have large sticks in their hands, shovel shafts with a portion of the blade attached to the end, spade shafts or shovel shafts, and their coat collars turned up by the side of the face, and some appeared to be masked, wearing masks upon their faces.

5042. What time was it when you met them?—About 2 o'clock in the morning.

5043. Was it dusk then?—It was rather a dull morning, not very light.

5044. The day would be breaking about that time?—Just a little, but very little.

5045. Did you notice at that time whether any of them were armed with guns or pistols?—I could not see any at that time.

5046. When you met them did you or Jump arrest any of them?—Before they got to us, when they got perhaps 50 yards from us, they all left the footpath and walked in single file on the grass in the field.

5047. Before that time had they been all together?—They were all in a body when we first saw them. After they had all passed with the exception of two, I stepped before the last but one, and said, "My man, what is the meaning of all this?" He attempted to pass by without speaking. I says, "Nay, you have done nothing wrong; you need not fear," and put up my hand to his breast. He then seized me by the arm and shoulder, and said, "Now men, now men, now," two or three times, pretty quickly. I then got tightly hold of him with my left hand by the coat collar. He attempted to break my hold by going under my arm with his head stooping down. At this time they had all collected together, and stood about six or eight yards from where we were.

5048. All the others?—All the others. I saw Burke, who was in the act——

5049. Do you know the name of this man of whom you took hold?—No; I saw Burke. He stood amongst the others, and he said something that I did not understand. I saw that he had a pistol in his hand, and the pistol was instantly discharged, and the contents caught me over the right eye, and shot the stick clean out of my right hand. This man who was trying to get under my arm had drawn me into a crooked position, and the shot just caught me over the right eye and took the stick and broke it in two, and took it out of my hand.

5050. What took place next?—Another shot was fired which seemed to go right over my head, and pretty close too, but over the top of my head.

5051. Did that shot come in the same direction?—Yes, and a third shot was fired which seemed to go by the left side of my head, all pretty quickly in succession. Then Ward and another man stepped before me with two large sticks.

5052. At that time could you see any of the number struggling with Jump?—Yes, on my left I saw that Jump seemed to be very much engaged with two or three that were round him. Ward and another man stepped before me with very large sticks or bludgeons, and at this time I had got possession of the man's bludgeon whom I had got hold of at the first. There was a desperate struggle between us three, the two men that were before me and myself for a considerable time.

5053. At that time you were attacked by two men?—Two.

5054. One of whom was John Ward?—Yes.

5055. What were you able to do?—In the long run I struck Ward somewhere about the head and he dropped, and he went on his hands and knees towards the left. In a very short time I struck the other man and he left. Then there was a man stood about 15 or 20 yards from me as near as I can think, who began to throw large stones and one caught me in the arm.

5056. Had the other men remained there or had

they left ?—They seemed to be going towards Jump and some I believe left the field.

5057. They all seemed to be taking part in the fray more or less ?—Yes.

5058. After you had struck Ward down what took place ?—Another man who stood about 15 or 20 yards from me began to throw stones at me and one caught me in the arm. I went after that man, and after I had crossed the field, the man threw himself over a rail and then he got over a hedge; I threw the bludgeon that I had after him, and he had then got up; he seemed to fall in the dry ditch that there was there and he got up and went down the lane leading towards Small Shaw Road. It would be perhaps 50 or 60 yards higher up than the fold. During the time that I was in the act of throwing this bludgeon at the man who was throwing stones at me I heard two reports of firearms in the direction of where I had seen Jump.

5059. Did you go in the direction where you heard the firearms ?—Yes; I found him shot and leaning against a stump crouched down. I roused some of the neighbours; in fact some had got up.

5060. You did not tell us in what state you found Jump ?—I found him crouched down against a stump at a style leading out of the field.

5061. In what state was he ?—Crouched down, like sitting upon his backside.

5062. Did he seem exhausted ?—I could just hear a moan coming from him. He seemed almost dead; he never spoke.

5063. Did you ascertain at that time whether he had been injured or not ?—Yes, one of the neighbours who lived close to got up.

5064. But did you ascertain before you left him whether any injury had been done to him ?—Yes.

5065. What injury had been done to him ?—He had been shot in the breast. Then we got Jump and carried him into a neighbour's house, and got him upon some chairs; I then ran and got the assistance of more of our officers, and a doctor was got as soon as possible, but when the doctor came he was dead.

5066. Four men were apprehended, were they not, on the suspicion of having been concerned in the outrage ?—Six.

5067. And John Ward and Michael Burke were convicted ?—Yes.

5068. At what assizes were they convicted ?—In the summer assizes of 1862.

5069. At Liverpool ?—Yes.

5070. And I believe Ward was hanged ?—Yes.

5071. And Michael Burke was sentenced to penal servitude for life ?—Yes.

5072. (*Chairman.*) He is now out of the country ?—Yes.

5073. (*Mr. Chance.*) Who were the other men that were apprehended for that offence ?—Frederick Hipwell and Thomas Barlow and Robert Ryan and John Toole. Ensor and Gregory were not meddled with.

5074. Hipwell and Thomas Barlow I think are here ?—Yes.

5075. Do you know what has become of Robert Ryan and John Toole ?—I do not.

5076. Have you seen anything of them since that murder of Jump was committed ?—Not since they have been discharged after being in custody at Ashton.

5077. They were taken into custody and discharged ?—Yes.

5078. Do you know why they were discharged ?—Owing to the evidence being weak. Afterwards there was evidence given, and the two men were sought again, but they could not be met with.

5079. You mean they were discharged by the magistrates ?—Yes.

5080. Then they were never taken to the assizes ?—No.

5081. Then since they have been discharged you have never seen them ?—No.

5082. Do you know why the attack upon Jump and yourself was made ?—I did not know at that time.

5083. Did you make inquiries afterwards ?—Yes.

5084. And what was the result of the inquiries you made ?—The result was that we found out that they had been to Joseph Clifford's brickcroft at Staleybridge and destroyed about 18,000 bricks.

5085. Was it the same night that they destroyed the bricks ?—Yes.

5086. How long before you met them were the bricks destroyed ?—They were returning at 2 o'clock in the morning. It was a reasonable time for walking the distance. A watchman that is here as a witness said that they found the bricks destroyed about half-past 1.

5087. Did you hear what the cause of the destruction of the bricks was ?—I only heard from the person who was in charge of the yard.

5088. He is here I believe ?—Yes, he is.

5089. (*Mr. Chance.*) He had better give that evidence himself.

5090. (*Chairman.*) What is his name ?—John Tould.

5091. He was then engaged as waterman for Mr. Clifford, I believe ?—He was.

5092. When Michael Burke was taken into custody did he make any confession ?—He did.

5093. Was that made to you ?—It was not.

5094. From whom did you hear it ?—I heard it from a superintendent of the name of Richard Pickering, but I do not know whether I could state the nature of the confession.

5095. Is Pickering here ?—He is not. There is another man who was taken as a witness at the assizes who was made a witness. He was a prisoner in custody upon the charge, but they made a witness of him. His name was Thomas Barlow, and he made a long statement.

5096. Did Thomas Barlow hear any statement made by Burke ?—I do not think he did.

5097. Then the only knowledge which you have of that confession is from what you heard from Superintendent Pickering ?—It is.

5098. (*Chairman.*) Where is he now ?—He is at Rochdale.

5099. (*Mr. Chance.*) Is he stationed there at the present time ?—Yes.

5100. (*Chairman.*) Was the confession in writing ?—Yes, it was taken in writing.

5101. Who has the writing ?—I am sure I cannot tell whether he kept it himself or not; or it might have been handed to Mr. Hall, the solicitor.

5102. (*Mr. Chance.*) You cannot tell us distinctly what it was ?—I cannot.

5103. (*Chairman.*) Did you say that the confession was made to Superintendent Richard Pickering ?—It was made to him.

5104. And did he take it down in writing ?—Yes, I believe he did.

5105. (*Mr. Chance.*) You say that Thomas Barlow was also apprehended on this charge ?—Yes.

5106. Did Thomas Barlow say anything about it ?—He was made a witness and said a great deal about it at the assizes at Liverpool.

5107. Did you hear him ?—There is no doubt that I should hear him, but I am the same with regard to that as I am with regard to the other statement. I could not say much about it.

5108. If you heard him say anything about it and you can tell us what he said you must do so ?—Yes; but I could not be positive about it, and I would rather not.

5109. Then you met this man, as it were, accidentally ?—Yes.

5110. Did you know at all that any attack was going to be made upon Clifford's brickyard ?—I did not.

5111. You heard nothing at all about it in fact till you met this man ?—Nothing at all.

5112. Do you know a man named Thomas Harrison ?—I do.

5113. Who is he ?—He did belong to the bricklayers' union at Ashton-under-Lyne at that time, though he has not been making bricks now for some time I understand he is here as a witness.

FIFTH DAY.

G. Harrop.

9 Sept. 1867.

5114. You know John Barlow, too, do you not?—I do.

5115. Was he at any time secretary to that union?—He has told me so himself.

5116. When did he tell you that he was secretary?—About two months since I should think.

5117. Did he mention at that time when he had been secretary?—He said that he had been secretary, but he was not then. He did not name any particular time. He said that he began to be secretary for the brickmakers' union of Ashton-under-Lyne when he was very young, and that he had reason to regret it ever since what took place at Jump's case.

5118. Did he tell you that he was secretary at the time that this murder of Jump took place?—He did.

5119. However, he is here to speak for himself?—Yes; he also told me from a question I asked him that he had been engaged along with Thomas Harrison for some weeks getting up the defence in that case.

5120. Did he tell you that at the same time that he told you that he had been secretary?—He did.

5121. Was that about two months ago?—Yes.

5122. Have you anything else that you can tell us on that case?—I do not think I have.

5123. (*Chairman.*) This outrage took place in the Ashton-under-Lyne district, did it not?—It is a district belonging to the Ashton-under-Lyne brickmakers district no doubt.

5124. Is there a union which is called the Ashton-under-Lyne district union?—Yes.

5125. And this property of Clifford's was in that district, was it not?—It was.

5126. We have heard of two other districts, namely, Stockport and Manchester?—Yes.

5127. Are they three separate districts belonging to three separate unions?—I believe they are. I have been told so.

5128. Do you know a place called Droylsden?—I do.

5129. Is that the boundary between the one district and the other?—It is.

5130. Between which two districts?—Manchester and Ashton-under-Lyne.

5131. You mentioned just now that you had had some conversation with John Barlow. Are you at all aware about a difficulty owing to some regulation that there is in the union in selling bricks out of the one district into another?—I know the offence has been complained of to me by master brickmakers.

5132. That they cannot sell out of their union district?—They will not allow the bricks that are made out of the Manchester district to go into the Manchester district. The Ashton people, I understand, have no objection for the Manchester bricks to go into the Ashton-under-Lyne district.

5133. Then did you hear from this man whose name you have mentioned any reason for the destruction of the bricks on Clifford's property?—Non-union men were employed in the yard.

5134. That was the only reason you heard given for it?—Yes.

5135. That is to say he employed men who did not belong to the Ashton-under-Lyne union?—Yes.

5136. Supposing that Droylsden is the boundary on the western side of the Ashton district, what is the boundary on the eastern side? Would Staleybridge be the boundary on the eastern side?—After we get out of Staleybridge, I never heard of any other brickmakers' union existing.

5137. But would the Ashton-under-Lyne district extend from Droylsden through Ashton up to Staleybridge?—Yes, it would.

5138. What is the length of mileage from Staleybridge to Droylsden?—Six or seven miles I dare say, as near as I can think; six miles I should say.

5139. (*Mr. Barston.*) Did you inquire at the time you apprehended these six men whether they were members of any union?—Not then.

5140. Have you ascertained since?—Yes.

5141. Were they members of any union?—They were.

5142. Of what union were they members?—Of the Ashton-under-Lyne union.

5143. All of them?—Yes.

The witness withdrew.

J. Tould.

JOHN TOULD sworn and examined.

5144. (*Mr. Barstow.*) In June 1862, you were manager for Mr. Joseph Clifford, brickmaker, at Droylsden, were you not?—At Staleybridge.

5145. At that time was there any dispute that you are aware of between Mr. Clifford and the members of the Ashton brickmakers' union?—There was.

5146. What was the nature of that dispute?—On account of his not employing union men.

5147. Do I understand that he would not employ union men at all?—No, not at all.

5148. Had you had any correspondence with the union about it?—They had been several times to ask the men to go into the union.

5149. When you say "they" had been, whom do you mean?—The union men; I do not know any particular party.

5150. You say they applied to the non-union men to join the union?—Yes.

5151. I suppose the men would not join?—No.

5152. Have they ever come to Mr. Clifford to desire him to employ their men in preference to the non-union men?—I cannot say to that; I do not know whether they have been to him or not.

5153. Or written to him, or applied to him in any way?—I do not think they have written to him or been to him; they have only been to the men whom he employed,

5154. Have they threatened him at all in case he employed non-union men?—Not that I am aware of.

5155. Do you remember on the night of the 28th of June some malicious damage being done to your bricks?—Yes.

5156. At what time did you know of that first?—Well, I left the place about half-past 9 o'clock the night before, and about 3 o'clock the next morning one of the men came down and knocked me up and said there had been a lot of men and damaged all the bricks on the ground that they could do.

5157. What time was it when you got to the brickyard?—It would be perhaps a quarter past 3. I could not say exactly to a few minutes.

5158. You examined of course and saw what damage had been done?—Yes.

5159. How many bricks had been destroyed?—From 18,000 to 20,000.

5160. What was the money damage?—7*l.* or 8*l.* altogether.

5161. In your own mind to what do you attribute that damage being done?—To his employing non-union men.

5162. (*Mr. Chance.*) Did you examine the bricks the next morning after they had been destroyed?—Yes.

5163. Could you give a guess as to the number of men that had been employed in destroying them?—According to the footprints, I should think there were six or seven.

The witness withdrew.

FREDERICK HIPWELL sworn and examined.

5164. (*Chairman.*) Now, if you will make a full and true disclosure of all the matters with which you are acquainted, no matter what the outrages may have been to which you may have been a party, or of which you may know something, you will have the right to have from us, and we shall certainly give you, a full indemnity, so that you can never be punished in any sort of way for anything you may have done, however bad it may have been ; but remember that it it is entirely dependent upon your making a full and true disclosure of everything. Unless you do make a full and true disclosure of everything you will not be entitled to anything, and you will not have it. What are you ?—Well, I formerly was a brickmaker, but I am labouring at Gorton Tank at present for the Manchester and Sheffield company.

5165. How long have you been in the brickmaking trade ?—Well, I had been brought up to it all my life before that affair happened.

5166. Are you now a member of any union ?—No, nor never have been since.

5167. In the year 1862 you were, I believe, a member of a union, at the time of Jump's case ?—Yes, I was.

5168. Of what union were you a member ?—Of the Ashton-under-Lyne union.

5169. How long had you been a member of that union ?—Three or four years as near as I can think.

5170. Where does that union hold its meetings ?—Well, I do not know where they are held at now.

5171. But where did it hold its meetings when you were a member ?—It was held at the side of Ashton Old Church.

5172. At a public-house ?—Yes, at a man of the name of Ralph Barber's.

5173. I suppose you attended pretty regularly at the meetings ?—Well, not so very often.

5174. How often were the meetings usually held ?—They used to be once every week, or sometimes every fortnight.

5175. You had a president, I suppose, as usual ?—Yes.

5176. And a secretary ?—Yes.

5177. We understand John Barlow was secretary at that time ?—I believe he was.

5178. Who was the president then ?—There was generally about that time Thomas Barlow and Thomas Harrison, that was taking the president and the secretary.

5179. Was Thomas Barlow brother of John Barlow ? You have mentioned John Barlow as being the secretary, and I asked you who was president ?—Thomas Harrison, I beg your pardon.

5180. And the meetings generally were held every week ?—Yes.

5181. Where were the books of the society at that time ?—I believe they were kept at the same public-house. I never knew them to be taken anywhere else.

5182. Did you ever fill any office ?—No, not one. Yes, I was once district man.

5183. What was your district ?—It was Droylsden district, but I cannot exactly tell you.

5184. Had you a treasurer ?—Of the district.

5185. A treasurer of the union ?—No, I do not know that there was.

5186. Then you had a president and a secretary and district men ?—Yes.

5187. Had you any other officers ?—No, I never was in any other office.

5188. I suppose whenever there was any sort of business to be done it was brought before a regular meeting ?—Well, I never recollect anything of outrages brought before a meeting.

5189. But without calling it an outrage ; if any man was employing non-union men I presume you discussed it at a meeting ?—Well I had never anything brought before me of that kind when I was a district man.

5190. But have you never heard anything brought before a meeting about a man employing non-union men ?—Well it has been mentioned.

5191. It was against your rules then was it not that any brickmaker in that district should employ non-union men ?—Yes.

5192. And if anybody did employ non-union men you were expected to mention it at the meeting I suppose, or at any rate it was mentioned, was it not ?—It was mentioned.

5193. Do you remember when it was that you heard it mentioned that Clifford was employing non-union men ?—Well, I cannot exactly mention the time, but it would not be long before that affair.

5194. It was not long before action was taken upon it ?—No.

5195. Then how long before this matter of Jump's, and before Clifford's bricks were destroyed, do you think it had been mentioned publicly at the meeting ?—Well, I never heard it mentioned at any meeting.

5196. You said you had heard it mentioned at the meeting that Clifford was employing non-union men ?—Yes.

5197. When did you hear it first mentioned that something must be done to put a stop to it ?—It would not be but a very short time before, and it was John Ward that I heard mention it at the time.

5198. To whom did he mention it ?—He mentioned it to me. There was in general John Ensor with him at the time.

5199. And who else was there ?—I cannot remember.

5200. Were there five or six of you ?—Very likely there would be.

5201. You have no doubt about it, have you ?—No.

5202. You mentioned some other names besides Ensor and Ward. Was Gregory there ?—Well, we did meet together before the affair took place.

5203. But was that meeting, of which you are now speaking, the first time that you met together or heard it mentioned that something was to be done ?—I cannot exactly say.

5204. You met in a hat shop did you not ?—Yes, at John Ward's.

5205. Behind Ward's house ?—Yes.

5206. That was not the first time you had had a talk of doing something—you had talked of doing something before that surely ?—Not at Mr. Clifford's.

5207. But had you settled generally at the meeting of the union that masters who were employing non-union men against your rules must be looked after ?—Well, it was in general looked after by John Ensor and John Ward.

5208. You as a district man, I suppose, looked after it too ?—No, I never did.

5209. What did you look after ?—Well, if anything occurred in the yard that was against the rules of the club it was brought forward and they came and asked me if I thought it was any use to call a district meeting.

5210. But you know this was the very thing that was against your rules, Clifford employing non-union men. Was Clifford's place in your district ?—No.

5211. Who was the district man of that district where Clifford's bricks were ?—I cannot say ; it was the other side of Ashton altogether.

5212. But it would be his duty to call a meeting about it, would it not ?—I do not know that it was.

5213. But in your district if you found a master was employing a non-union man you would have called a meeting at once, would you not ; or else what is the use of being a district man to see that your rules are enforced ? What is the meaning of your rule if you do not give information when there is what you call a rule broken ?—Well, there was many a thing that used to come that of course there was no meeting called for.

5214. That may be. Then did you call a meeting when there were only trivial things, or did you only call a meeting when there was something strong to be done—you may as well tell us, for we shall

FTH DAY.
F. Hipwell.
Sept. 1867.

know all about this?—I shall tell you all the truth as far as lies in my power.

5215. Tell us the truth when you speak, and do not keep anything back. Do you mean to say that as regards matters of this sort of which we are now talking, it was not the duty of the district man to bring them before the meeting?—Oh no, it was not.

5216. Do you mean to tell me it was not the duty of the district man to bring it before the meeting if he found a master was employing non-union men?—Of course it has been brought before them.

5217. You have told me already that; you remember Clifford's conduct being mentioned at a meeting?—I have heard it mentioned.

5218. Was it in consequence of its having been mentioned at a meeting that you had that meeting in a hat shop behind Ward's house?—I heard it mentioned at a meeting in the club room at Ashton.

5219. About Clifford?—Yes.

5220. Was it in consequence of its having been mentioned in a club room that you had this meeting at the hat shop behind Ward's house?—No, I do not know that it was.

5221. Who summoned you to this meeting at the hat shop?—John Ward and John Ensor came to my house and told me.

5222. Did they do it in consequence of a resolution of the club?—I suppose they must have arranged some meeting.

5223. You suppose it must have been done for that reason?—Yes, I suppose it was.

5224. Then in consequence of a resolution of the club John Ensor and Ward summoned you?—Yes, they came to my house.

5225. John Ward and John Ensor were members of the union, were they not?—Yes.

5226. Were they men regularly employed on jobs of this sort?—Yes.

5227. And you, I suppose, too, pretty often?—Well, I have been.

5228. Then you met at this hat shop behind Ward's house?—Yes.

5229. You have told me Ward and Ensor and yourself. I think you said Thomas Barlow was there?—Yes.

5230. I forget whether you said Gregory was there?—Yes, he was.

5231. Were there any more there?—There was Michael Burke there.

5232. At what time of the day was it?—What, when he came to my house?

5233. Yes, what time of the day was it when Michael Burke went to your house?—Somewhere about dinner time.

5234. That is the usual time for warning to a meeting, is it not?—I believe it had been raining, and therefore that day, if I recollect right, they were not working.

5235. What time were you to meet and what time did you meet at the hat shop?—Well, it would be about 10 o'clock at night.

5236. Was it that night on which the business was to be done?—Yes.

5237. And I suppose there had been as usual a resolution at the meeting what you were to have for the job?—Well, I never knew nothing at all about it.

5238. Take care. Do you mean to tell me that it was not mentioned before you started on the job what you were to be paid for it?—If it was it was done by John Ensor and John Ward, for I never heard it mentioned.

5239. You say this was not the only time that you have been employed; do you mean to say you started on jobs without knowing what you were to have for them?—I did not know what we were to have.

5240. Is that the usual way for this sort of job?—It had varied.

5241. Had it varied according to the number that were employed?—Yes.

5242. Taking the number as six what was the usual payment for a job of this sort?—I cannot exactly say.

5243. But you can give me a notion; was it somewhere about 10*l.* or 6*l.*, or what was it?—Well, we never received anything for that job.

5244. Never mind what you received, you expected something?—Well, of course we did.

5245. What was the usual rate of payment for six men to do a job of this sort?—Say about 5*l.* or 6*l.* I dare say that would not be far off it.

5246. That would be about what you would consider a fair bargain?—Yes.

5247. And that amount was the amount generally decided upon by a resolution of the meeting; the meeting had to settle what the amount was, of course?—I never knew about what they were going to do till the affair was over.

5248. But you, being a good hand at these jobs, knew the usual mode of payment; and surely there was a resolution of the meeting; the money was not left to any one to pay you what he liked; there was a regular resolution of the meeting, was there not, as to what you would be paid?—Well, John Ensor, I believe, received the money, and I always received mine of him.

5249. Had it been always paid by him before?—By him.

5250. And at about that rate; but what I asked you was whether it was left to John Ensor to fix the amount or whether it was not fixed by resolution at the meeting?—It was generally fixed by him and John Ward.

5251. But in compliance with some resolution of a meeting of course?—Well, we have mentioned it several times.

5252. At the club?—Not at the club.

5253. Where?—We have mentioned it when we have met together.

5254. Of course. Did you ever go to do a job of this kind without having it mentioned before you started?—I cannot say but what we have.

5255. Trusting that the usual rate would be paid you?—Yes.

5256. What is the most now, speaking generally, that you yourself ever received for a job of this sort?—I believe 2*l.* 10*s.* was the most that I ever received.

5257. Not as much as 5*l.*? There was 5*l.* once, was there not?—What, for myself?

5258. Yes, for yourself?—Not for myself.

5259. Who paid you then, did Harrison pay you?—He did not pay me, he paid a man that was with me. Of course I saw it paid.

5260. Who was the man that he paid it to?—Thomas Barlow.

5261. Have you yourself ever had as much as 5*l.* given to you by Harrison?—No.

5262. Not for yourself, you know, but to distribute?—No, I did not receive it.

5263. I know; but did you yourself upon any other occasion receive as much as 5*l.*?—I never received any.

5264. You got it paid in another way? Now we will go on with this story. You met at this hat shop?—Yes.

5265. And it was there settled to go to Clifford's and destroy the bricks, was it not?—Yes.

5266. And the time at which you were to start was settled and all that was to be done?—Yes, we dispersed ourselves separately, agreeing to meet at a certain place.

5267. What was the "certain place"?—At the fence before you get to the brickfield.

5268. What did you take with you?—Well when I was going by Old Cross, at Ashton-under-Lyne, there was John Ensor that shouted to me and I went to him, and he said, "Will you have a glass," and of course I said, "Yes," and we went in and had a glass a piece together, I cannot say whether it was a pint of rum or a pint of gin—

5269. That we will not wait about. What then?—We came out and went to the place appointed.

5270. But I asked you what you had with you. Had you any stick?—Yes, I had a stick.

5271. Had you anything else?—No.
5272. Had you any gun or pistol?—No.
5273. You had not?—No.
5274. Nothing of the kind?—No.
5275. Had you any naphtha?—No.
5276. Then did you and Ensor go together to this place?—Yes.
5277. Now you can tell me then what Ensor carried with him?—He had one pistol.
5278. Single or double barrelled?—Single barrelled.
5279. It was loaded of course?—Yes, I daresay it was loaded.
5280. Had he anything else with him?—Not that I am aware of.
5281. Then did you two walk together to this place where you had agreed to meet?—Well, I cannot say whether there was another that we lit on on the way.
5282. Who do you think it was?—I do not know whether it was not Thomas Barlow.
5283. What did Thomas Barlow carry?—He had a stick, that is all I can say he had; that is all that I know he had.
5284. Had he any pistol?—Not that I am aware of.
5285. You say that it was a stick. I suppose it was a good serviceable stick that you had?—Yes.
5286. And so it was that Thomas Barlow had?—Yes.
5287. Then you all met at the place?—Yes.
5288. Now which of the others had guns or pistols?—Burke had one.
5289. A gun?—A pistol, and Ward had one, but I cannot say that I know of any more.
5290. You have mentioned now three pistols among you?—Yes.
5291. And they were of course all loaded, as we know from what happened afterwards?—Yes.
5292. You have mentioned three, but all the others had sticks like you had, I suppose?—Yes.
5293. Did those who carried pistols also have a stick, or had they only a pistol?—Yes, I believe they had a stick all the same.
5294. A stick besides the pistol?—Yes.
5295. And you will swear that you had not a pistol besides a stick?—Yes.
5296. Then you went to Clifford's?—Yes.
5297. Did you see anybody there?—Yes.
5298. Whom did you see?—There was a policeman at the kiln that was burning, and two or three other men.
5299. What o'clock was it when you got there?—Well, as near as I can think, I dare say it would be about 12 o'clock.
5300. At night?—Yes.
5301. Was it a dark night?—Yes, it was dark.
5302. We understand it was on the 28th of June?—Yes.
5303. Do you remember what day of the week it was?—Well, I do not remember whether it was a Friday night or not.
5304. Then it was on the night of Friday that you went?—I believe it was the night of Friday, but I will not be certain.
5305. Were there six of you, or seven of you?—There were seven of us.
5306. And you were altogether then of course?—Yes.
5307. Are you sure there were not eight?—There was John Ensor, John Ward, Frederick Hipwell (that is myself), Thomas Barlow, Robert Ryan, John Toole, and Michael Burke.
5308. Upon your getting to the yard and finding the policeman and one or two other men, as I think you said, there, what did you do?—Well, John Ward said he thought it would be best to have a look round, and he went by himself round the yard.
5309. You standing on one side?—We were standing on one side. So of course he said he could see nothing, only what there was at the kiln, and we went into the yard altogether when he came back.
5310. The kiln was in the yard, was it not?—Yes, on fire.
5311. You said there was a policeman, how many men were there with him?—There were two or three men.
5312. Upon your going into the yard where the kiln was, and where the policeman and those two or three men were, what did they do?—We could hear them laughing and talking together.
5313. Could not they see you?—No; when a man stands against the fire of a kiln he cannot see the men that are away, and you can see him.
5314. That is very true. Then they could not see you?—No.
5315. And did you go stealthily so that they might not hear you?—We went gently there.
5316. Had you anything over your boots?—No.
5317. Did you all go together?—Yes.
5318. Then what did you do gently?—We started spoiling the bricks.
5319. Was it on the soft clay that you went?—Yes.
5320. That would not make a noise?—No, it would not.
5321. And they could not see you?—No.
5322. I suppose you had resolved if you were interrupted, to make use of the pistols you took?—Well, I never heard that mentioned.
5323. Then what were they taken for?—There was not the least doubt they were taken to be used if we were attacked.
5324. And if the policeman and the men had interfered with you, of course you would have used them as you did afterwards?—Yes.
5325. But, however, they did not hear you, or observe you, did they?—No, they could not have, they never stirred from the kiln.
5326. You kept your eyes well in that direction, I suppose, to see if they moved towards you?—Yes.
5327. You spoiled we understand from 18,000 to 20,000 bricks; were they all in a soft state, or did you knock down any walls?—I never saw any knocked down.
5328. You did your part in treading, of course?—Yes.
5329. And then having done this, you came away?—Yes.
5330. Did you come out as you went in?—The same way back.
5331. And those people never heard you or observed you at all?—No.
5332. Then you were coming home again?—Yes.
5333. Were you walking in single file?—No, we were all together.
5334. I do not know that we want to go into details about it. We understand that the poor fellow Jump was killed at the time. All the pistols I suppose were fired?—Well, I heard the reports, but whether they were all fired or not I cannot say.
5335. But, however, you heard the reports of as many pistols as you had with you?—Well, as near as I can think it was three.
5336. Which of the two policemen were you engaged with?—Master Harrop.
5337. Did you throw a boulder stone at him?—Yes, I believe I did.
5338. It was a pretty big stone, was it not?—Well, I cannot exactly say the size of it now.
5339. And then you all made off?—Yes.
5340. Did you get paid for it?—No.
5341. Who was to have paid you?—John Ward and John Ensor always received the money. I always received mine, what I had, from John Ensor.
5342. Ensor and Gregory made off upon the men being apprehended?—Yes, they got out of the way.
5343. And so you lost your money?—Yes, I never got any.
5344. Did you never get your money from the union?—No.
5345. You were always in the habit of claiming it from Ensor?—Yes, he paid it to me.
5346. You always understood that he got it from the treasurer or secretary of the union and paid it to you, was that it?—Yes.

FIFTH DAY.

F. Hipwell.

9 Sept. 1867.

5347. And as he got off you could not get it, I suppose?—Well, I never had any.

5348. You remember those men being apprehended, do you not, which led to the trial of Ward and Burke?—Yes.

5349. Was there a meeting of the union afterwards which you attended?—No.

5350. Do you know that the funds of the union were employed in defending them; you must know that?—Oh yes.

5351. Were you present at any meeting where resolutions were passed about it?—No.

5352. What has become of Gregory or Ensor?—Well, I cannot say, but I believe they are abroad somewhere, though I do not know where.

5353. When did you last see them?—On the morning that the affair occurred.

5354. Not since?—No.

5355. Were you taken into custody upon the charge of this murder?—Yes.

5356. How long were you kept in custody?—Well, I am sure I cannot exactly say.

5357. A week or two?—Yes, I was in a good way towards two months.

5358. And then you were discharged, were you, there not being sufficient evidence against you?—Yes.

5359. What had become of Ryan or Toole?—Well, they got discharged at Ashton, and I believe they were working a week after they got discharged, and I believe they took their flight and all.

5360. They took their flight out of the district; do you know where they are working?—I do not know.

5361. Have you never heard where they are working now?—I do not know.

5362. You do not know whether they are working anywhere under a feigned name?—I do not know; I have never heard.

5363. Do you know a person of the name of Tetlow?—Of Hurst Brooks?

5364. Yes, at a place called Hurst, which is near Ashton-under-Lyne.—Yes.

5365. You know that this outrage which you have mentioned where this poor man lost his life took place in June 1862?—Yes.

5366. In November 1861, the year before, do you remember some outrage upon Mr. Tetlow's works? Just think; you know you must tell us everything now?—Upon his works?

5367. Upon his works or his house; it is immaterial where.—I remember one upon his house.

5368. He was a master brickmaker, was he not?—Yes, I believe he was.

5369. And did he live at Hurst, near Ashton-under-Lyne?—I believe he did, in what they call Corry Lane.

5370. Is that in Ashton-under-Lyne or near it?—It is in Hurst Brooks.

5371. Had he offended your Ashton union by employing non-union men?—I believe he had.

5372. You had not much doubt about that, I should think, had you?—No.

5373. And that matter, of course, had been brought before your union?—Yes, it must have been.

5374. And of course there had been some resolution respecting it?—Yes, it was John Ensor that mentioned it to me.

5375. But you understood that there had been some resolution of the club about him?—Well, it was generally brought up at the club about masters that were not employing non-union men.

5376. And I suppose it was left to somebody to look after it, and to do what was necessary about it?—Yes.

5377. Who employed you upon that affair?—John Ensor.

5378. Who else were employed in the affair besides you: was Charles Barlow employed?—There was myself, Tom Barlow, John Ward, John Ensor, Isaac Scholefield, and Charles Barlow.

5379. Where is Charles Barlow now, is he here?—No.

5380. Where is he?—He is at Droylsden.

5381. He is now working there, is he?—Yes.

5382. Was Ryan employed in that?—Ryan was there, Robert Ryan.

5383. Now you have mentioned eight of you. How much were you to have for this job?—Well, I do not know exactly what the full amount was, but I know I received the full amount for myself.

5384. Ensor paid you, I understand?—Yes, he did.

5385. He did not pay you till you had done it, of course?—No.

5386. Now, this was in November you have mentioned that this was to be done at Mr. Tetlow's?—Yes.

5387. Where did you all meet to agree upon doing it?—As near as I can remember I believe it was in what they call Wigan Road, out of Charlestown.

5388. You were warned, I suppose, to come to that meeting?—Yes.

5389. Who warned you?—Well, it was generally told from one to another by John Ensor where we were to meet.

5390. One of these eight told you?—Yes.

5391. And this place was agreed upon?—Yes.

5392. Did you mention the name of the public-house where you met?—I believe we did meet at the public-house on Ashton Old Road.

5393. Do you know the name of it?—I was just thinking; it was some "tree" I believe, but I cannot just think of it.

5394. Ensor, you say, warned you to come to the meeting?—Yes.

5395. Was it left to Ensor to get you together, and to settle the mode of doing it?—To Ensor and Ward.

5396. Did Ensor summon you?—Yes, he lived across the street from where I lived and he told me.

5397. And was the summons to tell you to meet at this public-house that you have mentioned?—I do not exactly know whether we met there, or whether we met down the lane a bit from our house; I am not certain.

5398. But, however, you met in one or the other of these two places?—Yes.

5399. What time was it when you met?—Well, I cannot exactly mention the time.

5400. Was it at night?—Yes, it was at night.

5401. At 10 o'clock?—Yes, I dare say it was somewhere from 9 to 11.

5402. Was it the usual habit to meet on occasions of this sort the very night that you were to do the business?—Yes.

5403. Having settled beforehand that the business was to be done?—Well, it must be settled by some time.

5404. It must have been settled however that night on which you met?—Yes.

5405. And you, all of you, met together either down the road or at the public-house?—Yes.

5406. It was then settled, was it, to go to Tetlow's house?—Yes.

5407. Then the offence that Tetlow had committed was not employing union men?—Yes.

5408. Tetlow was not in a large way of business, was he?—I do not exactly know. I was never in his yard in my life.

5409. You had no other feeling at all against him, except the union feeling?—No.

5410. This was the night, we understand, of the 25th of November, 1861, and I suppose it was quite dark?—Yes, but I cannot remember the day of the month.

5411. Now just tell us what you agreed to do, and what you had to you. Did you have combustible things with you?—Yes, it was agreed that we must go and what they call "bottle" him with a bottle of combustibles, with powder and different things.

5412. That means having bottles full of combustible stuff, and throwing them into his house?—Yes.

5413. Who got the bottles on this occasion?—Well, I never knew who it was got them, without it was John Ward and John Ensor.

5414. I suppose you had one?—Well, I had a bottle of naphtha.

5415. Had you got it, or did they give it you?—They gave it to me.

5416. What sized bottle was it? Was it as big as a soda-water bottle?—I believe they were gill bottles, half-pint bottles.

5417. Were they stone bottles or glass bottles?—I cannot remember, to swear, whether they were stone bottles or glass, but I believe they were stone bottles.

5418. But I suppose they were filled in your presence, then?—No they were not; they were filled before already.

5419. Had you seen them before?—I never saw them before.

5420. You never saw a bottle of that sort before?—Never in my life.

5421. Then they explained to you what it was, of course, to "bottle" him?—Yes, they told me.

5422. You had heard the expression "bottling" a man before, of course?—Well, I have heard of some, but I never saw any.

5423. But you had a good notion of what it meant?—Yes.

5424. Was there a fusee at the mouth of the bottle that was given to you?—No, it was a bottle of naphtha.

5425. And then you were to carry it?—Yes.

5426. How many others carried bottles?—I do not know whether there were three or four altogether, I am sure.

5427. But did you understand that the bottles were filled with blasting-powder and naphtha and slugs?—I did not know exactly what they contained inside.

5428. But had you a notion that they contained what I have just mentioned; some powder, of course?—There was some powder.

5429. Naphtha you have mentioned?—The naphtha was in a bottle by itself.

5430. But was there any naphtha in those bottles?—Not that I am aware of.

5431. There was some blasting-powder in some bottles, was there not?—Yes, there was some powder.

5432. Those bottles which contained powder must have had some fusees, I suppose?—Yes.

5433. And the bottles that contained naphtha had nothing but the naphtha in them, I suppose?—No.

5434. And the other bottles contained slugs?—They were combustible bottles.

5435. But you understood that there were some bottles which contained slugs?—They called them bottles of combustibles.

5436. Did you each have a bottle?—No, we did not.

5437. How many bottles were there?—I think there were four or five altogether; I do not know which.

5438. What did those carry who did not carry the bottles?—They generally had sticks.

5439. No doubt; had you a stick that night?—Yes.

5440. Had any of you pistols?—I never saw any that night.

5441. Was it generally the case when you were concerned in these matters, that someone had a pistol?—They might have one.

5442. It was a general thing, was it, to have a pistol?—Very likely they might.

5443. What time of night was it when you started for the job?—As near as I can remember it would be between 11 and 12 o'clock when we got there.

5444. I suppose you had all sticks?—Yes, I daresay we had all sticks.

5445. You went there, did you go to the house of Mr. Tetlow?—Yes.

5446. Does his house look into a lane or a field?—It looks into a field.

5447. Then did you go into the field?—No, we went into the lane, into the road.

5448. I suppose at that time they would have gone to-bed?—Yes, they would be gone to-bed; the house was in darkness.

5449. You expected they would be in bed?—Yes.

5450. Did you know the bedrooms in which they slept?—I did not.

5451. But some among you did?—Yes, some amongst us did.

5452. Was Mr. Tetlow a married man?—Well, I cannot say whether he is or not.

5453. But you have heard that he was?—No, I did not hear that he was.

5454. You did not inquire whether he was married or whether he had any family or not?—I did not.

5455. Having gone there with those bottles some among you knew his bedroom I suppose?—Yes, some of the party did.

5456. And knowing his bedroom and supposing he was in bed, some of your party threw one of the combustible bottles into it I suppose?—Yes.

5457. Which was it? Did you make the first shot, or how was it done?—Well, I cannot say who made the first shot I am sure.

5458. Well, whoever made it, did he make a good one, and did it go through the window?—I cannot say whether all of them went through or not.

5459. Did you see a bottle that was thrown go through the window or not?—Well, there was one went through.

5460. But you had at least four bottles; I suppose they all had their chance of going through the window, had they not?—Yes, they all had their chance; they were thrown.

5461. Were they all thrown into the same room where it was said he was sleeping?—No, there was either one or two thrown downstairs.

5462. Then we understand you to say that there were at least two thrown into the bedroom where he was supposed to be sleeping?—Yes, I believe there were.

5463. There were no shutters, were there; the bottles went right in, did they not?—Yes, there were no shutters.

5464. The other two were thrown downstairs?—Yes, they were thrown downstairs and all.

5465. The combustible one with the powder was thrown into the bedroom I suppose, and the naphtha was thrown downstairs?—I believe I throwed my one downstairs, the naphtha bottle.

5466. The naphtha bottle if it went on, was likely to set the house on fire?—Well, I expect it would.

5467. That was the object, was it not?—Yes.

5468. And the fire would begin quicker if it began at the bottom of the house, and therefore it was thrown at the bottom, was it not? You threw your naphtha then at the bottom?—Yes, I believe I did.

5469. And two of the combustible ones were thrown in at the bedroom window?—Yes.

5470. Did you hear them explode?—Yes, I heard them explode.

5471. What, those which were thrown into the bedroom?—Well, I heard either one or two, but I will not be certain which.

5472. But you heard them explode in the bedroom?—Yes.

5473. What became of your naphtha, where had you thrown that?—Downstairs.

5474. But had you thrown it into the house downstairs?—Yes.

5475. But did you see whether it had taken the effect which you wished it to take, had it set the house on fire?—Well, I never stopped to see.

5476. Were there three bottles thrown downstairs?—I believe there were two in each room.

5477. Two upstairs, and two downstairs?—Yes.

5478. Having thrown them did all of you make off?—Yes.

5479. Did you hear the report of the combustible one before you left?—I heard either one or two.

5480. Reports?—Yes, reports.

5481. Who set fire to the fusee before it was thrown?—Well, I cannot swear what man it was that had a lamp. We had a dark lamp and lit the fusee.

5482. You cannot tell which it was?—No, I cannot tell.

5483. However, the fusee was lit and then thrown?—It was held in the hand a bit and then thrown.

5484. To see that it had got alight?—Yes.

5485. However, you came back?—Yes.

5486. And for that job you got 1*l.*?—I did.

FIFTH DAY.

F. Hipwell.

9 Sept. 1867.

5487. Did you attend any meeting where the subject was discussed afterwards?—No.

5488. Tetlow's bricks have been injured since, have they not?—I do not know, I am sure.

5489. You do not know either one way or the other?—No, I do not.

5490. That you will swear, will you?—Yes, I will swear it.

5491. You have heard of its being done, have you not?—Well, I cannot recollect.

5492. Do you know a place called Newton Wood?—Yes.

5493. Do you remember an outrage committed sometime in the year 1861?—Yes.

5494. Whose property was that? Whose bricks were they?—I do not remember the gentleman's name.

5495. Where is Newton Wood?—Well, I have never been there only a night.

5496. Is it near Ashton?—Yes, somewhere.

5497. It is in that union district, is it not?—Yes.

5498. Do you remember what was the reason of that outrage?—I believe it was because non-union men were employed.

5499. That is, as far as you can remember, the cause of it?—Yes, that was the cause of it.

5500. All those cases, I suppose, are mentioned at the club, and some resolutions are come to, and some persons are employed to carry them out?—Yes, the same as I said before.

5501. Do you recollect now the name of the person who lived at Newton Wood who employed those non-union men?—I do not.

5502. Then the resolution about this person, whoever he was, having been come to, was Ensor the person employed to carry it out?—Yes, he in general was; he and John Ward.

5503. Now then, I suppose you were one of the people employed?—Yes.

5504. And was Thomas Barlow another?—Yes.

5505. And Ensor, of course, himself?—Yes.

5506. Charles Barlow?—Yes.

5507. Ward and Burke?—Yes.

5508. Were Ryan and Toole employed in that?—Yes, I believe they were.

5509. And you were all summoned and all met somewhere on the night before it was to be done. Where did you meet?—We met on the canal side below Guide Bridge.

5510. And you all met together?—Yes.

5511. And what was it agreed to do?—To go and spoil the bricks.

5512. What had you with you on that occasion? You had your sticks I suppose?—Yes; I do not know that there was anything else besides the sticks.

5513. Whether they had pistols or not you do not know?—I do not know; I never saw any.

5514. And did you go to the place?—Yes.

5515. At what time of the night?—Well, I cannot remember what time of the night it was, but it would be dark.

5516. About the usual hour I suppose?—About the usual hour; about midnight.

5517. How many bricks did you spoil?—I cannot say, but there was a large quantity.

5518. There were about eight or nine of you in this job, were there?—I can't mention their names. I cannot just carry them in my head. There was myself, Thomas Barlow, Michael Burke, John Ensor, John Ward, Charles Barlow, Robert Ryan, and John Toole.

5519. Those are the eight you have mentioned before?—Yes.

5520. Do you remember any more?—No.

5521. You do not remember how many bricks were spoiled? Did you spoil all the bricks you could?—Yes.

5522. Did you knock down any walls?—Yes.

5523. And trod upon the bricks?—Yes.

5524. Were you disturbed at all?—I cannot remember that we were; I believe not.

5525. You do not remember seeing anybody on that night at all?—No.

5526. How much did you get for that job?—I cannot remember exactly, but I know I got something.

5527. You all shared alike the sum which it had been agreed should be given I suppose?—Yes.

5528. Now you know Dukinfield very well, do you not?—Yes.

5529. Do you remember a person named Bloxedge who lived at Dukinfield?—Yes.

5530. Is he a brickmaker?—Yes, I believe he is a master brick and tile maker.

5531. How had he offended your union?—I believe in the same way, by employing non-union men.

5532. I suppose in all those cases those things have been mentioned to the club, some resolution has been come to, and some one has been appointed to carry it out?—Yes.

5533. Was Ensor appointed to carry it out?—He was, and John Hall.

5534. He had information from the club of the amount of money to be given, and he paid you all and it was divided between you?—Yes.

5535. Who were employed in the Bloxedge outrage. You were one; and Thomas Barlow?—Myself and Thomas Barlow, John Ward, John Ensor, Michael Burke, John Toole, Isaac Scholefield, and Robert Ryan.

5536. Was a man named Acton employed in that, of some name like Jonathan Acton?—I cannot say for truth whether he was employed or not.

5537. Did you meet all as usual before that was done?—Yes.

5538. About the same time at night?—Yes.

5539. You all went as usual to the place?—Yes.

5540. Were you disturbed?—No we were never disturbed.

5541. Had you sticks?—Yes.

5542. Had you any pistols on that occasion?—I did not see, there might have been some.

5543. You did not see them. I suppose they might have been carried in the pocket?—Yes.

5544. Of course you were all determined to resist with your sticks and so on anybody who attempted to prevent your doing what you wished to do?—Yes.

5545. When you got there you did all the destruction to the property that you could?—Yes.

5546. How much did you get for that job?—Well I cannot remember how much, I know I received something for it.

5547. Was it the usual price, somewhere about 1*l.*?—About 2*l.* I daresay.

5548. You all shared alike I suppose?—Yes.

5549. And did the union money find the expense of the combustibles, the powder, and shot, and naphtha. I suppose that was so, was it not?—Well, I expect it it would be so.

5550. Do you remember Smethurst's case too?—At Guide Bridge?

5551. I believe it was. It was a man named Smethurst or Martin. Do you remember Smethurst's case?—Yes, at Guide Bridge.

5552. Who went to do that? They were all union men I suppose?—Yes.

5553. All those men whose names you have mentioned are union men, are they not?—Yes.

5554. Ensor was a mere working labourer I suppose?—Yes.

5555. And the money he got was union money of course?—Yes.

5556. Which of you went to do the damage in Smethurst's case, were they the same people?—They were not all the same. There was myself, Thomas Barlow, John Ward, John Ensor, Michael Burke, Isaac Scholefield, and Robert Ryan.

5557. You met I suppose in the same way the night you were going to do it?—Yes.

5558. At about the same time?—About the same time.

5559. And you all went together to do it?—Yes.

5560. What did you do there?—Spoiled the bricks.

5561. Was the offence there the same, that is to say, employing non-union men?—Yes.

5562. Smethurst is the name of the master, is it not?—Yes. it is the name of the master.

5563. I suppose in this case you did all the damage you could and came away?—Yes.

5564. How much of the union money did you get for this?—I cannot justly remember how much it was.

5565. It would be about the usual price, I suppose, a couple of pounds?—I daresay it would be about 1*l.*

5566. What made the difference whether it was 1*l.* or 2*l.*, did you get more, or how was it?—I suppose that would be it.

5567. The more you did the more you got?—Yes.

5568. And the time when you got the 2*l.* 10*s.* you had done a good deal, I suppose?—Yes.

5569. Which was the job you did for the 2*l.* 10*s.*, do you remember?—Bloxedge's, I believe it was.

5570. The one of which you have already told us?—Yes.

5571. Do you remember the case of John Shepley, a brickmaker, who lived near Hyde?—Yes, I know the name.

5572. And you have a very good recollection of the place I should think. You know Hyde very well, do you not?—Yes, I have been in Hyde.

5573. Did you do a job of this sort at Shipley's place?—What, at the brickfield?

5574. Yes.—No.

5575. You must remember in 1861 when his cabin was broken into and some injury done to his tools?—No, I never was there.

5576. Just think. You said you had been there?—No, not to the brickfield.

5577. Never mind the brickfield. Do you remember any injury being done to any tools or property of Mr. Shepley?—As to horses do you mean?

5578. The horses were done at the same time, or in August?—I believe it is six years last night since that was done.

5579. You remember the stable being broken into, do you not?—Yes.

5580. Can you mention the names of the persons concerned in this?—There was myself, Thomas Barlow, John Ensor, and John Ward.

5581. There were four of you?—Yes.

5582. Were you summoned in the same way, and did you meet at night?—Yes.

5583. And did you go about the same time, between 11 and 12 o'clock to do it?—Yes.

5584. What did you do. There is a stable there, is there not?—Yes.

5585. Was the offence that he had given you the same as before that he employed non-union men?—Yes.

5586. The stable was broken into. What did you do with the horses? How many horses were there in the stable?—I never was in the stable.

5587. You watched outside, did you?—I was one that watched outside.

5588. Who else watched outside?—John Ensor.

5589. And the other two went in?—Yes.

5590. You had agreed beforehand what to do, of course?—Yes, they were going to do it.

5591. What had you agreed to do with the horses in the stable?—I believe it is what they call hamstringing.

5592. You took your sticks?—Yes.

5593. And you took knives for the purpose?—John Ward took a razor.

5594. And had the other man who went in a razor?—No.

5595. Who else went in besides Ward?—Thomas Barlow.

5596. And you stood outside with Ensor?—Yes.

5597. Did you break open the stable door to get in; was it locked?—Well, I was not near the stable door.

5598. You watched outside?—Yes.

5599. However you settled you should hamstring the horses?—Yes.

5600. They each had a razor I suppose?—They had only one razor. Ensor had a razor.

5601. How long were they in the stable?—About 10 minutes.

5602. You understood from them that they had done what they intended?—Yes, they came out again and said they had done the job.

5603. Both horses?—Yes.

5604. In point of fact they practically destroyed the horses and rendered them useless?—I believe it was to that effect.

5605. But that was the intention, was it not?—Yes, that was the intention.

5606. You were not disturbed in that, were you?—No.

5607. Did you all come away together?—Yes.

5608. I suppose you saw the razor afterwards all bloody?—I saw the razor.

5609. It had been evidently used for some purpose of that sort, was it all bloody?—No, I cannot say that there was any blood on it; he must have wiped it.

5610. How much of the union money did you get for this job?—I received 2*l.* 10*s.* for this job.

5611. How was it you got as much as 2*l.* 10*s.*; there were only four of you, that makes it 10*l.*?—That was the agreement by John Ensor; he sent for the money.

5612. Was it his habit to send to the secretary of the union for the money?—It was myself and Thomas Barlow went to Thomas Harrison, and he gave us a note.

5613. Thomas Harrison was at that time either president or secretary?—Yes, he was either one or the other. He was in office.

5614. And Ensor gave you a note or a letter?—He gave us a little letter.

5615. Which you took to Harrison the secretary or president for that money?—For the money.

5616. And then he gave you 5*l.* to be divided between you?—Yes.

5617. Did he give it you at once?—Yes, Thomas Barlow received it.

5618. And then you divided it?—He gave it to John Ensor.

5619. And then Ensor divided it, and gave you each 2*l.* 10*s.*?—Yes.

5620. Did you see as you were returning what Ward did with the razor?—Yes.

5621. What did he do?—He throwed it over the wall into the canal at the left hand as you come from Hyde.

5622. Now do you remember hearing of a watchman named Rogers being shot or shot at?—Was that a watchman?

5623. Yes.—I do not know about that.

5624. I am not saying you did it, but you remember hearing of its being done?—Yes, but I was working at Oldham at that time.

5625. Do you remember for whom he was watchman?—I do not. I have never been in the yard.

5626. Did Thomas Barlow tell you anything about that?—He told me he was one in the affair.

5627. That he was one of those who shot the watchman?—Yes.

5628. It was Rodgers's watchman that was shot at, was it not?—Yes.

5629. Was the man's name Newton?—I do not remember his name.

5630. Do you remember hearing of Mr. Butterfield's horse being injured?—Yes, I have heard of it.

5631. Was that horse injured in the same way as those others; was it hamstrung?—Well, I cannot say.

5632. But have you heard that it was so injured?—No, I have not.

5633. Was Mr. Rodgers, whose watchman was shot at, a brickmaker?—Yes, I believe he is.

5634. Did you ever hear what his quarrel with the union was?—No, I did not.

5635. Then you never heard of Mr. Butterfield's horse being injured?—Well, I did hear about it.

5636. Did Charles Barlow ever tell you anything about it?—Well, he told me that John Ensor and John Ward was having some beer and playing at cards in their house the same night.

FIFTH DAY.

F. Hipwell.

9 Sept. 1867.

5637. Did he say that he had anything to do with it?—Well, he said John Ward went out for half-a-gallon of ale, and if he did it while he was out he did not know.

5638. Did Charles Barlow say whether he himself had anything to do with it?—He did not say.

5639. Is there any other case that you can tell us about connected with the union?—No.

5640. (*Mr. Chance.*) Do you know anything about Joseph Shaw, in the Ashton-under-Lyne district?—Yes.

5641. Do you remember any injury being done to his property?—I have heard of it. I have worked for him for a great many years, though I never knew at all about it. I was working in Oldham when this affair took place.

5642. Was that done in connexion with your union at all?—No, not with the union that I was in at that time.

5643. You do not know of anybody who did it?—I do not; I have no knowledge whatever.

5644. In reference to that case of Jump's, you said that Ensor had one pistol, did you not?—Yes.

5645. And that that was a single-barrelled pistol?—Yes.

5646. And you also said that Michael Burke had a pistol?—Yes.

5647. You did not tell us whether that was a single or a double-barrelled pistol?—I believe they were all single-barrelled.

5648. Were there not more than two pistols in the party; how many pistols did you tell us there were?—John Ensor had one, John Ward had one, and Michael Burke had one.

5649. They had three altogether?—Yes.

5650. When you took the bottles of powder to Tetlow's house, what was the object of filling the bottle with slugs? Was that intended to do personal injury to anybody in the bedroom?—Well, I do not know what they contained. Ensor and Ward had them ready prepared for the job before we went.

5651. But do you not know what was in the bottles?—I do not exactly.

5652. I understood you to say that they contained powder and also slugs?—There is not the least doubt that they would as long as there was a fuse to them.

5653. Would the intention of putting slugs into that bottle be to do some personal injury to some person in the bedroom?—Well, I cannot say.

5654. Have you any doubt that such would be the intention?—It would be more for frightening them, I daresay; but no doubt it would hurt them if it were to hit them.

5655. And there were people in the bedroom at which it was thrown, were there not?—Well, they went with that intention.

5656. Was Tetlow's house a two-storied house?—Yes.

5657. The bottles of powder were thrown into the bedroom?—Yes.

5658. And the naphtha was thrown into the room below?—Yes.

5659. I suppose there was nobody sleeping in the room below?—I don't know, I am sure.

5660. So that if the naphtha had set fire to the house, it would have made considerable way before it was discovered?—Very likely it would.

5661. (*Chairman.*) You mentioned to me a public-house, the name of which you could not remember, but which you thought was some tree. Do you remember whether it was called the "Cotton Tree?"—No.

The witness withdrew.

J. Tould.

JOHN TOULD recalled and further examined.

5662. (*Mr. Barstow.*) You have told us already that you were foreman to Messrs. Clifford at the time of the outrage on the 28th of June 1862.—Yes.

5663. Do you remember any other malicious damage taking place to Messrs. Clifford's property?—Yes; I believe it was twice that they were there in 1860, at two different times.

5664. In 1860, was Mr. Clifford employing non-union men?—Yes.

5665. Can you tell me whether at that time any application was made to him by the union men to be taken into his employment?—Not to him, but to his men to go in.

5666. That is to say, to his men to go into the union?—Yes.

5667. But nothing besides that?—Not that I am aware of.

5668. Taking the occurrences in the order of date, tell us, as well as you can, what happened?—Well, they were there three times previous to this Jump's being shot, and twice since.

5669. When you say "they" were there, you mean "somebody?"—Yes; I do not know who they were.

5670. Damage was done to Clifford's bricks three times before Jump was shot, and twice afterwards?—Yes.

5671. Do you remember the first time that damage was done to Mr. Clifford's property?—Not exactly the date.

5672. But without the date?—There were from 15,000 to 16,000 bricks spoiled, as nearly as I can recollect, by walking upon them.

5673. In the year 1860?—Yes.

5674. About how much would the cost of that be to Mr. Clifford?—I should say it would be about 5*l.*

5675. Did you examine the brickyard shortly after the damage had been done?—Yes, I was there one of the first in the morning.

5676. Did you take any notice of how many men had been there in your judgment?—Well, there were apparently footprints of about half a dozen.

5677. Did you give any information to the police about it?—Yes.

5678. Did you offer a reward?—I believe Mr. Clifford offered a reward.

5679. Was anyone apprehended?—No.

5680. On the second occasion, in 1860, what happened?—They burnt everything there was on the ground.

5681. Do you remember about what time in the year it was?—I believe it was in the latter end of October, as near as I can recollect.

5682. You say that everything that was upon the ground was burnt,—that would be the sheds, and barrows, and so on, I suppose?—We were just erecting a new shed, and they burnt barrows, planks, tables, tressels, moulding boards, tubs, riddles, shovels, buckets, and everything they could get.

5683. All were burned?—Yes.

5684. Were any bricks destroyed at the same time?—No, there were no bricks on the ground at the time.

5685. About what amount of damage was done?—It would be about 40*l.* according to Mr. Clifford's statement.

5686. Could you tell us at all how it had been done?—There was a lot of hay and dried grass and stuff that was on the ground, and it had been collected together and all set fire to, and apparently naphtha had been thrown over it.

5687. How could you tell that naphtha had been thrown over it?—There was a bottle found near the place.

5688. Did the bottle smell of naphtha?—Yes.

5689. You could not tell how many people had been there, I suppose?—No, I could not; but there must have been a great many to have collected all the things together by the time.

5690. About what time in the night was it set on fire?—Not later than 10 o'clock. I should say they must have been there soon after 6 o'clock at night to collect all the things together by the time the fire was discovered.

5691. There must have been a very considerable number ?—Yes.

5692. Can you give us a notion how many there were ?—I could not.

5693. Do you think there were more than six ?—I do not think six could do it in the time. There must have been eight or ten at the least. They had a great many of the planks and things to carry above 100 yards.

5694. Was any information given on that occasion to the police ?—Yes.

5695. And was a reward offered ?—Yes, I believe there was.

5696. Was any one detected ?—No.

5697. Then there would be a third outrage previous to Jump's murder ?—Yes.

5698. Do you remember the particulars of that case ?—There were only bricks spoiled. No other damage was done, but the bricks were walked upon.

5699. About what time was that ? — I cannot exactly say what month it was in.

5700. It would be between October 1860 and the 28th of June 1862, you know. In what year was it ?—I cannot say that. If Mr. Clifford was here he could give your more information about it.

5701. We do not care for the exact date ; but about what date should you say it was ? Would you say that it was about the middle of 1861 ? Do you recollect whether it was in the winter or in the summer ?—It was in the summer. I believe it was in 1861.

5702. How many bricks were destroyed on that occasion ?—In the tens of thousands, 15,000 or 16,000.

5703. Was there any other property besides bricks destroyed then ?—No, not at that time.

5704. That would be to the same amount, about 5*l.*, would it not ?—Yes.

5705. Were many men engaged in that ?—Apparently five or six by the footprints.

5706. Was information given as before ?—Yes.

5707. And no one was apprehended ?—No.

5708. The next will be the case which has been investigated at length, Jump's case. Then you say they have been twice since that ?—Yes.

5709. Do you remember when the first of those two times was ?—No, I do not, for I was not there then.

5710. You can give us no particulars of them ? — No.

5711. Why do you say that they were there twice ? Were you still in Mr. Clifford's employment ?—No, he delivered the place up to his brother, and his brother held it the two last times that they were there.

5712. So that you cannot tell us about them ?—No, I cannot give you any particular information as to those two last times that they were there.

5713. You cannot give us any particulars ?—No.

The witness withdrew.

Mr. W. P. Roberts, on behalf of the Manchester Brickmakers' Burial Society, the Manchester Bricklayers' Society, and other societies, stated that he wished to protest against the witnesses being examined privately by an officer of the Commissioners, both before and after their public examination in the Court, and he applied to the Court to allow the witnesses to have their legal advisers present at such private examinations, on the ground that many of the witnesses were ignorant men, and might unconsciously prejudice their own interests by their answers.

The *Chairman* stated that the Court could not entertain the application.

THOMAS BARLOW sworn and examined.

5714. (*Mr. Chance.*) Are you a brickmaker ?—I was.

5715. You were a brickmaker in the year 1862 ?—Yes.

5716. And were you a member of the brickmakers' union at Ashton-under-Lyne ?—Yes.

5717. Do you remember being concerned in the injury of some bricks belonging to Mr. Clifford ?—Yes.

5718. Was that in the month of June 1862 ?—I believe it was ; I do not know the month.

5719. Did you and some others meet behind Ward's premises ?—Yes.

5720. Was Frederick Hipwell there ?—Yes.

5721. And John Ensor ?—Yes.

5722. And Samuel Gregory ?—Yes.

5723. And Michael Burke ?—Yes.

5724. Did you meet there for the purpose of agreeing as to the outrage to be committed upon Clifford's bricks ?—Yes.

5725. Was that because Clifford had been employing non-union men ?—I believe it was.

5726. Had there been a meeting of the union previously ?—No.

5727. Had the fact of Clifford employing non-union men been brought before the union before that ?—Not that I am aware of.

5728. When a master brickmaker has done anything of this kind, such as employing non-union men or infringing the rules, his conduct, generally speaking, is brought before the union ?—Yes, generally.

5729. Would it not in the ordinary course be brought before the union on this occasion ?—It might have been, but I was not at the meeting if there was one.

5730. It might have been brought, though you were not aware of it ?—Yes, I was not aware of it.

5731. After being so arranged, did you upon the 28th of June go in company with the other men you have mentioned to Clifford's brickyard ?—Yes.

5732. Did you carry anything ?—I carried a stick with me.

5733. Was that a sort of shovel handle ?—Yes.

5734. A good thick stick ?—Yes.

5735. Did Michael Burke take a pistol ?—I believe he did, but I was not aware that there were any pistols at the time.

5736. You knew there were pistols afterwards ?—Yes, I did.

5737. Do you know who carried the pistols ?—John Ensor carried one ; I believe Michael Burke and Ward carried the others.

5738. There were three pistols ?—Yes.

5739. Then you damaged the bricks at Clifford's ?—Yes.

5740. And after having done the damage you went away ?—Yes.

5741. And on returning did you meet with Police Constables Harrop and Jump ?—Yes.

5742. Did you hear a pistol fired ?—Yes.

5743. It resulted in Jump's death ?—Yes.

5744. What did you do ; did you throw any stones ?—No, I did not, not one.

5745. Did you attack either Jump or Harrop with stones ?—No.

5746. You had a stick ?—I had one, but I did not use it.

5747. Were you one of the men that ran away ?—Yes, me and Ryan.

5748. Afterwards you were apprehended and taken before the magistrates ?—Yes.

5749. And afterwards discharged ?—Yes.

5750. How long did you remain in prison ?—I was liberated on the 25th of August. I do not know the date I was taken.

5751. Did you afterwards receive any money for being engaged in this ?—No.

5752. Were you to have received any money for doing it ?—I believe we should have done, but I did not receive a farthing.

FIFTH DAY.

T. Barlow.

9 Sept. 1867.

5753. Had anything been said at the meetings you attended about any money being paid to you?—No.

5754. But you say you expected to receive money?—Yes.

5755. From whom?—From Ensor.

5756. Was Ensor to get that money from the funds of the union?—I believe he was.

5757. I suppose when you went on this expedition to Clifford's brickyard you were prepared to resist in the event of being apprehended or disturbed?—Yes, I believe that was the main thing.

5758. You intended to resist in the event of being disturbed?—Yes, we did not intend to be taken.

5759. Were Toole and Ryan also of the party?—Yes.

5760. How many of you were there altogether?—Eight.

5761. Do you remember an attack being made upon a house belonging to Mr. Tetlow?—Yes, I remember it.

5762. That was in November 1861?—I do not know the date of it.

5763. Was it in the year 1861?—Yes.

5764. Were you engaged in it?—I was.

5765. Was Hipwell one of the number?—Yes.

5766. And Ward?—Yes.

5767. And Harrison?—Yes.

5768. And Schofield?—Not that I am aware of.

5769. Do you say that he was not there, or that you do not remember?—I do not remember.

5770. Then you say he was not?—I would rather say he was not than that he was.

5771. And Charles Barlow?—No.

5772. Is Charles Barlow any relation to you?—Yes, uncle.

5773. You are sure he was not there?—No.

5774. Let us know who were there; if they tell the truth they will have the same opportunity of being protected as you have. Was your uncle there?—No.

5775. Was Ryan there?—Yes.

5776. Had you met previously to the attack upon Mr. Tetlow's house?—I do not know where the meeting was; we went to beat him if we could find him.

5777. Did you meet previously to going to his house?—Yes, that night.

5778. Had there been any meeting of the union before that?—No.

5779. Do you say that there had not been, or that there might have been a meeting at which you were not present?—There might have been a meeting, but I was not there.

5780. It is probable that there was a meeting?—There might be.

5781. Had he been employing non-union men?—I cannot say to tell you the truth. I do not know whether he was employing non-union men or not. I believe he was not.

5782. What was the reason you attacked him?—I believe it was through not having union men.

5783. Had you any private quarrel with him?—No, I had no quarrel at all.

5784. What was the reason of your going?—They came and asked me and I went.

5785. They gave you a reason for it, did they not?—I believe because he did not employ union men.

5786. You took two or three bottles full of powder and slugs?—There was something of that kind taken.

5787. Were the bottles full of powder?—Yes, they were bottles full of powder.

5788. How many?—I believe there were four.

5789. You had four bottles filled with powder?—Four or five.

5790. Were some of the bottles filled with naphtha?—There was one with naphtha.

5791. And the others were full of powder?—Yes.

5792. And what was in the bottles besides the powder?—A kind of horsenail stumps and things of that kind.

5793. Was anything said about the mode in which the attack was to be conducted when you met for the purpose of going to Tetlow's?—No.

5794. Did you know Tetlow's house?—Yes.

5795. Had you been there before?—No.

5796. Did you know whether Tetlow was married or not?—No.

5797. Or whether he had any family?—No, I did not.

5798. Did you all go together to Tetlow's house?—Yes.

5799. What did you carry in your bottle?—Naphtha.

5800. You carried a bottle of naphtha?—Yes.

5801. Did Hipwell also carry a bottle of naphtha?—I do not know what he carried; there was only one bottle of naphtha.

5802. Are you sure of that?—Yes.

5803. Then you arrived at Tetlow's house?—Yes.

5804. What was done then?—We threw it through the window.

5805. What did you throw through the window?—A bottle of naphtha.

5806. Which window was the bottle of naphtha thrown through?—Downstairs.

5807. Did you throw it downstairs?—Yes.

5808. Was Hipwell with you at the time the naphtha was thrown downstairs?—Yes.

5809. Did he take part in throwing the naphtha downstairs?—There was no one threw naphtha except me. I threw it through the window downstairs.

5810. Why did you throw it downstairs?—Just to frighten them a bit.

5811. Was not your object to set the house on fire?—No, I don't know that it was.

5812. Supposing the naphtha had lighted anything, would it not have set the house on fire?—If it had lighted anything I suppose it would have set it on fire, if it got to touch anything.

5813. How was it to frighten them? It would not make any explosion, would it?—I do not know.

5814. You can only speak according to your belief?—I believe it was to set the house on fire.

5815. Were any bottles thrown through the upper window?—Yes.

5816. Who threw those bottles through the upper window?—Ensor threw one, and Ward and Hipwell, and I think Ryan threw one.

5817. Did all the bottles go through the window?—I do not know.

5818. You do not know how many?—No.

5819. Do you know whether any did go through?—Yes, some went through.

5820. Did you hear an explosion?—Yes.

5821. Did you know at the time whether anybody was sleeping in the room?—I did not know.

5822. Did you hear anybody say whether anybody was sleeping in the room?—I heard Ensor say there was; he said that Tetlow slept in the room.

5823. That was the reason why the bottle was thrown in?—Yes.

5824. Then I suppose the object of throwing in that bottle was to do Tetlow some injury?—Yes.

5825. If the horsenails had happened to hit him about the temple or head they might have killed him?—They might have done.

5826. Was it said that anybody else happened to be sleeping in the bedroom at the same time?—No, it was not.

5827. You did not know of your own knowledge whether Tetlow was a married man or not?—I did not.

5828. Have you heard it since?—I have heard since that he was married.

5829. Did you hear that his wife was sleeping in the room on the same night?—No, I did not hear it.

5830. What did you receive for the part you took in that?—10*s*. I believe it was. I believe it was 10*s*.

5831. Is that all?—I believe it was; I cannot swear positively.

5832. Was it not rather a smaller sum than was usually paid upon such occasions?—I do not know; there have been larger.

5833. Did you all share alike in that?—I got 10*s*. from Ensor.

5834. When did Ensor pay you?—The Saturday night following.

5835. Do you know where Ensor got his money from to pay you?—I do not.

5836. I suppose he got it from the union?—He got it from the union, no doubt.

5837. Do you remember an outrage being committed at Newton Woods?—Yes.

5838. That was the destruction of some bricks?—Yes.

5839. What is the name of the brickmaker to whom the bricks belonged?—I do not know.

5840. Do you remember in what year it was?—I remember the time of it.

5841. Was it in the same year as the last outrage?—Yes, it was.

5842. And was Ryan there?—Yes.

5843. And Burke?—No, I think not Burke.

5844. Are you sure of that?—I could not be sure, but I believe he was not.

5845. Toole?—No, there was no Toole that I can think myself of.

5846. Was Charles Barlow there?—Yes.

5847. Charles Barlow was there?—Yes.

5848. How many men were there altogether?—Ensor, Ward, Hipwell, and me.

5849. And Charles Barlow?—Yes.

5850. And Ryan?—Yes.

5851. That is six?—Yes.

5852. Were there more than six?—No, not that I am aware of.

5853. Did you meet in the same way on that occasion?—No.

5854. Had you met at all, previously to going, at the union?—We met in Old Street in Ashton.

5855. Had there been upon that occasion any previous meeting of the union in reference to Newton Woods?—I do not know; I was very seldom at the meetings.

5856. You believe there had been?—Yes.

5857. It was in the usual course of things that you held a meeting?—Yes.

5858. That the conduct of these people should be brought before the members of the union?—Yes.

5859. Did you all proceed to Newton Woods from Old Street?—Yes.

5860. What did you carry with you on that occasion?—We carried nothing.

5861. Did you carry sticks?—No.

5862. Did you or anyone have sticks?—I had not a stick; I did not see one on that night.

5863. Usually you carry sticks on these occasions?—We do so, but we did not on that night.

5864. Did you spoil any bricks there?—Yes.

5865. Did you spoil all you could?—Yes.

5866. You did all the damage you could?—Yes.

5867. What did you get for that?—1*l.*

5868. Was that paid in the same way to you by Ensor?—Yes.

5869. And out of the union funds?—Yes, it was out of the union funds that Ensor paid me.

5870. What was the cause of the injury to these bricks?—Not employing union men.

5871. Do you remember an outrage upon Mr. Brooksedge?—Yes, I do.

5872. Was that in 1862?—Yes.

5873. Was that the destruction of bricks too?—Yes.

5874. There you destroyed as many as you could?—Yes.

5875. Had Brooksedge been guilty of the same crime, not employing union men?—Yes.

5876. I suppose the same course was taken with him as in the other cases?—Yes.

5877. Were the same men who were engaged in the case of Newton Woods employed there; you were there?—Yes.

5878. Was Ward there?—No.

5879. Burke?—Yes.

5880. Ryan?—Yes.

5881. Toole?—Yes.

5882. Scholefield?—No.

5883. Gregory?—No.

5884. Hipwell?—Yes.

5885. Ensor of course was there?—Yes.

5886. That was seven, were there more than seven or not?—That was the lot that was there.

5887. What did you receive for that?—25*s.*

5888. That was your share?—Yes.

5889. Did you get that from Ensor as before?—Yes.

5890. Was Ensor the paymaster for this purpose?—Yes, he was to me.

5891. You do not know whether you received the same share as the others or not?—I do not; that was what I got, 25*s.*

5892. Did you take sticks with you on that occasion?—No, there were no sticks that night.

5893. Had any of your party pistols or anything of that sort?—No, not that I am aware of. I never saw any nor heard that there were any.

5894. Can you remember also being engaged in Smethurst's case, at Guide Bridge?—Yes.

5895. Was that in the same year, 1861?—No, 1862; it was just before Jump's job.

5896. What was the damage done there?—Spoiling bricks.

5897. You spoiled as many as you could?—Yes.

5898. Was the cause of the injury the same as before?—Yes.

5899. What did you receive for that?—15*s.*

5900. Was that paid to you by Ensor?—Yes.

5901. How many men were engaged in that?—Hipwell, me, Ward, Ensor, Ryan, and Burke.

5902. Toole?—No.

5903. Gregory?—No.

5904. There were six men in it?—Yes.

5905. How much did you receive for this one?—15*s.*

5906. Was that paid you by Ensor?—Yes.

5907. Do you remember Mr. Shipley's stable being broken open?—Yes.

5908. When was that?—Within a month I heard it talked of.

5909. How long ago, six years ago?—Yes, I daresay it is.

5910. That would be about 1861?—Yes, it might be; I cannot tell.

5911. Were you present there?—No.

5912. Are you sure you were not present when Shipley's stable was broken open?—Yes, I was.

5913. Had Mr. Shipley been employing union men?—Yes.

5914. And did you meet with a number of members before going to his premises?—No, only Ensor, Ward, and Hipwell.

5915. You four met together?—Yes.

5916. Were you four the only ones concerned in it?—Yes.

5917. Did you know before you went to his stables what you were to receive for it?—No.

5918. When you went to Shipley's stables, what did you do?—There was only one went in, Ward.

5919. John Ward went in?—Yes.

5920. Are you sure you did not go in?—I went to the door.

5921. Did you not go into the stable?—No, I stood at the stable door.

5922. Who went in?—Ward went in.

5923. Did he take anything with him into the stable?—A razor.

5924. How many horses were in the stable?—Two.

5925. Had you seen them in the stable?—Yes, that night.

5926. You looked through the door?—The door was open.

5927. The door was open while Ward was in?—Yes, I had hold of the handle.

5928. You and the two others stood outside?—Yes.

5929. What did Ward do?—I do not know; he used the razor to cut them somewhere.

5930. Was that to render the horses useless?—Yes.

5931. Do you not know whether he cut them? Did he not hamstring them?—I do not know what name they gave it.

5932. He cut the sinews of the horse's legs?—Yes.

FIFTH DAY.

T. Barlow.

9 Sept. 1867.

5933. Do you remember his coming out of the stable?—Yes.

5934. Did you not say when he had come out that he had done the job?—He said he had done the job.

5935. You did not say that?—No.

5936. What amount did you receive for that?—50*s.*

5937. Did you receive a greater amount on that occasion because it was a more desperate affair, or because there were fewer of you?—Because there were fewer of us.

5938. Who gave you the money for that?—John Ensor.

5939. Did not Ensor upon that occasion give you a note?—Yes, he did.

5940. Ensor upon that occasion gave you a note?—Yes.

5941. And did you and Hipwell go with that note to Thomas Harrison?—Yes.

5942. Where was Thomas Harrison when you went to him?—In his own house.

5943. When you gave that note to Thomas Harrison, what did he give to you?—5*l.*

5944. That was divided between you and Hipwell?—No, we sent it up to Ensor.

5945. You gave the 5*l.* to Ensor, and then it was divided between you and Hipwell?—Yes.

5946. Did Thomas Harrison hold any office in the union at that time?—Yes.

5947. What was he?—Treasurer or president, I cannot say which. I think he was president.

5948. Has he often been in office in the union?—He was in office all the time I was in the union.

5949. As treasurer or what?—Either treasurer or president.

5950. When did you leave the union?—I have never been in it since Jump's job.

5951. You told Ward to throw the razor away?—I do not know that I did.

5952. You did not see him throw it away?—I do not know that I did.

5953. Did he throw it away?—I did not see him.

5954. You do not know that he did not?—No.

5955. Do you remember a watchman of the name of Samuel Newton in the service of Mr. Rogers?—Yes.

5956. Where did Mr. Rogers live?—I do not know where Mr. Rogers lives.

5957. (*Chairman.*) Where did he live?—I do not know.

5958. (*Mr. Chance.*) You say you know that Samuel Newton was employed by Mr. Rogers as watchman?—Yes.

5959. Was Rogers a brickmaker?—Yes.

5960. Do you know where his brickyard was?—Yes.

5961. Where was it?—Going along Oldham Road.

5962. Is it in the Ashton-under-Lyne district?—Yes.

5963. Had he any dispute with your union?—Yes.

5964. What had he been doing?—He would not employ union men.

5965. Was there a meeting of the union in consequence of that?—Yes.

5966. Was the fact of his not employing union men brought before the meeting?—Yes.

5967. Was there any resolution come to?—No, not while I was in.

5968. Was anything said about it?—No.

5969. If his dispute with the union was brought before the meeting something might have been said about it?—Nothing was said about how it would be settled with him; there were two appointed to go to him.

5970. Two appointed to do something to him?—Two were appointed to go to him.

5971. Who were appointed to go to him?—I think Ensor was one.

5972. Who else?—I do not know who the other was.

5973. What were they appointed to go to him about?—To see whether they could not arrange matters with him about having union men.

5974. Do you remember the year in which this took place?—No, I do not.

5975. Was it not in November 1860?—It might have been, I do not remember.

5976. Six or seven years ago?—Yes.

5977. A long time ago?—Yes.

5978. Did they wait upon Mr. Rogers?—I believe they did.

5979. Do you know what the result of that meeting was?—No, I do not.

5980. Did you hear what the result of the meeting was?—No.

5981. Did not you hear whether they succeeded in inducing him to comply with their wish?—I do not think they succeeded in getting him to have union men.

5982. After they had had this interview with Mr. Rogers without success was there another meeting?—Yes.

5983. Were you present at that meeting?—Yes.

5984. Do you remember who presided upon that occasion?—No, I do not.

5985. I suppose there was somebody in the chair?—Yes, there was.

5986. You do not know who it was?—No, I do not.

5987. Was Thomas Harrison president then?—Yes, I believe he was.

5988. If he were president would not he be likely to take the chair?—Yes, but sometimes he was absent.

5989. But the probability is that unless there was some cause for his absence he would take the chair at the meeting?—Yes.

5990. Who was secretary at that time?—John Barlow.

5991. Was he present at that meeting?—Yes.

5992. How many members were present at that meeting?—There might have been about 60 or 70.

5993. Then I suppose the non-success of the application to Mr. Rogers was brought before the meeting?—Yes.

5994. Was any resolution taken upon it?—No, there was not at that time.

5995. Was the matter discussed?—Yes, it was discussed a little.

5996. Was another meeting held afterwards in reference to the same subject?—No.

5997. No meeting?—Not that I can recollect.

5998. Do you remember Samuel Newton being shot at?—Yes.

5999. Was there any meeting previously to Samuel Newton being shot at?—No.

6000. You say that the matter was discussed?—Yes.

6001. Was not some resolution come to?—Not that I can remember myself.

6002. Was it not suggested that something should be done to Rogers?—It was suggested that they would make him have union men.

6003. Something was said about making him have union men?—Yes.

6004. There was some resolution of that kind passed?—Yes.

6005. That something must be done to him?—Yes.

6006. Was anybody appointed at that meeting for the purpose of doing something to Rogers?—No, not that I am aware of.

6007. Was not anybody named?—No.

6008. Do you know whether any member of the union volunteered to do anything to Rogers?—I do not.

6009. But something was done?—Yes.

6010. Who did it?—Ward, and Ensor, Ryan, and me.

6011. You were one?—Yes.

6012. Was there anybody else?—Jonathan Acton.

6013. Had you met together?—Yes, and Charles Barlow.

6014. Did you six men meet together?—Yes.

6015. You met together to consult as to what should be done?—Yes.

6016. Who called you six together for the purpose?—John Ensor.

6017. When you met together, what was agreed to be done to Rogers?—To spoil his bricks.

6018. Anything else?—No.

6019. Did you go to Rogers's brickyard for the purpose of spoiling his bricks?—Yes.

6020. Did you go to his brickyard the same night together ?—Yes.

6021. Did you take any arms with you when you went to the brickyard ?—Two had them, Acton and Ward.

6022. What did they take ?—A pistol each.

6023. A revolver, or what ?—No, a single-barrel.

6024. Did you take a pistol ?—No.

6025. Do you know what the pistols were loaded with ?—I do not.

6026. They were loaded ?—Yes, and were fired.

6027. Did you and the others take anything ?—No.

6028. Did not you take sticks ?—No, we took nothing.

6029. Just remember ; did not you take sticks with you ?—No.

6030. You knew that these men had pistols before you started ?—Yes, I knew these men had a pistol each.

6031. When you went you were determined to resist in the event of being apprehended or disturbed ?—Yes.

6032. You went with that determination ?—Yes.

6033. When you got to Rogers's brickyard what happened ?—The watchman's dog came running out, and then the watchman came.

6034. Is that Samuel Newton ?—Yes.

6035. What happened then ?—He wanted to know who was there.

6036. What else ?—And then some one fired ; I do not know whether it was Acton or Ward.

6037. Either Acton or Ward fired ?—Yes, I do not know which of them fired.

6038. Whoever it was that fired, did he hit Newton ?—I believe he did, according to all accounts.

6039. I suppose you knew afterwards who it was that fired ?—Yes, both Ward and Acton.

6040. Both fired ?—Yes, each of them ; I do not know who fired first.

6041. One fired first and then the other fired ?—Yes.

6042. After they had so fired, what took place ?—We all ran away.

6043. Did you learn afterwards that the watchman had been hit ?—Yes, I heard the morning after.

6044. At the meeting of your union which was held in reference to this matter, was anything said about the amount of money that you were to receive for this ?—No.

6045. Are you sure that nothing was said about it ?—Yes, I am sure nothing was said about it.

6046. Before you went, you expected to receive something ?—Yes.

6047. What did you receive ?—1*l.* I believe it was.

6048. Do you know what Ward and Acton received ?—I do not know.

6049. Whom did you receive the money from ?—Ensor.

6050. Did you receive it direct from him or did he give you a note as before ?—No, I received it direct from Ensor.

6051. Was that done after the outrage had been committed ?—Six or seven days after.

6052. Was Newton hit on the head ?—I believe he was ; it was stated so in the paper.

6053. Was there any meeting afterwards at the union in which this matter was discussed ?—Yes, but I did not go.

6054. Was a meeting held before the money was paid ?—Yes.

6055. The money was paid by Ensor after the meeting was held ?—Yes.

6056. You were not present ?—No.

6057. In any of the outrages which you have spoken of, were any meetings held before the money was paid to you ?—Yes, I believe there was.

6058. Was it, generally speaking, the case that after they committed an outrage a meeting of the union was held and then the money paid ?—Yes.

6059. That was the usual course ?—Yes, I believe it was.

6060. You have told us of a good many things in which you were concerned, are there any others which you can recall to your recollection ?—Yes, one.

6061. What was that ?—At Mr. Clifford's again.

6062. On another occasion ?—Yes.

6063. When was it, before Jump's case or afterwards ?—Before.

6064. How long before ?—18 months before.

6065. What was the outrage committed on that occasion ?—Burning his materials.

6066. What materials ?—His barrows and planks.

6067. Was the cause of that the same, that he did not employ union men ?—Yes.

6068. Who was associated with you in it ?—John Ensor, Ryan, and Scholefield ; I cannot think of anyone else.

6069. Burke ?—No.

6070. Ward ?—No.

6071. Hipwell ?—No.

6072. Charles Lawrence ?—Not that I am aware of.

6073. There were three of you ?—There were four of us, but I cannot bring the other to mind.

6074. Gregory ?—No ; there was Acton.

6075. That would make four ; were there more than four ?—Acton, Ryan, me, and Ensor.

6076. Were there five ?—That is all that I can think of now.

6077. Was there a meeting of the union in that case as well as in the others ?—Yes.

6078. It was resolved that something must be done ?—Yes.

6079. That was the ordinary course adopted ?—Yes.

6080. Then there were certain men who volunteered to do it ?—Yes.

6081. In that case did you all meet together before going to Clifford's brickyard ?—Yes, five of us.

6082. Did you take any arms upon that occasion ?—No.

6083. No guns or sticks ?—No.

6084. What did you take ?—Nothing except naphtha.

6085. Did you carry the naphtha in a bottle ?—Yes.

6086. How much did you take ?—A gallon.

6087. When you got there, what did you do ?—We got all the materials together and then Acton put the naphtha on the top.

6088. Were there a large number of planks and barrows ?—Yes.

6089. You heaped all the barrows and planks and other things together, and Acton poured the naphtha upon them ?—Yes.

6090. Was he the only one that poured the naphtha on ?—Yes.

6091. And you stood by him watching ?—Yes.

6092. Were there any men in the brickyard at the time ?—Only us.

6093. Ought there to have been a man upon the premises ?—There was none then.

6094. You set the heap on fire and destroyed it ?—Yes.

6095. You met with no opposition that night ?—No.

6096. After having set these things on fire, did you go away ?—Yes.

6097. How much money did you receive for it ?—I do not know.

6098. Who paid you then ?—Ensor.

6099. Did he pay you the money himself ?—He paid it himself, three or four days after.

6100. In all these cases did Ensor pay you, except the time that he gave you a note to Harrison ?—Yes.

6101. Did he at any other time give you a note ?—No.

6102. He always paid you himself ?—Yes.

6103. Upon this occasion was there a meeting of the union before he paid the money ?—I do not know.

6104. There might have been ?—Yes.

6105. In the more recent cases have you any doubt about it ?—No.

6106. Are there any other outrages upon Clifford's property in which you were engaged ?—Yes, we spoiled about 10,000 bricks.

6107. When ?—Just before or just after.

FIFTH DAY.

T. Barlow.

9 Sept. 1867.

6108. About the same time ?—Yes.

6109. Were the same men engaged ?—Yes.

6110. Were there any others ?—No.

6111. Was there a meeting of the union for that purpose ?—Yes.

6112. How much money did you have for it ?—10*s.*

6113. How were the bricks destroyed there, by trampling upon them ?—Yes.

6114. Is that the only way in which it was done ?—Yes.

6115. Was there no one in the brickyard but yourselves ?—No.

6116. Were there any other outrages upon Clifford's property ?—Not that I have been at.

6117. There were two before Jump's ?—Yes.

6118. Have you been engaged in any outrage upon property since the case of Jump ?—No.

6119. You do not know of any ?—No.

6120. Is there any other occasion upon which you have been engaged in any outrages upon anybody else's property ?—No.

6121. You have told us all that you know ?—Yes.

6122. (*Chairman.*) Was Ensor president of the union for some time ?—Yes.

6123. When these outrages were being done ?—Yes.

6124. Was it the president who usually paid the money ?—Ensor always paid me.

6125. Whether he was president or not, he always paid you ?—Yes.

6126. How many outrages do you think there were when Ensor was president ; some half dozen, perhaps, speakly roundly ?—I might say half a dozen.

6127. They were done when Ensor was president ?—Yes.

6128. Do you know Renshaw's brick machine at Hyde ?—No.

6129. Did you ever hear of it ?—No.

6130. Not at all ?—No, I cannot bring it to mind.

6131. Do you remember a machine being blown up at Hyde some three or four years ago ?—No.

6132. Your memory is pretty good about these outrages ?—I have told you all that I know of now.

6133. Where is your friend Acton now ?—I do not know.

6134. When did you last see him ?—I have not seen Acton since before Jump's job.

6135. Did he go away to work in some other district ?—I cannot say. I have not been working there since. I have been living at Preston ever since.

6136. You do not correspond with your friend ?—No.

6137. You have not heard where he is ?—I heard that he was at Crewe.

6138. When ? — Some time since I saw James Deblin.

6139. He is known to the police, I think ?—Yes, he is.

6140. Who is it that told you ?—Deblin.

6141. He told you that Acton was at Crewe ?—Yes.

6142. That is about two weeks ago ?—Five or six weeks ago.

6143. Did he tell you that he was working there ?—Yes.

6144. In his own name ?—Yes, as far as I know.

6145. You did not hear to the contrary ?—No.

6146. When you took this loaded gun to Rogers had you settled before to have a shot at the watchman ?—I do not know that we had.

6147. It looks like it ?—I apprehend that it was so.

6148. You settled that beforehand ? — No, they said they would spoil the bricks.

6149. Did not you say that you would spoil the watchman ?—No.

6150. What did you take the gun for ?—I did not take one.

6151. Or a pistol ?—I had not one.

6152. What did they take it for ?— To defend themselves.

6153. Did you expect to be attacked ?—It looks like it ; they said there was a watchman.

6154. They said that there was a watchman ?—Yes.

6155. Then you expected to be attacked, and you took it to what you call defend yourselves ?—Yes.

6156. That was your object in taking it ?—Yes.

6157. How many guns did you take for the purpose of defence ?—Only two, Acton and Ward.

6158. There was only one watchman ?—No.

6159. Have you ever done a job of this sort and been refused payment afterwards ?—No.

6160. You always had your money ?—Yes, only on the occasion of Jump's job.

6161. You did not get it then because Ensor was the man who usually paid you and he made off ?—Yes.

6162. And so you lost your money ?—Yes.

The witness withdrew.

Mr. J. Barlow.

Mr. JOHN BARLOW sworn and examined.

6163. (*Mr. Barstow.*) You are now a master brickmaker, I believe ?—Yes.

6164. Where do you carry on business ? — At Droylesden.

6165. How long have you been in business as a master brickmaker ?—About two or three years.

6166. In the years 1860, 1861, and 1862, you were secretary to the Ashton operative brickmakers' union ?—Not all the time, but at various times in those three years.

6167. When were you first secretary ?—In the year first mentioned.

6168. 1860 ?—Yes.

6169. What part of the year ?—I cannot say what part of the year.

6170. Early or late in the year ? — I have no recollection what part of the year. I should probably be secretary two years out of the three at various times.

6171. When did you cease being secretary ?—At the time of the murder of constable Jump, with the exception of three months once, between three and four years ago.

6172. You were in office once after the murder of Jump ?—Yes, once between three and four years ago.

6173. At the time that you were secretary what officers of the union were there ?—President, treasurer, and secretary, and three or four keyholders of a safe that they kept the money in.

6174. Had they any duty except keeping the key of the box in which the books were kept ?—No.

6175. Had you a council ?—No, no council.

6176. How were these officers elected ?—Quarterly.

6177. By what sort of a meeting ?—A general meeting.

6178. Was a general meeting held every quarter ?—Yes, what was called a quarterly meeting.

6179. And were there other general meetings ?—Yes.

6180. Were those called general meetings or special general meetings ?—Special.

6181. Besides those, you had council meetings I suppose ?—No.

6182. You had no council meetings ?—No.

6183. Then all the business of the union was transacted either at an ordinary general meeting or at a special general meeting ?—With the exception of the business done by the officers.

6184. All the officers might meet together and do any business connected with the union ?—Any petty things, but important business had to be decided upon by a general meeting.

6185. You know the kind of business that we have heard of to-day ; would that be important business done at a general meeting, or at an officers' meeting ?—It would be interfered with by the general meeting no further than this : a master or two would prove obstinate to the wishes of the society, and after deputa-

tions going to him various times, and after his refusal of their requests, a general meeting would find that there was no course open for them to take, and most probably some one from the body of the meeting would say that another course must be taken.

6186. Was that phrase, "another course must be taken," understood by the people who composed the meeting?—It was understood to be an unlawful course.

6187. Did the body of the meeting know what was meant by "another course must be taken?"—I should think so.

6188. In your opinion?—In my opinion, I think so.

6189. When you were secretary of the union, about how many members do you think there were contributing to your union?—They varied; sometimes 150 members, up to 300.

6190. It varied from 150 to 300?—Yes.

6191. In the brick trade there are men called contribution men?—I refer to full members of the union.

6192. And besides those there were a certain number of contribution men?—No, because at that time we decided to make all into full members.

6193. What was your weekly contribution?—It varied from 6*d.* to 1*s.* in the summer, and less in the winter.

6194. Was there any cause for the variation of the contribution except the winter and summer seasons?—No; I do not know why it should vary, except that the men earned less wages in the winter, and they thought they could pay less.

6195. And all these contributions were enforced; you compelled everybody to pay who were members of the union?—Sometimes if the men did not pay, the other men that worked along with them were withdrawn from their work, causing the master to discharge the men who were obnoxious.

6196. Did you by any means, either direct or indirect, compel a master to pay the contribution?—Never, not to my knowledge.

6197. During the time that you were secretary were the officers of the union generally the same men?—Yes, they did not vary very much.

6198. Who were the officers of the union principally during the time that you were secretary; what names can you give us?—I can remember one of the name of John Mann.

6199. What was he?—I remember him only at present as being treasurer.

6200. Do you remember any other?—I saw Scholefield.

6201. What was he?—I suppose he was the treasurer or secretary.

6202. Are there any other names that you can remember?—Not at present; there are others that I could remember after thinking.

6203. Ensor?—Yes.

6204. Harrison?—Yes, and James Bateman.

6205. I do not want all, but were the same people generally re-elected? Did they have to go out of office at the end of three months?—Generally speaking they would be the same men, because in a society of 120 or 150 there would be only 20 or 30 men able to occupy the office, mentioned.

6206. What qualification did the men look for in electing their officers?—Trustworthiness and honesty would be two of the principal features.

6207. Was there no other qualification?—No, I think those two state all.

6208. Steadiness in a workman, would that be looked at?—Not at all.

6209. Do you think a little infusion of zeal would be looked up to at all?—Most certainly.

6210. You understand what I mean by that I suppose; zeal for the interests of the union?—Yes, I understand you mean one more forward than the rest in the cause of the union.

6211. Would that be a qualification?—I should think it would.

6212. You have served yourself, was that so then?—I do not know on what qualification my election was, but I thought it was because I was trustworthy for one thing, and they could place a little faith in me, being one when first I entered who had upheld the cause of the union, and being a better scholar than a good many of the rest.

6213. Was zeal in upholding the cause of the union the principal qualification that the society looked for?—I cannot say any further than I have done about it; my own election depended upon being a better scholar than the rest.

6214. Waiving your own election, as regards the others, do you think that qualification was looked for?—Most certainly, they would not elect men who they thought would neglect the cause of the union, and who were not strict unionists.

6215. I ask again if zeal and determination in carrying out the interests of the union was not looked for as a qualification in electing the officers of the union?—In that way most certainly it was.

6216. Of course we know that you have certain rules with reference to the relations between masters and men?—Yes.

6217. For instance, you have rules regulating the minimum amount of wages that must be paid to the different classes of workmen in the brickmaking trade?—Yes.

6218. And you have rules forbidding the employment of non-union men in the district?—Yes.

6219. Have you any rules with relation to machinery?—No.

6220. None?—Not that I can remember.

6221. Would any one be permitted to make bricks by machinery within the Ashton district at the time that you were secretary?—In yards where our members worked I believe it was never attempted, but had it been attempted I do not think the members would have continued working.

6222. Could a master discharge what men he liked?—Yes, I suppose he could.

6223. Without the interference of the union?—If they had not done their work in a satisfactory manner I believe he could.

6224. Was he compelled to choose his workmen from a certain class?—His workmen had to be members of the union.

6225. Whoever those men were they must be members of the union?—Yes, if that master was desirous of complying with the rules of the union.

6226. Had you any regulation about apprentices?—No further than this; the usual rule is that before they can be admitted into the union they have to carry five years.

6227. Is brickmaking a difficult thing to learn?—That is a matter of opinion.

6228. What is your opinion of it?—It is my opinion that it is not very difficult to learn, and not worth much after it is learnt.

6229. Could any ordinary labourer learn to be a brickmaker?—Perhaps not a brickmaker; he could learn to temper and get the clay ready, and wheel it for the maker.

6230. How long does it take a man to learn it?—If he was strong enough he would learn in a week, I daresay; it depends upon his strength.

6231. Brickmaking is principally carried on in the summer?—Yes.

6232. And in winter there is a slack time?—Yes.

6233. How do the brickmakers carry over the winter?—I know I carry it over by getting work elsewhere.

6234. In what way?—Labourers' work.

6235. In the summer time would a brickmaker permit a labourer to come and work in the brickyard?—At some jobs, not others.

6236. Were there any other rules than those which I have mentioned which brought the masters into collision with the men?—The principal thing I know of that brought us into collision with the masters, and has caused so much bother, was the strike for the advance of wages.

6237. That was the principal thing?—Yes.

FIFTH DAY.

Mr. J. Barlow.

9 Sept. 1867.

6238. Besides that, as we know, the employment of non-union men?—Yes.

6239. Can you tell us of any other than those two?—Not just at present, but perhaps in answer to questions further on I may be able to tell you.

6240. Who found out for instance that the master paid less wages than the union rate; how was it brought before the union?—By that master I suppose employing non-union men.

6241. Did it ever happen that a master paid union men less than the union rate?—I believe in some cases union men under what is called a cloak have received less wages than they should have done.

6242. Has that ever been brought before the union—Yes, I have heard cases at various times.

6243. How would it become known to the union?—By one man telling the others I suppose.

6244. Had you any officers called delegates in your union?—Whenever a dispute arose between a master and his workmen general meetings were called and delegates appointed.

6245. They were not permanent officers; they were specially appointed?—We never had any permanent delegates.

6246. Are there any in other unions?—I believe there are.

6247. Were the officers of your union working men at the time that they were officers?—Yes.

6248. They worked as well as being officers?—Yes.

6249. Were your accounts audited?—Yes.

6250. Were they open to the inspection of any members of the society?—Yes, at times.

6251. At proper times, that is at the times of meeting?—Yes.

6252. When a master was in dispute with his men either for employing non-union men, or for not paying proper wages, or for any other cause, what course was taken?—Delegates would be appointed to go and remonstrate with him, and almost invariably they would meet with a refusal from the masters, and other steps would have to be taken, unlawful steps most probably.

6253. How were those unlawful steps sanctioned?—They were never brought before the general meeting, or if so only very rarely; it was chiefly left to the discretion of the officers.

6254. How was it left to the discretion of the officers. You told us just now that such a thing as I spoke of would be mentioned in a general meeting?—Illegal cases would not be mentioned, but that is a case varying from cases of importance; generally cases like those are rather therefore regarded as cases for the officers alone than cases for a general meeting.

6255. Have you ever known of any dispute between a master and men leading to damage or outrage mentioned at a general meeting?—Yes, I have heard them mentioned.

6256. Have you ever heard it said that something must be done?—Yes.

6257. That was common, I believe, from what you say?—Invariably when they heard of a master's stupidity some one would say in a moment that something must be done, some other steps must be taken.

6258. Do I understand you to say that it was perfectly understood by the body of the meeting?—Perfectly understood.

6259. It was a hint, I suppose, to some person or other to carry out the wishes of the meeting?—While I was in office it was regarded as a hint with me.

6260. And you have no doubt that it was regarded as a hint by the other officers?—Judging by our actions it was.

6261. Is it your opinion that it was so regarded?—Yes, it is my opinion.

6262. Upon taking that hint what steps were taken to carry out the wishes of the meeting?—In any society where those outrages are committed there is very often a number of men ready to offer their services. Of course they offered their services to us and that is how they were brought about in our case; I cannot speak of any others.

6263. They were hanging about and anxious to know what job was to be done?—No, I do not know that those that I had connexion with hung about, they worked like another as far as my knowledge goes.

6264. They were the same men who were always anxious to know whether any job was to be done?—As far as using the word "many" my memory does not go so far, they did not come after me or the officers along with me in a body asking what was to be done, we never made any arrangement with a body of men as to what they were to do, our arrangements were with one individual, and that individual was left to use his own discretion in the matter.

6265. You did not settle any detail with him?—No, not at all.

6266. What would you say to him? What would pass between the individual and yourself, for instance?—He would refer us to the wishes of the society from the remarks made, and he would name to us the obstinate individuals, and listening to what he said we should no doubt enter into an arrangement with him. There were a great many masters obstinate, and probably he would not be tied to one particular case, but it would be left to his own discretion if he had a sum of money given to him as to whom it should be employed upon.

6267. You have mentioned a sum of money. Who settled the sum of money that was to be paid to bring the master to reason?—It would be mutually arranged between the officers and the men who agreed to accept the money.

6268. Was a certain sum generally understood as a proper sum for such a job?—No, some varied, sometimes perhaps 10*l.*, sometimes 15*l.*, sometimes less and sometimes more.

6269. What was the cause of the variation of the sum?—I can scarcely say what would be the cause of the variation. I should think the difficulty of the job would cause a higher sum to be paid, that is my impression.

6270. The difficulty of the job rather than the extent of the damage done?—You may take it either way, perhaps both would be an answer.

6271. With whom was it left to settle the amount?—As far as my connexion with anybody goes there is only one that I have ever had any arrangement with, that is John Ensor.

6272. Did you consider yourself authorised in any manner, expressed or implied, to act for the union in settling the amount of money to be paid?—I together with another fellow officer did.

6273. Who was your fellow officer?—The one that was generally in office with me; his name is Harrison. He was generally president, and I was secretary.

6274. I referred rather to what officer of the union than the man's name. The president and the secretary?—And the treasurer as well.

6275. There were three officers who had an implied authority from the body of the union to settle these matters with the person who arranged the outrages?—They had no written authority.

6276. They had an implied authority?—Yes.

6277. When was the money generally paid?—Sometimes there would be some paid before, and some of the money would be received after. My place was to book the money as it was paid, not to pay it.

6278. Supposing a man undertook a job and was interrupted, and the job did not come off; had you any power to withhold payment?—Yes.

6279. Have you ever done so?—I do not remember an instance.

6280. You booked the money, you say?—Yes.

6281. I need not say that this money was paid out of the funds of the union?—Yes.

6282. And the books would not balance unless that sum appeared on the disbursement side opposite the receipt side?—No, it would not.

6283. Was it always entered?—I think it was entered in nearly every case.

6284. You had auditors?—Yes.

6285. And the form of auditing the accounts was gone through?—Yes.

6286. How was this money generally entered?—Sometimes there would be no entry made, but the same total would be put down in the money column, and the place where it should be stated what it was for would be left a blank. At other times it would be left out. There would be a private account kept for possibly three months, and at the end of the quarter before the auditor came the expenditure would be entered altogether and put down as "certain expenses," the auditor full well understanding what was meant.

6287. The books at your meetings were, I suppose, on the table, or at some other place, for inspection by any member of the society?—Yes, they were always on the table when business was going on.

6288. Were they ever inspected?—I do not remember a single instance of a private member inspecting the books.

6289. It follows that you never remember any comment being made upon the way in which the money had been spent?—I have heard some complaints that the money was being improperly spent, and that it would be better not to spend it, but they are very few indeed.

6290. What took place upon the complaint being made?—It made no difference, being such a small minority did not alter the carrying out of the wishes of the majority.

6291. You think the complainants were a very small minority?—Yes.

6292. Do you think that the complainants knew in what way the money had been spent?—Yes, they had a general knowledge.

6293. And the majority who acquiesced also had a general knowledge?—Yes, I should suppose they had.

6294. Did the complainants ever mention at the meetings the mode in which this money had been spent?—No further than in a general way by saying that such work did no good.

6295. That would be after that particular damage had taken place?—Yes, it would be after.

6296. Was nothing more definite talked of? Did they never mention anything, such as damaging bricks, or hamstringing horses, or beating men?—No, not in the general meeting. Those matters were too private to be talked of at the general meetings.

6297. They were understood but not expressed?—Yes.

6298. Was any disapproval expressed at the time?—By some few.

6299. Then I suppose I may take it that it was known to all the society that the money was paid for these purposes?—Yes, known in a general way to all that money was paid.

6300. And with what object it was paid?—Yes.

6301. These payments that you have spoken of during your period of office were generally made in your presence?—Yes.

6302. Can you tell us who made them?—Harrison really paid the money, but it was in my presence and with my consent.

6303. Harrison was present with you?—He was. Sometimes he was president and sometimes treasurer.

6304. During the time that you were in office were there generally more than one of these jobs on at the same time?—I scarcely know how to answer, because there were always some five or six that wanted a job of that sort, but I cannot really say whether there would be two or three on at a time. I should say probably not.

6305. What I mean is, were there two or three disputes at a time requiring this particular mode of settlement?—Yes, often.

6306. Usually?—Yes, I believe it was that way during the greater part of the time that I held office, and is so even now.

6307. (*Chairman.*) The masters are so stupid?—Yes.

6308. (*Mr. Barstow.*) We have heard of the destruction of bricks at Messrs. Clifford's; were you in office at that time?—It is very likely I should be in office then.

6309. It was in coming from Clifford's yard that the police-constable Jump was shot?—Do you refer to that particular time?

6310. No, we have had two accounts in 1860 of malicious damage; do you remember anything of them?—Yes.

6311. They were settled in the way you spoke of during the period you were in office?—I cannot say distinctly that I was in office, but I believe I was in office.

6312. Do you remember paying money for them?—I do not remember paying it, but I know it would be paid.

6313. You do not distinctly remember?—I do not distinctly remember paying, but still it would be paid.

6314. Do you remember paying money at all for malicious damage committed at Messrs. Clifford's?—I do not remember paying it, but still I would not swear I did not pay it because I cannot remember.

6315. You do not know whether you were present when the money was paid, or who paid the money?—There were so many jobs that I cannot remember which I paid for and which I did not.

6316. That is your only reason for saying that? There are so many in your mind that you cannot separate them and say distinctly which you paid for?—Yes, that is the only reason.

6317. Of course you remember the malicious damage at Clifford's on June 28th, 1862?—Very well.

6318. Did you pay any money for it?—No, we did not get a chance of paying any for that, unless paying for their defence is regarded as a payment.

6319. You did not get a chance?—No.

6320. Have you settled with Ensor?—No.

6321. Have you agreed for any price with Ensor?—I cannot remember agreeing for any price for it, but undoubtedly there would be an agreement made with him.

6322. Have you any doubt that you did make some agreement with Ensor in reference to that job?—With reference to spoiling the bricks I have no doubt an agreement would be entered into with him.

6323. You do not remember the time?—No.

6324. As a matter of fact, the money was never paid?—No.

6325. You paid for the defence of the men who were charged with the murder of Jump?—Yes.

6326. Did not they have some money?—Yes.

6327. How much?—Over 200*l.*

6328. How does that appear in your books?—It does not appear in the books at all.

6329. It was taken from the funds of the union and spent without appearing in the books at all?—From the funds of that and other unions that had subscribed.

6330. That and other unions?—Yes.

6331. Do you remember what other unions?—Yes, I remember a few; the various unions round about Manchester, Oldham, Stockport, and Wigan.

6332. (*Chairman.*) Liverpool?—Yes.

6333. Sheffield?—Yes.

6334. St. Helens?—Yes.

6335. (*Mr. Barstow.*) Preston?—No.

6336. (*Chairman.*) Birkenhead?—Yes.

6337. (*Mr. Barstow.*) Bolton?—No.

6338. (*Chairman.*) Did all these unions subscribe for the defence of the men who murdered Jump?—For the defence of the prisoners generally.

6339. To defend Ward, who was executed—the Michael Ward who was sentenced for that murder?—Yes, and the others too.

6340. They subscribed to defend the men who committed that murder?—Yes.

6341. (*Mr. Barstow.*) What proportion of this sum came out of your union?—I cannot give the proportion, perhaps 100*l.* or more.

FIFTH DAY.

Mr. J. Barlow.

9 Sept. 1867.

6342. About half?—No, our union did not subscribe half the expenses.

6343. (*Chairman.*) Have you nothing to show what money you received from each of those unions?—I had up to two years since a private balance sheet, kept by myself, of the private expenditure connected with the defence; that balance sheet was destroyed two years ago.

6344. Why?—I kept it in my possession as long as I thought there would be any charges made against the funds of the society, then I destroyed it, thinking it would be of no use.

6345. Did you send round to get general subscriptions from those unions for the defence?—I sometimes sent, and sometimes went.

6346. You went yourself?—Yes.

6347. Where did you go to?—To Stockport.

6348. To get a subscription for this defence?—Yes.

6349. What did they give you?—At the time I went we received 10*l.*

6350. What other union did you go to to get money for this defence?—No other.

6351. Did you send delegates for the purpose?—Sometimes I wrote, but as we met together sometimes in Manchester, having a sort of amalgamation at that time, it was principally done through the amalgamated meeting.

6352. There was an amalgamated meeting of what unions?—Of the unions you have just named.

6353. All of them?—Yes, I think all.

6354. You have mentioned eight unions?—Yes.

6355. Do I understand you that when it was known that the prisoners were charged with murder and were going to be prosecuted at the assizes, delegates were sent from each of the unions, and that they met together to get up a subscription for the defence?—No, the union was formed for the general good of all the societies.

6356. What union?—The amalgamated union.

6357. Is there an amalgamated union at this moment?—No.

6358. Was the amalgamated union formed in consequence of Jump's murder?—Long before.

6359. Had you this amalgamated union meeting to concert measures and to obtain money for the defence of these men charged with murder?—It did not meet for that object. It came about this way: each society paid its money quarterly to the amalgamated fund, and at one of these quarterly meetings it was mooted, I believe, that subscriptions were required for the Ashton case, and it caused each society to be asked to lend some help.

6360. Are you quite sure that each of these unions you have mentioned did subscribe for that defence?—They all subscribed.

6361. It was decided at a general meeting of the whole body how much they should subscribe to this defence?—It was left to each of the bodies what they should do; they could either give anything or nothing.

6362. You say that they did send something?—Yes.

6363. If there was this meeting at which all were represented, how came you to go to Stockport?—Because it was a second appeal that we were making.

6364. Was a second appeal made to any others besides Stockport?—I believe it was made to all.

6365. It first happened in your district; did your people send round delegates to make this second appeal?—Yes, I believe Thomas Harrison was sent.

6366. Where was he sent to?—I do not know the places, but there will be three or four, or four or five.

6367. There would be three or four, or four or five, sent to get up money for the defence?—Yes.

6368. It being a matter in which you considered all the unions were interested?—Yes.

6369. Who else was sent besides Harrison?—I do not remember who else, but there would be some one with him; I do not know who it was.

6370. You raised that amount of money; how was that amount paid to you?—It was sometimes sent by post to Ashton, and I think the first call was paid when the amalgamated meeting met.

6371. The murder having taken place in your district, your union was trusted with the distribution of the money for the defence?—Harrison and myself.

6372. And you received about 200*l.*?—Yes, over 200*l.*

6373. For the defence?—Yes.

6374. How long had that amalgamated union existed; you say that it does not exist now?—Perhaps 12 or 15 months.

6375. Have they subscribed on any other occasion for the defence of any other outrage or murder?—No.

6376. Never?—Not to my knowledge.

6377. Have they subscribed to defend any other outrage?—Not for ourselves.

6378. Was there an amalgamated fund for the purpose of committing these outrages?—No.

6379. Each of you paid for your own outrage in your own district?—Yes.

6380. It was only on the occasion of this special murder that you got up this fund from the different unions?—Yes.

6381. (*Mr. Barstow.*) Was that money paid by the officers of these unions out of the funds of the unions, or was it made up by individual subscriptions?—I do not know how the various societies raised it; all I know is the sum total came to us, but I do not know whether they paid it out of the funds or by individual subscription.

6382. Through whose hands did the money come to you?—Through their officers or through men whom they appointed.

6383. The officers of the body, is that so?—It would come through men they appointed; sometimes they sent money by two men specially appointed to bring it in cases like those.

6384. Do you remember some of these cases which we have heard of to-day? You just mentioned Clifford's?—Yes.

6385. Do you remember Shipley's case, where the horse was hurt?—Yes.

6386. Was that spoken of at a meeting in the way you described?—I never heard it mentioned as far as I recollect now.

6387. It was not mentioned at the general meeting as a job which wanted doing?—No.

6388. You believe it happened?—I do not know.

6389. Did you speak to Ensor or any other person?—I cannot remember speaking to Ensor, or any one else, about Shipley's affair.

6390. Did you pay money?—No.

6391. Did you hear about it?—Yes, certainly.

6392. Do you know enough about it to be able to say whether Shipley's was a union affair or not?—He was a non-union master.

6393. Before the outrage was committed had you heard Shipley's name mentioned in the meeting as a non-union master?—It would be mentioned common enough, but I cannot remember especially at present.

6394. If it was common enough, did you hear it commonly enough?—I cannot remember.

6395. Do you know a man named Taylor?—Yes.

6396. Do you remember some malicious damage being done to his property?—Yes.

6397. Was that a union affair?—Yes; I believe Ensor would be paid for that outrage.

6398. What had Taylor done?—I do not know.

6399. You do not know whether he employed non-union men or not?—I think it would be about the time of our general strike, when they had a bother with him, and probably it would be through him not paying the union price.

6400. What was done to his property?—I believe he had a shed burnt down.

6401. Do you know whether money was paid from the union funds for that?—Money would be paid from the union funds for that.

6402. Do you know who paid that money?—I cannot remember whether I paid it myself, but it

would be paid to Ensor; I believe I was in office at the time.

6403. How long ago was this?—I should think six or seven years since, but I cannot say how long.

6404. You do not know whether you paid the money yourself or not?—I cannot remember paying it.

6405. How do you know that money was paid to Ensor if you do not know whether it was paid or not?—It might have been paid by others in the same office as me, or I might have paid it myself. I could not swear that I did not pay it; that is the reason I do not say. I do not like saying that I paid it without I know I did.

6406. Do you remember Joseph Barlow's case?—Yes.

6407. Was that done by Ensor?—There were two cases in reference to him.

6408. Do you know anything about Joseph Barlow's case?—The first case I believe was paid by the Ashton union.

6409. Do you remember what was done to him?—I believe he had nails put in his clay, according to report.

6410. Do you know what time it was that he had nails put in his clay?—I should think the spring time.

6411. What year was it in?—I forget the year, perhaps it might be in the winter; it would be either winter or spring, but I do not know what year.

6412. About what time?—It might range from January to the end of March.

6413. But about what year; was it 1860, 1861, or 1862?—I do not know what year it was in.

6414. Was it in some year between 1860 and 1863?—I do not think it would be so late on.

6415. Then it would be before you were secretary of this union?—It would be, I dare say; I was forgetting the time.

6416. Do you remember the cause of dispute between Barlow and the union?—Yes; he had non-union men working for him.

6417. Was that at the time of the strike?—Yes, while the strike was going on.

6418. There was another outrage committed against him on the 8th of January 1861; do you know anything of that?—I know that it was done.

6419. Do you know the cause of it?—No, unless it was for the same cause as the other.

6420. Do you know who did it?—I do not know who did it. I know that it was not paid for by our society.

6421. Do you know whether it was a union outrage or not?—I should think it was a union outrage.

6422. What did you hear was done?—I heard he had bottles thrown at his window.

6423. Can you tell us whether he had any dispute with any other union at that time?—He had a dispute of long standing with the Manchester union.

6424. And you know that this dispute was not paid for by the Ashton union?—It was not paid for.

6425. You have no reason to believe that the damage was done by the Ashton men?—I have no reason to believe it at all.

6426. Do you know a man named Kirk?—Yes.

6427. Do you remember something being done to him?—Yes.

6428. What was that?—I think he had bottles thrown at his window; I may be wrong, but I think it was that.

6429. Was that a union outrage?—Yes, undoubtedly it would be a union outrage.

6430. Of the Ashton union?—Yes.

6431. What was his dispute with the union?—It would be the same as Taylor, I believe, of paying a lower price.

6432. Was that paid for by the Ashton union?—Yes, undoubtedly it would be paid for by the union.

6433. Did you yourself pay it?—I feel rather uncertain. I missed paying for some cases during the three years, and I cannot say which cases I missed paying for; that is the reason I hesitate giving the answer; there were others held office during the three years, and all the cases did not happen in my term of office.

6434. Then all the cases that did happen in your term of office you paid for?—I saw some paid.

6435. Did you know who it was that did this at Kirk's?—No.

6436. You do not know whether it was Ensor or not?—It would probably be Ensor, because while I was in office we paid no money to any one else.

6437. Do you know a man named Hobson?—Yes.

6438. What was done to him?—I do not remember what was done to him.

6439. Do you remember the cause?—It would be paying less wages.

6440. You do not know what was done to him?—Just at this moment I cannot recollect.

6441. Do you remember a sum of money being paid for something that was done to him?—No, I cannot remember it, but it would be paid if it was done.

6442. I do not say that you paid it yourself, but do you remember the fact that a sum of money was paid to anyone for doing Hobson's job?—No, I do not remember it, still it may be so whether I remember it or not.

6443. Did you pay money in Tetlow's case?—I should pay it in a great many cases, but I cannot remember any particulars.

6444. As far as you have gone you have not told us of a single one in which you paid money, surely you remember one case in which you paid money?—I would tell you if I could, for since I have told so much it would be foolishness not to tell all.

6445. You say that you know of a great many outrages. You were in office 24 months out of 36, and you do not give us a single case which you remember clearly having paid for?—No, it is simply because I cannot remember; there are cases that you will mention that I can remember.

6446. What do you remember paying for?—I remember the Newton Wood.

6447. You remember Butterfield's case?—Yes, I remember his affair.

6448. Was that an Ashton union case?—So far as I am concerned I believe it was not. I was in office at the time; I know that no money was paid.

6449. Then you can say no money was paid in that case by the Ashton union?—Yes, distinctly.

6450. Now as to the case at Newton Wood?—I do not know the name; I knew it by the name of the Newton Wood case.

6451. You do not know the name of the man who owned the works there?—I thought it was a co-operative affair.

6452. What do you know about that?—I know that Ensor received money from Harrison in my presence for that.

6453. How much money did he receive?—It would probably be 14*l.* or 15*l.*

6454. That is a large sum; what had he done?—I I do not know.

6455. You have forgotten?—It would be damaging bricks I think.

6456. Do you know the cause?—No, there had been a dispute, but I forgot now, but it was over. I believe it was not over the prices in the first instance; it was some other dispute.

6467. I suppose there were some bricks making for the purpose of building a cotton mill?—Yes.

6458. There was some dispute between the master brickmakers and your union?—There was a dispute between him and one or two of his men for some terms that they could not agree upon; they were members of our union.

6459. It was a dispute with some of the members of your union working for him on terms that were not satisfactory to the union?—Or to themselves.

6460. I think I ought to ask you this question in justice to yourself, what age were you when you began to be secretary to the union?—17.

6461. Are you only 25 now?—Yes, 25, perhaps I had begun in 1859.

6462. How old were you the last time you were secretary?—Between 20 and 21.

FIFTH DAY.

Mr. J. Barlow.

9 Sept. 1867.

6463. Have you any books or papers or anything connected with the union in your possession?—Not one.

6464. Have you ever seen them since you were secretary at the age of 21?—Yes.

6465. You have seen them since?—Yes, at various times.

6466. When did you last see them?—I saw them last on Saturday night, what books there are.

6467. How came you to see them then?—I had to go on business, paying some contribution for my father and some for myself, the books were lying on the table and I saw them, I did not get hold of one.

6468. You knew the outside of the books; were those the books which you had when you were secretary?—The books I had are destroyed.

6469. How do you know that?—I did not know until the inquiry; a few months ago I was asked by an officer whether they were destroyed.

6470. Do you remember the name?—Sergeant Harrop. I told him that I was not confident, but I thought they were not destroyed; a few days afterwards I made inquiries of the man who had been officer with me at the time, and I found they had been destroyed immediately before or immediately after Jump's affair.

6471. Who was the man who told you that?—I asked Harrison and he told me.

6472. You did not yourself destroy them?—I could not remember destroying them myself, but I might have destroyed one or two, but I do not remember it. I do not think that I destroyed one.

6473. Surely a thing of that sort you must remember?—Do you wish me to state distinctly? I will say I never did destroy one except it was a piece of waste paper.

6474. I only want a distinct answer one way or the other?—That is one.

6475. Did you ever hear who did destroy them?—They were destroyed probably on the auditing day by some of the persons present, but who destroyed them I do not know.

6476. You do not know who destroyed them?—No.

6477. At any rate you have never seen them since that time?—No.

6478. You were in office three years after this?—Yes, but I never saw the books I had used before. I never saw them during my second term of office.

6479. Then I suppose they have got no books?—With the exception of that one, the contribution book; I saw that and that is all.

6480. Had they no books in your second term of office?—Yes, some of the books were new in my second term of office.

6481. Did you inquire for the old books?—No, not then. I did not inquire for the old ones.

6482. How came that about?—I never thought of the old books when in office. I did not want to go in office. I had given it up as I thought, but they would make me go in whether or not.

6483. You missed the books you had before. Did that excite any curiosity in you?—I cannot remember noticing missing the books at all.

6484. You tell us you did miss them; you answered me that you had new books in the second term of office?—Some were new, but the contribution book was the old one.

6485. Payments of this sort would not be entered in the contribution book?—The expenditure book I believe was the same book, but all the leaves were torn out previous to the time of Jump's affair. All the old leaves were torn out.

6486. Then that book was not destroyed?—No, the missing part was not destroyed.

6487. Is that book in existence yet?—I believe that book is in existence now.

6488. You used to keep a minute book, I suppose?—Yes.

6489. Did you see that book in your second term of office?—I forget whether it was that or whether it was a new one, but there is a minute book which has been produced here: I think it has come. I forget whether I entered the minutes in my old term of office in that book or in the new one, but the minutes are down in the book.

6490. You do not know whether the minute book which will be produced here has entries of your first term of office, or of your second term of office only? I mean of course the time you were in office before this affair of the 28th of June 1862, or the time that you tell us you were in office after that?—I believe it will have minutes in for the whole term of office when it comes to be looked at.

6491. Then the minute book has not been destroyed?—No, if it is found to have the old minutes in it cannot have been destroyed.

6492. You told us that the books have been destroyed?—There was more than one minute book. When I first took office I entered the minutes very irregularly in the small book, those smaller books I have not seen since, but it is possible that some of the minutes may be entered in the large minute book which is to be produced here.

6493. Are those original entries made at the time?—Yes.

6494. Original entries, and not copies or assumed copies?—No.

6495. Then that book, according to your account, does not contain an entry of all the minutes of your proceedings?—It would contain an entry of all the meetings after the book was bought, and the old book would be in use no longer.

6496. The book will show when it was bought?—Yes.

6497. The date of the first entry will show that?—Yes, the dates will show when it was bought.

6498. (*Chairman.*) Are you a member of the union now?—Yes, my position compels me to be one, or else I should be in opposition to the union.

6499. Then you are a member of the Ashton union now?—Yes.

6500. The same union?—Yes.

6501. Have you continued to be a member ever since you were first a member?—Yes.

6502. Do you attend all the meetings now?—Very seldom indeed.

6503. You do sometimes?—Yes.

6504. Where are the meetings held?—At the "Rover's Arms" in Ashton.

6505. Every week?—The meetings for payment are held every fortnight, and there is a meeting for business held quarterly, and oftener when required.

6506. Is there a council or committee besides the general body?—No.

6507. Who is treasurer now?—I believe his name is John Piercey. He is a very old man.

6508. Who is secretary now?—I think they have none just at present.

6509. They had one a few weeks ago?—The one they had before the quarter was up his latter name was Smith.

6510. But you do not know his Christian name?—No.

6511. Who is president now?—James Bateman.

6512. They have the box and the books?—Yes.

6513. Where is the box kept?—At the "Rover's Arms."

6514. Is it an iron box?—There is a box, an iron safe, and a wooden box.

6515. Separately?—Yes.

6516. What does the iron safe contain?—The money.

6517. And any books?—No, no books; just a few tickets.

6518. The wooden box contains the books?—Yes.

6519. Have you a minute book of the meetings?—I cannot tell properly what they have now, it is so long since I was in office.

6520. It was their business to have the minute book?—Yes, at every general meeting.

6521. At which the entries ought to be made?—Yes.

6522. And also a cash-book?—Yes.

6523. And a contribution book?—Yes.

6524. Ought those books to be in the box at this moment, or are they destroyed?—They are brought here.

6525. You have not known of any books being destroyed since those you have mentioned?—Yes, there has been a part of one destroyed.

6526. When was that?—Some few months ago.

6527. What was that book?—It contained an entry of money for what I do not know, not being in office, but this entry was considered unfit to come here, and the leaves were torn out.

6528. This entry was unfit to come here—that was after they knew that some inquiry was coming on here, so they tore the leaves out?—Yes.

6529. Do you know the amount?—I forget the amount; it would be over 20*l.*

6530. In a lump sum?—Yes.

6531. Was it put down so as to show what it was for, or merely as incidental expenses or something of that sort?—It would be incidental expenses no doubt.

6532. Sometimes you put down money for "a dinner" or "a party of pleasure"?—I never put down like that.

6533. It is always for incidental expenses?—Some term of that sort.

6534. Give us a notion of what the usual term is—"a dinner"?—No.

6535. What is the sort of entry besides incidental expenses?—I never made any fancy entries which I have heard about of late.

6536. An "evening party"?—No, never.

6537. And the book was destroyed because it was not fit to bring here?—Yes.

6538. There were a good many leaves then torn out?—Yes, I think it necessarily caused a great many to be torn, because it would throw the book into confusion.

6539. To whom was entrusted the care of tearing out the leaves?—There would be a number of us together.

6540. You were one?—Yes, I was one there when they were torn, but I did not see who tore them, but I know they were torn.

6541. You heard the tear?—Yes, I heard the tear, but I did not care to know who tore them, and I did not look.

6542. And you heard the reasons given?—Yes, I knew them well.

6543. You can tell me a few more of the entries that were not fit to come here?—There was only one in the book.

6544. You tore out more leaves than one?—Yes, for the good of the body; for the satisfaction of the body there were a great many things that would have to be re-entered again.

6545. It was for the satisfaction of the body that the other leaves were torn out?—I suppose it was for the satisfaction of the members concerned.

6546. You have made the book very fit to come here?—I cannot say; it did not matter to me how it was done. My mind was made up.

6547. How many were present when the leaves were torn out?—The late secretary Smith was present.

6548. Who else?—Harrison was present, and I think Frith was present.

6549. Is Harrison in office now?—No, he has gone out of the society.

6550. Harrison and Frith, and who else?—Harrison, Smith, Frith, and myself.

6551. Was there a fire in the room?—No, I do not know that there was.

6552. After you had torn the leaves out where did you take them?—I believe they were burnt in an empty stove.

6553. Who took them to burn?—I do not know who might have taken them.

6554. You trusted to a man of discretion to burn them?—Yes, I dare say any of them would be fit for the job.

6555. Was it Joseph Frith?—Yes.

6556. Where does he live?—He lives in Hollingsworth.

6557. Does he live there now?—Yes.

6558. You do not know which of them took them out; can you give me any idea of how many leaves were torn out?—No.

6559. Half a dozen?—I think there would be more.

6560. The book was made, in the judgment of you all, quite fit to come here?—I did not look the book over after they were torn out.

6561. But you trusted to somebody's discretion; whose discretion did you leave it to see that they were torn out?—Mr. Smith, the secretary.

6562. He did it?—He would look it over no doubt.

6563. Was there any other book in which tears were made?—No.

6564. Was any other book taken away altogether?—No.

6565. That was the only book out of which leaves were torn?—The only book to my knowledge; I do not know of any other; there was no other book at any meeting that I attended.

6566. Not at that particular meeting?—No.

6567. Have you heard of any other book being made fit to come here?—No, I have heard of no meddling with the books since.

6568. Nor before?—Nor before.

6569. That is all you mean to tell us; you have heard about these books being treated in this way?—Yes.

6570. You think that at this moment in that box there are all these books, including this one which has been made fit?—I do not know whether that book will appear, or a fresh book will appear in its place.

6571. What became of this book; who took it after it was made fit?—It was left in the box.

6572. What makes you expect it will not come, and that another book will come in its place?—Because, last Saturday, when I was there I saw on the table a new cash-book; that is my reason for thinking there has been a new book.

6573. You did not see your old book last Saturday?—No, I was in the room a very few minutes.

6574. Did you not hear that it had to be taken away?—No.

6575. Have you any doubt whether it is there or not?—I do not think that it is there.

6576. What makes you think it has been taken away after the leaves were torn out; was it in consequence of these entries that you determined to make away with it altogether?—The book was nearly done.

6577. Is it completely done for now?—No, it was not completely done for, nor could I say it had been taken away; my impression was it had been taken away.

6578. You would naturally have seen if there was a new book in its place. Can you give us a reason why after the leaves had been torn out, the book should be taken away?—I should think it would be to prevent your seeing that the book had been tampered with.

6579. That is the only book that you imagine has been tampered with?—Yes.

6580. (*Mr. Chance.*) You told us that there was an amalgamation of the various unions who contributed to the defence of Ward and others in Jump's case?—Yes.

6581. And that the amalgamated society held their meetings quarterly?—Yes.

6582. And you also stated that at one of the quarterly meetings it was suggested that money should be subscribed for the defence?—Yes; I believe I was present.

6583. You represented the Ashton union?—The Ashton society.

6584. Can you tell me what unions they were that were represented there?—All the eight that I have mentioned to the examiners.

6585. Were those eight that you mentioned the whole that formed the amalgamated society?—Yes.

6586. I suppose you know the other persons by

FIFTH DAY. *Mr. J. Barlow.* 9 Sept. 1867.

whom the other societies were represented?—I do not at present.

6587. Can you think of some of them?—I cannot think of them for this reason, that every three months fresh members were sent who were complete strangers, and though I remembered their names for the time being I cannot think of them now.

6588. Can you tell us the names of any of those persons that represented the different unions?—No.

6589. Not by endeavouring to recall them to your recollection? Take the Stockport union, do you remember who represented the Stockport union then?—Brown represented it at various meetings.

6590. Did he represent it then?—Most probably he would be there, but I cannot say, because they kept changing.

6591. Who represented the Oldham union?—A person named Acford represented it very often.

6592. Was he at that meeting?—I cannot say.

6593. Is it your belief that he was?—No, I cannot say what is my belief there; I should not like to say that he was.

6594. I ask you only as far as you can remember; can you tell us who represented Wigan?—A man named Sinai did represent Wigan at various times.

6595. I ask you as to the particular meeting at which that suggestion was made, can you tell us who represented Wigan on that occasion?—No.

6596. Can you say who represented Liverpool?—No, not upon that occasion.

6597. Sheffield?—No, I cannot recollect who represented Sheffield.

6598. Manchester?—No, I cannot.

6599. St. Helen's?—I cannot remember one of them.

6600. Nor Bolton?—I cannot, upon that particular occasion.

6601. After that suggestion was made I suppose a correspondence took place between you and some of the officers who represent these unions?—Each of the delegates went home to his different society, and they had the case brought before each of their societies, and the result was that the money came either by delegates specially appointed or by post-office orders.

6602. The money came to you by post-office order or by delegates specially appointed?—Yes.

6603. Can you say who were the delegates?—I cannot.

6604. Surely you can tell us some of the names?—If I could I would.

6605. You were in office at the time?—Yes, I held office both in our society and in the amalgamated society at that time.

6606. That being so, the delegates, I suppose, came to you?—No, they did not come to me; I forget how they came. They would probably come to the weekly meeting, one of the pay meetings of the society.

6607. Of which you were secretary?—Yes.

6608. Therefore you were secretary when the delegates came?—Yes.

6609. Cannot you tell us the names of the delegates who came to those meetings for the purpose of paying the money?—No.

6610. Not in any one case?—Not in any one case at present; I cannot remember.

6611. You said that some of the money was paid by post-office order?—Yes.

6612. Those post-office orders would be made payable to yourself?—To Harrison, I believe.

6613. Those post-office orders would be signed by some persons on the part of the union whom they represented?—Yes.

6614. Have you the post-office orders?—They are not in my possession. I cannot say whether anybody has them or not.

6615. Did they come to Harrison?—The post-office orders would come to Harrison, or probably they would come to the club.

6616. Do you remember any of the names of those persons by whom those post-office orders were sent?—No.

6617. None of them?—No, I do not.

6618. Do I understand that you cannot give us a single name of any of the delegates or of any member of any of those unions by whom the money was sent?—At the present moment I cannot give you the names.

6619. You say upwards of 200*l.* was spent in defending these men for Jump's murder?—Yes.

6620. And a great portion was paid by these various unions?—Yes.

6621. Was all this money paid to Mr. Roberts?—Yes.

6622. (*Mr. Barstow.*) I have one question to ask which I ought to have asked before. When you were in office after the 28th of June 1862, did you pay any money for malicious damage or outrage?—No.

6623. Nothing then took place?—I determined never to do anything of the kind again when I had anything to do with the society.

6624. Are you aware whether any union outrages were committed by members of your union during the second period that you were in office?—There was not.

6625. None were committed?—Not during the period that I was in office.

6626. You swear none were committed during that period?—I can swear I never paid for any if they were committed.

6627. You swear you knew of none?—Yes.

6628. And you would probably have known if they were committed?—Yes.

6629. You can swear that you paid for none?—I can swear that I never paid for any.

The witness withdrew.

Adjourned to Wednesday next at 11 o'clock.

SIXTH DAY.

Assize Courts, Manchester, Wednesday, 11th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C. | GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq. | JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

SIXTH DAY. 11 Sept. 1867.

(*Mr. Pickering.*) I wish to ask publicly, before the proceedings begin to-day, whether anybody is present, according to the notice which we gave on Monday, with the keys of the box, and is ready to open it.

No person answered.

THOMAS HARRISON sworn and examined.

6630. (*Chairman.*) Let me warn you before you give evidence that if you choose to make a true and full disclosure of all matters connected with this inquiry about which you may be examined you will be entitled to have from us, and you certainly will have, free and full indemnity, so that you will never be liable at all to any punishment whatever for any outrage or crime which you may have committed about any of these matters. But remember that you are only entitled to that indemnity, and you will only have it, on the express condition of your telling everything, and of your making a full and true disclosure; and remember also that you are upon your oath, and that you are bound to speak the truth. What are you?—A carter at present.

6631. Are you now a member of the Ashton trade union?—No.

6632. You were?—Yes.

6633. How long ago is it since you first became a member; was it in 1859 or 1857, or before that?—I have been a member, I dare say, about 15 years.

6634. When did you cease to become a member?—About two and a half years ago.

6635. Then for 15 years before that time you were all that time a member of the Ashton trade union?—Yes.

6636. That is the brickmakers' union?—Yes.

6637. And did you attend their meetings generally pretty regularly?—Pretty regularly.

6638. We have heard all about those meetings and their usual time of meeting. You served offices in the union, did you not?—Yes.

6639. You were president some time, were you not?—Yes.

6640. Were you secretary?—No.

6641. You were never secretary?—No.

6642. Were you treasurer?—Sometimes.

6643. Do you remember the year in which you were first president?—No.

6644. How long had you been a member before you became president?—Perhaps eight or nine years.

6645. Had you been treasurer before you were president?—No.

6646. You are quite sure that it was after you had been president that you became treasurer?—Yes; I am not quite sure but that is so, if I mistake not.

6647. You had constant meetings about what was to be done for the purpose of the union, had you not? It was always discussed at the meeting as to what was to be done for the purposes of the union?—Yes.

6648. And was it generally left to the president to see it carried into execution?—Well, sometimes it was left to the secretary and the president.

6649. Did you settle at the meetings the amount of money which was to be paid for each job?—No.

6650. To whom was that left?—It was left to them to agree themselves.

6651. To the president and the secretary?—To the president and the secretary.

6652. They agreed how much was to be given?—Well, I do not understand how you mean.

6653. If there was anything to be done such as a man's bricks to be destroyed, or anything else, who decided how much money was to be given for the job?—Mostly those that took the job had the arrangement of that,

6654. Then did you entrust somebody to see the job carried out?—Yes.

6655. Did you trust to them to fix the amount which was to be given for it?—Yes.

6656. Then you settled the person who was to carry out the job, and he was to settle the amount to be given for it?—Yes.

6657. And I suppose he settled the number of hands to be employed in it?—Yes, we had nothing to do with that.

6658. After the job was done did the president generally pay, or the treasurer?—The president and the secretary very often paid.

6659. Were you president in the year 1860?—Well, I might be. I cannot say. I might be president. I do not say that I was not, but I will not be confident that I was.

6660. How many times were you president do you think in the whole of the 15 years?—Well, I cannot answer that correctly.

6661. Do you think that it was as much as a dozen times?—Well I should say that I should be.

6662. The president we understand was elected for three months?—Yes, for three months at a time.

6663. And after he had been president for three months was it possible to re-elect him for the next three months, or did you always change the man?—Well, he would sometimes be re-elected, and sometimes he would not stand.

6664. Did you continue to be president for a period longer than three months by being re-elected?—Well, I believe I have once or twice, but that will be almost the extent.

6665. Were you president, do you think, for the whole of the year 1860?—No, not for the whole of the year.

6666. For the greater part of it?—Six months of it perhaps.

6667. Do you know who is the secretary of the union now?—No, I do not.

6668. Was there a man named Bridgewood secretary in your time?—Yes.

6669. Do you remember when that was?—Well, since I left it I have not taken any interest in the matter whatsoever. I cannot tell the time.

6670. Was Bridgewood secretary while you were in the union?—I sat with him I believe for some three months.

6671. When you say that you sat with him, do you mean that you sat with him as president, he being secretary?—Yes.

6672. I believe that John Barlow was secretary for a long time when you were president?—Yes.

6673. I suppose that while you were president you paid very often for jobs of the sort we have referred to, did you not?—Yes.

6674. What is the most that you think you ever paid?—Well, the most I ever paid I should say would be from 15*l.* up to 20*l.*, or perhaps rather more.

6675. That is for one job?—For one job 15*l.* is the most I have ever had anything to do with, for paying.

6676. You said it was sometimes more than 20*l.*?—Yes, but that was for more jobs.

6677. I suppose it was a very great job for which you paid more than 20*l.*?—It was more than one; 15*l.* is the highest that I have paid for one job.

6678. What is the job for which you paid as much as 15*l.*?—Well, I believe we paid 15*l.*, if I mistake not, for that at Newton Wood.

6679. Was that Simpson's house? Whose property was it?—I cannot say whose property it was.

6680. What was done there; was a man shot at?—No.

6681. Was it not Simpson's case?—I do not know what it was.

6682. To whom did you pay that money?—To John Ensor.

6683. Then it was left to John Ensor to carry it out, I suppose?—Yes.

6684. And it was to be divided amongst all those who did it?—He had his own arrangements; we had nothing at all to do with that.

6685. Now let us begin with 1860. Do you remember a job at Mr. Clifford's?—Yes.

6686. That was in 1860. Was that a case of destroying his bricks?—Yes.

6687. Did you pay for that job?—Yes, I believe I did, I and Barlow.

6688. Whom did you pay; did you pay Ensor?—No.

6689. Whom did you pay for that job?—Well, the note that I received was from James Kay, that he had

SIXTH DAY.
T. Harrison.
11 Sept. 1867.

done the work at Stalybridge and Dukinfield, for which he received 25*l.*

6690. Then I understand you to say that James Kay was employed to do the work at Stalybridge and Dukinfield, and that you paid him 25*l.* for those two jobs ?—Yes.

6691. That was in 1860 ?—I believe it was.

6692. Were the two jobs one respecting a person of the name of Clifford, and the other respecting a person of the name of Blocksage ?—Yes.

6693. Do you know the nature of the job that was done ?—I do not know that I do.

6694. I suppose a job which required a little naphtha and gunpowder cost a little more than the mere treading out of the clay ?—They never told me anything of that sort. I had to give them the money, and it was against me to give it them.

6695. It was quite against your principles, of course ?—Of course it was.

6696. Then your principles were violated or injured in the year 1860, at the time when you gave that 25*l.* to Kay ?—It was.

6697. Kay was not a member of your union, we understand ?—No.

6698. What made you select Kay for the job ?—Well, I did not select him.

6699. But you knew that he would be the man ; you have known of his being selected very often ?—Yes, but I did not select him. I knew nothing about the work being done.

6700. But you have known of his being selected very often by your union people ?—Well, of course, I am not that simple that I shut my ears.

6701. Kay was repeatedly employed by your men, was he not ?—I do not know that he was employed any other times than those two.

6702. You paid Kay yourself, did you not ?—Well, yes, I believe I did.

6703. Did you employ him to do the job ?—No.

6704. Who did ?—I do not know.

6705. Do you remember to which of your men it was entrusted to carry out those two jobs ?—I do not know that there was anything mentioned of that sort at all.

6706. But you came to a conclusion that the job was to be done, and some of your people were instructed to carry it out ; who would be the person on this occasion who got hold of Kay to do it ; would it be Ensor ?—Ensor was not there.

6707. Who could it be then ?—I do not know ; they came to me to pay the money, but I do not know who engaged him, or how he was engaged.

6708. Of course you have no doubt that some of your people engaged him ?—Of course he must have been engaged, or he would not have done it.

6709. And because you knew of his having been engaged, and that he had done it, you paid him the 25*l.* ?—Yes ; a note came to me that there were two jobs, and this note stated to pay the bearer the sum of 25*l.*

6710. By whom was the note written ?—I do not know.

6711. Who brought it ?—James Kay himself.

6712. But surely you must have known something of the handwriting : if anybody sent you a note you would not pay Kay 25*l.* ; some of your men wrote the note, I suppose ?—I do not know at all.

6713. You knew the handwriting, did you not ?—No, I did not. I am not one that understands first one handwriting and then another. I am not much of a scholar.

6714. You must remember, I think, pretty well the person who was instructed to carry out those two jobs ?—No, I do not.

6715. It was between you and the secretary ; John Barlow was secretary then, and the secretary arranged the time and arranged the man, and then that man employed Kay, and Kay came to you with a note from that man whoever he was, and you paid the money. That was the way in which it was done, was it not ?—We were quite well aware when we saw the paper that the work was done, because the newspapers told us at once that the work was done, and that showed no doubt upon the matter. Whether Kay wrote the note himself or not I do not know, or whether he could write I do not know.

6716. But still the note you considered was an authority to you to pay the money ?—Yes.

6717. Then whose duty was it to make the entry of the payment in the books ; the secretary's ?—Yes.

6718. And the secretary would make the entry ?—Yes.

6719. We have been told that those entries were put under different heads, and that it would not appear for what the money was paid, but that it would appear as "incidental expenses" or something of that sort, is that so ?—Yes.

6720. That is in 1860. Now, do you remember a job done at Rogers's ?—Yes ; I remember the job being done.

6721. Do you remember in what year that was ?—No.

6722. Whom did you pay for that job ?—I never paid anybody that I am aware of for that job at all.

6723. Just remember. Did you not pay Ensor for that ?—Well, I might do. If I was in office I should have had to pay him. I should have had to be present when the money was paid.

6724. It would have been your duty to have paid him ?—Yes, if I had been in office when that job was done, it would have been my duty along with the secretary to see the money paid.

6725. And did the payments vary between 5*l.* and 15*l.* ?—Yes.

6726. A good deal of money passed away from your hands, did it not, while you were president ?—Yes, it did.

6727. There were so many jobs of this sort that of course you cannot recollect them all ?—No, I cannot.

6728. Do you remember an outrage on a person of the name of Taylor ?—Yes.

6729. What was the nature of that outrage ?—Well, I happened to be delegated to him for one on behalf of those men being out, and I asked him kindly. I would rather he would consent and let us be comfortable together. He said, well, he should take his own part, and I said, "Very well, sir, I cannot help it;" and I went away about my business.

6730. Then you carried out your kindness by agreeing that some outrage should be committed ?—No.

6731. Some outrage was committed ?—Yes, but not through me.

6732. But you were president at the time ?—Perhaps I might be, but I am not confident of that. I had been delegated when I was not the president.

6733. If there was any outrage committed upon Taylor, and you were president, of course it must have been done to your knowledge ?—The payments would be to my knowledge if I were the president.

6734. And of course before you paid money you would take care to know what it was spent for ?—Well, we did not altogether know it.

6735. Not the details, but you knew the sort of thing ?—Of course.

6736. Do you remember in what year Taylor's was ?—No, I do not. I have taken no interest of that sort.

6737. You took interest sufficient to pay for it ?—Yes, of course. I did not know that ; I did not pay for it.

6738. But if you were president you paid for it ?—Yes, of course.

6739. How much would a job of that sort be worth, because you say the price varies from 5*l.* to 15*l.* ?—I cannot say, I am sure ; it may be 5*l.* or it may be 10*l.* or it may be 15*l.* I cannot say to that.

6740. Do you remember the nature of the job that was done at Taylor's ?—Of course I remember what I read, that the shed top was burnt off, and so on.

6741. And the bricks were destroyed ?—Yes.

6742. What should you say would be the ordinary

price for a job of that sort, 5*l.*, 10*l.*, or 15*l.*?—It might be 10*l.* or it might be 15*l.*

6743. Then whatever it was, if you were president, you paid for it, of course?—Of course, if I was president, I should be present when the money was paid.

6744. Any one who was president would have the same duty and would perform it as you did?—Yes, of course.

6745. In some of those jobs we understand Ensor was himself president?—Yes.

6746. Then of course he would pay himself if he undertook to get the job done?—Of course he would.

6747. Was Joseph Barlow ever president?—No.

6748. Was John Barlow ever president?—No, not that I know of.

6749. Do you remember Joseph Barlow's brickshed being fired?—Yes, I remember it being fired.

6750. Were you president then?—I am not aware that I was president at all the times, but I firmly believe that I was president once when he had some bricks spoiled.

6751. And that you paid for?—I paid for them.

6752. You paid the men that did it?—Well, I paid Ensor.

6753. You remember the job at Newton Wood; that is the one for which you paid 15*l.*?—Yes.

6754. Did you ever pay Ensor for throwing some needles among the clay?—No, I have been studying that over, and I cannot remember our giving them anything for that.

6755. As you have studied it over, you remember the thing which took place?—Yes, of course I saw that.

6756. You saw it done, did you?—No, I did not.

6757. But although you do not recollect, of course you give the same answer to that as you give to others, viz., that if you were president you would have paid for it?—Of course we should.

6758. Now you said that you were one of the delegates who went to Taylor's and endeavoured to persuade him, as you say, "kindly," to agree to your demands?—Yes.

6759. In consequence of his not yielding to you I think his sheds were set on fire, were they not?—Well, I cannot say for that.

6760. As you read it all in the papers and made inquiries before you paid the money, if you did pay, have you any doubt that his shed was set on fire?—No, I have no doubt about it at all.

6761. That was at Cockbrook?—Yes.

6762. Have you paid Hipwell, the man who has been examined here, money for outrages?—I once paid him 5*l.* He brought me a note specifying, "Please "to let the bearer receive the sum of 5*l.*, for we have "had a delegate meeting on one, or two, or three, and "the landlord wants his money," so for that reason I went down and got permission, and asked and got a ticket and gave it to him for the landlord, and received the 5*l.* and gave it to him.

6763. Was that an ordinary mode of doing it, for the landlord to lend you the money and then to be repaid?—Well, for as low as 5*l.*, he sometimes would let us have 5*l.* for a ticket, or else we used often to go to our safety box.

6764. What was the name of that landlord, was his name Barber?—I believe it was at Barber's house where I got it, but I will not be confident of that.

6765. What was the name of the public-house?—The "Globe" inn, I believe we were at then, but I am not confident whether I received it from Barber or not.

6766. Where is the "Globe" Inn?—In Ashton.

6767. Do you know a man of the name of "Big Johnny?"—Well, I know him by seeing him; I know him, nothing else.

6768. What is his real name?—I do not know; I have heard it, and I have tried to study it over, but I cannot. He always went by the name of "Big Johnny."

6769. How long was it ago?—It was the time that that affair took place, Mr. Jump's.

6770. Do you remember the night when that poor fellow Jump was murdered?—I remember the night.

6771. Immediately after the murder was committed do you remember that some persons were apprehended?—Yes.

6772. Ward who was afterwards executed, and Burke. Do you remember when Ensor was apprehended?—No, he never was.

6773. Nor Gregory?—Nor Gregory.

6774. Nor Toole?—Yes, Toole was taken up at Ashton.

6775. And Ryan?—Ryan.

6776. Immediately after they were taken upon the charge of having committed that murder, I suppose means were taken by your union to get money for the defence?—Yes.

6777. At that time was there what they call an amalgamated union?—Yes, there was an amalgamated meeting together.

6778. We have had the names given us of those unions which were amalgamated—Manchester, Liverpool, Birkenhead, St. Helens, Stockport, Oldham, and Sheffield—that is so, is it not?—Yes.

6779. Were there any more?—Not that I know of.

6780. Were those unions whose names I have mentioned brickmakers' unions, or what other unions were they?—Only brickmakers' unions.

6781. Then is there a brickmakers' union at Sheffield?—Yes.

6782. And at all those places which I have mentioned?—Yes.

6783. You say that they were amalgamated; used they to meet by delegates regularly at certain intervals? You tell me that as soon as those men were apprehended on the charge of murder, means were taken to endeavour to get money from these different unions?—Yes.

6784. I ask you whether before that time delegates were in the habit of meeting from the different unions at a certain place?—We used to meet at different places.

6785. How often did those unions send their delegates?—I think it was every six months, if I mistake not.

6786. Did your union send one delegate, or two or more?—We sent two.

6787. I suppose you have gone often?—I do not know that I have gone often, but I have gone; they change every time.

6788. Did you go as president of your union?—No, I went as a delegate.

6789. You were selected?—Yes, I was selected out of the whole body as a delegate.

6790. Who went with you at any time?—Barlow and I have gone together.

6791. Had you often been before this occasion of Jump's murder to meet those delegates?—I cannot say that I had been often; I might have been twice before.

6792. Did the other unions generally send one or two delegates?—Some sent two and some sent three, according to the number of members that they had in their union.

6793. Where did you meet?—Well, we met at Manchester.

6794. Then they all came to Manchester?—Yes.

6795. Where did you meet?—We met at the Manchester club-house.

6796. Did you meet at the brickmakers' club?—Yes.

6797. Was that at a public-house?—Yes.

6798. What was the name of it?—It was the "Crown and Cushion," I think.

6799. The delegates of all those unions, which I think are eight in number, met together at the "Crown and Cushion"?—Yes.

6800. Was that a regular thing every six months?—Every six months while it lasted.

6801. And they were all brickmakers' unions?—Yes.

6802. How long do you think it had lasted before

SIXTH DAY.
T. Harrison.
11 Sept. 1867.

this murder of Jump's?—I cannot tell you, to tell you the truth, how long it lasted.

6803. Was it several years?—I do not know whether it did get into several years or not.

6804. What time in the year did you meet?—Once in the winter and once in the summer.

6805. Did you discuss at that meeting with the delegates all the matters over the country, and the districts in which those unions were?—I do not understand you.

6806. What did you do when you met together?—When we met together we were devising plans of how to combine ourselves as one, to take from one society to the other; that is, if I wished to change from Ashton to go to Manchester or to Liverpool. We were met on getting into those things. It had not got into full working order before it broke up.

6807. But the system was that you were to meet together, and that if a job was to be done in the Sheffield district you might go there and do it, and they might come here?—I do not remember at any of those meetings that being discussed. When I was there we were always on the foundation of getting a committee like, you know, of the bodies together; I never went to one that we were doing anything but collecting and getting into one another's ways and manners, to get to one another's moneys to bring to the amalgamated fund and get it deposited, and getting members to pass from one place to the other. Nothing at all did I ever hear of those outrages being mentioned as to payments when I have been there, not to my knowledge.

6808. Then was the object that you as an Ashton man might go to St. Helens, we will say, and work there?—Yes.

6809. That the members of the different unions might work in the different unions as they pleased?—Yes, to bring a straight card with them. If I change from Ashton I take a clear card to St. Helens, and if they wanted men of course I got employment.

6810. You met regularly for the purpose of carrying out that object?—Yes, when I was there mostly.

6811. And was it proposed to carry out by union the objects of your different societies?—Yes, of course if any society came into difficulties this amalgamated fund helped them.

6812. Then if any of the members of either of the unions got into difficulties in carrying out the objects of the society you were all to help one another?—Yes, of course.

6813. By kind means if you could, and if not, as you could?—Well, I did not hear persecuting means ever get a majority of the meeting.

6814. But they were always in the minority, were they?—Well, I cannot say that they were.

6815. Was the matter discussed?—Yes.

6816. And the proper mode, I suppose, of carrying out your general objects was discussed. When you all met together, did you discuss the proper mode of effecting and carrying out your objects for the protection of your labour?—Yes, of course.

6817. And it was understood that if any of you got into difficulties the other unions were to help you?—Well, it was understood to that effect.

6818. Had you often applied for assistance?—No.

6819. Had they ever applied to you?—No, not at that time. I do not know that they had.

6820. Just think a little, had they never applied to you for help out of some of the difficulties which you say they might have got into?—They might have done, but I cannot say for that length back. I cannot say whether they applied or not. They might apply and men to be there at all at the meeting, and not knowing anything at all of it.

6821. Of course you would not, but still you might be there?—Exactly, but I say I cannot remember.

6822. Do you remember a delegate from Sheffield ever coming over and saying that he had got into a difficulty?—No, I do not.

6823. When you had got into difficulty in the carrying out of your objects for the protection of your labour, in reference to Jump's case, that was the time for action, and you went about then to get some money from those different societies, did you not?—Yes, of course we did.

6824. And that is one of the sort of difficulties which you met?—Yes.

6825. Well, then having got into this difficulty, what did you do? Were you one of the delegates who were then appointed to seek for assistance?—Yes.

6826. Was John Barlow with you?—Yes.

6827. Where did you go, what measures did you take?—Well, we went and asked them.

6828. You "went and asked them," did you call a meeting of the unions?—Yes.

6829. Did they all respond and come to your meeting?—Yes.

6830. Did the meeting take place?—The meeting took place.

6831. Where did the meeting take place?—Well, the meeting took place——

6832. At the "Crown and Cushion"?—We did not call an amalgamated meeting together, as I am informed.

6833. You got into this difficulty; what did you do upon that?—Well, we got meetings at their own societies.

6834. Then did you send round?—We both sent round and went to some of them.

6835. You sent round to all those unions?—Yes.

6836. And you went to some?—Yes.

6837. Did you both send and go, or what did you do?—Well, I went.

6838. Where did you go?—Well, I went to St. Helen's and I went to Manchester.

6839. You went to St. Helen's; who went with you?—John Barlow.

6840. Whom did you see at St. Helen's?—We saw their president and secretary.

6841. Who was the president?—I cannot tell you.

6842. You knew him, did you not?—No, I did not.

6843. What is the name of the society at St. Helen's?—The brickmakers' society.

6844. Did you see them at a general meeting, or did you see them privately?—We went and saw them privately and asked them to call a meeting, and they did so.

6845. You stated your difficulty?—Yes.

6846. And then, of course you did not attend the meeting, did you?—Yes.

6847. You did, and you then stated your complaint?—Yes.

6848. Was it a large meeting?—Well, it was middling. There are but a little few of them.

6849. Are there 100?—No, I think there are not 100. I think there are about 30 odd.

6850. You were then the spokesman, did you explain your difficulty to them?—Well, of course I did as well as I could.

6851. Then you stated fully your difficulty, and you told them that these men had been taken into custody?—Yes, we told them that those men had been taken into custody.

6852. And you had no doubt whatever at that time that those men had been concerned in it?—That we did not know.

6853. But had you the slightest doubt at that time that those men were the men concerned in it?—Well, I had slight doubts at first.

6854. But you could not have had any doubts at that time?—No, I do not know that I had.

6855. You having no doubt that Ward and Burke were the men concerned in it, stated your difficulty at the meeting?—Of course.

6856. And you asked them to assist you with money?—Yes.

6857. Did they take it into consideration and come to a resolution upon the subject?—They took it into consideration, and said they would write.

6858. They came to no resolution at the moment?—No; we told them what we had got to say, and they

said they would write to us, and we had to leave them on those conditions.

6859. After that did they write to you?—Yes.

6860. Did they do something a little better than writing; did they send you a little money?—Of course they did.

6861. How much did you get from the St. Helen's union?—Well, to tell you correctly, I do not know.

6862. Take care! Our promise of indemnity is only conditional upon your telling us the whole truth. How much did you get from the St. Helen's union?—I am telling you the truth; it is a long time since, and I have no papers or anything of that sort.

6863. But you know very well how much you got from St. Helen's, or pretty near it?—Well, I do not know, I am sure.

6864. Did you get 10*l.* or 20*l.*?—Yes, I think it is somewhere between that, it might be that perhaps.

6865. Having got that money from St. Helen's, what other place did you go to?—We went to Oldham and Stockport.

6866. Did you go to Oldham?—Yes.

6867. Did John Barlow go with you?—Yes.

6868. What union did you go to there?—To the Stockport union.

6869. At Oldham?—I am saying Oldham union.

6870. But who was the person you saw at Oldham?—We went and saw the president and secretary.

6871. Had you known them before?—Well, I do not know that I had. They changed, you know, and it was Richard Ackford in, and I went to Richard Ackford, and he was one.

6872. Was he president?—I do not know whether he was president or secretary.

6873. It does not much signify. He was one of the two?—Yes.

6874. Who was the other man that you saw?—I cannot think of his name; his name is William, I know; he is an aged man. He was in office and I went to him and they called a meeting.

6875. Did you attend that meeting?—Yes.

6876. And you explained then the difficulty you were in?—Yes.

6877. Was this after you had been to St. Helen's or before?—Well, I will not be confident whether I went to Oldham before we went to St. Helen's, or whether I went to St. Helen's before we went to Oldham; it was all at the same time.

6878. And then at the meeting you fully explained the subject, as you had done before?—Of course.

6879. Did they come to any resolution while you were there, because money was what you wanted?—Yes, money was what we wanted.

6880. Did they come to any resolution while you were there?—They both said they would send, and they gave us the sum of 10*l.* then and there at Oldham.

6881. What were they to send about afterwards?—Whether they would arrange to give us any more or not.

6882. Did they send any more afterwards?—Well, I believe they did.

6883. How much more?—Well, I am sure, to tell the truth I cannot tell you whether it was 5*l.* or 10*l.*

6884. Was it between 10*l.* and 20*l.* more?—Yes.

6885. Was it more than 20*l.*?—I think it did not reach more than 20*l.*

6886. How many people attended that meeting at Oldham?—There would be perhaps 40 or 50.

6887. You told me that they gave you 10*l.*, and my question was, how much more did they send you?—I say they sent over 5*l.* or 10*l.* more, but which I will not be sure.

6888. Who kept the money which they sent, where did you deposit it?—Well, it was deposited at our own clubhouse.

6889. In an iron box?—Yes.

6890. What was the next union that you went to?—We went to Stockport.

6891. You were on friendly terms with the Stockport union, were you not?—Of course. I do not know that we were on disfriendly terms with any of them.

6892. Stockport was nearer to you, and perhaps you saw more of them than the others?—I do not know that there was much more at that meeting than there was at the other.

6893. Did you see the president and secretary of the Stockport union?—Yes.

6894. Did they call a meeting?—Yes.

6895. And did you also attend that?—Yes.

6896. How much money did you get from the Stockport union?—I believe they sent us either 10*l.* or 15*l.*, but I will not be quite certain how much it was.

6897. What other union did you go to, Birkenhead or Liverpool?—I went to both Birkenhead and Liverpool.

6898. All those are brickmakers' unions, of course?—Yes.

6899. Did you see the president and secretary of the Birkenhead union?—Yes, they called what they call a council meeting.

6900. That consisted of a smaller number than the body, I suppose?—Yes.

6901. You stated your grievance to them, and did they pay you money?—Yes.

6902. How much did you get from them?—I think it was somewhere near the same as from Birkenhead.

6903. I am now speaking of Birkenhead?—Yes, somewhere the same as we got before.

6904. You say you went to Liverpool?—Yes.

6905. Did you see the president and secretary there?—Yes.

6906. Do you remember the name of the president?—No.

6907. Do you remember the name of the secretary?—No, I do not know anything of them; they were all strangers to me.

6908. Did they call a meeting?—Yes.

6909. And how much did you get from them?—Well, I believe Liverpool gave us somewhere above 30*l.*

6910. Did you go to Sheffield?—Yes.

6911. And John Barlow too?—Yes.

6912. Whom did you see at Sheffield?—Well, I believe his name was Stanley; I did not know the man.

6913. Was he the secretary?—Well, I did not ask what he was.

6914. Did you see the president also?—No, I did not know that we did.

6915. Do you remember in what part of Sheffield you saw him?—Yes.

6916. Where?—At the bottom of the Wicker.

6917. Did they call a meeting?—Yes, they called a kind of a meeting, at least he told us he would do so, and we came back on those terms.

6918. You did not attend a meeting there?—No.

6919. And you told them what you wanted?—Yes.

6920. How much did Sheffield send you?—I believe 10*l.* or 5*l.*, but I will not be confident how much.

6921. Then at the same time you went to all those places where the unions were?—Yes.

6922. And you got money from them all?—Yes.

6923. Although you cannot tell me exactly the amount you got from each of them, did you get as much as 300*l.* or 400*l.* altogether?—Yes, I should say we did.

6924. Your union subscribed some of that of course?—Yes.

6925. Was it about 400*l.*?—Perhaps it might be; I cannot tell you now exactly to tell you correctly.

6926. Out of that 400*l.* how much did your own union, the Ashton union, subscribe?—Well, I cannot tell you that; we made great levies.

6927. It was a very important occasion?—Well, of course it was. I suppose it was.

6928. You were president at the time. Can you give me any notion how much your union subscribed?—Well, our union might raise 20*l.*

6929. Not more?—I do not think we raised more than 20*l.*

SIXTH DAY.

T. Harrison.

11 Sept. 1867.

6930. John Barlow has given us a different sum from that?—He might do so; he is better able to tell you that than I, because I had no accounts at all. I was merely assistant; I had no writing to do.

6931. I am speaking now of the money that came from the union funds for the defence of these men?—Well, I should say it would be somewhere near what you say, but I am not able to say correctly what the sum was.

6932. I asked you if it was as much as 100*l.* which was subscribed by your union out of the whole 400*l.*?—I cannot say how much ours did.

6933. Might it be as much as that?—It might be. I will not say anything different to that, because I have no booking of the matter.

6934. It would not appear in the books, would it?—Well, it appeared on a sheet.

6935. A loose sheet?—It appeared on a loose sheet; what had come from each place of course.

6936. But it would not appear in the books?—No.

6937. Having got about 400*l.*, what did you do with it?—We had to pay for the defence with it.

6938. How much did you pay?—The better side of 200*l.*

6939. To whom did you pay the 200*l.*?—To Mr. Roberts.

6940. Having got 400*l.* and paid about 200*l.*, what did you do with the other 200*l.*?—We had a deal to pay to that "Big Johnny," as I told you.

6941. I thought we were coming back to "Big Johnny." What do you pay him for?—Well, he came to me at Manchester, and I do not know anything more; I do not know anything at all about him.

6942. Was this after Jump's murder?—Yes. I do not know anything about the man. He came right to me and he said, "Is your name Harrison?" and I said, "Yes." "Well," he says, "I suppose there is a cure."

6943. What for?—That is all what he gave me.

6944. But what did you understand the "cure" was for?—That he had the men right for going away.

6945. The "cure" was to get the men out of the country?—Yes.

6946. Who were the men that he spoke of; were they Toole and Ryan?—No.

6947. Who were the other men?—Ensor and Gregory.

6948. So there was to be a "cure" for them, was there?—Yes.

6949. Go on and tell us what else he said?—He said nothing, only he wanted some money.

6950. And you understood that that was what he meant?—Yes.

6951. And Ensor and Gregory had not been taken into custody, had they?—No.

6952. And I suppose that "Big Johnny" told you he knew where they were?—Yes.

6953. And the "cure" was to get them quietly away?—Yes.

6954. And it was for that that he asked for the money?—It was for that that he asked for the money.

6955. Did he say where he would get them to?—No.

6956. That you left to his discretion?—Of course I had enough without that.

6957. The burden upon you was to pay the money, I suppose?—Yes.

6958. And how much did you pay "Big Johnny" for the "cure;" you had 200*l.* in hand?—I paid him 30*l.*, I think, down there.

6959. In Manchester?—Yes. Then he came again and I paid him 30*l.*

6960. What did he say he had done with the first 30*l.*?—I did not understand anything. He told me at once that he should want some more, and that was all the answer that he gave me.

6961. Then you asked him no questions as to what he had done with the 30*l.*?—No, I did not.

6962. You knew how to trust him?—Aye, when we was like.

6963. Do you mean that you could not help trusting him?—That is it, I think.

6964. You had known him some time, had you not?—No, I never saw the man before.

6965. Who had given him an introduction to you?—He came there to me; I never saw anybody direct him to me. He came right to me and asked me my name, and I told him.

6966. Did you ask him his name?—No. I asked a man what he was called, and he said he was "Big Johnny."

6967. And from his general appearance you thought he was the right man to have the 30*l.*?—Yes; from his general appearance he looked quite the man for it.

6968. So you at once gave him the 30*l.*?—Yes.

6969. And then he came back to you, and you asked him no questions as to what he had done with it?—No.

6970. But you understood what it was for?—Yes.

6971. How long was it before he came back after saying that he had spent the 30*l.*?—I had to find him 30*l.* in the course of four days.

6972. After you had given him the first 30*l.* four days elapsed, and then he came back for another sum?—Yes.

6973. Did he not tell you what he had done?—No, he did not tell us what he had done; he told us he should have to have some more before it would be completed.

6974. Did he say how far he had got on with his job?—No, he never gave me any information of that sort at all.

6975. You trusted him altogether?—Yes.

6976. And then you gave him another 30*l.*?—Yes.

6977. For the same purpose?—For the same purpose.

6978. Only to make those two safe, Gregory and Ensor?—Yes.

6979. Then did he go away with that second sum of 30*l.*?—Yes.

6980. Did you see him again?—Yes, I saw him again.

6981. How long after this last time?—Well, I think there was nobbut about four days elapsed again.

6982. And then he came for some more, did he?—Yes, he had two 30*l.*, and then I think I gave him two 20*l.*

6983. You gave him the two 20*l.* on the third occasion, did you?—Upon the third occasion.

6984. Do you mean to say that you gave him this money without asking him any questions as to what he had done with it?—Yes, we never asked him at all.

6985. Who was present at those interviews?—Nobody was there but him and me. He would not have anybody to go in to see me pay him the money.

6986. Did you pay him the three sums at the same place?—No.

6987. The first time you paid him, where did you meet him?—In Manchester.

6988. But Manchester is a big place. Where was it?—At the "Crown and Cushion."

6989. Where were you when you paid him the second sum?—I was at Liverpool; I had gone down to Liverpool.

6990. What had you gone to Liverpool for?—I had gone on that meeting that I have told you about.

6991. Did he know you then that he came to you at Liverpool?—How he got to know it I do not know, but he came to me at Liverpool.

6992. Where did he find you at Liverpool?—He found me at the club-house at Liverpool.

6993. He came to you there?—Yes.

6994. Did they seem to know him at the club-house at Liverpool?—I do not know, I am sure. They did not say anything to me about him.

6995. What is he?—All that I could get to know about him, as far as I could get any information whatever, was that he traded in wheat about the docks in Liverpool, and the last news I heard of him was that he had been transported for stealing wheat. I never knew the man nor knew anything at all of him.

6996. Then he came to you to Liverpool?—Yes.

6997. And there you gave him 30*l.*?—Yes.

6998. Where were you when you gave him the

two 20*l.*?—I gave him another 20*l.* at Ashton and another 20*l.* at Birkenhead.

6999. Then he followed you to Birkenhead?—Yes.

7000. And found you at the club-house there?—Yes.

7001. Where, at Ashton did you pay him?—I paid him in the street at Ashton. He said he had not time to stop or nothing.

7002. Do you mean to swear that this man was not recommended to you and that you knew nothing at all about him, and that on his only coming up and saying that he knew a "cure" you paid him the money?—Yes, I did not know the man nor who had engaged him, or anything at all about it.

7003. Of course you mentioned it to your other friends?—Yes, I told Barlow that, and I would always have the sum put down that I gave him.

7004 Who put it it down?—Himself.

7005. "Big Johnny" put it down?—Yes; if it was 30*l.* he put 30*l.*, and if it was 20*l.* he put 20*l.*, it being private, and he would not have anybody else with him, I would not pay the money unless he gave me the sum I paid him, and then I could show it Barlow, and Barlow could put it on the sheet, and we might know where the money had gone.

7006. Did you pay him any more after those two 30*l.* and two 20*l.*?—No, not just then.

7007. When did you next see him?—Well, I saw him again when we were down at Liverpool with the trial.

7008. That was in the summer, was it not?—Yes; in August, I believe, if I mistake not.

7009. "Big Johnny" was there, was he?—"Big Johnny" was there.

7010. Had you no talk to him about having made Ensor and Gregory safe?—He told me they were gone; that was all he said to me.

7011. Then what else passed between you?—Well, he said he had got the other two.

7012. Was that the first time he had mentioned the other two?—That was the first time he mentioned the other two, that he had got the other two, and that they were in the same way, and I had to pay him the same again.

7013. The other two were Toole and Ryan?—The other two were Toole and Ryan.

7014. Then he told you at the time of the trial at Liverpool in August that he had got the other two?—Yes.

7015. And you trusted him again?—Of course.

7016. What did you give him then?—He had the same sum again.

7017. 30*l.*?—Two 30*l.*

7018. Giving you a receipt for it?—He gave me no receipt, only just the figure of 30*l.*

7019. And you thought that was enough?—Of course it was enough to show that "Johnny" had received the money off me.

7020. But how did the figures show that he had received it?—Well, of course I could not write like it, and of course he took my word.

7021. You seem to have taken his?—We took his, and of course "Johnny" took mine.

7022. He took the money?—Yes, he took the money.

7023. Did you afterwards pay him something more?—I paid him another 30*l.*

7024. Where did you pay him that?—In Liverpool at the time that the trial was going on.

7025. And where did he come to you?—He was in the court.

7026. Was it in the court that you paid him the money?—No.

7027. Where did you pay him the money?—I cannot tell you the name of the public-house for I did not take that notice of it.

7028. Was there a similar transaction; did he give you a paper with the amount written down?—Yes.

7029. How many days was that after you had paid him the first 30*l.*, was it four days?—No, I think not; I think it was nobbut two days before he was on us again.

7030. Did he then come to you for something more?—Yes.

7031. Was that at Liverpool?—Yes.

7032. Before the trial was over?—Yes.

7033. How much did you pay him then?—I paid him the same as before, two 20*l.*

7034. That is, another 100*l.*?—I believe it was 200*l.* I paid him altogether; I did not take particular notice of the amount.

7035. And did he tell you that Toole and Ryan were made safe?—Yes, he told me they were gone.

7036. The person you told of all this was John Barlow was it?—Yes.

7037. That you swear, will you?—Yes.

7038. And he made a note of these payments upon the loose sheet?—Yes, of course he did.

7039. So of the 400*l.* you have mentioned, 200*l.* went to Mr. Roberts, and the other 200*l.* went in the way you have just told us?—Yes.

7040. For whom else of your union was it talked about besides John Barlow; it must have been mentioned, you know?—It was never mentioned; there was no secret at all as to what we had paid; there is no single person about it.

7041. It was well known to all your men?—Of course.

7042. The money that was received, and the mode in which it had been paid away were well known?—Yes.

7043. It was not put upon the books of the society, but only upon this loose sheet?—It was on this loose sheet, and passed away.

7044. This loose sheet is not existing now, I suppose?—No, I have none of it.

7045. Was this occasion of Jump's murder the only occasion when you went round to get assistance from the other unions?—That is the only occasion that ever I went.

7046. When have you known others go?—Well, I do not know that I have known others go.

7047. Just be careful.—They might have gone and I not know anything of it.

7048. But as it was common talk, and no secret, you must know whether at other times they had not gone round and got money for other things?—They had not done so that I am aware of.

7049. Will you swear you never heard of their going round at other times and getting assistance from the other unions?—Not to my knowledge; I do not remember it.

7050. Have you heard of it?—I might have done, and not thought of it.

7051. Have you heard of it?—I cannot tell you distinctly, to tell you the truth, whether I have.

7052. But it was common talk; had you heard of their going on other occasions to get money?—Well, I might have done so.

7053. Have you any doubt about it?—No, it might be so, and we not know about it.

7054. Of course; but you have no doubt about it, have you?—I have no doubt about their going at all.

7055. It was a common thing to go and get money from other unions?—Yes.

7056. And upon those occasions?—Yes.

7057. Have you ever sent any money to Sheffield?—No, not that I am aware of.

7058. May you have done so?—We might have done for anything I know.

7059. Do you remember the Reddish outrage, when Wild was beaten?—I remember hearing of it.

7060. It was a matter of common talk, surely?—Of course there was a talk about it.

7061. It was in the Stockport union district, was it not?—Yes.

7062. Did your union help the Stockport union with money upon that occasion?—Yes, I believe we did.

7063. How much did you give them?—I was not there, and I do not know.

7064. You were not there, but you heard it discussed. You say there were no secrets; how much

SIXTH DAY.

T. Harrison.

11 Sept. 1867.

was it?—I have heard it said that they gave them something, but I cannot say how much it was; I could not tell you the sum.

7065. Would it be about 20*l.*, or 30*l.*, perhaps?—No, I do not think it would.

7066. Not as much as that?—No.

7067. But, however, it was something?—Perhaps it might be 10*l.*

7068. But you have no doubt that money was given?—I believe money was given.

7069. Was that to meet the expenses of the defence of the men who had committed the outrage?—It was for the defence of the men.

7070. Have you often heard of your union paying for the defence of men who have committed outrages elsewhere?—No.

7071. Not often?—No.

7072. You were never present at any other but the one you have mentioned?—No.

7073. You have told me how you disposed of the 400*l.* Was the payment or the distribution of the 400*l.* entrusted to you, or was it brought before a regular meeting?—It was entrusted to me.

7074. By a resolution of the meeting?—We never had 400*l.* at once.

7075. Not at once, I know that; but whatever money was collected altogether was the distribution of it entrusted to you and Barlow?—Yes.

7076. Did you consider you were carrying out the purposes for which the money had been entrusted to you by paying this 200*l.* in the way you have mentioned to "Big Johnny?"—Yes, of course.

7077. Who first gave you the information that part of the money should be spent in that way?—We did not get any information.

7078. Nobody suggested it?—No, there was no suggestion about it.

7079. Of course you had heard that expression, "Is there not a cure," before?—No, I did not say a cure, "he had them secure."

7080. Had you paid money for purposes of that sort before?—No, never in my life.

7081. How did you know to what he alluded when he came and said, "Can you have them secure?" or "Will you have them secure?"—I well knew that the men had gone off, and that was all that I wanted.

7082. How did you know that this man alluded to that when you first saw him, before you gave him the money; how did you know that the man "Big Johnny" alluded to taking Slater and Ensor away and making them secure? Had you been told beforehand that somebody would come and make a proposal to you?—No, nothing of the sort was said to me, but as soon as he came in and said the words I had an idea what he meant.

7083. How came you to have an idea of what he meant; you had never seen him before?—I cannot say.

7084. He came to you to the "Crown and Cushion?"—Yes.

7085. Were you sitting alone in the room?—No, I was not in the room. I was going into the house, and as soon as I entered the house he entered it.

7086. Were there any other people at the time?—Yes, a great many.

7087. Could they have heard what he said to you?—No; he get hold of me. He said, "Thomas, is not your name Harrison?"

7088. Then he knew you?—Yes, he seemed as if he knew me. He said, "Is not your name Thomas Harrison?" I looked at him and said, "Yes."

7089. You say he called you Thomas and knew you?—He called me my proper name. Somebody had told him my name, or he would not have known it.

7090. He knew you?—Yes.

7091. Will you swear that you did not know him?—No, I had never seen him in my life before.

7092. Had nobody suggested to you that anybody would come to you with a proposal of that sort?—No.

7093. Had you talked over at the meeting that it was desirable to make these men secure?—No, not that I know of.

7094. It was considered between you and John Barlow?—I am not aware that it was mentioned at all. I cannot bring it to memory that we thought of such a thing at the time.

7095. Had you the 30*l.* in your pocket ready at the time?—Yes.

7096. How came you to have as much as 30*l.* in your pocket?—I had just drawn it, and as soon as I drew it he must have known that I had drawn it; but where he got this information I cannot say.

7097. Who told him?—I cannot say who told him.

7098. How came you to draw 30*l.*?—I was given it.

7099. You say you drew it?—Yes.

7100. How came you to draw the 30*l.*?—Have I not just told you?

7101. No, you have not.—I told you we went to some society.

7102. You had just drawn the 30*l.* from some society, and had not paid it over?—No.

7103. And by a curious accident Johnny was at the door?—Yes.

7104. And you had not the slightest expectation of it?—No.

7105. You never saw him before in your life?—No.

7106. He knew you as Thomas, and asked you for 30*l.* for that purpose. You understood it and gave it to him?—Yes, of course I did.

7107. How long before had you drawn the 30*l.*?—It was about 11 o'clock when I saw him, and I drew it between 9 and 10.

7108. Where?—At Manchester.

7109. Had you seen him at the place where you drew the money?—No, I never saw him till I saw him as I entered the door.

7110. A perfect stranger called you by the name of Thomas and asked you for 30*l.*, and you gave it immediately?—He did not ask me in there. He got me in by the shoulder and took me, and we went into the room, and he said, "The men are secure, and I shall want 30*l.*"

7111. Did it not surprise you that a man should take you by the shoulder into a private room and ask you for 30*l.*?—Yes.

7112. You knew nothing about him before?—No, I knew that the men were gone.

7113. Gone out of Manchester?—Yes.

7114. But not gone away?—I could not say whether they had gone away or not. I paid him 30*l.*

7115. For aught you knew the men had completely gone away, and nevertheless you gave him, a stranger, 30*l.* to get them away?—Yes.

7116. (*Mr. Chance.*) Had anybody told you when you drew the 30*l.*, or before you drew the 30*l.*, that somebody was to meet you that day?—No, they had not said a person would meet me, but they said when I drew the 30*l.* that it should not be long before I should have to part with it; that made me aware of the matter at once that I should have to part with it as soon as I drew it.

7117. Who told you that?—I have tried to bring my memory to it, but I cannot bring my memory to who it was said those words, because we were just all crowded. There had been a meeting, and the house was completely crowded, and we were all of a lump, and I could not tell who the man who told me was.

7118. Were the men who formed the lump members of your union?—No, the Manchester union.

7119. Was not your curiosity rather excited when a man told you that when you got the 30*l.* you would soon have to part with it?—Of course it was.

7120. Cannot you remember who it was?—No, I cannot remember who came out with the words. He made answer just like this, "You will not be long before you have to part with it."

7121. Had you seen the man before who told you this?—He did not tell me personally; I drew it. He said, "You will not have long to hold it."

7122. Where did you draw it?—At Manchester.

7123. What union did these people belong to?—

The Manchester union; we met at the Manchester club-room. He said, "You will not have long to hold it." As soon as the man came up to me in the way he did he took me into the room and said, "They are secure, and you will have to give me 30*l.*"

7124. How did you know that he was called "Big Johnny"?—By the name I got at Liverpool.

7125. Somebody pointed him out to you as "Big Johnny," who was that?—To tell you correctly I cannot say who pointed him out as "Big Johnny."

7126. Was he well known as "Big Johnny"?—Yes, he was well known as "Big Johnny" the same as his proper name.

7127. You have not heard his regular name?—Yes, I cannot think of it; I had a card once of his name, but I cannot think of it.

7128. Think for a moment what it was?—If I did know it I would tell you.

7129. He was transported for stealing wheat?—For having stolen wheat on his premises.

7130. How long ago was that?—Four or five years since.

7131. You say that when these outrages were committed at the instance of your society Ensor generally received the money?—Yes.

7132. We were told the other day that generally speaking after an outrage there was a meeting called of the members of the union?—No, I did not say so; I do not remember any meetings being called after an outrage.

7133. Do you remember the blowing up of Tetlow's house?—I remember hearing of it.

7134. After it was done was there not a meeting called of your union?—Not that I am aware of.

7135. Was there not a meeting called to consider whether money should be paid?—No, not that I am aware of.

7136. We were told by Thomas Barlow that a meeting was called after Tetlow's outrage, and others too?—I cannot say that there was or not.

7137. Would it be your ordinary course to call a meeting of the members of the union after an outrage of that kind?—No, I think not.

7138. Would Ensor have the power of paying whatever money he chose to pay for an outrage of that kind when it was committed?—Yes.

7139. Was the amount to be paid left entirely to his discretion?—Yes.

7140. Was not the subject afterwards at all brought before the members of the union in a general meeting?—No, not in a general meeting. When the accounts were audited up of course he had to answer for what money he had drawn; he had to satisfy the auditor of the book what he had done with the money he had drawn.

7141. The auditors knew that money had been paid for these outrages?—Yes, he put it to them that he had spent so much money, and then our accounts were against him.

7142. Was no mention made at a general meeting of the members assembled as to the moneys that had been paid for the outrages?—To tell you correctly I do not know whether the moneys would be mentioned openly or not.

7143. You do not know it?—No, not whether they were opened or not.

7144. (*Chairman.*) You said that "Big Johnny" had been tried and transported?—Yes, a person told me so.

7145. Do you remember where he was tried?—At Liverpool.

7146. When?—I do not know

7147. How long ago do you think it is?—It would be somewhere about four or five years ago.

7148. In the summer or the winter?—I cannot tell you that.

7149. But you are sure that he was tried at Liverpool?—A person told me that he was transported for having stolen wheat.

7150. And that he was tried at Liverpool?—Yes.

7151. Do you remember whether it was for stealing wheat at Liverpool?—I do not know where he got his wheat.

7152. You do not know where he was committed?—No; I only know that he was tried at Liverpool.

7153. I think you said that you understood "Big Johnny" to be a man that lived at Liverpool?—Yes; it is some such name as Haley or Hale; he always went by the name of "Big Johnny."

7154. You have got very near it by studying a bit?—I have got near it; I should have brought his name if I had got it.

7155. (*Mr. Barstow.*) What countryman was he by his speech?—I thought that he was an Irishman; whether he was or not I cannot say. It was some such name as that, but it is so long since I cannot say.

The witness withdrew.

CHARLES BARLOW sworn and examined.

7156. (*Mr. Barstow.*) I believe you are a brickmaker at Droylesden?—Yes.

7157. Are you father of the John Barlow whom we examined the other day?—Yes.

7158. He was secretary of the Ashton brickmakers' union?—He was president at the time.

7159. Do you know a man named Taylor, who lives at Cockbrook?—Yes.

7160. Is he a master brickmaker?—Yes.

7161. In 1859 was he in dispute with the union?—I believe he was.

7162. Did you, in company with some others, do some malicious damage to his property?—Yes.

7163. Who were those, John Ensor and Isaac Schofield?—Isaac Schofield was not there.

7164. Who were they?—John Ensor; it is so long since, I forget their names; I know John Ensor and me was there.

7165. Was a man named Bradshaw there?—Yes.

7166. William Bradshaw?—Yes.

7167. Was a man named Goodwin there from Manchester?—Richard Goodwin?

7168. Yes.—Yes, he was there.

7169. Was there a man named John Brierley there?—I cannot swear to him.

7170. How many do you think there were altogether?—I think there was another or two with us, but I cannot say; I cannot really think of their names the time has gone by so long.

7171. There would be six of you altogether?—I think there was another or two, I will not be certain.

7172. You went together to Taylor's brickyard?—Yes.

7173. Had you any arms with you of any sort?—Not one.

7174. Not a bludgeon?—No, I believe there were no bludgeons that night.

7175. When you went to Taylor's yard what did you do?—We got up materials inside and poured naphtha on them.

7176. What do you mean by materials?—Barrows and some boards.

7177. Trestles, tables, and wheelbarrows?—Yes, we put them inside the sheds that the bricks are made in.

7178. And you poured naphtha on them and set them on fire?—Yes.

7179. You got something for that, did you not?—Yes.

7180. How much?—I cannot be sure, but I think it was somewhat about 1*l.*

7181. Who paid you?—I was paid by John Ensor.

7182. What time of the year was this?—I cannot be exact what time of the year it was; Mr. Taylor will be able to tell the time of the year.

7183. Did you destroy any bricks?—What were inside the shed.

SIXTH DAY.

C. Barlow.

11 Sept. 1867.

7184. Nothing else?—Nothing else that I am aware of.

7185. Do you know Mr. Tetlow?—I do not remember ever doing any harm to Mr. Tetlow.

7186. Were you ever at Mr. Tetlow's house?—I never remember it, but I will not swear either way, whether I were there or not; if I was there it is unknown to myself.

7187. It is an extraordinary thing; it is one of the most wicked outrages I ever heard of?—The time is so long gone by; if I was there I have forgotten it.

7188. It is not 10 years ago?—No, but we have been connected so much in doing this sort of work that I have forgotten.

7189. You must remember whether you were there or not?—I cannot remember.

7190. Nonsense, I will not take an answer of that sort; it was an attempt to commit arson, and, perhaps, murder; if you were there, you remember it?—I do not remember being there.

7191. Nonsense, you must remember?—I shall not alter if you keep me here till 6 o'clock at night.

7192. We cannot take such an answer?—I never remember being at Tetlow's house.

7193. Will you swear whether you were there or not?—I would rather do neither; I have been concerned in so many, it has slipped my mind if I was there.

7194. Have you on any other occasion attempted to burn a man's house?—Yes.

7195. Do you remember a man named Rogers?—Yes.

7196. Was he in dispute with the union?—Yes.

7197. Did you go with some others to his yard?—Yes.

7198. Who were they?—Ward and Ensor.

7199. Ward is the man who was hanged?—Yes.

7200. Was Burke there?—And Burke.

7201. That is the man who is now in custody?—Yes.

7202. He is sentenced to penal servitude for life?—Yes.

7203. Was Jonathan Acton there?—Yes.

7204. Were there any more that you are aware of?—I do not know.

7205. (*Mr. Chance.*) Was Ryan there?—I do not remember Ryan.

7206. (*Mr. Barstow.*) Were there others there, or is it that you do not know their names?—How many have I mentioned?

7207. You have mentioned four, and yourself makes five.—Yes, there would be more than that.

7208. How many more?—There would be one or two more, but really the time is gone and I cannot think of their names. I am not ashamed of telling if I could think of their names.

7209. You may forget a man's name, but that you forget whether you tried to burn a man's house down I will not believe. You went to Mr. Rogers's yard?—Yes.

7210. What took place there?—We went to destroy the bricks.

7211. What did you do to destroy the bricks?—Trampled on them, likewise there was a watchman there.

7212. Do you know his name? Was it Samuel Newton?—Newton is the man's name, and a little dog came out of the shed, and a little time afterwards three came out.

7213. What did the little dog do?—He barked at them.

7214. And then the watchman came?—Yes, after that the watchman came.

7215. What did he do?—He came out and made his way somewhere, and there was a scuffle, and two were shot.

7216. What do you mean by that?—I was a few yards from them.

7217. The watchman came up to you?—No, he came out of the shed.

7218. Where did he come to; did he come to you after you had destroyed the bricks?—No, we had destroyed no bricks then. He came out, and Burke and Ward stood at the place where the little dog came out of.

7219. Burke and Ward were close to the shed?—Yes, and Acton was close to them, and he got some little distance away and fired at him.

7220. How do you mean he got some little distance away?—He was going away from them and some one fired at him.

7221. He turned to go away from them?—Yes.

7222. Did you see who fired?—I believe it was Acton and Ward who fired. It was so dark and I was five or six yards off them.

7223. Had you any arms yourself?—No.

7224 Did you see any arms in the possession of the party before?—No.

7225. Did you know that there were any arms till you saw the pistol-shots?—Yes, I knew that Ward had one. I did not know that Burke had one.

7226. You knew there was one pistol and that it was in the possession of Ward?—Yes.

7227. You say two shots were fired; some one else must have had a pistol?—I understood it was Ward and Acton that fired.

7228. Did you see them fire?—It was dark and I was about six yards off them. I saw two pistols fired, but I could not take my oath, but those were the two we understood had fired.

7229. You heard afterwards that they had fired?—Yes.

7230. Was the watchman hit?—I believe he was.

7231. Where was he hit?—Somewhere in the head; the watchman got out of the way and he was not molested any more.

7232. The watchman got out of the way?—Yes.

7233. He was not killed?—I am sure he was not killed.

7234. Did you go on destroying the property?—No, we went right away.

7235. Do you know a man of the name of Wylde?—Yes, a brick master.

7236. Where is he a brick master?—In Ashton.

7237. Do you remember his being in dispute with the union?—Yes.

7238. When was that?—I cannot speak to the time; it was not far from that time—they were near together.

7239. Would that be in 1859 or 1860. I cannot say; it would be near that time. I forget to a year or two.

7240. Do you believe that it was about 1860?—Yes.

7241. Was there a strike in your trade at that time?—Yes, we struck at 2*s*.

7242. And all these masters were making bricks with non-union men, were they?—Yes.

7243. That was the cause of their dispute with the union?—Yes.

7244. Do you remember going with some others to Wylde's yard?—Yes.

7245. Who were with you?—Ensor and Ward.

7246. Was Burke there?—Yes, Burke was there.

7237. Who else?—I am sure I cannot say exactly.

7248. How many others?—I cannot say how many there were of us.

7249. You can tell us about how many there were—I fancy there was another or two there.

7250. Can you tell us who were these other two; were they the same men in each case or were they different men?—I cannot say.

7251. What did you take with you there?—We took some needles with us then.

7252. Did you take any arms with you?—Yes.

7253. What arms did you take first?—Ward had arms with him. I do not know whether anybody else had or not.

7254. Ward had firearms?—Yes.

7255. A pistol I suppose?—I do not know whether it was a pistol or a gun.

7256. Had any of you staves or anything of that sort?—I believe not in that case. We only went there simply to needle this clay.

7257. You took needles?—Yes.

7258. Where did you get your needles?—I cannot say. Ensor and Ward got the needles.

7259. Who gave you your needles?—Ensor gave them to me; they were not delivered up till we got on the clay.

7260. He did not give them to you till you got in the yard.

7261. How did you put the needles in the clay?—In various ways.

7262. How did you put your needles in?—I had a stick and made some holes in the clay and put them down in it, and I believe the others did likewise.

7263. Was this the tempered clay?—The clay that was cast ready for tempering, but it was put in both where they had one bed tempered, it might be perhaps ten or a dozen thousand. I cannot speak to that, there were some needles thrown on that.

7264. What is the effect upon the workmen of throwing needles in the clay?—To prevent the non-union men from working the clay.

7265. Of course they do not see that the needles are in the clay?—No.

7266. Then they go to work the clay of course?—No, they cannot.

7267. They go to their work as usual?—Yes.

7268. They did not know that there were any needles there?—Yes, they found it out at Wylde's as soon as it was done.

7269. Without any one being hurt?—Yes.

7270. But you did not mean them to find it out?—Not if we could have hindered it.

7271. Supposing they had not found it out, what would they do?—Go on with their work as usual.

7272. How would they have worked the clay?—As long as the clay——

7273. What would they have done with the clay? I am not a brickmaker and I do not know how they do these things?—It is worked and moulded by hand; it affects only the moulder.

7274. He takes the clay and puts it into a mould?—Yes.

7275. I suppose he forces it into the mould?—Yes.

7276. Of course if there were any needles in the clay they would run into his hands?—Yes.

7277. Do they injure the hands permanently?—In some cases, and in some cases the clay gets made up.

7278. In some cases the men are never able to work at the trade again?—I never knew one that was injured to that extent.

7279. It stops them for a long time?—Sometimes it does and sometimes it does not.

7280. I suppose so, but sometimes it does stop them for a long time?—Yes.

7281. A man is prevented earning his living for a long time?—Yes, in some cases I have heard tell of it.

7282. Sometimes it only gives him a slight prick and he finds it out, and in some cases it goes with violence into his hands?—Yes.

7283. Did you do anything more on this occasion?—Yes.

7284. What was that?—I believe there was something done to the watchman there; we went up to the shed after the clay was destroyed.

7285. What did you do then?—Burke went to the shed door.

7286. What did he go to the shed door for?—To see whether there were any watchmen in, and he found the watchman in the shed. We had spoiled the work then.

7287. Burke went to find out the watchman?—Yes.

7288. No dog came out?—No dog came out. The watchmen said, "Who is there?" and Burke said, "A friend." He came to the door and Burke and him had a scuffle on the floor, and then he got up and Ward fired at him.

7289. What made him run away?—Because there were so many of us there. The man saw he was in danger and got up.

7290. And ran away?—Yes, and he might be 30 or 40 yards off when Ward fired at him; I believe he only had one shot fired at him.

7291. Was he hit?—No, I do not think he was hit.

7292. However he was fired at?—Yes, he was fired at.

7293. What did you get for that job?—Somewhat similar to the other.

7294. About 1*l.*?—Yes.

7295. Were you paid by Ensor as usual?—Ward paid me on different occasions.

7296. What did you get for the job at Rogers's?—Very little; I do not know how much it was for a job, it varied much, from 1*l.* to, I would say, a few shillings.

7297. You were always paid either by Ensor or Ward?—I was always paid either by Ensor or Ward, nobody else ever paid me.

7298. What did Burke go to the shed for?—He went to see whether there was a watchman or not.

7299. That could hardly have been the reason for going to the shed?—We all went to the shed.

7300. What did you all go to the shed for?—Not to do any damage, we had nothing with us to do any damage with.

7301. Did you not want to burn the shed?—No.

7302. And you had no naphtha?—No.

7303 If you had found anybody there would you have done any injury to the shed?—No we had nothing with us to do the injury.

7304. You had some matches?—We had some to light our pipes.

7305. They would light a shed as well as light a pipe?—It is a different thing to light a shed unless you have something else with you.

7306. You can easily find something else?—It is a difficult thing to find anything in the dark.

7307. Do you know Kirk?—Yes.

7308. Is he a master brickmaker?—Yes.

7309. Where?—At Ashton.

7310. He was in dispute with the union at this time for the same cause?—Yes.

7311. You went to his yard?—We went to his house.

7312. Who went with you?—Ensor and Ward Burke, Robert Ryan, JosephFrith, and myself.

7313. That is all?—Yes.

7314. Where was his house?—I cannot say; it stands at this side of Ashton, I believe it stands in it, but I never was at his house before that night, and I have never been since, I cannot tell the place exactly; I do not want to tell any stories.

7315. You do not know what they call his house?—No.

7316. What did you take with you?—Ward had a bottle with him.

7317. What bottles do you mean?—Filled either with powder or combustibles.

7318. Did you see them filled?—No, they were ready filled when I got there.

7319. What was the appearance of the bottles?—They did not appear to be a very great size what I saw of them.

7320. You saw them?—Yes, I saw them when they pulled them out of their pockets.

7321. Were they stone bottles?—I cannot say what they were made of, it was dark.

7322. Had you one in your had?—No never.

7323. Could you tell us what had been in the bottles before from the shape of them?—No, I cannot.

7324. Do you know a blacking bottle?—I think they were a little larger than blacking bottles, I am not sure.

7325. Cannot you say whether they were stone or glass?—No, having nothing to do with them I cannot tell you, but I was there.

7326. Can you tell us whether there was a fuse to them?—Yes.

SIXTH DAY.

C. Barlow.

11 Sept. 1867.

7327. You took these bottles with you; when you went to Kirk's house what did you do with them?—Ward took the bottles.

7328. What did Ward do with them?—When I got there and all was silent we lighted them, I believe one was sent through his window, and another caught something in the window and broke outside.

7329. Did you see who threw the bottles?—Ward cobbed one, and Ryan the other.

7330. What do you mean by "cobbed;" do you mean threw?—Yes; I cannot swear whether Ward or Ryan threw the two.

7331. Ward and Ryan each threw one?—Yes.

7332. But what were you doing?—I stood at one side, and Burke stood at the gate with a pistol for protection.

7333. Had any of the others pistols?—No, that was the only firearm I saw on that night.

7334. Had you staves or anything of that sort?—No, I do not remember having any that night.

7335. What happened when Ward and Ryan threw the bottles in?—We ran away then.

7336. As soon as ever they were thrown you ran away?—Yes.

7337. Will you swear that no more than one bottle was thrown into the house?—I cannot swear that; I am not sure, and I cannot swear whether there were one or two thrown.

7338. They were both intended to go into the house?—No doubt they were all intended to go through that were thrown at the window.

7339. Do you know of any other outrage; have you ever thrown any bottles into anybody else's house except Kirk's and Taylor's?—No.

7340. You say distinctly that you were not at Tetlow's?—I can never remember being at Tetlow's. I am satisfied of that, though Tom and Fred gave evidence against me; but I cannot bring my mind to that point.

7341. What did you receive for this business; 1*l.* again?—It was somewhat similar to 1*l.*; there was not much difference.

7342. It was paid you by Ward and Ensor?—Yes, nobody else paid me.

7343. You have told us of burning Taylor's sheds, and shooting Rogers's watchman, and putting the needles in Wylde's clay and shooting at his watchman, and an endeavour to set fire to Kirk's house; you do not know whether Kirk's house was set on fire, and you do not know what damage was done?—Not much damage was done.

7344. Are those the only outrages at which you were?—Yes.

7345. Taylor of Cockbrook's job, shooting Rogers's watchman, putting needles in Wylde's clay and shooting at his watchman, and endeavouring to set fire to Kirk's house; those are four cases?—Yes.

7346. Do you know of any other; it is for your good to tell us; you may be prosecuted for anything if you do not tell us?—I will tell you the truth.

7347. You had better?—I cannot remember any other at present.

7348. Will you swear that you were not at any other except those four?—Yes; I was at Newton Woods.

7349. What made you go to Newton Woods?—There was a quarrel there with the master and the brickmakers, the same as the other.

7350. What did you do there?—Spoiled a quantity of bricks.

7351. Who were with you, do you remember?—I can remember some of them, but I cannot remember them all now; there were Ward, Ensor, Hipwell, and I believe Barlow with me, but I am not sure.

7352. What Barlow is that?—Thomas.

7353. Any other names?—I am sure I cannot call one to mind just now.

7354. You spoiled a lot of bricks?—Yes.

7355. You did not shoot at the watchman there?—There were none to shoot at there.

7356. Did you take any arms with you?—Yes.

7357. If there had been a watchman you would have shot at him?—I do not know; I never carried a pistol with me; through all my deeds I never carried one.

7358. Do you know whether in these cases information was given to the police?—No, not that I am aware of.

7359. Did you ever see the walls of the town placarded with a reward for these outrages?—Certainly; I have seen it in the newspaper.

7360. Rewards were offered in these cases?—In a great quantity of them.

7361. Did you ever hear of any one being apprehended for any of these cases, that you have told us of?—No.

7362. You have told us now of five or six people in each, on an average?—Yes; I will not be particular to one, I will not tie myself to one.

7363. You do not know of anyone being apprehended?—I do not know of anyone being apprehended.

7364. Can you think of any other case that you have been engaged in?—No, I have been in no more.

7365. In most of these cases you were engaged generally by either Ensor or Ward?—Yes.

7366. (*Mr. Chance.*) What kind of house was Kirk's; was it a one or a two-storey house?—A two-story house.

7367. Where the bottles thrown in at Kirk's bedroom?—I believe they were.

7368. Do you know whether Kirk was living in the house at the time?—I believe he was, but I am not accustomed to that end of the town; it is a part that I am very little in.

7369. Is it your belief that he was in the house?—I believe he was.

7370. Was it spoken of amongst you at the time that he was in the house; when you were there with the men was it well understood amongst you that Kirk was in the house?—It was never mentioned.

7371. Do you know whether Kirk was married?—I do not know whether he was married or single; I do not know to-day.

7372. You told Mr. Barstow that in Rogers's case the watchman turned to go away, and that then he was fired at?—Yes.

7373. Then there was a deliberate attempt to shoot him at the time he went away?—He was making his way away.

7374. He was fired at by two men, Acton and Ward, though he was actually going away from the spot?—Yes.

7375. There is one man that you have omitted; was not Thomas Robinson also at Barlow's?—I cannot say.

The witness withdrew.

F. Hipwell.

FREDERICK HIPWELL recalled and further examined.

7376. You remember Smethurst's case, do you not?—Yes.

7377. Was not that on the night before Jump's case?—Yes.

7378. You were not present at it I believe?—No.

7379. Was it the watchman that you fired at in Smethurst's case?—I believe it was the burner.

7380. Do you remember seeing Ward either that same night or the night after?—It was the night after he got shot at.

7381. Did he say something about Smethurst's case?—Yes, he said a few words to me.

7382. What was it that he said?—As I was going past Smethurst's yard he said to me, "Fred, here. It "was hot here last night. Me and Jonathan Acton "had to run;" and he said, "With running I tumbled over a ditch:" this was all he said to me about that.

7383. That was the night of the affair of Jump's murder?—Yes.

7384. And this had happened the night before that had happened?—Yes.

7385. Were you concerned in the Newton Wood case?—Yes.

7386. Who were concerned in that case?—There was myself, Thomas Barlow, John Ward, John Ensor, Robert Ryan, Michael Burke, John Toole, and Jonathan Acton.

7387. Do you know what has become of Acton?—I do not know.

7388. Did you all meet the night it was going to be done?—Yes.

7389. Where did you meet?—A little below Guide Bridge.

7390. Then I suppose you all arranged what to do?—Yes.

7391. Who was the manager of that?—Ensor and Ward.

7392. And then you all went to the place, I suppose?—Yes.

7393. Do you remember what you did?—We went with the intention to burn a shed down.

7394. What did you take with you for the purpose?—Naphtha.

7395. Who took that?—Well, I carried one bottle a little way myself.

7396. How many other bottles were there?—I do not know how many there were altogether.

7397. Did you take anything besides naphtha?—No.

7398. Did any of you take any pistols?—No, not that I am aware of.

7399. You had all sticks, I suppose?—Yes.

7400. What time of the night was it when you got there?—About 11 o'clock, as near as I can say.

7401. Was there any watchman there?—Yes, at the factory before you get to the shed.

7402. Would you pass the factory before you get to the shed?—Yes.

7403. But did you discuss beforehand the probability of the watchman seeing you as you passed the factory before getting to the shed?—Yes, we did.

7404. What were the measures that you were to take if the watchman came out?—I cannot say that anything particular was said.

7405. You had your bludgeons with you?—Yes.

7406. And you would have used them upon the watchman if he had come out to prevent you?—Of course.

7407. However, he did not see you?—Not that I am aware of.

7408. At all events, you were not interfered with?—No.

7409. When you got to the shed what did you do?—We got the materials, and put them in the middle of the shed.

7410. Were those wheelbarrows?—Yes, wheelbarrows and planks.

7411. You put them well in the middle of the shed?—Yes.

7412. So that if you set them alight the whole thing would go?—Yes.

7413. How many barrows do you think you put there?—Well, I cannot exactly say.

7414. All that you could find?—All that we could find about the shed.

7415. What else besides barrows did you put in the middle of the shed?—There were planks and any timber that we saw.

7415*a*. And I suppose you made a good pile in the middle?—Yes.

7416. Who had the match or the dark lantern?—The fire was fetched out of the fire-hole in the shed.

7417. There was a fire-hole in the shed, was there?—Yes.

7418. You knew that beforehand?—I never knew it till we got there.

7419. Then the fire was got out; you poured some naphtha on those materials?—Yes.

7420. And then you set it alight?—Yes.

7421. It made a pretty good blaze, did it not?—Well, the materials were wet.

7422. But I suppose it did light?—Yes, it did light.

7423. And sufficiently for your purpose?—Yes, and then we went away.

7424. You saw the fire had got well ahead and then you went away?—It did not get so much ahead.

7425. Not so much as you wanted?—No.

7426. And then you went away?—Yes.

7427. You were not disturbed at all?—We were not disturbed at all.

7428. How much did you get for that job?—I cannot say how much it was, but we received something.

7429. Rather more than 1*l.*?—I cannot swear what it was, but I know I received something for the job.

7430. Did Ensor pay you?—Yes.

7431. Was Ensor at that time the president?—No, I rather think not.

7432. You do not remember who was president at the time?—No, I do not.

7433. However, you were paid in the regular way?—Yes.

7434. Have you ever had the acquaintance of a gentleman of the name of "Big Johnny?"—Not that I am aware of.

7435. You do not remember "Big Johnny" at all?—No, I do not know that I do.

7436. You never heard of him, did you?—No.

7437. Do you know a man of the name of John Daly, or Johnny Daly or Haly?—I believe I have heard the name, but I cannot bring it to mind.

7438. Which do you think you have heard?—Johnny Haly.

7439. A man that lived in Liverpool?—No, I cannot say that I knew anyone living in Liverpool except my wife's brother.

7440. But have you ever heard of him in connection with union business?—No, I cannot say that I have.

The witness withdrew.

Mr. Joseph Barlow sworn and examined.

Mr. J. Barlow.

7441. (*Mr. Chance.*) Are you a master brickmaker?—Yes.

7442. Where do you live?—At Droylesden.

7443. Are you any relation to Thomas Barlow who has been called as a witness here?—I am uncle to him.

7444. What relation are you to John Barlow?—Uncle.

7445. Are John and Thomas brothers?—No; one is the son of James Barlow and the other is the son of Charles Barlow.

7446. You are related together, Charles, Thomas, John, and yourself?—Yes.

7447. How long have you been a master brickmaker at Droylesden?—Well, I have been at Droylesden about 25 years.

7448. And were you a journeyman brickmaker before becoming a master brickmaker?—I was not a brickmaker, but I was a wheeler.

7449. Were you a member of any union?—Yes.

7450. On becoming a master brickmaker did you cease to be a member of the union?—Yes.

7451. Is there any other union of which you are a member as master brickmaker?—No, I am not a member of any union either of masters or men.

7452. Do you remember in the year 1861 having a dispute with the union?—Yes.

7453. With the Ashton-under-Lyne union?—Yes; with the Ashton-under-Lyne union.

7454. What was the nature of the dispute which you had with them?—The nature of the dispute was because I was not employing any union men at that time.

SIXTH DAY.
Mr. J. Barlow.
11 Sept. 1867.

7455. Did the union send any delegates to you in consequence of that?—Yes, I believe I was warned.

7456. I suppose they came to ask you to employ union men?—Yes.

7457. Did you comply with their request or did you refuse to employ them?—Not at that time. I went on with non-union men.

7458. Are you speaking now of the year 1861?—Yes.

7459. Did they make more than one application to you?—No, I think they made but one application at that time.

7460. Do you remember in what parts of 1861 it was when this application was made to you?—Well, I believe it would be commencing in January.

7461. After this refusal to employ union men did anything happen to you?—Yes; they attempted to throw some bottles through my bedroom window.

7462. Was that done at night?—Yes, it was in the night.

7463. About what time?—It would be from 12 to 1 o'clock.

7464. Is your bedroom window above the ground?—Yes.

7465. Is it one or two windows above the ground?—It is the second window above the ground; two storeys.

7466. Was anybody in the room besides yourself?—Yes, my missus.

7467. Anybody else?—No, except a child that we had in bed.

7468. How many bottles were thrown into the room?—They did not throw any through. It happened that they caught the woodwork and that prevented the bottles from coming into the room, and they exploded outside.

7469. Did you hear anything of the explosion that night?—Yes, I heard two bottles explode that night.

7470. Did you hear them go against the house outside?—I heard one come against the window, but I did not hear the other come against anything.

7471. Did you hear the one which you heard come against the window explode?—Yes.

7472. Did it explode outside?—Yes.

7473. Did the explosion damage the window?—No.

7474. On hearing this did you get up?—Yes.

7475. Did you go downstairs?—Yes.

7476. Did you go out?—Yes.

7477. What did you find?—We could not find anything that night; it was too dark when we went out.

7478. Did you see any men?—No, we could not see any men.

7479. Did you look about the yard?—Yes.

7480. And you could find no one?—No, we could find no one.

7481. Next morning did you examine underneath the window against which those bottles had been thrown?—Yes.

7482. Did you find the two botttles?—Well, we found parts of them, and one bottle we found which had not exploded. They had not lighted it, it appears.

7483. Was that broken, too?—No.

7484. Then can you tell us what became of that?—No, I could not. I gave it up to the sergeant of police at the time and it appears that they made it away; but it appears that it was loaded with powder and a kind of little cinder, or something of that sort.

7485. Did you hear that from the policeman?—Yes. I think that Mr. Harrop can tell you about it.

7486. Had it slugs, or nails, or anything of that kind in it?—No.

7487. Was it like a ginger-beer bottle?—Well, it was larger than a ginger-beer bottle.

7488. Was it made of stone or glass?—It was stone.

7489. Was the one that had exploded made of the same materials?—We could not see anything. It was all exploded and there was nothing by the fragments of the bottle.

7490. But the fragments of the bottle would tell you what the bottle was made of: was that stone too?—Yes.

7491. Did you ever hear the reason that this outrage was committed upon you?—I could never hear except the dispute with the union.

7492. Do you believe that it was in consequence of this dispute with your union that those bottles were thrown at your bedroom window?—Yes.

7493. You have not heard of anyone who did it?—No, I have not heard who did it.

7494. How long after the dispute was it that it took place?—The dispute took place before the bottle was thrown.

7495. I know it did, but how long before?—Well, it might be a couple of months, but I could not say exactly.

7496. Did not this take place in January 1861?—Yes.

7497. Would not your dispute take place in January also?—It took place I think about a month or two before then.

7498. Can you tell me how long after the delegates came to you it took place?—I cannot say exactly.

7499. Could you say about how long afterwards it was?—I could not really tell how long it was.

7500. The delegates came to you I suppose sometime after the dispute began?—Yes.

7501. So that there would be a less time intervening between the coming of the delegates and the throwing of the bottles at your window?—Yes.

7502. Would it be a month do you suppose?—Well, I cannot say.

7503. Did you give information to the police and endeavour to find out who had done it?—Yes.

7504. But you heard nothing more of it?—No, I did not.

7506. On any other occasion has any injury been done to you?—I think the next was that they put some needles in my clay.

7507. When was that?—That was in the year 1861.

7508. Had there been any other disputes between the throwing of the bottles into your window and the putting of the needles?—No, no dispute of any sort.

7509. Had you had any communication with the union?—No.

7510. Were you still employing non-union men?—Yes.

7511. How many non-union men were you employing?—About six in number at that time, six men and about four boys.

7512. Tell us about those needles?—They came and made holes into the clay and did it with some kind of instrument, and put the needles down into the clay.

7513. Was that when the clay was soft before moulding?—No, it was clay that they were agait casting ready for tempering.

7514. And how much clay was treated in this manner by putting needles into it?—Well, I should say there were nearly 400,000.

7515. Was there clay sufficient to make 400,000 bricks?—Yes.

7116. How could they put the needles in the clay?—It appeared by what I could see that they had them in packets and undid the packets and put them in the holes, and then trampled them in with their feet.

7517. Is the result of needles being put in to destroy the bricks?—No, it is not to destroy the bricks, but it is to stop the workmen.

7518. But does it destroy the clay altogether?—No.

7519. Then if the workmen mould it afterwards it cuts their hands?—Well in some cases it might do, but I do not know that I ever heard of anyone happening of any such misfortune.

7520. But you suppose that to be the object with which the needles are put into the clay?—Yes, certainly that would be the object.

7521. But it does not necessarily hurt them?—Well, it did not hurt any of the men.

7522. How was that?—I do not know, but it did not catch any of them.

7523. Did they find it out?—Yes, they found it out.

7524. Supposing that they had worked it with the

needles in, would it not then have hurt them ?—Well, I do not know, it might have done.

7524. Surely if they had worked the clay with the needles in they must have cut their hands ?—They might work a great while without coming in contact with the needles.

7525. But still if their hands were to come into contact with the needles they might enter their hands ?—Yes, it might injure them seriously.

7526. Would not that be the reason, according to your opinion, why the needles were put there ?—No.

7527. Supposing the needles were left there and the bricks made, would that injure the quality of the bricks ?—No.

7528. But when the needles are put in the clay, do you try to get the needles out, or do you work them up with sticks ?—Well, they hunt and get them out as well as they can with spades or anything when they find they are put in.

7529. Then a great deal of labour is consumed in getting the needles out ?—Yes.

7530. Have you any notion where they get those needles from ?—No, I could not say.

7531. What kind of needles are they ?—It appeared to me that they were damaged needles.

7532. Have you any notion what quantity of needles were put into the clay ?—I could not say.

7533. I suppose that if they were good needles it would be some expense, would it not ?—I should say it would.

7534. Did you examine them ?—Yes.

7535. And they appeared to be damaged ?—Yes, they did.

7536. Could those be got in this neighbourhood, or where could they be got from ?—I could not say, I had no idea where they could get them from.

7537. But is it your belief that putting needles into the clay resulted from your employing non-union men ?—Yes.

7538. Now can you tell us any other instance in which damage has been done to your property ?—Not just lately, not within the last six or seven years.

7539. Could you go back as far as eight or 10 years ?—No, it is above 10 years since I had had damage done before.

7540. Then those two occasions in 1861 are the only two occasions in which you have suffered any injury at the hands of any unions ?—Not exactly, but I think that is what I have suffered under Ashton union.

7541. Have you suffered any injury at the hands of any other union ?—I have, as far as my bricks being stopped from sending them into any other district. I do not think that the Ashton union has had anything to do with it.

7542. You have been prevented from sending bricks into other districts ?—Yes.

7543. Into what districts have you been prevented from sending your bricks ?—Into Manchester.

7544. Is it a rule among the Manchester brickmakers, that brickmakers at Ashton shall not send any of their bricks into the Manchester district ?—Yes, it is their rule not to allow them to come in.

7545. And have you tried from time to time to send your bricks into the Manchester union ?—Yes.

7546. And how have you been prevented ?—Well, I have had my carts stopped from tipping them and made to bring them home again.

7547. Do you know who stopped the carts ?—Well, not exactly.

7548. Do you know inexactly ?—I think that James Kay was in one case.

7549. Do you know that of your own knowledge, or have you simply heard of it ?—I know it from the description the carter gave me.

7550. What is the carter's name ?—William Taylor.

7551. Were your carts turned back ?—Yes.

7552. Was that the only mode which was adopted for the purpose of preventing your sending your bricks into Manchester ?—Well, they have gone round to different parties and told them that they must not buy any of me, and that they should not allow them to be used.

7553. Have you ever received any injury to your property, or any threats of injury from anyone connected with the Manchester union ?—Yes, but this is some time since.

7554. How long is it since ?—I should say it is 15 years since.

7555. I am speaking now of anything that has happened within a period of 10 years. Have you ever had any threat from Manchester men that injury would be done to you or your property if you continued to send bricks into their district ?—No, they never used any threats publicly. What they have done has been stopping me from sending bricks.

7556. But have they ever threatened to do you any injury if you did send bricks ?—No, they never threatened me, they threatened the carter that they would throw him into a pit if he brought any more.

7557. Is that William Taylor ?—Yes.

7558. When was it that any of those threats were used to William Taylor ?—It would be about 12 months last June, I believe.

7559. Is William Taylor here ?—He is not here, I believe.

7560. Have you heard of any other threats being used to Taylor ?—No, I have not.

7561. Do you know who used the threat ? Was it Kay or somebody else ?—I do not know.

7562. Is that all you have to tell us about any injury to your property, or any threat of injury ?—Yes, that is all, I think.

7563. Is it all that you know ?—No, it is not all that I know, but I do not think you will get any further at it by my telling you anything more.

7564. But do you know of any injuries to your property within a period of 10 years other than what you have told us ?—No.

7565. (*Chairman.*) Have you a watchman ?—I have none now.

7566. Have you had one ?—Yes.

7567. What is his name ?—Butterfield.

7568. Had he a horse injured ?—Yes.

7569. How many ?—One.

7570. It was hamstrung, was it not ?—Yes.

7571. When was that ?—In 1861.

7572. Was the horse on your premises ?—No.

7573. Where was he ?—In his own stable.

7574. Was he your watchman ?—Yes.

7575. Was he your watchman at the time ?—Yes, he was on my premises watching at the time.

7576. He was upon your premises watching at the time, and they went upon his premises and hamstrung the horse ?—Yes.

7577. (*Mr. Barstow.*) Do you employ union men now ?—Yes.

7578. How long have you employed them ?—I have employed them from about June 1861.

7579. How did you come to employ them ?—On account of the damage and one thing and another that they were always agait with me.

7580. Did you turn away your non-union men ?—Yes.

7581. You turned away the men who struck by you ?—Yes.

7582. And you took the men who did the damage to your property ?—Yes, I was obliged to do so.

The witness withdrew.

Mr. Joseph Smethurst sworn and examined.

7583. (*Chairman.*) Are you a master brickmaker ?—Yes, in connexion with Mr. Martin. Martin and Smethurst is the firm.

7584. But you are a master brickmaker ?—Yes.

7585. In partnership with Mr. Martin ?—Yes.

7586. Where are your works ?—At Guide Bridge.

7587. Have you been a master brickmaker long ?—Since about 1861.

SIXTH DAY.

Mr. J. Smethurst.

11 Sept. 1867.

7588. In the year 1861 or 1862 did you employ non-union men?—Yes.

7589. In 1862 had you any complaints made to you by the union that you were so doing?—No, I had no complaints addressed to me at all.

7590. Nor to your firm?—Nor to the firm.

7591. About how many hands did you employ in April 1862?—Well, there might be eight or nine.

7592. Do you remember several of your bricks being destroyed in April 1862?—Yes.

7593. How many bricks were destroyed?—There was somewhere, I think, between 5,000 and 10,000.

7594. They were destroyed I suppose in the night-time?—Yes, they were destroyed in the night-time by trampling upon them.

7595. Could you form an opinion from the foot-marks and so on how many men were employed in doing it?—No, I should think perhaps three or four.

7596. Had you a watchman on your premises at that time?—No, I had not at that time.

7597. Was that all the damage which they did at that time?—Yes, I believe it was.

7598. In August of the same year had you some more damage done to your premises?—I do not remember that we had.

7599. You remember Jump's case, do you not?—Yes.

7600. That was in June. Do you remember whether you had some damage done to you in June, the night before Jump's case?—Just previous to Jump's being shot there was an attempt.

7601. Had you at that time a watchman?—Yes, I had a watchman at that time.

7602. What was his name?—Dunning.

7603. Do you remember whether he was shot at that night?—No; Dunning was not shot at; the kiln burner was shot at.

7604. What was his name?—I think his name was Jones.

7605. He was shot at that night just before Jump's case?—Yes, the night before.

7606. Was he the only man upon your premises that night?—Yes, there was a watchman and another man along with the burner.

7607. And the burner was shot at?—Yes, the two men at the kiln were shot at, but it took effect upon one to some slight extent.

7608. Which was the one who was hit?—Jones.

7609. Were there more shots than one fired?—Yes. I have understood from the report from them that there were two or three shots fired.

7610. While they were watching your premises at night?—They were working, and the watchman was at the other end of the yard———

7611. Were you at the time employing non-union men?—Yes; at the time that the man was shot at the watchman was intent upon a man who was standing on the railway bridge very near to the rails, within a yard or two of the fence.

7612. Then those two men were fired at, you say, two or three times?—Yes, at the other end of the yard, while the watchman was intent upon this man.

The witness withdrew.

J. Kershaw.

JAMES KERSHAW sworn and examined.

7613. (*Chairman.*) What are you?—A brick-maker.

7614. Are you a member of the Manchester union?—Yes.

7615. How long have you been so?—24 or 25 years.

7616. What office do you fill now?—I am president at the present time.

7617. Who is secretary at the present time?—Henry Green.

7618. Where does he live?—I do not know his residence, but he works in Cheetwood.

7619. Who is the treasurer?—We only came in office on the 7th, and we have none.

7620. We understand that you have an iron box belonging to your union?—Yes.

7621. Who keeps the keys of it, do you keep one?—No.

7622. Who has the key of it?—The key was in my possession when your officer came on Tuesday night, and at that time he could have got the keys, and we would have given them to him; but, however, since that we have turned them over to our legal adviser, and I am not certain whether he is in possession of them or not.

7623. Then you would be willing to open the box if your legal adviser gave you up the keys?—We would have been willing to have opened it the night they were there, but instead of asking for them in our presence they came afterwards and took the box and the whole contents away without our knowledge. We were willing to deliver anything up that they might want.

7624. How many of you kept the keys?—There are five keys belonging to the safe.

7625. How many keys are required to open the iron box?—Six.

7626. Whose duty is it generally to keep those keys?—The keyholders.

7627. Who are the keyholders?—The keyholders are six in number.

7628. Who are they?—I could not answer them all.

7629. You as president would be one?—No.

7630. But you told me that you had the keys till you gave them up?—I gave them up.

7631. Could you have opened the box if it had not been for giving up the keys?—No.

7632. What keys had you?—The keys which I had were two in number.

7633. What keys were they?—The keys of the safe, two of them.

7634. And how many keys were necessary to open the safe?—Six.

7635. Yours were two of them?—Mine were two of them.

7636. Who had the other ones?—Green had three.

7637. That is five; who had the other one?—The landlord of the house.

7638. What is his name?—I do not know.

7639. Is it not Samuel Wood?—I do not know; he has been there so short a time that I cannot answer.

7640. You would have been willing to open the box, but you were advised not to give up the keys?—We would have been willing to have opened the box had one of your superior officers asked us to do so, but we did not do so.

7641. Were you there to be asked?—Yes.

7642. Were you away at the time they came, or were you there?—They were with us, and in two hours afterwards they came and took the boxes away.

7643. But the officers did not see you?—Not at the time that they fetched the boxes, we were not there at the time, but we were there at the time those two officers came, and we were so familiar the one with the other, that one of them actually treated us to a shilling's worth of beer, and he should have had the boxes if he had asked for them then.

7644. You were in a good humour then. Who was the officer?—We call him "Jack Tar" for a nick-name.

7645. When he came there you saw him?—Yes.

7646. And if he had asked you to open the box you would have done so?—Decidedly.

7647. Was Green there?—Yes.

7648. And Samuel Wood?—No, but he was down-stairs, that is if his name was Wood, I do not know whether his name is Wood or not.

7649. But, however, all those men who had the six keys were then in the house?—Yes, the keys were there.

7650. When did you give up your two keys?—I

believe it was yesterday morning ; no, it was last night.

7651. To whom did you give them ?—We were all of us there together, and I threw mine down on the floor, and said anybody could have them.

7652. You and Green were there ?—Yes.

7653. And Samuel Wood ?—I did not see Wood.

7654. You have been served with a notice to produce your books, have you not ?—Yes.

7655. And you would produce them if you had the keys ?—We should have produced them if we had been asked for them.

7656. Would you produce them now if you had the keys ?—I do not know but what I should, but I do not feel inclined.

7657. Were you advised for the purpose of preventing you from producing the books to get rid of the keys ?—No, I was not advised in any shape concerning it ; the reason was that after their coming and taking the boxes we got, and thought within ourselves that it was committing an outrage upon us to take our property away without asking our permission.

7658. And was that the reason that you threw down the keys ?—Yes.

7659. Who picked them up ?—I cannot tell.

7660. Will you swear that you do not know who picked them up ?—I swear I do not know who picked them up.

7661. Was this in a public-house ?—Yes, it was in a public-house.

7662. Did Green throw his keys down ?—That I cannot answer.

7663. But you were there, you know ?—I was there, but I did not see him.

7664. And is the reason that you cannot now produce the books that somebody has taken the keys which you threw down ?—Yes.

7665. Now tell me who picked up the keys which you threw down ?—I cannot tell ; I never saw them.

7666. You threw them down and then looked the other way ?—No, we were in a jocular mood at the time, and that was the way I parted with them.

7667. You threw them down and then looked the other way ?—I might have done or might not have done, but I did not see anyone pick them up.

7668. Who was in the room besides Green ?—There was Green and me and Barker ; that was three at all events.

7669. Who else was there ?—I cannot remember.

7670. Yes, you can ?—I cannot.

7671. Oh yes, you can ; come, you are on your oath, you know. You remember who was there ?—Green and Barker.

7672. You stated at first that you gave them to your legal adviser ?—No, that was a mistake.

(*The shorthand writer read the following answer given by the witness :* "The key was in my possession when your officer came on Tuesday night, and at that time he could have got the keys, and we would have given them to him ; but, however, since that we have turned them over to our legal adviser, and I am not certain whether he is in possession of them or not.")

7673. Is it true that you turned them over to your legal adviser ?—I did not.

7674. But you have sworn that you did ?—It is a mistake of mine then. I threw them down and I thought he picked them up.

7675. Was your legal adviser in the room ?—No.

7676. Then what did you mean by saying you turned them over to your legal adviser ?—It was a mistake on my part. I threw them down, and I was given to understand afterwards that our legal adviser had picked them up.

7677. Whom do you mean by your "legal adviser" ?—Mr. Roberts.

7678. And you will swear he was not there at the time ?—Not at the time I threw my keys down.

7679. Who told you he had got them ?—We talked it amongst the others.

7680. This was only last night ?—Yes.

7681. Who told you ?—Green and Barker.

7682. And you did it for the purpose of preventing access being got to the box ?—I threw them down ; but I must tell you that the real truth was because I was vexed that they did not give us the chance of our opening it ourselves.

7683. You would have preferred the box being opened by yourselves ?—Yes, decidedly. I think more credit would attach to ourselves if we had brought the box here ourselves.

7684. And you would have preferred our having the books from you to our getting at them ?—Now that you have got it it does not make any difference to me.

7685. What other boxes have you ; have you any wooden boxes ?—We have five wooden boxes, if my memory serves me right. I will not be certain about there being five, but I think there are five.

7686. Are all the keys gone now ?—Yes.

7687. You have thrown them all away ?—Yes, we are stark naked now.

7688. You have got rid of the keys of the iron safe ; have you got rid of the keys of the wooden boxes also ?—When they had got the boxes safe I could not see that the keys were any use to us, and that was the reason that I threw them down.

7689. Did you have the keys of the wooden boxes ?—No.

7690. Then you have all the keys of the wooden boxes ?—Yes.

7691. How many keys had you ?—Three.

7692. Were two of them belonging to the iron safe, and did the other key open the wooden boxes ?—No.

7693. Had you the key which opened all the other five wooden boxes ?—I had the key which would open five of the wooden boxes, but not the principal one, not until it was given on the night when we had our friend "Tar" there, and then they gave it to me, and said that if he requested it I was to give to him.

7694. Who said that ?—Green and Barker.

7695. You had a key which opened one of the locks of the iron safe ?—Yes, after they gave it to me, but it is not usual for me to have it.

7696. That is one key ; then you had a key which opened four of the wooden boxes ?—Yes.

7697. Then had you afterwards, either by their giving it to you or otherwise, a key which opened the fifth wooden box ?—No.

7698. You had two keys ?—Yes.

7699. One opened one lock of the iron safe, and the other opened four of the wooden boxes ?—Yes.

7700. Who had the key that opened the fifth wooden box ?—Green would have that, I think.

7701. You said that six keys were necessary to open the iron safe ?—Yes.

7702. What did you generally keep in the iron safe ?—Banking books ; I do not know anything else.

7703. Do you keep any money in it ?—Well, sometimes we have 50*l.* or 60*l.* in ; just according to what we have collected on Saturday night to meet funeral expenses.

7704. Merely for the night ?—For the week.

7705. What is there in this iron box now ?—Well, I should think there would be from 6*l.* to 8*l.* in money.

7706. And the banking books ?—And the banking books.

7707. Are there any other books ?—I do not suppose there would be.

7708. What would be in the wooden boxes ?—One of them contains the regalia they are two large flags, Union Jacks.

7709. Are there any fine clothes ?—You might find some if you searched the corner of it I daresay. There are two swords and a wig or two.

7710. Is there anything else ?—No.

7711. Who wears the wig ?—They are old furniture that we have dispensed with for years. I do not suppose that they have been seen.

7712. Who wears them ?—They did formerly in our forefathers' days.

SIXTH DAY.

J. Kershaw.

11 Sept. 1867.

7713. Did they belong to the club so long ago as all that?—Yes, I do not suppose they have been opened these ten years.

7714. What is kept in the other wooden boxes?—Old ledgers, and what we term waste books.

7715. Where do you keep the present books of the society?—We keep them in the biggest box.

7716. The biggest of those wooden boxes; are they there now?—Yes.

7717. You have not taken any away?—Not that I know of.

7718. Is the minute book there?—Yes.

7719. The minute books of your meetings?—For anything I know of.

7720. You are not aware of anything being taken out?—I am not aware of anything being taken out; you know I took office on the 7th.

7721. You have a book I suppose in which you keep the account of your receipts and disbursements?—Yes.

7721*a*. Is that book in the large wooden box?—Yes.

7722. It is not taken away?—It is not taken away that I am aware of.

7723. You have not torn any leaves out?—No.

7724. Nothing of the sort?—No.

7725. How long have you been president?—Since the 7th of this month.

7726. Who was president before?—It would be Lomas.

7727. How long had he been present?—He would be president three months.

7728. We understand that they go out every three months?—Yes.

7729. Who was the secretary before this present man Green?—Barker.

7730. What is his christian name?—I believe it is Robert; I will not be confident, but I think it is.

7731. Do you remember who was president before that?—No, I cannot tell, my memory would not serve me for that.

7732. So you do not care now what becomes of your boxes?—Not at all, if they will bring them back again.

7733. But you do not want to get at the books now at all?—I wish it so far as this, there are two or three books that we shall want on Saturday.

7734. But up to that time you do not care about them?—Up to that time I do not care if they never come back.

7735. And you would just as soon the box should be broken open as not?—Decidedly.

7736. You are aware that notice was given on Monday that if the keys were not produced the box would be broken open?—I saw it in the paper.

The witness withdrew.

Mr. J. Smethurst.

Mr. Joseph Smethurst recalled and further examined.

7737. (*Chairman.*) You were mentioning the night just before Jump's case, when I think you said shots were fired at one of your burners?—Yes. I was saying that the watchman was at the further end of the yard looking at a man who was walking about as if he was on the watch. The watchman was expecting the man to get over the fence to attempt to destroy the bricks when he heard the report at the other end of the yard of the shots that were fired at the burner. He immediately fired (he had firearms, and he was prepared), and the moment the shots went off the other man that he was looking at darted across the railway bridge and he fired after him.

7738. Who fired after whom?—The watchman fired after him, and he made some noise after the watchman had fired, either in pain or defiance or something of that kind. But, however, early in the morning Sergeant Grimshaw, of the county police, and myself went across the bridge, and traced the marks into a black ditch, and the railings adjoining to a garden were soiled by his climbing over the rails. We followed the marks through the garden into a street where Ward lived, and on the latch was the same kind of dirt and similar marks to those we had seen on the garden fence. Sergeant Grimshaw knocked at the door and Ward's wife opened it, and he asked her where Ward was, and I believe she said that he had been away a day or two.

7739. Then you traced the footmarks to Ward's house, or near it, did you?—Yes, and the dirt from the ditch was on the door handle. It was of a bluish colour, and we could tell it as we went along. After that I do not know that we had much more damage done, except some needles thrown into the clay.

7740. When was that?—That was the summer afterwards.

7741. Were you still employing non-union men?—Yes. I may say that at the commencement I thought perhaps they would not interfere with us because ours was not a sale yard: we were simply making them for our own use in building a cotton mill. We thought that it would matter very little to the trade whether we had union men or non-union men.

7742. What do you employ now?—We have not made any bricks this summer.

7743. That was in 1862?—Yes.

7744. What year was it when the needles were put into your clay?—I think it was the year after.

7745. How long did you continue employing non-union men?—Until the latter end of last year. I may just say that a very short time after Ward's wife left the house a woman who was sent in to clean the house found some needles and a bullet-mould.

7746. Where?—Under the sink.

The witness withdrew.

R. Dunning.

Richard Dunning sworn and examined.

7747. (*Mr. Barstow.*) What are you?—A gamekeeper.

7748. In 1862 were you watchman to Joseph Smethurst?—Yes.

7749. Do you remember being on watch in his yard on the 27th of June of that year?—Yes.

7750. That I believe was the night before Constable Jump was murdered?—Yes.

7751. Your attention was called to a man who was on the railway bridge?—Yes.

7752. Whilst watching that man did you hear a report of firearms?—I was watching that man a little and then they went out of my sight; there were two of them. I saw first one man and then two came to the rear of the kiln, and they went away from the rear out of my sight, and I saw one man near the kiln and one came nearer to me, and I saw him shooting at the man that was burning.

7753. There was one man upon the railway bridge?—Yes.

7754. You also saw a man besides the man on the railway bridge?—Yes.

7755. That man came to the rear of the kiln and you saw him shoot at the man who was burning the kiln?—Yes.

7756. What did you do upon that?—The other man was nearer to me, and as soon as the man shot I fired at him.

7757. As soon as the man shot at the man burning the kiln you shot at the man upon the railway bridge?—Yes.

7758. And he ran away?—Yes.

7759. That man who shot at the man burning the kiln ran away?—Yes.

7760. Did you run after him?—No, I ran after the other.

7761. You did not catch him?—No.

7762. You came back, I suppose, from running after him?—Yes.

7763. What did you do then?—I ran and looked round the kiln to see if there were any more in the field, and then I went back and saw the man who was shot. They had him stripped, and were looking at the shot; it went into his back.

7764. What was the name of the man who was shot?—I do not know; the first name was John.

7765. Was it Jones?—Yes, I think it was.

7766. Did you tell Mr. Smethurst?—Yes.

7767. Did you assist him to trace the man who ran away?—As soon as it got light I traced him back from the kiln, away through the field with the ditch, and then I saw a dark stuff on the door of the place I traced him to.

7768. Whose house was it?—It was Ward's house.

The witness withdrew.

Mr. JOHN ROGERS sworn and examined.

Mr. J. Rogers.

7769. (*Mr. Chance.*) Are you a master brickmaker?—Yes.

7770. Where is your brickyard?—It was on Oldham Road. I am not making bricks now for myself.

7771. Were you making bricks in the year 1861?—Yes.

7772. Where were you making bricks then?—On Oldham road.

7773. That is in the Ashton-under-Lyne district?—Yes.

7774. About that time had you any dispute with the union men?—Yes.

7775. What was the nature of the dispute you had with them?—It was a turn out they had for an advance of wages.

7776. They asked you to give higher wages than you consented to give?—Yes, I wanted to divide with them, and they did not seem willing to do so.

7777. Did they strike in consequence of your objecting to pay the demand?—Yes.

7778. Was there any deputation of the union to you upon that subject?—No, they did me no damage, though they attempted to do so.

7779. Did they attempt to do you any damage?—Yes.

7780. How long after the dispute about the wages was it that the attempt was made?—About two months.

7781. About what time in the year 1861 was it?—It was in the year 1861.

7782. About what time in the year 1861 was an attempt made?—The 16th of November.

7783. What was the nature of the attempt made upon you?—A number of men came into the yard on purpose to destroy my property and my bricks, but I had a watchman in the yard.

7784. What was the name of your watchman?—Samuel Newton.

7785. Had he a dog?—Yes.

7786. A small dog or a large dog?—A small dog.

7787. At what time of the night did the men come?—About half-past 1 in the morning; from 1 to half-past 1.

7788. You live near to the brickyard?—Short of half a mile off.

7789. Did you hear anything of the attempt that night?—No, not when I went home; I went home about 1 o'clock.

7790. Did you hear of it the next morning?—Yes, I heard of it before I got in bed; a policeman and the watchman came to me.

7791. When they came to you what did you do?—Then I went with them to look for the parties that we thought had done the depredation.

7792. Did you find anything about them?—No.

7793. Had they destroyed any of your bricks?—No.

7794. Did the watchman Newton tell you what had occurred?—Yes, he told me all about it.

7795. Is he here to-day?—Yes.

7796. Did you ever hear who the men were that stopped the watchman?—No, only by hearsay. I never had any foundation for my belief.

7797. Did you employ non-union men at that time?—Yes.

7798. Had you taken non-union men into your employ because the union men struck?—Yes.

7799. Do you believe that to have been the reason why the attempt was made upon your property?—Yes.

7800. How many non-union men did you employ at that time?—About six.

7801. Was the watchman the only man upon the premises when the attempt was made?—Yes.

7802. Has any injury or attempt at injury been made upon you since then?—No.

7803. Is that the only occasion that you suffered injury either before or after that, and during the term of 10 years?—Yes.

7804. Have any threats been held out to you?—Never since.

7805. Was the watchman much injured?—He got shot in the head.

7806. Where?—In the forehead, and it lodged in the top of the scalp of his skull; they balled him.

7807. Was the ball afterwards abstracted?—Yes, the third day.

7808. Was it a ball or a slug?—A ball and a slug, a ball about half an ounce weight.

7809. Did any men wait upon you as coming from the union about this?—Yes.

7810. Do you know who they were?—Yes, John Ensor was one. I did not know the others. There was one man from Manchester; I do not know his name. There were three of them.

7811. Did they tell you they were sent by the union?—Yes.

7812. How long after their waiting upon you was it that the attempt occurred?—It was as soon as I commenced working with the non-union men; it would be about three weeks afterwards.

7813. (*Chairman.*) Have you shutters to your windows?—Yes.

7814. Did you put them up for fear of damage?—Yes.

7815. Did you consider that your safety required that you should have shutters put up to your windows?—Yes.

7816. Were you warned upon the subject?—Yes, I was warned, and I thought it requisite to protect myself.

7817. And in that way?—In that way.

7818. Were you a contractor for a main sewer?—Yes.

7819. Where was that?—I have been contractor for a main sewer about 14 years.

7820. Is that for some street in Ashton?—Yes, in different streets.

7821. Did you order any bricks for that purpose from anybody?—Yes, that is within these two years.

7822. You ordered some bricks within the last two years from whom?—A man of the name of Pollit, in Guide Bridge.

7823. While you were using them were you waited upon by any deputation?—Yes.

7824. A deputation from whom?—From the Ashton union men, the brickmakers' union.

7825. What did they say to you?—They told me I must not buy any bricks from Mr. Harrison, and if I did I should not get them anywhere else.

7826. Were you buying them from Mr. Harrison?—No.

SIXTH DAY.

Mr. J. Rogers.

11 Sept. 1867.

7827. You had ordered them from Mr. Pollit?—Yes.

7828. They came to warn you against buying them from a person of the name of Harrison?—Yes.

7829. Did they tell you why?—Yes, because he did not employ union men.

7830. Where is Harrison's brickyard; is it near Guide Bridge?—Yes, the other side of Guide Bridge.

7831. In consequence of that information were you put to any inconvenience?—Yes, Mr. Pollit's bricks did not suit me and therefore I had to go to other places.

7832. Mr. Pollit's bricks did not suit you, and you could not go to Mr. Harrison in consequence of this threat?—Yes.

7833. Were Mr. Harrison's bricks cheaper than the others?—Yes.

7834. Where did you go to to get them?—From Mr. Hodgkinson on Oldham Road.

7835. Was it further off?—No, but a much higher price considerably.

7836. That was in consequence of this deputation from the union coming to you?—Yes.

7837. Did you know the people who waited upon you?—No, they were strangers to me.

7838. (*Mr. Barstow.*) Did you continue brick-making after this affair in 1862?—I gave it up in 1861.

7839. You gave up brickmaking in 1861?—Yes.

7840. What made you give it up?—Because they broke me up.

7841. They broke you?—Yes, standing the turn-out. I stood it till I could not stand it any longer, so I was compelled to give it up.

7842. You did not continue to employ union men?—No.

The witness withdrew.

S. Newton.

Samuel Newton sworn and examined.

7843. (*Chairman.*) What are you now?—A watchman.

7844. Are you still watchman for Mr. Rogers?—No.

7845. Were you watchman for Mr. Rogers in 1860?—Yes.

7846. Do you remember where you were as watchman in November 1860?—Yes.

7847. Were you up at night on the 15th or 16th of November?—Yes, both nights.

7848. Were you alone?—Yes, only the dog.

7849. You were in your master's yard?—Yes.

7850. Did you hear anybody come into it?—Between 12 and 1 o'clock I heard someone about the shed. I was inside; they were making an attempt to loosen the boards from the bottom of the shed. I listened something like 10 minutes or a quarter of an hour; I then came out. In going up the end of the shed I came in contact with a man, and I asked him what he was doing there.

7851. Had you a lamp?—Yes, I put my lamp in his face close to his face, close in his eyes. I asked him what he was doing there. I told him there was no road, he might get into the brick pits or something of that. He made no reply but fired at me.

7852. When you were so close to him?—When I was so close; the shot went past the left side of my head. I then stepped back.

7853. It went past the left side of your head?—Yes.

7854. Did it not hit you?—No. I said, "This is nice work shooting at a man and not speaking to him." I then stepped back and drew a pistol out of my pocket which was loaded with an intent to fire at him. I saw another man springing up from the back of the shed, and as my pistol went off the other fired and hit me.

7855. Where did it hit you?—In the head; a ball entered here and a slug, and Drs. Vernon and Hunt took them out a few days after.

7856. A ball and a slug?—Yes.

7857. How long were you under medical treatment—I daresay although it was somewhere about 11 weeks before they would consider I was fit for work.

7858. You have mentioned these two persons who fired at you; did you see any other person about?—Four ran out of the yard as I was knocked down. I sprung to my feet and followed, and I saw four men running, but the two that fired had their faces either blackened or they had masks on.

7859. You had no personal quarrel with anybody?—No, not at all.

7860. Do you know of any other reason except that which your master has just given, namely, that he employed non-union men?—That was all.

7861. There was no other reason that you know of?—No, not at all.

7862. How many non-union men had he at that time working for him?—Five or six I should say.

7863. Do you remember meeting a body of men on the road?—As I was coming to my work the night before a man came up to me whom I took to be a collier going to the coal-pit, and he said, "You are going to your work I see," I said, "Yes," and he said, "You had better stop at home," I said, "What for?" he said, "Something might happen to you."

7864. That warning was given to you the night before?—Yes.

7865. Did you go back and serve Mr. Rogers after you got well?—No.

7866. (*Mr. Chance.*) You were not running away when the shot was fired?—No, I was not; I did not run away till after I was shot, and I followed the men out of the yard.

The witness withdrew.

Mr. W. H. Wylde.

Mr. William Henry Wylde sworn and examined.

7867. (*Mr. Barstow.*) Are you a master brickmaker?—I am not in the business just now.

7868. In February 1861 were you a master brickmaker?—Yes.

7869. Where were you carrying on your business?—At Turner Lane, Ashton-under-Lyne.

7870. At that time had you a dispute with the union?—Yes, they struck for an advance of wages.

7871. In consequence of that did you employ non-union men?—Yes.

7872. Some time after you employed non-union men did you find anything done to your clay?—There were needles and broken glass put in.

7873. You found that needles and broken glass had been put into your clay?—Yes, in February 1861.

7874. Had you in your employ a man named Moorehouse?—Yes.

7875. In what capacity was he in your employment?—He was what they call a waller, he walled the bricks that were made in the shed.

7876. Do you remember anything happening to him?—Yes, he was badly beaten one morning.

7877. Do you remember about what time?—Between 2 and 3 in the morning.

7878. I mean what time in the year?—It was the 19th of February 1861.

7879. I believe Moorehouse is not in this country now?—I have not seen him for some time.

7880. Did you see him after he was beaten?—Yes.

7881. Can you describe the injuries?—He seemed to be severely cut about the head, and he was bleeding very much when I went out in the morning. One of the workmen came to the house between 7 and 8 in the morning and told us that some of our men were hurt. I went out and saw him, and asked him how it occurred. He said that he was in the shed, and four or five men with their faces blackened came about the

place and knocked at the shed door, and he heard a noise, and he went to the door and said, "Who is that?" He said, "Is it you, Ned?" meaning the watchman, and one of them said, "Yes." As soon as he opened the door he fired a pistol, I believe, but it missed fire, and then he believes he struck him on the head with it?

7882. Was that all?—He struggled and got away, and they fired at him as he was running away.

7883. Did they come up with him?—No.

7884. He got away?—He got away.

7885. According to that the only blow in the head that he had was the one that he got with the pistol?—He had several cuts on his head.

7886. Was that the only time that he was assaulted whilst in your service?—Yes.

7887. Had you received any warning before, that these needles were to be put into your clay?—No, I had not been threatened; they had called upon me a time or two, union men had called upon me.

7888. When they called upon you they never threatened anything of this kind?—No.

7889. You had not been threatened at all?—No.

7890. You have now given up business?—Yes.

7891. When did you give up business?—Nearly four years ago.

7892. Was the reason that you gave up business anything to do with the trades union outrages?—Yes.

7893. Just tell us what it was?—I was tired of it; it got to that pitch that nothing could be done with it.

7894. Had you any malicious damage done to your property after this time?—No.

7895. In what respect were you injured?—After it settled down, of course the union men came back again.

7896. The union men came back again?—Yes, five or six months after that.

7897. What am I to understand; that you sent away union men?—They either left on their own account, or were enticed away by the union men.

7898. You had no trouble with the union after the union men came back again?—No.

7899. No damage being done to your property?—None.

The witness withdrew.

Joseph Bamforth sworn and examined.

7900. (*Mr. Chance.*) Are you an inspector of police?—I am.

7901. Where are you stationed?—In Ashton-under-Lyne borough.

7902. Were you stationed there in the year 1861?—Yes, I was.

7903. Do you know a brickyard belonging to the last witness, Mr. Wylde?—I do.

7904. You remember the night of the outrage in September 1861?—Yes.

7905. How far from his brickyard were you on duty?—I was not in charge of the borough during that night, but he came down and reported the circumstances next morning.

7906. But how far from that brickyard were you on duty that night?—I was not on duty that night.

7907. You heard of it next morning?—Yes.

7908. At what time the next morning did you hear of it?—At 29 minutes past 9.

7909. On hearing of it did you go to Mr. Wylde's brickyard?—I did.

7910. Did you make an examination of his clay?—Yes.

7911. What did you find there?—I found a large quantity of needles which had been mixed with the clay; they appeared to have bored holes and filled the holes with a large quantity of needles.

7912. Did you find anything else?—I received a pistol the next day or so.

7913. Was that a horse-pistol?—Yes.

7914. Whom did you get it from?—I do not remember his name.

7915. A man of the name of Bottrell?—Yes.

7916. Who is he?—A factory operative; he is since dead.

7917. When did you receive the pistol?—Two days after; he had had it some time.

7918. Where did he give it to you?—At the town hall.

7919. Did he tell you where he found it?—He did.

7920. Where?—Three quarters of a mile from this place at least.

7921. There was no peculiarity about the pistol? No, there was not. He found it three quarters of a mile from Wylde's brickyard.

7922. Did you find also any papers containing needles?—This person also produced to me some papers similar to those that I found amongst the clay at Wylde's brickyard.

7923. Did they contain needles?—They were only papers.

7924. Had you an opportunity of examining the needles to see what kind of needles they were?—Yes.

7925. Were they damaged needles?—They appeared to be waste or damaged needles, unfit for sale, those that I saw.

7926. How many did you find there?—I should think there would be half a bucket full.

7927. It was a very large quantity?—Yes, a very large quantity.

7928. Did you hear at all who committed the damage?—We did not hear who had done it. I suspected who had done it and inquiries were made, but nothing resulted from it.

7929. Nobody was apprehended?—Nobody was apprehended.

7930. Did you see the person that you suspected?—The brickmakers' union men generally were suspected.

7931. The brickmakers of Ashton-under-Lyne?—Yes.

7932. But you did not apprehend anybody upon suspicion for that affair?—No, not for that affair.

The witness withdrew.

Mr. John Kirk sworn and examined.

7933. (*Chairman.*) Are you a brickmaker?—I have been a brickmaker.

7934. Were you so in 1861?—Yes.

7935. In January 1861 do you remember an attempt being made to blow up your house?—Yes.

7936. How was it done?—It was done by throwing bottles through the window.

7937. How many bottles were thrown, do you remember?—Yes; there were two glass bottles with corks in, and the third was a stone bottle with a fuse in the top; the fourth came in contact with the window and burst. I heard it, and I got up then.

7938. How many bottles came into the house?—Three.

7939. Which room did they go into?—The front chamber.

7940. Were you sleeping there?—I was sleeping in the back chamber.

7941. Was there any one sleeping in the chamber into which the bottles were thrown?—Yes, my father-in-law, a man 82 years of age.

7942. He was sleeping in that room into which the bottles were thrown?—Yes, and a sister-in-law was also sleeping there, and my wife and I were in the adjoining room.

7943. How many bottles were thrown into that room where your father-in-law was sleeping?—Three.

7944. Did they go off?—There were three bottles

SIXTH DAY.
Mr. J. Kirk.
11 Sept. 1867.

of naphtha spilled on the floor, and the one that had powder in it did not go off, because the fuse was not lighted. The fourth bottle that was sent came in contact with the window frame and burst outside, but it filled the room with smoke.

7945. Did the third bottle which had a fuse which was not lighted appear to have been lighted, but to have gone out?—I think it had not been lighted.

7946. You think so, you are not sure?—I gave it up when the policeman came to me.

7947. Which policeman was that, Bamforth?—Yes, that was the man.

7948. Did the naphtha get spilled about the floor?—Yes, and fragments of bottles were all over the room.

7949. The naphtha was spilled about the floor, and one came against the window?—Yes.

7950. Was it in the middle of the night that this happened?—It was a little after 1 o'clock.

7951. Had you at that time any non-union men working for you?—Yes.

7952. Do you know of any other reason why damage should be done to you, except that?—No, I never had any threats given.

7953. Had you also union men working with you?—No.

7954. How many non-union men had you at that time?—I had five or six men working with me at the time.

7955. In consequence of that did you discharge the men or alter your mode of business?—No, I let them go on.

7956. Did you ever again have any attempt made to do any other damage to you?—Yes.

7957. When?—In the following April.

7958. What was that?—Needles were put into my clay.

7959. In how many places were the needles put?—They were put into what was tempered and ready for going to the mill, and that which was put up ready to be tempered.

7960. Did that spoil the working of it; how did they manage?—We peeled about an inch off it, and picked as many out of it as we could do besides, in order that they might make it.

7961. Can you at all say how many needles had been put in, were there many thousands?—Thousands were put in, there was a man gathered a pint. I do not know how many there was in it, I did not count them.

7962. Did you see whether they were refuse needles?—Yes, they were needles that were without eyes, a sort of waste needles.

7963. Have you had any more damage done to you besides that which you have mentioned?—No, nor never had any intimidation.

7964. Do you know the nearest place where needles of that sort can be got?—No, I do not. I know nothing about it, I never looked after such things as those.

7965. You do not know, you have not heard, the nearest place where such needles as that can be procured?—No, I never heard anything of that sort.

7966. (*Mr. Chance.*) I suppose needles in large quantities like that must be obtained from some manufactory?—Yes, I suppose so.

7967. Is there any manufacturer of needles anywhere in that neighbourhood?—No, there is none nearer than Sheffield; there is no manufacturer about me.

7968. Nor in Manchester?—I do not know anything of Manchester.

7969. Do you know whether there are any needle manufacturers at Sheffield?—I have heard them say so.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

SEVENTH DAY.

Assize Courts, Manchester, Thursday, 12th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C.	GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq.	JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

SEVENTH DAY.
W. Tetlow.
12 Sept. 1867.

WILLIAM TETLOW sworn and examined.

7970. (*Mr. Chance.*) Are you a brickmaker?—A brickmaker; my father is the master, and he puts me in to look after the business.

7971. Are you living at Hurst?—Yes.

7972. Is that near Ashton-under-Lyne?—It is within half a mile of it.

7973. Is it within the district of the Ashton-under-Lyne union?—No; it is out of the district of the borough.

7974. In whose service were you in the year 1861?—I was in my father's service.

7975. Is your father a brickmaker?—Yes.

7976. And you were in his service as a brickmaker?—He puts me in to look after the business, you know. He is a good age, the old fellow; he is 73 or 74 years old.

7977. Do you reside at Hurst?—Yes.

7978. And you reside near your father's brickyard?—Well, within 200 or 300 yards.

7979. Are you a member of the Ashton-under-Lyne union?—No.

7980. Have you ever been a member of that union?—Well, it is some time since; it was before ever we had a brickyard.

7981. How long is it since you were a member?—Happen 20 years, or somewhere thereabouts.

7982. You have ceased to be a member you say for 20 years?—I mean to say it is 20 years since I was a member.

7983. And why did you cease to be a member?—It is 20 years since I left, before ever we had a brickyard.

7984. But you say you were a member once?—Yes.

7985. Why did you give it up?—Because my father had been a brickmaster before, and they would not take him into the union because he was getting an aged chap.

7986. Is that the reason that you gave up being a member of the union?—Yes; we have had union men working with us since we started, and we have had non-union men.

7987. At one time I suppose you paid to the union?—Yes, it is 21 years ago.

7988. And then you gave up paying?—I gave up paying because they ill-used me.

7989. That was what I wanted to know. In the year 1861 you were not a member of the union, were you?—No.

7990. About that time did your father have any men turn out for the 2*s.* a thousand, for the masters' dispute with the union?—Well, no more than two attended a meeting, and the men had meetings, and it was agreed on that they would give them 1*s.* 10*d.* if they would take it; they objected to taking it, and still they all agreed to give it, and so one gave it, and another gave it; and when we started the club men were a bit awkward with us. We said we would give what the brickyards on either side of us gave.

7991. Were some of them union men who were working with your father?—They were working before this, but still they never came after.

7992. Were they members of the Ashton union?—Before this they were.

7993. Were the men you are speaking of members of the Ashton union?—No, not afterwards I believe.

7994. Your father had men working with him, had he not?—Yes.

7995. Were those men that worked with him members of the Ashton brickmakers' union?—No.

7996. Were they members of any union?—I believe one of them had been at Sheffield, that was tempering for me, according to what he told me.

7997. Were all the men who were working with your father non-union men?—Non-union men, but one of them had been a union man awhile since, according to what he told me.

7998. Who was that?—I cannot rightly tell you his name, the secretary can tell you more about him than I can; that is Harrison.

7999. Then you say that they wanted an advance of wages?—Yes.

8000. Did your father agree to give them the advance?—My father agreed to give them 1*s.* 10*d.* the same as the others.

8001. Did they accept that?—No.

8002. They refused it?—They refused it.

8003. Upon refusing did they strike work?—To be sure; they never started at work. We had to ask anybody we could get on.

8004. Then what was done after their striking work?—Some needles were put in the clay.

8005. How long after they struck work were the needles put in the clay?—I cannot rightly speak how long they were, but I can tell you about the time.

8006. When was it?—In 1861, I believe.

8007. About what time in the year?—Some time in May, I believe.

8008. Were there a great many needles put in the clay?—About 100,000.

8009. Do you know who did that?—I do not know who did it, only I expect the brick chaps had done it, you know.

8010. Do you remember some bottles being thrown into your house once?—Yes.

8011. When was that?—Well, I am no scholar, you must bear in mind, but I have a note here that will tell me.

8012. Then look at your note and tell me?—I cannot tell when I look at it.

8013. How long was it after the needles were put into the clay that the bottles were put into the house?—I cannot rightly tell. Father gave me this note to come here.

8014. You told us that needles were put into the clay somewhere about 1861?—Yes.

8015. Was it about the same time that the bottles were thrown into the house?—Well, it was after the needles were put in.

8016. When?—I cannot rightly say.

8017. Would it be about the same time?—I believe it would, but I cannot rightly be sure.

8018. Was it some months afterwards?—It was many months afterwards I should say, but I cannot rightly speak.

8019. Had the non-union men been working for your father after the needles had been put into the clay?—No.

8020. Then had not your father any men to work for him then?—We had it mostly amongst ourselves, we agreed that we would do as much as we could amongst ourselves just to keep quietness.

8021. Whom do you mean by yourselves?—My father, myself, and a cousin of mine, and a chap as wed my wife's sister.

8022. You did the work amongst yourselves?—Yes, as much as we could do.

8023. Did your father advise you to take any union men?—I told him we did not care whether they were union men or what they were, if we gave them the price that was right.

8024. But did you offer to take any union men?—We offered to take them, but none of them came near us.

8025. Why?—I will show you the difference now between the union men and the others. In winter time, when there is little business, if you are employing club men, they want their share of the work, wheelers and temperers, and you cannot pay them their wages because you cannot do work regularly in the winter time. If we employed them in the summer time they would look for their work in the winter time when I could work myself.

8026. Then you have not sufficient work in the winter time to give them?—No.

8027. Is that the reason why you would not employ the union men?—Yes, it was as much that as anything. We have not made 100,000 this summer. My father does not care, nor do I care what sort they are; we only want to get a living out of this brickyard.

8028. Quite right; but, as a fact, did you or did you not employ union men at this time?—No.

8029. For the reason you have just given us?—Yes.

8030. But have union men ever applied to you?—I have offered Isaac Scholefield happen three months, or something like that. He was talking to me, and I told him he could come to his work and I would give him the same price as anybody else.

8031. Did he refuse to come?—He started talking about some clay, and I said any extra work I would pay him for.

8032. Now come to the time when those bottles were thrown into your house; was that at night-time?—It was on Monday morning about 1 o'clock as near as I can think.

8033. Who was living in the house at the time?—There were only me and my wife.

8034. And no children?—No children.

8035. There was nobody except you two?—Nobody near, except next door.

8036. Now tell us what happened?—I heard something about these here bottles. They bottled Kirk, I believe before, and the first bottle that ever came through the window I was frightened, and my wife said to me, "These brickmen are throwing bottles at the window!" I said, "Oh, never heed them, it is all nonsense." Some were thrown, I believe, through the house window first, and then they threw some through the chamber window.

8037. What do you mean by the house window; do you mean the window below?—Yes.

8038. Where does that lead into?—It leads into the back room.

8039. What was there in the room into which that bottle was thrown?—I was keeping a beer shop, and there were glasses and all sorts of things in the bottom, you know.

8040. Was there furniture?—Yes, and tables and chairs and pictures, the same as any other house.

8041. A sofa?—Yes.

8042. And things that might be set on fire?—Yes.

8043. How many bottles were thrown into that room?—Well I cannot rightly speak, I daresay there were three, or four, or five bottles thrown into that room.

8044. Did you find next morning what bottles had been thrown into that room?—I found as soon as I got up that I could not get downstairs for smoke and this like.

SEVENTH DAY.

W. Tellow.

12 Sept. 1867.

8045. What bottles did you find there?—I found the top of an empty bottle.

8046. Could you tell what it had contained?—I could not tell.

8047. Was there any smell about it?—To be sure there was.

8048. What did it smell of?—It smelt of naphtha and powder, and one thing and another.

8049. I am speaking now of the bottle that was thrown into the room underneath?—I found a bottle neck; they were broken.

8050. But still you could tell that naphtha had been in the bottle?—Yes.

8051. Was there more than one bottle thrown into that room?—Yes.

8052. How many bottles were thrown into that room?—Three, I should say. I could not take notice how many. I had not presence of mind.

8053. One of the bottles you say smelt of naphtha?—Yes.

8054. Were the other bottles broken or whole?—The bottles were broken, because you know there was fuse put to them, and it was all in a flame.

8055. Was it one of the bottles that you found in the room underneath?—Yes, but you know it was all of a flame when we came downstairs; it started us out.

8056. What kind of bottle was it that you found there?—A bottle neck.

8057. Then how many bottles were thrown into the bedroom?—Well, I should say there were two parts of bottles. They did not go inside, they caught the window frame, and the fuse was outside, and the bottle was outside, and all the remainder of the stuff went inside.

8058. Inside the room?—Yes.

8059. Did not the bottle explode in the room?—Not in the chamber.

8060. It exploded outside?—The bottle which exploded exploded in the bottom room.

8061. But I am speaking now of the bedroom. I want to know if either of the bottles thrown in there exploded in the room?—No.

8062. Did you hear them explode outside?—I heard them explode inside the bottom room.

8063. We will leave the bottom room for a moment. I want to know whether you heard any bottles explode in the bedroom?—No, if they had done we should have been all a-fire.

8064. I only want to know what the fact was. Do you know how many bottles were thrown at the window?—One or two were thrown at the bedroom.

8065. Did they strike the window or did they strike the window sill?—They struck the window frame, you know.

8066. Then did you find the bottles next morning underneath the window?—There were plenty of bottle necks picked up.

8067. Did you find anything in the shape of nails or anything of that kind about?—We found something in the shape of a piece of iron and all sorts of stuff; the policeman picked two or three things up that he said he would put on one side.

8068. Was the floor of the lower room wood or brick?—It would be flag.

8069. If the bottle of naphtha had taken fire in the lower room, would it have set the house on fire?—It did take fire.

8070. Then did it burn anything in the lower room?—It burnt, the naphtha, and it set the window blinds on fire a little bit; there were good stiff strong window blinds, and they would not let the bottle go so far, and it dropped down below, but it was a job to get it out, I can tell you; it was just alongside; there were pictures broken with the explosion on either side of the house, and glasses and gill glasses and all were broken.

8071. How much damage do you suppose was done altogether in that room?—I mean to say, speaking within bounds, and taking the repairing windows and one thing and another, and after we had window shutters inside, so that they could not send them in (we had five shutters), it cost many a pound for shutters and one thing and another.

8072. But that was all the damage done to that room?—To that room; if it had exploded upstairs, as this had exploded below, it would have done more damage.

8073. Was the window of your bedroom broken?—To be sure, all the framing was broken; I had to have a joiner and glazier for a good bit, and then I had to have window-shutters put.

8074. (*Chairman.*) Have you, since this time, been threatened at all?—They threatened me and ill-used me shameful.

8075. Since those bottles were thrown into your window, have you been threatened?—We have had some bricks spoiled since then.

8076. How long afterwards was it that your bricks were spoiled?—It may have happened four or five times.

8077. Since that time?—Well, not since that time, but twice since that time, since Jump was shot.

8078. Since that poor man was murdered you have had your bricks spoiled?—Yes.

8079. And how often before have your bricks been spoiled?—Three or four times the bricks have been spoiled, or four or five different times; I cannot speak exactly.

8080. Did they spoil all they could each time they came?—One time they spoiled upwards of 20,000.

8081. At other times did they spoil pretty well all they conld?—They came on purpose.

8082. No doubt they did, but did they spoil all they could?—Yes, they did.

8083. Have you been threatened besides?—Yes.

8084. Who threatened you?—They threatened me when there has been a company concerned, and they have shouted out and ill-used me shameful.

8085. Who shouted out?—Well, I cannot rightly speak, to speak the truth, who they were, because they have done it when there have been bodies of men standing in the street.

8086. What have they shouted out?—Well, "knob-stick," and one thing and another.

8087. They called you "knob-stick," did they?—Yes.

8088. Then you say you have been ill-used?—To be sure I have been ill-used in our brickyard when we took it this last time. We have had this brickyard 16 or 17 years, and Tom George has taken part of this brickyard that we have been paying for. There was some bother about the water and so they put some water in, and they ill-used me terribly.

8089. But I want to know when it was you were ill-used?—Well, it was this summer that they ill-used me.

8090. Now just attend to the question. Where were you when you were ill-used?—There has been some disturbance over this water, as you can see yourself.

8091. Never mind that. Where were you when you were ill-used?—I was ill-used in the brickyard.

8092. Was that last summer?—This summer.

8093. How many men were there who ill-used you?—Timothy Burns ill-used me, but he pretended it was only about the water.

8094. Who else were there when you were ill-used? My wife was there.

8095. But what other man was there helping to ill-use you?—Henry Watson.

8096. Just tell me what they did to you?—They cut my lip till I had to go to the doctor.

8097. What did they cut it with?—With their fists.

8098. Which was the one that hit you with his fist?—Burns.

8099. Watson was by at the time?—Watson came and asked me about this water. I said, "It is our water," and he said that Tom George said he could not have a bloody drop of water out of that pit; he talked like that, you know.

8100. Was it because you had taken the water that they ill-used you?—They had been always doing it so that I could hardly go down the street for them.

8101. Are Watson and Burns union men?—Yes, I

expect so, but they will not tell me anything about it, you know.

8102. Besides hitting you on the face, what else did they do ?—They did all they could do.

8103. What else did they do besides hitting you on the face ?—At first Watson came and said, "What are you taking their water for," and I said, "Well, I have authority to take it," and he sprung on to me and Burns came up. The two of them came up together you see, and he sprung on to me.

8104. Who sprung on to you ?—Watson, and he thought of getting me into the water. He tried to get me into the water, I expect to drown me, or something. I cannot tell any different from that.

8105. Was the water deep ?—It was not so deep, but I was down and he being above me he would have overpowered me.

8106. Did you fall into the water ?—No, they put me down as near as they could. They put me into the water.

8107. Which part of your body did they put into the water ?—My legs and my body were in the water.

8108. When you were in the water what did they do ?—Watson thought he could master me, but instead of that I got the upper hand of him, and with that he shouted out for Burns to help him, so when Burns came he showed no mercy I can tell you.

8109. What did he do ? He hit you on the lip you have told us. What else did he do ?—He knocked all my teeth loose.

8110. Had they either of them any sticks ?—No.

8111. What else did he do ?—I believe they would have ill-used me worse, but my wife started talking to him, and Burns said he would throw her into the pit. He nipped hold of her to throw her into the pit.

8112. Did he hit her ?—No.

8113. What else did they do ? Did you call out anything ?—I did not.

8114. Did they say anything more that if you went on employing non-union men you would lose your life, or anything of that sort ?—They said this : Watson told it in a public-house outside where I lived, at the "Seven Stars," according to what I have been told, that they would take my life before the summer was out.

8115. Did you understand the reason to be that you were not employing union men ?—I did understand it to be for not employing union men.

8116. You were not employing union men ?—No.

8117. And do you consider now that you are in great danger from the union men because you are not employing union men ?—Yes ; I offered Isaac Scholefield some weeks ago to come, and we would pay him the same price ; we did not want anything different, only we wanted a bit of work in the winter time. We want to get a bit of a living out of it ; that is all we want.

8118. Have you yourself been ill-used any time except this time you have mentioned ?—I have been regularly shouted at when I have gone out, so that I am afraid to go down the street.

8119. You say you have not been beaten at another time than this one occasion which you have mentioned ?—No.

The witness withdrew.

TIMOTHY BURNS sworn and examined.

T. Burns.

8120. (*Chairman.*) What are you ? — I am a temperer at present.

8121. Have you been so long ?—Yes.

8122. For whom do you work ?—I work for Thomas George.

8123. Is he a master brickmaker ?—He is.

8124. How long have you worked for him ? — I have worked for him about three months.

8125. Are you a member of a union ?—Yes.

8126. Which union ?—The Ashton union.

8127. Have you been so long ?—Yes.

8128. Did you attend their meetings pretty regularly ?—Yes.

8129. I wish to tell you that if you make a full and true disclosure of all you know, of whatever kind or nature it may be, you will be entitled to have, and you certainly will have, from us an indemnity against any sort of proceedings of any kind whatever for anything you may have done ; but it is expressly on the condition of your making a full and true disclosure that such indemnity will be given. I do not say that you have done such things, but it is right for your own sake that you should know it. You say that you have been a union man for some time ?—For 17 or 18 years.

8130. Does your master, Mr. George, employ only union men ?—Yes, he employs all union men.

8131. It is one of the rules of your union to look after those people who employ non-union men, is it not ?—Yes.

8132. If any master is employing non-union men, I suppose it is a matter of discussion at your meetings ? —Yes.

8133. And there are men regularly set to work to go round and gauge the bricks, and see what masters are at work, and what men they employ ?—Yes.

8134. And that has been so ever since you have been a member ?—Yes.

8135. And during that time you have known frequent disturbances of course about matters of this description ?—Yes.

8136. And you have been acquainted, I suppose, of many outrages, or have heard of them, at all events ?—I have heard of them.

8137. And discussions about them have taken place of course at the general meetings ?—Yes.

8138. We have just been told about some dispute which took place between you and Tetlow ?—Yes.

8139. We understood that there was some dispute about taking water from a pit ?—Yes.

8140. Was that pit between you, adjoining his land, or your master's, or how was it ?—Well, as far as I could learn, after what took place, the pit belonged to Tetlow, but he allowed our master water out of it on conditions that we filled it again, but we were not aware of that.

8141. We will come to that presently ; but the pit belonged to Tetlow, and he allowed your master, whose name was George, to take water out of it upon condition that he filled it again ?—Yes.

8142. You were at that time working for George ? —Yes.

8143. And was Watson working for him ?—Yes.

8144. I suppose there was not a very good feeling between you and Tetlow. He employed non-union men ?—No, there never was any dispute between me and Tetlow or his father either.

8145. But generally speaking he was not looked upon very favourably by you because he employed non-union men ?—Perhaps that might be.

8146. Do you remember any outrage which took place at his house of throwing bottles in ?—I have heard speak of it.

8147. Was this disturbance between you and him about this water after or before that outrage ?—After that ; this is lately.

8148. We understand that it was this very summer ? —Yes.

8149. Do you remember that outrage being discussed at your meeting ?—No.

8150. You were not present ?—No.

8151. Then there was this dispute about the water ; that was this summer you say ?—Yes.

8152. Were you present when the dispute began ? —Yes.

8153. How did it begin ?—Well, there was a man came and called me out of the clay-hole to go and stop Tetlow from taking this water. Our understanding was that the water belonged to us ; we were only new

SEVENTH DAY.

T. Burns.

12 Sept. 1867.

on the job you know, so we went up. This Watson went first and I followed him, and Tetlow was cutting a grip to let the water off. Had he let it off, it would not have run to us and we should have had to stop that evening. It was Friday evening. Watson went to him and I heard him saying, "You must not take this water, Tetlow." Tetlow made answer and said, "What have you got to do with it?" and they began fighting.

8154. Was Mrs. Tetlow there?—Mrs. Tetlow was not there when they commenced, but I was, and this Watson had got Tetlow down on his back.

8155. In the water?—In the grip which he had cut to let the water off.

8156. But it was full of water I suppose?—There was some water in it; they were struggling in it, and this Watson was a cripple.

8157. Was Tetlow undermost?—Tetlow was undermost in the water.

8158. And Watson on the top of him?—And Watson on the top of him, and Watson could not hold him, and Tetlow was struggling with him, and he put his arm round his neck and was warding him over into the pit.

8159. Did you mean to say that he would have pushed him into the pit?—Tetlow was undermost and he brought his arm over him, and he would have gone into the pit, and he shouted to me and I loosed his arm; then Tetlow's wife came up and asked me if I was going to murder her husband and I said,—No, I was only going to part the men. So with that she hit me in the face twice.

8160. Did she box your ears?—Yes.

8161. She said, "Are you going to murder my husband?" and boxed your ears?—Yes.

8162. You are a big man; what did you do?—I got hold of her by the arm and shoved her on one side; I did not hit her.

8163. And having got your arm free by having got rid of her, what did you do with it?—I did nothing. These men got up, and Tetlow said he would strike me in spite of every one who was in the yard, and with that he came round the rail, and he came round to strike me and then I struck him.

8164. With your fist?—Yes.

8165. Where did you strike him?—On the face.

8166. Did it make him bleed?—Yes.

8167. And after that what more did you do?—Well I hit him twice with my fist.

8168. Both times in the face?—Yes, and I gave him a kick in the backside when he was going.

8169. And what else did you do?—That was all.

8170. And what did Watson do?—Watson did nothing after.

8171. Did you do nothing after?—No.

8172. Did you go back to your work?—Yes.

8173. And is that the only quarrel you ever had with Tetlow?—That is the only quarrel that I ever had with him.

8174. At that time?—At that time, or any other time.

8175. Did you ever call him a "knobstick"?—Never.

8176. Have you ever heard him called so?—I do not know that I could say I never called him a "knobstick."

8177. But you have heard him called so?—Yes, I have heard other men saying that he was a "knobstick."

8178. And have you heard other men speak of him or threaten him in any way?—No.

8179. Have you heard Watson do so?—No.

8180. That you will swear, will you?—Yes.

8181. When a man is called a "knobstick" is he not in danger of being attacked?—I do not know.

8182. Have you ever known people who were called "knobsticks" attacked in any way?—No, I have not seen it.

8183. But you have known of it?—Yes, I have heard about it.

8184. "Knobsticks" are generally thrashed, are they not?—Well, sometimes they are.

8185. And you have heard him called so often?—Yes, I have heard men saying that he employed "knobstick" men.

8186. Have you ever been concerned in any outrage?—Never in my life. I never believed in it, and consequently I was no use to it, and I was never solicited for anything of the sort.

8187. You say you never believed in it; do you mean that you never believed in the effect of it?—No I never believed in spoiling property, or in any outrage whatever.

8188. You never believed that it did any good?—I never did.

8189. (*Mr. Chance.*) You say you never believed in outrages, but you know that outrages have taken place?—Yes, I have heard of them taking place.

8190. You have heard of them in connexion with your union?—Yes.

8191. You know pretty well that they have taken place?—Yes, but I never had any hand in them, and never was asked to.

8192. Were there any other men besides you three there when you and Tetlow and Watson began to quarrel?—No, there were other people watching.

8193. And did you not know at that time that it was Tetlow's water?—No, it was a misunderstanding.

8194. Had you not been told from time to time that it was his water, and that he let Mr. George have it?—No, they never spoke to me at all about it. I had only been there nine days,

8195. But had not Mr. George told you that it belonged to Tetlow?—No, he told me afterwards that he was very sorry it took place.

8196. You are a bigger man than Tetlow?—Yes.

8197. But do you not think it rather a cowardly thing to strike an old man like that?—He struck at me first.

8198. There were two of you against him?—The other man was a cripple, and he could do nothing against him.

8199. He got him down in the water at any rate?—Yes.

The witness withdrew.

H. Watson.

HENRY WATSON sworn and examined.

8200. (*Mr. Barstow.*) Are you a member of the Ashton brickmakers' union?—I have been.

8201. Are you so now?—No.

8202. Are you a brickmaker now?—No.

8203. As long as you continued to be a brickmaker were you a member of the union?—Yes.

8204. Were you working for Mr. George?—Yes.

8205. That is the next yard to Tetlow's?—Yes.

8206. Do you remember Tetlow cutting a grip to a pit of water?—Yes.

8207. What did you do?—Well, we were both using this pit at the time in both yards.

8208. But I ask you what you did to Tetlow?—I did nothing until he hit me first, and then I hit him back.

8209. This took place in his yard I understand?—No, it was in our yard. The pit was not in his yard at all.

8210. It was his water at any rate?—Our master told us it was our water, and he was letting it off for spite.

8211. What did you do to Tetlow, you went up to him I suppose?—Yes, I asked him what he was letting the water away for spite for.

8212. What did you say to him?—I said that, I never said anything but that.

8213. What words did you use to him?—I said,

" William, what are you letting that water run away " for spite for ?"

8214. What did he say to that?—He said it was his water, and he would do what he had a mind with it.

8215. What did you do then ?—I did nothing, I said, "You must not let it run away for spite, never " mind whose water it is."

8216. Do you mean to say that you did not take hold of him ?—No, not till he took hold of me, he struck me first.

8217. With what did he strike you ?—With his fist.

8218. Where did he strike you ?—He struck me in the mouth.

8219. What did you do upon that ?—I struck him back.

8220. Did you close together ?—Yes.

8221. Did you both come down—Yes.

8222. Which was undermost ?—Him.

8223. You got him down undermost ?—Yes, he fell first.

8224. He is a very much older man than you, is he not ?—I do not suppose he is any older.

8225. He looks much older ?—I am 40, and I do not suppose he is much older.

8226. You had him down undermost, and what happened then ?—Then we got parted.

8227. But what did you do with him when you got him down ?—I never hit him while he was down, I held him down as well as I could.

8228. And you kept him down ?—Yes, until we were parted ; he would have done the same with me if he had got the sense.

8229. Then did some one else come up to you ?—Yes, they came up.

8230. Burns came up to you ?—Yes.

8231. What did he do?—He challenged Burns out and called him——

8232. What did Burns do ?—Burns did nothing till he challenged Burns.

8233. Do you mean to say that while Tetlow was under you he challenged Burns to fight ?—No.

8234. What did Burns do ?—He parted us.

8235. How did he part you ?—He pulled me off him.

8236. What did Burns do then ?—Burns did nothing; he called Burns out of his name for his country for one thing.

8237. Then Tetlow was down on the ground, and Burns was standing by the side of him I suppose ?—He was on the top when he challenged Burns ; it is about four or five feet off the road, down to where the grip was.

8238. But you told us just now that Burns took you off Tetlow ?—Yes, down the grip.

8239. Then I suppose Tetlow was down on the ground ?—Yes.

8240. Was it then that he challenged Burns ?—No.

8241. Was it after he got up that he challenged Burns ?—Yes.

8242. Did you see Burns strike him ?—Yes, I did.

8243. How often did he strike him ?—Only once to my knowledge.

8244. You will swear that he only struck him once ?—That is all to my knowledge.

8245. Will you swear that Burns did not strike him when he was on the ground ?—Yes.

8246. And he did not kick him when he was on the ground ?—Never.

8247. How long have you known Tetlow ?—20 years.

8248. We know that he is not a union man ?—Yes.

8249. Have you ever heard him spoken ill of by union men ?—No, I never heard.

8250. Did you never hear him called a "knobstick"?—Oh, yes, I have heard him called a " knobstick ; " but nothing any further.

8251. You know, of course, that he does not employ any union men ?—Yes, he has done.

8252. But he was not at this time employing them ?—No.

8253. Have you known " knobsticks " ill-used at all ?—Yes, I have seen them.

8254. I do not know whether you have ever spoilt any bricks yourself ; have you ?—Never, not one.

8255. Have you ever spoken ill of Tetlow ?—No.

8256. Never ?—No, I never had a word with Tetlow in my life before this.

8257. Not with him, but of him ?—I was always friendly with him till just before that water falling out.

8258. Have you ever said that he deserved to have something done to him ?—No.

8259. Have you ever heard his life threatened ?—Never to my knowledge.

8260. Have you ever said that you have heard his life threatened ?—No.

8261. Will you swear that you never said that there were persons appointed to take Tetlow's life ?—Yes, I will swear that I never heard that in the world.

8262. You never have said so ?—No.

8263. Have you ever heard anybody else say so ?—No.

8264. Nor words to that effect ?—Nor words to that effect of any sort.

The witness withdrew.

Mr. James Taylor sworn and examined.

Mr. J. Taylor.

8265. (*Mr. Chance.*) Are you a master brickmaker ?—Yes.

8266. Do you live at Greenfield ?—Yes.

8267. Near Saddleworth ?—Yes.

8268. How far is that from Ashton-under-Lyne ?—About 5½ miles, between 5 and 6 miles.

8269. In the year 1859 had you a brickyard at Cockbrook ?—Yes.

8270. Is that in Ashton-under-Lyne ?—Yes.

8271. And had you in your employ several brickmakers ?—Yes.

8272. Were the names of those men George Pierce—— ?—Yes.

8273. James Haslam ?—Yes, Haslam worked for me.

8274. And John Bridgewood ?—Yes.

8275. And John Brierley ?—Yes.

8276. Had you any other man whose christian name was Charles ?—William Brierley.

8277. Had you any other man in your employment then ?—There was a man named Charles, but I do not know his other name.

8278. Was there any brickmakers' union at that time ?—Well, I believe there was not in Ashton. They were just forming one. There had been one formerly, but I think it got broken up and they were just forming it again.

8279. Was that the Ashton-under-Lyne union ?—The Ashton-under-Lyne union.

8280. Did your men join the union ?—Well, I suppose they were entering at that time.

8281. Do you remember their stopping their summer's work ?—Yes, they did not go on with the work as they ought to have done all that summer. I had a good demand for bricks, and so on, but I could not get the work done properly. When the summer work was over, I was determined to do away with them and get a fresh set of men, some that I thought would answer my purpose.

8282. Did you in consequence of that discharge them ?—They had finished their work and I paid them off and I had nothing else to do with them, so I employed a fresh set of men, who I thought would suit me.

8283. How long after they had finished their work was it that you employed this fresh lot of men ?—About a fortnight.

8284. How many men did you employ on the second job ?—Thomas Barrett, James Grafton, James Clifford, and several more. Clifford will tell you all the men that I had working for me at the time.

SEVENTH DAY.

Mr. J. Taylor.

12 Sept. 1867.

8285. About how many were there?—Six or seven.

8286. Were they non-union men, or were they men who were joining the new union?—There were none of that union that I know of, there might be, but I was not aware of it.

8287. Do you know as a fact whether they were union men or non-union men?—I think they were not joined at that time when I employed them.

8288. Did you pay them the same wages that you paid the men that you employed before?—Just the same money.

8289. Are you clear from what you have heard them say, that they were not union men?—Well, I understood that they were not union men that I employed after.

8290. And how long did those men continue to work for you?—All the winter, and some of them in the summer.

8291. Was anything said to you by any union men about your employing those non-union men?—Well, there were two men came down to my house and asked me to take those men back, and I said I thought I should not yet.

8292. When was this?—It was in October 1859.

8293. Do you remember who the two men were who came down?—Well, I suppose that Thomas Harrison was one man, but I did not know the other. I thought it was him, but I was not certain.

8294. Is that the secretary to the Ashton union?—Well, I understood that he was once, but I do not know anything about him.

8295. Do you know who the other man was?—No, I could not tell him if I saw him again. He was a lusty man.

8296. When they came to you and asked you about employing union men what did you tell them?—I told them that I would keep my men that I had employed last as long as I thought proper.

8297. Did they say anything to that?—Well, I understood that one of them said that I must take what followed then, but I do not know which of them it was.

8298. Was that said to you?—It was one of them, but I do not know which of them.

8299. But was it said to you?—Yes.

8300. And was it said to you upon that occasion?—They said that I must take what followed, and I said that I should take pot-luck then.

8301. But was that said to you when they called upon you?—Yes.

8302. Did they call upon you more than once?—Yes.

8303. When was the second time that they called upon you?—Well, I do not know when it was. I cannot recollect their ever coming above once.

8304. Was it soon after the first time?—They never came only once to me.

8305. I thought you told me they came twice?—No, they only came once; two of them came together.

8306. Do you remember, in November of that year anything happening to you?—Yes.

8307. Will you tell us what it was?—It was a fire burst out in the night time.

8308. Do you remember the day upon which it occurred?—Yes, the 4th of November.

8309. Where was the fire?—It was in the brickyard.

8310. Did you live at the brickyard or near the brickyard?—I lived very close by it, within a very few yards of it.

8311. When did you hear of it?—Between 1 and 2 o'clock in the morning.

8312. Did you go to the brickyard?—I got up and went out as fast as I could get.

8313. Will you tell us what you found?—I found a large fire. I ran to the top end of the shed and pulled seven or eight boards off, so that the fire could not get any further, and that saved the top end of it, six or seven yards perhaps, at the top end. While I was splitting those boards up the fire could get no further.

8314. Did that stop the fire in the shed?—Yes, that stopped the top end of the shed; all the rest was burnt down.

8315. What was the size of the shed?—It would hold 2,300 bricks every day.

8316. Was the greater portion of it destroyed?—Yes, all of it, only the top end.

8317. Did you find anything else on fire?—I was putting a new shed up, and I had all the boards and spars laid by ready to put on the day following. They were all taken and piled inside the shed, and I cannot tell how many planks, but planks without number, and nine barrows and screens were all burnt.

8318. Were they all piled up together?—They were all piled up in a heap inside. We found three gallon bottles, and it is supposed that two of them had had naphtha in them and the other one oil.

3319. Could you tell from the smell that they had had naphtha in them?—Yes, I took them up to the police office, and they examined them there.

8320. When you found them were they quite empty?—They were quite empty, all empty.

8321. And you could ascertain from examining them that one had contained naphtha and the other oil?—Yes.

8322. Had you any bricks destroyed that night?—All that were made the day before; all that were on the floor were trampled.

8323. But how were they destroyed?—By walking on them and piling this timber up; they could not pile the timber in the shed without treading on the bricks.

8324. But had the bricks been trampled upon?—Yes, with walking in and out, carrying the timber in. The bricks were on the floor, and you could not come in without treading on them.

8325. They walked over the bricks for the purpose of making the fire?—Yes, carrying the timber in.

8326. Could you tell from the number of footsteps how many men had been engaged in the work?—The man that came and alarmed me about the fire said he saw two or three running away as he came up.

8327. But could you tell from the number of footmarks whether there had been more than three men?—No, we could not tell much about it because it was getting all trampled down with people coming and looking at the fire, and one thing and another. It was all trampled over, and you know it was dark when the fire was, and then the people round about came, and a deal of them got up to look at this fire, and came down looking as well as us to see how it got agait. I did not know how it got agait, and I thought it must have caught fire.

8328. At what do you estimate your loss that night? Well, at about 40*l.*

8329. Who called you up that night?—A man of the name of Martin Rogers.

8330. Was he one of your workmen?—Yes, an old man that used to turn bricks and look after the fires sometimes.

8331. Did he sleep on the yard?—He did not sleep on the yard, but he had to go in sometimes at night time to turn the bricks over. If they are not turned over on the hot floor it curls them up, so I have them turned at night time.

8332. Then he was on the premises that same night?—He was on, but they came while he was away; he was not on all night, but he came at a certain time to turn those bricks over, and then he went home again.

8333. You told me that he saw three men running away?—Yes, he lived close aside, and he saw them through his window as he was getting up to go and turn the bricks.

8334. Do you remember on the morning of the same day meeting John Brierley?—Yes, I had been up at the town hall; it was about 8 o'clock, and I met him and he looked very rough and dirty, you know, but I could not swear that he had done anything.

8335. What had you been to the town hall for?—About the fire.

8336. To give information?—Yes.

8337. Was he one of the union men that worked for you in the first instance?—He was one that worked for me before the fire happened in 1859.

8338. He was one of the men who, after finishing the job, you refused to employ again?—Yes, he was one.

8339. Did you notice anything about his appearance?—Well, I thought he did not look so very well, you know, as I passed him.

8340. In which direction at that time was he coming; where was he coming from?—Well, he lived not far from there; he was like standing.

8341. Did you say anything to him when you met him?—Well, I cannot recollect saying anything, but something crossed my mind that he did not look so very well that morning.

8342. Did he say anything to you?—No, I cannot recollect whether he said anything or not.

8343. Just think, because meeting him that morning very likely you would have said something to him?—Well, I do not know; I cannot swear whether I said anything or not; it is a long time since.

8344. What do you believe to have been the reason of that damage being done to your property?—Well, I could not tell. When I got up and saw the fire I ran to see how it had got agait; I thought it had got agait itself, for I never had any wrong words with my men.

8345. But upon seeing the premises you had reason to alter your opinion?—Yes, I did that when the fire had got quenched; when I found those hoops and those bottles, you know, then I saw that it had been set on fire.

8346. Do you believe it to have been in consequence of your refusing to employ union men?—Well, I do believe it was through not employing those men that I had on in the summer.

8347. Had you any quarrel with any man?—No, I had not any quarrel.

8348. Had you no private quarrel with any of them?—No, only I did my best to get my work done.

8349. Is that the only cause that you can assign for the damage done to you?—Yes.

8350. Did you offer a reward to find out the perpetrators?—Yes, I offered 5*l.* reward.

8351. And did you ever hear of anyone who had done it?—I have never heard anything since, not a word.

8352. And did you suffer great loss to your trade in consequence?—I did, I had several orders that I could not fill up.

8353. Did you afterwards leave the district in consequence?—In 1864 I sold all my materials and left it. I thought I would try something else.

8354. Was that in consequence of the damage that had been done to you?—I worked the yard up to 1864. I went on comfortably after.

8355. After the year 1859, did you ever have any other damage done to your property?—No, nothing; I never received anything after.

8356. That was the only occasion on which you ever had any damage done to you?—Never after that time.

8357. Have you ever had any threats of damage?—No, never after that time; never any threats or anything, only that time when those two men came to my door and wanted me to swap my men.

8358. Then you continued your brickyard up to 1864?—Yes.

8359. During that time did you continue to employ non-union men?—I employed non-union men till about the latter end of 1861, and then I employed union men afterwards.

8360. You employed those men till 1861 and then you employed union men?—Yes, that was because I wanted the work to go on comfortably.

8361. You gave up employing the non-union men because you wanted to be more comfortable?—Yes, I wanted my work to be going off.

8362. Were you afraid of further damage being done to your property if you did not employ union men?—Well, I was not safe you know.

8363. But if it had not been for that would you have continued to employ the non-union men?—Yes, I believe I should.

8364. Have you found them as good workmen as the others?—Some of them; there are good and bad.

8365. You discharged the non-union men and took the union men for fear of damage being done to you?—Yes.

8366. Then you say you left in 1864?—Yes.

8367. Was there any particular reason for your leaving?—No, I gave up of my own accord, to start other business, but I proved unfortunate, and I had to turn to my old trade again. I am making bricks up in Saddleworth, in Yorkshire.

8368. (*Mr. Barstow.*) You did not tell us what damage was done to you the first time your shed was burnt?—40*l.* worth of damage.

8369. Your shed was burnt twice, I think?—Only once.

8370. Was the new shed the only one that was burnt?—They piled the timber that was ready to put in the shed inside the old one.

8371. You never had but one fire on the premises?—Only one fire, but they burnt the other shed, it was at one time.

The witness withdrew.

JAMES CLIFFORD sworn and examined.

J. Clifford.

8372. (*Chairman.*) What are you now?—A brickmaker.

8373. Did you work for Mr. Taylor, the last witness, in 1859?—Yes.

8374. Where was that?—In a place called Cockbrook, near Ashton.

8375. How far is it from Ashton?—About half a mile. It is in the borough of Ashton.

8376. Were you there in the summer of 1859?—No.

8377. But, however, you were there in 1859?—Yes.

8378. Do you remember at that time that there was a union of brickmakers about to be formed?—Yes.

8379. Did you join with them?—No, not at that time.

8380. You say that there was a union formed and that you were working for Mr. Taylor; were all the men employed by him non-union men?—When the union was formed I was working for Mr. Harrison at Stalybridge.

8381. But after the union was formed were you working for Mr. Taylor?—Yes.

8382. Were the men who were employed by Mr. Taylor non-union men?—Yes, at that time when I worked.

8383. Do you remember some union men coming to to the yard?—There was only one that came to me.

8384. What did he do?—He asked me if I would join the union and I said I did not know.

8485. Do you know who the man was?—Yes.

8386. What is his name?—Henry Marsden.

8387. He came to you?—Yes.

8388. And were there other union men who went to other men who were working?—No, he was the only man that came.

8389. Did he go to the others?—Yes, he came to me and the wheeler, and he went to another old man.

8390. Did he ask you then if you would join the union?—Yes, and we all made one answer that we did not know.

8391. Do you remember working, or was it at the same time that you were working, with persons named Shields, Barrett, Gratton, and Johnson?—Yes.

8392. Were they working with you for Taylor?—Yes.

8393. At that time did any number of union men

SEVENTH DAY.

J. Clifford.

12 Sept. 1867.

come and stop your working?—No, not that I am aware of.

8394. Did the union men come at all at that time?—Not in 1859; not to me, with the exception of the one that I have told you about.

8395. Do you know anything of those men whom I have just mentioned, Shields, Barrett, Gratton, and Johnson; had you been working with them?—Yes.

8396. Where had you been working with them?—At Mr. Taylor's; Shields worked with me the summer before for Mr. Harrison, at Stalybridge.

8397. Do you remember at any time while you were working for Mr. Taylor, the union men coming and taking the hands off?—No.

8398. Not in 1859?—No.

8399. Afterwards?—In 1860 they came and took them men off.

8400. Then in 1860 who came?—Well, I do not know.

8401. Did several people come or one?—There were many a lot.

8402. What, union men?—Yes; and stopped us. We were union men at the time.

8403. And were those others whose names I have mentioned union men at the time?—Yes.

8404. Why did they stop you?—They were going to call a general meeting and going to Hyde.

8405. What were they going to call a general meeting about?—I do not know; I never could get to know from that day to this.

8406. What did you do and the other four men whom I have mentioned?—We all went forward to Hyde.

8407. What did you do at Hyde?—We did nothing, only we sat down in a very large room in some public-house there.

8408. Was there a meeting?—Yes, there was a meeting.

8409. What passed at the meeting?—I do not know.

8410. You were there, were you not?—Yes, I was there, but I paid no attention.

8411. What was settled at the meeting?—It was something over some money affair between some masters and men.

8412. What do you mean by some money affair between some masters and men?—There was a dispute between the men and the masters.

8413. About wages?—Yes, about wages.

8414. And that was settled at that meeting?—Well, it was called to settle it.

8415. But was it settled at that meeting?—I cannot say.

8416. You mean to say that you left your work and attended this meeting, and that you have not the slightest notion of what passed?—No, I have no notion, because I was not interested at all in it.

8417. Did you shut your ears all the time?—No, but I was in and out all the time.

8418. And you never heard what passed?—No, because I never went any more after that.

8419. Did you leave the union after that?—Yes.

8420. Were you at Taylor's in 1859 when anything happened to his property?—Yes.

8421. You were one of the men working there then, were you?—Yes.

8422. They were all non-union men then, were they not?—Yes.

8423. Do you remember the shed being fired?—Yes.

8424. And the wheelbarrows and things were put together so as to make the fire effective, was that so?—Yes.

8425. Was there any watchman out that night?—No.

8426. He was not in the habit of having a watchman, was he?—Not at that time; but he had one afterwards.

8427. How many men did he keep at that time?—There were eight altogether, and old Martin that turned the bricks up made nine.

8428. Has Mr. Taylor's shed being fired more than once?—Not that I am aware of. It was only fired once while I was there.

8429. Did you continue to work for Taylor or had you ceased to work for him before the shed was set on fire?—I continued from some time in October 1859, I believe it was, but I cannot exactly tell what day, till towards the latter end of May 1860.

8430. What made you leave?—On account of this meeting.

8431. Of the union?—Yes.

8432. You attended this meeting you say and knew nothing of what took place; did you attend any other meeting with equal success?—No.

8433. Did you attend any other meeting at all of thn union men?—Yes.

8434. And you were equally inattentive perhaps?—No.

8435. You did not attend?—No.

8436. Your object perhaps was to hear nothing?—I did not attend.

8437. What did you go for?—I must either go or pay a sovereign.

8438. Is that the rule?—Well, it is the rule.

8439. And you took care not to attend to anything that passed?—I never took any notice of what passed.

8440. And you have not the slightest notion of what passed?—No.

8441. Who was in the chair; that you do not know perhaps?—Yes, I can tell you who was in the chair that night, Thomas Harrison.

8442. Was that the first meeting or the second?—That was the last.

8443. Then Thomas Harrison was president at the second meeting?—Yes.

8444. Who was president at the first meeting?—I cannot say.

8445. Who was secretary at the time of the second meeting?—Well I almost think that John Barlow was.

8446. Do you almost think the same about the first meeting; who was the secretary then?—I believe he was secretary all the time that I was in.

8447. So you attended one meeting and the other without having the slightest notion of what took place?—No, I never paid the slightest attention.

8448. What did you do with yourself at the meeting; did you merely sit quiet?—I sat quiet and sometimes I went out.

8449. Did you go back to Taylor's after having left him in May?—No.

8450. Then the fire took place while you were there, somewhere between October and May?—The fire took place on the 4th November 1859.

8451. When did you cease to be a union man?—In 1860.

8452. After you ceased to be a union man did you continue to work for anybody?—Yes.

8453. For whom did you work?—I worked for my brother afterwards.

8454. Have you ever been since that time asked to become a union man again?—Yes, many a time.

8455. Have you always refused?—Yes.

8456. Has anything happened to you in consequence?—No, not to me personally.

8457. Then to whom else has it happened?—It has happened to my masters as regards spoiling bricks and burning sheds.

8458. Which masters?—Mr. Joseph Clifford and Mr. John Clifford.

8459. You worked for them, did you?—Yes.

8460. And you were at that time a non-union man?—Yes.

8461. And though it did not matter to you personally, they came and damaged the bricks of your masters?—Yes.

8462. Were they partners or separate masters?—Separate masters.

8463. Was it done more than once?—Oh, yes.

8464. Five or six times?—Yes.

8465. Both together, or all at once?—Both together,

8466. Was that because they were employing non-union men?—Yes.

8467. Have you yourself ever been threatened?—Not at all.

SEVENTH DAY.

J. Clifford.

12 Sept. 1867.

8468. No money has been demanded of you?—No.

8469. Do you remember who asked you to be a union man?—Yes; the last man that came was just before last Christmas; his name was Thomas Barrett. The other party that was with him I do not know.

8470. What is Thomas Barrett; is he an officer of the union?—That I cannot say.

8471. And that is the usual thing, is it, that if you are warned to attend a meeting and you do not attend you are fined a sovereign?—If you happen to work.

8472. What did you subscribe a week when you were a member of the union?—I did not subscribe much, for I was not in it long. I think I paid 5*s.* altogether.

8473. When did you first join the union?—It was in 1860.

8474. How long did you continue a member of it?—Perhaps a few weeks, five or six, or perhaps six or seven weeks; I cannot say to a week or two.

8475. Had you any particular reason for leaving it?—Well, I had the reason that I did not like it.

The witness withdrew.

J. Butterfield.

JOHN BUTTERFIELD sworn and examined.

8476. (*Mr. Barstow.*) Are you the son of a man named John King Butterfield?—Yes.

8477. What are you now?— I am a greengrocer.

8478. You have nothing to do with brickmaking?—No.

8479. What was your father?—He was a greengrocer, but at times he was watching for Mr. Joseph Barlow, and he used to cart bricks.

8480. When was that?—That was in February 1861.

8481. Where was Mr. Joseph Barlow's brickcroft?—It was about, I should say, 50 yards from our house at Droylesden.

8482. Do you remember anything happening to him?—I remember nothing happening to him, but I do to his horse.

8483. He had a horse, had he?—Yes.

8484. Was that the horse which used to carry about his vegetables and the like?—Yes, and cart bricks and coal, and anything that there was.

8485. Where did he keep it?—He kept it at his own stable close to the house. The stable-door was close to the back door.

8486. Do you know whether he had ever been threatened about being Joseph Barlow's watchman?—No, not that I am aware of; not but once. Some men came to our house, but I cannot just remember who they were, when he started watching, and they threatened that if he went they would do something to him.

8487. Did you hear them?—Well, I was at the house, but I did not take any notice, but I believe Joseph Barlow has the statement written down.

8488. But do you know yourself what they said?—No; I was in the house at the time, but I did not take any notice what they said.

8489. They called your father out?—No, they were in the house, but they kicked up a regular row.

8490. You heard them kick up a row?—Yes.

8491. I suppose you heard them say something?—Well, I can only just remember what they said.

8492. But what do mean exactly by kicking up a row?—They said if he went a firing up they should do something to him; he went a firing up first.

8493. You heard them say so?—Yes, but I cannot just remember what they said they would do.

8494. Did they say anything else?—Not that I can remember; not then.

8495. But I suppose that was not all they said?—Well, I do not know; I can remember naught more.

8496. How long did they stay?—They came about 9 o'clock drinking, and they stayed till shutting up time. My father had to go and tell the police to get them out.

8497. And they stayed from 9 o'clock to 11 o'clock?—Yes, two hours.

8498. And your father had to tell the police to get them out?—The police were there and he had to warn them so that he could get them out in time, so that they would not fine him.

8499. Did you hear them say that they would do something to him?—They said a good deal, but I did not take much notice.

8500. Were they threatening him the whole time?—Well, I cannot say.

8501. Were they trying to persuade him not to go?—No, they did not try to persuade him, but they said they would do something to him if he did go, so he went at night and put coal on the fire that night.

8502. I think after this something happened to your horse?—I think it did; they cut his legs and cut his throat.

8503. Was this before the horse was injured?—Yes, a good while before the horse was injured, when first he started watching.

8504. Can you give us any notion how long that was before?—I cannot give you any notion of that.

8505. Two or three months?—I do not know.

8506. Six months?—I cannot say.

8507. But it was a long time before?—Yes.

8508. In what state did you find the horse?—I went into the stable by the back door and I found his throat cut across; the cut in his throat was skin deep.

8509. Were there any other injuries?—His back legs were cut; his sinews were cut.

8510. Anything else?—Nothing else to the horse.

8511. I suppose the horse was rendered useless?—Yes, he had to be shot there and then.

8512. What was the value of the horse?—15*l.* was about the value of him.

8513. Do you know whether anything else happened to your father?—Nothing else happened that I am aware of.

8514. Did he continue watching and firing up after that?—Yes.

8515. He went on as before?—Yes.

8516. And you do not know of anything else happening?—No.

8517. Were the men on strike at this time?—Yes.

8518. Messrs. Barlow were working?—I do not know whether they were working or not.

8519. Your father was watching for them, was he not?—My father was watching for them; Mr. Barlow was working making bricks.

8520. Did you give any information to the police?—Yes, my father fired a revolver to give the alarm and Mr. Wylie came.

8521. Then you found the horse in the morning, I suppose?—Yes.

8522. And told your father?—Yes.

8523. And then he fired a revolver?—Yes.

8524. Did some of the police come?— Sergeant Wylie and another man.

8525. And they examined the horse and they examined the place?—They examined the horse and examined the place.

8526. Are you aware whether anyone was apprehended?—There was no one apprehended.

8527. At what time in the morning did you see the horse?—About half-past 12.

8528. In the daytime?—No, in the morning. We found him ten minutes after it was done.

8529. And at what time were the police on the spot?—Well, I should say it would be half an hour after, because I had to go to the brickyard to my father.

The witness withdrew.

SEVENTH DAY.

J. Frith.

12 Sept. 1867.

JOSEPH FRITH sworn and examined.

8530. (*Chairman.*) It is right to tell you that if you speak the truth, and make a full and true disclosure of all you know about matters concerning which you are asked, you will be entitled to and will have an indemnity from us, so that you will not be troubled with any prosecution for anything which you may have done. Are you a member of a union now?—Yes.

8531. Of the Ashton union?—Yes.

8532. How long have you been so?—Since this club started, and before time I have been on for something like 17 years altogether.

8533. You have filled some of the offices I believe, have you not?—Yes.

8534. Have you been president?—Yes.

8535. When were you president?—I think it was either in 1860 or 1861; one quarter.

8536. And also last year?—Yes.

8537. Have you been secretary and treasurer?—No, I have been president one quarter last year.

8538. We understand that you have been concerned in several of these matters?—Yes.

8539. We have had a full account of it, and I do not want to go through it all; but you were present at the time when Kirk had the bottles thrown, were you not?—Yes.

8540. You went there I understand with Ward, and Ryan, and Burke?—Yes.

8541. And with whom else?—Charles Barlow.

8542. Had you any bottles with you?—No.

8543. We are told that Ward had the bottles?—Ward had the bottles, and Ryan I believe had one.

8544. And Ward threw one bottle, is that true?—Yes.

8545. And Ryan threw another?—Yes.

8546. And Burke stood at the gate with a pistol?—Yes.

8547. What did you do?—I stood there.

8548. Were you with Burke?—Yes.

8549. Had you a stick?—No, I had no weapons at all.

8550. How much did you get for that, the same as the others?—Yes.

8551. How much?—I think it was something like 1*l.*, but I am not certain.

8552. Was Ensor with you?—Yes.

8553. Was Ensor at that time president?—Well, I cannot say I am sure.

8554. But, however, Ensor was the person to carry out the resolution of the meeting?—He was the man that received the money and paid us.

8555. We understand it was left to one person to carry it out, and Ensor was the person who frequently did that?—Yes, I believe he was.

8556. But you never had to keep the books, had you?—No.

8557. We understand that you were at Clifford's also?—Yes.

8558. There were two outrages at Clifford's; were you at both?—Only one.

8559. Which was the one; the one where the shed was fired, or when the materials were burnt?—The one when the materials were burnt.

8560. Were they burnt in a shed?—No, they were burnt outside.

8561. Ryan was in that, was he not?—Yes,

8562. And Ensor?—And Ensor.

8563. And Scholefield?—And Scholefield.

8564. And Acton?—And Acton.

8565. And Thomas Barlow?—And Thomas Barlow.

8566. Did Ensor pay you for that?—Yes.

8567. What did you take with you on that occasion?—I think we had no weapons at all that night.

8568. You must have had some in case you were attacked?—I had none, and I cannot remember anyone else having any.

8569. Had you any naphtha with you?—Yes.

8570. Who carried that?—I cannot say, but I believe it was Acton and Ensor.

8571. Was the reason for those two affairs which you have mentioned, Kirk's case and Clifford's case, because they were employing non-union men?—Yes.

8572. That was the reason, was it?—That was the cause of it.

8573. Do you remember Butterfield's horse being destroyed?—I remember it.

8574. Do you remember who did it?—No, I do not; I do not know who did it.

8575. You have heard of its being done?—Yes.

8576. Was that mentioned at a regular meeting?—No, not that I am aware of. I never heard it mentioned at a regular meeting.

8577. But had you heard that his master, Joseph Barlow, was employing non-union men?—Yes, certainly.

8578. And that was the reason why the horse was injured?—Yes, I suppose it was.

8579. Have you any idea who did it?—No, I have not.

8580. Did Butterfield live near Ward?—No.

8581. Then you have no idea at all who did it?—I have not.

8582. You remember its being done?—Certainly, I remember its being done.

8583. You have told us this. Now, what other cases are there?—I do not know of any others that I have been concerned in; that is all.

8584. You have never been concerned in any others but these?—No.

8585. That you are sure of, are you?—I am certain.

8586. When you were president did you pay any men?—Well, perhaps I might have done, but I cannot recollect. If any depredations were done at the time I was president very likely I should pay for them.

8587. I mean that that was the usual thing that the president paid the money?—I believe it was.

8588. Just recollect if you can. Although you may not recollect what you paid do you remember to whom you paid any money when you were president in 1860?—I cannot recollect paying any.

8589. Do you not recollect paying Ensor something?—Well, I hardly can at present, but I might have done; I could not swear that I did not.

8590. But might you have paid him as much as 10*l.* or 15*l.* for a job of this sort?—If I did pay him anything it would be something like that, I daresay, or perhaps more; I cannot say.

8591. What is the most you have ever known paid for a job of this sort?—I cannot tell.

8592. You have known 15*l.*, of course; we have heard of 15*l.* being paid?—I think there was 15*l.* paid for these jobs; those two jobs that I have been at.

8593. Then what share did you get?—I think I got 1*l.*

8594. But 1*l.* is a very little if there were only five or six of you, and 15*l.* was the amount?—I never got any more.

8595. Was it not usual to share equally?—It should have been.

8596. And you think that Ensor did not pay you as much as you were entitled to?—I cannot say that.

8597. Were you paid anything in 1861; you had better tell all, you know?—I will tell all I can recollect; I will not tell anything I cannot recollect. I cannot tell whether I was president in 1860 or 1861.

8598. You mentioned both as years in which you were president; but, however, take either 1860 or 1861. While you were president do you not remember what you paid; there were a pretty good number of jobs going on at that time, I suppose?—I cannot call to memory paying any money; it is a long while since I did.

8599. What was it?—I paid Ensor, I think, but I cannot say whether it was 15*l.* or 20*l.*

8600. Take either?—Let me see what that job was

for. (*The witness paused.*) I cannot recollect what it was for.

8601. Do you remember what it was about; was it destroying bricks, or setting places on fire, or shooting at a man, or "bottling," or what was it, because there is a great variety, you know?—If it was for anything I think it was for spoiling bricks.

8602. You think you did pay somewhere about 15*l.* or 20*l.* for that?—I think I did now I come to recollect.

8603. How did you manage when you had paid money of that sort; did you tell the auditor, or did you tell the secretary of it?—No, the secretary gave me the money and I paid it.

8604. Then he entered it as he thought right?—Yes, I suppose so.

8605. You had never anything to do with the books, I suppose?—No.

8606. And your course of business would be to get the money from the secretary, and then to pay it to the man who, as it were, carried the job out?—Yes.

8607. Have you paid anything lately, last year?—No.

8608. Was there nothing of the kind last year?—Nothing of the sort.

8609. How long were you president in 1866?—Three months.

8610. Are you sure you paid nothing then?—Yes, I was only president one quarter then.

8611. But a good deal may be done in a quarter?—That is all that I ever had anything to do with.

8612. You did not pay anything in that quarter in 1866, last year?—No, I was only the president in one quarter in that time, and I do not know whether it was 1860 or 1861.

8613. I understood you to say you were president in 1860 or 1861, you did not know which, and also in 1866?—Yes, I was treasurer one quarter last year and I was president one quarter last year. I was treasurer last quarter.

8614. As regards any money that was paid for anything of this sort, would the treasurer have anything to do with it?—I do not know that the treasurer would have anything to do with it.

8615. It would sound as if the treasurer kept the money?—The money is locked up in a safe.

8616. Who keeps the key?—Different people.

8617. But whose duty is it to keep the key?—There are men picked out every quarter to keep the keys.

8618. Does one man keep them?—No, there are four or five keyholders, I believe.

8619. Does that mean that there are four or five separate locks, or is it all the same lock, five separate people having a key?—No, five different locks.

8620. So that the safe cannot be opened unless all the five people are present with their five keys?—Yes, just so.

8621. Then if money is wanted, all those five have to come and money has to be given out, which they pass to the secretary, and then the secretary gives it to the man who does it; is that the way it is done?—That is something like it.

8622. Then I suppose it must be communicated what the money is wanted for?—I do not know for that.

8623. If the president asks for it is that enough?—Yes.

8624. His word is quite enough, and when the accounts are audited the sanction of the president is quite enough to justify the payment of the money?—The expenditure is put down in different ways.

8625. You have heard of "incidental expenditure" and things of that sort?—Yes.

8626. And the sums divided and so on?—I cannot say; I have never had much to do with it.

8627. You know how it is done, do you not?—No.

8628. (*Mr. Chance.*) Do you know of any money being paid during the last year for outrages?—No, I do not.

8629. You are a member of the union now?—Yes.

8630. Do you with the other witnesses approve of outrages?—I do not.

8631. You do not intend to commit any more?—No, I have never been at any since, and I never intend to go to any more, I can tell you; I have only been at two and I have had quite sufficient of it.

8632. Are you endeavouring as a member of the union to put down anything of this kind?—I should like to put a stop to it.

The witness withdrew.

JOSEPH FRITH recalled and further examined. *J. Frith.*

8633. (*Chairman.*) Were you at one time a master brickmaker?—Yes.

8634. Did you employ a carrier to cart your bricks?—Yes.

8635. When were you a master brickmaker, how long ago?—In 1862, 1863, and 1864.

8636. Were you at that time a member of a union?—Yes.

8637. Do you remember your carter being interfered with in carting some of your bricks?—Yes.

8638. When was that?—I cannot speak to the date.

8639. Was it in one of those two years?—1862 I believe, or 1863, I cannot swear which.

8640. Where was your carter carting bricks, from what place to what place?—From Denton down to the lower Belle Vue gaol.

8641. Where is Belle Vue gaol?—On the Manchester Road.

8642. Was he carting bricks from one union district to another?—Yes.

8643. That is against the rules of the union, is it not?—It was against us. I do not know whether it was against them or not.

8644. Was it against your rules?—It was against the Ashton rules.

8645. You were sending them out of the Ashton district into the Manchester district?—Yes.

8646. They were your bricks?—Yes, our bricks.

8647. Had you sold them?—We had sold them.

8648. To whom?—The first we sold was to a man of the name of Hatfield.

8649. Your carter had an order from you to take them from the Ashton district to where this man's building was?—Yes.

8650. What happened to your carter, was he interfered with?—I believe he got a good thrashing; so he told us.

8651. What was his name?—Edward Booth was one; there were two carts again.

8652. Did the other man get thrashed?—I believe he did.

8653. What was his name?—Samuel Lees.

8654. Samuel Lees and this other man both got thrashed for carrying your bricks from the Ashton district into the Manchester district?—Yes.

8655. Were they much hurt?—Not so very badly.

8656. Were they made to go back with the bricks?—No, they left their bricks.

8657. Were they thrashed as they went, or as they came back?—That I cannot tell you.

8658. That was because it was against the Ashton union rule was it?—It was against the Manchester union rule.

8659. So that the Manchester union was the union which thrashed the two carters?—Yes.

8660. Did that same sort of thing happen again with your carters?—I do not know whether it happened that they were thrashed, but I went down myself. I sold another man a quantity of bricks; his name was Piggott, in the Manchester district. I sold him something like about 40,000, all that we had of that kind of bricks. We had delivered a good

SEVENTH DAY.

J. Frith.

12 Sept. 1867.

quantity of them, something over 30,000, and one of my partners went down again, and we could not supply this man with all the kinds of bricks, that he wanted—common pressed bricks, seconds, and so on. We could not supply him with common bricks, therefore they stopped him having ours; he might not have any common bricks to set up with ours.

8661. What bricks did you send him?—Seconds.

8662. And because you supplied him with seconds he was not to have other bricks from anybody else?—Yes.

8663. When was that?—I cannot date it.

8664. Somewhere about the same time?—Yes, if I had had proper notice of this, I could have brought you all particulars. I dare say it is down in the books somewhere.

8665. There is no doubt about it happening?—It did happen.

8666. Did it happen again at any time?—No, not as long as I stopped in the yard; the yard is carried on by my partner now.

8667. Was it a common thing for the union to have recourse to these means to prevent it?—I will tell you what it was with the last two loads that I sent down on that order; he could not get any bricks to use with them; he had two loads which he had not used of our bricks, and he made them put the bricks up into the carts, and take them into the yard before he could have another load of bricks from any other man in Manchester.

8668. He had got some of your bricks?—Yes, and he made them load them up again, and bring them back again into our yard before he could have any bricks from anywhere else.

8669. Did that happen on more than one occasion?—No.

8670. That is a common sort of thing?—Yes.

8671. The union prevent one district sending into another?—That is just it.

8672. The Manchester district we understand extends somewhere about four miles round Manchester?—It extends four miles round Manchester.

8673. And within that distance you may not come with your bricks?—We come into our own district, not further.

8674. You may not sell out of your district into their district, which you say extends four miles from Manchester?—Yes.

8675. Is that the rule which has been going on, and is going on still?—It is going on at the present day.

8676. And whenever that rule is violated do things of that sort happen that the carters are thrashed and the bricks sent back?—Yes.

8677. That is a common affair?—They served us like that, in that manner.

8678. Is there any rule of that sort in your union? Supposing the Manchester people come to sell bricks in your union, what do you do?—We do not stop them, we never interfere with them.

8679. A Manchester man may sell bricks in your district?—We cannot stop them, they have larger powers than us, we cannot stop them.

8680. They bear you down?—They do to a great extent.

8681. How is it between you and the Stockport union district?—Stockport and us are right enough; Stockport sets our bricks and we set theirs.

8682. Can you sell into the Stockport district, and can the Stockport district sell into yours?—Yes, and we can send into the Oldham district, we can send into any district but Manchester.

8683. You can sell into the Stockport and Oldham districts, but they will not let you sell into the Manchester district?—No.

8684. They claim as their district a circle of four miles round Manchester?—Yes.

8685. How is that four miles calculated, from what point in Manchester?—They come up to the four-mile stone on our side, I cannot say how they come on the other.

8686. What part of Manchester is the four miles counted from?—I do not know what point they start from, but they come to the four-mile stone.

8687. The four-mile stone on your side?—Yes.

8688. That is a pretty large district, four miles on your side and the whole district of Manchester besides?—The extent of Manchester is six miles, they claim four and we have have only two, it is six miles altogether, they have 120 square miles to work on.

8689. That you understand to be their area, they claim 120 square miles?—Yes.

8690. And into that none of your unions can sell a single brick?—No.

8691. (*Mr. Barstow.*) No other district claims this monopoly except Manchester?—Not that I am aware of.

8692. I think you also said that they overbore you by force?—Yes, they are a great quantity to what we are; it is a general saying that the weakest always fall to the wall, and that is the way with us.

The witness withdrew.

Mr. James Harrison sworn and examined.

Mr. J. Harrison.

8693. (*Mr. Chance.*) Are you a master brickmaker?—It was about 12 months since, and from that to 18 months. My brother is carrying it on now in the same place.

8694. Did you give it up?—Yes, we have drawn out; we have given it up to him.

8695. How long were you in the trade?—I have been ever since I was nine or 10 years old, but I have been a master about nine or 10 years.

8696. Before you were master were you a journeyman brickmaker?—Yes.

8697. When you were a journeyman were you a member of any union?—Yes, at Ashton-under-Lyne.

8698. Did you continue to be a member of the union till you became a master brickmaker?—Yes, as long as there was any.

8699. The union was given up at one time, was it not?—At one time it broke down.

8700. That was in 1859?—I do not recollect the time much.

8701. Do you remember damage being done to some property of yours in April 1866?—Yes, it was the beginning of April.

8702. Previous to that had you any dispute with the union?—We were trying some experiment; we had some clay that was not so good, and we thought we would grind it and make it into front brick, and they objected to it.

8703. Why did they object to it?—They thought it was infringing on their labour, though they had their own tables and stools to work it.

8704. Did you grind it by machinery?—Yes.

8705. Was it the fact of grinding the clay by machinery which made them think that you were infringing on their labour?—Yes, we had no dispute respecting wages or anything of that sort.

8706. What ought you to have done, according to their idea, instead of grinding the clay by machinery?—They never told us to do anything, they only said we must not do it.

8707. Did they say that it must stay as it was?—Yes, we must carry on the old system, though they would not have been fit for use when they were made.

8708. Was there any hand process by which the same effect might be produced?—We tried it both by hand and by machine after it was ground, and we could not perfect it with the hand after it was ground, and we had to run it through a process the same as when making a draining pipe.

8709. Did they want it to be done by hand?—No, they objected to us altogether grinding it.

8710. And if you did not grind it it would have been entirely useless and thrown away?—Yes, the bricks

were worth nothing, there was a deal of lime in it, and it had broken the bricks when they were burnt.

8711. What quantity of clay had you then?—We might make 100,000 a year of it.

8712. Did their objection prevent your making bricks to the extent of 100,000 a year?—Yes, that sort of brick, we made different sorts of bricks besides them, we would have been paid for them the same as usual.

8713. Would you have got a greater profit by making these bricks?—No, I do not think we should have got any more profit, but there would have been a ready sale for them.

8714. Was there a considerable loss arising to you from not being able to make this kind of bricks?—Yes.

8715. When they made this objection what did you say to them?—We said we thought we should try it, we were only beginning upon it, we thought it would act. It was about the middle of the week, there came three men and they told us that we should have to give over work.

8716. Three of your men?—Two of our men and a delegate, a man that goes round measuring the moulds.

8717. What was his name?—They call him "Old Sack;" I do not know his other name. They told us that they should leave off and go away, and they should not work for us as long as we did them like that, and so we said we thought we should try it, and they went away. One of them made answer as he was going away; he said, "Come on! we have plenty "of money in the box, and thou wilt not always be "master." We took no notice of it, but put fresh men on our order. We recommended the men to keep a sharp look out; we thought they would be on us pretty quick. This was the middle of the week and on Sunday night at 12 o'clock the shed was on fire. We ran down, and the watchman happened to be up getting his supper at the time it was being done.

8718. Was that the watchman you employed?—Yes.

8719. Was he living on the premises?—No, near the premises, and we were living close to them. As soon as he saw it he shouted out and knocked at our door; two or three of us got up and ran down. It was only set on fire at one place. My shed was full of bricks, and they had trodden the bricks. There were three distinct shoe marks; there would be three men. We made draining-pipes in the shed, and we had it filled full of shelves where we could put the pipes in to dry; and they had crammed coal and chips and different stuff between the shelves and set fire to it; it was only just getting up top and trying to get through the roof.

8720. Did you find the remnants of chips and coal on the shelves when you got there?—Yes, it was not all burnt away, it was only just got again.

8721. Did you put it out?—Yes, there would be about 1*l.* or 30*s.* worth of damage done.

8722. If you had not stopped the fire it would have done more damage?—It would have been burnt down, there was a deal of timber in it, shelves about an inch thick put to dry the bricks on.

8723. How many bricks were destroyed?—Between 2,000 and 3,000 were destroyed.

8724. Do you know what caused the damage done to you?—Because we would not employ them.

8725. You had no quarrel with anybody?—No.

8726. Did you endeavour afterwards to ascertain who had done the damage?—We could not see any chance; I went to Sergeant Grimshaw, two miles off, I knocked him up and brought him to the place.

8727. You could not find out who had done it?—No.

8728. How many union men were you employing at the time?—We were employing three or four.

8729. That was the only dispute you had with the union?—That was the only dispute we had with them.

8730. At any other time had you any damage done to your property?—No, we had been fined by them and forced to pay.

8731. What had you been fined for?—For not stopping the moulds because they were getting a little old and a little out of shape, and we had not time to get new ones. There were new ones being made, but we did not like to stop till they were ready, they fined us 2*l.*, and we had to pay.

8732. You did not belong to the union?—No, but we had union men.

8733. The union fined you?—Yes.

8734. If you did not pay what would they have done to you?—We were employing 16 men, and we kept them out nearly a fortnight, and they were getting work elsewhere. We could not get fresh ones, and we thought we should gain most by paying the 2*l.* and taking them in.

8735. Was that the only occasion on which you were fined?—Yes.

8736. You had no other damage done to your property except what you have told us?—No, only a few weeks back my brother had a lot of hens poisoned in the yard; there is a foot road goes by, and five or six of them died in two days.

8737. This was about three weeks ago?—Yes, or a month or six weeks.

8738. Was that the place where he lives?—Yes, it is at the brickyard; there is a stable there and there they have to keep the watchman and the horses.

8739. Were they loose in the yard?—They ran loose in the yard, and there was a foot road ran by.

8740. Is the only reason why you think they were poisoned because you found them dead?—They never opened them, and they could not say whether they were poisoned or not.

8741. You found five dead?—Yes; a month ago, it was very strange, a man, a neighbour, went down by the brickyard in the foot road, about 10 o'clock one night. I do not whether it was Saturday night or not, and he was about the same height as the watchman, and he went off the foot yard at the back of the knoll doing a job for himself, and a big man came up to him dressed in white clothes. He must have had a stone in his fist as he hit him on the forehead; I never saw such a blow in my life, he must have thought he was the watchman.

8742. Who was that?—It was a neighbour.

8743. What was his name?—Turner.

8744. What was his christian name?—James Turner. I fancied he thought he was the watchman, and somebody must have been lying in wait for him. He cotched him unawares, and gave him two blows; he cut his lip and broke his nose all in pieces.

8745. Did he know who the man was?—No, he ran away and left him; he was quite insensible.

8746. Is James Turner here?—No, he is not here. We never informed the police of it.

8747. Had you any dispute with the union before these fowls were found dead?—Yes. We kept a watchman in the shed, and the watchman has been kept ever since on the premises. They have to pay 1*l.* a week for this, or else it would be burnt again, there is no fear about that.

8748. Were it not for the fear of damage being done to the bricks, you would not keep a watchman?—No.

8749. You pay 1*l.* a week simply for taking care of it?—Yes, simply for taking care of it at night. There is scarcely a stroke of work done; he is only making something like 700,000 or 800,000 in the year all round.

8750. There was no additional dispute of any kind previous to these fowls being found dead?—The shed was burnt previous to the fowls being found dead; the original dispute was grinding the clay.

8751. Have you any other reason to believe that the fowls were poisoned by union men?—No, nothing but that.

8752. That was in consequence of the dispute?—Yes.

8753. At that time you were not a brickmaker, were you?—I had given it up.

SEVENTH DAY.

Mr. J. Harrison.

12 Sept. 1867.

8754. At the time the fowls were poisoned you had given it up?—Yes, my brother is carrying it on.

8755. Does your brother live with you?—No, we are neighbours.

8756. Do you suppose that your fowls were poisoned in consequence of your brother being in dispute with the union?—He is carrying the business on.

8757. Why should they injure you in consequence of him?—They were not my fowls; they were his.

8758. (*Mr. Barstow.*) You still continued to make your bricks with the machine?—Yes, he still keeps making his bricks.

The witness withdrew.

Mr. C. Smith.

Mr. Charles Smith sworn and examined.

8759. (*Chairman.*) Were you formerly engaged at the Ardwick Brickmaking Company?—Yes.

8760. Were you so in January 1863?—Yes.

8761. Where was their yard?—At the top end of the viaduct, leading from the Ashton Road on the left-hand side.

8762. Do you remember somewhere about the 12th or 13th of January that there was a lot of timber in the yard there?—Yes, it was in 1864 or 1865. I made a mistake when I said 1863.

8763. Was it in January 1864 that the timber was there?—Yes.

8764. Do you remember tar and pitch being thrown on the timber?—Yes.

8765. Was that in the night?—Yes, it was done in the night.

8766. There was a good deal of timber there, and tar and pitch was thrown upon it, and was it then set on fire?—A cart had arrived from Bolton loaded with timber. We had hitherto had timber from Bennett's, but they had refused to supply us in consequence of having one of their horse's throats cut.

8767. Who is Mr. Bennett?—John Marsden Bennett, the ex-Mayor of Manchester; his yard is on the Hyde Road.

8768. You living in Ardwick were in the habit of having your timber from Mr. Bennett?—Yes, up to this affair.

8769. How long had you timber from Bennett's?—Until two or three months previous. We were building in the place.

8770. Were you building anything particular?—We took a great quantity of timber for the paling of our place round.

8771. Was it for that purpose that you had timber from Bennett's?—Yes, and the inside work as well.

8772. How was it that you ceased to have your timber from Bennett?—Bennett's carters were threatened, and they had a horse's throat cut.

8773. Was it against the rules of any union that Bennett's timber should be supplied to you?—It was on account of their supplying us, we being machine brickmakers and they being hand brickmakers.

8774. You were machine brickmakers and they were hand brickmakers?—Yes.

8775. So they were forbidden to supply you?—If they continued to supply us any further they would have been further interfered with.

8776. Is that why they had a horse killed?—Yes.

8777. Anything else?—That was all.

8778. Did they refuse to supply you any more?—They thought we had better get our timber somewhere else.

8779. Is that the rule of the union, as far as you know, that the hand brickmakers' interest is opposed to that of the machine brickmakers?—Undoubtedly.

8780. You say that the machine brickmakers are exposed to the ill will and animosity of the union in consequence of making bricks by machinery?—Yes.

8781. You found in January 1864 this tar and pitch thrown over the timber in your yard?—Yes.

8782. This timber had come from somewhere else?—No, they had not been unloaded.

8783. It came from Bolton?—Yes.

8784. You having been driven to Bolton in consequence of this restriction or intimidation being put upon Messrs. Bennett and Company?—Yes; it came from Mr. Marsden's own yard at Bolton; he was the proprietor of the place.

8785. What quantity of timber was there?—It would be nearly about 20*l.* worth of timber; they were all 12-feet lengths.

8786. Some tar or pitch had been thrown upon the timber, and then it had been set a-light?—Yes.

8787. Did it burn or destroy much of the timber?—Yes, it destroyed it so as to render it useless for the purpose it was intended for.

8788. Had you a watchman at that time?—Yes.

8789. What was his name?—John Parker.

8790. Is he here?—Not that I know of; I scarcely think he is. He was a Yorkshire man; after the premises broke up he went back into Yorkshire.

8791. You said after the premises were broken up; when were they broken up?—The middle of last summer; about June or July last year.

8792. Was he your watchman up to that time?—No, up to about 12 months before that time.

8793. Did you ascertain at all how many men were employed in this firing of timber?—About three or four.

8794. Had your watchman at all interfered with them as he came?—He had challenged them and fired off a blunderbuss for his own protection; he fired it off and they made away.

8795. Did they fire at him at all?—No, all this was done before we actually commenced to work the machines at all.

8796. He had no private quarrel with anybody?—No.

8797. You attribute it solely to your being a machine brickmaker?—No doubt.

8798. And considered it a union outrage?—No doubt.

8799. Afterwards in May of that year did anything happen, had you any horses in your stables?—Yes, five horses and a pony.

8800. This was in the May following?—Yes.

8801. How many horses had you in the stable?—Six horses altogether; five horses and a pony.

8802. Was your stable broken open?—Yes.

8803. What did you find done, do you remember?—We had a gray mare burnt.

8804. You had a gray mare in the stable?—Yes, they had broken open the stable door; we could see the marks, the lock was burst; they tied the mare fast up by the head to the iron hayrack and then carried shavings and put them under the mare and set fire to it.

8805. Was the animal dead?—She did not die for two hours and a half after that.

8806. They tied the head of the animal fast up?—Yes, so that it could not get away.

8807. They put the shavings underneath; did they then set fire to it?—Yes; it could only move from one side of the stall to the other to keep out of the way of the flames, though they had spread them all over the stable.

8808. Were the shavings spread all over the stable?—Yes, where the horse was.

8809. This horse was in a separate stall to the others?—Yes, they were divided by a wooden partition.

8810. Had anything been done to the other horses?—Nothing, three sets of harness were cut in separate places so as to render them useless for a time.

8811. Were they in the same stable as the mare?—Yes.

8812. I believe the fire was discovered by a Mrs. Owen?—Yes.

8813. Is she here?—No, she has left the neighbourhood altogether, so I have ascertained.

8814. Do you remember when she discovered it;

what time of the night or morning was it?—During the time the fire was going on.

8815. But was it done in the night?—It was done in the night or early in the morning between 2 and 3 o'clock.

8816. Was she a neighbour; how came she to discover it?—Her husband was a carter, and she lived in the next house to the stable, and she had her daughter's son that worked on our premises in the capacity of a carrier. She heard the horses being restless, and something unusual that woke her up, and as she got at the window to look out she could see the smoke from the hatch, and she opened the window and saw three men leave the premises.

8817. Did she notice their dress?—They were dressed like brickmakers. She then dressed herself and came downstairs and called out "Fire!" and as she went to the end of the hatch leading her to Ashton Road she saw either one or two men at the trough opposite the "General Birch" public-house. They were washing their hands in the trough, and when she called out "Fire!" they ran away across the road off by Mr. Scholes's at the time.

8818. Alarm was given. Did you live near enough to get to the stable?—I lived nearly five or six minutes' walk.

8819. Were you roused up?—I was sent for by some party.

8820. Did you go there?—Yes, as soon as I could.

8821. Was the fire out?—Yes, the fire was out and the horse was cut loose; the horse cut its arm open in trying to pull the iron hay-crutch down; it cut it six or eight inches down the forearm or the shoulder of the horse.

8822. If the fire had not been stopped would it have set alight the whole stable?—Yes, there was a great quantity of hay and straw there.

8823. Then the other horses would have been destroyed too?—Yes, there is no doubt about that.

8824. Can you attribute it to anything at all but a union outrage?—Nothing else.

8825. Was it because you were a company who made bricks by machine?—That is all.

8826. And for no other reason in the world?—No, we had no ill-feeling at all that we knew of with any man.

8827. Do you remember afterwards in July of that year some carts of yours being loaded with bricks made by machinery?—Yes.

8828. Where were they sent to?—Mr. Benjamin Armitage's works, at Charlestown, near Pendleton.

8829. Were there eight carts?—Yes.

8830. All loaded with machine-made bricks?—Yes.

8831. After they went up do you remember what happened to them?—The first five carts had the bars drawn from them that held the body of the cart to the shafts.

8832. If they were drawn could the carts proceed?—Yes, they could proceed, but there is no doubt at the commencement in starting it would have upset the carts and bricks and done damage to the carts, and no doubt would have lamed the horses at the back of them.

8833. Let me understand you. They had these bars drawn out?—Yes.

8834. Had the carters gone away for a time?—Yes, they were getting their dinner in the "General Birch" public-house.

8835. The eight carts were standing at the side of the public-house?—Yes.

8836. The carters being inside and no one watching the carts?—Yes.

8837. And they drew the bars out of how many carts?—The first five.

8838. What would have been the effect of drawing out those bars when they began to start again?—It would have upset the whole carts; it would have upset the body so as to upset the loads into the road.

8839. Which way would it have upset the loads, towards the horses?—Yes, towards the horses; they wanted to upset the bricks on to the fore part of the horse in the next carts, because they were all chained together; they go in pairs as a rule.

8840. It would not only have sent the bricks out, but damaged the horses behind?—The bricks would have burst out at the back of the cart and injured the horses' legs that were immediately following that cart.

8841. How many were in each cart?—500 bricks; a little over two tons.

8842. The whole load would have gone out, the cart would have tipped up and injured the horses' legs, drawing the next cart immediately afterwards?—Yes.

8843. In your judgment would it have been enough to break the legs of the horses, if the whole load of bricks had come down in that way?—Yes, I should think so; quite so; it might have broken them so as to make them in a manner worthless.

8844. When the five men came out of the public-house did they discover it?—There was a woman whose name I forget, she was a woman cohabiting with a man who worked for us, and she saw this man named Scholes, the son of a master hand-brickmaker, draw the bars out of the carts deliberately, and called him by his name, so we had this man up and he was sent to the sessions, but he was acquitted on account of the woman having committed felony within a certain time, and they would not take her evidence, she being the only person who saw him. On those grounds he was acquitted, but I believe he has acknowledged to Sergeant Woodward of the C division that he was the party.

8845. Was there only one man seen?—There was only one man seen.

8846. He was the son of a brickmaster who made bricks by hand?—Yes.

8847. Now I want to call your attention to another thing which happened, I understand, in the following August. Had you a boy named Thomas Cole, who was employed in your office?—Yes.

8848. How old was he?—About 10, 11, or 12. I never asked him the question; I should imagine that that was his age; he was not more than 12.

8849. How was he employed in the office?—Simply as messenger to receive any letters or answer any questions.

8850. He is here now?—Yes.

8851. What happened to him; he was employed in your office?—I left him one night with some letters to take to the post.

8852. You left him one night with some letters to take to the post?—Yes.

8853. What time did you leave him?—It was a few minutes after six when I left.

8854. He had some letters to take to the post office?—Yes.

8855. How far was your office from the post office?—The post office was in Ogden Street, a continuation of Fairfield Street.

8856. How far in point of distance from the post office?—Not more than a quarter of a mile.

8857. Did he go out with your letters?—Yes.

8858. As he went out did anything happen to him?—Three or four brickmakers took hold of him; they were passing apparently from their work, and two of them in particular took hold of him, one by the shoulder and the other by the legs and threw him into the pit. I passed it the next day, and though it was in the summer time the water was not much lower than it usually was.

8859. How deep was it?—10 or 12 feet deep; it was the pit that we had to supply the boiler with water.

8860. Did they throw him in and leave him there?—Yes, they left him there and ran across the river, and made their escape.

8861. Were the sides of the pit steep?—Yes, it went deeper into the centre.

8862. How much beneath the top of the earth was the water?—From the point that he was taken out of

SEVENTH DAY.

Mr. C. Smith.

12 Sept. 1867.

it must be 11 feet from the bottom of the pit to the surface of the water.

8863. How much was there above the water to the top of the bank of the pit?—Another 12 or 14 feet it went down.

8864. Do I understand you to say that it was 12 feet from the pit top to the water, and then that the water itself was 12 feet deep besides?—Yes.

8865. How was he got out?—There was a man in the garb of a mechanic passing at the time, he went in and took him out.

8866. What was his name?—I never ascertained.

8867. If he had not been taken out in that way must he have been drowned?—Undoubtedly, he could not swim.

8868. Were the sides precipitous so that he could not have climbed up?—He could have climbed if he had got to the side; but they threw him five or six yards from the side.

8869. What was the breadth of the pit; you have told us the depth of it?—30 yards at least by 40 or 50.

8870. They took him by the shoulder and threw him as much as five yards from the side?—Yes, at least five yards.

8871. If he had not been rescued in this way he would have been drowned?—Yes.

8872. Do you know any other possible reason for doing that brutal act except the one which you mentioned before?—No, the lad could not possibly have done them any harm.

8873. Is the boy in your service now?—No.

8874. How long did he continue in your service after that?—Another six or eight months after that.

8875. Have you a joiners' shop?—Yes.

8876. Did anything happen to it in November of that year?—Yes, it was set fire to in the night.

8877. Do you know who set fire to it?—The brickmakers; four or five of them were seen on the ground.

8878. Had you a watchman?—Yes.

8879. What was his name?—John Parker.

8880. He saw the men?—Yes.

8881. Did he fire a gun at them at all?—Yes.

8882. However, they escaped?—Yes, they escaped.

8883. In December of that year did you find that anything had been thrown into the cellar of your house?—Yes.

8884. What was it?—A bottle of some combustibles.

8885. And before the combustibles were thrown down was some straw thrown down?—There were two lots of hay and straw pushed in.

8886. It had been pushed into the cellar of your house, and after that some combustibles were sent in?—A bottle.

8887. Do you remember what the bottle contained?—Yes, it contained gunpowder and a sort of flannel. It was saturated in some sort of spirits, but the bottle had been broken. I had a dog in the house, and when the window was broken, and this bottle thrown through it must have broken it, or otherwise it was broken when it dropped on the floor, but at the time what it really contained I cannot be certain, because the dog had carried a portion of it into the back cellar, and had cut his mouth in doing it.

8888. You are quite sure that you found a bottle containing gunpowder?—Yes.

8889. Was there a fuse to the bottle?—Yes, a fuse which had been lighted, but it had apparently gone out. The cellar that the bottle was thrown into had been used as a washing cellar, and it might have dropped in the water.

8890. It had been lighted, but had gone out?—Yes, that I am certain of.

8891. Supposing it had succeeded and lighted the hay and straw, would the consequence have been that your house would have been burnt down?—I had a great quantity of firewood in the cellar, and it was dropped very near to the firewood. There is no doubt that it would have set the house on fire, provided the firewood had taken fire.

8892. Were the hay and straw in quantities sufficient to set the wood on fire, and the firewood being set on fire would it have set the house on fire?—Yes, there was a good armfull in the two lots.

8893. Can you suggest the slightest reason for an outrage of that kind except as a trade outrage?—It was done simply by the brickmakers.

8894. And you made bricks by machinery?—Yes, I had no personal quarrel with them.

8895. The union within whose district your premises were, by whom you suggest that the outrage might have been committed, is the Manchester union?—Yes.

8896. Now, on the 1st of May, the year before this, do you remember something happening to some carts of yours?—Yes.

8897. How many carts were there?—Three, if I recollect right.

8898. Did they contain bricks?—Yes.

8899. They were machine-made bricks?—Yes.

8900. As they were about to leave your yard did anything happen to them?—Being the 1st of May these carters had bestowed some little trouble in decorating their horses up with ribbons, and so on, as is customary, and there were three men came across the railway from Buckley and Pinstone's croft, a croft very close to our place; they came across from this place and took their knives out and began cutting the ornaments from the horses, and the reins and other parts of the harness.

8901. Was this in broad daylight?—Yes, at 4 o'clock in the afternoon, or at all events, between 4 and 5. The carters came running back to the office. I was in the office, and they called out for me to come to their assistance, so I went down the road and asked them what they were about. Before I could get a civil answer I was knocked down from behind by one of the three men striking me with a brick, and before I could get up again I had two of them on the top of me. One took me by the hair of the head and commenced bumping my head on the floor, and the other gave me a kick here and there as he best could, but I managed to get up again from them, and as I was running backwards I fell over a heap of bricks that we had placed here and there on the road for mending the road, and one called out to the other to cut the b———r's throat, and whilst I was down the nearest man came and put his hand on my chest, and then afterwards replaced his hand by putting his knee on my chest, and took a knife out of his pocket seven or eight inches long. It was opened and he made a strike at me, but it went by my right shoulder and into the ground and broke off. I kept the knife blade for some little time.

8902. Did the knife go into you?—No, it went just by my right shoulder into the ground. Of course, during the time I made all the resistance I could.

8903. How many men were employed in this outrage against you?—Three men.

8904. Could you tell from their dress, or did you know, whether they were brickmakers?—Yes, there was no doubt of it. I afterwards learnt that they were men from Stockport. They had come over to see some of their brickmaking friends at Pinstone and Buckley's yard. I ascertained it from a party who kept the railway crossing close by.

8905. Had you a struggle alone with these three men?—Yes.

8906. Were your carters by?—No, there was not anybody came to me.

8907. Where were the carters who belonged to your carts?—They were up at the yard.

8908. What did they do upon the harness being cut, had the carts left the yard when it was done?—Yes, they were proceeding along our private road from the yard to the high road.

8909. Upon the harness being cut were they able to proceed or go back?—By tying them together they were able.

8910. Had they gone back to the yard, or were they going on their journey when you were attacked?—

They were going on their journey to Hulme with the carts loaded with bricks.

8911. So that there was nobody near to help you?—No, not at the time.

8912. Did the three men make off?—One made off and the other two ran after me. When I got up I made the best use of my time to get out of the way. The two followed me some little distance, and then one of the men turned back and rejoined the other one that had gone down under the arch that goes under the railway into the brickcroft. The other followed me. I do not suppose he knew he was by himself till we got to Ashton Road.

8913. Did you run towards your own house?—No, I ran to the high road.

8914. What did the man do?—I ran into a wheelwright's shop and took up a hammer, and when he saw he was by himself he made off.

8915. Did they leave the knife in the ground?—I found it about two hours afterwards.

8916. The knife or the blade of the knife?—The blade of the knife.

8917. You have described it as being a large blade?—I daresay the blade would be from three to four inches long when it was in the knife. There was a little over three inches of it that had broken off.

8918. What you found was a bit of the blade, not the whole blade?—Yes.

8919. Were you hurt at all by what they did?—Not beyond being sore for a day or two; I was all night afterwards. It cut my head a bit and that was all.

8920. Was this in 1864?—Yes.

8921. Did you continue the making of bricks by machinery?—No, I discontinued it in 1865.

8922. Is it in consequence of this intimidation and these acts that have been done to you that you have discontinued it?—Yes, I left it before the brickmaking company gave up on that account.

8923. You ceased to be manager of that company on that account?—On the 30th of December 1865.

8924. On the 30th of December 1865, you ceased to be manager of the company on that account?—I was persuaded by my friends to give it up.

8925. In consequence of the danger that you were in?—I was manager at the time, and my wife suffered very much in consequence.

8926. From nervousness?—Yes, she died the summer following.

8927. Do you know whether that company has ceased to make bricks by machinery?—Yes.

8928. And in consequence of this intimidation and these outrages?—The number of break-downs that they had was something enormous.

8929. What do you mean by the number of break-downs?—The number of break-downs that we had inside the place; Mr. Marsden and myself, and others that were attached to the place, could not think otherwise than that we had a number of union men working there under a false garb, pretending not to be union brickmakers.

8930. They treacherously did all sorts of damage to the machinery?—Yes, we constantly had iron and all sorts of things coming through the machines and damaging them; I believe it was entirely from that that Mr. Marsden gave up brickmaking; the losses were so heavy.

8931. These break-downs continually took place to which you can attribute no other cause than that which you have mentioned?—Yes.

8932. And some on your premises had treacherously engaged themselves on your premises with the very object of doing this damage?—Yes.

8933. Are machine-made bricks better than bricks made by hand?—Yes.

8934. They are both better bricks and cheaper, are they not?—Yes; still further there is a yard to a thousand extra, which is a decided advantage to the builder, although we did not sell the bricks cheaper than the hand-made bricks.

8935. You did not actually sell them cheaper?—No, if anything a little dearer.

8936. Where did you say these premises were?—At the top end of Viaduct Street off the Ashton Road, in the parish of Ardwick.

8937. Is Ardwick in the borough of Manchester?—Yes.

The witness withdraw.

THOMAS COLE sworn and examined.

T. Cole.

8938. (*Mr. Barstow.*) How old are you?—Going upon 14.

8939. About three years ago were you in the employment of the brickmaking company in Ashton Old Road?—Yes.

8940. Do you remember one night being seized by some men?—Yes.

8941. Can you tell us in what month it was?—No, I cannot tell what month it was.

8942. Was it in the summer or the winter?—In the latter end of the summer.

8943. At what time of the day?—Seven o'clock at night.

8944. What were you doing at the time?—I was going home.

8945. Going home from the office?—Yes.

8946. Where were you?—I was just going by the pit.

8947. Where is the pit?—It is about 30 yards off the works.

8948. On the croft?—Yes.

8949. You were still in the croft?—Yes, going by it.

8950. Just tell us what happened to you?—There were about two or three men got hold of me; one got hold of me by the head and the other by the legs, and they threw me into this place.

8951. What did the men look like?—They were dressed in mechanics' clothes.

8952. And they threw you into the pit?—Yes.

8953. Was this pit out of your depth?—Yes.

8954. You cannot swim?—No.

8955. What happened to you while you were in the pit?—I was trying to get out and a strange man came by dressed in mechanics' clothes, and he got me out.

8956. Was this pit in a frequented place?—Yes.

8957. Is there a public road by it?—It is in an open field.

8958. What sort of a road goes by it?—There is a road where carts went by.

8959. Not a public road?—Yes, there is a public road and all.

8960. Did you see where the men came from?—They came across the railway arch.

8961. From under the railway arch?—There is a line crossing there and they might cross the line.

8962. Across the line of railway?—Yes.

8963. You did not know who the men were?—No.

8964. How far did they throw you in?—Five or six yards.

8965. From the bank?—Yes.

8966. Did they drag you from brink of the pit?—I was going by the brink of the pit.

8967. How far were you from the brink of the pit when they seized you?—Two or three yards.

8968. Two men seized you, did they go quite to the brink of the pit?—Yes.

8969. And then seized you and flung you in?—Yes.

8970. How were you taken hold of?—One took hold of me by the head and the other by the legs.

8971. (*Mr. Chance.*) Were you going from the office to the post office?—Yes.

8972. You were going across the road?—Yes, across that road.

SEVENTH DAY.

T. Cole.

12 Sept. 1867.

J. Scholes.

8973. You did not say anything to the men, did you?—No.

8974. And after being taken out did you go home?—Yes.

The witness withdrew.

JOHN SCHOLES sworn and examined.

8975. (*Chairman.*) What are you?—A brickmaker.

8976. How long have you been so?—17 or 18 years.

8977. Are you a member of the brickmakers' union?—Yes.

8978. And your father is also a member of the brickmakers' union and a brickmaker?—Yes.

8979. He is in the same business?—Yes.

8980. Are you still a member of the union?—Yes.

8981. And you have been so for the last 17 years?—Yes.

8982. Do you remember in July 1864 that the brickmaking company made bricks by machinery?—I know that there was a company.

8983. Do you remember seeing some of the carts belonging to the company on the Ashton Old Road?—Yes, I saw them.

8984. We understand that you got into some trouble about them?—Yes, I saw them when the policemen came and took me to them and he let me go again.

8985. When did you first see them?—I saw them when he took me to them.

8986. When was that?—On the same day.

8987. In July?—I believe it was in the summer time.

8988. How many carts were there?—I do not know, I did not count them.

8989. Were there four, five, six, or seven?—I did not look at them.

8990. You mean to tell me that you do not know hether there were one or more than one?—There might be one or two.

8991. One, two, three, or four?—A dozen for anything I know, or 100.

8992. That is all you know about them?—Yes.

8993. You had better mind what you are about.—I had had some drink, and I did not take notice of them.

8994. Have you had any drink lately?—No.

8995. You saw them there?—Yes, I saw them when the policeman came and took me out of the beerhouse.

8996. What were you doing when you saw them?—I was in the beerhouse at the side, and the policeman came and fetched me out to look at them as a woman said I had done it. I said I had not done it, and was not at them at all.

8997. Was that the first time that you had seen them?—Yes, that was the first time that I saw them.

8998. What did they say you had done?—They said that I had pulled the bars out.

8999. You had not touched them?—No.

9000. And had not seen them?—I had not seen them before the policeman took me to them.

9001. When he took you to them were the bars out?—I do not recollect whether they were out or not.

9002. When he accused you of having taken them out, you did not look to see whether they were out or not?—No, he said, "Go away; it might have been the woman's mistake."

9003. Were not you taken up and charged for it?—Yes, sometime after.

9004. How long after were you taken up?—14 or 15 days.

9005. You were taken up again?—Yes.

9006. The policeman had taken you once to look at them?—Yes.

9007. Afterwards you were taken up for it?—Yes.

9008. Where were you taken to?—To the lock-up.

9009. How long were you kept at the lock-up?—All night,

9010. Were you taken before the magistrate in the morning?—Yes.

9011. What magistrate was it, do you remember?—I do not know; he sat in court the same as you.

9012. Do you not know his name?—No.

9013. Was the case gone into?—Yes, they put me back till the next day.

9014. You were not committed then?—No, not then.

9015. Who gave evidence against you then?—I do not know who gave evidence against me.

9016. Did not you hear it?—Yes, but I do not know who it was.

9017. Was there a woman who gave evidence against you?—Yes, the woman was there.

9018. Were there any other people?—Yes.

9019. What other people?—There were two men.

9020. What did they say against you?—They said they were drawn when they had seen them, but they had put them in again.

9021. They did not say that you had done it?—How could they say that I had done it when I was in with them. I was having some beer in the beerhouse with them.

9022. You were remanded, and sent back to prison?—Yes.

9023. Did you stay in prison one night?—Yes.

9024 And came before the magistrate the next day?—Yes.

9025. What took place there?—I came out.

9026. That was all that happened to you?—I came out on bail.

9027. Then after that you had to appear somewhere to be tried?—Certainly.

9028. Where were you tried?—Bridge Street.

9029. In Manchester?—Yes.

9030. You were tried at Bridge Street?—Yes.

9031. At the sessions?—Yes.

9032. The whole case was gone into?—I believe it was.

9033. And you were acquitted?—Yes.

9034. That was all that you know about it?—That is all I know about it.

9035. Did the woman who accused you of having done it speak to you at all?—No.

9036. Did you know her?—No, I did not know her.

9037. You saw her giving evidence before the magistrate and at the sessions?—Yes.

9038. Did you know her, or had you seen her before that?—No, I had not.

9039. You had not seen her before?—No.

9040. Do you remember what her name was?—No.

9041. Had you never seen her before?—No.

9042. And she had never spoken to you by your name?—Never in her life; I never knew her.

9043. You have been a member of the brickmakers' union for some time?—Yes.

9044. Do you attend their meetings regularly?—I attend sometimes, not regularly.

9045. You do not like machine-made bricks; is it not against the rules of your union?—Yes.

9046. And have you ever done anything at all to stop them?—No.

9047. Have you known of a thing or two being done to stop machine-made bricks?—No, I know nothing at all about them.

9048. You know nothing at all in any way?—No.

9049. Do you consider that machine-made bricks hurt your trade?—The body does.

9050. Do you?—As an individual I do not care naught about it.

9051. The body considers it injurious to the trade?—Yes.

9052. And they do their best to prevent it?—I do not know anything about that.

9053. You have heard of their doing their best to prevent it?—I never heard that they have done anything together so that they could prevent it.

SEVENTH DAY.
J. Scholes.
12 Sept. 1867.

9054. You do not think that they do all they can to prevent bricks being made by machine? I have heard them grumble one to another and that they would sooner be without them than with them.

9055. Have you heard of their doing a little more than grumbling?—No, I never have.

9056. That you swear?—I do not know whether I have heard them say anything or not.

9057. You never heard of any injury being done to machine brickmakers?—No, not to my knowledge.

9058. Never anything of that sort at all?—Not to my knowledge.

9059. You attend the meetings regularly?—Not regularly; once in a 12 month, or two or three years.

9060. You never heard it mentioned?—No, not at any meeting; it is a good time since I was at one.

The witness withdrew.

JAMES BROOM sworn and examined.

J. Broom.

9061. (*Mr. Chance.*) Are you a carter?—Yes.

9062. Who employs you?—I am working for Nicholas Steele.

9063. Who employed you in 1863?—John Marsden Bennett.

9064. What did you, generally speaking, cart about?—I left the stable at 7 o'clock.

9065. What did you generally carry about, bricks or timber?—Timber.

9066. Belonging to Mr. Bennett?—Yes.

9067. Do you remember anything happening to a horse of yours?—Yes.

9068. When was that?—I cannot say exactly, but somewhere about three or four years since, this back end.

9069. Was it a horse of a particular mark?—Do you mean what colour was it?

9070. Yes.—A brown one.

9071. Had it a particular mark upon its face?—It had a white place on the front of its head.

9072. Where was this horse?—Under the railway arches, the other side of the Sheffield railway, the top of Mr. Bennett's yard.

9073. Were there other horses in the same stable?—Yes, three more besides it; there were four in altogether.

9074. To whom did the other horses belong?—Mr. Bennett.

9075. Did anything happen to your horse three or four years ago?—Yes.

9076. Tell us what that was?—Some one came in the stable and cut its throat; and cut it right under its throat, and they cut another gush right down here to a good distance down; there were seven cuts in all, but this one cut went right down and laid the flesh right open to the windpipe, only it did not cut the windpipe, but laid the flesh right open.

9077. What became of the horse?—They doctored it till it got better again.

9078. It got better from the wounds?—Yes.

9079. Do you know who did this?—No.

9080. Was the stable-door kept locked?—Yes.

9081. Was it done in the night time?—I left the stable at 7 o'clock, and we fastened the back stable-door with a hasp inside, and locked the front stable-door in the front yard, and when I came in at 5 o'clock the next morning the back stable-door was unfastened and open.

9082. Did you cart timber to different people?—Yes, to different people up and down the town.

9083. Had you carted any to the machine brick-making company?—Yes, I have taken them to Cheetham Hill and Ashton Road.

9084. Had you taken much timber?—I have been many a time to Cheetham Hill; I have been nearly the same to Ashton Road.

9085. Do you know whether anything had been ever said to Mr. Bennett about taking timber there?—No, not that I am aware of.

9086. Has anything ever been said to you?—No, nobody ever said anything to me.

9087. Nobody ever said anything about your taking timber to the brick-making company?—No.

9088. What do you suppose was the cause of the injury being done to your horse?—It was talked about at the time that they supposed it was the brick chaps had done it.

9089. Do you suppose it to have been the brick-makers who had done it?—I do not know who did it myself, except I heard the people talking about it. I cannot say who did it myself.

9090. Had you any quarrel with any of the men?—No.

9091. You had never been told that you were not to take timber there?—No, nobody had ever said anything to me about it.

9092. Did you carry bricks as well as timber?—No, it was all timber.

9093. Yours was the only horse injured?—There was only mine that was injured, only that one.

9094. (*Chairman.*) Had you more horses than that one?—Yes; there were five altogether.

9095. This was a horse that you used to employ in carrying timber to the machine brickmakers?—Yes, I went with the same horse.

9096. You always went with the same horse?—Yes.

9097. So this was the white-faced horse that you always employed in carrying timber to the machine brickmakers?—Yes, I believe I always did.

9098. For that purpose?—Yes.

9099. And it was selected to have this injury done to it?—Yes.

9100. None of the other horses were injured?—No, only that one.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

EIGHTH DAY.

Assize Courts, Manchester, Friday, 13th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C.
THOMAS IRWIN BARSTOW, Esq.
GEORGE CHANCE, Esq.
JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

EIGHTH DAY.
J. Dalton.
13 Sept. 1867.

JAMES DALTON sworn and examined.

9101. (*Mr. Chance.*) What are you?—A bricklayer's labourer.

9102. Where do you live?—In Agnes Street, Hulme.

EIGHTH DAY.

J. Dalton.

13 Sept. 1867.

9103. Are you a member of any union?—No, I have been.

9104. How long is it since you were a member of a union?—Last February I came from Stockton-on-Tees and these parties that drove me away from Manchester——

9105. Just answer my question. How long is it since you were a member of a union?—Last February I ceased to be a member.

9106. Of what union had you been a member up to that time?—I paid to what they call the Bricklayers' Accident and Burial Society.

9107. What is the name of that?—It is called the Accident and Burial Society.

9108. At what place?—At George Street, in Hulme.

9109. In this city?—It is the township of Hulme.

9110. Is that also for the protection of trade?—Yes, it appears so. Because I carried machinery bricks those parties hindered me of work and beat me.

9111. In July 1863 were you in the employment of Messrs. Fox and Burton?—Yes.

9112. Are they builders?—Yes they are builders.

9113. Were you a bricklayer's labourer there?—Yes.

9114. Were you at work at a building on the cricket ground?—Yes.

9115. At that time you were a member of the union?—Before I started to that building I was a member of the union.

9116. Just answer my question. Were you at that time a member of the union?—Yes.

9117. Were Messrs. Fox and Burton using machine-made bricks at that time?—Yes.

9118. Were there other union men working with you?—No, not then. I had left their union then. They objected to me.

9119. You told me just now that when you were working for them you were a member of the union?—Decidedly, but they had objected to me.

9120. At the time that you were working for them were you a member of the union?—No, they barred me out.

9121. Then you were not a member of the union?—Not since I went to work for Fox and Burton, they would not allow it.

9122. Listen to the question. At the time that you were working for Messrs. Fox and Burton were you a member of the union?—Not when I carried the machinery bricks.

9123. Were you carrying machinery bricks for them?—Yes, for Fox and Burton.

9124. But am I to understand that at that time you were a member of the union?—No.

9125. When you were carrying those machine-made bricks for them were any union men working also?—No.

9126. While you were working for them did a man named John Riley come to you?—Yes.

9127. Does he belong to the union?—Yes.

9128. Is that the union you mentioned just now?—Yes.

9129. Did he come by himself or with anyone else?—By himself.

9130. And did he come to you on the cricket ground?—No, as I was coming from work he followed me.

9131. Did he say anything to you?—Yes, he called me a "knobstick," and he says, "We will never allow you to work in Manchester."

9132. Did he say anything else?—Nothing else, only he called me a "knobstick," and struck at me.

9133. Did he hit you?—Yes.

9134. Did he knock you down?—No, he did not knock me down. I had to make a retreat.

9135. Where did he strike you?—He struck me two or three times.

9136. With his fist?—Yes.

9137. Where?—He struck me on the jaw for one place, and knocked the jaw against the teeth.

9138. Did you strike him?—No, I made a retreat; I ran away from him.

9139. Did he say anything else to you at that time?—Nothing else, because I went out of his reach.

9140. Did he use any threat to you at the same time?—Yes, he said, "I will take your life; I will murder you; you are an infernal 'knobstick.'" He used threats of all sorts that I cannot mention now. I cannot recollect many things that he said.

9141. You must tell us what you recollect, and nothing that you cannot recollect. What did you do after this had been done to you by Riley; did you continue to work for Messrs. Fox and Burton?—I left Fox and Burton then.

9142. Did you leave them in consequence of what Riley had done to you?—No, several parties had threatened me besides, but I cannot recollect their names, and I left them on that account, because they would have killed me if I had not.

9143. Do you know whether those other parties belonged to the same union to which Riley belonged?—I know they did all the time.

9144. But you do not know the names of any of them?—No, I do not know their names. I know them by sight.

9145. Then did you continue out of work for some time in consequence?—Yes, for several weeks, perhaps for about five weeks, and then I went away to the north country to Stockton-on-Tees, and I joined their union again. I paid 1*l.*, and I came back again last February.

9146. Did you continue at Stockton-on-Tees till last February?—Yes.

9147. And then you came back again?—I came back again, and I joined the trade union at Stockton-on-Tees. At the time of Fox and Burton's dispute they drove me out of Manchester, and then I went to Stockton-on-Tees, and I joined their union, and I came back again last February.

9148. Did you continue to be a member of the Stockton-on-Tees union during the whole of that time?—Yes; and I came back in February to Manchester and got work from a man named John Lawton.

9149. Is he a builder?—He is a builder.

9150. When you came back again to Manchester did you join any union?—No; I started to work when I came here.

9151. Had you been a member of the Stockton-on-Tees union the whole time since you left Manchester?—Yes.

9152. You came back from Stockton-on-Tees to Manchester in February this year, and you did not join any union here?—No.

9153. How long did you continue working for John Lawton?—I worked five weeks for John Lawton as near as I can recollect.

9154. While you were working for him did a man of the name of Michael Fyland come to you?—Yes; he called me a "knobstick," and beat me severely, and threatened to throw me into a limepit.

9155. Was he a member of the same union as Riley was?—Yes.

9156. Did he say anything to you at the time that he did this besides calling you a "knobstick"?—He said, "I will bury you in the lime. I will take care "nobody ever sees you go out. I will bury you in "the lime, you are a 'knobstick.'" I then ran away towards the lodge door where I could have some protection, and other parties who were there encouraged him to go on, both bricklayers and labourers belonging to the same society who were working at the same building.

9157. At Lawton's?—Yes.

9158. Were they union men?—Yes.

9159. Have they ill-treated you or threatened you at all?—They encouraged him and told him to go on and work the "knobstick." They stopped my work. They said I should stop work or else they would not work with me; that is all the other parties said.

9160. Was that before Fyland came?—That was before he came.

9161. Then they encouraged him to beat you and ill-treat you in the way you described?—Yes.

9162. Did you get a warrant against Fyland after this?—Yes, on the same day. I ran away to the C division police station and showed them how I was. I was all bloody, and they told me I would have to get a warrant in the morning, and I went and got a warrant.

9163. Which of the policemen did you see?—I do not know his name. I did not take that much notice, but he sat writing in the office.

9164. Was Fyland taken after that?—No; he got away from the police. He went away and he is not taken yet.

9165. Do you remember a few days after that being at your own house?—Yes.

9166. And while you were standing at your house did James Riley come up to you?—There came Thomas Riley.

9167. Is he any relation to James Riley?—They are friends, as far as I can judge; at all events, Thomas Riley keeps this club held at his house.

9168. Is he a member of some union?—Yes.

9169. What did he do?—He came to me as I was getting towards my own place where I lived and knocked me down and called me a "knobstick," and he left me in blood. He beat me severely.

9170. Had you said anything to him before that?—Not a word. I had never seen the man before. I was knocked down on the ground.

9171. Did he hurt you severely?—Yes, he did, in the ribs, and he split my jaw, too, and he left my blood on the flags.

9172. Did you get a warrant against him?—Yes, immediately, and he was taken and got one month's imprisonment, because they had no witness; this John Riley went swearing; they are all friends and all union men.

9173. And he was convicted and got one month's imprisonment?—Yes.

9174. Do you remember some days after that, on the Saturday, some men coming to your door?—Yes.

9175. What time of the day was that?—They came between 3 and 4 o'clock.

9176. In the afternoon?—Yes.

9177. Were you inside the house?—Yes, I was just inside the door when they came.

9178. Do you know who the men were?—Yes.

9179. Who were they?—One is named John Murray, the other is Thomas Deffley, and the other one is Michael McLaughlin, secretary to the club, and there was John Riley.

9180. Was that the man who first assaulted you?—No, it is another Riley; I cannot say whether they are friends, but he acts as friend for this Thomas Riley; he said he would have revenge for his going to prison.

9181. John Riley said this?—Yes; there is another John Riley.

9182. You have spoken of three Rileys—Thomas Riley, John Riley, and another John Riley?—Yes.

9183. Was it John Riley that said he would have his revenge?—Yes.

9184. Did the other man say or do anything?—The other man kicked at the door and said, "Where is the knobstick? I will take his life."

9185. Do you know which of the men said that?—Yes; there is young Deffley, who beat one of my children who is between 11 and 12 years old, because he could not find me; he knocked her down.

9186. That night?—Yes, at the time.

9187. Was she a little girl?—Yes.

9188. Whereabouts were you at this time?—I was away at this time; I was up at the police station, where I went for protection.

9189. You told me just now that when these four men came you were just in your house?—Yes, but I made a retreat, and they kept coming from this time up to 11 o'clock at night several times in search of me.

9190. The first time you told me four men came to the house?—Yes.

9191. And Riley said he would have his revenge?—Riley said he would have his revenge.

9192. Was that the first time he came?—That was the first time he came to the house.

9193. Did they abuse you?—They kicked at the door and broke the door, and one said, "We will throw through the windows with bricks."

9194. Did they get into the house?—They did not get into the house while I was there, but they smashed at the door, and I was forced to hide in the coal place.

9195. But at that time they did not get into your house?—No, not then.

9196. When did they come again?—My wife and children told me (they are witnesses for that) that they kept coming several times up till 11 o'clock, but I was only there twice when they came, and that is all that I can say myself; they came about 11 o'clock, and came between 3 and 4 as near as I can think.

9197. Had you gone to the police station then?—Yes.

9198. And that was in consequence of their coming to your house?—Yes.

9199. Did you ask for assistance?—Yes, and he told me if I had any friends to take lodgings, and he would send officers to convey the children and family out of the house.

9200. Who told you that?—The superintendent of the D division.

9201. Did the superintendent send any man down to protect you at your house then?—Yes, he did; he sent two policemen.

9202. That night?—Yes.

9203. At what time did they come?—As near as I can guess it would be about between six and seven.

9204. How long did they remian?—He told them to keep watch all night. They still kept about, but those two policemen went away, and said that they would send some fresh ones.

9205. You told us just now that your little girl was beaten?—Yes.

9206. At what time was she beaten?—That was the time that I went to the police station.

9207. Was that before the policemen came?—Yes, before the policemen came.

9208. You told us I think that your wife was in the house?—She was in the house.

9209. How many other children had you there?—I had three children of age, but I had six or seven children in the house at the time.

9210. Did they beat you at all on that occasion?—If they beat me they would kill me, but they did not find me.

9211. Did John Riley say why it was that he would have his revenge upon you?—Yes.

9212. What did he say?—He said he would have revenge for Thomas Riley.

9213. Thomas Riley was the man against whom you had the warrant, and who got a month's imprisonment?—Yes. He got a month's imprisonment at the city court.

9214. Were all those four men members of the union?—Yes, they were all members of the union.

9215. And did you afterwards obtain warrants against them?—I got warrants for them all, and had them taken.

9216. Was anything done to them?—Yes, they were bound to keep the peace for three calendar months.

9217. Since that time have you been able to get employment?—I have not been able to get employment. I have been out of work ever since, and I have been dependent upon the parish until last week. I commenced work, and I have had to go hauling wood It is a long way out of this town. They would not let me work in the town of Manchester.

9218. Then do I understand that you could not get work because those men would not let you work?—That is it.

9219. Could you have got work if it had not been

EIGHTH DAY.

J. Dalton.

3 Sept. 1867.

for them?—Yes, I could have got constant employment if it had not been for them.

9220. Plenty of people would employ you?—John Lawton would for one.

9221. You are still a member of the Stockton union—Up to last week.

9222. (*Chairman.*) Where is the place where you are working now?—I work for a man named William Brown at Newton Heath, at his residence.

9223. How far is that from Manchester?—It is about two and a half miles as near as I can say.

9224. Then do you walk backwards and forwards every day?—I have to go in the morning and walk back at night.

9225. What wages are you getting?—It is 4*s.* a day.

9226. What wages did you get in Manchester when you were working here?—4*s.* a day, and a quarter at night for overtime. 5*s.* a day they have put out of my way including overtime.

9227. Now you are getting 4*s.* a day, and are two and a half miles away from the place?—Yes.

The witness withdrew.

M. McLaughlin.

MICHAEL MCLAUGHLIN sworn and examined.

9228. (*Chairman.*) You understand that if you make a full and true disclosure of all the things respecting which you are examined, and of any misdeeds which you may have done, you will have a right to have, and you will have, a full indemnity from us; but you must remember that whether you have it or not entirely depends upon yourself, and upon whether you make a full and true disclosure. It will not do to tell only a part and to keep back the rest; and if you tell anything which is false, in addition to having no indemnity from us, and being liable to be prosecuted for what you have done, you will be liable to prosecution for perjury. It rests with yourself whether or not you obtain freedom from punishment for any act which you may unfortunately have done. You thoroughly understand that?—Yes.

9229. What are you?—A bricklayer's labourer.

9230. How long have you been so?—Five years last month.

9231. We understand that you belong to a society which is called the Bricklayers' Accident and Burial Society?—Yes, the Bricklayers' Labourers' Accident and Burial Society.

9232. Where are your meetings held?—They are held in George Street, Hulme.

9233. How far is Hulme from here?—Close on two miles.

9234. You have been a member five years?—Yes.

9235. Are you now secretary?—Yes.

9236. How long have you been secretary?—Rather better than three years.

9237. You have been secretary all that time?—Not all that time, with the exception of about three or six months; I cannot exactly say.

9238. Have you filled any other office?—No.

9239. I suppose it is your duty as secretary to attend the meetings always?—Yes.

9240. Where are your meetings held?—Sometimes they are held in "Hop Pole" inn, in Hardman Street, off Deansgate, Manchester, and there have been meetings held in the Mechanics' Arms, Henry Street, off Oldham Road.

9241. And where else?—In St. Mary schoolroom, Knott Mill.

9242. How did you get the use of that room?—We paid for the use of the room for a meeting.

9243. How much did you pay a night for the use of the room?—3*0s.*

9244. And where else did you hold your meetings?—I do not know of any place else where we have held a general meeting.

9245. How often do you hold your meetings?—We held one regular annual meeting in March and then if there is anything of importance there is a special meeting called, we cannot say exactly at what time or when they may be called.

9246. But do you usually hold your meetings once a fortnight or once a month?—Yes, there are lodge meetings once in three months.

9247. May all the members attend the lodge meetings?—All the members are supposed to do so.

9248. How many members have you altogether?—Well, in all the town I should say there are upwards of 900.

9249. And are they Manchester men most of them?—Yes, most of them are Manchester men.

9250. Then do you meet generally once a fortnight?—The 900 do not belong to our lodge. There are different lodges. The lodge that I belong to has somewhere about 160 or better.

9251. You have explained that very well; the whole club consists of about 900 members?—Yes.

9252. And in the club there are several lodges?—Yes.

9253. How many lodges are there?—There are nine in Manchester and its vicinity.

9254. Then how is it regulated as to which lodge you can belong to?—You can please yourself as to which lodge you belong to, but still it is all one society.

9255. But the lodges meet separately generally?—Yes, with the exception of the annual meeting or the special general meeting.

9256. There is an annual meeting when all the lodges meet together?—Yes.

9257. And there may be also a meeting of all the lodges in the club upon special notice?—Yes.

9258. Then where does the lodge generally meet?—Our lodge is held at the Daniel O'Connell's Arms, George Street, Hulme.

9259. And I suppose each lodge has a president and a secretary?—Yes.

9260. Then are you secretary of the whole club or of your separate lodge?—I am secretary of the lodge that I belong to.

9261. Then who is president of your lodge?—Michael Deffley.

9262. Then how do you manage with your finances, does each lodge collect its own subscriptions?—Each lodge is independent with regard to money matters and such as that.

9263. Then have the president or the secretary, or all the members of a lodge, the right to administer the money which is collected by the members of their lodge?—Yes.

9264. Then each lodge has a right to dispose of the funds of its own particular lodge?—Yes, to dispose of the funds as they determine in a proper manner and with general satisfaction to the members of the lodge upon their so doing.

9265. When you meet at this annual meeting and all the lodges meet together, is there then any investigation into the accounts of the separate lodges?—No, they do not inquire into anything of the sort. It is merely the working of the society.

9266. Do they have an account rendered them by the members of each lodge as to what has been done by them?—No.

9267. What is the object of the general meeting?—To show how the society has been carried on for the year.

9268. Then do you state at that meeting things which have been done for the purpose of protecting your labour during the year?—Yes.

9269. In point of fact you mention the state of your trade in each particular district, and what you have done for the purpose of advancing it or protecting it?—Yes, that is what is discussed generally.

9270. When your own lodge meets I suppose your object is to take care of the labour within your own particular district, the district of your own lodge?—No.

9271. Has each lodge its own particular district?—No. With regard to the labour all the town is connected with it. When our lodge meets it is nothing but for financial affairs and such as that.

9272. Then your power of regular anything connected with the club, although it is only a lodge, extends over the same area that the whole club does?—Yes.

9273. I suppose the rules of the whole club are the rules of each separate lodge?—It is one rule with all the lodges.

9274. Dividing it into lodges is merely a mode of better carrying out the financial operations of the society?—And for the accommodation of members attending the different lodges.

9275. What is the accommodation?—Not to have so far to go.

9276. Then it being your object to protect your labour, do you discuss at the meeting of your lodge the proper mode of carrying that out?—Yes.

9277. And if there are persons working against the rules of your society, I presume it is brought before your lodge meetings?—Yes.

9278. And those persons' names are mentioned, and the circumstances under which they are working, and how it is they are violating the rules of your society?—Yes, most decidedly.

9279. Do you also bring it before your lodge meeting when a man refuses to be a member of your society, and works in a manner which you think is injurious to your trade?—Yes.

9280. And I suppose you settle the proper means of preventing that which you consider to be an injury to your trade?—Yes, in a legal manner, in as legal a manner as we can.

9281. If anything has to be done which is a little doubtful as to whether it is legal or not, do you leave it to somebody else to see it properly carried out?—No.

9282. We have heard stories of men being thrashed because they were "knobsticks." You understand what a "knobstick" means?—Yes, I do.

9283. Then supposing a man is what you call an obstinate "knobstick," do you take means of bringing him to a different state of mind sometimes?—Yes, by moral suasion if we can.

9284. You have different modes of persuasion, have you not?—Well, all the persuasion that I ever was connected with was by word of mouth.

9285. You have not been connected with any other, but I suppose you have heard of other modes of persuasion being used, have you not?—Yes, I have heard of it.

9286. Have you any doubt whatever that injury has been done to "knobsticks" because they would not fall in with your rules?—I have never heard of any only what happened at the prison; I have just heard of that, but nothing more.

9287. To what do you allude?—There has been a bother.

9288. Where?—At this prison here.

9289. Just explain what this bother is?—All that I have heard is that there have been some men working against our society at the prison.

9290. And what did you hear was done to them?—There has been one or two of them got beat I hear.

9291. By your men?—Yes.

9292. Who did it?—I cannot exactly say.

9293. But have you heard who did it?—I do not know who did it; we did not get to hear of it.

9294. Was it not brought forward at your meeting?—Yes.

9295. What was said at your meeting; you must remember?—I cannot remember.

9296. Who were the men who were beaten first of all?—I do not know their names; I do not know one man's name.

9297. Did you ever know them?—No, I never knew them in my life. I have never seen them to my knowledge or heard their names.

9298. Have you never heard them?—I might have heard the names, but I cannot call them to mind.

9299. Were not the names mentioned at the meeting?—I cannot exactly say.

9300. Yes you can?—I cannot, upon my word I cannot. I am speaking God's truth.

9301. You can mention the fact of whether they had been mentioned or not, though you cannot remember the names?—Yes, they have been mentioned.

9302. Was it at all mentioned who had done it?—There is only one man that I can think of who was mentioned as having done it, and that is Thomas Daly.

9303. Was he a member of your society?—Yes, he was.

9304. Where is he?—He is in America.

9305. You can remember no man's name who did it who is in this country, I dare say?—No.

9306. And you swear upon your oath that you do not remember any other name being mentioned but that of Thomas Daly, who is out of the country?—That is the only name I can think of, but I am told he went to America, and I asked how it was and that is how I got to know it; the names of the men who had been beaten I dare say would be mentioned, but I do not remember if they have.

9307. Were the names of the men who had done it mentioned?—That is all I think.

9308. Were the names of the men who had done it mentioned?—I did not hear of any more but the name of the man whose name I am after telling you.

9309. But that man is gone to America?—Yes; that is how I got to hear that he had done it.

9310. Was it mentioned whether more than one man was concerned in it?—Well, I do not exactly know; it is as much as I can think of.

9311. But you will think of a little more probably?—I do not know.

9312. Can you tell me the name of more than one man who was mentioned as having done it; you cannot misunderstand me?—I cannot exactly say.

9313. Have you any doubt about it?—No, I cannot call it to mind if there is.

9314. Have you any doubt that more than one was concerned in it?—I may have a doubt.

9315. Have you a doubt?—Yes.

9316. What is your doubt?—I dare say there has been more than one man concerned in it, but I cannot exactly tell their names for I have not heard them properly; I have not thought of them. I cannot think of them.

9317. Think of them now, will you?—I cannot think of them.

9318. And think of them properly. (*After a pause.*) Now, sir, you must know?—I cannot think of it, but I have heard distinctly that Thomas Daly went to America for beating some man that was working at the prison.

9319. So you have told me?—I think John Nolan's name was mentioned.

9320. He is here, is he not?—I believe so.

9321. Is he a member of your society?—Yes.

9322. Was there any other name. You see what thinking has done; you have refreshed your memory a little?—I can think of no other name and I heard no other man's name mentioned.

9323. Do you know a man named James Dalton, who has been here as a witness just before you?—Yes.

9324. Did you know of his working against your rules?—Yes.

9325. He had been a member of your society, I understand?—Yes, some years since.

9326. And then he ceased to be so?—Yes.

9327. Do you remember when he was working for Messrs. Fox and Burton?—Yes.

9328. Did you ever hear of his being beaten while he was working for Messrs. Fox and Burton?—No.

9329. You seem astonished: you never heard of it?—I never heard of it.

9330. That you swear?—That I swear positively.

9331. Are you aware that he was working for Fox and Burton?—Yes.

9332. Was it brought before your lodge that he was

EIGHTH DAY.

M. McLaughlin.

13 Sept. 1867.

working against your rules?—Yes, it was mentioned in the lodge that he was working against our rules.

9333. Were you then secretary?—I cannot exactly say.

9334. Can you remember who was president?—A man of the name of Andrew Cox was president at that time.

9335. You say that you are secretary now?—Yes, I am.

9336. And you have been so pretty well for three years?—Yes.

9337. And who was the secretary next before you?—The secretary next before me was a man of the name of Edward Casey.

9338. Is he alive?—He is dead.

9339. And this other man was president, whose name you have mentioned?—Yes, Andrew Cox.

9340. The president now is Michael Deffley?—Yes.

9341. Do you remember Dalton's ceasing to work for Fox and Burton?—No, I cannot exactly tell the time when he left. I think he went out of the town.

9342. And he was away for some time, we understand?—Yes.

9343. Do you remember his coming back?—I remember his coming back.

9344. Do you know when he came back; was it last February?—I cannot tell to a month; I did not see him for perhaps a month.

9345. But was it this year?—Well, I think it was this year.

9346. Do you know where he lived?—Yes.

9347. Where was it?—He lived in Agnes Street.

9348. When he came back this year?—I do not know where he lived when he first came back, but the first time I saw him after he came back he lived in Agnes Street.

9349. Do you know John Murray?—Yes.

9350. Do you know a man named John Riley also?—Yes.

9351. Did you ever go to James Dalton's house?—No, never.

9352. Were you never near it?—I have been near it, but I have never been to his house.

9353. Did you ever go at all in that direction with those men whose names I have just mentioned, John Murray, and Deffley, and John Riley?—I have heard that John Murray and Thomas Deffley (mind not the president), had been in Agnes Street, drunk, and making a noise. I was told that. I went into Agnes Street, and took John Murray by the shoulder and he walked out with me, and Thomas Deffley followed us out. That is all I had to do with it.

9354. When they were in that street were they near the house of James Dalton?—They were within a door or two of it in the middle of the street.

9355. What they had been doing there, or how long they had been there, you do not know?—I do not know; I was told, and I went to take Murray away.

9356. What were you told?—I was told they were drunk and shouting in the street.

9357. Near Dalton's house?—I was not told that they were near Dalton's house.

9358. How came you to be near the place at the time?—Our lodge is not so very far off the place, and I was in the lodge.

9359. It was a lodge night, was it?—Every Saturday night is a lodge night.

9360. And information was given to you when you were in the lodge that those men were in the street?—Yes.

9361. And not so far from Dalton's house?—Not so very far, about a door or two I should think.

9362. What did you hear them shout out?—I did not hear them shout out anything. I only came into the street and deliberately took hold of Murray's shoulder and walked him out.

9363. Is Agnes Street a large street?—No, it is a very small street.

9364. Were you told what they were shouting out, and what they were doing?—I was told that they were drunk, and that they were shouting in Agnes Street.

9365. That you have told me before?—That is all I can tell you.

9366. Were you told what they were shouting?—No, upon my oath that is all I can tell you. I was only told that they were drunk and shouting.

9367. I suppose that you were carrying on the business of the lodge?—The business had not begun; I was downstairs.

9368. How came the information to be given to you that those two men were drunk in Agnes Street, only two doors off Dalton's house?—Because John Murray and I had been companions for a long time, and it was thought that I should have more influence over him than other parties.

9369. Who gave you the information?—I cannot exactly say now who gave me the information.

9370. Was it one of the members of your lodge?—No, I cannot say who it was, but I believe to the best of my opinion that it was a woman who gave me the information.

9371. The wife of one of the members of your lodge?—I did not know who the party was. I do not know who it was now, but to the best of my opinion it was a woman who gave me the information.

9372. To the best of your opinion was it the wife or relation of one of the members of the lodge?—I cannot say.

9373. Do you mean to say that you have the slightest doubt about it?—I have not the slightest doubt about it.

9374. How came she to come and tell you in the lodge that they were making this noise and disturbance?—Well, she did not tell me personally. She told all that were in the beerhouse as well as me; everyone that was in heard it.

9375. Then it was not the fact of your having influence with Murray, which was the reason you gave me just now, that induced you to go out?—She told all that was in the beerhouse, but directed her discourse mostly to me.

9376. Were there many people there?—Yes, there were a good many.

9377. Your business was just going to begin, I understand?—Yes, it was before business began.

9378. And she came in and proclaimed that John Murray and Deffley were in the street drunk and making a noise?—Mind, I am not swearing that it was he or she, but to the best of my opinion it was a woman.

9379. But somebody came in to this house where you were and gave you information that this noise was going on outside?—Yes.

9380. Is your lodge in Agnes Street?—No, it is in George Street.

9381. How far is that from Agnes Street?—I do not think it will be above 40 yards from one end of Agnes Street.

9382. How far is it from Dalton's house, is it within a door or two of where you found them?—It is not above 40 yards, and Dalton's door is not quite 20 yards from the street, I think.

9383. So because those people were shouting and making a row they came to the lodge where you were, and gave you the information that those people were making a disturbance?—Yes.

9384. Did he or she tell you, whoever it was, what they were doing?—They told me that they were drunk and shouting, that is all I understood.

9385. Did the person tell you what they were shouting?—No.

9386. You have no idea?—Not the slightest.

9387. Did you find out afterwards that they had been at Dalton's house?—I did not find out that they had been at the house, but I heard that they were shouting.

9388. Against whom?—Against Dalton.

9389. You have heard that since, have you; who told you that?—Well, I have heard of it from many parties; I cannot name one.

9390. Was it mentioned at the lodge meeting that night that they had been shouting against Dalton?—Yes, it was mentioned.

9391. Was it mentioned that they had been trying to get hold of him, but that they could not?—Well, I cannot say. It had been mentioned that they were in the street shouting for Dalton.

9392. And it was in consequence of that being told you that you went out?—That had not been told me then; I was only told they were drunk and shouting when I went to take them away. I heard that after.

9393. Did you hear afterwards that they had ill-used one of his children?—I never heard anything about it only what I heard in the court.

9394. Where?—In Bridge Street.

9395. When they were taken?—Yes, when they were taken. I heard Dalton himself and his daughter swear that Deffley struck his daughter. I never heard of it before that time.

9396. Is money ever paid by your lodge to persons when they are out of work?—No.

9397. How do you spend the finances of your lodge?—There is what they call an accident and burial fund. We pay five guineas when a member or his wife dies, and 8*s*. a week accident money.

9398. Are there any rules of your society?—Yes.

9399. Are they printed rules?—Yes, printed rules.

9400. Can you give me a copy of them?—I have not them with me.

9401. You can get one, I daresay?—Yes, I can get you one. I was not aware that they were needed.

9402. I suppose your rules relate mainly to burials and accidents?—Yes.

9403. Nothing else?—Nothing else.

9404. Do you pay the money of your lodge to present members of your lodge who are out of work?—No.

9405. Never at all?—Never at all to my knowledge.

9406. But you are secretary you know?—Yes.

9407. Then do I understand you to swear that the money of your lodge is only paid in cases of accidents and burials?—The money of our lodge is paid for accidents and burials; I never knew a member yet to get a farthing of money who was out of work.

9408. That is scarcely an answer to my question. I asked if the money of your lodge is ever paid for anything at all except for cases of accidents and burials?—Yes.

9409. What is it paid for?—It is paid for the support of the society, for protection of course.

9410. Now what is it that you mean by saying that it is paid for the support of the society and protection; for what is that money paid?—In the first place there is a delegate paid by the society.

9411. What are the duties of that delegate?—The duties of the delegate are to go round the town to see that all the men that are at work on each job are society men.

9412. And if he finds men working who are not society men, I suppose his duty is to report to your meeting?—Yes, that is his duty.

9413. Then suppose he does report that there are men working who are not society men, what action is taken upon that?—The action that is taken upon that is this; the men are brought before our meeting——

9414. What men?—Those men who are working who are not society men. They are asked to come and join our society, and most of them generally do.

9415. That is if they are not members already?—Yes.

9416. Then suppose they do not come?—If they do not come our men do not work with them.

9417. Do you take any other measures to make them become members of the society?—No, I never knew any measures taken but for our men to leave the job.

9418. Suppose the consequence is that your men do not work with them, and they go out on strike, who pays them while they are on strike?—We pay them on strike.

9419. That is what I asked you before, and you said you did not do so. If your men are on strike for those reasons which you have mentioned, you pay them for being on strike?—Yes.

9420. That cannot last so very long, you know?—No.

9421. Do you take any other measures to prevent those men working who are "knobsticks?"—No, not to my knowledge, ever since I have joined the society with the exception of getting them to join the society or taking our men away.

9422. But supposing those men continue to refuse to belong to the society, what happens?—Our men will not work with them.

9423. But as you said very properly just now, that cannot last long?—They may or may not.

9424. But do you mean to tell me that measures have not been taken to prevent them from working?—Yes, there have been measures taken to prevent them from working.

9425. What measures have been taken?—The bricklayers working on the job have been paid and withdrawn from their work.

9426. That is to say, supposing men are working on a job who do not belong to you, and supposing your men we will say have struck, what measures do you take to prevent those, as regards those who are working on the job, and who refuse to belong to your society?—We pay the operative bricklayers.

9427. Then you try to bribe them, as it were, to leave the work?—Yes.

9428. Suppose they will not be bribed, what then?—Then we have to let them work on.

9429. You have no other measure?—Then we have to let them work on.

9430. Have you never known any other measures?—I have never known any other measures.

9431. What do you think made James Dalton leave the country and go off to Stockton and Durham?—I cannot tell you exactly; he has a brother there.

9432. You have no notion why he left Fox and Burton's employ?—Not the slightest.

9433. It does not at all occur to your mind why he left?—No, not at all.

9434. And you have never known any measure of any kind used except what you call "persuasion?"—No.

9435. Have you never known any money paid in any other way besides that which you have mentioned?—No.

9436. Do you keep the books?—Yes.

9437. Have you the books?—Yes, they are in the lodge.

9438. Can you bring your books to us if we wish it?—Yes, at any time.

9439. Do you keep a cash account at the bankers?—We have a cash-book, and we can produce our books.

9440. Have you a cash-book at the bankers?—Not at the bankers.

9441. Do you keep in your cash-book an account of the money that you receive?—Yes, and the money that we have on hand and all.

9442. Do you keep all the money that you have in the box?—No, we leave it in a trustee's hands.

9443. Who is the trustee?—The Reverend Canon Toole, of Hulme.

9444. He, I presume, banks with somebody?—Yes, I suppose so.

9445. With whom?—I do not know, I never heard.

9446. Then, if you want money, do you go to the trustee and ask him to draw a cheque?—He gives us the ready money.

9447. Then he draws a cheque on the bank and gives you the money?—I never draw a cheque.

9448. But he draws a cheque on the banker and gives you the money?—Yes.

9449. Are your books now in the same state that they have been in for some time?—Yes.

9450. And would they show truly the payments

EIGHTH DAY.

M. McLaughlin.

13 Sept. 1867.

made by you?—They would show the payments made by us and how the money has been expended.

9451. You have no general entries of "sundries" or "incidental expenses," have you?—No, there is an item for everything by the name that the money has gone for.

9452. How many delegates have you?—One.

9453. What is the district which he has to go over?—All Manchester and Salford.

9454. What is his name?—John Nolan.

9455. The same man that you mentioned before?—Yes.

9456. Has he been your delegate for some time?—He was delegate when I joined the society, and he has been so ever since.

9457. What is he paid by you?—He is paid 24*s.* a week now, according to our week's wages.

9458. Have you never known of Nolan using violence to anybody?—Yes, I have told you.

9459. I did not understand you to say that of Nolan before. What is the violence which you have heard of Nolan using?—The violence that I have heard of Nolan using was that he struck some man on this prison job at the time that Daly did.

9460. Was it a man named Gough?—I think that was the name.

9461. How long is that ago?—I think it is three years, or perhaps better.

9462. That is for being a non-union man and working at your trade?—Yes.

9463. Was that within his duty?—No.

9464. It is not part of his duty as a delegate?—No.

9465. But he has always continued as delegate ever since?—Yes.

9466. There was no reprimand for his zeal in your cause at all, was there?—Well, I never heard of any.

9467. Have you ever heard of his striking a man named Woolford?—No, I never heard that name.

9468. What other person have you heard of Nolan striking besides Gough?—I never heard a man's name mentioned that he struck besides Gough. I heard of his using violence to Gough, him and Daly, as I told you.

9469. But I understand you to say that Gough is the only person that you have heard of his using violence to?—That is the only person.

9470. You never heard of a person of the name of Woolford?—No.

9471. He had nothing extra that week that he struck Gough, did he?—No, he never had anything extra besides the regular week's wages that I know of.

9472. You were supposed you say to have influence with John Murray?—Yes.

9473. Had he been at the lodge that night before you went out?—He might have been in the beerhouse, but he had not been in the lodge.

9474. Had you seen him?—No, I had not seen him.

9475. You had not seen him at all that evening before?—No, not before that.

9476. Did he afterwards come there with you?—No, not with me then, but he has come in the lodge after.

9477. But did he afterwards come that same night there?—Yes, he was in the lodge that same night.

9478. Afterwards?—Yes.

9479. When you went out into the street to fetch him, did he go back to you to the beerhouse where the lodge was held?—He came out to the street with me and went home, and afterwards came back into the lodge.

9480. And he attended your meeting?—Yes.

9481. Although he was so very drunk?—Yes, he had nothing to do with our meeting, only to come into the room.

9482. So that although he was so very drunk, that you went and fetched him out of the street, he went home, you say, in the first instance, and afterwards attended your meeting?—Yes.

9483. Who was the other man that you mentioned?—Thomas Deffley.

9484. Did he afterwards come and attend the meeting?—I cannot say; you know all the members are not supposed to attend the meeting on the Saturday night.

9485. Answer my question: Did he afterwards go and attend the meeting?—I think not.

9486. Will you swear that?—To the best of my opinion I will swear that he was not in the room that night.

9487. Besides the president and secretary, have you a treasurer?—Yes.

9488. Who is the present treasurer?—Michael Reynolds.

9489. How long has he been treasurer?—He has been treasurer for about two years, or something like that.

9490. Who was treasurer before him?—Francis Lasley.

9491. How long does a treasurer generally remain in office?—Three months is the period without they are re-elected.

9492. They can be re-elected?—They can be re-elected.

9493. Is the subscription per week or per year?—It is 1*s.* per month.

9494. Is there any payment on entrance?—Yes, 1*l.* entrance.

9495. (*Mr. Chance.*) Do you know the reason why Dalton left Fox and Burton's employ?—No, I have never heard the reason.

9496. Did you not hear that it was because they were ill-using them for working at the machine-made bricks?—He worked at the machine-made bricks after our members leaving Fox and Burton's, but I never heard the reason or exactly the time that Dalton left Fox and Burton's; after he left Fox and Burton's I heard that he was working at Middlesborough.

9497. Have you a rule in your society against machine-made bricks?—No, there is no rule to that effect.

9498. You mean that there is no rule printed?—Yes.

9499. But it is not a rule upon which you act?—It is acted upon, but there is no printed rule.

9500. But when a builder uses machine-made bricks, do not your men refuse to work for him?—Yes.

9501. Then it is a rule upon which your society act though it is not printed?—Yes.

9502. And in all cases where a builder uses machine-made bricks you draw your men off?—Our men are not supposed to work for him.

9503. And suppose a non-union man is working for a builder who uses machine-made bricks, what do you do to him?—Not at all; any person may work with a man that uses machine-made bricks, but our men will not work with him.

9504. Then it is one of your rules?—It is a rule we go by, but it is not printed.

9505. Have you any other rule besides that which is not printed?—We may adopt a rule at any time; there may be others.

9506. My question is whether there are not others?—Yes.

9507. What other rules have you which are not printed?—Well, there is a rule which is not printed, that each man takes his place according to how he starts in the shop.

9508. That is not among your printed rules?—No.

9509. Have you many other rules besides those which are printed?—Well, I cannot say that there are many.

9510. Are not those rules which are acted upon though they are not printed, binding upon your members?—Yes, they are binding among the members.

9511. You told us just now that this drunken row in Agnes Street was just about the time of your meeting taking place?—It was before our meeting took place.

9512. At what time did your meeting take place?—It is supposed to take place at 6 o'clock, but it begins about half-past 6, or so.

9513. Was that the first that you heard of Murray

and Deffley being in Agnes Street?—That was the first.

9514. Then you did not know that they had been there some two or three hours before that, did you?—No, I cannot say how long they had been there before that, but that was about the time that I heard of it.

9515. Do you not know that Dalton has actually been prevented from working by your men?—Yes, I know that our men would not work with him.

9516. Do you not know that he has been obliged to leave the place because they would not work with him?—I do not know that he has been obliged to leave the place, but our men have.

9517. Have you not heard of his being beaten by your men?—I have heard Thomas Riley accused of striking him in the court.

9518. Have you never heard of his being beaten by John Riley?—He has never been beaten by John Riley.

9519. Have you not heard of his being beaten by Michael Fyland?—Yes, I have heard of his being thrown into a lime hole or something of that sort by a man of the name of Michael Fyland.

9520. Was he a member of your union?—He was a member of our society, though not belonging to the lodge.

9521. Who is the president of the general society?—There is no general society; there is a president and a secretary and a treasurer, and other officers to each lodge.

9522. But is there no executive to manage the general affairs of the whole society; is there no committee of any kind?—Yes, there is a committee.

9523. Of how many does that committee consist?—Of six or seven, sometimes seven, and sometimes six.

9524. And is there a president?—Yes.

9525. And a secretary?—Yes.

9526. And a treasurer?—There is no treasurer needed for that.

9527. There are only a president and secretary?—Only a president and secretary.

9528. Who is the president at the present time?—John Murray.

9529. Is that the John Murray who was so drunk in Agres Street?—Yes.

9530. And he is president at the general society?—He is president of the committee.

9531. Who is the secretary?—Francis Quin.

9532. Are they a sort of committee of appeal for any question which you bring before them?—Yes.

9533. (*Mr. Barstow.*) How comes it that your men will not work in the yard of a master who uses machine-made bricks?—Well, it is a rule that they shall not.

9534. But why have you adopted it?—I cannot exactly tell you; I was not at the making of the rule.

9535. Do you mean to say that you do not know the reason of it?—No.

9536. I suppose you being a bricklayer's labourer, are in other words a hod-man?—Yes.

9537. Does it make any difference to a hod man whether he carries hand-made bricks or machine-made bricks?—It makes no difference.

9538. Not the least difference?—It might make a slight difference personally, that the machine-made bricks are a little heavier than hand-made bricks.

9539. That being so, how comes it then that you object to work for any one who uses machine-made bricks?—All the objection that I know of is that it is a rule which is adopted by the members not to work with them.

9540. It is not a rule adopted for the personal convenience of the members of your society according to what you say?—Not that I know of.

9541. Then I suppose it is for the convenience of some other society, is that so?—Well, it may be, and it may not for anything I know. You know I do not know all the workings of the society exactly.

9542. Have you any agreement with any other society on the subject?—No, not that I know of.

9543. You will swear that you do not know of any agreement with any other society?—I do not know of any agreement belonging to any other society.

9544. Will you swear that you do not know of any understanding with the bricklayers' society?—I will swear that I do not know of any understanding between the brickmakers and our society that we should use machine-made bricks.

9545. Then I want some explanation of how you come to be so bitter against persons using machine-made bricks?—I cannot tell you; all I know is that it is a rule which is adopted.

9546. But you are the secretary of the society which adopted it?—Yes, I was not secretary at that time.

9547. But you are secretary now?—I am secretary now.

9548. But can you give me no reason for it?—No.

9549. You can give me no reason whatever why that rule is adopted?—No.

9550. And you positively swear that you are not aware of any agreement or understanding with any other society, by virtue of which you have that rule?—No, not the slightest; I do not know of any reason or any connexion with any other society, why we should not use them.

9551. (*Mr. Chance.*) Is this rule made by the lodge, or is it made by the committee of the general union?—I believe that it is made by the committee of the general union; it is not made by the lodge.

9552. (*Mr. Barstow.*) But all your rules are made by the general committee; no lodge makes rules?—No, no lodge makes rules.

9553. (*Chairman.*) When you have your annual meeting I suppose somebody sits in the chair as president?—Yes.

9554. Who did so last time?—John Fox.

9555. When was the general annual meeting?—The 7th of last March.

9556. And John Fox was in the chair as president?—Yes.

9557. Who was the secretary?—I was myself.

9558. Were you voted to the secretary's chair, or how came you to sit in the secretary's chair?—I was voted. There is a president and secretary for the night.

9559. Then it varies does it from year to year; was it voted on that occasion?—It was voted on the occasion.

9560. Then does the society meet for the purpose of making rules, such for instance as the rule about which you have just been asked?—Yes, they often change rules and make additional rules.

9561. In what way would this rule be made for which you say you do not understand in the least the reason, namely, that your men shall not work for men who are machine-made bricks?—I have never heard that discussed.

9562. But it is a rule of the whole society which is observed by all the nine lodges, is it not?—Yes.

9563. If there is a rule of that kind which has to be observed by all the lodges, how is it passed by the general meeting?—I do not think it has been passed by the general meeting at the time they struck working at machine made bricks. I do not think that there has been a general meeting since that time.

9564. How can you account for it; how long have you been a member?—Five years.

9565. Then you have had plenty of time to ascertain that, I should think: how do you account for such a rule existing when you say it does not make the slightest difference to the operative labourer whether he carries up so many bricks of one description or so many bricks of another description?—All the difference is what I have told you that the machine-made bricks are a little heavier than the hand-made bricks.

9566. You might get rid of that difference by taking one or two out. Do you expect to be believed when you talk such nonsense as that?—There may be a reason, but I do not know it. I do not know everything.

EIGHTH DAY.

M. McLaughlin.

13 Sept. 1867.

9567. Do you expect that any one can believe you when you have been secretary, and a member of the society for five years, and you tell us that you do not know the reason of an apparently useless rule?—I do not know the exact reason.

9568. Have you any notion—never mind whether it be exact or not—if you imagine that a single word which you have said is to be believed; you must say, because you must know?—I do not know any more than that the bricklayers would not use their bricks, and the men were taken away from Fox and Burton's, and then our men would not work with brickmakers who did not belong to the society.

9569. The bricklayers would not use the bricks, and because they would not use the bricks your men would not carry them?—Yes.

9570. But why is it the interest of the bricklayers not to use those bricks?—That I cannot tell.

9571. Do you think that it is the interest of the men who make the bricks by hand to have any sort of understanding between you and them?—I do not know how it can be.

9572. How can you account for a thing which is apparently against your own interest, that your men should have to leave the work for which they are getting their regular wage, when it is absolutely a matter of indifference to them, as you put it, whether they do so or not?—All the reason I ever knew why they would not carry machine-made bricks was because the bricklayers would not use them.

9573. That is no reason at all?—That is all I have heard.

9574. Do you mean to swear that you have no notion why your men should cease to work with a machine brickmaker?—I do.

9575. None whatever?—None whatever.

9576. Is there any minute book of the annual general meeting?—No.

9577. You have a minute book of your lodge, I suppose?—Of course.

9578. Does that contain the resolutions which you pass?—No, there is nothing of the sort.

9579. What does that book contain?—What book?

9580. The minute book of your lodge.—We have what we call a ledger and check-book to take down the expenditure and income of the lodge.

9581. So you told me before. In addition to that have you a minute book to take down resolutions?—No, they must be put down in the rule books.

9582. But is there no record of your meetings once a month?—We do not meet once a month, or once a week, or anything of the sort, for adopting rules or anything of the sort.

9583. But if you meet at all on the lodge night is there no entry of your proceedings in the book?—It is just written down on a piece of paper and it is written down at the quarterly meetings, and then the members are satisfied with what has been done, and it is generally thrown on one side.

9584. There is no book of that sort, you say?—No, there is no book to that effect.

9585. (*Mr. Chance.*) When members are behindhand with their contributions is no notice taken of that at the meetings?—No, not at the meetings. There is nothing at all of the sort discussed at the meetings.

9586. Not when a member is behind, and does not pay his arrears?—On Saturday night.

9587. Do you not keep any minute book for the meeting on Saturday night?—Yes, of course if a member is in debt his debt is in the book.

9588. Do you not pass any resolution as to what is to be done when a member is in arrears?—When a member is in arrears, he must be over 1*l.* and then he is excluded from the society.

9589. Do you not take any action upon that if he is in arrears over 1*l.*?—We acquaint the delegate if a member is in arrears to a certain extent, and when he meets him he tells him about it, and then he tells him to come up on the Saturday night.

9590. Who tells the delegate?—I send word for our lodge.

9591. But is not this conduct brought before the meeting?—No.

9592. If he refuses to pay or does not pay his arrears what is done?—Well, I do not know of any members who have been in that manner unless members that have owed over 1*l.*, and then they are excluded from the society if they owe more than their entrance money.

9593. Have you ever had members refuse to pay arrears of over 1*l.*?—Yes.

9594. What is done with them?—They are excluded from the society.

9595. Is there no resolution passed to that effect?—Yes, of course.

9596. Is there no entry of that resolution?—No, there is no book. There is no entry about it, that member is excluded without he pays his money.

9597. Is it not put down anywhere?—Not that I know of. It may be written down on a piece of paper, but there is no book to that effect.

9598. But is it written down?—I never wrote down one of that kind, and therefore cannot say.

9599. Did you ever see any other secretary write it down?—I cannot see any other secretary, I have nothing to do with any other secretary's business you know.

9600. Is there not a resolution passed with regard to such conduct?—The resolution which is passed with regard to his conduct, is, that our men do not work with him.

9601. Is that written down?—No, it is not written down.

9602. Do you not keep a record of those resolutions which are passed?—No, notice is given to the members of the town that this man is not to work. It is not a lodge question, the committee may have such questions, but if there is a man of this sort he is not brought before the lodge. There is a committee formed to which I do not belong.

9603. Is not this man's conduct brought before the committee?—No, there is a committee formed, one man from each lodge, and the man is brought before that committee. His conduct is not brought before the lodge any more than the secretary has to acquaint the delegate, and if he does not pay he is brought before the committee.

9604. The committee of the union?—Yes.

9605. Then the lodge has no power upon that to dismiss a member for non-payment of arrears?—No, not before he owes over 1*l.*

9606. And in that case it is brought before this committee of the whole union?—Yes.

9607. (*Chairman.*) You say that there is a committee formed of members from each lodge?—Well, there are not nine every week, the out of town lodges come in once a month.

9608. How many does the committee consist?—It consists of about six and sometimes seven.

9609. But each lodge has the right to send a member to the committee?—There are five lodges that have a right to send a member to the committee every week.

9610. What do the other four do?—Some of those lodges are four or five miles away, or three miles, and they come only once a month.

9611. But the other five come every week?—Yes.

9612. They of course have books of their resolutions?—They may have.

9613. Whose duty would it be to keep that book?—The secretary's.

9614. Who is the secretary?—Francis Quin.

9615. He is the secretary of the committee?—Yes.

9616. And he has a book of that description?—I suppose so.

9617. How many books has your lodge got?—Two.

9618. Are those the only books that you keep?—That is all; one is the ledger and the other is the check-book, a check against the ledger.

9619. Whose duty is it to keep those?—It is my duty to keep one, and the check clerk John Fox keeps the other.

9620. Which do you keep?—The ledger.

9621. Then John Fox keeps the check-book?—Yes.

9622. Quin has the books of the committee, you say?—Yes, if there is a book of the committee he would have it.

9623. Whereabout does he live?—I cannot tell that, he lives somewhere about Bank Top, but I do not know exactly where.

9624. (*Mr. Barstow.*) Have you any control over the general books of the society?—No.

9625. You have only one book in your possession?—That is all.

9626. That is the cash-book?—Yes.

9627. (*Chairman.*) You say that you have no objection to our seeing that book, we can see it at any time?—Yes, at any time, there is not the slightest objection.

9628. Is Fox here?—No, he is not here; he is at his work, I expect.

9629. Will Fox let you have the book, or will he come himself and bring it, if you mention it to him?—He would either come or let me have it.

9630. It is no use his coming if you could bring the two books?—I could bring the two.

9631. We could easily obtain it, by serving a summons, but if you will bring the book we can see what is in it?—I can bring the two books.

The witness withdrew.

Thomas Deffley sworn and examined.

9632. (*Mr. Barstow.*) Are you a member of the Brickmakers' Labourers' Accident and Burial Society?—Yes.

9633. How long have you been a member?—12 months.

9634. Do you remember being with Murray in Agnes Street?—Yes.

9635. That was on the Saturday night, I think?—Yes.

9636. Who is Murray?—He is a labourer.

9637. But is he a member of your society?—Yes.

9638. Does he bear any office in your society?—Yes, at present he does.

9639. What office does he bear?—He is a committee man.

9640. He is president of the committee, is he not?—No.

9641. Was there any one else with you?—No, not that I know of; I was drunk.

9642. If you were drunk, how do you know that Murray was with you?—Because we were together before we got drunk.

9643. Then do you know or do you not know that Murray was with you?—Murray was with me.

9644. Was anybody else with you?—There was a crowd in the street; I do not know who knew me or who did not know me; I know I and he were together.

9645. Do you live in Agnes Street?—Yes.

9646. What were you doing in the street that night?—I was going to go home after coming out of the beerhouse; I lived next door.

9647. Why did you not go home?—Because I met James Dalton who was drunk in the street, and I was drunk, and we set quarrelling and falling out.

9648. How do you know that he was drunk?—Because he was shouting and quarrelling in the street, shouting for any one to come out in the street.

9649. You said just now you were so drunk that you did not know how many people were with you, and now you tell us that Dalton was drunk; how do you know that?—I can tell when a man is drunk when he comes quarrelling though the street; I could tell that there was a crowd in the street, but I could not tell who knew me or who did not know me.

9650. Was anybody else with you besides Murray?—No, nobody that had any connexion with me besides Murray.

9651. Where did you meet James Dalton?—I met him in the middle of the street just by, just at my own door.

9652. Will you swear that James Dalton was in the middle of the street?—I cannot swear exactly to the centre of the street, but he might be 12 yards from the corner of Newcastle Street.

9653. Did you go to James Dalton's house?—I went to his house afterwards.

9654. With whom was he quarrelling?—He was shouting for any one to come out and fight with him.

9655. Did any one come out to fight with him?—I went out and I was going home, and seeing them fighting and I being drunk, I set a fighting with him.

9656. What did you do to him?—I did nothing to him; he got away before I could hit him.

9657. Where did he get to?—He got into his own house.

9658. Did you follow him there?—I did not follow him there and then, but I followed him after.

9659. What did you do at his own house?—I asked him to come out; I wanted him out to fight him.

9660. Did you call in a loud voice?—I went to his own door and I asked him if he was in to come out, and I asked him to come out and fight in the street.

9661. Did you knock at the door?—The door was open.

9662. Was it open the whole time?—All the time that I was there.

9663. Who came to the door?—I cannot exactly say who came to the door; I do not know whether it was his wife or daughter; I could not say which.

9664. Did Dalton come to the door?—No, he did not.

9665. But either his wife or daughter came?—Either one or the other; I do not know which it was.

9666. Why do you say that you do not know which it was?—Because I cannot exactly say, I cannot think of which came.

9667. What did you do to either his wife or daughter?—I did nothing to either of them then; I walked away.

9668. What did you do then; did you go away?—I walked away.

9669. Where was Murray all this time?—He was in a beerhouse drinking.

9670. Then Murray was not with you then?—Not at that time.

9671. When did Murray leave you?—He left me half an hour before I went to his door as near as I can guess.

9672. Then did you go back to Dalton's door?—No, I did not go back any more.

9673. Then is that all that took place at Dalton's that night, as far as you know?—Before that his youngest daughter hit me with a brick on the left side, and I hit her a slap on the jaw, that was all.

9674. When was that?—That was at the time when we were quarrelling in the street.

9675. You say that the daughter hit you with a brick?—Yes, she hit me on the left side with a brick while we were in the street.

9676. Did you strike her?—I struck her with the left hand a slap on the jaw with my open hand.

9677. You know that was the daughter, do you?—I am sure it was the daughter.

9678. Were you at Dalton's door more than once that night?—Only once.

9679. How long did you stay?—I might be three minutes at the door. I only asked whether he was in, and then I walked away when he was not in. I might say a few more words and then I went away.

9680. Were you quiet or what were you doing in the street?—I live in the street, and I was drunk, and I was going home.

9681. But were you going home quietly, or were you making a noise?—I was going home quietly.

9682. Where did you go that night when you went

EIGHTH DAY.

T. Deffley.

13 Sept. 1867.

away?—I went into my house and had something to eat and then I went out drinking again.

9683. Where did you go when you went out?—I went into a beerhouse.

8684. What beerhouse is that?—It is called the "Harp and Shamrock."

9685. In what street is that?—Newcastle Street.

9686. Did you go anywhere else?—Well, I do not know I am sure whether I went anywhere else or not.

9687. Did you go to the lodge that night?—I do not know.

9688. Did you or did you not?—I do not know where I went that night.

9689. Do you mean to say you do not know whether you went to the lodge?—I do not know.

9690. Do you really mean to tell us you do not know whether you went to the lodge or not?—I do not know.

9691. Did you go to the house where the lodge was held?—I do not know.

9692. Were you summoned before the magistrates?—No, I was not summoned before the magistrates.

9693. Did you go before the magistrates?—Yes, I was brought before them.

9694. How were you taken into custody then?—I was taken out of bed.

9695. Where was that?—I was taken out of my bed at my own house where I lived.

9696. When was that?—Towards the night on Thursday night.

9697. This was on Saturday?—This was on Saturday when the row was, and this was on Thursday night, but it was a few weeks afterwards.

9698. With what were you charged before the magistrates?—They charged me for an assault for beating him.

9699. An assault upon whom?—Upon James Dalton.

9700. At what time did they lay the assault; on this Saturday night?—Yes.

9701. What was done with you?—I was bound to keep the peace for three calendar months in two 30*l.* bails.

9702. Was anything done to you for striking the girl?—No; that was all that was done to me altogether. He swore I broke his daughter's jaw-bone, but she was there giving evidence against me, and I only struck her with my open hand.

9703. How did he come to swear that?—I do not know. He came and swore a good many things.

9704. Were you charged with the assault on the daughter?—No, not her; she came as witness against me, that was all.

9705. Have you ever been charged before the magistrates with the assault upon the daughter?—No, not that I know of. I did not see the warrant, but I was only charged with assault and beating him.

9706. You were not punished for it at any rate; you know that?—Yes.

9707. When you were shouting in the street what did you shout?—I was not shouting.

9708. You did not shout at all?—No.

9709. Did you call Dalton any names?—I called him a "knobstick."

9710. Anything else?—Nothing that I am aware of.

9711. Did you threaten to take his life?—No.

9712. Was a man named Riley there with you?—No, he was not.

9713. Do you know John Riley?—Yes, I know him well.

9714. Will you swear he was not in the street with you?—He was not with me; I never remember seeing him there that night.

9715. Do you remember seeing Michael McLaughlin there that night?—He came to a different street to fetch me and Murray home; that was two streets off where Dalton lived; that was two streets away when I saw him.

9716. What street was that?—That was Poplar Street. That is where I saw McLaughlin.

9717. Do you swear that McLaughlin did not come to you in Agnes Street?—I will not swear to it, but I know I did not see him till I came to Poplar Street.

9718. Was Riley with you in Poplar Street?—No.

9719. Was Riley with you at all that night?—I never saw him at all that night; I never was with him at all.

9720. Did you kick at James Dalton's door?—No, the door was open when I went; I did not kick at it.

9721. Did you know that Dalton had had a warrant out against a man named Thomas Riley?—Thomas Riley was in prison at the time; he was convicted.

9722. What was he in prison for?—It is more than I can tell you. He was in prison for something to do with James Dalton.

9723. Did you know that at the time you were in the street?—Yes.

9724. Was Thomas Riley a member of your society?—Yes.

9725. What time in the afternoon was it when you first saw Dalton in the street?—Well, I do not know I am sure. I very seldom look at clocks when I am drinking.

9726. (*Mr. Chance.*) You must remember the time when you were there?—No, I very seldom look at any clocks when I am drinking. I do not know what time it was.

9727. What time do you leave off work generally?—It was half-past 12 when I came home.

9728. Was it soon after you left off working that you were there?—I do not know what time it was. I never took notice of the time. I was drunk at the time.

9729. But you can tell me how long after it was?—I cannot tell you what time it was.

9730. When did you begin drinking?—As soon as ever I got my wages.

9731. When did you get your wages?—When I gave over work.

9732. When did you give over work?—When I had finished.

9733. Did you get your wages before you had done work?—No, we never get our wages before we finish work.

9734. Did you get your wages as soon as you had finished work?—Perhaps half an hour or a quarter of an hour afterwards.

9735. Where did you go when you had got your wages?—The first beerhouse I met I popped into.

9736. Will you swear that John Riley was not with you that day?—Yes, I will swear I never saw a sight of John Riley that I know of that night, and I am sure he was not with me.

9737. How long were you in the street?—I cannot tell how long I was in the street. I live in the street. I was all night in the street. I was in bed all the night, so I must have been in the street.

9738. Do you remember some policeman coming to call at his house?—No.

9739. Did you knock at Dalton's door any time that night?—No, I did not knock at Dalton's door that night.

9740. Did you go to his door?—I went to his house and the door was open.

9741. Did you go with Murray to the meeting?—Which meeting?

9742. The meeting at the club that night?—We never have any meeting of our club on Saturday night.

9743. Was there no meeting of the club that night? There are people for taking the contributions every Saturday night, but there is no meeting only of the officers of the society; but Murray is not an officer who takes contributions.

9744. Then Murray would not go to the meeting?—I do not think he would; he was too drunk I think.

9745. Did he go to the meeting?—I do not know I am sure.

The witness withdrew.

JOHN MURRAY sworn and examined.

9746. (*Mr. Chance.*) Are you a member of the Bricklayers' Labourers' Burial and Accident Society, at Hulme?—Yes.

9747. How long have you been a member?—Five years and three months.

9748. Have you ever held any office in the society?—Yes, I have held office.

9749. What have you been?—I have been a committee man.

9750. How many are there in your union?—Five.

9751. Have you ever been secretary or treasurer?—No.

9752. Do you remember an assault being made upon James Dalton?—No, I do not remember an assault being made upon him.

9753. Do you remember being in Agnes Street one Saturday afternoon?—Yes.

9754. Was a man named John Riley with you there?—No.

9755. Are you sure of that?—Yes, I am sure of that.

9756. Who was with you?—One named Deffley.

9757. And who else?—I do not remember anybody else.

9758. Was McLaughlin with you?—No.

9759. What were you doing in Agnes Street?—I was drunk, I do not know what I was doing.

9760. What time were you there?—I do not know the time of the day.

9761. How long were you there?—I cannot say.

9762. When did you leave work that day?—At 12 o'clock.

9763. Where did you go after leaving work?—I went and had a glass of ale or two.

9764. Where?—Well, I have been to so many places, I could not tell properly.

9765. Is it your usual course on Saturday to go and get drunk?—Not always.

9766. Often?—Not often, neither.

9767. But it so happened on that particular day?—It so happened on that day.

9768. You say Deffley was with you?—Yes, I believe he was.

9769. Do you remember abusing James Dalton?—No, I never lifted my hand to him.

9770. Did you shout at him?—I might have shouted.

9771. Did you call him "knobstick"?—I do not remember.

9772. Oh yes you do?—No, I do not.

9773. Have you not often called him "knobstick"?—Never to my knowledge.

9774. Did you not hear him called "knobstick"?—No.

9775. Was he called "knobstick"?—He might have been, but I did not hear it. I do not recollect it.

9776. Did you not hear it while you were with him?—No, I do not recollect hearing it.

9777. Did you see him that day?—I do not remember seeing him that day.

9778. Was he in Agnes Street that day?—He might have been for all I know.

9779. You do not know that he was?—I do not know that he was.

9780. And you mean to tell me upon your oath that you were too drunk to know whether James Dalton was in Agnes Street that day?—I might have been; I dare say I was.

9781. But were you?—I believe I was.

9782. Did you not tell me just now that Deffley was with you there?—Yes, I think I was there.

9783. Be careful, it is rather dangerous if you do not answer these questions truly?—I am answering as true as I can.

9784. You are not. Did you not go to James Dalton's door?—Not that I am aware of; I was so drunk at the time that I could not tell properly what I was doing.

9785. When did you get sober again?—Next morning.

9786. Were you drinking all night?—Yes, the greatest part of the night.

9787. How many beerhouses did you go to that night?—I could not say; I went to a good many.

9788. Was there any quarrel between Deffley and Dalton?—There might have been, but I did not know anything about it.

9789. Did you go to the meeting of your lodge that night?—No.

9790. You were drinking all the night?—All the night.

9791. You knew this McLaughlin?—Yes.

9792. Did you see anything of him that afternoon?—I never saw him at all that afternoon.

9793. Nor all the evening?—Nor all the evening that I am aware of.

9794. He did not come to you?—He might have come, but I did not know that he did come. He was telling me next morning that he had come and taken me away, but that was all.

9795. Where did he take you to?—I cannot say, I believe he took me home.

9796. Could you walk?—Yes, I could walk.

9797. Did he not take you to the meeting?—No.

9798. That you will swear?—Yes, positively.

9799. You can remember that?—Yes, I believe according to what he told me next morning he took me home.

9800. What time did he take you home?—I cannot say what time it was.

9801. What time did he say he took you home?—I cannot say.

9802. Then if he said he took you to the meeting he is telling an untruth?—I cannot say whether I was there or not, but I believe I was not.

9803. Are you a member of the committee of the union?—Yes.

9804. Are you president?—No.

9805. I am not speaking now of the lodge, I am speaking of the union of which the lodge forms a part?—I have been.

9806. You have been president?—Yes, I have been.

9807. Are you president now?—Yes.

9808. How long have you been president?—Twelve months.

9809. Who is secretary now?—There is one named Quin.

9810. Of how many does the committee consist?—Five.

9811. What are their names?—I cannot exactly say what all their names are; they are altered every three months.

9812. Who are the committee at the present time?—There is Quin, Riley——

9813. What Riley is that?—One named John Riley, Rafferty, and Fitzpatrick.

9814. Then you form the executive committee of the lodges, I understand?—Yes.

9815. What are the subjects that come before your committee?—To see the way of working of each lodge.

9816. What do you mean by the "way of working"?—The way how they transact business at each lodge.

9817. What do you mean by transacting business; what kind of business?—Business belonging to the society.

9818. Of course it is business belonging to the society, but what sort of business is it?—I cannot tell you anything else.

9819. But you are a president of the committee?—Yes.

9820. Tell me the character and the nature of the business you have to contract?—There are so many businesses that I cannot tell you them all.

EIGHTH DAY.

J. Murray.

13 Sept. 1867.

9821. Well, tell me one?—We have to pay our expenses, and so on.

9822. The expenses of what meetings?—Different meetings.

9823. What meetings do you pay the expenses of; the meetings of the committees and the meetings of the lodges?—The meetings of the lodges.

9824. The expenses of the meetings of the lodges?—Yes.

9825. What are those expenses?—I cannot just tell all the expenses.

9826. Tell me some of them; what is the nature of the expenses?—We have a delegate to pay, and we have a corresponding secretary.

9827. You have a delegate to pay?—Yes.

9828. Which delegate do you pay?—We pay the delegate from Manchester.

9829. Who is that?—A man named Nolan.

9830. What do you pay him?—1*l.* 4*s.* a week.

9831. Do you appoint him as delegate?—Yes.

9832. Is not the delegate appointed by the lodge?—He is appointed by the general meetings.

9833. And he acts for all the lodges?—Yes.

9834. Is there a certain district for which he is to act?—He acts for the whole town of Manchester at large.

9835. How long has Nolan been delegate?—Ever since I have belonged to the society; I do not know how long before.

9836. You pay him 1*l.* 4*s.* a week as delegate?—Yes.

9837. What other expenses do you pay?—I do not know of any more.

9838. You said just now that you paid the expenses of the meeting?—Yes.

9839. What meetings are those; I do not understand what expenses occur at the meeting?—Any expenses that came in we have to pay.

9840. Do not the lodges pay for their own meetings?—They generally send it to the central place and pay it all.

9841. Do not the lodges pay for their own meetings?—Yes, the lodges pay for their own meetings.

9842. You do not pay for them?—It is generally paid for by the lodges.

9843. They pay their own expenses at their meetings?—Yes.

9844. Do they come to you to pay the expenses of the lodge's meetings?—I do not pay it.

9845. Or the committee?—Nor the committee; they get the money to pay there, and they pay it then.

9846. You do not pay the expenses of their meetings?—No.

9847. You said you did just now; you have only told me of one expense; you pay at present one delegate; now how many other expenses do you pay?—I do not know of any more.

9848. Is that the only payment you make?—Yes.

9849. Is the making of the rules one of the duties of your committee?—Yes.

9850. Have you a printed copy of your rules?—Not on me; there are printed copies of the rules.

9851. Are all your rules contained in print?—Yes.

9852. Have you any other rules than those contained in print?—Not that I am aware of.

9853. Think.—No.

9854. All the rules you have are contained in print?—Yes, they are.

9855. Have you a rule in your society against using machine-made bricks?—Yes, there is some talk about it.

9856. Is it a rule that your members will not work for a builder who uses machine-made bricks?—Yes, I believe they will not work for him.

9857. Is that a rule of your society?—No, it is not a rule of our society.

9858. I understand you to say that your members will not work for any builder who uses machine-made bricks?—No.

9859. Supposing they do work, what is done?—Nothing that I know of.

9860. Do you not draw off the men?—Yes, I believe they are called off.

9861. Is that the rule?—I do not know that it is.

9862. I am not speaking of it being in print, but is it the rule, though not in print?—It may be the rule, though not in print.

9863. Do you allow your men to work for any master who uses machine-made bricks?—No.

9864. That is the rule in practice, at all events?—Yes.

9865. What do you do, supposing a man does work for a master using machine-made bricks?—Draw him off.

9866. Supposing a non-union man is working for such a builder, what do you do him?—We leave him as he is.

9867. That is all that you do?—That is all that I am aware of, or ever heard tell of.

9868. Have you not another rule, that no union man shall work with non-union men?—Yes.

9869. Is that among your printed rules?—I cannot say.

9870. Yes, you can.—No, I cannot.

9871. Have you got a copy of your rules here?—No.

9872. It is a rule, whether printed or not?—Yes, it is acted upon.

9873. What do you do then, do you draw off your men?—Yes.

9874. Do you try to make the non-union men join your society?—No.

9875. You do not do anything?—No.

9876. You do not ask them?—Not that I am aware of; I have never been on such a job as that.

9877. Do you leave them alone altogether?—For all I know about it.

9878. You do not use moral suasion?—It might be used, but I do not know anything about it.

9879. You never used it?—Never.

9880. How often do you hold meetings?—What meetings?

9881. Meetings of your committee?—Once a week.

9882. Do you keep books?—No.

9883. Do you keep no books at all?—Each man is supposed to have a book of his own, but they do not always have them.

9884. What is that book for?—To keep an account of anything that comes in.

9885. Does every man keep an account of what comes in and out?—Every man ought to do, but they cannot all read and write.

9886. Every man does not know what comes in and out generally?—They have to do it then by word of mouth.

9887. You have a secretary?—We have to report it at the lodge or send our secretary.

9888. Does not the secretary keep a book?—Every man is supposed to have one that goes there.

9889. Is every man supposed to have the same kind of book as the secretary?—Yes.

9890. What sort of book is the secretary's?—A small penny book.

9891. What does he enter in the book?—He enters things that pass.

9892. Things that pass at the meeting?—Yes.

9893. Whenever things are brought before your meetings they are generally speaking discussed?—Yes.

9894. And then a resolution is passed upon them?—Yes.

9895. I suppose the secretary enters the resolution in the book, does he not?—He should do so.

9896. He ought to do so in the course of his duty?—Yes.

9897. Has the secretary a book of that kind?—He might have.

9898. (*Chairman.*) You say that you are one of the committee men, and that there are five of you?—Yes.

9899. How often do you meet?—Once a week.

9900. Where do you meet?—At a central place in the town. We meet at Bank Top.

9901. Is there a public-house there?—Yes, a beer-house called the "Shamrock" tavern.

9902. You meet there once a week?—Yes.

9903. Do you discuss what each of your lodges has been about in the week ?—Yes.

9904. Have you any book in which you enter your resolutions ?—Yes, there is a book.

9905. Who keeps it ?—The secretary.

9906. Who is the secretary ?—Quin.

9907. He keeps those resolutions ?—Yes.

9908. Are all the resolutions you come to binding upon the nine lodges ?—Yes.

9909. Do those resolutions relate to labour and your protection and things of that sort ?—It relates to our society at large.

9910. And for the protection of your labour ?—Yes.

9911. And if any report has been made to you of any man working against your rules do you meet and observe upon it and then have a resolution about it ?—Yes.

9912. Do you when you meet report men who are working against your rules, written or unwritten, or practised ?—Some do.

9913. That is your duty ?—Yes.

9914. Would your book contain a resolution of that nature ?—No.

9915. That you keep out of your book ?—Yes.

9916. Why do not you put it down in your book ?—I do not know.

9917. You have no notion why they keep it out ?—No.

9918. What do you keep in the book ?—I do not put anything in the book.

9919. You do not ; but you told me that it was the duty of the secretary to do so ?—Yes.

9920. What does he put in ?—I cannot say.

9921. You have no notion at all ?—No.

9922. You are quite clear that a resolution of that sort will not appear in the book ?—I am not sure whether they will or not.

9923. You told me just now that they do not appear ?—I might have done.

9924. You told me just now that they do not ; how came you to say that they do not appear ?—*No answer.*

9925. Now do you know that any resolutions of that sort do not appear ?—I am not very sure.

9926. Do the delegates of the different lodges receive instructions from you ?—Yes, they do.

9927. Each lodge has a delegate ?—Yes.

9928. And they receive instructions from you ?—Yes, of their own making.

9929. I do not understand you, or you do not understand me. Do you give them directions ?—Yes.

9930. And it is their duty to see them carried out ?—Yes.

9931. And to report to you what they have done upon them ?—Yes.

9932. And to report to you that some men are working against your rules for the protection of your labour ?—Yes.

9933. Do you upon that give directions what ought to be done ?—Yes.

9934. What sort of directions do you give them, that men are to be looked after, and that sort of thing ?—Yes.

9935. The men you call knobsticks are to be looked after ?—I have nothing at all to do with them.

9936. Only your own men ?—Only our own men.

9937. You knew that Dalton was a knobstick ?—No.

9938. You never heard him called so ?—I have heard it mentioned.

9939. Do you know that he was working some years ago for Fox and Burton ?—Yes, I heard it mentioned.

9940. Did you hear it mentioned at your lodge or at a committee meeting ?—I heard it mentioned by parties in the street; I never heard it mentioned at the lodge in my life.

9941. Did you hear that your men struck and would not work any longer with him ?—Yes.

9942. Did you hear that in consequence of that he had left and gone off to the county of Durham ?—No.

9943. You knew that he had gone away ?—I did not know where he had gone.

9944. But you knew that he had gone ?—No, not till after he had come back again.

9945. Then you heard that he had been away ?—Yes, he told me himself.

9946. And the reason ?—No.

9947. You have no idea what the reason was ?—No, he belonged to our society up to the time he went away, and when he came back again he owed 30*s.* contributions.

9948. For the time he was away ?—No, before he went away, and when he came back again he wanted to know whether we could give him a clear card into Manchester, and I said, "No, he would not be admitted as a member into the society till he had paid his contribution."

9949. What does a clear card mean ?—If he had got a clear card from where he had been a member into Manchester he could be made a member of our society, but I told him that he could not be made a member of our society till he had paid his contribution.

9950. What is the meaning of a clear card ?—After he has been in another town then he gets a card to certify that he has been working in that town.

9951. If you find that a man has been working, say at Stockton, before he can come back into your union, he must have a clear card from that district so as to get him into your society ?—Yes, that he has paid up his old arrears.

9952. Is it an understanding which you have with other unions that before a man goes from Manchester to another district who has been a member of your union he must take a clear card from you, otherwise he will not be allowed to go into that district ?—Yes.

9953. And when he comes back from those districts he must bring a clear card for you ?—Yes.

9954. Is the meaning of the clear card that he has paid all his money ?—Yes.

9955. That is that he has never been a knobstick ?—I know nothing about that.

9956. Who has the authority to give him a clear card ?—The secretary of each lodge gives it.

9957. But in consequence of a resolution of the lodge, I suppose ?—I do not know anything about that.

9958. Has the secretary alone the power to give or to refuse a clear card ?—No, if a man is in benefit he is supposed to have a card ; he can force a card from the secretary.

9959. Who has the right to refuse him ?—Nobody has a right to refuse him.

9960. Who decides whether he ought to have it or not ?—There is no decision about it.

9961. How does the man go to work ; if he wants a clear card he goes to the secretary ?—He goes to the lodge.

9962. Does the secretary decide whether he is to have it or not ?—Yes, the man who writes his card for him is the secretary.

9963. If the man complies with all your rules he has a card, but suppose it is a question whether he has or not, who decides the question ?—The voice of the men of the lodge generally.

9964. In order to have the men of the lodge to decide it it must be brought before your meetings, and if it is a doubtful question they pass a resolution about it ?—Yes.

9965. Do they not keep a book about it ?—No, waste leaves.

9966. Is a question of that sort brought before the committee ?—No, it has always been decided by the lodges.

9967. Is this the only question that the committee have to decide, whether the rules or practice, call it which you will, have been properly acted upon by the different lodges ?—Yes.

9968. Have you anything to do with the financial matters of the society, I mean the money matters ?—No, nothing whatever.

9969. Who has the right to give away money for any work that is done ?—The treasurer.

EIGHTH DAY.

J. Murray.

13 Sept. 1867.

9970. And he acts upon the resolutions of the meetings?—Yes.

9971. You knew Dalton when he came back?—Yes, I knew him before he went, and when he came back.

9972. Did you know where he was working after he came back?—No.

9973. You knew that he was not a member of the union?—Yes.

9974. And consequently that your men ought not to work with such a man as that?—Yes.

9975. You have your wages paid as early as 12 o'clock?—Yes.

9976. How long was it after you got your wages that you got drunk; an hour or two? You told us that you got drunk?—Yes.

9977. How long did it take to make you drunk?—It might be two hours, it might be three.

9978. Do you remember whether it was more than three hours after you got your wages paid that you got into Agnes Street?—Yes, it must have been more than three hours.

9979. And although you were drunk you remember being in Agnes Street?—Yes, I think I remember it.

9980. A man may be drunk and remember a good deal, or he may be so drunk as to remember nothing, but you remember being in Agnes Street?—I barely remember being in the street.

9981. You do remember it, though?—Yes.

9982. You knew that Dalton lived in that street?—No, I did not know it.

9983. Do you remember meeting him?—No.

9984. Your friend Deffley was with you?—So they told me.

9985. Do you not remember with whom you left the public-house?—No.

9986. You remember being in Agnes Street?—Yes.

9987. Do I understand that your memory was sufficient, though you were drunk, to remember the name of the street you were in, and yet that you do not remember the man who was with you?—Yes.

9988. Your memory is good enough to remember the street and the name of it, but your memory is not good enough to remember the man who was with you?—I remember the man who worked along with me.

9989. I do not ask you that. After you got drunk you remembered the name of the street, Agnes Street, but your memory is not good enough to remember whether you were with any other person in the street at the time?—Yes.

9990. You swear that you remember the name of the street, and you cannot remember the name of the man you were with?—Yes.

9991. You expect us to believe then that you remember the name of the street and not the name of the man?—Yes.

9992. You swear that?—Yes.

9993. Whether Deffley was with you or not, you do not know?—I cannot say.

9994. And anything that took place in that street you swear that you do not recollect?—No, I do not recollect it.

9995. You say that you remember the name of the street?—I lived in that street 15 years; that is the reason, and I should have been very drunk if I did not know that I was in the street.

9996. And you were not so drunk but that you remember the name of the street?—I remembered it when I was told I was in the street the next morning.

9997. Were you told the next morning that you had been assaulting Dalton?—Yes.

9998. Was your memory sufficient the next morning to remember whether you had done so or not?—Yes, it was.

9999. Your memory being refreshed the next morning, did you remember that you had assaulted him?—No, I never assaulted him.

10,000. Were you present when anybody else did assault him; was your memory sufficient for that?—No, I did not remember it.

10,001. You did not remember it the next morning?—No.

10,002. Were you taken before the magistrates?—Yes.

10,003. Did the witnesses swear that you assaulted him?—Yes.

10,004. And what happened; were you bound over to keep the peace?—Yes.

10,005. Who else was bound over?—Thomas Deffley and Michael McLaughlin.

10,006. Who else?—Another man named Riley, a shoemaker.

10,007. John Riley?—Yes.

10,008. They swore that you had assaulted him?—Yes.

10,009. The magistrate bound you all four over to keep the peace?—No, I have no recollection of it at all; I recollect what the magistrate told me.

10,010. You have no recollection of having committed the assault?—No.

10,011. Do you remember a person of the name of Fyland?—Yes.

10,012. Did you ever hear of his assaulting Dalton?—Yes.

10,013. Did you ever hear of his calling him a knobstick and beating him?—I heard of him as assaulting him; anything else I do not know.

10,014. I do not ask you what you know, but did you hear of his calling him a knobstick?—No.

10,015. Did you hear of his throwing him into a lime-pit?—Yes.

10,016. Did you hear of Fyland being punished for it?—No.

10,017. Was Fyland taken up?—Not that I am aware of.

10,018. Did you hear of Thomas Riley having knocked him down?—Yes.

10,019. And having beaten him?—No.

10,020. Did you hear of Thomas Riley getting one month's imprisonment?—Yes.

10,021. Was this before you were in Agnes Street that night?—Yes.

10,022. You knew all about Dalton pretty well before this night?—Yes.

10,023. And then they said that you had joined in the assault upon him?—Yes.

10,024. You have never seen Fyland since?—Yes, I saw him once since.

10,025. Where?—In Medlock Street.

10,026. When?—Three weeks ago.

10,027. How long is this ago since you heard that Fyland made the assault?—I cannot hardly say, it might be about two months.

10,028. Since that time you have seen him once in Medlock Street?—Yes.

10,029. (*Mr. Chance.*) Is there a treasurer to the executive committee?—No.

10,030. You said just now that each lodge had a delegate?—Yes.

10,031. Is that so?—Yes.

10,032. You said just now that there was one delegate from all the lodges?—Each lodge has a representative.

10,033. Does the delegate belong to the lodge?—He belongs to the whole town.

10,034. Has each lodge a delegate as well?—They had a delegate to represent them once a week.

10,035. Do you mean to say that each lodge has a delegate, and that all of them have a delegate together?—Yes, Nolan is appointed by the body of the men yearly.

The witness withdrew.

Mrs. Bridget Dalton sworn and examined.

10,036. (*Chairman.*) Are you the wife of James Dalton?—Yes.

10,037. Where do you live now?—We are living in the same place.

10,038. In Agnes Street?—Yes.

10,039. You remember your husband working for Fox and Burton?—Yes.

10,040. That was in 1863 we are told, is that so?—I cannot exactly say.

10,041. It was some years ago, was it not?—Yes.

10,042. Do you remember whether in consequence of what happened to him he was obliged to go away from the place and go off to Stockton to get work?—Yes, he had to leave the town to get work.

10,043. What happened to him to drive him from the town?—It was in consequence of the club men and union men, because he was not in the society with them.

10,044. Did they ill-use him or beat him?—Yes, they beat him this last time.

10,045. Before he went away to Stockton did they threaten him?—I cannot say for that.

10,046. He went away to Stockton?—Yes.

10,047. Did you go with him?—No, not then.

10,048. How long was he away?—He was away about 12 months.

10,049. Did he come back last February?—Yes, he came back and took the family; we have been there and come back again.

10,050. Where did you go?—To Stockton.

10,051. How many children have you?—There are eight in family of us.

10,052. There are six children?—Yes.

10,053. And you went to Stockton with your children?—Yes.

10,054. How old is your eldest child?—Turned 15.

10,055. How old is the youngest?—The youngest is turned six months. She was born in the north of England.

10,056. At Stockton?—Yes.

10,057. He came back here in February?—Yes.

10,058. After he came back did he get to work again here?—Yes, he got to work here.

10,059. You remember that?—Yes.

10,060. After he had been working some time do you remember anything happening to him?—They stopped him at his work and would not let him work.

10,061. The union men would not let him work?—No.

10,062. Did they beat him?—One of them beat him.

10,063. Were those men of the names of Fyland and Timothy Riley?—Yes, Fyland met him at his work.

10,064. He was thrown into a lime-pit?—Yes.

10,065. And Timothy Riley also beat him?—He beat him in our own street.

10,066. Did you see him?—No, I did not see him.

10,067. Did not Riley get a month's imprisonment?—Yes.

10,068. Fyland, who had thrown him into a pit, made away?—Yes, he went away then.

10,069. And you have not seen him since?—I have seen him twice since, and he has run away.

10,070. When you have seen him he has run away?—Yes.

10,071. Do you remember the afternoon when there was a row and disturbance at the door of your house?—Yes.

10,072. Who was it came, John Murray?—Yes.

10,073. Then Thomas Deffley came?—Yes.

10,074. And Michael McLaughlin?—Yes.

10,075. And John Riley?—Yes.

10,076. You remember the men coming?—Yes.

10,077. Were you in the house?—Yes.

10,078. Did you see them all there?—Yes.

10,079. Were they all together?—Yes, and Fyland came also.

10,080. Did they come to your door?—Yes, he opened the door.

10,081. Was your husband inside?—Yes, one time we had to take and hide him.

10,082. The first time they came to your door were all those men together?—Yes.

10,083. Was it in the afternoon?—Yes.

10,084. Were you at home?—Yes.

10,085. And your children?—Yes, and my husband was inside the first time they came.

10,086. Was your door open or shut?—We had to bolt it.

10,087. Having bolted the door what did they do outside?—They swore outside that they would break the door in and come in and cut his liver out.

10,088. Did they call him any names?—Yes, they called him a "bloody little knobstick."

10,089. Had they any sticks in their hands?—No, they had no weapons in their hands.

10,090. You kept the door bolted?—Yes, we had to keep the door fast against them; they did not break it in.

10,091. They merely swore and called out what you have just said?—Yes.

10,092. Were you much alarmed?—Yes, we were frightened that the children would go into fits with them.

10,093. Were they very violent?—Yes, they were swearing and making such a noise.

10,094. How long did they stop there?—They were coming and going all the afternoon up to half-past 10 at night.

10,095. They began in the afternoon, and were coming and going up to half-past 10 or 11 at night?—Yes.

10,096. Did they come as early as between three and four in the afternoon at first?—Yes, that would be about the time.

10,097. They kept coming and going all that time?—Yes, until Murray was taken up.

10,098. Did your husband remain in the house all the time?—No, we had to send him away; the policemen had to take him away out of the place.

10,099. Did any policemen come?—Yes.

10,100. How many?—We sent to the station for them.

10,101. Whom did you send?—One of the neighbours went to the station.

10,102. Do you remember who the neighbour was?—They would not come down.

10,103. Who was the neighbour who went to the station?—Mrs. O'Neil did.

10,104. Did any policemen come?—Yes, two came.

10,105. And they having come did the men go away?—Yes.

10,106. How long did the two policemen stay there?—They were up and down watching about the place.

10,107. You tell me that these men came very often to your door?—Yes.

10,108. What became of your husband; did the two policemen get him away; what became of him afterwards?—He got away.

10,109. What time did he get away?—After the first time they came, I could not exactly say the time.

10,110. They came between three and four in the afternoon first?—Yes.

10,111. How long after was it that your husband got away?—They came to the door every 15 minutes.

10,112. He got away in the interval?—Yes.

10,113. Had he gone away before the two policemen came?—Yes, he got away.

10,114. Do you remember any one of your children being struck that night?—Yes.

10,115. Which was it?—Ann.

10,116. A little girl?—Yes.

10,117. How old is she?—Turned 11 years old.

10,118. Who struck her?—Thomas Deffley.

10,119. How was it; your door was shut. Did you open the door?—This girl was in a place.

EIGHTH DAY.

Mrs. B. Dalton.

13 Sept. 1867.

10,120. Working for somebody?—She was at service, and she was coming with an old lady, carrying a parcel for her.

10,121. Was she coming home?—No, she was carrying a parcel for this old lady, and going past the street and she saw such a crowd about the door, and came down and axed what was doing, and he did no more, but he threw out and let her have it.

10,122. She had a parcel in her hand, and had passed your door and saw the crowd?—She had not a parcel, she had left it then.

10,123. She was going back?—Yes.

10,124. She was going back, passing your door, and saw the crowd?—Yes.

10,125. What happened?—Those young men were down in our place looking for her father, and she asked them what they wanted down there.

10,126. She asked the men opposite the door whose names you have just mentioned?—Yes.

10,127. Murray, Deffley, McLaughlin, and John Riley?—Yes.

10,128. She asked what they wanted?—Yes.

10,129. What did they do?—Deffley did nothing but let her have a blow upon the jaw.

10,130. Had your daughter done anything to him first?—No, she could not; she is only a child.

10,131. She had not done anything?—No, she axed him what they were doing at her father's door.

10,132. And he hit her in the face with his hand?—Yes.

10,133. Was it the open hand or fist?—He gave her the fist.

10,134. Where did he hit her?—On the cheek and knocked her down, and she tumbled down on the steps where he hit her.

10,135. Are you quite sure that she had not thrown anything at him or done anything to him?—Yes.

10,136. Did she afterwards get up and go away?—I ran away; I was frightened.

10,137. You were inside the house?—No, I was outside in the street.

10,138. What made you open your door and go out?—I opened the door to go out. I was frightened of stopping in the place, and I went down to see if I could see any policeman.

10,139. Your other children were at home?—They were inside the place.

10,140. You opened your door to go out to see whether you could see any policeman to help you?—Yes.

10,141. It was then that you saw this happen?—Yes.

10,142. Had your husband been obliged to leave his work?—They would not let him work.

10,143. And he had been out of work until last week?—Yes.

10,144. Last week he got some work some distance off?—Yes.

10,145. Two and a half miles off?—Yes, I cannot tell how far it is.

10,146. He has to go backwards and forwards to do his work?—Yes.

The witness withdrew.

Mr. G. Bradbury.

Mr. George Bradbury sworn and examined.

10,147. (*Mr. Barstow.*) Are you a master brickmaker?—Yes.

10,148. Where do you carry on your business?—At Cheetham.

10,149. Do you recollect, on the 4th of June 1864, having a large quantity of bricks destroyed?—Yes.

10,150. Were you in any dispute with the union at the time?—No, not with the union.

10,151. I believe you were a member yourself?—Yes.

10,152. And employed union men?—Yes.

10,153. Can you imagine why this damage was done to your property?—No.

10,154. You do not know?—No.

10,155. You had no idea at the time?—All the idea which I can give you was, I had at the beginning of the season to pay under a protest an amount of money for some clay that had been valued and paid for before.

10,156. To whom had you to pay it?—To the men that had worked the year before; they had cast the clay, and I had to pay the valuation.

10,157. Who adjudged you to pay this?—I had to pay it to Messrs. Young; it was Alcock and Young. I had let the field the year before.

10,158. You had to pay Messrs. Young for some clay which had been worked the year before?—Yes, which had been cast.

10,159. Who adjudged you to pay Messrs. Young for the clay?—He had to pay it to the men.

10,160. Who adjudged you to pay it?—The operatives, the brickmakers.

10,161. The brickmakers' society had adjudged you to pay Messrs. Young for some clay worked the year before?—Yes.

10,162. Did you go before the society in reference to this?—No.

10,163. How came they to adjudge you to pay this sum to Messrs. Young?—The men who set the job or stool said that they would not stand to it for that valuation; they would not take the clay, seeing there was not that quantity of clay in it, and they spoke of it at the meeting, where I paid it under protest, and the society said if I had overpaid they would see me paid back, and if I had not paid sufficient I must pay it.

10,164. I am sure I do not understand you; you let this field to Messrs. Young?—Yes.

10,165. Then there was some clay worked?—Some clay was left cast which they did not make into bricks.

10,166. But then you had paid for that work?—No, I let it to them as tenants; I did not take them as workmen. I let the field for one year; they cast more clay than they made into bricks; at the end of the season there was a quantity of clay left, which had to be valued according to the custom of the operative society and masters, and it had to be measured or valued and paid for according to the quantity then left.

10,167. Ought not Messrs. Young to have paid for it?—Messrs. Young had paid for it; I had to refund it to Messrs. Young.

10,168. You took possession of the field again?—Yes, they gave up business.

10,169. And there being a dispute between you and Messrs. Young about the price, and that dispute being referred to the brickmakers' society, they adjudged you to pay a sum of money to Messrs. Young?—My men and Messrs. Young's men.

10,170. And you paid it under protest?—Yes.

10,171. How many bricks had you destroyed?—From 20,000 to 30,000.

10,172. What did you do when you found the bricks destroyed?—I stopped the work.

10,173. Had you any communication with the union upon that subject?—They called a meeting and I got word that I should be paid for them.

10,174. And were you paid anything for them?—Yes.

10,175. How much were you paid?—8*l.* 2*s.* what I had paid them.

10,176. What you had paid to Messrs. Young?—No.

10,177. The wages?—Yes, the wages that I had paid for the bricks being made.

10,178. But the value of the bricks must have been more than that?—Yes, I did not recover my loss.

10,179. What was the value of the bricks?—I cannot exactly say that.

10,180. How much do you think?—My loss would be about 20*l.*

10,181. And you were compensated by the payment of 8*l.* 2*s.*?—Yes.

10,182. How came it that that dispute between you and Messrs. Young was settled by your respective workmen?—It was not settled by my men; I refused to pay for that amount, because my men would not take to it at that valuation.

10,183. You use the phrase, "take to it at that valuation," what do you mean by "taking to it?"—There is a quantity of clay cast, it is supposed to make so many thousand bricks; at the back end of the season if it is left and not made into bricks, the workmen have to be paid according to valuation; this was the case with Messrs. Alcock and Young.

10,184. The clay was got for the purposes of making bricks, but was not actually made into bricks?—Yes.

10,185. And the workmen are not paid, except for the clay actually made into bricks?—They are paid for the clay according to their own valuation. They valued the clay and Messrs. Young paid for it; when I had put men to that work they would not take to it according, as Messrs. Young had paid, and I had to have more clay cast upon that; I could not get on with my work unless I did, and they called a meeting and they said it should be left by itself, and if it made more bricks than I paid for, I should make it up, and if less I should be paid.

10,186. It was only a matter of agreement between you and your men?—We were bound to it.

10,187. You let this clay on the supposition that it would make so many thousand bricks?—Yes.

10,188. Then the question of money apparently was between you and your men?—Yes, it was only between the men and me. If they had taken to it it would have made no difference to me whatever. It was valued at something like 300,000, and if they took to it at that it would make no difference to me. I paid Messrs. Young instead of paying them that money.

10,189. You paid Messrs. Young instead of paying the men?—Yes.

10,190. Had they already done the work?—Messrs. Young's men had done the work, and he had paid for it.

10,191. And your men disputed the valuation of the measurement of the clay?—Yes.

10,192. They said that there was more clay than had been paid for by Messrs. Young?—No.

10,193. They said there was less clay then?—Yes.

10,194. You are very familiar with this matter and I am not, and I ask for information. How did it affect your men that there was less clay?—If I had not had it settled I could not have carried on my business.

10,195. How does it affect the men? I should have thought they would have objected to make up a larger quantity of clay, but how was it adverse to them if there was less clay?—If instead of being 300,000 and odd, it had only made 200,000, they would have 100,000 odd to the loss.

10,196. Then they were paid according to the quantity?—Yes, they were paid according to the quantity that it makes.

10,197. If it had made 200,000 instead of 300,000 they would only have been entitled to be paid for 200,000 bricks?—Yes.

10,198. How came it that you had to pay money to Messrs. Young?—They had paid for it. I could take possession of the field, but I could not commence any work until I had paid what they had paid.

10,199. Then Messrs. Young had paid as if it was the larger quantity? — Yes, they had paid for 300,000 odd.

10,200. And you had to pay for 300,000?—I had to pay for what they had.

10,201. Whereas in fact there were only 200,000, and you ought not to have paid for more than 200,000?—Yes.

10,202. So that in fact you paid Messrs. Young more than you ought to have paid?—Yes.

10,203. Who paid you this 8*l.* 2*s.*?—The society.

10,204. By whose hands were you paid?—Robert Barker's.

10,205. Who is Robert Barker?—An operative.

10,206. Has he any office in the society?—I do not know.

10,207. Was he treasurer or secretary?—He was secretary either then or soon after.

10,208. That was in compensation for these bricks that were destroyed?—Yes.

10,209. Did you ever find out who destroyed the bricks?—No.

10,210. What was the consideration for Robert Barker paying you the 8*l.* 2*s.*?—The society had decided I should be paid.

10,211. What was the consideration on your part for which Robert Barker paid you 8*l.* 2*s.*?—I cannot say.

10,212. Did you make any agreement with him?—No.

10,213. Nothing passed between you?—No.

10,214. You shut up your brickyard?—Yes.

10,215. Did you make any agreement to go to work?—They called a meeting.

10,216. Did you make any agreement with Robert Barker to go to work again if you were paid 8*l.* 2*s.*?—No.

10,217. Nothing was said?—No, I simply said I could not carry on my business losing 20*l.* or 30*l.* a night.

10,218. To whom did you say that?—To the society.

10,219. At the meeting?—Yes.

10,220. After that conversation you were paid the 8*l.* 2*s.*?—Yes.

10,221. And you then opened your croft again?—Yes.

10,222. Can you tell us why your bricks were destroyed?—No.

10,223. From your evidence I cannot see the simplest reason for destroying them?—I do not know.

10,224. You had actually paid Messrs. Young the money, rightly or wrongly?—Yes.

10,225. And you were not employing non-union men?—No.

10,226. Had you any idea who destroyed them at all?—Not the least.

10,227. Did you give any information to the police?—Yes.

10,228. How had they been destroyed? — By trampling on them.

10,229. How many men had been trampling on them?—I could only find the prints of two men's boots.

10,230. They must have been a long while at work?—I do not know about that.

10,231. Did you track the men at all?—No.

10,232. (*Chairman.*) You say the union paid you 8*l.* 2*s.*?—Yes.

10,233. Which union?—The brickmakers'.

10,234. Of Manchester?—Yes.

10,235. Did you ask for it?—No.

10,236. How did it come to you, did it come from the clouds? Who paid you?—Robert Barker.

10,237. How came he to pay you?—I suppose from an order from the society.

10,238. Had you made no claim upon the society?—No.

10,239. How did they know of it?—As I have already told you they called a meeting.

10,240. Tell me again; how came the secretary of the Manchester union to pay you that money?—By an order from the society.

10,241. How came there to be an order from the society?—I cannot tell that.

10,242. Do you mean to tell me that you have no notion?—No.

10,243. Do you know and will you not say?—No.

10,244. You do not know?—I should be glad to know.

10,245. Did you make any application to them for it?—No.

EIGHTH DAY.

Mr. J. Bradbury.

3 Sept. 1867.

10,246. You have not the slightest notion of the reason why they paid it?—No.

10,247. Are you in the habit of taking money from people and not knowing why you have it?—They did it as compensation for some of the damage.

10,248. Why should they compensate you?—I do not know.

10,249. Are you in the habit of receiving compensation not having the slightest notion why you receive it?—I never received it except upon this occasion.

10,250. You have not the slightest notion why you received it?—No.

10,251. Nor any notion as to who did the damage?—No.

10,252. None at all?—No.

10,253. You had no compensation with anyone upon the subject?—No.

10,254. The damage was done, you made no application, and some morning or other Robert Barker came to you and offered you 8*l.* 2*s.*; is that all you know about it?—No.

10,255. Tell me all you do know?—I have already told you. I had a quantity of bricks destroyed, and I stopped my brickmaking work; they called a meeting and agreed to pay me what it had cost me.

10,256. After that you began again?—Yes.

10,257. Was the 8*l.* 2*s.* given you on your promise to begin brickmaking again?—I do not know that.

10,258. Have you any doubt about it; have you any opinion about it?—I cannot give an opinion.

10,259. The consequence was that because you got the 8*l.* 2*s.* you began brickmaking again?—I thought if they had had any hand in it there would be no more done. I felt safe to go on again.

10,260. Did you imagine that they had had any hand in it, and that that was the reason why they paid you?—No, I cannot say that I did. I do not believe that the brickmakers as a body of men either did it or countenanced it.

10,261. Then what do you suppose the 8*l.* 2*s.* was given you for?—Perhaps they thought more than me about the clay.

10,262. It was an inducement to make you begin brickmaking again?—There was some dispute between the two lots of men.

10,263. Which men?—My men and Messrs. Young's men.

10,264. Were yours and Messrs. Young's men all union men?—Yes.

10,265. Do you attribute this damage to Messrs. Young's men?—I cannot swear to it; it would not be just.

10,266. Have you any other reason than the one you have mentioned for the 8*l.* 2*s.* being given you?—No.

10,267. You never had it before?—No.

10,268. But because it was given, you began to make bricks again?—Yes.

10,269. Do you employ union men?—Yes.

10,270. You have always employed union men?—Yes.

10,271. Had you any private quarrel with any one?—No.

10,272. Why do you suppose that this damage was done by union men?—I do not known whether the union men or the non-union men did it.

10,273. You do not know?—No.

10,274. But a union man paid you?—Yes.

10,275. Are you a member of a union?—Yes.

10,276. Which union?—The Manchester brickmakers' union.

10,277. Were you present at a meeting when a discussion took place as to whether you were to be paid or not?—No.

10,278. You made no application?—No.

10,279. None whatever?—No.

10,280. Do you attend their meetings generally?—No, I am not allowed.

10,281. Why are you not allowed?—Being a master.

10,282. What do you subscribe to them?—The same as they do.

10,283. How much is that?—One of my men pays it; I do not know how much; I pay every Christmas sometimes.

10,284. What do you pay every Christmas?—About 1*l.* or under 1*l.*

10,285. Have you any benefit from it at all?—No, only labour.

10,286. You get union men to come to you?—No, my labour; if I do not pay to that society I should not be allowed to take part.

10,287. You work yourself?—Yes.

10,288. If you do not pay the money you would not be allowed to work?—No.

10,289. You have never employed non-union men?—Never.

10,290. It would be against the rules of the union?—Yes.

10,291. Is this the only occasion on which you had any damage done to you?—Yes.

10,292. This you cannot account for, but you got some money by it?—I lost money by it.

10,293. The damage was 20*l.* and you got 8*l.* 2*s.*?—It would be 20*l.* loss to me independently of the 8*l.* 2*s.*

10,294. Did you claim more?—I claimed nothing.

10,295. Did you make any remark that it was not the whole amount of the damage when Barker paid you?—No.

10,296. What did Barker say to you when he paid you?—I think it was something like that was what they allowed for anything of the sort, if they did allow anything so much per 1,000.

10,297. When did they allow it?—I cannot tell you.

10,298. Are you so ignorant of their rules that you do not know when the allowance is made?—I know in my case and I know of others.

10,299. You know of other cases in which money has been paid?—Yes.

10,300. To masters?—Yes.

10,301. Members of the union?—I cannot swear to that.

10,302. On what occasions have you known money paid?—Sometime since.

10,303. You are not to keep back anything because you are a member of the union?—I do not wish to do so.

10,304. In what case do you know of money being paid?—I cannot say, it was sometime since.

10,305. What was the name of the case?—I cannot say that.

10,306. How long since is it?—I cannot swear. I should think within this 12 months or two years.

10,307. Was it a case of this sort?—Something of this sort.

10,308. What sort?—Bricks being trampled upon.

10,309. Bricks being trampled upon and the Manchester union paying money for it afterwards?—Yes, some such other case as mine.

10,310. Your own case apparently you do not understand?—No.

10,311. Do you understand the other case?—No.

10,312. You heard of them paying the money?—Yes.

10,313. Have you ever heard why they did the damage?—No.

10,314. You never heard why the money was paid?—No.

10,315. If any damage was done to your bricks you would expect them to pay you part of it?—No.

10,316. What is the difference between any damage being done and this damage being done for which you did get money?—I do not know of any.

10,317. You would not expect, if any more damage was done to you, that you would be paid from the Manchester union?—No.

10,318. If they did it by mistake would you expect them at once to pay you something?—I do not know.

10,319. Have you known of other cases like this?—No.

10,320. You have not the slightest notion as to who did the damage or why the money was paid, either in one case or the other?—Yes.

10,321. You never heard any reason suggested?—No.

10,322. And have not got any in your own mind?—No.

10,323. Are you a member of the masters' association?—Yes.

10,324. Is it usual for a member of the masters' association to subscribe to the brickmakers' union in order that they may be compensated in some degree if any damage of this sort occurs?—No.

10,325. You have not made this subscription to the Manchester union for any purpose of that sort?—No.

The witness withdrew.

ROBERT BARKER sworn and examined.

10,326. (*Chairman.*) Are you the secretary of the Manchester union now?—No.

10,327. Have you been?—Yes.

10,328. When were you?—I came out the first Monday in September.

10,329. The first Monday in this month?—Yes.

10,330. You were secretary at that time?—Yes.

10,331. How long had you been secretary?—Three months.

10,332. How long have you been a member of the Manchester union?—About 13 years I should think.

10,333. Are you still a member?—Yes.

10,334. Have you often filled the office of secretary?—Two or three times.

18,335. When did you hold it the next before this last time?—About 15 months before.

10,336. Have you filled any other office?—No.

10,337. Only that of secretary?—Yes.

10,338. You have filled it about three times, I think you said?—Three or four.

10,339. You have been secretary nine or 10 months altogether, on and off?—Yes.

10,340. Do you know the last witness, George Bradbury?—Yes.

10,341. He tells us you paid him, for some damage that was done to his bricks in June 1864, the sum of 8*l.* 2*s.*; is that so?—Yes.

10,342. It was the union money, I suppose?—Yes.

10,343. How came you to pay him?—It was passed at a general meeting, of course; these bricks were spoiled belonging to Mr. Bradbury, and of course he stopped his men from work, and they called a meeting, and our meeting considered that he was a straightforward, gentlemanly man, and had never done anything wrong to us, and we compensated him to that extent. It came to 8*l.* 2*s.*, I believe.

10,344. Did it enter into your consideration as to how his bricks came to be spoiled?—No, we did not know anything about it.

10,345. When anybody, a member of your society, has his bricks spoiled, do you compensate him if he is a gentlemanly man?—I never knew of any other case.

10,346. Was this the only case in which you paid compensation for bricks being spoiled?—I never paid any before.

18,347. That was in consequence of a resolution passed at the meeting?—Yes.

10,348. You say it was a very unusual thing, you do not remember it before?—No, I do not remember it.

10,349. You do not remember any money of that sort being paid before, do you?—No.

10,350. Never upon any occasion?—No.

10,351. Was it immaterial to you who spoiled his bricks; as long as he was a member of your union you paid him the money?—It was immaterial to us who spoiled his bricks.

10,352. Did you not make any inquiry as to how the bricks came to be spoiled?—No, we knew they were spoiled.

10,353. Was it immaterial, as far as the payment of money was concerned, who did spoil them?—Yes, of course, we did not know who spoiled them and it was agreed we should pay.

10,354. Did you go into any reason why the bricks were spoiled?—No.

10,355. Do you recollect whether anything was said as to why they were spoiled?—No, Mr. Bradbury came himself.

10,356. Was any reason given or suggestion made as to why the bricks were spoiled?—Not that I am aware of.

10,357. You are bound to tell us the truth, and therefore you should think well before you answer; do you mean to say that no reason was given why the man's bricks were spoiled or why you should pay him?—He was paid because they were spoiled, and we did not know who spoiled them.

10,358. You told me that; but did you not enter into the question as to why they had been destroyed?—No, there was no person knew why they had been spoiled; we had nothing against the man as we knew of, and nobody that we knew of belonging to our body.

10,359. Is yours the only body who might spoil his bricks?—Anybody else might have spoiled them.

10,360. You believe that some other people spoiled the bricks not belonging to your union, and you gave a man belonging to your union some money in consequence; do you understand me?—Yes.

10,361. Was anything of that sort alleged?—No, nothing of the kind.

10,362. Will you swear there was not?—I will swear that I do not recollect anything of the sort.

10,363. That you will swear, will you?—Yes.

10,364. Do you regularly attend the meetings?—No, not regularly.

10,365. When you were secretary did you attend the meetings?—Yes, of course I did.

10,366. Did you make entries in the books while you were secretary?—Yes.

10,367. When did you last see the books; you say you ceased to be secretary last Monday?—Did I say last Monday?

10,368. I thought that you did say so.—I said I came out of office on the first Monday in this month.

10,369. That was Monday week?—Yes.

10,370. Had you a book at the time you left office in which you made all the entries?—Yes.

10,371. Did you hand that book over to the society after you came out of office?—Yes, I left it in the box.

10,372. You have not seen it since?—No.

10,373. You are sure of that?—Yes.

10,374. Will you swear that?—Yes.

10,375. Have you ever known matters brought before your meetings in reference to trade outrages?—No.

10,376. You never have?—No.

10,377. Nothing of the kind?—No.

10,378. Did you ever pay money to a person of the name of Kay while you were secretary?—Yes.

10,379. What was he?—He was our delegate.

10,380. What was his duty as your delegate?—He went round to see that nobody was working that was illegal, that was not a club man.

10,381. Supposing he found men working who were not club men, what was it his duty to do; was it to report to you?—Yes.

10,382. And upon that was it brought before the meetings?—Yes.

10,383. What was done upon it when it was brought before the meeting?—The others would not work with him.

10,384. What did you give Kay money for?—We gave Kay money for doing that business.

10,385. And for anything else?—No.

10,386. Did you ever in your life give him money for anything else?—No.

EIGHTH DAY.

R. Barker.

13 Sept. 1867.

10,387. You never paid him any money for doing any outrage at all?—No.

10,388. Never in your life?—No.

10,389. That you swear?—Yes.

10,390. Do you know whether the treasurer did while you were in office?—I know that he did not.

10,391. That you will swear, will you?—Yes.

10,392. Had you the power when you were secretary of giving any money away without the authority of the meeting?—Only the wages.

10,393. You had no power to give money away for anything that was done except the wages to people?—Anything that was done? I do not understand that.

10,394. Had you power to give money away for anything except wages?—No, we have no power to give money away except for wages or deputations, or anything of that sort, or to pay funeral expenses.

10,395. Were you in office in 1862?—I cannot say.

10,396. Yes, but try to recollect?—I cannot recollect. I have not taken notice when I was in office. I have been in about three or four times, and I do not know when they were except these last three months that I have told you.

10,397. Do you remember the murder of the policeman Jump?—I remember hearing tell of it.

10,398. Do you remember the year when it took place?—Yes.

10,399. Having such a thing to go by, do you remember whether you were in office then?—I was not in office then.

10,400. Do you remember whether a subscription for the defence of the persons accused of that murder was brought before the meetings?—I do not recollect.

10,401. Will you swear that you do not recollect, one way or the other?—I will swear I do not recollect.

10,402. Have you any doubt whether it was brought before the meeting?—I do not recollect.

10,403. Did you ever hear of subscribing any sum of money to that defence?—Yes, I think I never heard of it.

10,404. That you swear?—I swear I never did.

10,405. Do you remember any delegates from the Stockport or the Ashton union coming to your club upon the subject?—I do not recollect it.

10,406. That you do not recollect?—No.

10,407. You recollect nothing of that sort?—I do not.

10,408. You never recollect Kay being paid money for doing anything except in his capacity as delegate?—No, except his weekly salary.

10,409. Do you recollect any other questions of that sort being brought before the meetings, except the questions of people working who do not belong to your union; what questions were brought before your meetings except that?—What meetings?

10,410. You have regular meetings, we understand, kept once a fortnight or once a month?—No, neither once a fortnight, nor once a month.

10,411. How often were they kept?—When they were required, when we were warned.

10,412. Who had the right to warn you?—Any one that had a dispute called a meeting.

10,413. Do you mean that you have not periodical meetings?—Only quarterly meetings.

10,414. Have you a committee?—Yes.

10,415. Have you an executive acting committee?—The officers that sit are considered the committee.

10,416. What are the officers who are considered the committee?—The president and the secretary.

10,417. And the treasurer?—Yes, we call them key holders.

10,418. Have those three a power to call a meeting, or to make a meeting of themselves?—No.

10,419. What power have they united?—They are merely to sit there to take the contributions weekly.

10,420. Do you mean to tell me that there was no other meeting for the affairs of the society than the one which was held quarterly, unless the members were warned?—Yes, except there was a meeting warned.

10,421. How often is a meeting warned, every fortnight or every month?—I cannot say, perhaps neither; perhaps not one in three months sometimes.

10,422. Have any members power to summon a general meeting?—Any member has the power.

10,423. Any member might summon you all to attend a meeting?—Yes, if he had a grievance.

10,424. What do you call a grievance?—A dispute between any other man and himself or his master.

10,425. Does that often taken place?—Yes.

10,426. When was the last meeting that you attended which was summoned in that way for a grievance?—I cannot say.

10,427. Was it a fortnight or a month ago?—I do not know.

10,428. Do you mean to swear that you do not know one way or other?—No, I do not know what the last meeting was about.

10,429. When was it that you attended it?—There has been one since quarter day, it was not in the book of the minutes; I do not know what the meeting was about.

10,430. You did attend?—Yes.

10,431. What took place when you were there?—I do not recollect.

10,432. Is it that you do know and will not tell me, or do you mean to swear upon your oath that you do not recollect?—I say that I do not recollect.

10,433. Do you know and will not tell me, or is it because you swear that you do not recollect?—I swear that I do not recollect.

10,434. Was it your duty when you were secretary to make entries in a book?—Yes.

10,435. Did you make entries of the nature of the meeting to which you were warned and of what passed at them?—No.

10,436. Whose duty was that, anybody's?—My duty was to keep the cash accounts.

10,437. Did you make entries of the money that passed through your hands?—Yes.

10,438. You know therefore that that is the duty of the secretary?—Yes.

10,439. Did you make a true entry of the reasons why you paid money away?—Yes.

10,440. Did you make entries such as "incidental expenses" or "sundries," or anything of that sort sometimes?—No.

10,441. That you swear?—Yes.

10,442. You have sworn that you never knew while you were in the office of Kay being paid any money except as wages?—Yes.

10,443. Supposing he demanded any extra money, what would be your duty; supposing he demanded as much as 10*l.* for anything, would you bring it before the meeting?—We had no power only to pay him his weekly salary.

10,444. If he demanded any extra money would you bring it before the meeting?—He never did while I was in, therefore I do not know what I should have done.

10,445. He never did while you were in office, that you swear?—Yes.

10,446. Nor anybody else?—No.

10,447. When money was wanted for the purposes of the society, whose duty was it to get it, the president's, the treasurer's, or the secretary's?—The treasurer's.

10,448. We understand that you have a trustee?—Yes.

10,449. His name has been mentioned to us; was it the duty of the treasurer to go to the trustee to raise the money?—I call the treasurer a trustee.

10,450. What is the name of the treasurer?—There are trustees.

10,451. What is his name?—There are a deal of them.

10,452. Who is your treasurer now?—The trustees are the treasurers.

10,453. Who are the trustees?—I do not know; I cannot think of all of them. I am one.

10,454. You can think of your own name ?—Yes, I shall not forget that.

10,455. How many trustees are there ?—About 16, I think.

10,456. Are the trustees elected by the body ; they are not trustees under any deed ; they are elected by the body ?—Yes.

10,457. Does every treasurer become a trustee ; you told me that you considered the treasurer a trustee ?—Yes.

10,458. Is the treasurer for the time being a trustee ? In whose name is the account entered at the bank ?—Those are the trustees in whose names money is entered at the bank.

10,459. Six of them ?—Yes.

10,460. Supposing money is wanted for the society, does one of those 16, whoever they are, draw a cheque upon the bank ?—They draw the money.

10,461. They draw the money out ?—Yes.

10,462. To whom do they give it, the president or the secretary ?—They give it to the keyholders.

10,463. Who are the keyholders ?—Those that are in the office at the present time.

10,464. The only people that you have told me of in office are the president, secretary, and treasurer ?—I said keyholders.

10,465. I asked you who the keyholders were, and you answered me the president, treasurer, and secretary ; are there any other keyholders besides those three ?—There are six keyholders.

10,466. Are the six keyholders the persons who have the distribution of the money ?—Yes.

10,467. Mention the names of the six keyholders, you have told me of the president and the secretary ; who is the treasurer now ?—I do not know.

10,468. When was the treasurer elected ?—The first Monday in this month.

10,469. Who was the treasurer before, when you were secretary ; you came out last Monday week ?—There were six of them.

10,470. Tell me one of them ?—Robert Chadwick was one.

10,471. Do I understand that the six keyholders constitute the treasurer of the society ; have the six persons the right to have the money ; is that what you mean to say ?—They have the money on Saturday night, when we receive it.

10,472. I asked you, supposing you wanted money to pay for wages, who was the person when you were secretary to whom you went to get it ?—To the keyholders.

10,473. Then you went to the whole of the six, did you ?—They are all there of a Saturday night.

10,474. Would you get the money from the six keyholders on Saturday night ?—Yes.

10,475. That is the way you got your money ?—Yes.

10,476. They gave you a regular sum on Saturday night as secretary, to pay the wages of people ; is that so ?—Yes.

10,477. Those six persons ?—Yes.

10,478. Then was it your duty when you paid the wages, to enter it in a book as secretary ?—Yes.

10,479. What that book was called was a "cash-book" ?—Yes.

10,480. Had you in addition to the cash-book a book called a "minute book" ?—We had.

10,481. You lay stress upon the word "had" ; has it gone ?—Yes.

10,482 What has become of it ?—It is burnt.

10,483. When was it burnt ?—I cannot tell you the day.

10,484. You can tell us very nearly ?—Four or five weeks since I daresay.

10,485. That was when you were in office as secretary ?—Yes.

10,486. Were you present when it was burnt ?—Yes.

10,487. Where was it burnt ?—At the club-house.

10,488. Where is that ?—In Long Millgate ; the "Crown and Cushion."

10,489. Who were present when it was burnt ?—Me and the president.

10,490. What was his name ?—Lomax.

10,491. And you burnt the minute book ?—Yes.

10,492. Who else was present ?—Nobody else.

10,493. Had you the sanction of the club for burning it ?—Yes.

10,494. Did you burn it of your own accord—you two in the evening ?—In the afternoon.

10,495. What made you burn it ?—Because it was our concern we considered.

10,496. Whose concern ?—Belonging to our body.

10,497. Did you burn it with the consent of the body ?—No, we took it upon ourselves.

10,498. What made you burn it ?—So that nobody else should see it ; not because there was anything that would do any harm in it, only we would not let the public see it.

10,499. What was there in the book that you did not want people to see ?—I could not recollect what was in the book.

10,500. What made you burn it ?—Because we would not let the public see what was in it.

10,501. Was there something to be ashamed of ?—No, there was nothing to be ashamed of ; we are not very good scholars (a deal of our men) and perhaps it might appear foolish.

10,502. You know what you write about when you do write ?—Yes.

10,503. What made you afraid of the public seeing it ?—I said that we did not want the public to see it.

10,504. Why did you not want the public to see it ?—Because we did not want them to know how we carried on our business.

10,505. That was the minute book ?—Yes.

10,506. Was it usual to enter in the minute book the resolutions that you came to at the different meetings ?—Yes.

10,507. Whatever resolution you came to it was the duty of some one to make entries of it there ?—Yes.

10,508. Whatever resolution you came to at the meetings it was your duty to make an entry of it in the minute book ?—Yes.

10,509. And you did not want the public to see it ?—No.

10,510. When you say the public, I suppose you expected that it might be required here ; that was the way the public was to see it ?—That was what I meant.

10,511. How far did the book go back ?—I cannot tell you.

10,512. Several years ?—I do not know.

10,513. What sized book was it ; a book as thick as this (*showing a book to the witness*) ?—Yes.

10,514. Was that the book that you were using at this time ?—Yes.

10,515. When was the next meeting after the book was destroyed, while you were in office ?—I cannot tell.

10,516. Did you burn it of your own accord, you two ?—Yes.

10,517. There was no advice given to you at a meeting or otherwise to burn it ?—No.

10,518. Are you sure of that ?—Yes.

10,519. Are you quite sure of it ?—Yes.

10,520. You did it entirely of your own accord ?—Yes.

10,521. Had you any talk with the members of your club or anybody else about burning it before you did burn it ?—I cannot remember.

10,522. Will you swear that you had not ?—I will swear I cannot remember.

10,523. Will you swear that you cannot remember that you had some talk with some one about burning it ?—I swear that I cannot remember.

10,524. You swear that you had not ?—Yes.

10,525. It was entirely at the suggestion of yourself and Lomax that you burnt the book ?—Yes.

10,526. When was the meeting next after you burnt the book ?—I do not know.

EIGHTH DAY.

R. Barker.

13 Sept. 1867.

10,527. Was there a meeting afterwards?—Yes, I suppose there must have been a meeting afterwards, because the quarterly meeting would be afterwards.

10,528. Was it mentioned at the meeting that the book had been burnt?—No.

10,529. What did they do for a book when the book was gone to enter the resolutions of the meeting in?—They did not ask for it at the meeting.

10,530. They would use the book you say afterwards to enter the resolutions of the meeting in?—I never heard anything about it since.

10,531. Was it generally known and understood that it was burnt?—No, not that I am aware of.

10,532. Was there any other book got in its place?—No.

10,533. As it was, you say you know there was no book to enter the resolutions of the meeting in after the book was burnt?—No.

10,534. Was there any other book burnt besides this one?—Yes.

10,535. What was it?—There were several. No, there was only one.

10,536. What was the other book?—An old cash-book was burnt.

10,537. At the same time?—Yes.

10,538. By you and Lomax?—Yes.

10,539. At the same time and in the same place?—Yes, in the same place and at the same time.

10,540. Were there entries in it which you did not wish to be seen?—It was full and useless to us.

10,541. Did you ever burn a book before?—We never had any burnt before.

10,542. You never burnt a book belonging to the union before this time?—I have not.

10,543. Was it the cash-book that you were using at the time?—No.

10,544. Was it a cash-book in which you had made entries?—No, at least perhaps I might have when I was in office before. It was not the cash-book that we were using.

10,545. Was that the cash-book that you had used when you were secretary?—I cannot say.

10,546. Do you mean to say you do not know whether you had made entries in the cash-book that you have burnt? Take care what you are about.—The book was full, and we burnt it.

10,547. You told me the book was full; I ask, were not there entries in the book in your handwriting?—I do not know.

10,548. Was it the book that you used when you were secretary?—I do not know.

10,549. Do you mean to say that you do not know; or is it that you do know and will not answer? Will you swear upon your oath that you never made entries in that cash-book which you burnt?—I swear that I do not know what was in it, or whether I made the entries.

10,550. I did not ask you that; I ask whether it was the book in which you, as secretary, usually made entries when you were secretary?—I swear that I do not know.

10,551. How many years was that cash-book for?—I do not know.

10,552. Do you mean, upon your solemn oath, to say that you do not know whether it was the cash-book in use at the time that you were secretary?—I never took that notice of it.

10,553. You never took notice of the cash-book which you used as secretary; you say that you have been secretary four times?—I did not say four.

10,554. Was it three or four?—I do not know which.

10,555. Whether three or four, do you mean to say that you do not know that it was a book in which you made entries when you were secretary?—I do not know; I never took notice of it.

10,556. You swear solemnly that you do not know whether it was the cash-book which you used when you were secretary?—Yes.

10,557. Have you any other book in which you made entries when you were secretary?—No.

10,558. Any cash-book?—No.

10,559. Then this must have been the cash-book according to that, which you used when you were secretary?—There was no other cash-book existing.

10,560. It was your duty, as secretary, to make entries in the cash book?—Yes.

10,561. Have you any doubt that this was the cash-book in which you made entries when you were secretary?—I cannot tell; I did not take notice.

10,562. Did you, when secretary, make entries in the cash-book?—If that book was existing when I was secretary, of course I did.

10,563. Was any other cash-book existing except that one?—No.

10,564. Then it follows that that was the book; there was no other cash-book existing that you know of when you were secretary, and you made entries in the cash-book, and there is no other cash-book in which you could have made entries except that one. That is so, is it not? Is not that so? Now you must answer; you shall answer, or take the consequence.—I say that I burnt that book.

10,565. Have you any doubt in the world that you had made entries in that book?—I cannot say how long that book had run, or how long the present one has run.

10,566. There is a cash-book now?—Yes.

10,567. Is it existing now?—I left it in the box.

10,568. Have you ever made entries in the cash-book now existing?—Yes.

10,569. When did you make entries in it?—The last quarter that I was in office.

10,570. The last quarter?—Yes.

10,571. Is there any other cash-book that you could have made entries in, and the other two parties since, except the one which you burnt?—No, there could not be.

10,572. Were there entries in that cash-book which you wanted to prevent the public seeing?—No entries of mine.

10,573. What made you burn it?—I have told you what it was for; it was our own property.

10,574. You told us before about the minute book, now I ask what made you burn the cash-book?—Because we did not wish to let anybody see it; in fact, we would not let them see it, that is the top and bottom of it.

10,575. There were entries there that you did not want anybody to see?—We did not want them to see anything in it.

10,576. Do I understand you to say that you do not know for how many years this cash-book was in use?—No.

10,577. You say that you do not know how many years it went back?—I do not know.

10,578. Your memory improves as you go on; I know you said so. Do you know now how many years this book was the cash-book of the society?—No.

10,579. Have you ever known any cash-book before that which was used while you were a member of the society?—Before that?

10,580. Yes, before that.—I never took notice.

10,581. Do not you know whether there was another cash-book or not?—I do not know whether it was the cash-book that existed when I first went in office or not.

10,582. It may be or it may not be?—Yes.

10,583. You do not know how long the present cash-book goes back?—No, I never took that notice.

10,584. Were there any other books destroyed?—No, not that I am aware of.

10,585. Was it ever mentioned at the meeting that took place afterwards that these books had been destroyed?—No.

10,586. I suppose it was pretty well known; you told one another about it?—I do not know that it was well known at all. I do not know that it was.

10,587. Did you ever mention it to anybody?—I cannot remember.

10,588. Will you swear that you did not?—I cannot swear that.

10,589. Will you swear you cannot remember?—I cannot remember.

10,590. But your memory improves; now will you swear that you never told anyone that you had destroyed either the one book or the other?—Only the party who was with me.

10,591. There was no occasion to tell if he saw you do it?—Yes.

10,592. Did you ever tell anybody at all that you had destroyed these books; take care what you say?—No.

10,593. You never did?—No.

10,594. Was it well known? — Was what well known?

10,595. That these books had been destroyed?—I have most distinctly said that I never told anybody.

10,596. There was another person present; was it generally known in the club that the books had been destroyed?—I never heard of it.

10,597. Did you destroy these books by the advice of the society or any member of it?—No.

10,598. Or anyone?—No, only Lomax and me.

10,599. No one advised you to do it?—No.

10,600. Do I understand you to say that it was the trustees or some of them who signed the cheques to get the money out of the bank?—Yes.

10,601. You called them treasurers?—Yes, and if they want any money out of the bank the trustees have to sign for it.

10,602. Do you know as a matter of practice how many signed the cheques?—Four to a book.

10,603. I do not quite understand what you mean?—We have four banking books, of course you are aware of that?

10,604. I am not aware of anything.—You have them here.

10,605. You have four books, have you?—Yes.

10,606. And separate bankers?—No.

10,607. Are the cheques signed upon the bankers by four persons?—Yes, if they are only going to draw with four persons, then four persons have to sign.

10,608. Any four of the 16 may draw?—Yes.

10,609. Any four out of the 16 may draw, is that so?—Yes.

10,610. They sign the cheques?—Yes.

10,611. Did all the wages and money of that sort go through the hands of the secretary when you were secretary?—All the entries did, not all the money.

10,612. But all the money for wages?—No, the secretary did not handle the money.

10,613. What was the course of paying wages, was it the duty of the secretary to pay?—No, it was his duty to enter it.

10,614. Whose duty was it to pay it?—Any of the keyholders.

10,615. Can you tell me generally the annual expenditure in wages, and so on, of the club?—No, I cannot think of it in my head.

10,616. Cannot you tell me within 20*l.*, 30*l.*, or 40*l.*?—No.

10,617. You cannot give me any notion?—No.

10,618. When you were secretary no money went through your hands?—No; that 8*l.* 2*s.* I paid to Bradbury.

10,619. Was it an unusual thing for you to pay it?—Bradbury asked me to bring it to him.

10,620. Was it an unusual thing for the secretary to pay a sum of that sort?—If he had come to the club-house for it the secretary would have paid it.

10,621. Whom did you get the money from?—A keyholder.

10,622. Were you in Bradbury's employment at the time?—No, and never was.

10,623. Was it because Bradbury asked you to pay it that you got the money and paid it?—Yes, just to save him the inconvenience of coming and waiting for it.

10,624. Otherwise whose duty would it have been to pay it?—One of the keyholders.

10,625. Out of courtesy to him you paid it?—Yes, he called at our house for it. I told him the time I should be at home, and I would give it him.

10,626. You have destroyed the other cash-book; there is a cash-book at present?—Yes, I left one.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

NINTH DAY.

Assize Courts, Manchester, Saturday, 14th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C.	GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq.	JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, ESQ., Q.C., IN THE CHAIR.

JOHN SUTCLIFFE sworn and examined.

10,627. (*Chairman.*) You are in the police force I think, are you not?—Yes.

10,628. What is your position?—Sergeant.

10,629. Did you go one day last week to serve a notice and a summons to produce certain books and documents upon Samuel Wood?—I did.

10,630. On what day was it?—On Saturday last, the 7th.

10,631. He is the landlord of the "Crown and Cushion" inn, is he not?—Yes.

10,632. Where is that?—In Long Millgate.

10,633. Have you the summons?—Yes.

10,634. It is a notice to produce the boxes, &c. belonging to the Manchester union club, is it not?—Yes,

10,635. Who went with you?—Sergeant Torr.

10,636. Anybody else?—No.

10,637. What time did you get there?—It would be about 12 o'clock when we got there.

10,638. In the daytime?—Yes.

10,639. Did you see Wood?—Yes.

10,640. I suppose you served him with the summons and told him the object of your coming?—Yes.

10,641. Did he state to you that those boxes which you wanted were in his house?—Yes.

10,642. On your serving him with the summons, and telling him that he was required to produce them, what did he say?—He said, "I dare not let them go "without some other man being here. If I do they will kill me." Then he sent out two men to see if they could find any of them.

10,643. And did some men come in?—Some men came in in about an hour and a half.

10,644. How many?—Well, I should say six or seven.

NINTH DAY.

J. Sutcliffe.

14 Sept. 1867.

10,645. Do you know any of their names?—No.

10,646. Then did they go into a room?—The landlord and they were in the vault, and had some conversation.

10,647. He had conversation with those six or seven men who came in?—Yes.

10,648. Then did he come upstairs again to you?—He came to us then, and we went and got the box downstairs.

10,649. Did he assist you in doing so?—Yes, he did.

10,650. That was the iron box, I think, was it not?—Yes.

10,651. And he assisted you in taking it away?—Yes.

10,652. After consultation with those men?—Yes.

10,653. And I believe it was brought here, was it not?—Yes.

10,654. I believe those books were taken out of the box? (*handing some books to the witness*)—Yes, those are the books.

10,655. I believe you were not present when any other boxes were brought, were you?—No.

The witness withdrew.

R. Barker.

ROBERT BARKER recalled, and further examined.

10,656. (*Chairman.*) You told me yesterday that you had been secretary of the Manchester union, and that you gave up the office last Monday week, the first Monday in this month?—Yes.

10,657. I think you also said that you met, or the keyholders, met to receive the contributions, either every week or every month?—Every week.

10,658. Whose duty was it to meet; the keyholders?—Yes.

10,659. I did not thoroughly understand from you then, and though I have been looking over the evidence I do not think it is very clearly explained who the six keyholders were; the president you said was one?—I did not say the president was a keyholder.

10,660. Then I misunderstood you. Who were the six keyholders who received the contributions before you gave up office last Monday week?—I do not know their names, only one, as I told you yesterday.

10,661. Was that Chadwick?—Yes.

10,662. Were you a keyholder?—No, I was the secretary.

10,663. Then the secretary is not a keyholder?—No.

10,664. I understood you distinctly to tell me that the president and secretary were two of the keyholders?—No, I did not say so.

10,665. I understood you to say so. You said a great many things yesterday, and you may have got confused, you know. Tell me now who were the keyholders?—I do not know their names, only Chadwick.

10,666. Do you mean to swear that you do not know the names of the people whom you are constantly in the habit of seeing every week?—Yes, I do not know their names, except as Jem and Jack, or something of that sort.

10,667. Do you mean to tell me that you do not know the names of any of the six keyholders who were in office while you were secretary, except one named Chadwick?—Yes.

10,668. That you swear?—Yes.

10,669. And yet you were in the habit during the three months that you were secretary of seeing them every Saturday night?—Yes; sometimes they did not all come.

10,670. But would any one if he was there have the right to receive contributions?—Well, there was sometimes but one, but sometimes they were all there.

10,671. According to your rules, how many ought to be there?—The six ought to be there according to our rules.

10,672. But if there were less than the six, how many ought to be there to receive the contributions?—They ought all to be there.

10,673. If only one was there might he receive the contribution money?—Yes, but they ought to be all there.

10,674. I suppose while you were secretary it was your duty to attend every Saturday?—Yes.

10,675. And did you do your duty?—Yes.

10,676. Were there the same six keyholders all the time you were secretary this last time?—Yes, they were elected for three months the same as one.

10,677. And being elected for three months, and then meeting every week during those three months, you mean upon your solemn oath to state that you did not know their names?—I did not know them, only one.

10,678. Did you ever speak to them?—Yes, I spoke to them all.

10,679. Do you mean to tell me that you do not know their names?—I do not know their names. They might be called Jem or Jack, but I cannot tell their names because I do not know.

10,680. But you are upon your oath, and do you mean to swear that having met them regularly every week for three months you do not know the name of any one of them except the man Chadwick?—No, I know him because he is in the district that I work in.

10,681. But you were constantly in the habit of meeting every week the other five, and you do not know their names?—Sometimes they were not all there.

10,682. Never mind that; you were in the habit of meeting some of them every week?—I do not know their names.

10,683. Did you ever know their names and have forgotten them?—No, I do not remember that ever I did.

10,684. When you spoke to them how did you address them?—I do not know that I ever did speak to them all; I cannot remember.

10,685. Was it your duty as secretary to have communication constantly with them?—Not with them altogether, any of them that was there if I wanted to say anything to them.

10,686. And having constant communication with any of them who were there, upon your solemn oath do you mean to tell me that you do not know the names of any of them except Chadwick?—No, not the surname and the christian name.

10,687. I did not ask you that. Do you know the surname?—No.

10,688. Upon your oath do you mean to tell me that you do not know the surname of any one of them except Chadwick?—Yes.

10,689. That you swear?—Yes.

10,690. Did you ever know the surname of any one of them except Chadwick?—No, I do not know that I did.

10,691. Will you swear that you did not?—Yes.

10,692. And will you swear that you never did?—Yes.

10,693. How were the keyholders elected?—They were elected in the districts that they belonged to.

10,694. Was it your duty as secretary to enter their names in the book?—No.

10,695. Who entered their names in the book when they were elected?—They never were entered in that I know of.

10,696. Was there no book in which the names of those who were elected keyholders were entered?—No.

10,697. That you will swear, will you?—I never saw any.

10,698. Have you as secretary made an entry of the contributions of the members?—Yes.

10,699. Of how many members, as near as you can tell me, did the club consist?—Perhaps 800 or 900; I cannot say.

10,700. Might it have been as many as 1,400?—Well, I do not think there was, but there might be.

10,701. Do you think there were as many as 1,300?—I never counted them.

10,702. I do not suppose you did, but it was your duty to make the entries of the contributions, and you could make a very good guess. You guessed 900 you know, and I ask whether in your judgment there were not more?—I say perhaps 800 or 900.

10,703. And not more?—I do not know whether there were more or not. I am not going to swear that.

10,704. I am not asking you to do an unreasonable thing, but it is not unreasonable to ask you whether in your judgment it would be between 900 and 1,400. ?—It might be between that; I cannot say.

10,705. Then did you enter the contributions in a book?—Yes.

10,706. Every week?—Yes.

10,707. Were the contributions weekly?—Yes, they were, the quarter that I was secretary.

10,708. And how much was the contribution from each member?—They differ.

10,709. Upon what ground do they differ?—There are some members that do not work in the trade, and they do not pay so much as those that do work.

10,710. How much do the men that work in the trade subscribe?—6*d.* in summer.

10,711. And how much in winter?—1½*d.*

10,712. And did the men who do not work in the trade subscribe weekly?—Yes, it was weekly, but not to the same amount.

10,713. What was their weekly subscription?—1½*d.*

10,714. In the summer?—Yes.

10,715. And how much in the winter?—The same.

10,716. 1½*d.* all the year round?—Yes.

10,717. Was your subscription as secretary the same?—No, it was 6*d.*; I was working in the trade.

10,718. And it was your duty to enter the names of each of the subscribers, the men who paid you the money?—Yes.

10,719. Then you entered the names of the six keyholders in the book; the six keyholders subscribed?—Yes.

10,720. Now then, according to this, you entered their names for the whole period of that three months in the book; now I ask you, upon your oath, if you do not remember any of the names that they gave you in the book?—I entered their names when they paid the money, but I could not tell whether they were paying their own card or anybody else's.

10,721. But they must have given you their names to enter in the book?—Of course they did.

10,722. And do you mean, upon your solemn oath, to tell me you do not know the name of one of the six keyholders except Chadwick?—No, I could not single the names of the six keyholders out of all the names in the book.

10,723. And you do not remember what were their names, although you saw them entered in the book?—I do not remember.

10,724. And you also swear, I suppose, that you never heard anybody in the club mention the names of any of the other five keyholders that you recollect?—Not that I recollect.

10,725. You mean to swear that upon your oath?—Yes.

10,726. You told me yesterday about the money; when the money was collected for contributions was it paid to the keyholders, and did you enter it in the book?—Yes.

10,727. What was it the duty of the keyholders to do with the money when they had got it: to pay it to the bank?—Yes.

10,728. Then it was their duty to pay this sum; as a matter of practice did they pay it weekly, or monthly, or quarterly?—Just when they liked.

10,729. But their duty was to pay it into the bank?—Yes.

10,730. So that it would appear that whatever they got, their duty was to pay it into the bank?—They would not put it all in the bank; they would want some for funerals and the business of the lodge and so on.

10,731. Then did they keep that which they would want back from the bank?—Yes.

10,732. Then did they keep the money back from week to week, or from month to month, which they thought they would want for funerals?—They did not take it to the bank every week.

10,733. Did they take it when they liked?—When they liked.

10,734. Keeping back what they wanted for current expenses?—Yes.

10,735. Did they keep back the money for the current expenses and wages?—Yes, they kept something in hand.

10,736. For the purposes of wages and funerals?—For the purposes of wages and funerals.

10,737. Then when that money was drawn from the bank to whom was it paid?—To the keyholders.

10,738. You told me there were 16 persons, each four of them having a book, and four of them having power to draw, and that when they drew they paid it to the keyholders?—I beg your pardon, I did not say each had a book.

10,739. Who were the three associated with you in that book?—I cannot remember.

10,740. You do not remember their names?—No.

10,741. Then I will mention them to you: Was Samuel Ayres one?—Yes.

10,742. Was Joseph Harrison another?—Yes.

10,743. Was William Scholefield another?—Yes.

10,744. Then you four had the power of drawing cheques, had you?—We had the power of drawing money that was in the bank which was in that book in our names.

10,745. Supposing there were 16 trustees, and that each set of four had the books, so that there would be four books, who settled what money must be put down to your names and what money was to be put down to the credit of the other sets of four?—Why, the officers generally do it among themselves; they do not keep all the money in one book, or else it would all be in the names of four.

10,746. That I quite understand; but supposing there are four books and 16 trustees, that is, four to a book, and the money was divided somehow or other between those four books, I ask you how it was settled what amount was to be put down in your book, and what amount was to be put down in each of the other three books?—I do not know; this society was agait before I entered it.

10,747. But did you ever take any money to the bank?—No.

10,748. But some of your four must have done so?—No, I did not say so. I have been to draw it.

10,749. But who put it down to your credit in the book; how did you know there was anything to draw there?—The keyholders that took it put it down in the book.

10,750. And divided it among the four books?—They generally do divide it. They do not let it all be put down in one book.

10,751. I quite understand that, and what they put down to your account is of course the only amount upon which you could draw?—Yes.

10,752. You could not draw upon one another's books?—No, they would not let us at the bank.

10,753. When you wanted money to draw who gave you directions to draw it?—The president; it should be his place.

10,754. Not the keyholders?—The keyholders would tell him if they wanted money, and he would order it.

10,755. Who would tell you when they wanted you four to draw a cheque?—The president should do so if he observes the rules.

10,756. As a matter of practice then when you four wanted to draw a cheque it was by the direction of the president, is that so?—Yes.

NINTH DAY.

R. Barker.

14 Sept. 1867.

10,757. And then it depended upon which four the president told to draw the cheque by whom the cheque was drawn?—Yes.

10,758. Now I find that in January 1864 you four drew a cheque according to that book of 300*l.* Do you see it (*handing a book to the witness*)?—Yes.

10,759. How came you to draw that cheque?—Do you mean what was the money for?

10,760. Yes, I should like to know that very much. There is no mistake about it, you know; we have that book?—I am aware of that; at least I have it now.

10,761. That is the only page; if you like to look at the other pages, pray do?—Well, you know at Christmas ——

10,762. You told me last night you could not read very well; you see you are a good scholar?—No, I said some of our men were not good scholars. I am not an Oxford college scholar.

10,763. Do not imagine that I suppose anything of the sort; but I have no doubt you can read very well. Never mind, that is January, is it not?—Yes, I read it January.

10,764. Now why was that 300*l.* drawn?—We lend our members 1*l.* each some time near Christmas every year.

10,765. Then do I understand you to say that you considered that 300 members had been lent the sum of 1*l.* each?—No; very likely there would be more money some times in the other books at the same date, and then they would have money in hand to make it up.

10,766. Can you explain why a large sum like 300*l.* was drawn in January in any other way than that which you mention?—No, I do not know any other.

10,767. To whom would you give it if you drew it, would you give it to the keyholders?—Yes.

10,768. Then the president directed you on that date to draw a cheque for 300*l.* and you drew it?—Yes.

10,769. And you gave the money to the keyholders?—If it was drawn it was given to the keyholders.

10,770. It was drawn you see from the book; you cannot say that that was wrong?—Yes.

10,771. That money was drawn, and as you say given to the keyholders?—Yes.

10,772. And you have no other means of explaining what it was for, but that in all probability there was some money lent to some of the members?—Yes, that is all that I recollect about it.

10,773. They kept money in hand for funeral expenses, and the wages, and current expenses, and here is a large sum of 300*l.* drawn in January, and you have no means of accounting for it at all except what you have just said?—I cannot tell any other. It is two or three years ago and I cannot think what it was for. I did not keep a diary of every day's accounts.

10,774. Would it be a resolution of the meeting asking the president to draw 300*l.*, or would it be at his will and pleasure that he should draw it?—If it was passed that we should have 1*l.* a piece he would not have to ask himself. He would give orders to draw it.

10,775. But supposing there was a lump sum to be drawn, had the president power, of his own free will and discretion, to direct you to draw the cheque, or was it really the result of the resolution of a meeting?—If the keyholders were short of money, and if they told the president, he could give them orders to draw it.

10,776. Was it also the result of the resolution of a meeting when a large sum like 300*l.* was to be drawn?—It is a large sum, but it is not so large when it is distributed among a good many at 1*l.* each.

10,777. Is it your belief that it was distributed among a good many?—I do not know of any other reason why it was drawn.

10,778. Supposing men were out on strike, would you want a large sum of money for that purpose?—It depends upon the number out on strike.

10,779. But supposing there were men out on strike, would you not want a large sum of money?—Never since I have been in office have we required a very large sum for purposes of that sort.

10,780. When this money was lent to members would it be the duty of the secretary to make an entry of those loans?—Yes.

10,781. Then when you were secretary it was your duty to make an entry in a book that this 1*l.* or so was lent to the members, and to which of the members it was lent, and so on?—Yes, if I was secretary at the time.

10,782. It would be the duty of the person, whoever he was, to make that entry?—Yes.

10,783. Was it a common thing to lend members money in that way?—Yes, a good many years now we have had it, though I cannot say how many years.

10,784. Every Christmas, do you mean?—Well, I do not know how many years.

10,785. How many years do you say?—I do not know how many years.

10,786. As a general rule all the time you have been there has it been, as far as you remember, the usual practice every Christmas to lend some of the members money?—No, not so far as I remember.

10,787. Then was this an unusual occasion in the year 1864?—No, I say it has been the custom for several years; I do not know how many.

10,788. To lend the members money at Christmas time, or at other times?—Yes, about Christmas.

10,789. That is the way in which you account for so large a sum as 300*l.* being drawn, is it?—Yes.

10,790. And you have no other means of accounting for it, but by supposing that it was money lent?—No, that is all that I know of.

10,791. Was 300*l.* according to your recollection and information a large amount for loans?—It is not so much amongst so many members.

10,792. That is assuming that they all had it?—I say that they had 1*l.* each.

10,793. 300 people, if they had 1*l.* each, we are quite aware would require 300*l.*, but that is not very much between a number of people, between 900 and 1,400?—It would be a largish sum to draw out of one book.

10,794. You can tell me of course how much money you would require to lend all the members 1*l.* apiece, if you know how many members there are; but was 300*l.* required, or what was the amount usually required at Christmas, to lend 1*l.* a peace to every member of the society?—Perhaps 700*l.* or 800*l.*

10,795. Do you mean to tell me that every member of the society borrowed 1*l.* of the society every Christmas?—They did not all borrow it; they might have it if they liked, but they had it to pay back.

10,796. How many members wanted that loan, do you think?—700 or 800 I should think. I cannot tell how many; I do not know how many.

10,797. But you think so?—Yes.

10,798. I have a book here with the names of Hugh Hodgson, Septimus Park, John Pemberton and George Manning; do you remember those names?—They will be trustees for that book.

10,799. It is another of the four books. I find in September 1864, a sum of 100*l.* I suppose that would be drawn in the same way; they must have had the orders of the president, and so drawn it in September?—Yes.

10,800. And can you form the slightest notion for what purpose such a sum of money as that would be wanted?—It has been wanted for the business of the club. I cannot explain what it has been wanted for now.

10,801. Your business was as secretary to enter the mode in which it was paid?—Yes, but I did not say that I was secretary then.

10,802. But if you were secretary?—Yes.

10,803. Then I find in the same book in December 1864, the sum of 200*l.*; do you account for that sum being drawn out in December 1864, in the same way as being in all probability for the purposes of loans by the society?—It might be so, I cannot say.

10,804. You have no other means of judging?—I cannot give any other reason for it.

10,805. Then I find in another book that on the 23rd of December 1864 there is an entry of 300*l*; do you give the same answer with respect to that?—Yes, I do not know of any other purpose that it would be for.

10,806. Then there is a further sum in another book in December, by four different trustees of 300*l*., and that is the way you explain it?—Yes.

10,807. So that in each of the four books for the year 1864 there are separate sums of 300*l*. each, entered by the four different sets of trustees, which makes 1,200*l*.; and we understand that your only mode of accounting for that sum of 1,200*l*. is that it was probably for loans to members of the society?—Yes, of course they might want more money than just what they would have to pay for loans, for the other business of the lodge.

10,808. But can you give any notion of the amount of money which you would receive in the course of the year. I can make a calculation from what you have told me?—I do not know.

10,809. Did each member upon his entrance pay 1*l*.?—Yes.

10,810. Then taking the entrance money at 1*l*., and the contributions as you have told me, and the interest of course of any money in the bank, would that work out the sum total of your receipts?—I do not understand what you mean exactly.

10,811. Before you spent you ought to have received, you understand that so far, do you not?—Yes.

10,812. Now you have told me that your receipts consisted of contributions, some from your union men and smaller sums from the other men?—Yes.

10,813. You cannot tell us exactly the number of persons who had subscribed; but if you take the money subscribed by union men and by persons who are not union members, adding to it 1*l*. each for the members coming in and the interest of money in the bank, would that be the whole of your income?—The whole of the money that was in the bank and in the treasurer's hands is the whole of our income.

10,814. And it consists of payments in respect of those things which I have just mentioned?—Yes.

10,815. There is no other ground of payment that you know of, is there?—As income?

10,816. Yes, as income.—There is a small item or two.

10,817. Of what do they consist?—The rent that we receive for our room. We let it for local preaching or something of that sort some evenings.

10,818. You let your room for a little local preaching?—Yes.

10,819. Is that at the "Crown and Cushion," or where is it?—No, it is a room where we hold our meetings.

10,820. Where is it?—It is opposite the club-house; I do not know what they call it, it is not a street; some square I think they call it.

10,821. And do you let it to any one to preach or to your members?—It is not let to our members.

10,822. To any one who wants it for that purpose?—Yes.

10,823. I find a sum of 1,200*l*., according to the four books, drawn out for the year 1864; and the only mode in which you account for that is that it went either in loans or in what you call the ordinary expenses of the society?—Yes.

10,824. Now turn to 1865. Do you see there a sum of 610*l*. drawn by you which is made up by these items added together. There is "cash 100*l*." in January; there is in March 40*l*., then there is "cash 70*l*.," and then in December there is 400*l*. Those sums together you will find make 610*l*. for that year, leaving out the balance which is at the bottom, so that you drew in the year 1865 as much as 610*l*.?—Yes.

10,825. Could you give me any notion of what that was for?—I cannot tell what it was for, but I suppose this 400*l*. would be for the loans of those pounds again.

10,826. Then as to that 400*l*. in December you give me the same answer as you gave before; then as to the 200*l*. that is spread over the other months, how do you account for that?—It is when they have been short of money. I suppose they drew it from the bank.

10,827. And that must have been done by order of the president?—Yes.

10,828. And that money would have been given to the keyholders, and they would have distributed it?—Yes.

10,829. Then I find in another of the books in 1865 another 400*l*., that being in the month of December. Do you give me as to that the same answer as you gave before, that it was in all probability for loans?—I do not know any other reason but that.

10,830. Was it the common practice to draw upon each of the four trustees, that is to draw upon you all equally, or generally speaking to take from one more than from another?—They just suited themselves. If I was a trustee and I was warned to go I should go.

10,831. Now will you turn to your book of 1866, what have you got down as drawn by you?—450*l*.

10,832. What is the date on which it was drawn?—December the 21st, I think it is; it is either the 20th or 21st.

10,833. Then that is in December, and to that I suppose you give me the same answer as before?—Yes.

10,834. You can account for it in no other way?—No.

10,835. Then your other books would show the names of the persons to whom the money was lent, and when they were expected to repay it?—They were expected to repay it just before the Christmas after during the twelve months.

10,836. In what book would that appear; would that be in the secretary's book.

10,837. Then the mode in which this money was spent would appear in the secretary's book?—Yes.

10,838. In the book which you destroyed?—All the income and outgoings was in that book.

10,839. But the mode in which this money was spent would have appeared in that book according to you?—Yes.

10,840. I do not want to go through all the year, but I have taken those three as instances. I understood you to say that when the money was repaid it would appear in the cash-book; of course you put down the time and the persons to whom you lent the money?—Yes.

10,841. And you equally would in fairness put it down when you got it back again?—Yes.

10,842. That would be in the cash-book, would it not?—Yes, all the income and outgoings as I said before.

10,843. Who was the secretary who succeeded you last Monday week?—Henry Green.

10,844. Who was the president who was elected last Monday week?—Kershaw.

10,845. Who was the president next before Kershaw when you were in office?—Lomax.

10,846. (*Mr. Barstow.*) In your trade your work begins to be slack about October, does it not?—Yes.

10,847. And there are a good many men out of employment then?—Yes, generally for a month or two.

10,848. At what time of the year do you begin to work again?—Do you mean to make bricks?

10,849. Only at the brickmaking trade, doing any work in the brickyard of any sort?—We vary; some have to start sooner than others; some at Christmas time, and some before and some after.

10,850. At what time do you think that you are in full work at brickmaking?—In April.

10,851. You are not in full work until April?—We are in full work enough while they are at work in winter, but April is the time that we start making bricks.

NINTH DAY.

R. Barker.

4 Sept. 1867.

10,858. Are a good many men out of work in the winter ?—I cannot say how many are out of work.

10,859. But there are a good many out of work ?—I do not know how many are out of work.

10,860. I do not say that you do ?—You are asking me the question.

10,861. I should have thought you might know ?—I did not see how I should know.

10,862. You have been a brickmaker for a good many years; are you sometimes out of work in the winter ?—Yes, but not often, because I have a family to look after.

10,863. I ask you if a good many are not sometimes out of work in the winter ?—I do not know.

10,864. Are you one of those trustees ?—Yes.

10,865. And do you know at all about what the gross income of your society is ?—No, I do not.

10,866. You do not at all remember whether it is 800*l.* or 1,000*l.* ?—No.

10,867. Not in the least ?—No, not in the least.

10,868. Do you ever look at your banker's book ?—Yes, that which I am trustee for. When I go to the bank sometimes I look and sometimes I do not.

10,869. Can you tell us what balance there is in your books ?—No, I do not know now any more than if I was not trustee.

10,870. You never have known ?—I have never looked, and have never taken that notice of it.

10,871. You have told us that at the end and at the beginning of the year large sums are drawn to lend to the members ?—Yes.

10,872. Besides that what is your regular expenditure ?—I do not know what it is.

10,873. What did you pay your money for ?—To bury the dead and pay the expenses of the order in general.

10,874. One expense is for burying the dead ?—Yes.

10,875. I think I heard it stated that you paid 5*l.* 5*s.* for each funeral ?—10*l.* 10*s.*

10,876. When people are out of work do they have any allowance ?—Not unless they are on strike.

10,877. If they have struck they do have an allowance ?—Oh, yes.

10,878. Can you tell me how much you have paid this year during the time that you were secretary to people on strike ?—I cannot say. I kept it all in the cash-book what I paid.

10,879. Can you not say from your recollection about what you have paid ?—I do not know.

10,880. You have no idea of what it was ?—No.

10,881. (*Chairman.*) Have you known of the disputes between the Manchester and Stockport brickmakers ?—I know there was a dispute.

10,882. Between your union and the Stockport union ?—Yes.

10,883. You did hear of that ?—Yes.

10,884. How long ago ?—I cannot say how long ago.

10,885. Is it going on now ?—Yes, I suppose it is.

10,886. How long have you heard of its going on ?—I cannot say how long.

10,887. A year or more ?—No, I think it is not so long as that at all, two or three months, or something like that.

10,888. Is it a dispute as to what is in your district, and what is in theirs ?—It is a dispute relating to something about men working out of the district, or something of that. I do not understand it thoroughly.

10,883. But you understand this much, do you not; that each union is to employ men in its own district, and in no other ?—Yes.

10,884. You have heard of it pretty often I should think, have you not ?—Yes.

10,885. And have you heard of bricks being destroyed in consequence of some disputes of this sort ?—I heard once that they were destroyed. I saw a reward up for 20*l.*, but I do not know where it was done at. I cannot remember now.

10,886. Your memory is quite a blank as to that ?—Yes, I cannot remember things that I never knew about. I say that I saw a reward up for bricks damaged.

10,887. You suppose it was in consequence of this dispute ?—I do not know what it was about.

10,888. You did not trouble yourself about that ?—No.

10,889. You will not allow bricks to be brought into your district which are made in another district they tell me, that is so, is it not ?—Yes, it is a rule in our society.

10,890. And the district which you claim is four miles round Manchester besides Manchester itself, is it not ?—I do not know; we call it four miles from Manchester, that is all I know. I do not know where it extends to. I do not know the limits myself.

10,891. But that is your rule, is it not ?—Yes, that is how I understand it.

10,892. And you have always acted upon that ?—For anything I know.

10,893. Have you ever known money paid by your union in consequence of those disputes ?—No, only turn-out money as I said.

10,894. Nothing else ?—No.

10,895. Not for a little damage ?—No.

10,896. Nothing of the kind ?—Nothing of the kind that I know of.

10,897. Supposing money had been paid for that, would it have been the duty of the secretary to enter it in his book ?—Any money paid he would have to enter in his book, so that if it was paid he would have to enter it.

10,898. He would have to enter it, whatever it was for ?—Yes.

10,899. And that book you have destroyed ?—Yes. Would you allow me to say a word in respect to my wages. I have been here four days, and I should be getting at my work about 12*s.* or 13*s.* a day. The time will be over directly, and I believe I am only allowed 5*s.*

10,900. You must talk about that bye and bye. It is a question whether you will have anything at all. Remember you have destroyed the books in order to defeat the objects of this inquiry. If you have been advised to do that you may thank those who have advised you.

The witness withdrew.

Mr. JOHN MAYBURY sworn and examined.

Mr. J. Maybury.

10,901. (*Chairman.*) I believe you are the superintendent of police ?—The detective department in Manchester.

10,902. And you have been so for some time, I believe ?—Yes.

10,903. Did you go to the house of Samuel Wood some day this week ?—On Monday night last.

10,904. At what hour ?—It was about 9 o'clock when I got there; it might be a few minutes after.

10,905. Who went with you ?—I took about 12 other officers, all in plain clothes.

10,906. I believe you found Wood, the landlord of the house, there ?—Yes.

10 907. At the "Crown and Cushion ?"—Yes.

10,908. Did you ask him for two boxes belonging to the Manchester trades union society ?—I did; I told him that one of the officers had a summons from the Court to serve upon him, and he was requested to give up all papers, books, and boxes belonging to the society.

10,909. Did he give you up the boxes ?—He did.

10,910. Did he assist you to take them away ?—He did it in the best way he could. He apologized for not doing more. He has been lame; he put his ankle out.

10,911. Do you remember how many boxes you took away then ?—There were five boxes and a little desk, and the small cupboard.

10,912. Was it a moveable cupboard ?—Yes, it was,

hung on a nail, a very small one. By sounding it there did not appear to be anything in it, but we were not sure, and we brought it away.

10,913. He assisted you to take it all away?—He did. There was one box that he had some doubt about, and he said, "I am not sure whether it belongs to another club or not," and he looked at it; but he said, "I believe it belongs to the brickmakers," and he pointed out a safe, as to which he said, "That I am sure belongs to the other club," and I took his word from his manner.

10,914. And he assisted you in bringing those boxes which he was summoned to produce?—Yes; there was a cupboard which he could not get into himself; he sent his wife for the keys, and he broke it open himself with a hammer and chisel.

10,915. There was nothing in that cupboard which you brought away?—There were some glasses and jugs, which he said he supposed must have been left there by a former tenant.

10,916. However, what you took away he assisted you in taking away?—He did.

10,917. I believe you were the person who spoke to Mr. Wood, were you not?—I was.

10,918. Did you speak to him in a room?—Yes.

10,919. Who was in the room?—McLellan and Sergeant Rowbotham.

10,920. Were those the only two in the room with you when you spoke to Wood?—No, there would be more.

10,921. Were there other persons in the room besides your people?—They were downstairs, but not in the room upstairs, the club-room.

10,922. Who were in the club-room?—Only the police and the landlord.

10,923. Who else were in the house?—A good many men and women, but I did not notice any brickmakers at that time.

10,924. They were large boxes, which required several hands to lift them and to assist in taking them away?—Yes, they were, and one in particular.

The witness withdrew.

HENRY GREEN sworn and examined.

H. Green.

10,925. (*Chairman.*) What are you?—A brickmaker.

10,926. Are you a master brickmaker?—No, I only wish that I was.

10,927. However, you are not?—No.

10,928. Then you have been a labouring brickmaker, have you, for some years?—Yes.

10,929. How many years?—I have been brought up to the trade all my life.

10,930. And how long have you been a member of the Manchester trade union?—Something like seven years.

10,931. We are told that at this moment you fill the office of secretary?—I believe it is right.

10,932. You were elected last Monday week, were you not?—Yes.

10,933. Had you filled any office before?—No.

10,934. This is the first time?—Yes.

10,935. How many meetings have you had since you were elected?—We have had an adjourned meeting from the quarterly day.

10,936. Which was the quarterly day?—The first Monday in September.

10,937. That was the 2d of September, was it not?—Yes, I did not know the date, but it was the first Monday.

10,938. Then you were regularly installed, I suppose, and began your duties?—Yes, on the adjourned meeting night, not on the night that I was elected.

10,939. Which was that adjourned meeting night?—On the Thursday night.

10,940. Then did you begin your duties?—Yes.

10,941. I suppose there was a cash book put into your hands?—Yes.

10,942. Who gave it you?—I do not know, to tell you the truth.

10,943. Was there a large meeting?—Yes.

10,944. However, it was handed over to you in the regular way when you became secretary?—Yes, it was handed over to me by some one, I do not know who, to tell you the truth.

10,945. Who was president at that adjourned meeting?—Mr. Kershaw.

10,946. Then you had this cash book; did you make any entries in it that night?—Yes, I think I put an entry down of a man being fined 2*d*. for swearing.

10,947. At the meeting?—Yes.

10,948. Do you collect many twopences of that sort?—It depends whether there are rough characters at the meeting.

10,949. Have you many rough characters, so that in that way your funds are increased?—Yes, that is the way in which our funds are increased.

10,950. By swearing at your meetings?—Yes.

10,951. Did you not put any entries of contributions in the cash book that night?—No, we never put entries of contributions in the cash book.

10,952. Was it a large book or a small book?—Rather large.

10,953. Pretty full as far as you went?—No, it was not a quarter full.

10,954. Then it was about a quarter full when you began to make your entries?—No, it was not a quarter full.

10,955. How many leaves had been written on?—Well, I did not count them.

10,956. I do not suppose you did; but had much paper been used already in the book before you made your first entry?—There was a many that were written on that were blotched, and there was a many that were not blotched, I did not count them.

10,957. Were there any torn out?—There were none torn out.

10,958. What did you do with the book?—On the Saturday night, after your officers had come and taken the books away, I was so disgusted with that proceeding that I took the book and threw it in the fire and burnt it.

10,959. You were so disgusted that you threw it on the fire?—I did.

10,960. But how was it on Saturday that you happened to have it?—Because we went there to collect the contribution, and the book was given into my hands; your officers came on Saturday and took our safe. If they had come like gentlemen and asked for the books we should have given them to them, but they did not do so. They came and committed an outrage I call it, and they took the boxes away, and I took and put the book on the fire.

10,961. Just so, they came on the Saturday, and took the iron box away?—Yes.

10,962. Were you there when they came?—No.

10,963. But you heard of it?—Well, when I got there I did.

10,964. When did you get there?—At 5 o'clock, to collect the contribution.

10,965. On the same Saturday?—Yes.

10,966. And having heard of it, and having collected the contributions, what did you do with your book?—We did not collect any contribution.

10,967. Your book at that time was in one of the wooden boxes?—Yes.

10,968. Then did you take it out?—Yes.

10,969. Did you ever put it back?—No.

10,970. Having taken it out you kept it I suppose in your own possession?—Till I got to a fire to burn it.

10,971. Did you burn it that same night?—Yes.

10,972. Where was the fire?—It was in the brickfield where I work.

10,973. Then you took the book that same Saturday night and burnt it?—Yes, I stuck it in the fire kiln and burnt it.

NINTH DAY.

H. Green.

14 Sept. 1867.

10,974. You burnt it simply because you were disgusted ?—At your proceedings, not at ours.

10,975. You were disgusted at the officers having taken away the iron box ; you had no wish to conceal anything ?—We had nothing to conceal that I am aware of.

10,976. You did not know what the previous entries in the book were, and you had yourself only made one of 2*d.* ?—Yes, that was all, and it was for swearing.

10,977. Did anybody advise you to burn it ?—No, I took it upon my own responsibility.

10,978. Then you did not ask the leave of the club to whom it belonged for doing so ?—No, I shall have to account to them for doing so. If this inquiry had never been I should have said I had lost it.

10,979. Would you have been ashamed of saying you had burnt it from disgust ?—I should not have told them I had burnt it, because I did not know what entries they had made in it.

10,980. But this inquiry coming on you had no objection to tell them that you had burnt it ?—I have no objection to tell you, and they will know through the public press.

10,981. Understand your position. If you do not tell the truth you are liable to prosecution for perjury. Then this inquiry coming on you burnt the book and told the other members ?—I have never told anybody till now,

10,982. Has there been any meeting since ?—Since when ?

10,983. Since this Saturday ?—No, there has been none since.

10,984. Then you have had no occasion to use the book since, have you ?—No.

10,985. None whatever ?—No.

10,986. Then to-night you would have had occasion to use it ?—Yes.

10,987. There was a large meeting on that Saturday, was there not, when the iron box was taken away ?—No, there was no meeting whatever.

10,988. Then when did you first hear that the iron box had been taken away ?—When I went down there to collect the contribution.

10,989. On Saturday ?—Yes.

10,990. Was it the night for collecting the contributions ?—Yes.

10,991. Did many people attend to pay their contributions that night ?—I do not know, we did not stop long.

10,992. But did many people pay their contributions ?—A few old women came and some boys. It is seldom that the men come with their money.

10,993. Did 20 or 30 people come to pay their contributions ?—I cannot say ; I did not go upstairs.

10,994. Did you receive the contributions or not ?—I did not receive a penny.

10,995. Were you in the room to receive the contributions ?—No.

10,996. Then what did those women and boys come for ?—To pay the contributions, but there was none taken because you had taken the safe away, and there was no box to put the money in.

10,997. What made you go to the brickfield to burn the book ?—Because I did not wish any of our members to see me burn it.

10,998. And that was the reason why you did not burn it in the house ?—Yes.

10,999. Which brick-kiln was it that you went to, where is it ?—Off Elizabeth Street, Cheetham Hill Road.

11,000. Whom do you work for ?—Mr. Mycock.

11,001. Was anybody by when you burnt it ?—Not then.

11,002. What time was it when you burnt it ?—It might be 11 or 12 o'clock, it might be before or it might be after.

11,003. Was it about that time ?—I do not know exactly the time, I had had a great deal to drink.

11,004. Do I understand you to say that you were the worse for liquor ?—Yes, rather.

11,005. There was a meeting on the Thursday, you say ?—Yes.

11,006. Was it a large meeting ?—Well something about the same as usual.

11,007. Were there about 200 or 300 people there ?—Yes, I dare say there might be 200.

11,008. Was it at the "Crown and Cushion" ?—It was in our hall adjoining the "Crown and Cushion."

11,009. Then were you secretary ?—Yes.

11,010. Was Kershaw in the chair, as president ?—Yes, I believe he was.

11,011. What took place at that meeting ?—In which way ?

11,012. Were there any resolutions passed ?—I do not know exactly what resolutions were passed.

11,013. I ask you if you can tell me whether any resolutions were passed at that meeting ?—What kind of resolutions ?

11,014. Any resolutions.—I do not know what you mean.

11,015. You do not know the meaning of a resolution ?—No, if you will explain it to me I will answer.

11,016. Do you pretend not to know the meaning of a resolution passed at a meeting ?—I do not understand the meaning of "resolution." I am not a grammatical scholar.

11,017. You do not understand the meaning of a resolution passed at a meeting, is that so ?—Yes.

11,018. Was there a meeting last Thursday ?—No, a week last Thursday.

11,019. Then it was before the book was destroyed ?—Yes.

11,020. Was anything said about a person of the name of Kay ?—No, not that I am aware of.

11,021. Will you swear that this name was not mentioned at the meeting, so that you heard it ?—I will swear that I never heard his name mentioned at all.

11,022. Was there anything said about getting him out of the way ?—I never heard it mentioned.

11,023. You never heard anything of the kind ?—No.

11,024. Was there any talk about money at the meeting ?—How money ?

11,025. You had better not trifle in that way ?—I am not trifling, I wish to answer all questions.

11,026. You must understand it. Was there a talk at the meeting about the money of the society ?—Not that I am aware of.

11,027. That you will swear, will you ?—I will swear that I do not remember anything of it.

11,028. Will you swear that you do not remember anything that was said ?—Not about money, because that is always read up at the quarterly night, and not till then.

11,029. Was there anything said about expending money in order to get Kay out of the way ?—Not that I am aware of.

11,030. Will you swear that there was not ?—I will swear that I never heard it.

11,031. You never heard anything of the sort ?—No.

11,032. Was anything said at the meeting about not telling us, the Examiners, anything ?—Not that I know of.

11,033. Will you swear that there was not ?—I will swear that I never heard anything.

11,034. That you swear, do you ?—Yes.

11,035. And you will swear that no advice was given you of that sort, not to tell anything ?—I will swear that no advice was given, to my knowledge, at that meeting.

11,036. If there had been such advice, you as secretary must have heard it ?—I do not know ; I was not in all the time. I might have gone out to get a glass of beer.

11,037. Will you swear that such a thing was not said ?—I will swear that I never heard of it.

11,038. Who was the treasurer at that meeting ; had you any treasurer ?—No, not this quarter that I am aware of.

11,039. Is it the duty of the secretary, as far as you know, to enter the proceeding of a meeting in a minute book?—We have never had one while I have been in office.

11,040. But having been a member of the union, can you tell me whether it is the duty of the secretary to make those entries?—I cannot tell you that, for I have never taken much interest in the society with being a young man.

11,041. Then you do not know, one way or the other, whose duty it was to make an entry in the minute book of the proceedings of any meeting?—No, I have never seen any one while I have been in office.

11,042. But before you were in office had you ever seen one?—I do not know what a minute book means.

11,043. Nor a book in which the proceedings of the meeting were entered?—I have seen them writing down.

11,044. The proceedings of a meeting?—I do not know that.

11,045. We have had evidence of it, so that you are not telling us much. You have seen another book usually at the meetings besides the cash book?—Yes, there is generally a ledger and cash book, and two or three books more. I do not know what they are; all that I have had to do with have been the ledger and cash book.

11,046. You may stand down, and your expenses are not allowed, after your conduct. If anybody advised you to act as you have done you may thank them.—Well, it will be out of my pocket; I have lost a day's work through it.

The witness withdrew.

James Cowdy sworn and examined.

11,047. (*Mr. Barstow.*) Are you a brickmaker?—Yes.

11,048. Are you a member of the Manchester Brickmakers' Society?—Yes.

11,049. How long have you been a member?—About 24 years.

11,050. You have been a pretty zealous member I believe?—I do not understand that.

11,051. You have been in trouble before, have you not?—Yes.

11,052. In consequence of some outrage?—I believe it was.

11,053. What was it?—I was not there.

11,054. But what did they say that you did?—Spoiling bricks I believe.

11,055. Where was that?—Up George's Road.

11,056. At Manchester?—Yes.

11,057. And where was it they said this of you; it was at Liverpool, was it not?—Yes.

11,058. And what did they do to you?—They gave me four years.

11,059. What year was that?—I do not know rightly.

11,060. About what year?—About 8 or 9 or 10 years since I daresay now, but I cannot tell to a year rightly.

11,061. Whose bricks were those?—Topley's and Hayfield's.

11,062. What had Messrs. Topley and Hayfield been doing; were they in dispute with the union then?—No, not that I am aware of.

11,063. Was there any strike then?—No.

11,064. Now you know you have been once in the grasp of the law, and if you have done anything about which I am going to ask you, you perhaps know that we have the power of giving you an indemnity, so that they will not be able to do anything to you again. Now, consider that, and answer what I am going to ask you; do you know a man named George Bradbury?—Yes.

11,065. You know that he was a brickmaker?—Yes.

11,066. Did you hear that he had some bricks spoilt in 1864?—No, he had none spoilt in 1864 that I am aware of.

11,067. When was it that he had some bricks spoilt?—I believe he had some bricks spoilt in 1867, this year.

11,068. Do you know what that was for?—No.

11,069. Did you spoil them?—No.

11,070. Had you anything to do with them?—No.

11,071. How did you come to know that they had spoilt them?—There was a boy told me the next morning when I went to my work; a boy that works in the croft.

11,072. Had you nothing at all to do with that yourself?—No.

11,073. Do you know who had?—No.

11,074. Do you know why it should be done?—No.

11,075. And is that all you know about it—that the boy told you that they had been spoilt?—Yes, that was all I saw, that they had been spoilt the next morning.

11,076. Do you work for Mr. Bradbury?—Yes.

11,077. Did you look over the ground?—Yes.

11,078. Did you see how many people had been there?—There might have been two or three, I thought, but I could not rightly say.

11,079. Upon your oath had you nothing to do with that?—No.

11,080. Have you had anything to do with any other spoiling of bricks?—No.

11,081. Not of any kind?—No.

11,082. (*Chairman.*) Nor with anything else?—No.

11,083. (*Mr. Chance.*) Do you know who did spoil Mr. Bradbury's bricks?—No, I do not; I have no idea.

11,084. What is the name of the boy who told you?—He works with me; his name is Mally.

11,085. What is his christian name?—Mally Lowe I think they call it.

11,086. About what age is the boy?—About 9 years of age.

11,087. He works for you at Mr. Bradbury's brickcroft?—Yes.

The witness withdrew.

Thomas Shepley sworn and examined.

11,088. (*Mr. Chance.*) Are you a master brickmaker?—My father is.

11,089. Do you work with him?—I superintend his work.

11,090. Where does he carry on the brickmaking business?—In Hyde.

11,091. How far is Hyde from Ashton?—About three and a half miles perhaps.

11,092. Is that within the district of the Ashton union?—Well, I think they throw it into the Ashton district.

11,093. Is there a brickmaking union belonging to Hyde?—No, no separate union.

11,094. In the year 1861 was your father employing non-union men?—Yes.

11,095. Was he employing any others besides non-union men?—Not in 1861.

11,096. Had he any complaints made to him by the Ashton union, in consequence of his employing non-union men?—Yes.

11,097. Did they wait upon him and remonstrate with him?—In 1860 they did.

11,098. And did he refuse to employ union men?—There was a strike at the time as regards wages, I think. We were paying 1*s.* 8*d.* a thousand at that time, and they wanted to throw us under the Manchester union rules to pay 2*s.* per thousand.

NINTH DAY.

T. Shepley.

14 Sept. 1867.

11,099. Did your father refuse to do it?—He refused to do it.

11,100. And then did the union men strike?—Yes.

11,101. They left your employment?—Yes.

11,102. Then upon their leaving your employment, did you employ non-union men?—In 1861 we did; in the beginning of 1861 we did.

11,103. And were you asked by any one from the union to turn away your non-union men?—Yes.

11,104. Was that before any damage was done to your property?—Yes.

11,105. And did you refuse to turn away your non-union men?—Yes, we did.

11,106. After refusing to turn away the non-union men, was any damage inflicted upon any property belonging to you?—Yes, there was.

11,107. What was it?—The first damage that they did was to break into the hut that we had in the yard, a sort of a cabin.

11,108. When was that?—That would be in the spring; in February.

11,109. In February 1861?—Yes, they broke all the men's tools up.

11,110. Did they do any other damage?—They pinned a notice on to the hut that if the men did not leave the yard what they would do to them. It was not the yard that they had anything against, but it was the men who were working there, or something to that effect.

11,111. What did the notice contain?—It was something to that effect that it was not the yard that they had anything against, but the men that were working in it. I cannot explain exactly what they said, but it was something to that effect.

11,112. There was no threat of what they would do?—I cannot say; the notice is in the hands of the police, I think.

11,113. Was that after the hut had been broken into?—It was left on the door at the time they broke it open and took the tools.

11,114. Was any further damage done at that time?—No.

11,115. After that did you continue to employ non-union men?—Yes.

11,116. Can you tell us more distinctly what that notice contained, as to what they would do to them?—Well, I cannot exactly.

11,117. (*Chairman.*) What sort of a thing was it?—It was a notice pinned on that, if they did not leave their work, they used some sort of threats that their lives would be sacrificed.

11,118. (*Mr. Chance.*) You are sure that words similar to that were upon the notice?—Yes.

11,119. You say you continued after that to employ non-union men?—Yes.

11,120. Was any other damage done to your property after that?—Yes.

11,121. How long after?—It would be in May, I think. We should have commenced making bricks perhaps about a month or six weeks. It would be in May. There was a large quantity of needles thrown into the clay, carpet tacks, and other short nails, "sparrow bills" as we call them, and things of that sort.

11,122. How many bricks were destroyed by that?—There was a very large quantity thrown on, and I think they must have been disturbed while they were doing it, for a handkerchief bundle with many a parcel of needles in it was left there.

11,123. How much clay was there in which the needles had been put?—They put them in the tempered clay first, that is what we were using to make bricks with.

11,124. How much of that was destroyed?—Sufficient to make many a thousand bricks, but I cannot exactly tell.

11,125. Did they put them anywhere else?—Yes, they put them in the face of what we call the cast clay.

11,126. How much of the cast clay was destroyed?—Many a thousand. You know we cast 300,000, or 400,000, or 500,000, or 600,000, at once, and they threw the needles among it all.

11,127. Then there would be as much clay as would make 300,000 or 400,000 bricks destroyed?—All needled.

11,128. Was it spoilt altogether?—No; I came to Manchester and bought a pair of mittens for the moulder to mould up the clay which was tempered, and he moulded it all up without being injured.

11,129. Then the only loss on that occasion was the loss of time and labour?—Yes, before the needles would face the mittens they had to go into the soft clay.

11,130. But how about the cast clay?—We picked them off as well as we possibly could, and were as careful as we could be with them.

11,131. And then afterwards I suppose you worked that up?—Yes.

11,132. How many many men do you suppose had been employed in doing this?—Perhaps three, or four, or five, might be there.

11,133. The needles were of a refuse or damaged character, were they not?—Yes, they were of all sizes from an inch to three or four inches long.

11,134. Did you ever know who had done this?—No.

11,135. Did you continue to employ non-union men after this?—We kept on with non-union men.

11,136. Did any other damage occur to your property?—Yes.

11,137. What was that?—In August we had two very valuable horses cut in the stable,

11,138. What was the value of them?—Well, we had had 50 guineas offered for the pony, and the other I should think was worth between 30*l.* and 40*l.*

11,139. What was done to them?—They were hamstrung in the stable.

11,140. What did you do with the horses, did you destroy them?—We destroyed one because when we went in he was down, he was cut right through, and he was on his quarters in the stable. We tried to rally the pony for five or six weeks, but we had to destroy him.

11,141. Did you take any means after those outrages for the purpose of discovering who the perpetrators were?—There was a reward offered.

11,142. And I suppose that you gave information to the police about it?—Yes.

11,143. At that time you did not discover who had done it?—No.

11,144. Was there any damage done to your property afterwards?—No, never since.

11,145. All those three outrages occurred in 1861?—Yes.

11,146. That maiming of the horses which was done was spoken to by the witness Hipwell?—Yes.

11,147. That is the same occasion?—Yes.

11,148. Did you continue after this to employ non-union men as before?—Yes.

11,149. For what length of time did you employ the non-union men?—We have them working yet.

11,150. And you have never received any damage since August 1861?—Never since August 1861.

11,151. Had you a man of the name of Wyatt in your employ?—Yes.

11,152. When was that?—He came to us in 1860, I think.

11,153. In what capacity did he come to you?—He came as a union man.

11,154. He was a member of the union then?—Yes, we employed union men before that time.

11,155. How long did he remain with you?—He is with us yet.

11,156. Is he still a member of the union?—No, he left the union in the winter of 1860.

11,157. He is here, I think, is he not?—Yes.

11,158. But do you know of your own knowledge whether he has been threatened by any of the union men?—Well, I have never heard him threatened personally, but he has been threatened many a time.

11,159. Has he spoken to you about receiving threats?—Yes.

11,160. Has he also spoken to you about damage having been done to anything that is his?—There were his tools in the cabin at the time that they broke in.

11,161. Has he told you of any other injury which he has received?—He said that he had been waylaid and threatened many a time by the union men.

The witness withdrew.

BUCKLEY WORTHINGTON sworn and examined.

11,162. (*Mr. Barstow.*) Are you a brickmaker?—Yes.

11,163. Are you a member of the Ashton union?—Yes.

11,164. There is a branch of that union at Hyde, is there not?—Yes.

11,165. And are you the treasurer and secretary of it?—Well, I was not put in as the secretary. If you will allow me a minute I will tell you how it was. We live about a mile and a half from Ashton, and they used to warn us to so many meetings that we got tired of going to them. We had to go three times in one week, and we determined to have a meeting of our own among ourselves, and to have a district man to go to the masters if there was any dispute between us. I was the one that received the money every Saturday night and we agreed to pay 1*s.* 6*d.* between us to them that collected it, and when there was two deputed to be sent to a master we allowed them their wages for the time that they lost. We collected the money and sent it to Ashton every fortnight.

11,166. That was for your own convenience?—Yes, that was for our own convenience.

11,167. If Hyde had been a union you would have been secretary, but as it was only a district you did duty as a collector?—Yes, now and then; not always.

11,168. But were you so employed in 1860 and 1861?—Yes, I believe I was.

11,169. I suppose you remember that there was a turn out then at Mr. Shepley's?—Yes.

11,170. Mr. Shepley's union men left his employment, did they not?—Yes.

11,171. Did you go to Mr. Shipley to induce him to take them back again?—No.

11,172. But are you aware that he was applied to?—Yes, the district man and another went.

11,173. But not you?—No, not me.

11,174. Are you aware that some injury was done to his property?—Yes.

11,175. First of all I think that his shed was broken open and his tools destroyed; did you know that?—I have heard of it.

11,176. Do you know who did that?—No, I do not.

11,177. Did you pay any money for it?—No, never. I never paid any money for anything except when we had a district meeting. We were allowed 3*d.* worth of liquor a-piece, except two men who had been sent to a master, and we had paid them for the loss of time.

11,178. Then do I understand that you have paid no money for any of these things?—For no depredation whatever; nothing unlawful.

11,179. Nor for any malicious damage?—Never in my life; I never countenanced anything of the kind, and never shall do.

11,180. Then you had nothing to do with needling Mr. Shepley's clay?—I never had.

11,181. (*Mr. Chance.*) Have you no meetings of your branch union at Hyde?—Yes, sometimes.

11,182. What took place at those meetings?—It was when there was either a dispute amongst the men or a dispute between the masters and the men.

11,183. When you had a dispute with the masters then you had a meeting about it?—Yes, and we had 3*d.* worth of liquor a-piece allowed.

11,184. Was that all which was allowed for you, to have 3*d.* worth of liquor a-piece?—Yes.

11,185. That was all that took place?—Yes.

11,186. Whenever there was a dispute, about 20 of you met and had some liquor, and that was all that took place?—Yes.

11,187. And you mean to say that, do you?—Yes, I do. We picked two men out to go to a master and to see him, to see what the grievance was and try to reconcile it.

11,188. But then you discussed the matter, did you not?—It did not take many minutes. There would be another man picked out to go with the district man to see what the grievance was and to see if they could not reconcile it.

11,189. You say that you do remember the dispute with Shepley?—Yes.

11,190. Were men picked out for the purpose of going to Shepley?—I believe they were.

11,191. Who were the men who were picked out for that purpose?—I do not know; it is so long since that, I do not know who they were that went, and it was considered of no great importance.

11,192. What was considered of no great importance?—When those men were sent to him, Mr. Shepley proposed an agreement that most of us would have agreed to, but the Ashton union would not let us.

11,193. You would have agreed to it?—We would have agreed to divide the price from what we had had. We had had 1*s.* 8*d.* before, and Mr. Shepley proposed giving 1*s.* 10*d.* and we thought it would do, but then we might not have it as we wanted it, being only a branch.

11,194. You would have agreed if the Ashton union would have let you?—Yes, I would for one; and would have worked for 1*s.* 10*d.*

11,195. You never paid any money for those outrages?—Never, not a halfpenny, nor ever countenanced anything of the kind.

11,196. But you have heard of them?—Yes, I have heard of them. I have worked for Mr. Shepley.

11,197. And you have had meetings about them I suppose, have you not?—No, we have not. The most we have had these little meetings about amongst themselves, was to give up going so far to Ashton, for it always lost us a day's work.

11,198. But when you heard of those things, did you not remonstrate against them?—We had no meeting over it. Everyone in our district I believe was as sorry about it as Mr. Shepley's own family, that ever anything should have happened in our district, because it was not within our knowledge. I do not think there was a man in the neighbourhood that knew of it.

11,199. (*Mr. Barstow.*) We know that this damage was done by the Ashton men and not by your men at all?—Yes.

11,200. (*Chairman.*) You say if the thing happened in your district you sent a man to go with the delegate to try and make up the dispute. Supposing they could not make up the dispute, then did you refer it to the Ashton union, you being a branch?—No, we did not.

11,201. You 20 men met, we will say, and heard of a dispute in your branch district between master and men, and you tried to make it up?—Yes.

11,202. Supposing you could not make it up, and terms were offered to you, did you submit them to the general Ashton union?—There was an old man came round to our neighbourhood to know if there was any disputes, and we sent word by this old man, and he was like a delegate between our districts and the Ashton club.

11,203. But you were governed I understand by the Ashton club?—Yes, we were; whatever they said we were to do we had to do as far as rules and price went.

11,204. Do you remember those horses being stabbed that have been talked about?—Yes, I do.

11,205. Were you there at the time?—I was work-

NINTH DAY. ing in the same district, but I never knew of it till breakfast time the next morning. I do not believe that there was any man in Hyde that knew anything of it until after it was done.

B. Worthington.

The witness withdrew.

14 Sept. 1867.

JOSEPH WYATT sworn and examined.

J. Wyatt.

11,206. (*Chairman.*) Are you a brickmaker at Hyde?—Yes.

11,207. Are you the manager of Mr. Shepley's brickyard?—I am.

11,208. Were you formerly a member of the Ashton union?—I was.

11,209. And I believe you left it in 1860, did you not?—Yes.

11,210. Did you leave it in consequence of some fine being imposed upon you?—Yes, I did.

11,211. How much was the fine?—30*s.*

11,212. And what did they say it was imposed for?—I took Mr. Shepley's brickyard to work against them.

11,213. Mr. Shepley had non-union men, we understand?—They were union men at that time, and I left the union men, and said I would do the yard independent of the union men, and they fined me 30*s.* for saying that.

11,214. And then you left the union?—I did.

11,215. Then was Mr. Shepley thinking of employing non-union men, or what was the offence? If he was employing union men how was it you could not be manager?—I left the yard at that time and engaged it the year after 1860.

11,216. Then you were a union man, of course, when the fine was imposed upon you?—Yes.

11,217. I did not thoroughly understand why the fine was imposed?—Because I said I would take the yard and work the yard independent of union men.

11,218. Was that in the year 1860?—Yes.

11,219. In the year 1861 Mr. Shepley appointed you manager, did he not?—He did.

11,220. Were any union men employed at the time?—No.

11,221. In February 1861, did anything happen to your cabin in the night?—It did so.

11,222. What happened?—It broke all the tools that I had in.

11,223. In the night, during your absence?—Yes.

11,224. Then you as manager had a cabin in which the tools were?—Yes.

11,225. Were they wheelbarrows, or what were they?—They were tools of all sorts to get clay with.

11,226. And some persons broke in in the night and destroyed the tools?—They did, and other materials as well as tools.

11,227. What else?—Wheelbarrows.

12,228. What else?—A kiln barrow.

11,229. And they destroyed them all, too?—They destroyed them all too, and threw them into a reservoir.

11,230. Did they destroy all that was in the cabin?—Yes, they did not leave anything.

11,231. Was there a letter fixed on the door threatening injury to you?—Yes.

11,232. Do you remember what the injury was that was threatened?—Well, I gave the letter up to Mr. Liddell, the deputy-constable, and I have forgotten the most of it, but I think it said that if I did not leave or go away from the yard, and they visited the yard any more, the next time they visited me I must look for my life.

11,233. Was that a printed letter or a written letter?—A written letter, and I gave it to Mr. Liddell.

11,234. Where was it put?—On the front of the door in the street.

11,235. Had you any personal quarrel with any one?—Not a word.

11,236. Was there any other reason for this letter except this quarrel with the union?—Not that I am aware of.

11,237. I suppose the letter was not signed by any one?—No.

11,238. And you do not know by whom it was written?—No.

11,239. Used you at that time to walk to your work?—Yes, I had nearly two miles to go night and morning.

11,240. Did your way lay across fields or private paths, or anything of that sort?—It was a private road.

11,241. Was it partly over fields?—Through the town, and about a mile was private road.

11,242. And I suppose you went at regular stated hours?—Yes.

11,243. So that people would know what your hours were when you walked along the path, and when you were expected to come back?—Certainly.

11,244. Did you ever on those occasions notice any union men watching you?—On many occasions I saw them on the ground before I left work, and they followed me on the way.

11,245. At what time in the morning did you usually go to your work?—Sometimes half-past 6 or 6, or near upon 7. It depended upon how light the morning was. This was in winter time.

11,246. What time did you go in winter time?—Just about half-past 6 or 7, so that I could get to my work as soon as it was light.

11,247. And what time did you use to come away?—Five or half-past.

11,248. Just as it was getting dark?—Yes.

11,249. You say that on several occasions you noticed union men watching you?—Yes.

11,250. How were they watching you?—In different postures. Sometimes I could see them half-way up a field, and near the footpath.

11,251. Did you notice or know any of those men that were watching you?—I have seen a man of the name of Barker watching me.

11,252. Do you remember his christian name?—Yes, William Barker.

11,253. Anybody else?—Yes, a man of the name of Rawlinson.

11,254. Were those two Ashton union men?—They were Hyde men.

11,255. But did they belong to the Ashton union?—Yes, and a man of the name of Holland I have also seen.

11,256. Was he also an Ashton union man?—Yes.

11,257. Did they say or do anything to you on any of those occasions, when you say they were watching you?—Not upon my travels.

11,258. What were they doing when you saw them?—They seemed as if they were seeking, or hiding, or watching for something, looking on the ground when I was passing, or something of that sort.

11,259. But they did not say or do anything to you?—No.

12,260. Did you notice anything in the path when you went along on any of those occasions?—Several times I have found apples and oranges right in the path.

11,261. Where you must go?—Where I must go close by them.

11,262. Did you ever pick up any of the apples and oranges?—Yes, I did, and examined them.

11,263. Which did you pick up?—I picked up both of them.

11,264. Did this happen several times?—It did.

11,265. What did you observe in either the one or the other?—When I cut them through it was green.

11,266. Take an orange; did you cut the orange through?—Yes.

11,267. What did you observe?—It was green where the end of the boring was; the same as you might bore a cheese, and bring the cork out, and then drop it down again into it.

11,268. The end of the hole was something green?—It had struck the orange green.

11,269. The orange was bored, then, as I understand?—Yes.

11,270. Did it appear to have been bored with a knife?—No, it had been bored by a sharp instrument something like a gimlet.

11,271. Had the hole which it had made at the top been filled up again?—Yes, put down just as a cork in the bottle, so that you could not discover that anything had been done to it.

11,272. A sort of hole had been made with a gimlet, and then at the bottom of the hole something green was eventually discovered, but the top was filled up so that nobody could discover that it had been bored at all?—Yes.

11,273. How many times did you discover this in the oranges?—All times.

11,274. How many times did you discover it in them?—Four or five times.

11,275. At the same time that you found the oranges did you find the apples?—There were five apples along with the oranges the first time.

11,276. How many oranges were there there the first time?—About five.

11,277. Five oranges and five apples?—Yes.

11,278. Did you discover that this had been done in opening all the five oranges?—Yes.

11,279. In every one of them?—Yes.

11,280. Did you open the apples?—Yes.

11,281. What had been done to them?—The very same.

11,282. And at the bottom of the boring there was something green, and the hole was covered up again so that you might not observe it till you cut it open?—You could not observe it till you cut it open.

11,283. Did you pick all the ten up, the five oranges and the five apples?—Yes.

11,284. Did you cut them open?—Yes, and made them away.

11,285. You never were successful in finding it out?—No, it struck me forcibly that something would be done to me because I had heard so many threats, and people had said so. I was always on my guard.

11,286. In opening the oranges and apples you found this boring in them?—Yes.

11,287. What did you do with them; did you take them to any chemist?—No.

11,288. What did you do with them?—I made away with them in the ashpit.

11,289. The first lot you threw away, the five oranges and five apples?—Yes, and then I informed Mr. Liddell about it, and Mr. Liddell said, "If you do not mind they will trick you; anything that you find in that way make away with it, and destroy it without touching it.

11,290. Without eating it?—Yes.

11,291. You say that the first time you discovered them there were as many as five apples and five oranges?—Yes.

11,292. Before that, had you seen any men in the field?—A fortnight previous I had.

11,293. On the very day had you seen them?—Yes.

11,294. How near the place?—There were seven there.

11,295. Was it at night when you were coming home?—Yes, the first lot was in the night.

11,296. What month was it?—The latter end of February, I did not make any entries of them.

11,297. And you saw some of those men on your road home at that time?—Yes.

11,298. And near the spot where the oranges and apples were found?—No, they were a couple of hundred yards from the place.

11,299. Were the men whom you saw then the men whose names are mentioned, Barker, or Rawlinson, or Holt?—Yes, and several others.

11,300. Did you see those men on that occasion?—Yes.

11,301. And there were several others?—Yes, that I knew were union men by sight.

11,302. Upon any other occasion besides this one, did you find any oranges or apples in your path?—Yes, about five times in all.

11,303. And all about that time, February or March?—The beginning of March and the latter end of of February, when it began to get a bit light in the morning I could see everybody, and therefore I was not troubled with them.

11,304. How many times did you pick them up?—Every time.

11,305. Did you open them every time?—No.

11,306. Not after the after the first time?—No.

11,307. How many did you generally find in the path these five times, both oranges and apples?—There were more every time.

10,308. There were four or five each time?—Sometimes, and something like six and seven in the end.

11,309. Half oranges and half apples?—Yes.

11,310. And after having found out the first lot being in the way you have described you did not open the others?—No, Mr. Liddell told me to make away with them.

11,311. Therefore each of the remaining times you destroyed them all?—Yes.

11,312. By throwing them in the ash-pit?—I threw them over the bridge into the river as I went over.

11,313. You threw all you found into the river?—Yes.

11,314. It was only on the first occasion that you opened the five oranges and the five apples?—Yes.

11,315. This took place at the end of February and pretty well through March?—Yes, four or five weeks they were agait it.

11,316. Was William Barker assistant secretary to the Ashton union?—Yes, he was.

11,317. When does the brickmaking season commence?—About the middle of April; it depends upon the weather.

11,318. You say that you went to Mr. Shepley's service in the beginning of the year 1861, the brickmaking season began about April?—Yes.

11,319. Before it began did you see William Barker? Yes, I saw him regularly.

11,320. Do you remember him saying anything to you?—He said to me when we commenced brickmaking, that before we should make 200 bricks I should have a ball through me, and he say, "The "others will remember when the butterflies come."

11,321. Do you remember whether at the commencement of the year 1861 all the clay that was tempered was spoiled?—Yes.

11,322. By needling?—Yes, by needles, tacks, and pins.

11,323. Did you often watch the ground at night?—I did after that night for two years.

11,324. While you were watching the ground at night, were you often disturbed?—Many a time; the police were with me generally.

11,325. How many?—Just as I had a mind to call upon them, if I saw danger. There was always one.

11,326. And sometimes more?—There was always one going round, and he came in to look round.

11,327. How were you disturbed?—By men coming round the yard to see whether they could attack me. Often they sent a black dog round, and if it found anybody it would make a noise and bark.

11,328. To warn them that you were there?—Yes, that somebody was there.

11,329. Can you tell whether those who were attacking you were brickmakers?—They were in disguise.

11,330. Did you know that they were brickmakers?—We could see that they were after something at that hour of the night.

11,331. Of no good?—No good.

11,332. Do you remember the attack on the horses?—Yes.

11,333. Were you in the service of Mr. Shepley at the time?—Yes.

11,334. While you were a member of the union did you attend the meetings?—I did not attend so many.

NINTH DAY.

J. Wyatt.

14 Sept. 1867.

11,335. When you did attend, were matters of this kind brought before the meeting ?—There was not much done at the time when I left.

11,336. But there were complaints brought before the meetings ?—There were little ones.

11,337. But no big ones ?—Not at that time.

11,338. There was a branch union at Hyde ?—Yes, called the Hyde branch.

11,339. Were you a member of that ?—I paid my money to both of them, I worked at Denton and it belonged to Ashton.

11,340. (*Mr. Chance.*) You have spoken of Barker and Rawlinson, were any of the men belonging to the Hyde branch there ?—The three I mentioned did belong to the Hyde branch.

11,341. You say that you were watched by union men ?—Yes.

11,342. Were any of the union men by whom who were watched members of the Hyde branch ?—Yes, all three were.

11,343. Are you sure of that ?—Yes.

11,344. Do you know who was acting as secretary of the Hyde branch at that time ?—Buckley Worthington.

11,345. The witness who was called last ?—Yes.

11,346. Did you ever see him amongst the men who were watching you ?—No.

11,347. Did you ever have any communication with him ?—Not after I left the union.

11,348. But before you left the union ?—Upon no particular business.

11,349. You are quite sure that some of the men who were watching you were members of the Hyde branch ?—Yes.

11,350. (*Chairman.*) Did you show those oranges or apples after you cut them through to anybody ?—No, I told Mr. Liddell the next morning.

11,351. You told him, but you did not show them to him ?—No.

11,352. Nor did you show any of the others ?—No, I made away with them according to his orders.

The witness withdrew.

Mr. J. Little.

Mr. Joseph Little sworn and examined.

11,353. (*Mr. Chance.*) You are deputy chief-constable of Cheshire ?—I am.

11,354. Is Hyde your station ?—Yes.

11,355. Were you deputy chief-constable in 1860 and 1861 ?—Yes, I have held that position for 26 years.

11,356. We have had a statement made to us with regard to certain outrages committed upon Mr. Shepley ?—Yes.

11,357. Do you remember the last witness, Joseph Wyatt, saying anything about any of these outrages in the year 1861 ?—I remember it distinctly.

11,358. Tell us what you remember Wyatt telling you ?—Wyatt told me that he had been waylaid from time to time ; that he had found fruit, oranges, and apples on the road, as if they had been thrown there with the intention for him to pick them up. In consequence of what had previously taken place among the unionists, I told him to make away with them at once : "Do not use anything of the sort, bury them ; whatever they may be that you find suspiciously that way, bury them at once and do not use them."

11,359. You told him so ?—I told him distinctly so.

11,360. Did he tell you that he had found those things more than once ?—Yes, I was in daily communication with him, I had nearly a dozen men engaged nightly in watching these unionists.

11,361. He never showed you any oranges or apples ?—No.

11,362. Did he describe the appearance of them ?—Yes.

11,363. Did you hear him give his evidence ?—Yes.

11,364. Did he tell you that there was a green appearance in the fruit ?—Yes, he described the appearance to me the same as he described it in court to-day.

11,365. Have you any reason whatever to disbelieve his evidence ?—No, I believed him to be telling the truth at the time, and knowing that these gangs were going about, and that the police said they were going about and destroying bricks, I had great doubts about these men, and Wyatt being a man working was a confirmation of the suspicion about these things.

11,366. (*Chairman.*) You did not think it worth while to have the green stuff found in any of these things examined by a chemist ?—I did not think so ; it was rather negligent on my part.

11,367. It would have been better if you had done so ?—It would have been much better as this inquiry has taken place, but I did not do so.

11,368. You advised him to destroy anything he found in that way and not to touch them ?—Yes.

11,369. (*Mr. Barstow.*) Why did you tell him to make away with them ?—He said he found a little hole bored in and something green in the centre of the fruit, and I told him not to use them by any means, but to bury them.

11,370. What did you understand from him that this green substance was ?—My opinion was that the unionists were throwing these things for him to take and eat to destroy his life ; there were many things found ; we found a canister of powder.

11,371. (*Chairman.*) Where ?—On the night Mr. Shepley's horses were destroyed, that is the morning after ; there were four canisters of powder found in the brook near to their place, and three men were seen running away from Mr. Shepley's place to this brook, where the canisters of powder were found.

11,372. (*Mr. Barstow.*) Still that is a very different kind of thing from poisoned fruit ?—I merely mention this to show to you the practice amongst these unionists.

11,373. The practice we know very well, but this is quite a new sort of practice ; have you known any other instance of their throwing poison in anyone's way ?—I cannot say that ; there has been powder laid ; there have been bottles of powder with fuses.

11,374. These canisters of powder would not have blown up the brook ?—No.

11,375. They were intended for some other purpose and were hidden away in the brook. Had you known any instance of poisoned fruit or anything of that sort laid in the way of any man who was offensive to the union ?—I cannot say distinctly that I have done so.

11,376. Have you any recollection at all of anything of the kind ?—Not with the exception of this.

11,377. This man had to go over some considerable distance from his house to the works ?—He had.

11,378. Would it not have been very easy for these union men to have attacked him on the way ?—No, because I had men to watch them ; I was aware of the game they were playing at, and I appointed men privately to watch and protect him both in Dukenfield and Hyde.

11,379. You can scarcely have had men to accompany Wyatt backwards and forwards to his work ?—No, I had not.

11,380. You mean that you were more than ordinarily vigilant ?—I had men to protect the works and to protect Wyatt, knowing that he had refused to act in the union.

11,381. That I quite understand, but they did not follow him backwards and forwards ?—Do you mean to accompany him ?

11,382. Yes.—No, certainly not ; they watched him down a certain distance to see that he was away from these people that were supposed to be in Hyde—the unionists.

11,383. Did you ever hear of any personal injury being done to Wyatt ?—Do you mean threats ?

11,384. No, personal injury.—Not personal injury, but threats.

11,385. Was anything done to his house or property?—No, there was nothing done to his house; a placard was given to me which I have unfortunately lost.

11,386. You have not heard that he has been injured in fact?—No, but there have been threats used to him.

11,387. But no injury has been done to him, in fact?—No.

The witness withdrew.

Mr. Thomas Blocksage sworn and examined.

11,388. (*Chairman.*) Are you a brickmaker, living in Macclesfield?—Yes.

11,389. Is that in the district of the Ashton union?—Yes.

11,390. You were employing non-union men in the year 1862?—Yes.

11,391. Had you been employing union men before you employed the non-union men?—Yes, in 1860.

11,392. When did you cease to employ union men?—On the 7th of May 1860.

11,393. From the year 1860 upwards did you cease to employ them?—I ceased working for two years, and commenced again in 1862.

11,394. When you commenced brickmaking which did you employ, union or non-union men?—Non-union men.

11,395. In consequence of your employing non-union men was any representation made to you by the union?—Not in that year; they did not come to see me in that year, but they destroyed a number of bricks.

11,396. Did any members come to see you before the bricks you speak of were destroyed?—No.

11,397. In that year had you any bricks destroyed?—Yes, between 50,000 and 60,000.

11,398. How were they destroyed?—Trampled upon, and the walls pushed down upon the new-made bricks as well.

11,399. How many men do you suppose were employed in destroying the bricks?—I do not know the quantity; I have seen in the papers somewhere about how many there were.

11,400. You saw the bricks after they were destroyed?—Yes.

11,401. Could you tell from the impression?—No, I could not tell from that.

11,402. Could you tell whether there were more than two or three?—There must have been more than that to destroy the quantity they did.

11,403. Had you been fined by the union before this damage was done to your bricks?—Yes.

11,404. That was in 1860?—Yes.

11,405. That was before you gave over working?—Yes, that was the reason we ceased working for that season, and the season after.

11,406. Because you were fined?—Yes.

11,407. What were you fined for?—Some dispute between them and me about 12*s.* for the work not being properly done, and I would not pay it.

11,408. For work done by their men?—Yes, the work was done by piecework, and it was not done to my satisfaction.

11,409. Did you complain to them of the work not being properly done?—Yes.

11,410. What did they say?—My bookkeeper stopped 4*s.* per cent. while the work was done, and they turned out against it, and then they called a district meeting, that is, a number of men met together and fined me 5*l.*

11,411. What did they allege was the reason for fining you?—The reason was their having to strike against me.

11,412. But what was the fault that you had committed?—Their having lost their day's labour.

11,413. And they wanted you to pay it?—They wanted me to pay 5*l.*

11,414. Did you pay 5*l.*?—No.

11,415. Did you refuse to pay it?—Yes; I have done so since.

11,416. Soon after that you gave up brickmaking?—Yes, through being fined I threw up the contracts that I had in hand.

11,417. You were annoyed at the conduct of the union?—It was rather forcibly expressing it, to have to pay 5*l.* before I could have men to go on with.

11,418. Had you any other damage done to your property besides the destruction of these bricks?—We had an attempt to set the shed on fire for one things.

11,419. When was that?—About 1864.

11,420. Was it after the destruction of the bricks?—Yes.

11,421. Long after?—Yes.

11,422. Was it in the same year?—No, it was not in the same year.

11,423. What year was it?—About 1864. I am not certain.

11,424. Were you employing non-union men at that time?—Yes.

11,425. Had any representations been made to you by the union previous to the attempt to set the shed on fire?—Yes, deputations waited upon me almost every season except 1861 and 1862, and I said if my men wanted to go into the union they might do so, I should not object to it.

11,426. Did the non-union men object to go into the union?—They would not go in.

11,427. Was the fire put out before it took hold of the shed?—It was a very trivial attempt to set it on fire; there was nothing burnt but a few chips that were saturated with something, and a few candles put together, the damage was very trivial. Whether they were disturbed I do not know, and whether it was done by union men I cannot swear.

11,428. You only know the fact that they attempted to set the shed on fire?—Yes.

11,429. Did you make any complaint to the union about it?—No, they generally wait upon me.

11,430. At any time after that had you any damage done to your property?—The latter end of 1864 I had a horse that was struck in the stable, but whether it was done by union men or not I cannot swear.

11,431. Have you any reason to suppose that it was done by union men?—No, from the first outrage up to now they have been very lenient with me, no doubt. I mean I have had other property at stake by which they might have punished me severely.

11,432. You mean by that that they do not destroy all the property that they might do; that is leniency, is it?—Yes.

11,433. (*Mr. Chance.*) Had you any quarrel with any private person at this time?—No.

11,434. Do you know why any person, from a private quarrel, should set the shed on fire or stick your horse?—No.

11,435. Did the horse die?—No, the wound was about five inches deep, and an inch and a half broad.

11,436. Whereabouts?—In the breast; they just missed the heart; it might have been more severe.

11,437. Can you conceive any reason why that should have been done?—No.

11,438. Is it not your belief that it was done in consequence of your employing non-union men?—I cannot swear to that; it may possibly be so. I had a good number of men that were working, and some of them that were discharged might take it upon themselves to do it.

11,439. Had you behaved badly to the men to induce them to do it?—Sometimes they are discharged, and they do those things.

11,440. Had you discharged some of your men about that time?—I cannot remember.

11,441. Your attention would have been called to it if you had discharged a man, and he would have been likely to have done this upon being discharged;

NINTH DAY.

Mr. T. Blocksage.

4 Sept. 1867.

did you take any trouble afterwards to ascertain who had done it?—No, I warned the police about it.

11,442. Did you ask them to endeavour to find out who had done it?—They kept better watch upon the premises.

11443. They kept better watch upon the premises, did they?—Yes.

11,444. Did you ask them to try and find out who had done this?—They strove to do it.

11,445. Did you instruct them to do it?—Yes, I told them to look after it.

11,446. Did you express a wish that they should do it?—Yes.

11,447. After this was anything else done to any of your property of any kind?—No, I have not anything to complain of else.

(*Chairman.*) So far from complaining you seem to think that they are lenient.

11,448. (*Mr. Chance.*) Had you a man named James Barker in your employ at that time?—No, I am not aware of anyone of that name in my employ.

11,449. Had you a man of the name of Sidebotham in your employ at that time?—Yes.

11,450. When was he in your employ?—In 1862.

11,451. Was he a member of the union or not?—No, he was not a member.

11,452. Was he threatened at all by the union men?—He did not complain to me, but I have heard of it since.

11,453. Did he about 1862 ever complain to you of having been threatened by the union men?—I cannot remember whether he did or not.

11,454. Had you any man in your employment who was a non-union man who had been threatened by the union men in 1862?—Well, I cannot remember any one having told me they were threatened.

11,455. Do you remember your premises being watched by policemen in consequence of any anticipated attacks?—Yes.

11,456. When was that?—In some part of May 1862.

11,457. You were afraid of being attacked, and got some police to guard your premises?—Yes, and a watchman.

11,458. Do you not remember Sergeant Buckley being attacked by a number of men when he was watching your premises?—Yes.

11,459. Was that in 1862?—Yes, he saw a number of men behind a parting between my brickyard and the lane, crouched behind the hedge. He made an alarm and got a sufficient number to help him, and they ran away immediately.

11,460. For what purpose do you suppose those men were there on that occasion?—They must have come there to destroy the bricks.

11,461. Do you suppose that they were union men come to destroy the bricks?—I cannot form any other conclusion.

11,462. What is your belief upon the matter?—I believe that they were.

11,463. (*Mr. Barstow.*) You say that when this horse was stabbed you gave information to the police?—Yes.

11,464. Did they investigate the case for you?—Yes.

11,465. On whom did the suspicion fall; you must tell us?—The suspicions of the police?

11,466. Yes, as to the injury to the horse.—I do not know.

11,467. They never told you anything about it?—No.

11,468. Who did you think had done it at the time?—I could not tell of any one having done it.

11,469. Did not you form any opinion in your own mind as to who had done it?—I did not form any opinion about it.

11,470. You have had your bricks injured before?—Yes.

11,471. Who did you think had done it?—The brickmakers' union.

11,472. After the policemen found the men close to your premises?—Yes.

11,473. And they ran away?—Yes.

11,474. You told us that you thought that those were union men who were there to destroy your property?—Yes.

11,475. Who do you think destroyed your horse?—I must come to the same conclusion.

11,476. Did you at the time come to the same conclusion?—I thought so.

11,477. Why did you not tell us so at once if you thought so. You have been asked half a dozen times at least who you thought at the time had done it?—You want to make me say so. I have no grounds for saying so.

11,478. You were asked who you thought had done it at the time, and now you say, having been asked half a dozen times, that you thought it was the union men?—Yes.

11,479. (*Chairman.*) You had had no quarrel with any man?—No.

11,480. Are you under fear now of speaking out?—No.

11,481. You seem to hesitate about speaking out?—No, I am not in any fear.

The witness withdrew.

J. Barker.

JAMES BARKER sworn and examined.

11,482. (*Chairman.*) Were you ever in the employment of the last witness, Thomas Blocksage?—Yes.

11,483. When was that?—In 1862.

11,484. At that time was he employing non-union men?—He was employing non-union men.

11,485. Were you at that time a member of the union?—No.

11,486. Have you ever been?—I was in 1861 a very short time.

11,487. And you are not a member now?—No.

11,488. Blocksage was employing non-union men, and you had been a union man, but had ceased to be so when you were in his employment?—Yes, I was not a union man at that time.

11,489. When you were in his service were you threatened?—Many a time.

11,490. Can you tell me the names of anybody who threatened you?—I never took any notice of them; I only passed them away as well as I could.

11,491. Were they union men who threatened you?—Yes.

11,492. Just give us a sort of notion of the threats used?—They called me a "bloody knobstick" and said they would kill me if they had a chance, or such words as that.

11,493. Was that often done?—Yes, very often.

11,494. Were there several people together with these union men when it was said?—Three or four perhaps then. We met them in the street.

11,495. Was anything ever done to you?—No, only threats. I always minded to keep away from them as well as I could.

11,496. How long did this go on? How long were you working for Mr. Blocksage? — Five years I worked for him off and on.

11,497. Are you working for him now?—No, I am carting for Edward Wayland at Stalybridge.

11,498. What is he?—A carrier.

11,499. You have nothing to do with brickmaking now?—No.

11,500. Were you ever asked to cart machine-made bricks?—No.

11,501. If you had been asked, how would it have been?—I should have had to do it.

11,502. Would you have been in any danger in doing it?—No, there is none where I am now.

11,503. What made you give up Mr. Blocksage's service?—I gave up when he had finished.

11,504. When he had finished the particular job there?—Yes.

11,505. Did it take five years to finish it?—No, I was with him five years off and on.

11,506. After that did you go to this carter?—I went out working after at spade work.

11,507. You had nothing to do with bricks?—No; I was at that until I got the job of carting.

11,508. (*Mr. Chance.*) What made you leave the union?—I did not like their way.

11,509. (*Chairman.*) How long had you been a brickmaker?—I cannot tell you.

11,510. For a good many years?—Yes, I was a wheeler; I was not a brickmaker.

11,511. Were you a brickmaker for some years?—Yes.

11,512. Did you give it up in consequence of the disturbances of the union men?—No, I was not a bit frightened of them.

11,513. Do you know Timothy Burns?—Yes; I was going on the rail side from Guide Bridge in 1862.

11,514. Where were you working?—At Blocksage's.

11,515. Did Timothy Burns hail you?—Yes; he was going on to Guide Bridge and I was going on, and he said I was on the top and he would throw me in the water.

11,516. Did you leave off work in consequence of that threat?—No.

11,517. Did you have any threat of that kind from the others?—No, I took no notice of them.

11,518. (*Mr. Chance.*) You left the union because you did not like their ways?—I did not like paying my money except I knew where it was going to; I wanted to know where the money went to.

11,519. And did they refuse to tell you?—They never let me know but very little business while I was in.

11,520. Did you ask now and then what became of the money?—When they were reading the books they said so and so, and I asked what it was for, and they would not tell me.

11,521. What was the so and so; what was the word used?—There were 2*l.* or 3*l.* for so and so, and I asked what it was for.

11,522. Was it put under the head of "sundry expenses"?—Yes, but they would not tell me what it was for.

11,523. And that was the reason why you left?—Yes.

The witness withdrew.

JAMES SIDEBOTHAM sworn and examined.

11,524. (*Mr. Barstow.*) Did you work for Mr. Blocksage as a brickmaker?—As a temperer.

11,525. In what year was that?—1862.

11,526. How long did you continue in his service?—I have worked for him ever since.

11,527. Do you work for him now?—No, I work in a coal pit now.

11,528. When did you leave his service?—Five weeks since.

11,529. What made you leave it?—For bettering myself.

11,530. (*Chairman.*) Have you ever been threatened by union men?—No.

11,531. You have never been threatened at all?—No, not in Ashton?—I was attacked in Manchester making bricks for this place here.

11,532. Where was that?—At the top of Cheetwood.

11,533. When was it?—In 1865 I believe—two years since.

11,534. Who attacked you?—I do not know.

11,535. How many men attacked you?—There was me and another man, there were seven or more attacked me.

11,536. Where were you working at the time?—I was making bricks for this prison.

11,537. There was a great dispute at the time with the union and you about making bricks for this prison?—Yes.

11,538. What was the dispute, were they using machine bricks?—Yes, they were using machine bricks, and we were making the stuff for it.

11,539. And seven or eight men attacked you?—Yes.

11,540. Were they union men?—I suppose they were.

11,541. What did they do to you?—They knocked me down with a shovel shaft.

11,542. Where did they hit you?—Across the shoulder.

11,543. Did you know any of them?—No, I was stranger about there.

11,544. Do you know any of them now?—No.

11,545. They knocked you down with a shovel shaft?—Yes, it was 6 o'clock in the morning, they knocked me down and set off as hard as they could go.

11,546. What became of the man with you?—The man followed me down Cheetwood; they hit his head with a bottle and cut it and hurt it very badly.

11,547. Was that because you were working at the machinery works?—It was because we were making bricks at a machinery place.

11,548. You were working at a machinery place?—Yes.

11,549. That was in 1865?—Yes.

11,550. Had you to give over working after that?—We gave over.

11,551. You gave over for fear of these attacks?—Yes.

11,552. You mentioned that you were making bricks for Blocksage, did any men interfere with you when you were making bricks at the yard?—Yes.

11,553. When was that?—It was in 1860, they came and stopped me.

11,554. Was Blocksage employing non-union men?—He was employing union men then.

11,555. How came the men to attack you?—I had been working at a machine yard in Dukinfield, and I went to get a job off him.

11,556. Of whom?—Off Blocksage, and they heard that I was going to start there and they called a meeting on Monday.

11,557. Who did?—The union men.

11,558. Where did they hold it?—At Hyde. On Tuesday morning Joseph Frith and Hibbert came and told Blocksage that if we started the other men would have to stop, and Blocksage let us start.

11,559. You had been working at the machine-making place, and then you came to work at Blocksage's, and Hibbert came and told Blocksage himself that if you started at that place they would come and stop the men?—Yes.

11,560. Did you start at that place?—No, Blocksage would not start us.

11,561. Nothing happened to you beyond that?—No.

11,562. Then you were without work in consequence?—I went and got another job at Clifford's.

11,563. Had you known Frith and Hibbert before?—Yes.

11,564. You had known them before?—Yes, I had seen them frequently enough.

11,565. (*Mr. Barstow.*) Who is Hibbert?—He is a temperer; they are both temperers.

11,566. Do you know Hibbert's christian name?—Elias Hibbert.

11,567. Is he a union man?—I do not know whether he is now, he was then.

11,568. Of what union was he a member?—The Ashton union.

The witness withdrew.

NINTH DAY.

Peter Buckley sworn and examined.

P. Buckley.

14 Sept. 1867.

11,569. (*Mr. Chance.*) Are you an inspector of the Cheshire constabulary?—I am sergeant.

11,570. Do you remember sometime back going to watch the premises of Mr. Thomas Blocksage?—I was on duty in the neighbourhood of his brickyard.

11,571. You had been put there specially to watch his brickyard?—No, not to remain there.

11,572. Then your attention was directed to his brickyard?—Yes.

11,573. Was it in consequence of outrages having taken place in the neighbourhood?—Yes.

11,574. Do you remember one night while you were on duty having your attention attracted by a number of men in the brickyard?—Yes.

11,575. When was that?—It was on the 23rd of June 1862, the Monday night in the same week that Constable Jump was shot on the Saturday morning.

11,576. What did you see?—I was going by the brickyard to visit a man in the neighbourhood, and I saw Blocksage's watchman. I spoke to him and went forward, and on my return I saw the watchman again soon after. His little dog was coming out of the field where the kiln is situated; it was growling. On looking down the road leading to the cottage gardens I observed a man. I did not expect that they were coming to spoil the bricks, thinking they were coming to needle the clay. I went down and found that it was not a man. I then went across the field, and in doing so about 150 yards out of the field I observed something under the fence. I went towards it and got within a dozen yards of it, when I could see that it was a number of men, perhaps about 20. I turned my head another way as if I had not seen them, and went down the cottage gardens and went down the field and turned into the road. I went back again into the lane and went forward along the lane and spoke to the watchman. I told the watchman to keep quiet for a while and I would get some assistance. I went down the road, knowing where two constables would be found, and I met Mr. Blocksage and told him they were there, and went round to get the two constables, thinking that I would enclose the field. I went and got the two constables and when I came out there I met two men coming along the road. I asked them to turn back with us. One of them said, "You do not need to go any further; they have gone away." I asked him how he knew, and he said he had met them. I asked where, and he said at Jumpson Brook. I asked him how many there were, and he said four or five. The night after I saw some men coming from the direction of Dukinfield Hall at 12 o'clock at night, and the man said he met 16 or 17.

11,577. Were you at any time attacked by a number of men?—No; when I saw them I turned my head another way as if I had not seen them to go and get assistance.

11,578. You saw nothing more that night?—No.

11,579. Were you at any time attacked by a number of men?—No.

11,580. Have you heard nothing more about it?—I was attacked by a number of men, but that is 12 years ago, in Manchester.

11,581. I speak of this?—As soon as I saw them I thought I would get some men to enclose the field.

11,582. Do you know who these men were?—No.

11,583. Do you know any of them?—No. The night was dark; I could not swear to any of them. They went in the direction of the men who were apprehended in Jump's affair.

11,584. You said nothing to them?—No.

11,585. And they said nothing to you?—No. They sat under the hedge; they were sitting very heavily armed; they were sitting on their weapons, brick-shafts or spade-shafts, or something of that sort.

11,586. (*Mr. Barstow.*) Was any damage done to Mr. Blocksage's yard that night?—No, not that night; there had been 50,000 or 60,000 bricks spoiled a month before that.

11,587. But not that night?—No.

The witness withdrew.

Mr. W. Hibbert.

Mr. William Hibbert sworn and examined.

11,588. (*Chairman.*) What are you?—A cotton manufacturer.

11,589. How long have you been so?—About 10 years.

11,590. Where do you carry on your business?—At Godley, near Hyde.

11,591. Do you work with many men?—I made bricks in 1861 but not since; I employed perhaps a dozen men.

11,592. Were the men whom you employed union men or non-union men?—Non-union men.

11,593. Was there any quarrel between the union men and the men whom you employed?—There was a bad feeling shown.

11,594. In the year 1861?—Yes.

11,595. Was anything done to your clay at that time?—A very large quantity of needles and pins and nails were found in it.

11,596. Were they thrown into some tempered clay?—They were thrown in the tempered clay.

11,597. Was this in the year 1861?—In the month of June 1861.

11,598. And a large quantity of needles were thrown in?—Yes.

11,599. Do you know any cause for such an act except the quarrel between your men and the union men?—None at all.

11,600. That was done only on one occasion was it?—Only on one occasion.

11,601. How much clay was spoiled?—I do not think 10*s.* worth would be spoiled.

11,602. What quantity of clay was spoiled?—It would have spoiled 8,000 or 10,000 bricks, but the needles were taken off; they were fortunately discovered and taken off without much loss.

11,603. You luckily discovered them so as to take them out?—Yes.

11,604. You ceased to make bricks?—Yes, after that.

11,605. Was that the reason of your giving it up?—Partly so.

11,606. In consequence of these constant disturbances with the union?—Yes, the unpleasantness.

11,607. And you discontinued that trade?—Yes, I discontinued that trade.

11,608. You do not know at all about the reason why they actually did it?—No, not at all.

The witness withdrew.

J. Langford.

John Langford sworn and examined.

11,609. (*Mr. Barstow.*) In the year 1860 were you in the employment of Mr. William Hibbert?—Yes.

11,610. As a brickmaker?—Yes.

11,611. Were you a non-union man?—Yes.

11,612. You were not a member of any union?—No, never.

11,613. Were any of Mr. Hibbert's men union men?—Yes, some of them were.

11,614. Was any effort made to induce you to leave his service?—No.

11,615. Do you remember some bricks of his being spoiled?—Not of Mr. Hibbert's.

11,616. Do you remember some clay being needled?—Yes.

11,617. Was any information given to the police?—At that time?

11,618. Yes?—Not that I know of, except what Mr. Hibbert did.

11,619. That is all you know about it, that they were needled?—Yes.

11,620. You know that needles were put in the clay ?—Yes.

11,621. And you do not know who did it ?—No.

11,622. You have no idea ?—No, none.

11,623. Do you know a man named Parrott ?—Yes, he worked for him at the same time.

11,624. Had you any talk to Parrott about it ?—Yes.

11,625. What did Parrott tell you about it ?—Parrott told me that he knew that Buckley Worthington gave some money to a man named James Farrell for doing damage at Mr. Shepley's.

11,626. He did not say anything about Mr. Hibbert's property ?—No.

11,627. He did not tell you ?—No.

11,628. Did he say how much ?—Yes; he said, I think, 3*l.* or 3*l.* 10*s.*, I will not be sure which.

11,629. Did he say where ?—At the "Rock Tavern."

11,630. That is where the club is held ?—Where it was held at that time.

11,631. Is the "Rock Tavern" in Hyde ?—Yes.

11,632. Did he say anything more about it than that ?—No, only he said he saw Buckley Worthington give the money.

11,633. Did he say who was present ?—No.

11,634. Did he say how he came to be there ?—He is a club man.

11,635. Were any other club men there ?—No doubt there were, but he did not say who.

11,636. He did not tell you who ?—No.

11,637. Did anybody ever tell you anything about Mr. Hibbert's clay being needled ?—Mr. Hibbert.

11,638. But did anybody tell you about who had done it ?—No.

11,639. Or about who was committed for it ?—No, nothing of that sort.

11,640. You know nothing of that sort ?—No.

11,641. What time did Parrott tell you that he had seen Worthington ?—It was about the 11th of June, as near as I can judge.

11,642. In what year ?—In 1861.

11,643. (*Mr. Chance.*) Was that after Mr. Hibbert's clay had been needled ?—It was just about the time that it was needled.

11,644. Two or three days after ?—It might be a day or two after.

11,645. Was it after the clay had been needled ?—Yes, after.

11,646. Was it a day or two afterwards that Parrott told you this ?—Yes.

The witness withdrew.

James Parrott sworn and examined.

11,647. (*Mr. Chance.*) What are you ?—A brickmaker.

11,648. Whom were you working for in 1861 ?—Mr. Hibbert.

11,649. Were you a member of the union then or not ?—Part of the time I was.

11,650. What part of the time ?—The beginning.

11,651. The beginning of the year ?—Yes.

11,652. Were you a member of the union in any part of June 1861 ?—I cannot swear whether I was exactly or not.

11,653. Do you remember Mr. Hibbert's clay being needled ?—Yes.

11,654. Were you a member of the union at the time ?—No, I was working for him at the time.

11,655. You were not a member of the union at the time ?—No.

11,656. There were non-union men working with you, were there not ?—Not at that time.

11,657. There were other men working with you ?—Yes, there were other men working with me.

11,658. What men were working with you; were they union men ?—No, they were non-union men when I was there after the pins and needles were put in.

11,659. Do you know a man named Buckley Worthington ?—Yes.

11,660. He was a member of the Hyde branch of the Ashton club, was he not ?—Yes.

11,661. Did he go round collecting money for the Hyde branch ?—I never knew him to go round.

11,662. Do you also know James Farrell ?—Yes.

11,663. Do you remember seeing Worthington pay some money to James Farrell ?—I never did.

11,664. Be careful what you say ?—I never saw him pay any money.

11,665. Have you never told John Langford that you had seen Buckley Worthington pay money to James Farrell for some damage being done ?—I did not belong to the union at the time the damage was done.

11,666. Did you never say that you saw Worthington pay money to James Farrell ?—I never did.

11,667. Did you never see Worthington pay money to James Farrell ?—No.

11,668. Do you know the "Rock Tavern" in Hyde ?—Yes.

11,669. Is that where the club used to be ?—Yes.

11,670. Do you often go to the "Rock Tavern ?"—I have not been there for seven or eight years.

11,671. Were you at the "Rock Tavern" in June 1861 ?—I went in many a time then; I worked just at the side of it.

11,672. Did not you tell Langford that you had seen Worthington pay money to James Farrell ?—I never did.

11,673. Did you say that you had seen any one pay money ?—No, I never saw any money paid to any one.

11,674. You never said anything of that kind to John Langford ?—No.

11,675. You know John Langford ?—I was working with John Langford.

11,676. He says that you did say so ?—I never did.

11,677. John Langford says that you did tell him that you saw Worthington pay money to James Farrell ?—I never told such a thing.

11,678. Are you a friend of Worthington's ?—No.

11,679. Were you in 1861 ?—No.

11,680. What is Farrell ?—He used to wheel for me the summer before.

11,681. What was he at that time in June 1861 ?—He was wheeling bricks.

11,682. Whom for ?—I do not know.

11,683. Was he a member of the union at that time ?—Yes.

11,684. Did you ever see Worthington and Farrell talk together ?—I have seen them talk together many a time.

11,685. Did not you see Worthington pay him some money ?—I never did.

11,686. That you swear ?—Yes.

11,687. Have you been talking about this matter to anybody ?—I could not talk about it when I know nothing about any money being paid.

11,688. Have you talked to anybody about coming here ?—No.

11,689. Have you talked about what you were to say here ?—No.

11,690. You swear that you have not ?—No.

11,691. Do you know whether Farrell did any damage to Mr. Hibbert's property ?—I do not.

11,692. Did not you hear that he had done it ?—I never did.

11,693. Did not you hear that Farrell had done the damage ?—No.

11,694. Did not you hear that he was one of the men that put the needles into Hibbert's clay ?—I never did.

11,695. Upon your oath ?—I never have heard.

11,696. (*Chairman.*) You were not a member of the union when you worked with Mr. Hibbert ?—Yes, one part of the time.

11,697. What union was it ?—Hyde.

11,698. Was this in the Hyde district in the Ashton union ?—Yes.

11,699. Did you know Worthington at all ?—Yes.

NINTH DAY.

J. Parrott.

14 Sept. 1867.

11,700. What was he?—He was a brick burner.

11,701. Was he anything in the union?—He was secretary when I was in last.

11,702. He was secretary at the time you left the union?—Yes.

11,703. He was a pretty active man, was not he?—I do not know that he was; he drew money and sent it to Ashton every month.

11,704. He would pay anything that was to be paid in the Hyde district?—I do not think he would have paid it.

11,705. He paid everything that was required?—Yes, I never saw him pay any money while I was in.

11,706. You never saw him pay any money at all?—No, he always received it, but I never saw him pay any.

11,707. You used to attend the meetings at that time?—It was very seldom any meetings occurred.

11,708. What meetings there were you used to attend?—Yes.

11,709. Was no money ever paid at the meetings?—No, I never saw any.

11,710. When was money paid if not at the meetings?—Very rarely; they would call a district meeting if there was any money to pay.

11,711. When money was paid, was not it paid at the meetings?—I never saw any paid at any meetings.

11,712. When was the money paid which you say Worthington had to pay?—If there was any money to be paid it would be at the district meetings.

11,713. Hyde is only a district?—It is only a district.

11,714. Then all meetings there were district meetings?—The money would have to be paid at Ashton.

11,715. Do you mean to say that Worthington never paid money at Hyde?—I never saw him pay any.

11,716. He was the acting secretary to the district; it was his duty to pay the money that was paid in the district?—I never received any money from him there, and I never saw him pay anybody else any while I was there.

11,717. Were you a member of the union when Shepley's property was damaged?—No.

11,718. Had you left it at the time?—Yes.

11,719. Before any damage was done to his property?—I was at William Hibbert's at the time.

11,720. What time did you leave the union?—It might be towards June.

11,721. Then you were in the union at the time the damage was done to Shepley?—There was no damage done that I am aware of, there might be.

11,722. You were a member of the union in February 1861?—Yes.

11,723. Then you were a member of the union in February 1861, and you were there when the damage was done to Shepley?—Yes.

11,724. Do you mean to tell us that you do not know anything about it?—No; I recollect that pins and needles were put in the clay, but I do not know who did it; there were pins and needles also put in Hibbert's clay at the time I was working for him.

11,725. Do you remember his hut being broken into, and the tools destroyed?—No, I do not.

11,726. That was whilst you were a member of the union?—Well, I do not know that.

11,727. Hyde is only a small place?—I never heard it mentioned before.

The witness withdrew.

T. Rawlinson.

THOMAS RAWLINSON sworn and examined.

11,728. (*Chairman.*) What are you?—A brickmaker.

11,729. How long have you been so?—For many years.

11,730. Are you a member of the Ashton union?—No.

11,731. Where do you live?—At Bradbury.

11,732. Are you a member of any union?—No; I am a contribution member.

11,733. To the Stockport union?—Yes.

11,734. Do you remember Mr. Blocksage's clay being needled?—No.

11,735. Do you remember either Mr. Hibbert's or Mr. Shepley's clay being needled?—I remember there was some talk of Shepley's clay being needled.

11,736. Do you remember his shed being injured?—He had none.

11,737. Do you remember men breaking into his hut in 1861, and injuring the tools?—Yes, I recollect hearing something about it.

11,738. Do you remember the "Rock Tavern," in Hyde?—Yes.

11,739. Do you know a man named James Parrott?—Yes.

11,740. Do you know a man named Buckley Worthington?—Yes.

11,741. Do you know another man named James Farrell?—Yes.

11,742. Were you at the "Rock Tavern" when those people were present?—Missing two of them.

11,743. Which of the two do you remember?—Nobody was there that night except Worthington. I do not remember Parrott and Farrell being there.

11,744. Worthington and you were there?—Yes.

11,745. Anybody else?—Yes, Joseph Sinclair, Mathew Ainsworth, and others.

11,746. Do you remember on this night whether anything was said or done about any damage that had taken place?—No.

11,747. Nothing was said at all?—No.

11,748. Were you there upon any other occasion when something was said about damage being done?—No.

11,749. Did you ever see any money paid?—No.

11,750. Not at the "Rock Tavern" at all?—No.

11,751. Did you ever see Buckley Worthington pay money to anybody?—No.

11,752. Did you see James Farrell receive any?—No, never in my life.

11,753. Nor anybody else?—No.

11,754. You know a person of the name of Parrott?—Yes.

11,755. Did you ever threaten him?—No.

11,756. You are perfectly harmless, and you were never present when it was done?—No, never,

11,757. Never at all?—No.

11,758. Did you know a man named Ward, who was afterwards executed?—Yes, I knew him before he was executed.

11,759. Did you know a man named Burke?—Yes.

11,760. Were they at the public-house, the "Rock Tavern" at the time you mention?—Yes, on the Sunday night.

11,761. You did not mention their names?—I did not mention them. I was not asked to name them.

11,762. I asked you who was there?—They were there; they came there about 10 o'clock.

11,763. Were they there when you were there?—Yes, of course.

11,764. When Ward, and Burke, and you were there, who else was there?—Buckley Worthington was there, me, and Joseph Sinclair, and a man they called Jack; I do not know his other name, he worked for Dr. Hayne.

11,765. Do you remember some money being produced on that occasion?—No.

11,766. And did you hear of money being got from Ashton by Buckley Worthington?—He always took money there, he did not bring it back.

11,767. Did Buckley Worthington bring any money there?—No.

11,768. Did he produce any money there?—No, not in my presence.

11,769. How came you to meet there that night?—I cannot tell you.

11,770. Were you constantly in the habit of meeting?—We were all constantly in the room; there

was no meetings, there were three or four of us having a pot of beer when these people came in.

11,771. Did you often have a pot of beer with Burke and Ward?—Never in Hyde; I have in Ashton. They worked with me in Ashton.

11,772. And you have often had a pot of beer with them?—Yes, of course, but not in Hyde; they were Ashton chaps.

11,773. You have often had a pot of beer in Ashton?—Yes, after I began working with them, not before.

11,774. Have you talked about union matters with them?—No.

11,775. Who paid for the beer that night?—Ward.

11,776. Did he pay for you all?—He paid for three or four half-gallons.

11,777. Whatever money was paid for the beer he paid it?—When they came in.

11,778. And nobody else paid money for the beer but Ward?—No, not after they came. Burke said to Ward, "We have half a gallon of beer on the table; pay for half a gallon of beer; thou hast got some money;" and he paid for three or four, and it was shutting up time, and we came out.

11,779. Whatever money was paid was paid by Ward?—Yes.

11,780. And did Buckley Worthington pay any money?—No.

11,781. You have never done so?—No.

11,782. You have never seen Buckley Worthington paying any money?—Never in my life; I have paid money to him.

11,783. That is your contribution money?—Yes.

11,784. And you have never seen him pay any money?—No.

11,785. Did you ever threaten Wyatt?—Not me.

11,786. Or people in your presence?—No, never in my life; I was not much in their company.

11,787. Did you ever threaten Wyatt; never mind about being much in their company. Did you ever threaten him?—No, never in my life.

11,788. You knew that he was a non-union man?—So was I at one time.

11,789. You knew that Wyatt was working, and that he was a non-union man?—Yes, of course.

11,790. When he was working with non-union men, were you then a member of the union?—I had just joined them.

11,791. You know that is a ground of complaint among you about non-union men being employed?—Yes.

11,792. Have you never heard of anything being threatened to be done to Wyatt because he was a non-union man?—Never.

11,793. You have always been gentle with non-union men?—I have always been on pretty good terms with all parties, and the union men have not used me very well.

11,794. What have they done to you?—When first I came into the trade I was a non-union man, and Mr. Shepley employed me, as I had been an old hand of his before, and they drew all the men away and left me. I had to do all the work, and had all the money, and I did so. I could do without them.

11,795. They went on strike because you were there?—Yes.

11,796. How long were they on strike?—Perhaps a week. I managed without them. I finished what I had to do.

11,797. Then did you give up?—No, I finished my work.

11,798. After you finished your work did you give up?—I went selling fish, or anything I could, independent of their trade.

11,799. Was that the reason why you wanted to be independent of their trade?—Because they would not let men work with me. When they took me in as a regular worker I was fish selling.

11,800. After that you became a member?—Yes, after this time.

11,801. So as to get some work?—So as to get my living.

11,802. You had to give it up because you could not get your living in that way, and then you were obliged to join them?—Yes.

11,803. Have you continued ever since?—I have been away four years at Nantwich or Middlewich.

11,804. Working at the brickmaking trade?—No, salt boiling, or anything I could get.

11,805. Did you give up the brick trade in consequence of all this?—No, I went away in a bit of a pet from my relations when the brickmaking was finished to do something else; an honest man would not be idle if he can a living anywhere else.

11,806. And will they let you work now?—They let me work now, but I am only half a member now.

11,807. But you still are that?—Yes, I pay my money.

11,808. And you are able to work?—Yes.

11,809. And without that you would not be able?—No.

11,810. (*Mr. Barstow.*) There is no salt-boilers' union, is there?—Yes, there is one; you will have to have a look through them.

11,811. How did you come to work at salt boiling?—It is boiling out the brine.

11,812. How did they come to let you work at that?—I went through my process, I wanted to be an odd hand, and the master said he would chance going on with me if I paid my union money.

11,813. You were a member of the salt boilers' union?—Yes.

11,814. You were a contribution man?—Yes, the master took it on his own risk, I was not a professional, but I did my best.

11,815. If you had not been a contribution man you would not have been able to get your living there?—No.

11,816. (*Chairman.*) Have they rules in their union such as the brickmakers have in theirs?—Yes.

11,817. And they will not work with men who do not subscribe to their union?—No.

11,818. Are there any turns out in that trade?—Many a one.

11,819. And a little spoiling of property?—They cannot spoil much there.

11,820. There is not much to spoil?—No, it is rather too hard for them.

11,821. The only remedy they have if a man breaks the rules is to strike?—Yes, to give over, they might have stuck me at the same time if they could get the chance.

11,822. Have you ever known anything of that sort being done?—No.

11,823. You have not heard of a man being thrashed for going against the rules?—No, I have never heard tell of them.

11,824. (*Mr. Chance.*) You were not maltreated after you joined the union?—No.

11,825. It was all right then?—It was all right enough.

The witness withdrew.

Mr. JOHN HARTLEY sworn and examined.

Mr. J. Hartley.

11,826. (*Mr. Barstow.*) You are a master brickmaker?—Yes.

11,827. Where do you carry on your business?—At Dukinfield.

11,828. Have you any non-union men in your service?—Mine was always a non-union yard.

11,829. I suppose you have disputes with the Ashton union?—Not myself.

11,830. How do you mean not yourself?—They never come near me, and they have never said a word.

11,831. They come near your property if they do not come near you?—Yes.

NINTH DAY.

Mr. J. Hartley.

14 Sept. 1867.

11,832. In short you had 40,000 bricks spoiled?—From 1858 to 1863.

11,833. At different times?—Yes.

11,834. How many times did they come?—About five or six times.

11,835. Can you tell us when they came first?—I cannot recollect one single date.

11,836. I do not want you to go through all the dates, but tell us the first and the last in what years did they take place?—They commenced in 1858.

11,837. What time of 1858?—Somewhere in the brickmaking season, from May to August, and September.

11,838. Do you not remember the first date?—I do not remember any date.

11,839. One would think that you would remember a thing of that kind; it is a very annoying thing to have property destroyed?—In three cases there were not more than a man would destroy, and I did not think it worth while to trouble about it, three walls were pulled down and they were put in a kiln afterwards, they were not much damaged.

11,840. How much damage was done altogether?—10*l.* or 12*l.* worth.

11,841. Spreading over how many years?—Five or six years.

11,842. How many people do you imagine had been there?—At one time I thought about five or six.

11,843. And sometimes not so many?—I could trace two of them. There were three men and a boy went from the top end of the flats up and down till they spoiled about 6,000.

11,844. Have you lost a quantity of tools besides?—No, I never lost any tools.

11,845. Had you any tools destroyed?—No.

11,846. Had you any quarrel with anyone?—No.

11,847. Were any of your own men dissatisfied with you?—No.

11,848. To what do you attribute the spoiling of your bricks?—Only from being a non-union yard.

The witness withdrew.

J. Harris.

JOHN HARRIS sworn and examined.

11,849. (*Mr. Chance.*) Are you a brickmaker?—Yes.

11,850. Were you in the employment of John Hartley, brickmaker?—Yes.

11,851. Were you there in the year 1858?—I was there up to 1861.

11,852. From what time?—I was there about three years.

11,853. Were you at that time a member of the union?—No, I was not then.

11,854. You were not a member at the time you worked for him?—No.

11,855. I believe he was employing other non-union men at the time?—I believe he was.

11,856. Do you remember seeing any of his bricks destroyed?—Yes.

11,857. When was that?—In 1862 I think that was.

11,858. At what time did you see the bricks destroyed?—At about half-past 12 at night.

11,859. Were you on duty at that time as watchman?—No, I was not.

11,860. What were you doing in the brickyard at the time?—I was at the beerhouse at the time, and two of them came in while I was there.

11,861. Two strange men?—Yes.

11,862. Did they say what they had been doing?—No, they had not been then; they had come from towards Denton.

11,863. What took place?—They came in there and got some beer, and they had some words with me there about the union because I was not in it.

11,864. They had some words with you because you were not in the union?—Yes, that was all.

11,865. What words did they make use of?—Nothing so bad.

11,866. What did they say to you?—I cannot say; it is so long since.

11,867. Were they union men?—Yes.

11,868. Did you know them?—Yes.

11,869. Who were they, do you know their names?—Richard Brown and John Middleton.

11,870. They were members of the union?—Yes.

11,871. Did they endeavour to get you to join the union?—I had been in a fortnight since myself.

11,872. You had been in?—Yes.

11,873. Did they use any threats against you?—No, nothing particular; they did not.

11,874. What did they say?—I cannot tell you, I forget.

11,875. Did they say they would do anything to you if you did not join the union?—I cannot say now; it is a good bit since. I forget all about it.

11,876. Do you know anything more about these two men?—No, we found they had spoiled the bricks.

11,877. How did you happen to find out that they had spoiled the bricks?—I saw them going into the brickyard afterwards.

11,878. That night?—Yes.

11,879. You had some words with them; did you see them leave the public house?—They went to the corner of the beerhouse and I saw them whispering there, and I thought they were going to the brickyard and I followed them into the yard.

11,880. Where did they go to?—Into the brickyard.

11,881. Was that Mr. Hartley's brickyard?—Yes.

11,882. You followed them?—Yes.

11,883. What did they do?—I saw them go and push the walls down and tread on the bricks and I went after them.

11,884. Did you see them trample on the bricks?—Yes.

11,885. Did you not try to stop them?—I could not, they ran as soon as I went to them.

11,886. How long after they left the beerhouse did you follow them?—10 minutes or a quarter of an hour.

11,887. Then you must have been almost close behind them?—I was not far off them.

11,888. Were you not in time to stop them?—They ran away when I got into the yard.

11,889. How many bricks had they trampled on?—I cannot say how many. I believe there were about 2,500 spoiled.

11,890. How long would it take them to destroy those?—Not so many minutes.

11,891. Had they destroyed those before you came up?—Yes, they were destroying them when I got there.

11,892. And pushing the wall down too?—Yes.

11,893. Did they make off as soon as they saw you? Yes, they ran away and I called to them, and a policeman heard me call, and he came up to me afterwards and he went after them.

11,894. Did he apprehend them?—He cotched one at home and another in a farmyard called Ogden's.

11,895. What did he do with them?—They got six months for it.

11,896. Do you know of any bricks being injured or anything else destroyed any time after that?—No.

11,897. Were any threats made use of at any time to you by any of the members about your joining the union?—No, only by these two.

11,898. Has not any man ever told you that you would be shot if you did not join the union?—No, I cannot say to that.

11,899. I am informed that you told Inspector Maybury that a man had told you that you should be shot unless you gave up working for Hartley?—Oh, he is under a mistake.

11,900. You cannot have told him that?—I cannot say that I have. I think I have not.

11,901. You must know whether you have said so or not?—I have not, I am certain.

11,902. What made you say that you think you have not?—Well, he came to our house one Sunday to inquire about this here. I was drunk when he came and if he did take it that way he took it wrong.

11,903. If you did say it you said it when you were drunk?—I cannot say that; I may have done.

11,904. You might have said so to him when you were drunk?—I might have done; I cannot say that I have.

11,905. Had any man ever said to you that you should be shot if you worked for Hartley; did the men you are speaking of say that if you did not leave Hartley's service you should be shot?—No, not to me; we had some very warm words together, but what they were I cannot say.

The witness withdrew.

Mr. Thomas Hague sworn and examined.

Mr. T. Hague.

11,906. (*Chairman.*) You were a master brickmaker at Hyde?—I was.

11,907. How long ago?—In 1861.

11,908. At that time whom used you to employ, union or non-union men?—Union men.

11,909. Did you, in consequence of repeated turnouts, come to a resolution not to employ any union men any more?—Yes.

11,910. Was that in 1861?—Yes.

11,911. And did you consequently employ non-union men?—Yes.

11,912. After you had employed the non-union men were you threatened?—Yes, I had about 7,000 bricks spoiled.

11,913. Did you form any opinion of how many men were employed in spoiling the bricks?—About three.

11,914. In addition to that were you threatened at all?—Yes.

11,915. How were you threatened?—I kept putting men on and they kept going away. I asked what they left for, and they said they dare not work; then I had another lot.

11,916. Did the union men threaten you?—Yes, and a man met me one day——

11,917. Who met you?—A man with a fustian jacket.

11,918. A brickmaker?—Yes.

11,919. You did not know him?—I knew a great many by sight, because I kept vaults, and they used to come. This man met me and he said I was much respected, but they had come to the determination to shoot me.

11,920. They had come to the determination to shoot you?—Yes.

11,921. You do not know either of the men who said it?—He was a man with a fustian jacket on.

11,922. You do not know his name?—After that I went to the office, and while I was telling Mr. Liddell he was off.

11,923. Was he alone?—Yes, he said he was come from the union.

11,924. As a delegate to give you that information and show you that respect?—Yes.

11,925. After that was there any other threat used to you?—No, I started with union men the next morning.

11,926. You turned off the union men who had stuck to you?—Yes.

11,927. How many non-union men did you turn off?—Six.

11,928. And you took on union men?—Yes, in consequence of the fear of my life. I thought I would get the bit of clay made up and then give over.

11,929. How long did it take you to get your clay made up?—Something like 12 weeks.

11,930. You got it made up by the union men?—Yes.

11,931. Then you gave over?—Yes, I told them they must make bricks themselves for the future.

11,932. And you gave up making bricks for the future in consequence of this fear for your life?—Yes.

11,933. How long had you been a brickmaker before this took place?—16 years.

11,934. In consequence of your life being in danger you gave it up?—Yes.

11,935. Did you ever pay money to any union?—No.

The witness withdrew.

Mr. John Warden sworn and examined.

Mr. J. Warden.

11,936. (*Mr. Barstow.*) Are you a master brickmaker?—Not at present.

11,937. You were at Newton Woods?—Yes.

11,938. Were you making bricks for a mill there in 1866?—It was a tile yard at that time; there was the yard that had been used for mill purposes.

11,939. Did you or not make bricks for a co-operative mill?—No.

11,940. You took the yard after the mill was built?—Yes.

11,941. Is yours what we have heard called a non-union yard?—Yes.

11,942. Were you solicited to join the brickmakers' union?—Yes.

11,943. And you refused to do so?—Yes.

11,944. When was that?—In the spring of last year.

11,945. In the summer of that year did anything happen to your property?—Yes.

11,946. Do you remember the date?—The 15th of July.

11,947. And what was done to it?—The shed was burnt down, and materials of various descriptions.

11,948. Your tools, barrows, trestles, boards, and all those sort of things?—Yes.

11,949. What amount of damage was done?—A little over 100*l.*

11,950. We have already heard who did that?—Yes.

11,951. Is that the only damage that has been done to your property?—Yes.

11,952. You have never had any bricks destroyed?—No.

11,953. When this damage was done to your property did you give any information to the police?—The police knew of it; they found it out first.

11,954. They made inquiries?—Yes.

11,955. Was anyone apprehended?—No, I believe not.

11,956. Did you ever know who did it?—No.

11,957. To what did you attribute it at the time?—To the union men.

11,958. Since our inquiry have you heard who did this damage to you?—No.

11,959. When was the mill built?—It was commenced in 1861; there was an outrage committed at that time in the place.

11,960. Nothing has been discovered about this?—No.

11,961. Is this at Jumpson Brook?—No.

11,962. In what district; in what union is it?—I believe it is in the Ashton union.

11,963. There was no other reason for doing it than that yours was a non-union yard?—No, I believe not.

The witness withdrew.

NINTH DAY.

P. Kelly.

14 Sept. 1867.

PETER KELLY sworn and examined.

11,964. (*Mr. Chance.*) What are you?—A labourer.

11,965. For whom are you working?—I am working for Mr. Warden at present.

11,966. For whom were you working in July 1866?—Mr. Warden.

11,967. What were you doing for him?—I was wheeling clay.

11,968. Were you a member of any union then?—No.

11,969. Are you now?—No.

11,970. Do you remember Mr. Warden's shed being burned down?—Yes.

11,971. That was in July of that year?—Yes, the 15th of July, I think.

11,972. Do you remember some men calling upon Mr. Warden?—Yes.

11,973. Who were they that called upon him?—They were strangers to me; I did not know either of them.

11,974. I think you know their names?—No, not the first man who came I did not know.

11,975. Two men came first, and then some came after?—Yes. Two men came and asked me which was master, and I showed them which was master, and they said they came to ask him if he would join the union, and he said he had no objection if all the other masters would combine, and asked them to call again, but I heard nothing more of them.

11,976. You heard that?—Yes.

11,977. And they went away?—Yes.

11,978. How long was it before the other men came again?—Some time after; the shed was being rebuilt before the other two men came.

11,979. How long after the first men came was the shed burnt down?—I cannot speak to it exactly.

11,980. About how long?—A month or six weeks perhaps.

11,981. That was after the shed was burnt?—Yes, it was being re-built when the other men came.

11,982. Did they come and ask for Mr. Warden?—Yes.

11,983. Who were they?—I only knew one of them

11,984. What was his name?—Thomas Barrett.

11,985. Do not you know the name of the other man?—No.

11,986. Were there two of them?—Yes, there were two of them.

11,987. Thomas Barrett was one?—Yes.

11,988. What did they say when they came?—They came to me where I was working, saying that the union was thrown open for six months, and if I had a mind I could join it. They said I could get the six months to pay the sovereign in. I said I had not a sovereign to spare, and I could not do it, and I would not join the union.

11,989. And you refused to join?—Yes.

11,990. Did they say anything more?—No.

11,991. Did they not say if you did not join it you would have to join it?—No.

11,992. Was Barrett a member of the union?—Yes.

11,993. Of what union was he a member?—Of the Ashton union.

The witness withdrew.

J. M. Walker.

JOHN MIDDLETON WALKER sworn and examined.

11,994. (*Chairman.*) Are you a brickmaker?—Yes.

11,995. How long have you been so?—Above 30 years.

11,996. Do you remember an outrage at Newton Woods?—No.

11,997. You know the works called "Newton Wood"?—Yes.

11,998. Do you remember the bricks being injured or the shed burnt down there?—No.

11,999. Do you remember the shed being burnt down?—No.

12,000. In 1866 were you a member of the Ashton union?—No.

12,001. Were you a member of the Ashton union at any time?—Yes.

12,002. When?—In 1861 and 1862.

12,003. Do you remember some bricks being destroyed in Newton Wood in 1861?—No.

12,004. Were you ever taken into custody?—No.

12,005. Is your name John Middleton Walker?—Yes.

12,006. They have made a mistake about you then. Have you never been convicted?—Yes.

12,007. What for?—They said I spoiled some bricks at John Hartley's; that is not in Newton Woods.

12,008. In what year was it that they said that you had done such a thing as this?—They said that it was in 1862.

12,009. That was at Dukinfield, was not it?—Yes.

12,010. They said you had a hand in it?—Yes.

12,011. Where were you tried?—At Dukinfield.

12,012. At the sessions?—No, at Dukinfield Hall.

12,013. Were you sent to Knutsford?—Yes.

12,014. How long is it since you came out of Knutsford?—Six weeks.

12,015. And that was for injuring Hartley's?—Yes.

12,016. Of course you were not there?—I was not, not that I know of. I was drunk.

12,017. Whether you were there or not you do not know?—I was drunk. I do not know whether I was there or not, but they made me know; they sent me to Knutsford.

12,018. You have no recollection about it?—No.

12,019. You were a member of the union at the time?—Yes.

12,020. Did they say anybody was with you?—They said Brown was with me.

12,021. Had you seen Brown that night?—We had come from work together.

12,022. Had you been out drinking together?—Yes.

12,023. Was anybody else with you?—No.

12,024. Nobody at all?—No.

12,025. There were only you two together?—Yes.

12,026. You do not remember going anywhere with them?—No.

12,027. Where did you get drink?—Dukinfield Inn.

12,028. It was not far from where the bricks were destroyed?—No, the brickyard is at the back door.

12,029. The back door of the house where you got drunk?—Yes.

12,030. And Brown was there too?—Yes.

12,031. Whether you went together out of the back door, you do not know?—No.

12,032. Did Brown get punished too?—Yes.

12,033. Six weeks?—Yes.

12,034. And he did not know whether he was there?—No.

The witness withdrew.

Adjourned to Monday next at 11 o'clock.

TENTH DAY.

Assize Courts, Manchester, Monday, 16th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C. | GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq. | JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, ESQ., Q.C., IN THE CHAIR.

TENTH DAY.

Mr. S. Adshead.

16 Sept. 1867.

Mr. SAMUEL ADSHEAD sworn and examined.

12,035. (*Chairman.*) I believe you are a master brickmaker?—Yes.

12,036. Do you live at Ardwick?—Yes.

12,037. Were you some years ago erecting a weaving shed?—It is 12 years ago.

12,038. Does any part of your evidence relate to anything within the last 10 years?—It does not.

12,039. All that you were going to speak about happened more than 10 years ago, did it?—Yes.

12,040. Then I do not think we ought to go into it. You say that you have nothing to speak of which has occurred within the last 10 years?—Nothing at all.

The witness withdrew.

Mr. W. A. Atkins.

Mr. WILLIAM ALFRED ATKINS sworn and examined.

12,041. (*Chairman.*) Are you a machine brickmaker?—I was.

12,042. Were you a machine brickmaker in 1862?—Yes.

12,043. Where do you carry on your works?—In Cheetwood Lane.

12,044. How far is that from here?—It is just behind; about a quarter of a mile across.

12,045. In Manchester?—Yes.

12,046. Do you remember, in February 1862, some bricks being removed?—The place was blown up about that time.

12,047. Will you tell me what happened then?—It was on Saturday night. When I woke in the morning there was some one knocking at the door to say that the place had been blown up.

12,048. Did you go to the place?—Yes.

12,049. In what state did you find it?—The roof of the engine-house was blown of.

12,050. Was it all right the night before?—Oh yes.

12,051. You supposed that it was done by gunpowder?—Yes, we found a can in the engine-house.

12,052. Had that can contained gunpowder, was the gunpowder all used?—It was all used.

12,053. Would it have required a large quantity, do you think, to blow off the roof?—I should think not, the place was slightly built, for they were afraid of something of that kind, so that it might not do any damage.

12,054. What made you afraid of something of that kind?—We had been threatened repeatedly.

12,055. You were a machine brickmaker?—Yes.

12,056. Had you been threatened by the union men?—Yes.

12,057. By the men of which union?—By the Manchester union men.

12,058. You made bricks by machinery, and you had often been threatened by the Manchester union men, and then this happened?—Yes.

12,059. You had no reason to suppose that anything was done by anybody but Manchester union men?—No, we had reason to believe that it was done at the instigation of the masters as well as of the men.

12,060. Why do you think so?—Mrs. Woolgar, a person in the neighbourhood, said she had heard a master brickmaker say that he wished the place was in hell.

12,061. Was he a brickmaker who made bricks by hand?—Yes.

12,062. You making bricks by machinery?—Yes.

12,063. Then what makes you say that it was done by the union men?—There is no doubt that it was done by the brickmakers. They were constantly threatening us.

12,064. You say you have often been threatened by them; at any other time was damage done to you?—Well, we constantly had bricks spoiled or something put in the machine to make it break; sometimes in the wheels.

12,065. Will you explain what you mean?—A piece of iron would be put into the wheels sometimes. Sometimes we would find it in the pug mill, and then it would get between the teeth, and then of course there would be a break down.

12,066. Had you ever a break down from it?—Yes, many a time.

12,067. And have you many a time had your bricks spoiled?—Yes. We employed men to burn, and after they had burned for a week or two very nice bricks, then we should have a kiln spoiled.

12,068. And the machinery injured in the way you have described?—Yes.

12,069. How long did this go on?—For two or three years.

12,070. Are you now a brickmaker?—Oh dear no!

12,071. When did you give it up?—Three years ago.

12,072. Did you give it up in consequence of those outrages?—I could not carry it on any longer; all my money was gone.

12,073. Did you ever offer a reward for the discovery?—Yes, 50*l.* when the first blow up took place.

12,074. Was that in 1862?—Yes.

12,075. Was there another blow-up afterwards?—We had the water let out of the boiler, in order to produce that sort of thing two or three times.

12,076. If the water was let out of the boiler there might be a blow up?—Yes.

12,077. And in your judgment was all this done for the purpose of doing you an injury?—Yes, no doubt of it.

12,078. All those things went on, as I understand you, from time to time for two or three years?—Yes, and we had men abused working in the place.

12,079. This all happened, as I understand you, simply because you were a machine brickmaker?—Yes.

12,080. What were the sort of men whom you employed?—We employed non-union men.

12,081. Have you known them to be threatened as well as yourself?—Yes, and one or two of them have been beaten.

12,082. Do you remember in what year it was that they were beaten?—No, I do not, but I believe it was in 1854.

TENTH DAY.

Mr. W. A. Atkins.

16 Sept. 1867.

12,083. They had been beaten in connexion with this before ?—Yes.

12,084. Generally how were they beaten, were they beaten at night or when ; was it in going to or from their work ?—It was about six o'clock in the morning when they were beaten. I had a letter sent to my house containing a sketch of a coffin, saying that I was to prepare for my latter end.

12,085. And some of your men were beaten, were they ?—Yes.

12,086. Were they beaten with sticks ?—Yes.

12,087. And injured ?—Yes.

12,088. Do you remember whether there were many men beaten ?—Two of them ; the carters that brought some firebricks to the works.

12,089. Were the carters beaten ?—Yes.

12,090. They were beaten as they were taking bricks ?—Yes, no cart could come to the yard, but what it was watched and the carters threatened.

12,091. And this system of terrorism went on for two or three years, did it ?—Yes.

12,092. And at last you gave up your business ?—Yes.

12,093. (*Mr. Barstow.*) Are there any machine bricks now made in the Manchester district ?—Not that I am aware of, only at the prison.

12,094. (*Chairman.*) Where did you generally sell your machine-made bricks ?—We sold them to two or three different parties ; a person of the name of Ellison and Mr. Robinson.

12,095. In the Manchester district ?—Yes, but they were not allowed to use any other bricks.

12,096. Are machine-made bricks in your judgment better than the hand-made brick ?—Oh yes, they are better, and they could be made cheaper.

12,097. (*Mr. Chance.*) Can you give the names of any of the men who you say have threatened you ?—No.

12,098. Do you know that they were union men ?—I know that they had been working in the yards about.

12,099. Have you any reason to believe that it was the masters who did it?—I have very little doubt about it ; I have heard of a master saying that that damned place was going on yet.

12,100. What was the name of the woman from whom you heard that ?—Mrs. Woolgar.

12,101. Were those brickmasters, many of them, members of the union ?—All the Manchester brickmakers subscribe to this union, no doubt about it.

12,102. They subscribe to it without having any benefit from it ?—It is a sort of partnership that they will not allow any person to have bricks that owes them any money. For instance, supposing I built a house and got up to the first floor and I could get no further, and sold it to another person, and I had not paid for my bricks, no brickmaster in Manchester would sell any bricks to finish that house until those bricks were paid for, even to put up a grate ; and then, as I understand, the delegate, as he is called, is the same man that is employed by both masters and men, and he goes and looks after their interests and gives them notice if a cart goes through a prescribed yard, that they must not let that man come there again or serve them with bricks.

12,103. But is it the case generally that the brickmasters in Manchester subscribe to the Manchester union?—There is no doubt of it.

12,104. How many brickmasters do you suppose are subscribers to the Manchester union ?—I am sure I cannot say that ; but I should say the great majority of them.

12,105. Could you give any approximate number ; do 50 or 100 of them subscribe ?—There may be ; but I was only engaged in the trade as a brickmaker by machinery.

12,106. Do you know how much they subscribe?—Oh dear no ; but I should fancy from what I have heard that if any of the brickmakers get into a scrape by doing such injury as was done to us they will go to the masters and they will find them plenty of funds to defend them.

12,107. Do you know of that ever happening ?—I have heard so.

12,108. Can you tell me how much a brickmaster is generally speaking expected to subscribe to the union ?—No, but I have heard by report ; in fact some of the brickmasters have told me that they were compelled to subscribe.

12,109. Have you ever heard how much they were compelled to subscribe ?—No.

12,110. Is it a contribution or a donation ?—I think it is a contribution ; I have no doubt if those books had been in existence you would have found that subscriptions had been entered into those books as received from the masters' union.

The witness withdrew.

Mr. C. Hadfield.

Mr. Charles Hadfield sworn and examined.

12,111. (*Mr. Barstow.*) What are you ?—I was a brickmaker till within these last three years.

12,112. Were you a machine brickmaker ?—Yes.

12,113. Were you in partnership with the last witness ?—Yes.

12,114. What paper is that which you have in your hand ?—Only some notes to remind me of the cases.

12,115. When did you begin to carry on business ?—In 1861.

12,116. Did you employ union or non-union men ?—Non-union men.

12,117. In consequence of your employing a machine had you any threats before any outrages took place ?—We were constantly threatened by men that were working in the yards adjoining, almost every day.

12,118. What was the nature of the threats they used ?—Well, when they came past the place they would threaten to do some damage to the men if they continued their work.

12,119. Did you know the men ?—We knew them from working in the other yards ; in Mycock's yard in particular.

12,120. Did you know any of their names ?—No, we did not know their names.

12,121. Did you inquire their names ?—No, I did not inquire their names. We inquired from the police who were on their beat. Then we had a burner who came from Durham. He was living in Cheetwood Lane ; that was in 1863.

12,122. What is his name ?—Wood. They threw a bottle of combustibles through his window in 1863.

12,123. What was the first outrage in order of time that you speak to ?—The first outrage that we had connected with ourselves was the letting off of the water.

12,124. What time was that ?—That was in 1862 ; it was the latter end, I think, of October 1861 when we commenced.

12,125. What was the next outrage ?—The next was the blowing up of the place.

12,126. Of course when your water was let off you could not temper your clay ?—The water was let off both out of the reservoir and from the boiler. It was intended for the engineer to get a fire under the boiler to destroy it.

12,127. What occurred next in order of date ?—The next in order after that was putting bolts and nuts into the machine or between the teeth of the wheels to destroy it. We have had that done frequently.

12,128. Have you seen them there ?—I have seen them ; I got them out. I have one in my pocket now that was got out (*handing it to the Examiners*). It was crushed between two iron wheels.

12,129. Had it been put into the clay ?—No, it had been dropped in between two of the teeth of the wheels, so that as soon as the machine commenced working it made a break down.

12,130. Who could have done it?—We supposed that some of the men whom we employed were bribed to do it.

12,131. And that caused a break down?—Yes, it caused a break down, and about 12*l.* worth of damage was done, besides stopping the machine.

12,132. How long did it stop the machine?—It stopped the machine that time about eight days; but we have been stopped frequently by things being put in in different parts of the machinery.

12,133. How often do you think it has happened altogether?—I should think not less than 14 or 15 times in the course of three years.

12,134. The same thing happened 14 or 15 times?—Yes.

12,135. You need not recur to those things, to the stopping of the engines, but what was the next?—We were supplying Mr. Councillor Clewes in 1862 for some buildings that he was erecting, and he was threatened by some of the brickmakers' union men that if he continued fetching they would waylay him some night.

12,136. Mr. Clewes I suppose is alive now, is he not?—He is alive, and living in Chorlton-upon-Medlock.

12,137. That is not an outrage upon you?—No, but that was owing to his using our bricks.

12,138. What was the next outrage?—Messrs. Elliotson and Dickson had six houses pushed down because they were using our bricks. They were building six houses near Regent Road in Salford. That was in 1863.

12,139. What do you mean by "pushed down?"—They were built up to the first storey, and about 50 of the brickmakers went one night and pushed them all down to the ground again.

12,140. Do you mean that they really levelled them down to the ground?—Yes.

12,141. How do you know that there were as many as 50 people concerned in it?—From the report at the time; they were met by some of the police.

12,142. You say the brickmakers levelled those houses?—It was some of the union men.

12,143. Are you aware whether it can make any matter to a brickmaker whether he uses a machine brick or a hand-made brick?—Well, the union men have a society amongst themselves, and they prevent any other men going into the society.

12,144. But I ask you is there any reason why bricklayers should prefer to lay hand-made rather than machine-made bricks?—The bricklayers at that time preferred our bricks to the hand-made bricks; but owing to this strike at the new gaol the bricklayers combined together with the brickmakers, and to bring this strike to a termination the bricklayers turned out against our bricks.

12,145. Then the bricklayers did not do this on their own account?—It was the brickmakers, not the bricklayers.

12,146. I understood you to say that the brickmakers had pulled down those houses?—Yes.

12,147. You say that the brickmakers levelled those houses in September?—Yes.

12,148. What is the next outrage in order?—I do not know of anything in order.

12,149. You have not told us about the shed being blown up?—Well, I thought the other witness had told you.

12,150. What did happen; it was blown up, was it not?—Yes.

12,151. Do you remember any of your men being threatened or beaten?—Yes; we had some square bricks that we wanted making for the cornices for the new gaol, and Sidebotham and two other men and a boy were making them by hand at the top works, and they met them one morning with a pick-shaft and left him, as they thought, for dead one morning at about a quarter to 6. Sidebotham was here and gave his evidence.

12,152. Have they ever threatened you?—Yes, I have been threatened personally, and so has Atkins. We were met one dark night in November 1863, and had we been perhaps 50 yards higher up we might have been left there perhaps to be picked up.

12,153. Where were you threatened?—In Cheetwood Lane, within 100 yards from this building.

12,154. And who threatened you?—There were two men who came up and threatened us, and we accidentally getting nearer to the lamp they ran away and we followed them into Springfield Lane in Salford, and there we lost them. We followed them over the bridge close to here.

12,155. Have you ever been beaten?—No.

12,156. Have you had anything done to your house?—No, I did not live here then.

12,157. You say that Wood, your burner, had his house blown up?—Yes; he had a bottle full of powder and slugs, with a fuse attached to it, thrown into his bedroom window.

12,158. Did it explode?—No, he was not gone to bed then, I think; he was downstairs, but he heard the crash and threw it out.

12,159. Did it explode?—It did explode outside.

12,160. Where is Wood now?—He is dead. His son is somewhere in the country; he was living in the house at the time.

12,161. Is that all that you can tell us of any injury or threat?—Yes; that is all that I can remember.

12,162. (*Chairman.*) Wood was your burner in 1863, was he?—Yes; he came from Durham purposely to burn.

12,163. Where did he live?—He lived in a house in Cheetwood Lane, close to the works.

12,164. Did a bottle full of combustibles go into the room?—It went into the bedroom through the window. They threw it out again, and the fuse had not had time to get to the powder.

12,165. But the fuse was applied?—The fuse was applied.

12,166. And they threw it out again?—Then threw it out again while it was running on.

12,167. You say that it was supposed to contain slugs?—There were slugs found all round where it had exploded.

12,168. Do you remember what time of the night it was when it was thrown in?—I was not there, but it was somewhere about 11 o'clock from what Wood and his wife said.

12,169. You say that he was a married man?—He was a married man.

12,170. Had he any family?—Two sons and, I think, one daughter. We had all the family at that time working for us.

12,171. You say that those two men who attacked you in Cheetwood Lane threatened you?—Yes.

12,172. Do you remember what they said?—I believe they said they would blow his brains out.

12,173. You were walking with you partner, were you?—Yes, down the lane.

12,174. What time of night was it?—It would be, I should think, between 8 and 9.

12,175. What time of the year was it?—In November.

12,176. Then it was dark?—It was dark and the lamps were lit. We followed him.

12,177. Had he anything in his hand?—I did not notice anything in his hand.

12,178. Was there only one man?—There were two, but we lost one in the dark, and we followed the other into Springfield Lane, and whether he went round a corner or into a shop we could not distinguish.

12,179. I understand that you have now given up brickmaking?—Yes.

12,180. Had you a carter of the name of Wogden?—Yes, he had his stack burnt.

12,181. Is he here himself?—He is here himself I fancy.

The witness withdrew.

TENTH DAY.

T. Wogden.

16 Sept. 1867.

THOMAS WOGDEN sworn and examined.

12,182. (*Mr. Chance.*) Were you a carter in the employ of Mr. Atkins or Mr. Hadfield in 1862?—I was employed in machine brickmaking by Mr. Grundy.

12,183. Was that in Cheetwood Lane?—That was in Cheetwood Lane. One was in Cheetwood Lane and the other was in the top here. I do not know his name, but I have carried bricks from there too.

12,184. Have you been in the habit of carting machine-made bricks?—Yes.

12,185. For Mr. Grundy?—Yes.

12,186. How long ago is that?—Between four and five years since. I carted for them three years or more.

12,187. Was anything ever said to you by anybody because you carted those bricks?—Yes.

12,188. What has been said to you?—Why, I have been stopped many a time.

12,189. Do you know the men who stopped you?—I do not know them.

12,190. Were they the same men that stopped you every time?—It was the master that stopped me.

12,191. But were they the same men that stopped you at different times?—Yes, but it has been through the brickmakers.

12,192. Were they members of any union, do you know?—To be sure.

12,193. You do not know their names?—No, I do not.

12,194. What did they say to you when they threatened you. Did they say that they would do anything to you?—They did plenty to me.

12,195. Did they say they would do anything to you?—No, they never charged me anything, only once.

12,196. What was that?—They swore to take the life of me, although I did not know them.

12,197. Did they ever do anything to you?—Yes, they set my haystack on fire.

12,198. Where was that?—In Gomershall.

12,199. How far from Cheetwood Lane do you live?—A mile along. We turn down Queen's Road.

12,200. When was it that they set your haystack on fire?—Four years ago next Thursday.

12,201. Was that because you carted bricks?—They had naught else against me.

12,202. How do you know that that was the reason?—Because a brickman in a moleskin dress had walked backwards and forwards in the lane.

12,203. By your haystack?—In the lane, happen about 50 yards off it.

12,204. Was this the man, or one of the men, who had stopped you before?—Well, I did not see him, but different people did see him. I did not see him myself.

12,205. Was he one of the men who stopped you when you were carting bricks?—I cannot say that he was because I did not see him.

12,206. At what time of the day was that haystack set on fire?—Between 5 and 6 o'clock at night.

12,207. Was it in the summer or the winter?—It will be 4 years next Thursday.

12,208. Did you ever hear who had done it?—No, but the man was seen coming away from it too.

12,209. Who saw the man coming away from it?—We had a nurse living with us then, and he wanted to know where I was, and she said I should be at home directly. She had been out for some milk, and she saw him coming back to the haystack; she looked at the haystack and it was all in a flame, and he was getting happen 40 or 50 yards from it running.

12,210. Did she know the man?—No, she did not know him.

12,211. She did not know his name?—She did not know his name.

12,212. Then you cannot tell us who did it?—No, I cannot.

12,213. Have you ever had any more damage done to anything belonging to you?—Well, to be sure I had to pay a fine.

12,214. To whom did you pay the fine?—To Mr. Kay.

12,215. To James Kay?—Yes.

12,216. You knew him then?—To be sure I knew him to my sorrow.

12,217. Has he stopped your cart sometimes?—Yes, he has been the cause of it at different times.

12,218. But he never did stop your carts himself?—Well, he always got a master building a house and told him, "You cannot have any brick if that man carts any more brick."

12,219. How much money have you had to pay to Kay?—Well, I paid 5*l.* the first time.

12,220. You paid it to him yourself?—I paid it to him myself, and then I paid him another 5*l.* in a fortnight. There was a meeting that night, and he said he would bring a stamped paper for all of it, but I never had only one stamped paper.

12,221. Have you that paper now?—Yes.

12,222. Have you it here with you?—Yes.

12,223. Will you bring it out.

The witness produced the paper which was as follows:

"Manchester, March 11th, 1867.

"Received from Thomas Wogden the sum of five "pounds on account.

"£5 0 0.

James Kay,
£5 0 0"

12,224. When was it that you paid those fines, after your stack had been set on fire, or before?—After.

12,225. Where was it that you paid Kay the money?—I paid Kay beside the top building at a corner public house; I forget the sign, but it is a place where I have regularly gone to. Then I paid him another 5*l.* at the "Queen's Arms," in the Queen's Road.

12,226. Was anybody else with you when you paid Kay?—There was another man with him like himself.

12,227. What were you fined for; what had you done?—For wheeling machinery bricks. Then I could not go out again anywhere. They had me out of work for eight months.

12,228. And that was all you had done?—That was all that I had done that I know of.

12,229. For that he fined you?—Yes, for that he fined me 10*l.*

12,230. Were you obliged to leave off work afterwards?—No, I did work after and I had to get work among them.

12,231. But had you to leave off wheeling machine-made bricks?—Well, you know they gave over.

12,232. But did you keep on working with Grundy or Atkins till they had given over?—No, Grundy gave over then.

12,233. But did you work with them till they gave over?—Yes.

12,234. And then afterwards you got work elsewhere?—Yes, not among the brickmakers; I could not get work there.

12,235. And you had to pay a fine before you were allowed to work anywhere else?—I had to pay a fine before I was allowed to work anywhere else.

12,236. You paid 10*l.* altogether?—Yes.

12,237. After working for Atkin's for whom did you work, was it wheeling bricks then?—No, I never was wheeling bricks; I was carting bricks.

12,238. What did you do after you left the machine brickmakers?—I went to the steel works in Newton and worked for them about three years.

12,239. Was it in order to be allowed to do that that you had to pay the fine?—No; then the steel works got slack, and then I had to get work somewhere else, and there they had me fast after I left the steelworks.

12,240. Then after you left the steelworks what did you do?—I went about eight times over to the

brick place where they had their meetings to their society.

12,241. After you left the steelworks you went to the brickmakers' union meeting ?—Yes.

12,242. What did you go there for ?—To beg for work, to get work anywhere.

12,243. Then it was that you had to pay the money ?—Yes, I had to pay the money, I went eight times and they would give me no answer.

12,244. Where did you go ?—I went to the club-house.

12,245. Where is that, at the "Crown and Cushion" ?—Yes, that is the name of the place.

12,246. Did you see other members of the union besides Kay ?—Yes, I saw them.

12,247. Were there many of them there ?—Yes, many, a room full. They ordered me out when I went before them then ; that was the first time I went. So the men sat the same as you sit, and they laughed and jeered at me, and so this man in the middle said, "Down with him !" and down he knocks his hammer in the room, and then they put me out of the room.

12,248. Did they refuse to let you work ?—They refused to let me work ; I went four times afterwards, and said the master brickmaker "Lie to them ; lease them again," so I went three times over, and the fourth time I got my sentence and a fine of 10*l.*

12,249. After going a great many times they at last let you work upon paying 10*l.* ?—Yes.

12,250. And then you began working again ?—Yes, I began working again.

12,251. Are you a member of the union now at all ?—No, I never was in my life ; I never had anything at all to do with them and never wanted.

12,252. (*Chairman.*) Did you ever cart any more machine-made bricks after you were fined ?—No, never since, or else they would be fast on me again ; I had to shift the machine-made bricks, I dare not touch them, there would be another 10*l.* on me if I did, or else they would double it.

The witness withdrew.

Mr. JOHN HOLT sworn and examined. *Mr. J. Holt.*

12,253. (*Chairman.*) You are a master brickmaker are you not ?—Yes.

12,254. Did you live at Royton, near Oldham ?—Yes.

12,255. In 1859 did you employ a person named Thomas Buckley ?—Yes.

12,256. Was he a member of the Oldham union ?—Yes, he was.

12,257. There is a brickmakers' trade union at Oldham, is there not ?—Yes.

12,258. Do you remember what it is called ?—Well, I have never seen anything, but they term themselves the Oldham Operative Brickmakers. I have it that way in the circular that they sent me.

12,259. You employed Thomas Buckley in 1859 you tell me ?—Yes.

12,260. Was there any dispute as to the manner he was doing his work ?—Yes.

12,261. With whom was the dispute ?—With me.

12,262. Of what did you complain ?—I complained of his not doing his work in a proper workmanlike manner.

12,263. In consequence of that complaint did he leave your service ?—Yes, he said he could turn up and give over. I said, "Very well, it is all right."

12,264. Then did he give over ?—Yes.

12,265. Were you employing other union men at that time ?—Yes.

12,266. After he gave over what happened to the non-union men ?—They all went away.

12,267. How many were there ?—There were three.

12,268. And then you were without men at all ?—Yes.

12,269. What did you do then ?—I let the work stop for three days ; I thought they might send a deputation to me, but none came.

12,270. And during that time were any of your bricks spoiled ?—I made a few myself and they came and spoiled those that I made myself.

12,271. Did you after that employ any non-union men ?—Yes.

12,272. After you had employed non-union men did anything happen ?—Yes.

12,273. What was it ?—They set fire to my shed and put needles in my clay.

12,274. Were there any tools, barrows, or anything of the kind in the shed, or was it only the shed that was burnt ?—There were seven or eight barrows, and all the tools they could pick up, shovels, picks, riddles, and all put together and set on a pile and set on fire.

12,275. Were you told of this in the middle of the night ?—Yes, about 1 o'clock in the morning.

12,276. Did you get up in consequence ?—Yes, I did.

12,277. And did you find the shed on fire ?—Yes.

12,278. And I suppose you did your best to get the fire under ?—Yes.

12,279. And you did so ?—Yes.

12,280. In addition to this has anything been done to your clay ?—They had put some thousands of needles into it.

12,281. Did your men try to work the clay after the needles had been put into it ?—Yes ; I advised them not to. I said, "I am afraid you will get crippled ;" but, however, they said they would chance it and would work it.

12,282. Did the men proceed to work the clay into which the needles had been put ?—Yes, they did.

12,283. Did any of them get injured ?—Two men got injured and got needles in their hands.

12,284. Was either of them permanently injured ?—One of them has his longest finger stiff to this day.

12,285. What was his name ?—John Noble.

12,286. And this is entirely from working the clay with the needles in ?—It is.

12,287. And the other man you say was injured, but not so permanently ?—He was injured, he has had to lose his work for a couple of weeks together.

12,288. From that ?—Yes, I think repeatedly.

12,289. Is it a difficult thing to discover where the needles are if they have been put in in that way ?—Yes, it was difficult in that case ; I will tell you why, They pulled the mats off the clay ; we cover the clay with sugar mats, and they pulled the mats off the clay, then they would throw the needles over the clay, then they would put the mats over the clay again and trample on the mats to tread the needles into the clay, so that we could not actually pick them out or see them. Then after that they spread a great lot of needles over the mats, and they likewise covered the cast-up clay with needles (that is the clay that is cast up ready for tempering), and they covered even the moulding-table with needles, and the planks up which the wheeler has to wheel his clay to the table. They gave us plenty of needles I can assure you.

12,290. When the mats are put again over the clay, why do they put the needles on the mats ?—I do not know what that is for.

12,291. Was it for the purpose of deceiving you, and making you think that those were the only needles ?—Perhaps it was, or it might be a notice that they would bring us more.

12,292. Have you ever had your property injured or destroyed at any other time after this ?—No, not at all since then ; I had many a time previous to that.

12,293. That was in 1859 ?—Yes.

12,294. Had you any property destroyed in 1860, or is that what you have been speaking of ?—A few bricks, I think, but very few.

12,295. Was that done by trampling upon them ?—Yes.

12,296. Not by needles ?—No, by trampling.

12,297. Have you any doubt that this injury was done by union men ? —I could not suspect any other party.

TENTH DAY.

Mr. J. Holt.

16 Sept. 1867.

12,298. You had no personal quarrel with anybody?—No, with no man living.

12,299. And at that time you were employiong non-union men?—I was.

12,300. Did you see any brickmakers about your premises at the time when you got up, when the shed was on fire?—No, there was one William Burn there.

12,301. Who is William Burn?—He was a moulder at the time that they struck work. He was a young man that I brought up as an adopted son.

12,302. William Burn was there, you say, at the time when you went to see the fire got under?—He was there.

12,303. Was he a union man?—Yes.

12,304. Had he been working for you?—Yes.

12,305. And had he left when the others left?—He did.

12,306. And on that night when you got up and saw your shed on fire, did you see him about the place?—Yes, he was there.

12,307. Did he render you any assistance?—Not at all.

12,308. He did not at all help to put the fire out?—Not at all; he never put a hand to it, all he did was laughing at it.

12,309. (*Mr. Chance.*) Do you know where those waste needles came from?—I do not know where they come from.

12,310. Do you whether they are used instead of nails by joiners, and carvers, and gilders?—I should think not.

12,311. But you do not know that they are sold at Manchester for that purpose in large quantities?—I do not know.

12,312. You do not know where they come from?—No, I do not.

The witness withdrew.

J. Hay.

John Hay sworn and examined.

12,313. (*Mr. Barstow.*) A believe that you are now a private in the 99th Foot?—Yes.

12,314. In 1858 were you in the service of John Holt?—Yes.

12,315. Do you remember a man named Thomas Buckley being in his service?—Yes.

12,316. Do you remember his leaving Mr. Holt's service?—Yes.

12,317. And all the union men went at the same time?—Yes.

12,318. Were you a union man?—No, I was not of age for it.

12,319. Did you remain in Mr. Holt's service?—Yes.

12,320. Do you remember the fire at the shed?—Yes.

12,321. How did you come to hear of it?—I was living close by the side of John Holt's at the time with my father.

12,322. And did you see the fire?—Yes, and put it out.

12,323. About what time of night was it?—It was early in the morning.

12,324. About what time?—I cannot speak to that exactly.

12,325. Do you mean two, or three, or five, or six, o'clock?—Well, I think it would be somewhere about between 1 and 2.

12,326. You had gone to bed?—Yes, I had been in bed a long time.

12,327. And you were called up?—I was.

12,328. Did you go to the shed?—Yes.

12,329. What was there burning there besides the shed?—There was some barrows in the shed on the floor burning.

12,330. And picks and shovels?—Yes.

12,331. Do you know a man named Thomas Jackson?—Yes.

12,332. I believe you helped to put out the fire?—Yes.

12,333. Jackson was one of the union men who left work, was he not?—Yes.

12,334. Did you hear him use any threat towards Mr. Holt?—Yes.

12,335. What was that?—When there were three of them leaving the ground he only said it would be a little worse for them.

12,336. That was when they were going away altogether?—Yes.

12,337. Did you see anybody else there?—I only saw Burns and Jackson and Buckley.

12,338. Burns and Jackson and Buckley were at the fire, were they?—Burns was at the fire.

12,339. Was he helping to put it out?—No, he stood there and laughed at it.

12,340. Do you know whether Burns was a union man?—Yes, he was at that time.

The witness withdrew.

Mr. J. Smethurst.

Mr. John Smethurst sworn and examined.

12,341. (*Mr. Chance.*) Are you now a cotton spinner at Royton?—Yes.

12,342. In the year 1859 you were a brickmaster, were you not?—Yes.

12,343. And also a coal proprietor?—Yes.

12,344. At that time were you employing union men?—Non-union men.

12,345. Had you employed union men before that?—I am not aware that I had.

12,346. You always employed non-union men?—Yes, for anything I know.

12,347. Had you any reason for not employing union men?—The rules of the union of the operative brickmakers were considered to be so much in the favour of the workmen that a master brickmaker had no control over the work in the yard, and they were considered to be so much in favour of the workmen that a number of the master brickmakers in Oldham determined not to submit to such rules.

12,348. What did they do?—A number of the master brickmakers in Oldham had a meeting with some of the men who represented the operatives with a view to induce them to revise and alter some of their rules. They would not do so, and consequently a considerable number of the employers would not employ union men.

12,349. Who were the members of the union with whom you had a meeting?—I do not know the names; they sent two men from the union, but I do not recollect their names it being so long since.

12,350. But you heard the names at the time, did you not?—Well, I might have done so, but I do not recollect the names.

12,351. Could you tell the names if you were to hear them?—Well, I do not know; I might, or I might not.

12,352. Was William Connell one of the names?—I do not recollect.

12,353. Patrick Nolan?—I have no distinct recollection of the names. I would not wish to say that I knew any of the names. From the annoyances at the time I determined to go out of the brickmaking.

12,354. Was Richard Eckford one man?—I cannot tell you; I do not recollect.

12,355. Is it your belief that either of those men, William Connell, Patrick Nolan, or Richard Eckford, was one of those men?—I should not like to say that I do recollect. I have not got it so firmly fixed on my memory that I can remember any names.

12,356. Have you any belief on the matter?—Well, I have so little recollection as to it that I would not like to say.

12,357. Am I to understand that you really cannot recollect the names?—Most decidedly I cannot; I would have given them to you in a moment if I could.

12,358. What action did you take upon their refusing to revise their rules?—I employed non-union men so long as I continued to make bricks afterwards.

12,359. Do you remember in July having any of your bricks destroyed?—Yes, I have a perfect recollection of it.

12,360. How many were destroyed?—There were about 7,000 bricks trampled upon, and upon examining the yard there appeared to be about three different sizes of shoe-marks upon the bricks.

12,361. You suppose there were three men then?—There would be three men at least; they trampled up and down the flats as the bricks lay upon the ground, pushed walls down, and carried away two pairs of moulds that the men had to work with.

12,362. Had you any watchman upon your premises at the time?—Not at that time; afterwards I erected a platform at the head of the yard and put on an iron grate, and kept up a large fire during the night and kept a watchman, and I had no more damage done that year.

12,363. What did you pay the watchman for watching?—Well, he was one of my men that I regularly employed; this yard of mine was close to a colliery, and I had men working there in the night, and one or two of them attended to go up and feed his fire, which was immediately in the same close, so that the fire shone straight from the head of the yard to the pit.

12,364. You had to pay the watchmen extra at night, did you not?—Most decidedly; that was in consequence of the ill-feeling existing in the neighbourhood, and in consequence of the damage that was being done all round the neighbourhood.

12,365. Had you any more damage done in that year?—Not in that year.

12,366. Had you any more communication with the union that year?—At that time a number of master brickmakers met at Oldham (we had many meetings there) at the "Spread Eagle Inn;" I have some recollection of the operatives sending two men at least——

12,367. You have told us about that. Had you another meeting afterwards at which some of the union men attended?—I believe not.

12,368. Then was this meeting with the unionists before the 7,000 bricks were destroyed or after?—I am not very clear whether it was before or after, but I have a perfect recollection about this meeting; the men, I believe, engaged Mr. Ashcroft, the solicitor in Oldham, on one occasion, to see the master brickmakers.

12,369. Was it very nearly at the time when the 7,000 bricks were destroyed, that the meeting was held?—Well, my recollection is not very clear; I could not fix it whether it was before or after.

12,370. Was it near the time?—I am not clear as to whether it was before or after, so as to fix the time.

12,371. Whether it was before or after, was it about the time: was it in the same year, 1859?—Well, I really cannot tell you.

12,372. Cannot you say whether it was in 1859 or not?—I cannot say whether it was in the year 1859 or earlier.

12,373. Had you any damage done to you in the year 1860?—I had some more bricks destroyed in May 1860.

12,374. Was it the same night as some damage was done to Mr. Holt's bricks?—I believe it was.

12,375. How many bricks had you damaged upon that occasion?—I had about 3,000 damaged.

12,376. Were they damaged in the same manner—They were trampled upon.

12,377. You had given over watching at that time, had you not?—I believe I had no watchman on at that time.

12,378. Had you had any communication with the union at that time?—Not that I am aware of.

12,379. Not previously?—Not previously.

12,380. Do you know of any additional cause having arisen why this destruction of bricks should take place in 1860?—Only in consequence of employing non-unionists.

12,381. There was no alteration of the rules with you?—There was no alteration; it just remained as it had been.

12,382. Had you any further damage done to your property?—No more than twice.

12,383. Had you ever any threats against you by members of the union?—No.

12,384. After that I think you gave up, did you not?—I gave up; I made up my mind during that time, that I would not continue in the trade, where there were such annoyances and being continually in dread, and I have not made any bricks since the year 1862.

12,385. You say it was in consequence of annoyances or of injuries that were done to you from time to time?—Yes, I did not consider that we were safe at night.

12,386. And it was in consequence of that that you gave up brickmaking?—It was.

The witness withdrew.

William Connell sworn and examined.

12,387. (*Chairman.*) What are you?—I am a temperer in the brickmaking.

12,388. Have you been so a long time?—A long time, about 20 years.

12,389. Are you now a member of the Oldham brickmakers' union?—Yes.

12,390. Have you been so for some time?—Yes.

12,391. Are you in any office at this moment?—No.

12,392. What office have you filled there?—I was secretary.

12,393. When were you secretary?—I was secretary after the club opened; I was the second man that served as secretary.

12,394. When was the union opened?—In 1846.

12,395. When were you last secretary?—Well, it would be either 1853 or 1854, and I was about nine months secretary then.

12,396. Is that the last time you were secretary?—Yes.

12,397. Who is the secretary now?—William Burke.

12,398. Does he live at Oldham?—Yes.

12,399. Who is president now?—George Haywood.

12,400. Have you a treasurer?—Yes, we have a treasurer, the man at whose house the club is held.

12,401. What is his name?—John Lord.

12,402. What is the name of the house?—The "Volunteer Inn" in George Street.

12,403. In Oldham?—Yes.

12,404. How often do you meet?—Every fortnight.

12,405. Are those the only three officers you have—the president, the secretary, and the treasurer?—Yes, these are the three officers.

12,406. And then have you any acting council, or do you settle all your business at your meetings?—There is a council called occasionally whenever there is anything to be done.

12,407. If there is anything to be done is it brought before the whole meeting?—No.

12,408. Before whom is it brought?—The council.

12,409. Who compose the council?—There are men appointed by the body at a general meeting for that purpose.

12,410. For each purpose or generally?—For three months.

12,411. Of how many members does the council consist?—Nine, I think.

12,412. Are the president, secretary, and treasurer

TENTH DAY.

W. Connell.

16 Sept. 1867.

always on the council?—No, they are not concerned in it.

12,413. Then you have nine members on the council now?—Yes.

12,414. Before any money is paid away is it brought before the general meeting; who has a right to distribute the money?—There is a claim made for anything of that kind, and it will be brought before the secretary and treasurer of course, and they will be told that there is so much money wanted.

12,415. But who tells them?—Whenever there is anything wanted it will be made known to them; I cannot tell you who will make it known to them.

12,416. In the first place I suppose you all subscribe something a year, do you not?—We pay a weekly subscription.

12,417. Of how much?—6*d.* when we are working, and 2*d.* when we are not working.

12,418. Each week?—Yes.

12,419. How many members have you?—About 130 at present.

12,420. Not more?—Not more I think at the present time, but I am not certain to a few members.

12,421. Are there other people, who are not members, who subscribe for the liberty of working?—Yes, the "contribution members" we call them.

12,422. What do they pay?—They pay the same.

12,423. What benefit do they get?—They get turn-out money.

12,424. But is that the only benefit which they have?—For anything I know it is.

12,425. You do not know of any other benefit that a contribution member has?—No, but I have known some of them to die, and we make up a funeral subscription among the members for them.

12,426. Do you not pay for the funeral out of the actual funds of the club?—No, we all subscribe so much to bury them.

12,427. It is not part of the actual expenditure then?—No.

12,428. Are you liable to be called upon, and must you pay?—No, it is left to ourselves.

12,429. It is voluntary?—It is voluntary.

12,430. What are the actual expenses to which your money necessarily goes, there is the rent of your room?—Yes.

12,431. And pay for turn-outs?—Yes.

12,432. Is there anything else?—If a member is sick, or his family in a low state, we might give them something as a gift, or something of that kind, and then there are several other expenses besides that too.

12,433. What are the other expenses?—When there is any disturbance between masters and men we send some one to settle that dispute between them, and we pay them for their time.

12,434. Do the turn-outs cost you a good deal?—A good deal; there are a great many heavy turn-outs.

12,435. Have there been any heavy turn-outs lately?—Not so very lately.

12,436. Last year?—I cannot exactly say; I have a very bad recollection, and I cannot say to a year.

12,437. It often is so apparently, but I think you remember pretty well too?—Well, I can think of the things that you ask me.

12,438. But the turn-outs have been rather heavy, have they?—Yes.

12,439. And when there have been disputes between masters and men you send a delegate to settle it?—Yes, we send a delegate and sometimes two.

12,440. How does he settle it generally?—Sometimes the masters and men will appear face to face, and then they will strive to arrange it between them as well as they can.

12,441. And if they do not, do you endeavour to use a little persuasion?—Of course, the delegates go with that purpose, to persuade them.

12,442. And if the masters cannot be persuaded, how do you then?—I cannot tell you how they will go on then.

12,443. What sort of authority has the delegate if a little gentle persuasion will not do?—We leave it to themselves to do the best they can then.

12,444. But suppose they will not be persuaded?—That I cannot tell you.

12,445. You have heard of damage being sometimes done in your district, have you not?—Yes, I have heard of it several times.

12,446. You have heard of bricks being spoilt?—Several times.

12,447. Had you any idea who did it?—No.

12,448. Never at all?—I had not.

12,449. Not the slightest?—I had not.

12,450. That is not the mode of persuasion which you adopt sometimes, is it?—No.

12,451. Nothing of the sort?—No.

12,452. Have you heard of sheds being fired in your district?—Yes, I have heard of it.

12,453. Have you ever heard that discussed at your meetings?—Never; I never heard it discussed at any of our meetings.

12,454. Perhaps there was no opposition to it?—I never heard it discussed at our meetings.

12,455. You never heard it mentioned?—I have heard it mentioned many a time both in meetings and in private; in and out of doors.

12,456. But there was nothing of what you call a discussion?—No.

12,457. There was no opposition made to it was there?—No.

12,458. Did you come to resolutions about it sometimes?—No, I never had anything to do with anything of the kind.

12,459. I do not suggest that you had; but you heard it talked of?—I have heard it talked of, but no resolutions passed.

12,460. But you have heard it talked about at the club, I understand?—I have heard it talked about both in and out of doors, at several places.

12,461. Was it at a meeting?—No, not at a meeting.

12,462. But at the "Volunteer Inn?"—I have heard it talked about at the public-house at the time, and, of course, what happens is talked about there.

12,463. Did it happen sometimes that those outrages took place after the master had been reported to be what I think they call "stupid"?—Yes. No doubt. I heard nothing discussed about it.

12,464. There was a book in which of course you as the secretary made all entries?—Yes, of course.

12,465. Have you got any books?—No, I have got no books at present. I suppose the secretary of course has them.

12,466. But you remember the sort of book which you had when you were in office?—Yes, I do very well.

12,467. Was it pretty full?—Yes.

12,468. Do you remember how far it went back?—I believe I was in office between 1853 and 1854.

12,469. Where were you in the book then—were you towards the end or in the middle?—I was very near the end of the book. Then the secretary who was after me got a new book immediately after I left.

12,470. Was it 1854 or 1864 when you left?—It was 1864. That was a mistake.

12,471. Had you nearly finished your book at that time?—Yes, very nearly finished it.

12,472. And your successor got a new book, did he?—He got a new book after I left.

12,473. How long after?—Immediately after.

12,474. What has become of your book?—I cannot tall you what has become of it.

12,475. When did you see it last?—I have not seen it this long time. I have not seen it since I left because I have not been secretary since.

12,476. You have never seen your book since 1864?—Never since.

12,477. When were you last at a meeting?—Last Saturday week.

12,478. Had the secretary his book then?—Yes.

12,479. It was all right then, was it?—Yes, he had his book then.

12,480. Have you had any meetings since?—No.

12,481. Now, was it the duty of the secretary to make an entry of such moneys as he paid?—Yes, he makes an entry of all moneys he pays.

12,482. When you were secretary you did that?—Yes.

12,483. Who generally pays the money — the treasurer?—The treasurer pays it of course, and he pays the money to the secretary of course.

12,484. But supposing any delegates have to be paid or any of the men have to be paid anything, is it the treasurer who pays it?—No, it is the secretary and the president.

12,485. Then when you were secretary you not only made an entry of payments, but paid money?—Yes.

12,486. When you were secretary did all the money which was paid pass through your hands?—It did not.

12,487. Then who was the other person through whose hands some of the money passed when you were secretary?—I cannot tell you, but no money passed through my hands when I was secretary but what I could give a perfect account of.

12,488. That I am glad to hear. But supposing there was other money which did not pass through your hands, whose duty was it to pay that money?—That I cannot exactly tell you. I am upon my oath and I cannot tell you.

12,489. Do you mean to tell me that you do not know what other officer in your union had a right to pay away money besides the secretary?—I cannot tell you.

12,490. Do you mean to tell me that you do not know whether any other officer of your union had a right to pay any money besides the secretary?—I can tell you that I cannot tell you.

12,491. That is very easy; but do you mean to tell me that you do not know whether any other officer of the union had a right to pay away money?—I know that there was money drawn on accounts that I knew nothing about, and that I cannot tell you about. That is my meaning.

12,492. But then you had to put it down, had you not?—Yes, as expenses.

12,493. Was that the expression?—Of course our treasurer would say so much cash.

12,494. I thought so. I suggested that probably the treasurer would pay a little. Then the treasurer paid so much and you put it down as "cash"?—Yes.

12,495. And you did not put down what it was for but it only went down as "cash"?—I did not know what it was for.

12,496. And you asked no questions?—No.

12,497. Did that occur very often?—No, very seldom.

12,498. On some special occasions?—I cannot tell you what the occasions were.

12,499. But now and then there was some money paid by the treasurer, and he told you to put it down as "cash"?—Yes.

12,500. You paid away money yourself sometimes as secretary, did you not?—I was present at the payment of it of course.

12,501. But did you actually pay any money yourself with your own hands?—No, I was present at the payments.

12,502. When you have been present at the payments who is the officer whom you have seen pay money?—Our president of course, such as turn out money.

12,503. Then it was the duty of the president to pay turn-out money?—Yes, and wages, and such as that.

12,504. And then the treasurer paid some other money of which you knew nothing, and you put that down as "cash"?—I cannot tell you as to that.

12,505. But that is what you have told me?—Did I say the president?

12,506. The last time you said the president; before, you told me that the treasurer paid some money, about which you did not know anything, which you put down as "cash," but then you told me that the president paid away certain moneys for turn outs, wages, and so on, is that right?—I suppose it is.

12,507. It is your place to know now, is that right?—Yes.

12,508. Then you put them all down, and it is the secretary's duty to put them down?—Yes.

12,509. Have you a box in which your books are kept?—Yes, we have a desk.

12,510. How many books have you?—Only two.

12,511. Have you a minute-book as they call it?—We had what is called a cash-book and a ledger.

12,512. The cash-book is the book in which the secretary makes the entries?—Yes.

12,513. The ledger is the book in which the contributions are put down I suppose?—Yes.

12,514. Was there also a book in which the resolutions were put down?—I had no book of that kind in my possession.

12,515. But was there a book of that kind?—No, but there was a book in which the council put their things down.

12,516. Was it called a council book or a minute book?—I cannot tell the name.

12,517. But they had a book?—Yes.

12,518. Did they put down the resolutions of the council or the resolutions of the whole meeting?—They put down what they would do.

12,519. Whose duty was it to make entries in that book?—I cannot tell you.

12,520. But it was the duty of one of the nine, was it not?—Yes.

12,521. Has there been a new book for the council lately?—I cannot tell you.

12,522. Have you seen the old book lately?—No.

12,523. Was it generally seen at the meetings every fortnight?—I suppose it was.

12,524. When you were there last Saturday week did you see it?—I had nothing to do with the council I only went to pay my contribution.

12,525. But did you see the council book at the council meeting?—No.

12,526. You usually go to the meetings, do you?—No.

12,527. I thought you told me just now that you did?—No.

12,528. When did you last see the council book?—I cannot tell you; it is a length of time.

12,529. But was it not usually opened at the meeting and mentioned?—No.

12,530. Do you mean to tell me that they did not at the meeting mention what the council had done?—The council was sitting in a separate room and the contributions were paid, and when the contributions were paid a member walked out.

12,531. He would have the right to go to the general meetings, I suppose?—Yes, of course.

12,532. At the general meetings did not the council produce that book?—That is left to the body at the general meeting; the council has nothing to do any more than any other members at the general meeting.

12,533. But was not their book produced at the general meeting?—No.

12,534. Was that kept in the same box as the others?—Yes.

12,535. Now we have the council book, the cash-book, and the ledger, is that right?—Of course.

12,536. Those were the three books which you had?—Yes.

12,537. Have you got any others?—No.

12,538. Was there any other book which contained a record of what passed at the general meetings?—No.

12,539. None whatever?—No.

12,540. You were a member in the year 1862, were you not?—Yes.

12,541. Do you remember your union coming to some resolution about subscribing for the defence of the persons who had murdered a man named Jump?—Yes, of course I do.

12,542. Do you remember two delegates coming

TENTH DAY.

W. Connell.

16 Sept. 1867.

from Ashton about that?—Yes, there was two delegates came.

12,543. You remember Harrison and Barlow coming, do you not?—Yes.

12,544. We understand a meeting was called?—Yes.

12,545. You were present, were you?—Yes.

12,546. Harrison tells us that he told you all about it; or did you know without his telling you?—He told us; we did not know till he told us.

12,547. And did he explain to you all the details and circumstances, and the reasons why he asked your assistance?—He came to get some money from us and we gave him some money, because they were in distress.

12,548. And he told you why they wanted it?—To defend those men.

12,549. Who were accused of the murder of a man named Jump?—Yes.

12,550. He told you that it was connected with the trade union outrages?—He did not tell us that it was connected with the trade union outrages, but that the men were taken up and that they wanted to defend them.

12,551. But that it was connected with trade union matters, and that so he claimed your assistance?—Yes.

12,552. We understand that he left the meeting, having told you that; you knew all about it from the papers, I suppose, without his telling you much?—Yes, we had all seen it in the papers.

12,553. Then they left the meeting and you took it into your full consideration, did you not?—Yes.

12,554. And as it was a trade union matter you agreed to subscribe a certain sum?—Yes.

12,555. How much was it?—I cannot exactly say whether it was 10*l.* or 20*l.*

12,556. Were you secretary at the time?—No.

12,557. The secretary would make an entry in the book, would he not, of a subscription for the defence of so and so?—Of course he would.

12,558. It would be his duty to do that would it not?—Yes.

12,559. Or would he put it down as "cash"?—I cannot tell you how he would put it down.

12,560. Do you remember Greaves's place being blown up, and some injury being done?—Yes, I heard talk of it.

12,561. You heard a good deal of talk of that, did you not?—Yes.

12,562. You were in office at that time as secretary, were you not—No, not at Greaves's time.

12,563. Then what is the time you are thinking of?—I was in office nine months afterwards.

12,564. But was it the time are thinking of when you remember something being done when you were secretary. You are bound to tell us the whole truth? I cannot say whether it was in Greaves's time or not, but to the best of my knowledge it was at the time when I was secretary.

12,565. You were secretary then?—Yes.

12,566. What did you hear of the outrage at that time?—I heard of a shell being thrown into his house.

12,567. Did the shell burst?—I cannot tell you.

12,568. But you heard of its being thrown into his house?—Yes, I heard of it.

12,569. Have you any idea why it was thrown in?—No, I have not.

12,570. It quite astonished you?—I had no idea of it.

12,571. And you had not at the time?—No, I never heard anything about it until after the occurrence.

12,572. Was it talked of at your meeting?—Not before it happened.

12,573. But after it happened?—I heard it talked over several times after in many a place.

12,574. Nobody had any idea why it was done?—No, I never could hear why it was done.

12,575. Still it was an interesting subject to the meeting I suppose?—I heard it talked about.

12,576. At your meeting at the "Volunteer Inn"?—I heard it talked of in the house of course many a time.

12,577. Was there any money paid about that time as "cash"?—No, I was secretary and there was no money paid at that time.

12,578. Not as cash?—No.

12,579. Nothing of the sort?—No, there was not. I made no entry at that time of any cash, only turn-out money and so on.

12,580. Do you remember some money being brought to the Oldham union by a man named James Kay; you know him pretty well, do you not?—I know him by eyesight, but I was never acquainted with him.

12,581. But your eyesight is pretty clear upon that point, is it not?—I know him, I have seen him.

12,582. Have you seen him at the Oldham union?—I have seen him at the club-house.

12,583. Often?—No, not often.

12,584. He was not a member of your union, was he?—No.

12,585. He was a member of the Manchester union, was he not?—Of course he was.

12,586. What was he doing at your club-house when you saw him?—I saw him there once on our yearly day.

12,587. Was there a meeting at the time when he came?—No.

12,588. Have you seen him more than once?—No, I have never seen him but once.

12,589. Did you ever know him bring you any money?—No, I have never known him to bring any money.

12,590. You never knew that he brought money to the union?—No, I did not see him bring any money, but I heard of his bringing the money.

12,591. What did you hear of his bringing?—We had a turn out at one time, and he brought money at that time.

12,592. What did he bring?—Well to the best of my knowledge he brought 100*l.*

12,593. So that you had a turn out at that time, and Kay brought you 100*l.*?—Yes.

12,594. It was a pretty heavy turn out, was it not?—Yes.

12,595. What did that turn-out cost your union?—A good deal of money.

12,596. And did you send to ask the Manchester people to assist you with money?—Yes.

12,597. And so Kay came and brought you 100*l.*?—Yes.

12,598. Did any other union send you some money?—Yes, we got money from other parties.

12,599. From what other parties?—From the Ashton people.

12,600. What did they give you?—I cannot tell you exactly.

12,601. But you remember Kay's 100*l.* very well?—Yes, it was a large sum; I cannot tell you what any other party else gave us, but we got money from different people.

12,602. What other union gave you money?—We got some from Stockport, and we got some from Wigan, and different other places, and from Sheffield too.

12,603. Did you send after the money?—Yes, we sent.

12,604. You sent a delegate after the money?—Yes.

12,605. And you sent the delegate to Ashton, and I suppose to Stockport?—Yes, of course we did.

12,606. And to Sheffield and Liverpool?—Yes.

12,607. And to St. Helen's?—Well, I do not just remember whether any came from St. Helen's or not.

12,608. Do you think you sent there?—Well, I do not know; I cannot tell you for truth.

12,609. Is it likely, do you think, that you sent there?—It might be.

12,610. You will not swear it was not so?—No.

12,611. Did you send to Birkenhead?—No.

12,612. What was this great trouble you got into, that you had got this 100*l.* for from Manchester; was it merely a turn out?—A turn out for wages.

12,613. Nothing else?—Nothing else.

12,614. In what year was it?—That I cannot tell you.

12,615. Was it when you were secretary?—No, I cannot tell you what year it was in.

12,616. There was a great deal of trouble that year, was there not?—Yes.

12,617. What was the turn out about?—It was for wages.

12,618. It was to raise your wages, was it?—We wanted an advance of wages.

12,619. How long did the turn-out last?—It lasted for many a month.

12,620. And it cost your union some money?—Yes.

12,621. Have you any idea how much it cost you?—I cannot exactly say how much, but it cost us a deal of money.

12,622. More than 100*l.*?—Yes, a vast deal more.

12,623. Do you think it cost you 300*l.*, or 400*l.*, or 500*l.*?—I do not know whether it amounted to that; I cannot say.

12,624. And you got the money in this way from different unions?—Yes.

12,625. How would the application of that money appear; would the books show it?—Of course, the books would show that we received this money and paid it for turn-outs.

12,626. The books ought to show how the money was paid, at all events, ought they not?—Yes.

12,627. How would it be entered; would it be entered as turn-out money?—Yes, turn-out money.

12,628. Was that the favourite mode of entering it, "expenses?"—Turn-out money; there would be a good deal to pay. The delegates would have to be paid their wages while they would be claiming this money.

12,629. It was a large sum of money you know; do you think it all went in paying turn-outs?—I cannot tell you, but I think it did all go for that purpose.

12,630. Were there a good many unpleasant things happened at that time?—Not that I know of.

12,631. Did you not hear talk of them?—I could not hear of anything happening at that time.

12,632. You never heard of any bricks being spoiled?—I have heard of bricks being spoiled, but not at that time.

12,633. Was it before or after that that you heard of the bricks being spoiled?—There were some after that.

12,634. Did you ever hear of anything else being done besides this shell that you have mentioned?—No.

12,635. No bottle with a fuse?—No.

12,636. Nothing of the kind?—I did not hear of it.

12,637. You never heard of that at all?—No, never.

12,638. Did you ever hear of a shed being fired?—Yes, I have.

12,639. There was nothing of that sort done in your time, was there?—No.

12,640. Not when you were secretary?—No.

12,641. Did you pay any "cash" about that time?—No, I did not.

12,642. How long did you say you were secretary?—I was secretary for about nine months, I think it was.

12,643. And how much more than that?—I was four years secretary at the first commencement of the club. There was one secretary before me, and then I was secretary, and I served four years then.

12,644. And after that you ceased to be secretary, and then you were secretary for nine months?—Yes.

12,645. Did the same book last you for the four years that you were secretary?—No.

12,646. How many cash-books had you in those four years?—I had two.

12,647. Were they small books then?—Yes, small books.

12,648. And you filled one in two years?—Yes, I filled one. There was one when I commenced, and then I got another, and it was nearly full when I left. There were two in my time.

12,649. Then you had another when you were secretary for the nine months?—Yes, a different volume.

12,650. Are all those books kept?—They were destroyed or thrown away when they were full.

12,651. They were destroyed as being of no use?—Yes.

12,652. Were they burnt?—Yes.

12,653. Did you burn yours?—Yes.

12,654. What made you burn it?—Because I thought it was of no use when it was full.

12,655. How many books have you burnt in your time?—I have burnt one, that is all; the second was not full when I left.

12,656. As soon as it was full you burnt it?—Yes.

12,657. When you left office if it was full you burnt it?—Yes.

12,658. That has been the habit of the society, has it?—Well, I did it, however.

12,659. And you did before as they have done who have come after you?—Yes.

12,660. And it is a regular rule of your society, is it, to burn the books when they are full?—I did it.

12,661. Is that the general rule with all the books?—I cannot tell you how it was after my time.

12,662. But up to your time were all the books that were full burnt?—After my time I cannot tell.

12,663. But up to your time?—Yes, up to my time they were.

12,664. It was a sort of rule of the society that all the books that were full were burnt?—Yes.

12,665. And that rule, as far as you know, has been acted upon ever since?—Yes, as far as I know they thought they were no use; they were only lumber.

12,666. Which was the last burning at which you were present?—I was not present at any burning, only at the one I burnt myself. I was not present at any since.

12,667. Have they told you that they have burnt any books lately?—No.

12,668. You have not heard it mentioned of course?—No, I have never heard anything mentioned about it.

12,669. I think you told me that the secretary was not a member of the council?—No.

12,670. When fines were levied were they paid to the secretary?—Yes.

12,671. Who had the right to levy the fines?—It was left to the council, they were summoned before the council.

12,672. Where the council the only people who levied the fines?—Yes, if they complained of the fine afterwards it was brought before the quarterly or general meeting, and it was left to them whether they would agree to the fine or not.

12,673. Supposing a man was fined because he was working with people not belonging to the union, was that brought before a general meeting?—I never knew any one to be fined for that.

12,674. You do not remember any case of the kind?—No.

12,675. Do you remember any man being fined for working with non-union men?—No.

12,676. Do you remember a carter of the name of Wogden being fined?—No; I never knew a man of that name.

12,677. What were men fined for?—They were fined for working under wages.

12,678. Suppose a man was fined for working under wages, was he fined by the council or by the general meeting?—Sometimes it was brought before the general meeting, and sometimes before the council.

12,679. Have you ever known a fine of 10*l.* levied?—Never.

12,680. What is the largest fine you remember?—10*s.* or 5*s.*, and some fines may run up to 1*l.*

12,681. What was that for, do you remember?—No.

12,682. Would it be the duty of the secretary to make an entry of that?—Yes, it would be.

12,683. And to whom was the fine paid; to the secretary?—To the secretary of course.

12,684. Were there many fines in the course of the year, do you remember?—Sometimes there would be

TENTH DAY.

W. Connell.

16 Sept. 1867.

not very many. I cannot remember that particularly; my memory is very bad in regard to that.

12,685. If the fine was not paid I suppose the man was turned out, was not he?—Yes, they would put him out of benefit after a certain time.

12,686. Then you turned him out?—Yes.

12,687. Did men pay money to your union for the liberty of working at your trade?—Yes, they would have to pay a certain amount when they entered.

12,688. You would not allow men to work for your trade if they were not members of the union?—No.

12,689. If they did not do their duty, what happened?—That is immaterial to me.

12,690. Were they turned out?—There was many a time an occasion for a turn out.

12,691. Would you let any man into the union who liked to join?—Yes, any man who came forward.

12,692. And who would pay?—Yes, and was likely to be a man who could do his work.

12,693. You told me you thought you were secretary when the outrage was committed upon Greaves?—Yes.

12,694. That was in 1859?—Very likely it might be.

12,695. Do you remember an outrage being committed upon a man named Holt the same year?—I remember there was an outrage committed, but I cannot say whether it was that year or not.

12,696. But you remember there was an outrage?—Yes.

12,697. Do you remember that his shed was set on fire?—Yes, I heard of it.

12,698. Are you sure that nothing was paid to anybody who did it?—Not that I know of.

12,699. Not that you know of?—No, not to my knowledge there was not.

12,700. If any man did any service of that sort to the union, I suppose your union paid him, not you individually?—I cannot say whether he was paid by our union or not, because I never paid any money myself.

12,701. You never paid any money yourself?—No.

12,702. It would not be your place, it would be the treasurer's place to pay it?—It was never done, to my knowledge.

12,703. But what the treasurer paid the money for you do not know?—No.

12,704. Do you remember in the same year some bricks being destroyed belonging to Mr. Smethurst?—I heard of that also,

12,705. These things were pretty common at that time, in 1859?—They were things that had been committed.

12,706. And your union had nothing to do with them?—I cannot tell you whether they had or not. I cannot answer you perfectly because I did not know of it, therefore not knowing I cannot tell you.

12,707. Those places, Holt's and Smethurst's, were in your union district?—Yes.

12,708. And Greaves's?—Yes.

12,709. Were they brought before the notice of your meeting?—I heard of them after they were committed.

12,710. Was it discussed at the time?—I heard of it after.

12,711. I suppose when any outrage was committed within your district, it was a natural subject of discussion at the union meeting?—It was talked about, of course; it was a public thing in the town.

12,712. And you discussed public matters of that sort?—Yes, of course it was talked about.

12,713. Who did you say was treasurer when you were secretary in 1859?—It was Daniel Wyld.

12,714. Was any person treasurer besides him?—No, not at that time.

12,715. But during the four years you were secre-secretary was Daniel Wyld treasurer all the time?—Yes.

12,716. Who was the president during four years that you were secretary?—There were different presidents.

12,717. You have told me out of their names?—A man of the name of Heckford was president.

12,718. And Nolan?—No, I do not think Nolan was in my time.

12,719. He was president afterwards?—I do not know whether he was president. I do not think Nolan was ever president.

12,720. Who was president when you were secretary the last time for nine months?—Thomas Robinson.

12,721. Was Robinson president?—Yes.

12,722. Who was treasurer?—It was John Lord for the last time.

12,723. You have told me that the sum which Kay gave you was 100*l.*, and that you went round to get subscriptions for the payment of turn outs?—Yes.

12,724. Will you swear that there were turn outs at the time in your district?—Yes.

12,725. Mention to me where they were?—I cannot exactly tell where they were.

12,726. It is a large sum of money; and you sent delegates round?—There were turn outs at the same time upon Ashton Road.

12,727. How many men?—Five stools were working there at the time.

12,728. And there were three men to a stool?—Yes.

12,729. That is 15 men?—Yes.

12,730. Was that in 1859?—Yes.

12,731. The same time that the shell was thrown at Greaves?—I cannot say whether it was at the very same time.

12,732. Was that the same time when you sent the delegates round to get money from the other unions?—Yes, it was.

12,733. It was?—Yes.

12,734. It was the same time when there was a turn out of 15 men on the Ashton Road?—Yes.

12,735. What other turn outs were there at the time to which this money was applied?—There was a machine taken up to make bricks, and that was the cause of the turn out of the union.

12,736. Who got up the machine?—I cannot tell; there was a company at the time.

12,737. They of course did not employ union men?—No.

12,738. There was no turn out there?—That was the cause of it.

12,739. If they did not employ union men there was no turn out?—One man was working there before that, and of course when they had nothing to do they were upon the club.

12,740. I do not understand that; there was a machine-making company there?—Yes, and they would not employ union men at the work.

12,741. Did they ever employ union men?—Yes, before that they did.

12,742. How many men did they employ?—I cannot say how many; there were five stools making bricks.

12,743. That is 15 men again?—Yes.

12,744. Was that at the same time?—Yes.

12,745. You have now told me of 30 men; were those turn outs going on at the same time?—Yes.

12,746. That you swear?—Yes.

12,747. Were there no other turn outs?—Not that I can tell you of; I cannot recollect at present.

12,748. And you mean to swear that you paid the money out of the funds of your own union, and you sent delegates round to get money from the other unions in the way you have said, merely to pay these 30 men for a turn out?—Yes.

12,749. What did you pay them?—12*s.* a week.

12,750. Three stools would be nine men. I was wrong in putting it at 30, it was only 24; were those the only men on turn out at that time?—Yes.

12,751. And you swear that because 24 men were out at the time you sent delegates round to all these different unions to collect money. You have told me upon your oath that you sent delegates round to these different unions which you have

mentioned, that Kay from the Manchester union brought you as much as 100*l.*, and that it cost you a good deal; I asked you how the money was spent, and you said in turn outs, and the only turn outs you can mention are three stools in the one case, and five in the other. Just take care what you are about. —There were more expenses besides turn outs.

12,752. I can quite understand that; I ask you what the other expenses are. Do you mean to tell me that these subscriptions were to pay for the turn outs; were there any other expenses?—The men were going round.

12,753. You pay them of course; but here you sent delegates round to other unions, and one union sent you as much as 100*l.* I ask, how do you account for it, and you say it was to pay the turn outs at the time; mind what you are doing.—The turn outs were on some months.

12,754. Was that money solely employed for paying for the turn outs and the expenses of the delegates who went round?—I cannot say whether the whole of it was for that; they gave it to us for that purpose.

12,755. You swear that you know of no other purpose to which it was applied?—Yes; I do not know any other purpose to which it was put at the time.

12,756. And you do not know of any other?—No; I am positive it was never used for any other purpose at the time.

12,757. What period of time did this money take you to collect; was it all collected in 1859?—I cannot tell you that.

12,758. Will you swear that the sole purpose for which the money was collected was to pay for the turn outs?—Yes.

12,759. And for nothing else?—For that purpose and nothing else.

12,760. You were not put to any other expense at the time?—Not at the time.

12,761. Would your books that you have taken care to burn have shown how that money was spent?—I cannot tell you anything about that.

12,762. Yes you can. You were secretary at the time, and it was your duty to put it down. Would your books have shown how the money was spent if you had not burnt them?—I burnt them.

12,763. Would they have shown how the money was spent that you sent round delegates to collect? You shall answer that question.—I cannot answer it any further than that the money was collected and we paid the turn outs, and the rest remained in the general fund; that is, any balance that was over after paying them.

12,764. Would your books which you have burnt have shown how that money was spent?—Yes, of course.

12,765. They ought to have shown it?—Of course, and they would.

12,766. How much money did you collect as well? —I cannot tell you.

12,767. You got as much as 100*l.* from the Manchester union?—Yes.

12,768. Do you remember delegates ever being sent round before to collect money from the different unions? —No.

12,769. Then I should have thought that this special occasion would have impressed itself upon your memory?—I do not know that.

12,770. Have you taken care to forget?—No, but I do not remember it.

The witness withdrew.

WILLIAM BOURNE sworn and examined.

W. Bourne.

12,771. (*Chairman.*) Have you been in court while this inquiry has been going on?—Some few minutes I was.

12,772. While the last witness was being examined? —No.

12,773. You did not hear any witness examined? —No.

12,774. I understand that you are secretary of the Oldham union?—I am.

12,775. When were you elected?—Two months ago.

12,776. How long are you going to be secretary? —I do not know.

12,777. How long is your usual term of office?— Six months.

12,778. You were elected two months ago?—Yes.

12,779. How long have you been a member of the society?—12 or 14 years.

12,780. Have you filled any other office at any other time?—No.

12,781. This is the first time?—Yes.

12,782. Did you succeed the last witness?—I did not see him.

12,783. William Connell?—I did not.

12,784. Whom did you succeed?—Thomas Nolan.

12,785. As secretary?—Yes.

12,786. Who is the president now?—George Haywood.

12,787. Was he elected president at the time you were elected secretary?—No.

12,788. When was he elected president?—I do not know how long.

12,789. Five or six months ago?—Yes it would be that, I dare say.

12,790. Twelve months?—I think it was about six months ago.

12,791. You have been in two months?—Yes.

12,792. How many meetings have you attended, every fortnight?—Several meetings.

12,793. They are held every fortnight?—The club meeting is held every fortnight.

12,794. Are the club meetings held every fortnight? —Yes.

12,795. Have you any other meetings besides the fortnightly meetings?—Whenever they are required.

12,796. May anybody who likes call a meeting?— No.

12,797. Who has the right to call a special meeting? —The district man.

12,798. Who is he now?—It depends upon what district he is in.

12,799. Does any district man call a meeting of the whole club?—No.

12,800. I do not quite understand you; how many district men have you in your union?—We have four.

12,801. Then there are four districts in your union? —Yes.

12,802. May any one of those district men call a general meeting?—Not without the sanction of a district meeting.

12,803. There are district meetings are there, besides the general meetings?—Yes.

12,804. If the district meeting wish to have a general meeting, then the district man calls it?—Yes.

12,805. Has that often happened?—Not so very often.

12,806. Upon something very special?—I cannot say that.

12,807. You never were a district man?—No.

12,808. As secretary you have attended every meeting every quarter?—Yes.

12,809. What are your duties as secretary?—To take contributions, that is all.

12,810. You have not forgotten your duties yet?— No, I think not.

12,811. Is it your duty to make entries in a book? —Yes, of what contributions I receive.

12,812. Is that all?—Yes, that is all.

12,813. We have heard of other secretaries who did more than that; is that all you have done since you have been in office?—Yes.

12,814. Then you have never had any other book except the one in which you enter the contributions? —It is called the cash-book and contribution book.

12,815. Is that the same book?—Yes.

TENTH DAY.

W. Bourne.

16 Sept. 1867.

12,816. We have heard of a ledger?—We had a leager.

12,817. You laid a stress upon the word "had." I suppose that is gone now?—Yes.

12,818. When did it go?—On last Tuesday night.

12,819. Were you present?—I was not.

12,820. It went the way of the fire?—No.

12,821. How did it go?—When I was served with a summons, the sergeant from Royton, and another man came with him, but while they were serving me with a summons we were sitting upstairs.

12,822. Where?—At the club-house.

12,823. The "Volunteer Inn"?—Yes, and during the time they served me with this summons the sergeant from Royton detained me in the room, asking me several questions, and during the time I was in the room some party took the book while I was upstairs.

12,824. Were you in the club-room?—No.

12,825. Where were you?—I was with the sergeant from Royton.

12,826. Where was the book?—It was upstairs.

12,827. And you were upstairs?—No, I was not.

12,828. The book was upstairs?—It was when I left it there.

12,829. And when you were with the sergeant the book went?—The book went while I was away.

12,830. It was burnt?—No, I cannot say what was done with it; I have not seen it since.

12,831. And you are not likely to do so?—Never again, I think.

12,832. Who had it upstairs?—I do not know; when I was called downstairs by the sergeant I left the book on the table.

12,833. Whom did you leave in the room?—The room was full.

12,834. Was that the last club meeting?—Yes.

12,835. Was the president in the room?—I cannot say that.

12,836. You cannot remember whether the president was there or not?—No.

12,837. Had you taken your place as secretary then?—No.

12,838. You had no time to look round?—I had only got in the room when they served me with the summons, and I had the book with me.

12,839. You took the book upstairs and put it on the table?—Yes.

12,840. Did you know that these men were coming after you?—No, they took me by surprise.

12,841. Did they come into the room?—No, they sent for me downstairs.

12,842. Had you seen them before you went upstairs with the book?—No.

12,843. You did not know that they were coming?—No.

12,844. You had no idea of it?—No, not the least.

12,845. It so happened that you took the book upstairs?—I went to attend the meeting.

12,846. Did you take any other book upstairs?—No.

12,847. What book did you call that?—The ledger.

12,848. You took the book in?—When the sergeant called me downstairs I left the book on the table and went downstairs.

12,849. You threw the book on the table?—Yes.

12,850. And from what you hear you do not think that you will ever see it again?—I do not think I shall.

12,851. What did the book contain?—Nothing but the names of the members.

12,852. There was no harm in it?—No.

12,853. Not the slightest?—No.

12,854. There was no reason in the world why the whole world should not see it?—No.

12,855. Can you give any reason why it should be taken away?—No.

12,856. It does not strike you in any way?—No.

12,857. Was it full?—No.

12,858. How many years did it cover?—Two years.

12,859. There were only the contributions in it?—Yes.

12,860. The weekly contributions?—The fortnightly contributions.

12,861. And the names of the members?—Yes, and the contributions received.

12,862. And the name of the treasurer, secretary, president, and so on?—No.

12,863. Do you not put your names down?—No, they were not booked as secretaries, they were only booked as common members.

12,864. Did you describe them in the book except by their real names?—No.

12,865. There was nothing else?—No.

12,866. Did the names of the council appear in the book?—No.

12,867. You have nine gentlemen on the council? Occasionally, as occasion requires them.

12,868. There are now?—If the occasion requires them there are.

12,869. Does the occasion require it generally?—If there is any disturbance in the room there is a council required.

12,870. Or if there is a disturbance anywhere else?—No.

12,871. But there is a council generally?—Occasionally.

12,872. We are told that nine persons are selected as the council?—I did not say so.

12,873. You have said nothing, you do not recollect anything, but there is a council at this moment is there not?—No, there is not a council at this present time.

12,874. Have you ever been a council man?—No.

12,875. Never at all?—I will not say never, because I have acted as a substitute.

12,876. Whose substitute were you?—I do not know.

12,877. You do not in the least know?—Not at the present time.

12,878. Is it so long ago?—No.

12,879. How long ago is it?—Within the 12 months.

12,880. And you do not know whose substitute you were?—No, they do not tell you whom you are substitute for.

12,881. You were somebody's substitute?—Yes, but the name is not mentioned.

12,882. And you have no idea who it was?—No, I never asked, it is not any business of mine to ask.

12,883. And you have no notion?—No.

12,884. Did you act with anybody else when you were a substitute?—Yes, with the other members.

12,885. Who were the other eight members at the time?—I cannot exactly say.

12,886. Do you mean to swear that within the last 12 months you do not remember who the other eight members were with whom you acted?—No.

12,887. Not a single name?—No.

12,888. You do not remember a single name of a single person with whom you acted?—No, not a single individual.

12,889. I merely caution you; if you are guilty of perjury you will probably be punished for it, and you do not get out of it by saying that you do not recollect?—That is the truth; I do not recollect.

12,890. If it should be a falsehood that you do not recollect, and you do recollect, you are just as likely to be punished for perjury as if you said anything else more direct. Now I ask you whether you do not recollect the name of any one of the council with whom you acted?—No.

12,891. How long ago is it?—It is not within the last 12 months.

12,892. Can you remember any measure that was brought before the council?—I can remember one measure that was brought before the council, it was fighting; that was the only measure discussed at the meeting.

12,893. You do not remember any other?—I do not recollect any other but that.

12,894. How often did you meet when you were a substitute in the council ?—Only once.

12,895. Did you meet at the "Volunteer Inn"?—Yes.

12,896. And you only met once ?—Only once when I was on the council.

12,897. That was the only time that you acted upon the council ?—Yes.

12,898. And there was nothing brought before the council except what you have mentioned ?—Fighting and swearing, there was nothing but that.

12,899. Have you the power of fining for those offences of fighting and swearing ?—No.

12,900. What did you do ? Supposing it was brought before you, what had the council to do with fighting or swearing among the members ?—Whatever was put to the meeting, it would be decided by the majority of the meeting whether they were fined or not.

12,901. Have you as a council the power of fining for those offences that you have mentioned ?—The council have.

12,902. But you were sitting on the council at the time ?—Yes.

12,903. Was that all that was brought before you ?—Yes.

12,904. Is it usual if a question of fining takes place for it to come before the council ?—Yes.

12,905. Not before the general meeting ?—No, it is left to the council.

12,906. Any case of fining ?—Yes.

12,907. If any man is fined for working with non-union men, does that come before the council ?—They do not work with non-union men.

12,908. But if they did ?—They do not do.

12,909. We have heard of men being fined because they do not belong to your union, or because they have had to do with matters with which the union has not to do ?—They do not act with non-union men.

12,910. Do you ever fine for any matters that are an offence to your union ?—An offence as far as this, that if they leave a job before the time has expired we fine them.

12,911. If they work for less wages than the other men are getting, do you fine them then ?—If they receive less wages we turn them out.

12,912. Do you fine them first ?—No.

12,913. You turn them out at once ?—Yes.

12,914. For what do you fine them ?—Only leaving jobs, fighting, or swearing.

12,915. You do not fine them if they are doing work for non-union men ?—We do not allow it.

12,916. You turn them out ?—Yes.

12,917. Did you ever fine a man who was not a union man ?—No.

12,918. You never heard of such a thing in your union ?—No, we have nothing to do with them at all.

12,919. You never take any notice of them ?—No, not the non-union men.

12,920. Do you take any notice of men who are making bricks by machinery ?—No.

12,921. You never heard of such a thing as that ?—What ?

12,922. Of anything being done to men who make bricks by machinery instead of by hand ?—No.

12,923. That is quite new to you ?—Yes.

12,924. You never heard of such a thing ?—No, I know of no transaction of the sort.

12,925. You mentioned the destruction of the subscription-book ; was that the book in which you made entries ?—I have not said that it was destroyed.

12,926. You said that you did not expect to see it again. Was that the book in which you made entries as secretary ?—So far as my term of office went I booked all the contributions.

12,927. Was the book which you left on the table, and which you do not expect to see again, the book in which you yourself, since you have been in office, have made entries ?—Yes.

12,928. Was it the only book in which you made entries ?—Yes.

12,929. You never made any entries in any other book ?—No.

12,930. Were the only entries that you made in that book contributions ?—Yes.

12,931. Supposing there had been any fine, would it have been your duty to make an entry of it ?—Not in that book.

12,932. In what book would you enter a fine ?—In the fine book.

12,933. That is a separate book altogether ?—Yes.

12,934. Is it the duty of the secretary to make entries in the fine-book ?—Yes.

12,935. You have the fine-book ?—Yes.

12,936. Have you got it now ?—Yes.

12,937. Have you it with you ?—Yes, it is in my pocket.

12,938. Will you produce it ? (*The witness produced the same.*) This is your present fine-book ?—Yes.

12,939. Does it contain nothing but fines ?—Nothing but fines.

12,940. All these names I see here are for nothing but fines ?—No.

12,941. I see here that there are fines for men changing their jobs ?—Yes, as I have described before.

12,942. Do you fine men upon their marriage ?—Yes, I believe we do.

12,943. How much do you fine a man upon his marriage ?—I do not know.

12,944. In addition to this book of fines have you any other book ?—Yes, I have.

12,945. What is the other book ?—A contribution book.

12,946. That you have told me of ; that is the book which you left on the table ?—No, that is the ledger.

12,947. I thought the ledger was the book in which you entered the subscriptions ?—Yes, what they pay—weekly subscriptions—not the other sum.

12,948. What is the other book ?—It is here (*producing the same*).

12,949. This is the fortnightly subscriptions ?—Yes.

12,950. You have kept this book of fines, and the contribution book which you did not mind our seeing, but you have lost the other ?—Yes.

12,951. What is this ?—This is the contribution book.

12,952. Here are disbursements ?—Disbursements and contributions received.

12,953. The contributions on the one side, and the disbursements on the other ?—Yes.

12,954. This book has just begun ?—It is 1866, I think.

12,955. Are there any books now existing used previously to 1866 ?—No.

12,956. What has become of them ?—They are destroyed.

12,957. They are all destroyed ?—Yes.

12,958. Were they destroyed before you came into office ?—They must have been.

12,959. You never saw them ?—I never saw them.

12,960. You never saw them since you held any office ?—No.

12,961. Did the books which were destroyed contain any account of disbursements ?—Yes, the same as that book.

12,962. Does that book contain all the disbursements ?—Yes.

12,963. Is it the duty of the secretary to enter all the disbursements ?—Yes.

12,964. Have you mentioned to me all the cases in which the men are fined ?—I believe I have.

12,965. Do you know a Mr. Smith, of Ashton ?—I do not know him.

12,966. Do you remember hearing whether a man of that name was fined last week for burning a kiln ?—I do not.

12,967. Did you ever hear of a man of that name being fined for burning a kiln ?—No.

12,968. Never in your life ?—No.

12,969. That you swear ?—Yes.

12,970. Did you ever hear of any man being fined for burning a kiln ?—I never heard that.

TENTH DAY.

W. Bourne.

16 Sept. 1867.

12,971. Did you hear of him being fined for anything ?—Last week ?

12,972. Yes; or the week before ?—No.

12,973. Did you never hear of a man of the name of Smith, of Ashton, being fined ?—No, at no time.

12,974. You never did ?—No.

12,975. That you swear ?—Yes.

12,976. You will swear that you have never been in any office except that of secretary ?—Yes.

12,977. Did you ever hear of any outrages being committed in your district ?—No.

12,978. Were you a member of the union in the year 1859 ?—Yes.

12,979. Did you ever hear of a shell being thrown at a man of the name of Greaves ?—I heard of it at the time.

12,980. You were a member of the union at the time ?—Yes.

12,981. That was not at all connected with any union matter ?—Not that I am aware of.

12,982. You have no notion that it was ?—No.

12,983. Did you hear of Holt's shed being set on fire in that year ?—Yes.

12,984. That had nothing to do with the union ?—No.

12,985. Did he employ union men or non-union men ?—He employed no sort of men at the time.

12,986. You have no notion why it was set on fire ?—No.

12,987. Did you ever hear of Smethurst's bricks being destroyed ?—Yes.

12,988. Were these matters discussed at the meeting ?—I never heard of them at the meetings.

12,989. You never discuss these matters at the meetings ?—No, we have rather more sense.

12,990. If the last witness says he heard them mentioned at the meeting at the "Volunteer Inn," your memory is not so good as his ?—Did he remember them?

12,991. You must answer my question; if he has said that he remembers those three subjects being mentioned at the meeting, your memory is not so good as his, or he is mistaken ?—If he says that he heard them, I cannot say that I have.

12,992. You never heard them; you swear that ?—Yes.

12,993. I caution you, you are on your oath ?—Yes.

12,994. As far as your memory goes you do not recollect their being mentioned ?—No.

12,995. Nor any other outrage ?—No, only by public report.

12,996. You recollect Holt's shed being fired ?—Yes.

12,997. Did you see it ?—Yes.

12,998. Had Holt adopted you in any way; had he acted like a father to you ?—Yes.

12,999. Had you lived with him ?—Yes.

13,000. You saw his shed on fire ?—Yes.

13,001. Did you assist to put it out ?—No.

13,002. Had you before that worked with him ?—Yes.

13,003. Why had you left his work ?—Because there was a disturbance between him and the men.

13,004. What about ?—He would not pay 2*d.* a 1,000 for new cast clay.

13,005. Is that 2*d.* per 1,000 in addition to what he paid before ?—Yes.

13,006. Was there a strike in consequence ?—No.

13,007. You left him in consequence ?—Yes, we left him before we would do it.

13,008. Did you leave him ?—I did at the end.

13,009. How long had he treated you as an adopted son ?—17 or 18 years.

13,010. Had you worked for him during that time ?—Most of that time.

13,011. And because he would not allow 2*d.* extra you left him ?—Yes.

13,012. And you stood by and saw his shed on fire and did not help to put it out ?—Yes.

13,013. Were you a member of the Oldham union when there was a subscription got from the other union, when delegates were sent round to other unions ?—I believe I was.

13,014. What was that money wanted for ?—For an amalgamation.

13,015. For what purpose did they want the money ?—The purpose was to help destitute members when they were out of work.

13,016. Had it ever happened before that you had sent round delegates for money ?—We never sent round any delegates ourselves.

13,017. Did you not send anyone round ?—No; parties have been sent to us.

13,018. Did you, the Oldham union, get any money from the other unions ?—No, not that I know of.

13,019. Will you swear that ?—I will swear that I do not know it.

13,020. Will you swear that you never heard of your Oldham union getting money from the other unions ?—Not that I know of.

13,021. Will you swear that you never heard of it ?—I will.

13,022. Will you swear that you do not remember a person named James Kay bringing 100*l.* to your union from the Manchester union ?—I will.

13,023. Did he bring anything ?—I do not know.

13,024. Do you remember your union asking for money from the other unions ?—I do not know that.

13,025. You never heard of the Oldham union obtaining money from the other unions ?—Not to my recollection.

13,026. You swear that you do not remember it ?—No.

13,027. And you never heard of it ?—No.

13,028. You say that there was an amalgamated fund; is that fund solely employed for the purpose of assisting persons when they are out of work ?—Yes.

13,029. That is all ?—Yes.

13,030. For no other purpose ?—No.

13,031. Did you ever hear of your union supplying money for the defence of persons who were accused of murdering Jump ?—I never heard of it.

13,032. That you swear ?—Yes.

13,033. How long have you been a member ?—12 or 14 years.

13,034. You never heard of your union subscribing any money for the defence of the persons accused of that murder in the year 1862 ?—Not to my recollection.

13,035. Will you swear that you never heard that money was paid for the defence of the persons who were accused of having committed that murder ?—I cannot say what the money was paid for.

13,036. How do you know of a sum of money being paid ?—I do know of parties coming round, but I do not know what it is for.

13,037. You remember parties coming round ?—I remember hearing of them coming round.

13,038. How did you hear that the parties came round to your union ?—For collecting this amalgamation money.

13,039. For what purpose ?—I do not know,

13,040. You have not the slightest notion ?—Only to help destitute members.

13,041. Did you ever hear of parties coming round to collect money for the defence of those men who were guilty of the murder of Jump ?—No.

13,042. You never heard of your union subscribing ?—No.

13,043. You swear that you never heard of it, and that you never heard of your own union sending round delegates to get money from the other unions ?—Not to the best of my recollection.

13,044. Will you swear that you never heard of it ?—No, I do not know of any member of ours going round for any contributions.

13,045. And you do not remember receiving any contributions ?—I have only been upon the books 12 months.

13,046. You were a member of the union 14 years ?—Yes, but I was not compelled to pay constantly to the union.

13,047. Do you recollect that your union ever received money ?—No, I do not.

13,048. And you never heard of it ?—No.

The witness withdrew.

GEORGE HAYWOOD sworn and examined.

13,049. (*Mr. Barstow.*) Are you the president of the Oldham Brickmakers' Society?—Yes.

13,050. When were you elected?—It will be six months when the quarter is up, that will be next Saturday night.

13,051. You have been president nearly six months?—Yes.

13,052. You generally take the chair at the meetings?—Yes.

13,053. Were you present at a meeting of your society last Thursday night?—Yes.

13,054. And I suppose you were in the chair?—I went up and should have been in the chair if the police had not fetched me down.

13,055. You were at the meeting?—I was at the beginning, and the officers took me down and kept me there till it was over.

13,056. Did the officers come for you?—It was all over when I came out of the room with the police.

13,057. Did the officers bring you a summons?—Yes.

13,058. Where did they take you?—Into the bottom room.

13,059. Had the meeting begun when the officers came to you?—It was just starting. I should have opened it but I was not there to open it; they fetched me down before it had opened.

13,060. Then it had not begun: had you taken the chair?—I should have done so if the officers had not fetched me down.

13,061. Had you taken the chair when the officers came for you?—I was just getting seated in the chair.

13,062. Were the books belonging to the lodge out on the table?—The ledger was there to call the names over.

13,063. Were there no other books?—No.

13,064. Is it your duty to call the names over?—No.

13,065. Who calls the names over?—The secretary.

13,066. When you returned the meeting was over?—Yes.

13,067. Do you know who had been in the chair?—No.

13,068. You do not know?—No.

13,069. You did not inquire who called the names over?—No.

13,070. And you have not inquired since?—No.

13,071. When you came back was the ledger there?—Yes, on the desk.

13,072. Did you put the ledger in the safe?—I had nought to do with the ledger; it is not my business to meddle with the ledger.

13,073. When you left the room was there a ledger there?—It was on the desk, the same kind as you have in front of you.

13,074. You left it there?—I had nothing to do with the ledger.

13,075. Was it there when you left the room?—It was there when I left the room.

13,076. Do you know where it is now?—No.

13,077. (*Chairman.*) I understand you to say that you had just got seated in the chair when the officers fetched you downstairs?—Yes.

13,078. You then went downstairs?—Yes.

13,079. Then you went back again after the officers had done with you?—Yes.

13,080. And when you got back again you saw the ledger?—Yes, it was on the desk.

13,081. How long did you remain in the room afterwards?—Two or three minutes, till I got my check for threepennyworth, which I then went to get.

13,082. The ledger was in the room then?—Yes.

13,083. When you got your ticket you left the room?—Yes.

13,084. Did you leave the ledger on the desk when you left the room the second time?—Yes.

13,085. Are you quite sure of that?—Yes.

13,086. Did you leave many people in the room?—Yes.

13,087. You had nothing to do with the ledger?—No.

13,088. Who is the person whose duty it is to look after it, the secretary or the treasurer?—The secretary, I believe.

13,089. It is his duty to look after the ledger?—Yes.

13,090. Did the secretary come back into the room while you were there?—I do not know.

13,091. Did you see him downstairs when you went down?—I was attending to my three pennyworth.

13,092. Was the secretary in the room when you went downstairs?—Yes, and the others with him; we were both in together.

13,093. And when the officers left did you both go upstairs together?—No.

13,094. You went upstairs?—I went to the back door first.

13,095. What became of the secretary when the officers left him?—I do not know.

13,096. You never saw him that night?—No.

13,097. (*Mr. Barstow.*) What time did you leave the room?—I do not know.

13,098. Do not you know at all?—No.

13,099. What time did you go first?—I should think about half-past 5.

13,100. How long were you downstairs with the officers?—I do not know.

13,101. About how long?—I cannot tell you.

13,102. Was it half an hour or an hour?—I am not going to tell lies.

13,103. Was it an hour and a half?—I cannot tell you.

13,104. You do not know whether it was an hour?—It would hardly be so long.

13,105. Half an hour perhaps?—It may be.

13,106. What did they do with you for half an hour?—I do not know; they gave me this paper here, and I axed them to read it for me.

13,107. (*Mr. Chance.*) Were you a member of the union in 1859?—How long is that since?

13,108. How long have you been a member of the union?—Seven years or close on it.

13,109. Do you remember hearing about the murder of police constable Jump?—I have heard tell of it.

13,110. Do you remember your union subscribing money towards the expense of the trial?—I know nothing about that.

13,111. You have heard about it?—I have heard about him being killed.

13,112. Have you ever heard of your union subscribing to the defence of the man who killed him?—No, I have not.

13,113. Have you not heard of it?—No, I have not.

13,114. Do you mean to say that you have not heard of it?—No, not in the union.

13,115. What do you mean by "in the union"?—Among the members. I never heard them talk about it.

13,116. About money being given, or anything of that sort?—No.

The witness withdrew.

MR. HARRISON MACDONALD sworn and examined.

Mr. H. Macdonald.

13,117. (*Mr. Chance.*) Are you son-in-law to the late Isaiah Greaves?—Yes.

13,118. Was he a master brickmaker?—Yes.

13,119. Were you his partner in 1859?—Yes.

13,120. Had you a man of the name of Davenport in your employ?—Yes.

13,121. Was he a member of the brickmakers' union?—Not at that time.

TENTH DAY.

Mr. H. Macdonald.

16 Sept. 1867.

13,122. Had he been a member of the union while in your employ?—No, I do not know that.

13,123. Do you remember Davenport being fined?—I cannot say that I do. I remember it being talked of that he was fined by the union, and he left in consequence of the fine.

13,124. You did not know that he was fined, but you heard of it?—Yes.

13,125. And you heard that he left the union because he was fined?—Yes, he told me so himself.

13,126. When he was in your employ had he not left the union?—He had left the union.

13,127. Do you remember any application being made to Mr. Greaves by the union to discharge Davenport?—Yes, I was present when they came several times.

13,128. Who called?—The union men.

13,129. How many of them?—Once three and once five.

13,130. Do you know what their names were?—I cannot quite remember them just now.

13,131. Do you remember the names of any of them—Yes, some of them I do; one man has gone dead. William Burchall came both times.

13,132. Was he a member of the Oldham union?—Yes.

13,133. Do you remember any others?—Thomas Robinson was one that came.

13,134. Anybody else?—I cannot say that I remember any more.

13,135. You say that they came several times?—I saw them myself twice.

13,136. Did Mr. Greaves listen to the application, and discharge Davenport?—He listened to them, but he told them he would never discharge Davenport.

13,137. He refused to discharge him?—Yes.

13,138. After refusing to discharge Davenport did anything happen to Mr. Greaves or his property?—Yes.

13,139. Just tell us what it was?—In the year 1858 there was a quantity of needles put in some clay that was cast in the brickyard; in the same year there was a quantity of the bricks spoiled, about 14,000. I was up in the kiln the very night when they were spoiled in the yard.

13,140. At that time was he employing non-union men?—He was employing non-union men.

13,141. And no union men at all?—No.

13,142. Previously to that had the union men called upon him?—They were there the week before these bricks were spoiled; he told them he would not discharge Davenport, and they said they would come back to see if he would discharge him, but he said he would not; that was the whole dispute between Greaves and the union men.

13,143. Was it after his refusal that the clay was needled and the bricks destroyed?—The week after.

13,144. Have you any doubt that it was in consequence of the refusal to discharge Davenport that this was done?—We thought so.

13,145. He had no personal quarrel with anybody?—No, not that I know of.

13,146. How long did he continue to employ Davenport?—Up to the time of his death in 1864.

13,147. After the year 1858 was any damage done to his property?—Yes, in 1859.

13,148. What was it?—A grenade was shot at him in 1859, on the 30th of October, on a Sunday night.

13,149. Where was he at the time?—He was just going in at his door; he had one hand on the latch, and the shell came in the left direction and caught the outer wall, and part went by him and took a portion of his trowsers, stockings, and a portion of the skin away; if it had met this wall and caught the other side at the right hand he would have been blown to pieces, it just caught the wall and——

13,150. Were you with him at the time?—No, I was not.

13,151. You are telling us what he told you?—Yes.

13,152. Was anybody with him?—There was a young man who has gone to America since; he was with him; he was just behind him.

13,153. Did you see the grenade afterwards?—Yes.

13,154. How long afterwards did he show you the grenade?—The morning following.

13,155. What was the grenade made of?—I do not understand that.

13,156. What part was shown to you?—It was like a round piece of iron full of holes, with caps fitting in.

13,157. That was a part of it?—Yes.

13,158. What size should you think it would be altogether, judging from what you saw?—About 8 or 9 inches diameter, judging from what I saw.

13,159. Did you go to see the place afterwards where it exploded?—Yes, I found a great portion of what it contained myself.

13,160. What did it contain?—Small knife-blades and horse-nails, and various sharp instruments. I found a great quantity.

13,161. If he had not been protected in the way you have explained it might have blown him to pieces?—I believe it would.

13,162. Had any other cause arisen after the last damage that was done to him, to account for this?—No, only Davenport's case.

13,163. Do you attribute it to the same cause, namely, employing Davenport, who was a non-union man?—Yes.

13,164. Do you know at all how it was?—No.

13,165. Or who had any hand in it at all?—I cannot say.

13,166. Was any inquiry made afterwards?—Yes, a good deal of inquiry was made respecting it.

13,167. And the police set about to try and discover it?—Yes, the same night.

13,168. They always failed?—Yes, Mr. Greaves himself always suspected two parties up to his death.

13,169. Was any other injury done to Mr. Greaves or his property?—Yes, to his property in December 1863.

13,170. That was the next occasion?—Yes.

13,171. The previous one was in 1859?—Yes.

13,172. What was the damage in 1863?—The engine-house was blown up at a quarter before 12.

13,173. He was still employing Davenport?—Yes, he was there still.

13,174. Were you still acting as his foreman up to that time?—Yes, up to his death I was his foreman.

13,175. You can describe to us how it was done?—Do you mean the engine-house?

13,176. Yes.—I can.

13,177. How was it done?—At a quarter before 12 a man came to my door (I lived a few hundred yards away), and said that he believed the engine-house was blown up, and that he would go and inform Sergeant Buckley. When I got downstairs Buckley was at my door, and we went over the yard and got to the engine-house and smelt a strong smell of powder. They had taken the window out to go in, so we went in the same way as they did; we found in one corner a can that had contained powder, it was a pint can with a fuse to it. Looking at the engine we found that they had taken off the cylinder top and put down another can of powder inside the cylinder, with a fuse attached to it, and had screwed the cylinder down again, and it took the cylinder top away and a portion of the engine, and the top of the house was blown nearly 100 yards away.

13,178. Can you say how much powder was put in the cylinder?—No, I cannot say.

13,179. How much did it contain?—Something like a pint.

13,180. What amount of damage was done to the engine?—It cost 28*l.* to put it in proper order again.

13,181. It must have taken some time to take the top of the cylinder off and put the powder down the cylinder?—Yes, an hour, or an hour and a half.

13,182. Could they have done it without some instrument?—There was a key inside the engine-house to unscrew it with.

13,183. Did you ever find out who had done this?—No, I never did.

13,184. You took every step to endeavour to discover it?—Yes, we tried all we could, but it was never discovered.

13,185. Had there been any deputation of the union men to Mr. Greaves previous to this?—I heard him say that they came nearly every week, one or more at a time. I saw them twice myself, and I was with them when they were speaking.

13,186. Do you know who they were?—I do not know all the union men's names; I only know two of them.

13,187. Did you hear them speak?—Yes.

13,188. You heard what they said?—Yes, once when they came.

13,189. What did they say?—They came down to the house one Friday night and began to ask him whether he would discharge the man Davenport. They said they would come back to their work if he would. He said, "No, never while I live shall I do it." He said that he had got plenty of men to do his work, and he could do without them.

13,190. You heard this?—I heard this in his own house.

13,191. Had you heard any conversation between the union men and Mr. Greaves on a former occasion?—Yes, five of them came into the brickfield.

13,192. Was the substance of the conversation similar?—Yes, just the same with regard to Davenport; there was nothing else.

13,193. Were they the same men that came on this occasion?—Buckley and Robinson came both times. I do not know the names of the others.

13,194. Are you speaking now of 1863?—Yes, and 1859; they both came in that year.

13,195. I want to know whether you remember the union men coming to him in the year 1863, before the engine-house was blown up?—I heard they had been there, and his wife told me so too, but I never saw any.

13,196. Was any other damage done to Mr. Greaves that you can remember?—No, I cannot say that there was; that was the last.

13,197. Did you ever hear him threatened?—No, I never heard him threatened.

13,198. Have you ever been threatened?—No, I never was threatened.

13,199. (*Mr. Barstow.*) Did you see Greaves's clothes that had been torn with the grenade?—Yes.

13,200. Did he show you where he had been grazed?—Yes, on the Monday morning.

13,201. Was that the day after?—Yes.

13,202. The following morning you saw the clothes torn, and the mark of the wound upon him?—Yes.

The witness withdrew.

Mr. John Brooks sworn and examined.

Mr. J. Brooks.

13,203. (*Chairman.*) Were you in partnership with your brother in September 1859?—Yes.

13,204. What were you?—Brickmakers and farmers.

13,205. How many men did you employ at that time?—Perhaps about 20 in all.

13,206. Were any of them unionists?—One-half; perhaps the greater half.

13,207. We have heard that a person of the name of Greaves, who was a master brickmaker, had a dispute with his men; that was so, was it not?—Yes.

13,208. Was Greaves's brickyard near yours?—Yes.

13,209. You remember he had a dispute with his men?—Yes.

13,210. I believe there was a turn out in consequence?—Yes.

13,211. We understand that there was a meeting of the masters?—In consequence of the demand upon Greaves a number of masters set.

13,212. Were you one of those who met?—Yes.

13,213. Where did you meet?—At the "Spread Eagle" Inn, Oldham.

13,214. How many met?—About seven.

13,215. Did you come to some resolution?—In consequence of the dispute we had had previously we concluded that we should have to go the ground over again, and from the demand made upon Greaves we decided to stop all the union men in our employ.

13,216. The union men did not return to work with Mr. Greaves?—Yes.

13,217. Did you in consequence discharge the union men in your employ?—Yes.

13,218. Have you ever employed union men since that time?—No.

13,219. This was in September 1859?—Yes.

13,220. After that did anything happen to you?—Yes; I believe in the same month.

13,221. Was that the month of September?—Yes.

13,222. In September 1859 what happened to you?—We had two stacks of hay fired.

13,223. Were they fired in the night?—Yes, about 12 o'clock in the night.

13,224. Were they burned altogether?—No, it was seen.

13,225. So you luckily stopped it?—Some men working opposite saw it and gave the alarm, and I and others were fetched and stopped it.

13,226. Was anything found near the stacks?—In several places were found lucifer matches and chips put together and some had only partially burnt and not taken fire; at other places they had taken fire.

13,227. Can you attribute this to anything else than your quarrel with the union?—No, I cannot.

13,228. Did you find any brickmaker's card near the place?—Yes, in the same field that the stacks were in.

13,229. In the same field that the stacks were in you found a brickmaker's card?—Yes.

13,230. Whose was it?—John Barker's.

13,231. Was his name on it?—Yes.

13,232. He was in office in the union, was he not?—I do not know that.

13,233. He was a union man?—Yes.

13,234. Were you present when it was found?—Yes.

13,235. In the same field in which the stacks were that were fired?—Yes.

13,236. He was a member of the union?—Yes.

13,237. This was in September?—Yes.

13,238. This was the very time, was it not, that you had turned your men off?—Yes, I only stopped them on the 17th of September.

13,239. This happened on what day?—A week or 10 days afterwards.

13,240. Did anything happen to you again a short time afterwards?—Yes.

13,241. In November?—In the same year, in October or November, we had some cows poisoned. We went into the shed one morning and found one cow dead; at noon on the same day another died. We had no suspicion of foul play in the first case, but when the second occurred we sent for Mr. Taylor, the veterinary surgeon. The second cow was opened and examined. He took the inside away for examination.

13,242. Was it found that some poison had been given to the animal?—Yes, there was certain proof of poison.

13,243. Some arsenic had been mixed with her food?—It was supposed that it was laid for them together; of course we did not know.

13,244. The examination showed that something of that sort was in the inside?—Yes, something of that sort.

13,245. You have told us of these two, one in September and the other in October or November 1859; did anything else happen to you after this?—I believe the day, or the day but one, following a number of cakes were found in the field.

TENTH DAY.

Mr. J. Brooks.

16 Sept. 1867.

13,246. A number of cakes were found in the field ?—Yes.

13,247. Were they such cakes as cows would eat ?—They appeared to be made of meal or bran and water.

13,248. Food for cows ?—Yes.

13,249. Were they examined ?—Yes.

13,250. Were they found to be poisoned ?—Yes, they were.

13,251. This was in October or November. Now, in the following May did anything happen to you ?—Yes, we had a quantity of bricks spoiled and needles put in the clay.

13,252. Were the bricks spoiled by being trampled on ?—Yes.

13,253. And needles were put in the clay ?—And needles put in the clay.

13,254. That was in May 1860 ?—That was in May 1860.

13,255. Do you attribute all these outrages which you have mentioned to your quarrel with the union ?—Yes.

13,256. Is yours the Oldham union ?—Yes.

13,257. Where you live is in the district of the Oldham union ?—Yes.

13,258. Are you a brickmaker now ?—Yes.

13,259. At the same place ?—Yes.

The witness withdrew.

Mr. J. Taylor.

Mr. James Taylor sworn and examined.

13,260. (*Mr. Barstow.*) Are you a veterinary surgeon at Oldham ?—I am.

13,261. Do you remember some cows belonging to Mr. Brooks being poisoned ?—Yes.

13,262. He gave you the stomach of one cow to examine ?—Yes.

13,263. And you also examined some cakes which were found about the fields ?—Yes.

13,264. What did you find in the stomach of the cow ?—We analyzed the contents of the stomach and found arsenic in great quantities.

13,265. That would be quite sufficient to cause death ?—Yes.

13,266. Did you also examine the cakes ?—Yes.

13,267. What did you find then ?—I examined it at the time, and on Saturday I sent it to an analytical chemist in Manchester ; he has done the same and has found a great deal arsenic in it. I have some of the cake with me.

13,268. What is the substance of the cake ?—Bran and oatmeal watered (*the witness produced a piece of the cake*).

13,269. There is a peculiar smell with it, is that the arsenic ?—No, it has been kept in the desk for eight years. You can see small specks of white here and there, at the broken edge you will see them. There is a great quantity of arsenic in ; that is part of the original cake that was found.

The witness withdrew.

J. Rigby.

Joseph Rigby recalled and further examined.

13,270. (*Mr. Chance.*) You are a brickmaker ?—Yes.

13,271. For whom are you working ?—Robert Aitkins and Brothers.

13,272. Do you know Richard Beasley ?—Yes.

13,273. He works at Barrow ?—Yes.

13,274. How long has he been working there ?—Between two and three years, I think.

13,275. Do you know where he was working before he was working at Barrow ?—For Brunker, one of the Bridgewater trustees.

13,276. How long had he been working there ?—Between one and two years, 18 months to two years.

13,277. Do you remember five or six years ago a shell being thrown at Mr. Greaves ?—I heard talk of it.

13,278. When did you first hear talk of it. Was it soon after it occurred ?—Yes.

13,279. Did you have any conversation with Richard Beasley about it ?—Yes.

13,280. When was that ?—When we were in Barrow together.

13,281. How long ago is that ?—Two years ago.

13,282. Did Beasley tell you that he had helped to make the shell ?—He told me he had something to do with it ; he helped to make it.

13,283. Did he also say he knew who threw the shell at Greaves ?—Not to me he did not.

13,284. Did he say that to anybody else ?—Not that I know of.

13,285. Did you ever hear him say anything about who had thrown the shell at Greaves ?—No.

13,286. Are you sure of that ?—Yes.

13,287. Have you not said at any time that he did tell you so ?—No, I have not said that. He told me that he had helped to make it.

13,288. Is that all he told you ?—Yes, all that I can swear to.

13,289. Did he say anything about bringing it ?—No.

13,290. That is all you know about it ?—Yes ; I cannot say anything more except I must say something I do not know.

The witness withdrew.

R. Beasley.

Richard Beasley sworn and examined.

13,291. (*Chairman.*) I may tell you that if you make a free and full disclosure of anything you happen to know touching this inquiry you will be entitled to have, and certainly shall have, an indemnity, so that nobody can do anything at all against you for anything you may have done ; but it is upon the condition that you tell everything. Now is your time. You will have the right to have an indemnity, and nobody can do anything against you if you freely tell the truth. I merely mention that to you. Where are you living now ?—In Barrow.

13,292. What are you working at there ?—I am in the brick trade.

13,293. How long have you been at Barrow ?—I cannot exactly tell you, but I should surmise about two years.

13,294. And you have been working at the brick trade all that time, have you ?—Yes.

13,295. Did you formerly live at Birmingham ?—Yes.

13,296. What used you to do at Birmingham ?—I worked in the brick trade in Birmingham.

13,297. The same trade ?—The same trade, but not in the same way as I am now.

13,298. It was the same brick-making trade ?—Not the same way as I am now.

13,299. Was it a better way ?—It is a different branch altogether.

13,300. Still it was part of the brick-making trade ?—It was a different branch, there are different branches.

13,301. It was a different branch from what you are working in now ?—Yes, quite a different process altogether.

13,302. Did you ever go from Birmingham to Oldham some years ago ?—Never.

13,303. Were you ever at Oldham ?—I worked in Oldham.

13,304. Had you been at Birmingham before you were at Oldham ?—Yes.

13,305. When you said you did not come from Birmingham to Oldham, you mean to say that you did not come direct?—I mean to say that I did not come direct.

13,306. Had you been at Birmingham before?—Yes.

13,307. What brought you to Oldham?—Slackness of trade.

13,308. You wanted to get work at Oldham?—I wanted to get work anywhere.

13,309. You went to Oldham for that purpose?—Yes.

13,310. Did you get work there?—Yes.

13,311. Do you remember how long ago that was?—My memory does not exactly serve me. I have no particular date. I cannot tell to 12 months. I should say if I speak within any sort of reason that it might be seven years ago, but I cannot say exactly.

13,312. About seven years ago you were working at Oldham?—I fancy so. I cannot be sure unless I traverse where I have worked, if any gentleman will put down where I say I have worked I can get at it.

13,313. You are quite near enough; you did work at Oldham?—Yes.

13,314. And you worked at the same trade?—Yes, in the brick trade, not all the time.

13,315. How long did you stop at Oldham?—I cannot exactly say.

13,316. Twelve months or more?—I should surmise it was about 12 months, but I cannot say. I have not taken any notice of anything particular.

13,317. Were you a member of the Oldham union when you were there?—I believe I was.

13,318. You have no doubt about it?—There is no doubt at all, because I was.

13,319. Were you once auditor of the Oldham union?—Not that I am aware of. I might have been.

13,320. You were in some office, were you not?—Never.

13,321. Did you audit the accounts?—Never.

13,322. You do not remember doing anything of the sort?—I have never done anything of the sort.

13,323. Did you do anything for the union when you were in it?—I paid my money.

13,324. Anything else?—Nothing that I am aware of.

13,325. Do you think that you will recollect if a little time is given to you?—I will recollect no doubt if you will call it to my memory. It appears to me that you know more than I do, because I have no notes of anything.

13,326. Were you employed by the union to go about to different yards about the moulds?—No, not knowingly; if I was it was unbeknown to me. People may have said I was, but I have not been.

13,327. Did you go for your amusement to the different yards?—I never went to all the yards in Oldham.

13,328. Not all, but did you go to some of them?—I worked in two or three, but I do not think I went into five in Oldham.

13,329. Not to look after them?—No, if I went to them I worked.

13,330. Did you ever assist in making a shell?—No, I never did.

13,331. You never did?—No.

13,332. You have heard of a shell?—I heard talk of it and I read of it, that is all.

13,333. Have you heard others talk about it, too?—I will tell you where I see the most of it; I saw it in the Oldham almanack.

13,334. A long time ago?—I think it is seven years since I was there.

13,335. You never had anything to do with that?—No.

13,336. Do you know how to make a shell?—I do not know; I might make two or three shell oysters into a little grotto, but I know nothing of any other shells.

13,337. You could not put anything combustible in?—No.

13,338. You never tried your hand at this?—No.

13,339. Were you ever present when anybody else did?—No.

13,340. You heard of a shell being used at the time you were at Oldham?—No, nor any other man did.

13,341. Did you hear of a man named Greaves having a shell thrown at him?—I did, but I was working in Sheffield at the time.

13,342. When was that; was that before you came to Oldham?—Yes, 18 months before I saw Oldham or knew what kind of a town it was.

13,343. Did you ever hear of a shell at Sheffield?—Never.

13,344. You never saw one made?—Never.

13,345. Nothing of the sort?—Never.

13,346. You are quite sure of that?—Yes.

13,347. Did you ever say that you did it?—No, not that I am aware of.

13,348. Might it be that you once said that you had something to do in assisting to make a shell?—No, I will not say that ever I had. I will contradict it if any man ever said that I did. I never was in the possession of liquid while I was working in the steel melting. I was never in possession of a pound of steel liquid, never, without three or four men being with me.

13,349. Never mind the liquid; you know what a nail is?—Yes.

13,350. And you know gunpowder when you see it?—I do not know that I should know all sorts.

13,351. Do you know a man named Joseph Rigby?—Yes.

13,352. Is he working with you now?—No.

13,353. Is he working at Barrow now?—No, not that I am aware of.

13,354. Have you ever worked with him?—I worked with him.

13,355. Do you remember ever having any conversation with him about this attack upon Greaves?—No, I had nothing to do with Greaves.

13,356. Nobody said you had, but had you any talk with Rigby about the attack upon Greaves?—No.

13,357. That you swear?—Yes, that I will swear. However, I have sworn to come here to speak the truth, and if you want me to tell lies——

13,358. We do not want that?—I will answer everything that is just.

13,359. It may be all a mistake, but I want to ask whether you have ever told Joseph Rigby that you assisted in making the shell which was thrown at Isaiah Greaves?—No, I never did.

13,360. Nor anything to that effect?—No, I have melted hundreds of thousands of pots of steel for making sickles, scythes, clocks, springs, and other things of that sort, but as to anything in the way you are alluding to, I never did anything of the sort.

13,361. You are able to do all these things; did you learn to do these things you have just named?—I am not able to do them, but I melted the stuff to do it with, and there was a man in the room to look after me.

13,362. You melted the stuff?—Yes.

13,363. Did you learn to do that at Sheffield?—Yes, I paid 6*d.* a day to learn it.

13,364. You never said anything of that sort to Rigby, that you remember?—I never did.

13,365. And you know nothing about the shell that was thrown at Greaves?—I do not.

13,366. That you swear?—I have sworn.

13,367. But you swear to that statement?—I have sworn to that statement, and I will swear again the same. I think it is out of reason.

13,368. Were you ever connected with anybody who got any needles for destroying clay?—No.

13,369. Never in your life?—No.

13,370. You have heard of it being done?—I have read of it.

13,371. And heard it talked of?—And heard it talked of. Since I have been living in Oldham, and 18 months before I went into Oldham, I never saw the

TENTH DAY.

R. Beasley.

16 Sept. 1867.

place or knew where it was. Oldham was as tranquil and peaceable as the society is in this room.

13,372. Before you went there?—Yes, and ever since.

13,373. Before you went there it was perfectly quiet, and you think it has been quiet ever since?—I believe so; I have never heard of anything.

13,374. You never heard of any outrage in Oldham at all?—Never.

13,375. Never in your life?—Yes, I did when I was in Sheffield.

13,376. Did you never hear of any outrage in Oldham after you went there?—No.

13,377. You never heard of any bricks being destroyed?—No.

13,378. Never in your life?—No.

13,379. Where have you heard of clay being needled?—I have never heard of it, only rumoured about with the different people; I have never seen any facts in print.

13,380. Did you hear of it being rumoured about when you were in Oldham?—I did.

13,381. Did you hear of Greaves having been hurt by a shell while you were in Oldham?—I never heard it talked of.

13,382. Do you mean to tell me that you did not hear of it happening while you were in Oldham?—I never heard it at all; it was shown to me in the almanack when I bought it.

13,383. How long after?—Perhaps 18 months.

13,384. While you were in Oldham, or after you had left it?—It would be while I was there; I never saw the Oldham almanack until I was in Oldham.

13,385. And the first time you heard of the shell being fired at Greaves was seeing it in the almanack?—No, it was while I was in Sheffield the first time, it was shown to me in the newspaper.

13,386. And do you mean to say that the shell was fired at Greaves before you came to Oldham?—Yes, above six months.

13,387. Before you went there?—Before I saw Oldham, or knew where it was.

13,388. While you were at Oldham did you hear of any outrage upon a man named Holt, by his having a shed set on fire?—No, I do not know the man.

13,389. Did you hear of any shed being set on fire while you were at Oldham?—No, I did not; I never knew the name or heard it mentioned in my life, not that I am aware of.

(*Chairman.*) We shall want you to-morrow morning.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

ELEVENTH DAY.

Assize Courts, Manchester, Tuesday, 17th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C.	GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq.	JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

RICHARD BEASLEY recalled and further examined.

ELEVENTH DAY.

R. Beasley.

17 Sept. 1867.

13,390. (*Chairman.*) You have been already sworn. You understand that the oath which you took yesterday is sufficient for to-day. Have you considered the evidence which you gave yesterday?—I had nothing to consider about.

13,391. At all events you have no occasion to alter anything that you did say?—I cannot alter anything.

13,392. Did you know a person of the name of Thomas Rigby?—I have seen him once or twice; I do not know much of him.

13,393. How long ago is it since you saw him?—I cannot say exactly; it might be a year or two.

13,394. Shall I remind you?—Perhaps you can tell me better than I can tell you.

13,395. You are upon your oath. Did you know a person of the name of Thomas Rigby about five years ago?—I did know such a man; I do not know him now.

13,396. Did you know such a man about five years ago?—I think it is five or six years ago; I cannot say to a year or two.

13,397. Did you ever sleep in the same bed with a man of that name?—Yes, I did.

13,398. Where was that, do you remember?—In Runcorn.

13,399. Have you ever talked with him about any outrages which have been committed at Oldham?—No, I never did, nor he to me; not knowingly.

13,400. Will you swear that you never had any talk with him about outrages committed at Oldham?—Yes.

13,401. You swear that you never had?—Yes. That man was very drunk when he slept with me.

13,402. Did you sleep with him more than one night?—Never; not that I am aware of. He would not let me sleep on the night that he slept with me. He got up and opened the window, and was more like a lunatic than anything else.

13,403. Did you talk to him?—I consoled him, as I thought, and persuaded him to lie down.

13,404. Answer this. You say that you knew Greaves, the man who had a shell thrown at him?—I never knew the man in my life.

13,405. You heard the story?—Yes.

13,406. Did you ever hear him called "Old Cobber Greaves?"—I never knew him by the name of Greaves.

13,407. How did you know him?—I called him "Cobber" when I knew him.

13,408. Did you ever tell Rigby that you and James Kay made a shell which was thrown at old Cobber?—I never did.

13,409. Did you ever tell him that you were the first person who brought needles to Oldham?—No, I never did.

13,410. Damaged needles. Did you never say that?—No, I never did.

13,411. Did you ever say anything to him about needles or damaged needles?—Never in my life; I never had an hour's conversation with him, nor even a minute's.

13,412. A minute would be enough to say that?—I never had a minute's conversation with him in my life. He slept with me and was very tipsy. He took lodgings for a week and went away before that time.

13,413. Did you ever say that you brought needles from Sheffield ?—No.

13,414. Did you ever bring needles from Sheffield ?—I never did.

13,415. That you swear ?—Yes.

13,416. I asked you yesterday whether when you were a member of the Oldham union you had ever been the auditor, and you told me no ?—I was not aware that I ever was ; I am not aware that I was to this day.

13,417. Will you swear that you were not ?—I will swear I never was to my knowledge. If ever I was called upon there it might be for a quarter of an hour when somebody was absent.

13,418. You know what auditing the accounts means. Did you ever audit the accounts of the Oldham union when you were a member of it ?—I cannot say.

13,419. You said "no" yesterday ?—I might have said so yesterday. I say now that I do not recollect it.

13,420. You distinctly told me that you never had audited the accounts ?—I do not think I did.

13,421. Are you sure now whether you have or not ?—I do not recollect ever being auditor.

13,422. You went further yesterday ; you told me positively when you were pressed that you never had audited the accounts of the Oldham union ?—I am not aware that ever I did.

13,423. Not being aware of it is very much the same thing as not recollecting it. Yesterday you said positively that you did not ?—If my memory would let me say "yes" or "no" they would be shorter words than I have used.

13,424. Just look at that book (*handing the same to the witness*). Is that your handwriting or not ; do you see "Richard Beasley" there ?—Yes.

13,425. Is that your handwriting ?—I believe it is, and I believe I was there too now ; my memory did not serve me before.

13,426. Now, looking at the entry and having seen your handwriting, can you say whether you ever audited the accounts of the Oldham union ?—I might have been called upon in a case of emergency.

13,427. You know that book ; does not it prove to you that you did audit the accounts ?—Yes, a man may easily audit.

13,428. Did you audit the accounts ?—I did, or my name would not be here. I was not aware of it. I was not aware that ever they had confidence enough in me to let me audit the accounts.

13,429. James Hegan is the other name above yours ; do you remember him ?—I do not know him.

13,430. You remember somebody else signing the book along with you ?—No, I do not. I have seen the book, but I have not seen the names there ; I have seen my own.

13,431. Just look again and see whether there is any mistake about it (*handing the book to the witness*). The words are as I read them, "Audited and found correct by James Hegan and Richard Beasley." Is not that so ?—Yes.

13,432. Having seen the book do you mean to tell me that you do not remember James Hegan auditing the accounts with you at that time ?—Yes, I know the man now.

13,433. You and he audited the accounts at the time ?—Yes, I have no doubt about it now.

13,434. And before you audited the accounts of course all the items of the accounts were explained to you ; you could not find them to be correct without ?—I could not say they were correct without.

13,435. Turn back and look at some of the entries which were allowed by you to be correct ; turn back to the next page, first of all ; look down that page where your left hand is—you will find there or at the page before it the sum of 20*l.* put down for cash, is it there ?—No ; 2*l.* 2*s.* I see.

13,436. What entry is there upon the page which your left hand is now touching, is there any entry on that page of cash ?—Cash receiving, yes.

13,437. Not receiving ; I mean payments ?—No, I cannot see any payments at all.

13,438. Just turn over the page before, is there any cash down there of 20*l.* ?—No.

13,439. It is the page back, the receipts are put on the right hand side and the payments are put on the left ; it is the way that a debtor and creditor account is kept. "Expenses of two delegates 8*s.* 10*d.*" and after that comes the sum of 20*l.* I think for September the 5th. It is a page back ; do you see it now ?—Yes.

13,440. What does that mean ?—I do not understand it.

13,441. But still it must all have been explained to you according to your own statement ?—It might have been received, I cannot say.

13,442. That cannot be, it is on the side of the payments ?—I never kept this book.

13,443. But you have audited as correct a payment of that sum on September the 5th ?—It does not say what year this is in.

13,444. It may be in the beginning, I did not look ; at all events it is immaterial as long as you audited them ?—There is no doubt about its being in my handwriting, but there is no year here at all.

13,445. Whatever year it was you audited them. Now I want to know what the payment of 20*l.* on September the 5th was for ?—I do not know anything about it.

13,446. Of course it must have been explained to you or you would not have signed it as correct ?—Yes, it says here, "Expenses of delegates 8*s.* 10*d.*"

13,447. That speaks for itself ?—And there is an item here of "cash 20*l.*"

13,448. You found that to be correct ?—It would have to be explained to me one way or the other, or else I could not say that it was correct.

13,449. That occurs to everybody's mind. It having been found correct and an explanation given to you, can you give us the slightest idea what such an entry was for ?—I cannot give any further information than this, it might have been 20 men on strike, 20 men that had 1*l.* a week ; or 40 men at 10*s.* a week would amount to the same ; I cannot say any other way.

13,450. Was not the proper mode of entering such money, if it had been so paid, "Turn out" or "Strike ?"—I cannot say. I was not acquainted with the manner in which the books were kept.

13,451. Is this the only occasion on which you audited the accounts ?—I do not think I was ever called upon again, and my memory did not serve me then, and I would not believe this now if I had not seen it.

13,452. Would you not have expected that that entry would have explained "Turn out" or "Strike" if the money had been so spent ; but here is a mere entry of 20*l.* Can you give any other explanation about it ?—I cannot give any explanation, only a surmise. There might have been forty men out, or there might have been a dispute, or there might have been 50 in two or three different yards ; they might have been paid for two or three days each.

13,453. It might have been anything else. You cannot say whether the proper mode of making such a payment as that would not have been for the thing itself, as for a turn out or a strike ?—If I had entered this I should have entered it so as to have been able to explain it when called upon, but I am not able to explain it.

13,454. You think that the proper entry for a turn out or strike would have been "turn out" or "strike" ?—Yes, if I had been cashier I should have said for a purpose—for labour.

13,455. You would have expressed the purpose ?—I should have expressed the purpose.

13,456. But they have not done so ?—I cannot account for that.

13,457. But an explanation must have been given to you at the time ?—I do not understand the way in which these books have been kept.

13,458. But of course you understood it before you found that they were correct ?—It might have been explained to me, but my memory does not serve me.

ELEVENTH DAY.

R. Beasley.

17 Sept. 1867.

13,459. Just let me look and see whether the date is mentioned anywhere? It begins in August and goes through September to October 1862. Therefore it is clear that this was September 1862?—That would have been five years ago.

13,460. Then it goes on afterwards to January 1863, therefore this must have been in 1862?—You must allow for the class that there are in the fraternity which I unfortunately belong to, in their mode of book-keeping they are not so clever as some men are.

13,461. I do not mean to say anything about that; but you understand what you are told. The accounts are very well kept it appears to me?—If I knew anything about it I would say that I did, but I do not. My memory does not serve me. If it was for food or anything else, if they told me, I do not recollect it.

13,462. The memory does go sometimes when people get into that box?—Mine does not go because I have got into the box.

The witness withdrew.

T. Rigby.

THOMAS RIGBY sworn and examined.

13,463. (*Chairman.*) I want to tell you that if you make a full and true disclosure of all you know, you will not be liable to be prosecuted or troubled in any possible way for anything you have done. We shall give you an indemnity, but it is upon the express condition that you make a full and true disclosure of all; if you keep back anything you will not be entitled to it. Now is the time for you to tell us if you have ever done anything wrong, and I promise you that you shall be free from any trouble on that account afterwards. What are you now?—I am wheeling clay; I am a brickmaker.

13,464. Where are you working?—At Joseph Brooks's in Oldham.

13,465. Have you worked there long?—Four years.

13,466. Have you been a brickmaker all your life?—Yes, the biggest part of it; ever since I was about 22 or 23 years old.

13,467. Have you been a member of any union?—Yes, both the Oldham and Manchester unions.

13,468. Are you a member now?—No, nor have not been for the last five or six years.

13,469. Five or six years ago were you a member of the Oldham union?—Yes.

13,470. How long were you a member of the Oldham union?—I am sure I cannot say.

13,471. Several years?—Yes, several years; going on 12 years.

13,472. Was it before that time that you were a member of the Manchester union, or at the same time?—The same time.

13,473. You were a member of both?—I was a member of both places.

13,474. Did you serve any office in the Oldham union?—Yes, I was one of the council.

13,475. We understand that there were nine; was that so in your time?—There were 11.

13,476. And you were one of the council?—Yes.

13,477. Were you ever treasurer or secretary?—No.

13,478. How often did the council meet; once a fortnight?—Sometimes the council met oftener, and sometimes not so often.

13,479. You met at no particular time?—We met at no particular time; if we were called together we used to meet.

13,480. Might anybody call you together, or must it be a member of the council who called you together?—A member of the council.

13,481. Did he call you together upon any complaint being made?—I suppose it must be so; there must be some complaint laid.

13,482. A complaint that somebody perhaps was interfering with your rules?—Yes.

13,483. Then that matter was brought before the council?—Yes.

13,484. If anybody was taking less wages than your union men that was one of the matters?—Yes.

13,485. Or working with non-union men, was that another?—Yes.

13,486. Upon that did you come to a resolution as to what ought to be done about it?—Yes.

13,487. What sort of resolutions; do you remember. Was it that something should be done to the men, or that something should be done to the property?—Something done to the property or the men either.

13,488. You have often known cases of that sort?—I was once in one case.

13,489. What was that?—It was one of Holt's.

13,490. He was employing non-union men?—He was employing non-union men.

13,491. I forget in what year that was?—It was above 10 years since.

13,492. No it is not?—It is above 10 years.

13,493. Do you remember one in the year 1859?—No, I cannot say that I do.

13,494. What is it that you remember; you may be wrong in the year?—We came to the conclusion that we would set his shed on fire, and we went.

13,495. Who went?—Me, William Burchall, William Smith, and John Suthers.

13,496. Did you go and set his shed on fire?—We went.

13,497. How did you do it; did you get the tools together?—We got naphtha, and we had little tins for putting the naphtha in, and we put fire to the tins and it did not do any execution whatever. It just made a little hole through, just the same as nothing.

13,498. Did you collect the tools and wheelbarrows in the shed together?—No; William Burchell gave me a pistol. I did not see what it was they did; I stood at the door while they did it.

13,499. Which door; the door of the shed?—Yes, and I daresay I should have shot the first that came out of it. I have no doubt I should have shot anyone that came out. I believe I should, because I did not know any better.

13,500. Was it a single or a double-barrelled pistol?—Single barrelled.

13,501. How many carried naphtha?—They carried it in a bottle.

13,502. Who carried it; do you remember?—I cannot say.

13,503. How much did you get from the union for that job?—I got 1*l.*

13,504. You all shared alike?—I do not know that.

13,505. You were to share alike?—We expected to do so.

13,506. Who settled the money that you were to have?—Patrick Nolan gave me mine; he was not the president or secretary.

13,507. He was a member of the council?—Yes.

13,508. Did you generally settle with the council how much money was to be given?—No, I do not know that it was settled.

13,509. You told someone to carry it out and to pay for it?—Yes.

13,510. How did Patrick Nolan get the money from the treasurer?—I do not know. He must have got it, because he gave me 1*l.*

13,511. You say that you did not succeed in getting the shed on fire then?—No, I did not persevere then.

13,512. In what other cases have you been concerned?—I was in no other outrages except that.

13,513. You have heard them talked of at the meetings, of course?—It is no use my coming here and telling you stories, and I shall not do so.

13,514. But you have heard them spoken of at the meetings?—I do not know that I have.

13,515. Surely you must remember that at these council meetings it was the usual thing to have these things talked of. Do you remember any other outrage

being talked of at the meeting; was Smethurst's case mentioned there?—No.

13,516. Were there many in your time in the Oldham district?—I remember about Richard Beasley.

13,517. Did you sleep with Richard Beasley one night?—Yes, I slept with him I dare say at nights.

13,518. Where was it?—At Runcorn. I was there one night, and we were talking about these outrages, so he says to me, "Thou knowest about old Cobber, about that shell." I said, "I heard about it." He said, "I was one making it there, me and Jem Kay."

13,519. He and Jem Kay made the shell?—Yes, but he did not tell me who throwed it.

13,520. He said that he and James Kay were concerned in making the shell which was thrown at "old Cobber"?—He said it was not thrown at him to kill him; it was only thrown at him to fear him.

13,521. It was thrown pretty near him; did he say that?—He said it was thrown at him, and he said he sent for needles from Sheffield to put in the clay and that is all that I know.

13,522. You slept with him you say a week?—I slept with him a week.

13,523. Were you drunk when you slept with him?—No, I was not.

13,524. None of the nights?—No, not a single night.

13,525. Not a single night?—No, not a single night.

13,526. And you are quite sure that he said this?—Yes.

13,527. Had you known him long before?—I never knowed him before I went there, and I did not know that he was a union man when I went there till he told me.

13,528. You knew James Kay, did you not?—Very well.

13,529. He was a union man?—Yes.

13,530. And very much employed?—Yes he was, I believe, but I know naught no more about him.

13,531. Do you remember when the Oldham union wanted some money and sent round to get it from the other different unions? We have heard about that; do not you remember the Oldham union wanting some money and sending round?—They did many a time.

13,532. Did they do it when you were a member of the council?—No, I do not know that they did.

13,533. Do you remember it?—Yes I remember it well enough, but I say that I do not know that they ever sent any money when I was in the council.

13,534. Do you remember James Kay bringing as much as 100*l.* from the Manchester union?—Yes, I do remember that.

13,535. Do you remember when it was?—No, I cannot say.

13,536. In 1862?—I cannot say the year, but I remember it very well, because they fined me 1*l.* for it.

13,537. What were you fined 1*l.* for?—Because they said I had told Cobber that the Manchester union would not find the Oldham union any money, and instead of that there was a levy. I had a son of mine who came to the club-house for me. That night my missis sent my son and nephew down to the club-house for me so that I should come home again, it was a meeting at night; when I went at night there was was about six or seven of the Oldham men come down and they said I had been and told Cobbor that Manchester would find them no money.

13,538. Is Cobber old Greaves?—Yes, James Kay told them that if so be that the Oldham men would leave it to him and give him a portion of the money he would get them 100*l.*

13,539. So they did leave it to him, and he got the 100*l.*?—Yes, and they fined me 1*l.* for telling Cobber, Kay was to get 15*l.* for the 100*l.* but he only got 7*l.* 10*s.*

13,540. Were you fined by the Manchester or the Oldham union?—By the Manchester union, then I got my 1*l.* back again two or three years after that. They sent a letter back from Oldham to Manchester that I was not in fault: so they sent me my 1*l.* back again; my son drew it back.

13,541. For what did Kay bring the 100*l.* to the Oldham union?—There was a turn out, and they wanted 2*s.* a thousand for making their bricks.

13,542. 100*l.* is a large sum of money?—Yes.

13,543. What made him bring as much as 100*l.*, because there was a turn out in Oldham?—He brought it to support the Oldham brickmakers.

13,544. How many turn outs were there at Oldham at the time?—I cannot say.

13,545. Were there many?—Yes, they were all out.

13,546. What for?—They were out, and wanted 2*s.* a thousand for making the bricks, the masters used to give 1*s.* 10*d.*

13,547. The Manchester union gave you 100*l.*?—Manchester gave Oldham 100*l.*

13,548. What did Stockport give?—I am sure I cannot say.

13,549. Did they give something?—They gave something.

13,550. And Liverpool?—Yes.

13,551. Did Sheffield give you something?—Yes.

13,552. Was there any sent from Ashton?—I think Ashton was poor enough, and they did not send so much.

13,553. Liverpool, Birkenhead, and St. Helen's sent you money?—Yes.

13,554. How much did you get altogether?—I am sure I cannot tell you.

13,555. 400*l.* or 500*l.*?—I dare say that or some way near.

13,556. What came out of the Oldham union for that purpose?—I cannot say.

13,557. And this was for turn outs?—Yes, it was not for any outrages, it was only for turn outs.

13,558. How long did the turn out last?—It lasted a good while.

13,559. A fortnight?—Yes, and more too.

13,560. A month?—Yes, more than two months.

13,561. What did you pay the men during the time—full wages?—So much a week.

13,562. How much a week?—12*s.* a week.

13,563. While you were a member of the council do you remember the subject of outrages being brought before the council?—No, it never was brought before the council.

13,564. Still you came to resolutions as to the man whose property was to be injured?—Yes.

13,565. You said if any man had a complaint to make the nature of which you have told me, either for working under wages, or working with non-union men, or for a master who was employing non-union men, it was a matter that was generally brought before the council?—Yes.

13,566. I understand you to say that you came to a resolution that some measures were to be taken upon it?—Yes.

13,567. Do you remember what sort of resolutions they were; were they such as destroying the man's property or frightening him with a shell?—I never threw a shell at anybody.

13,568. I never suggested that you did, but were there not resolutions of the kind that something was to be done with a man's property, or that the man must come before the council?—Yes, we always concluded what must be done.

13,569. Then was it the custom to leave it to somebody to carry it out?—Yes.

13,570. Who was the man you generally selected, Patrick Nolan?—No he was not.

13,571. Who was the man?—There was William Burchall and John Suthers, and me, and William Smith, who carried out what I know about. I know nought about anything else.

13,572. That is what you have been telling us?—Yes.

13,573. Upon other occasions besides this have you employed anybody? When these resolutions were passed, whom did you employ to carry them out?—I do not know that I employed——

ELEVENTH DAY.

T. Rigby.

Sept. 1867.

13,574. Not you yourself?—Nobody that I am aware of.

13,575. Have you sent over to Manchester to get a man; have you ever got James Kay to do a thing of that sort?—No, I never had anything to do with James Kay.

13,576. You have not, but have you known him to be employed by your union?—I have heard them say that he has been.

13,577. You have not known him to be employed by your union to carry out your resolutions?—Yes, but I have not done it.

13,578. No one suggested that you had done it, but you have heard it said that they have gone over to Kay and got him to carry out the resolutions?—Yes.

13,579. Of course he would have to be paid for that?—Of course he would have to be paid for it.

13,580. Did you come to a resolution as to how much he was to have?—No.

13,581. You left that to somebody else to settle?—Yes.

13,582. That has occurred I suppose several times?—I do not know that.

13,583. You have heard it said several times that Kay has been employed many a time?—I have heard them talk about Kay many a time.

13,584. And for things of that sort?—He never does nought else, and he won't do aught else either.

13,585. And he won't do aught else?—Not him.

13,586. What is the utmost you have ever heard of, as being given to him for a job by the Oldham union?—25*l.* When he got that 100*l.* he got me fined 1*l.*, and when he got the 100*l.* from Manchester he got 7*l.* 10*s.* and should have had 15*l.*, but they did not give him 15*l.*, they only gave him 7*l.* 10*s.*

13,587. You have heard of his having as much as 25*l.*?—Yes.

13,588. What was the ordinary sum for a small outrage, 10*l.* or 15*l.*?—I do not know.

13,589. 25*l.* was the most, what do you think was the least, 10*l.*; it was never less 10*l.* was it?—10*l.*?

13,590. Yes.—Oh yes.

13,591. Because you know it had to be distributed?—I drew my own. I did not draw anybody else's.

13,592. Nobody imagined that you did, but 25*l.* was the most you ever got; what was the ordinary sum. 5*l.* or 10*l.*?—Do you mean Kay?

13,593. Yes?—That I cannot say.

13,594. Do you remember what the 25*l.* was for?—No, I cannot say that I do.

13,595. Just try?—I am sure I cannot.

13,596. I think you can?—I cannot.

13,597. Was the deed to be done in Oldham?—No.

13,598. How near Oldham was it?—It was done in Ashton-under-Lyne; I believe it was done at Blocksage's.

13,599. You think it was for that?—I was one of them.

13,600. Kay carried out your resolutions always to your satisfaction, I understand?—Yes.

13,601. That you think was for Blocksage's. Do you remember what any other was for?—No.

13,602. How came they to give 25*l.* for that outrage?—I do not remember; I heard that he had it.

13,603. How came the Oldham Union to give Kay 25*l.* for the outrage at Ashton?—I did not say that the Oldham people gave it him, did I?

13,604. I understood you to say so?—No, I did not say so. I say that was the most I have ever heard of, 25*l.*

13,605. Correct yourself by all means. Who did you hear gave it to him?—It was given by the Ashton people.

13,606. The Oldham people only paid for jobs done in their own district?—Yes.

13,607. What was the most you have ever known Kay to get for having done a job in your district?—I cannot tell.

13,608. 10*l.* or 20*l.*?—Nay, I do not know.

13,609. About that?—I hold no office at all.

13,610. What is the most of which you have ever heard tell?—I do not know. He had 7*l.* 10*s.* when he got the 100*l.*, but I do not know anything else.

13,611. Have you not heard of him having some money for doing a job in the district?—Yes, many a time I have heard of his having money, but not that I know anything about.

13,612. Cannot you mention one of the jobs?—No.

13,613. Were there so many that you cannot very well remember?—No, it is not that road.

13,614. But there were a good many?—There has been many a one.

13,615. (*Mr. Chance.*) Do you remember the murder of the police constable Jump in the year 1862?—Yes.

13,616. Was your union called upon to subscribe to the defence of the men who were guilty of that murder?—Yes, I believe it was.

13,617. Do you know how much you paid?—I do not know.

13,618. Was it upwards of 100*l.*?—I cannot say, because I do not know anything about it.

13,619. Do you know this book (*handing the same to witness*)?—I do not know it.

13,620. Cannot you read?—I cannot read without having my spectacles.

13,621. Have you not got your spectacles?—No.

13,622. Do you know the landlord of the inn where you used to meet, did he advance money for you sometimes?—At Manchester?

13,623. No, at Oldham.—Not that I am aware of.

13,624. What was the name of the man?—He used to be called "Syntax," or "Lord."

13,625. Is he the landlord of the inn where you met?—Yes, he is.

13,626. At Oldham?—They have shifted it since I was in the union.

13,627. Was he the landlord when you were there?—No, not when I was there.

13,628. Was he in 1862?—I cannot say whether he was or not; I believe he was in 1862, but will not say.

13,629. Do you know whether he was?—I was not in the union.

13,630. Not in 1862?—No.

13,631. How long were you in the union? Had you left at the time when you say you were not in the union?—I believe I was not in the union.

13,632. How long had you left the union?—It would be five or six years since.

13,633. Were you in the union at the time when Jump was murdered?—Yes, I believe I was.

13,634. Do not you remember that the Ashton men came to you to contribute to the defence of the men who were implicated?—I know they went about.

13,635. And they came to your union?—They came to our union.

13,636. Do you remember whether your union subscribed or not?—There was money given to them.

13,637. But you do not know how much?—I do not know how much.

13,638. Your union was one of the unions of the amalgamated society?—Yes.

13,639. How much did you subscribe to the amalgamated society?—I am sure I cannot say.

13,640. Was there a subscription to the amalgamated society except when any particular occasion arose?—No, I do not know that there was.

13,641. You do not remember the amount?—No, I do not.

The witness withdrew.

Mr. J. Wrigley.

Mr. James Wrigley sworn and examined.

13,642. (*Mr. Barstow*). Are you a member of the firm of Wrigley Brothers, brickmakers at Oldham?—Yes.

13,643. I must take you first to the spring of 1857; you were then employing union men, were you not?—Yes.

13,644. Had you to discharge your burner, or did he leave your employment, in the winter of that year?—He left of his own accord in 1857.

13,645. Then did you get a non-union man to replace him?—Yes.

13,646. What took place in consequence of that?—We had a shed set on fire.

13,647. But did the union men leave your service?—Yes.

13,648. Did they tell you before they went what they were going for?—They never told us anything.

13,649. Without saying a word they left your service?—Yes.

13,650. To what at the time did you attribute their leaving your service?—We employed non-union men.

13,651. Your employing that non-union burner was the reason they left, was it?—I always thought so.

13,652. After they left did anything happen to your property?—We had a shed set on fire.

13,653. How soon was that after the men had left?—It was in January 1858.

13,654. Between the time of the men leaving your service and the shed being set on fire had you any threats from the union men?—Not that I remember.

13,655. What was burnt at the same time that your shed was burnt?—About half the shed was burnt down.

13,656. After the fire did you examine the place?—Yes.

13,657. Did you find anything there?—No, nothing at all.

13,658. You found no naphtha or anything of that sort?—No.

13,659. Did they burn anything besides the shed?—They burnt some of the barrows and planks.

13,660. What was the total amount of damage done to you?—About 30*l.* or 40*l.* I think.

13,661. Did you give information to the police?—Yes, we offered a reward of 10*l.*

13,662. Was anyone discovered?—No.

13,663. After that time had you any damage done to your property?—We had needles put in the clay.

13,664. When was that?—It would be about two months after, I believe.

13,665. At that time were you employing non-union men?—Yes.

13,666. Did they do any damage?—They filled the clay full of needles.

13,667. But was anyone hurt with them?—Yes.

13,668. How many were hurt?—The moulder was hurt badly on two or three occasions.

13,669. Was anyone hurt besides?—No.

13,670. Was he permanently injured, or could he work at his trade afterwards?—No, he had to stop three or four days at times.

13,671. Have you sustained any damage to your property since that time?—We have had bricks spoiled.

13,672. When was that?—It was in May of the same year, 1858.

13,673. Were they destroyed by being trampled upon?—Yes, about 4,000.

13,674. Can you tell me how many men were engaged in doing that?—No.

13,675. About what was the damage done on that occasion?—It would be about 2*l.*

13,676. Was this damage to your property repeated continually?—I will not be certain whether there was any more done after or not.

13,677. You do not know whether it was so or not?—No.

13,678. Did you go on employing non-union men?—For about two years.

13,679. Altogether?—We had them mixed; there were union men and non-union men working together.

13,680. When was that?—At that time.

13,681. Was that in May 1858?—Yes.

13,682. And then sometime after that you discharged all your non-union men?—Yes, in about two years afterwards.

13,683. Have you ever had any damage done to your property since that time?—No.

13,684. I am now asking your opinion. To whom do you attribute this burning of your shed?—Well, I always thought it was the union men.

13,685. And the same of the other damage that was done to your property?—Yes.

13,686. However, you turned away the non-union men who had done you no damage and took in the union men who had done you this damage?—Yes.

13,687. And you have not been disturbed since?—No.

13,688. No one was apprehended in consequence of any of this damage I believe?—No, no one.

13,689. (*Mr. Chance.*) What was the name of your burner?—Samuel Smith.

13,690. Was anything done to him?—No, I do not remember anything.

13,691. Was he a non-union man?—Yes, at that time I believe he was.

13,692. Was he one of the men whom you discharged afterwards?—Yes.

13,693. And you discharged him in consequence of pressure put upon you by the union?—Yes.

13,694. But he was never himself injured, was he, that you know of?—No.

13,695. Nor threatened?—Well, I cannot say for that.

The witness withdrew.

SAMUEL SMITH sworn and examined.

13,696. (*Mr. Chance.*) Are you a member of any union?—Yes, I am in one now.

13,697. Of what union are you a member?—Of the Ashton union.

13,698. How long have you been a member of that union?—I have been in 30 years and better in all. I have been in about seven years this time.

13,699. Do you remember being in the employ of Messrs. Wrigley Brothers at Oldham?—Yes.

13,700. When did you first go to work with them?—I entered in 1857 and I tarried till 1859, two years in all.

13,701. What were you doing for them, were you burning?—I was burning for them.

13,702. And you say that you were a member of the union at that time?—No.

13,703. I thought you said that you had been a member of the union 30 years?—Yes, but off and on.

13,704. At the time you were working for Messrs. Wrigley you were not a member of the union?—No, I was not; I had been working in Yorkshire.

13,705. Do you remember his taking you on in the place of another burner whom he discharged?—He did not discharge him. This burner came to me and offered this job to me; I was working in the next yard; he asked me if I would take to this job because he wanted to go to another, and I said I would supposing his master (that was Mr. Wrigley) wished me to go.

13,706. Did he tell you why he was leaving?—Yes, he was going to Ibbotson Platt's working.

13,707. Did he give no further reason for his leavthan that?—No, he did not any further than that.

13,708. And then you went into Mr. Wrigley's employment?—Yes, Mr. Wrigley agreed that I should go and I did go.

13,709. Were there union men working in the yard when you went there?—There were union men working in the yard.

13,710. Did the union men then leave him?—Yes, but they did not leave him till the damage was done.

13,711. You remember the damage being done to

ELEVENTH DAY.

S. Smith.

17 Sept. 1867.

some sheds?—Yes, there were five men working and three of them were union chaps.

13,712. Do you know why the shed was set on fire?—I cannot say what it was set on fire for unless it was because Mr. Wrigley engaged a brother of mine who was not a union man. I never knew any reason, unless it was that. This brother of mine worked in the next yard to what I did and he engaged him, and he was not a union man.

13,713. Was he a moulder?—Yes.

13,714. Had anything been said to you at all by the union men?—No, they were always very agreeable with me.

13,715. Have you ever heard anything said against Mr. Wrigley?—No, I have heard them say that they had been to his house frequently, and they wanted him to stop me.

13,716. You call that being very agreeable with you; but did you hear them tell Mr. Wrigley that?—No, I did not.

13,717. But you said just now that you believed the union men wanted to stop him from employing you?—I do not know except that he said that they had been to him at times to stop me.

13,718. Did the union men try to stop you from working for him?—No.

13,719. Then who did try to stop his employing you?—I cannot tell who went to him, I do not know.

13,720. You say some one went to him?—Yes, some one went to him.

13,721. Were they members of the union?—Yes.

13,722. And they went to him to endeavour to prevent his employing you?—Yes.

13,723. Did he continue to employ you?—Yes, he never stopped me, he never offered to stop me.

13,724. Your brother you say was also a non-union man?—Yes, he was.

13,725. Did they also try to stop him?—I never heard anything of that kind.

13,726. But did not the union men ever say anything to you about working for him?—No, they never did to me.

13,727. What was the reason of the shed being set on fire?—I cannot tell you.

13,728. Do you not believe that it was because he employed you and your brother, you being non-union men?—I do not think it was so much against me as against my brother.

13,729. Why were they so much against your brother?—I cannot tell. He was working in Oldham long before I was.

13,730. Was it not because he was a non-union man?—I expect that would be it, but I cannot tell.

13,731. There was no other reason, was there?—No, not that I am aware of.

13,732. How long did you work for Mr. Wrigley?—I worked for him two years. I went at the back end of 1857 and I worked for him till the back end of 1859, that was two years.

13,733. How many times was his property damaged?—Three times in all.

13,734. Was not the cause for that the same as before, viz., that he was employing you and your brother who were non-union men?—Well, I cannot tell you, I am sure, about that. As I said before they never were against me, they were more against my brother than they were against me, but I do not know what the reason was.

13,735. Have you ever heard them say anything against your brother?—No, I never heard them say anything about him to me.

13,736. How did you know that they were against your brother?—I heard him say so himself before I went into Oldham.

13,737. You never heard any of the union men themselves say anything about him?—No.

13,738. But still as a fact, I suppose, you knew that at that time the union men did not like the non-union being employed?—No, they did not.

13,739. Do you know of no other reason why the damage should be done to Mr. Wrigley's property except that he employed your brother who was a non-union man, and yourself also a non-union man?—I do not.

13,740. No threats were ever held out to you?—No.

13,741. Have you been asked from time to time to join the union?—Yes, they did ask me from time to time to join the union.

13,742. And you refused for a time?—I did for a time.

13,743. Do I understand you to say that the whole time you worked for Mr. Wrigley you were not in the union?—No, I was not.

13,744. When did you join?—It is about seven years since, and I left Mr. Wrigley and went to Ashton again.

13,745. Why did you join?—Well, you know, because they kept coming to me and I had been a member before; but this was like a third club at Ashton, and they kept coming to me and I went in for quietness.

13,746. You say they induced you to join by constantly coming to you?—Yes.

13,747. If they had not come to you in that way should you have joined?—I might have done.

13,748. If it had been left to your own choice should you have joined the union?—I should not have done so just then.

13,749. (*Chairman.*) Were you fined last week for burning a kiln?—It is a fortnight since last night.

13,750. By whom were you fined?—It was the Ashton union, not the Oldham union.

13,751. For what did they fine you?—I was sitting up for a man that comes from Oldham and I did not charge him money enough. That was what they fined me for.

13,752. Were you sitting up to burn his kiln?—Yes.

13,753. You were doing his work for him?—Yes, that night.

13,754. How much did he pay you for it?—4*s.* and I should have charged him 6*s.*

13,755. And because you took 4*s.* instead of 6*s.* you were fined; how much were you fined?—1*l.*

13,756. By the Ashton union?—Yes.

13,757. Had you to pay the pound?—I have not done so yet.

13,758. But what do you expect will happen to you if you do not?—I cannot tell.

13,759. However they fined you 1*l.* because you did this man's work for 4*s.* instead of 6*s.*?—Yes.

13,760. Was this man a friend of yours?—Yes, he had done a good turn for me in former days and I thought I would do one for him.

13,761. What was the name of the man?—Thomas Jackson.

13,762. Whom does he work for?—He is doing for Mr. Whitaker at Hurst.

13,763. Where did you keep the kiln for him?—At Hurst, at Mr. Whitaker's.

13,764. Who told you of the fine?—A man who goes round gauging mouldings.

13,765. For the union?—Yes.

13,766. What is his name?—Zacharias Smithson.

13,767. Have you known him go round before for things of this sort, to mention to people about the fires?—Yes, he is a man put in for that just as much as he is for gauging the moulds.

13,768. And he came and told you that the union had fined you 1*l.*?—Yes.

13,769. How did they get to know that you had taken 4*s.* instead of 6*s.* from a friend?—If they asked me I told them the truth. He would have paid me more if I had charged him.

13,770. You did not charge him because he had done you a good turn on former occasions, and you thought you would do him a good turn now?—Certainly.

13,771. And for that the union fined you 1*l.*—Yes.

The witness withdrew.

ELEVENTH DAY.

Mr. C. Renshaw.

17 Sept. 1867.

Mr. CHARLES RENSHAW sworn and examined.

13,772. (*Mr. Barstow.*) In June 1862 were you carrying on brickmaking by machinery at Heaton Chapel?—Yes.

13,773. That is in the district of the Stockport brickmakers, is it not?—Yes, it was in the Stockport district.

13,774. Do you happen to know whether there is any rule among the Stockport brickmakers against making bricks by machinery?—I am not aware that there is any rule against it.

13,775. Have any of them ever told you that it was against the rules of their union?—No.

13,776. Do you remember on the 19th of June something happening to your property?—Yes.

13,777. What was that?—There was two canisters of powder placed under a machine which exploded. It did not do the machinery any damage at all, but it lifted the roof off the place and blew the end of the shed out. The roof was blown up but not carried away, and the end of the shed was blown out.

13,778. After the explosion did you examine your premises?—I did. I was called up early in the morning about half-past 5 and I examined the premises.

13,779. What did you find there?—I found the contents of two canisters that were exploded.

13,780. You did not find the contents of the canisters, I expect?—Of course that was gone; but I found the remains of two canisters.

13,781. What was the size of those canisters?—Well, I should suppose the two together would hold something like two gallons when they were put together.

13,782. Did they smell of anything?—Of powder.

13,783. And were there the marks of an explosion of gunpowder?—The machine was all covered with smoke and sulphur from the powder as though it had been blackleaded.

13,784. In short there were the marks of an explosion of powder?—There was.

13,785. What was the value of the damage done in money?—Well, the damage was not very great, I should say from 6*l.* to 8*l.*

13,786. Did you give information to the police?—Yes, I sent for Smith, the police officer, from Reddish.

13,787. Was there any one apprehended?—There was no one apprehended, but we traced the way the six men had come and the way they had gone back. We thought there were six from the footmarks.

13,788. You traced them to your works and from your works?—We traced them through the meadow grass, and we traced them back again through the meadow grass.

13,789. In what direction did they come to your works?—They came from towards Gorton.

13,790. Is Gorton on the road from Stockport to your place?—No, it lies wide of Manchester.

13,791. Is it on the road to Manchester from your place?—No, it lies wide of Manchester.

13,792. But it lies on the Stockport side of Manchester?—Certainly; it is between Stockport and Manchester.

13,793. Did they go back again in the direction of Gorton?—They went back in the direction of Gorton through the same field back again.

13,794. Gorton is in the district of the Manchester brickmakers, is it not?—I believe it is.

13,795. After this you got a watchman, did you not?—Yes.

13,796. Was your property in any way damaged after that?—No, I had never any damage done to my property after that. I kept a watchman and a couple of dogs, and I have a gun or two planted on the place you know.

13,797. I believe you found great difficulties in your trade?—Very much so.

13,798. The bricksetters would not set your bricks?—No.

13,799. And the brickmaker would not return them to you?—No, in two cases I had to return money.

13,800. That was in 1862 was it not?—It was; just a week before Jump was killed.

13,801. Are machine-made bricks better than hand-made bricks?—Well, they were considered so, and parties would have purchased them if they were not annoyed by the union.

13,802. They would have taken them in preference?—Certainly.

13,803. You have given up making them altogether now, have you not?—I have.

13,804. Was that in consequence of the annoyance with which you met?—It was in consequence of the annoyance that I met with.

The witness withdrew.

J. C. Johnson.

JOHN CLAY JOHNSON sworn and examined.

13,805. (*Chairman.*) What are you now?—A wooden shovel maker.

13,806. How long have you been so?—I daresay I have been a shovel maker for some 20 years.

13,807. Where you ever a brickmaker?—Yes.

13,808. When was that?—It would be some 20 years since.

13,809. Are the shovels which you now make shovels which are used in the brick making trade?—For various purposes. I make "tater" shovels for the "tater" walk in the Oldham Road.

13,810. Do you also make shovels which are used in brickmaking?—Yes, to a certain extent.

13,811. Are you now a member of any union?—Yes.

13,812. Which?—I am a member of the Sons of Temperance, and I am a member of the Manchester Brickmakers' Union.

13,813. How long have you been a member of the Manchester Brickmakers' Union?—I might have been very probably 20 odd years.

13,814. Have you ever filled any office in the union?—Not to my recollection.

13,815. You have never been secretary?—No; if I have it was some time back; 16 or 18 years since.

13,816. Not lately, at all events?—No.

13,817. Have you attended their meetings pretty regularly?—No; I do not think that I have attended a meeting for the last 12 or 14 years.

13,818. You send your money down?—I send my money down.

13,819. You have not had much to do with them lately?—No.

13,820. A little, I suppose, off and on?—No.

13,821. Not at all?—No.

13,822. Do you ever go by any other name besides "Johnson?"—Well, they call me "Shovel Jack," that is a well-known fact.

13,823. About five years ago were you an active member of the Manchester union?—No.

13,824. Did you occasionally do some things for them?—No.

13,825. Never anything?—No.

13,826. Are you quite sure?—Yes; I made shovels for them.

13,827. That I understand; but you have never done anything in the way of an outrage for them?—No.

13,828. You have never been concerned in anything of the kind?—No.

13,829. Did you ever hear of the outrage which was done upon Mr. Renshaw, the last witness, in 1862?—No.

13,830. Just think a little. Did you ever hear of an attempt made to blow up Mr. Renshaw's machinery?—No, not to my knowledge.

ELEVENTH DAY.

J. C. Johnson.

17 Sept. 1867.

13,831. You do not remember ever hearing anything of that sort?—No; not to my remembrance.

13,832. It is a sort of thing you cannot forget, you know. I tell you now, as it is my duty to tell you, that if you make a true and full disclosure of anything you may have done (I am not saying that you have done anything wrong) you will be entitled to have from us, and you certainly will have, an indemnity from us, so that you will not be troubled with any proceedings on that score at all; but the promise is only conditional on your telling the whole truth.—I solemnly declare before you the Commissioners and the public of England, whom I am depending on for a living, that I never committed an outrage, never destroyed a brick, nor ever injured a mortal man or any man breathing, to the best of my knowledge and my belief.

13,833. Very well; it was my duty to ask the question, and I did ask you. Did you ever hear of Renshaw's machinery being blown up?—I might have heard of it, but I have no remembrance of it at the present time.

13,834. You may remember that it took place about five years ago?—I cannot say.

13,835. But as far as you can recollect, was that about the time when you heard of it?—I cannot say; I might have heard of it, or read of it in the paper, the same as I have read of other outrages.

13,836. You tell me you never had anything to do with anything of the sort?—No.

13,837. That you swear?—Yes.

13,838. Were you ever in custody?—Yes.

13,839. How long ago was that?—I cannot say; it is a few years back.

13,840. Is that about five years ago?—I believe it is. I can tell you very shortly (*referring to a paper*).

13,841. Is that a memorandum of your own?—No, it is a letter from the Secretary of State to my father. I was in custody on the 12th of December 1862.

13,842. What were you in custody for?—For Burke and Ward being found on my premises.

13,843. Did they charge you with harbouring them, as the expression is?—Yes.

13,844. They were charged with that murder of which we have heard so much?—Yes, unfortunately.

13,845. Were you tried in court for that?—Yes.

13,846. Where were you tried?—In St. George's Hall, Liverpool, before Chief Justice Mellor, I think it was.

13,847. You mean Mr. Justice Mellor, and not Chief Justice Mellor. Were you found guilty?—Yes.

13,848. And what sentence had you?—18 months' imprisonment, with hard labour.

13,849. What prison were you in before you were tried?—Well, I cannot say. They had me in various places. I do not know where they had me scarcely.

13,850. Do you remember a constable of the name of Rogers, one of those who had you in charge?—I cannot say that I do.

13,851. Did they put you in the lock-up at Ashton?—I believe they did.

13,852–3. Before you were tried?—Yes.

13,854. Were you there with Burke and Ward in the same lock-up?—Yes.

13,855. Did you see a constable there of the name of Rogers?—Not to my recollection.

13,856. But you saw some constable there?—Yes, I might have done.

13,857. Did you have any talk with him?—No.

13,858. Let me remind you that you are on your oath, and that you are liable to the consequences of perjury if you do not speak the truth.—Very well.

13,859. Now, did you ask a constable of the name of Rogers, or any constable (you say that you do not remember the name of Rogers) whether he remembered six men passing him in the Hyde Road?—No, on my oath.

13,860. Just distinctly understand, I must ask you these questions, because the probability is that you will hear of it again, and, therefore, I want to ask you quite distinctly. When you were at the lock-up at Ashton did you ask the constable Rogers, or any constable (I will put it in that way that nothing may turn upon his name) whether he remembered six men passing him in the Hyde Road?—Never.

13,861. You never said anything of the kind?—No.

13,862. And did you say that you were one of them, and that you were the third man, or did you say anything of the sort?—Never.

13,863. Was anything of the sort said in your presence by any one?—Never.

13,864. Did you say, speaking of the six men and of yourself as being one of them, that you had been blowing up Renshaw's machinery?—Never.

13,865. Nothing of the sort?—Never to my recollection. This is the first time I ever heard of it.

13,866. Will you swear that you did not say so?—Yes, certainly.

13,867. Do not let it depend upon your recollection, because you cannot forget if you have said such a thing as that. I am obliged to ask you, in most distinct terms, did you ever use expressions of that sort or anything like them to any one?—Never.

13,868. Did you say that you did not get much for that job?—Never.

13,869. That there was not much damage done, and that it did not pay so well?—No.

13,870. You never said anything of the sort?—No.

13,871. Not to constable Rogers or any one?—No, no such conversation ever took place.

13,872. Nor anything like it?—No.

13,873. Did you ever mention your having done a job before that?—No.

13,874. Do you know a place called Cheetham Hill?—I know Cheetham Hill here.

13,875. Did you ever hear of a machine being blown up there?—I have heard reference to it.

13,876. Were you ever concerned in that?—Oh no, never.

13,877. That you swear, do you?—Oh yes, not in the least.

13,878. You had nothing whatever to do with it?—No.

13,879. You have heard of it you say?—Yes, I might have heard of it.

13,880. You remember the time by having heard of it probably?—I might have done.

13,881. And you swear that you never had anything to do with it?—Oh no.

13,882. Did you say on the same occasion to the constable Rogers, or to any one, that you had done a job before, that you had blown up a machine at Cheetham Hill, and had got well paid for it?—No, never.

13,883. Never anything of the kind?—No, never.

13,884. Did you also say that there were eight or more of them engaged, and that you received 25*l.* among you?—No, never such a conversation took place.

13,885. Nothing of the sort took place?—Nothing of the sort took place.

13,886. That you swear?—Oh yes, nothing of the kind.

13,887. There can be no mistake about it. I have pointed your attention distinctly to the statements made or supposed to be made by a constable of the name of Rogers, and you tell me that nothing of the sort ever took place?—Nothing of the sort ever came from my lips.

13,888. Nor in your presence?—Not in the least.

13,889. And you were not at all concerned in the outrage at Renshaw's or in that outrage at Cheetham Hill?—Oh no, not in the least.

13,890. I think you also go further than that, and say that you never were concerned in any outrage whatever?—I make a declaration that I defy all the police and all the brickmakers alive to prove that I was ever concerned in any outrage whatever.

13,891. You say that you made a declaration, what declaration was that?—I declare it here.

13,892. And you say that you have never been concerned in anything of the sort?—Never in my life.

13,893. I have no more to ask you.—I have one word to say, if you allow me, before I go down. If ever such a statement took place as what has been referred to, I have been in Butler Street 30 odd years, and why was not this case brought forward before? I crave no certificate at the present time. If an offence can be brought against me, let me be tried, as I have been before, by the judge of my country, and if my crimes have been as represented, let me suffer in prison, and make my recompence to my country.

The witness withdrew.

THOMAS ROGERS sworn and examined.

13,894. (*Chairman.*) What are you?—I am a constable in the Lancashire county police.

13,895. Have you been in the county police some time?—11 years.

13,896. Do you know the last witness, John Clay Johnson?—Yes.

13,897. He is sometimes called "Shovel Jack," I believe?—Yes.

13,898. We understand that he was apprehended in December 1862 on a charge of having harboured Burke and Ward?—I and another constable apprehended Burke and Ward at his house in a back bedroom.

13,899. Before that had you been on duty in June 1862 in Hyde Road?—Yes, I was stationed at Gorton at that time.

13,900. How far does Renshaw live from that place?—Two and a half, or it may be three, miles on the Stockport Road.

13,901. Do you remember the night when an outrage was said to have been committed and an attempt made to blow up Renshaw's machinery?—I recollect being on duty at about 2 o'clock in the morning, between what they call Jackson's beerhouse and Belle Vue gates on the Hyde Road. I heard footsteps coming, and I stepped on one side, and six men passed me with large sticks, something like cart legs, or something like that.

13,902. Did they come singly or together?—They came in single file. When they were just going past me I said, "Good morning," and the one in front said "Good morning" back. When they got clear away from me, I got through the hedge and crossed a field and got into Nelson Street, and got round by the houses and gave them a meeting opposite the prison gates—that is, the city gaol; and when they got to a house where a brickmaker lives, who I thought was one of them and whom I knew very well, they stopped there all six of them.

13,903. What is the name of that person?—Joseph Hibbert I thought was one, but I could not say that it was him.

13,904. I understand you to say that the house at which they stopped was Joseph Hibbert's house?—They stopped close to it and then they crossed the field, and then I could only see four.

13,905. You saw six go up to Joseph Hibbert's house?—Yes.

13,906. And after that you only saw four?—Yes, I thought that two went into his house.

13,907. And the other four you saw go on?—Yes, and Hibbert I felt confident was one. They went across to Ardwick, and then I lost sight of them.

13,908. When was this?—This was about a week before Jump was shot. The morning following, police constable Smith came from Reddish, and said that they had been blowing up or attempting to blow up a machine at Heaton Chapel. I said to Smith, "Have they left any footprints?" He said, "Not that we "can make out; if they have I can find out who has "done it;" and then I mentioned those names to him and what I had seen.

13,909. What names did you mention?—I mentioned Hibbert's name; I did not know the others; I believed he was one.

13,910. But you did not mention any others?—I did not because I did not know them.

13,911. On the following morning you heard of the attempt at Renshaw's?—Yes, police constable Smith came and told me, so I told him what I had seen.

13,912. After that we understand that this man Johnson was taken into custody for harbouring Burke and Ward?—I received him in custody from Sergeant Needham at Manchester. After we had apprehended Burke and Ward at his house, we left instructions for him to be apprehended if he came home, and he did so, and was brought in custody to me.

13,913. And where did you put him?—I took him to the lock-up at Ashton-under-Lyne.

13,914. Was he in the same lock-up with Burke and Ward?—No.

13,915. Was he alone?—Yes.

13,916. Was this at Ashton?—Yes.

13,917. And when was this?—This was in June.

13,918. Did you go into the lock-up when he was there?—He made a great disturbance at the lock-up, and the superintendent ordered him to be taken up into the chief constable's office, and I was left in charge of him.

13,919. When you were left in charge of him there did he say anything to you?—Yes, he did.

13,920. Will you tell us what he said?—He said that this was the last job which he would have anything to do with, that he had been in two or three jobs, but that this was a finisher. He asked me if I remembered being on Hyde Road that morning when Renshaw's job was, and I said "Yes;" he said, "I was third man in that lot."

13,921. Did he mention the number of men?—Yes, he said there were six men and he was third.

13,922. Did he say what they had been doing?—They had been at Heaton Chapel blowing up a machine.

13,923. That is where Renshaw lived?—Yes, it is. I did not know Mr. Renshaw at that time. He said there had been a dispute about their not having finished the work properly, and that they had not given them what they expected to get. They had been paid better, he said, for a job that they had been at at Cheetham Hill.

13,924. Did he say what sort of a job that was?—Well, I understood him that they had been blowing up a machine there.

13,925. Did he say that he got well paid for that?—He said he got well paid for it.

13,926. Did he say how many of them had been concerned in that?—Eight.

13,927. Eight or more?—About eight he said.

13,928. Did he say how much they had received amongst them?—I cannot remember, it was 20*l.* or 25*l.*, but I believe 25*l.*

13,929. Was it either 20*l.* or 25*l.*?—Yes, it was.

13,930. Have you any doubt at all that this was said to you by this man Johnson?—Not the least doubt. I believe Sergeant Barlow heard the same.

13,931. Was anyone else present at the time when he made this statement?—Not the first time, but he made the same statement either to Serjeant Barlow——

13,932. At the time he made the statement which you have been mentioning no other person was present?—No, not at first.

13,933. Did he afterwards make the statment again to you?—Yes, he did.

13,934. How long after was that?—It would be

ELEVENTH DAY.

T. Rogers.

17 Sept. 1867.

the same day. He said we must not mention it to any of the brickmakers, or else they would never buy any more shovels of him. He said we must tell them he was out of his mind, and then he jumped up and broke the window; he sent his fist through the chief constable's window.

13,935. I do not quite understand the story. Did he say that he was out of his mind?—He said we must tell them that we had been blowing gas into the room and made him stupified. He was not quite as right as he should be, and he jumped up and broke the chief constable's window.

13,936. He told you that you must tell that to the brickmakers?—Yes, if they said anything.

13,937. That you had been blowing gas into the room, which had stupified him, and that then he jumped up and broke the chief constable's window?—Yes.

13,938. Who was present when he said this the second time?—Sergeant Barlow I believe, or Sergeant Anderson.

13,939. You do not know which?—I am not sure. There were two or three of us in.

13,940. Who else?—Sergeant Grimshaw came in, but I am not sure that he was there at the same time, and Dr. Lees was sent for after that.

13,941. But the second time when this was said, you are quite sure that either Sergeant Barlow or Sergeant Anderson heard what you heard?—Yes.

13,942. On the second occasion did he say pretty well word for word what he said on the first?—No, he only referred to this Cheetham Hill job.

13,943. He did not refer to the Renshaw job?—No, I told him in his presence what he had said.

13,944. Then did you in the presence of these men refer to the Renshaw job and the Cheetham Hill job which he said he had done?—Yes.

13,945. Did he say anything to what you said?—He laughed; and said we must tell the brickmakers, if anything came out, that he was not right in his head.

13,946. You say that when Barlow or Anderson was there (one of the two, you do not remember which) Johnson mentioned the Cheetham Hill job?—Yes.

13,947. And then you referred to the Renshaw job, saying that he had admitted that he had been there also?—Yes.

13,948. And that was also said by you in the presence of either Barlow or Anderson, whichever it was?—Yes, it was.

13,949. What did he say upon that; did he say anything one way or the other?—I cannot recollect what he did.

13,950. He did not deny it?—No, he did not.

The witness withdrew.

Mr. R. Wilson.

Mr. ROBERT WILSON sworn and examined.

13,951. (*Chairman.*) Are you an engineer?—Yes.

13,952. Are you the manager of Messrs. Nasmyth's and Co.'s works?—Yes, I am acting partner for them.

13,953. In last summer were the Messrs. Nasmyth building some new smithies at their works?—Yes.

13,954. Did they obtain some bricks from two brickmakers in the neighbourhood?—They did.

13,955. Who were they?—Burton was the name of both.

13,956. Were they bricks of an inferior quality?—The bricks of one of the parties were of a very inferior quality and we could scarcely use them, and we applied to the other.

13,957. Did you make a complaint to the brickmaker whose bricks were inferior?—We did, and I was told that unless we took what they sent I could have none, so I applied to the other.

13,958. Who told you that?—It was the man himself, the maker; he sent me that work.

13,959. Which brickmaker was that?—I forget his Christian name, but Burton is his surname. They were close burnt bricks and they were very rough.

13,960. What did you do upon that?—I applied to the other brickmaker; I think his name is Edward Burton, of Eccles.

13,961. Are they any relation to each other?—I do not know that they are, but his bricks were so very small that we had a difficulty in bringing them in with the others, but of course we had to put up with it.

13,962. You took his bricks?—We took his bricks.

13,963. Was he forbidden to supply them to you?—Oh, no.

13,964. Then why did you not apply to some other brickmaker?—He was not forbidden to supply us. The second lot were not inferior; they were small but they were a very good brick.

13,965. You say they were small for your works?—Yes.

13,966. But could you not have obtained good bricks of a proper size suitable for your work from another brickmaker?—No, not unless I had sent to a distance, which would have made them very expensive. There are brickmakers about Manchester that I could have got them from.

13,967. Would they not have supplied you?—They would have supplied us, but I found such a difficulty in getting a supply that I determined upon making bricks this year; we did get a supply last year.

13,968. That is to say, when you found those bricks that you are speaking of so inferior. But were there not other brickmakers in Manchester who could have supplied you?—We did apply to the second brickmaker and got the bricks that we required, but they were so much smaller than the others that we had a difficulty in working them with the others.

13,969. Was there no other brickmaker in Manchester who could make you good bricks of a proper size?—I daresay there were, but then it would have increased the expense so much.

13,970. Was that the reason you did not apply to any other brickmaker?—That was the only reason.

13,971. This brickmaker was much nearer to you?—Much nearer; the first brickmaker was close at hand.

13,972. What course did you adopt?—We required a number of bricks for this year and determined to make them ourselves, because we had the finest clay on the ground in the country side.

13,973. Did you employ a person of the name of Twigg for the purpose of taking the upper surface off?—We did. He was a man in our own employ, who had made a great many bricks for us before.

13,974. Had he been in your employ some time?—Oh yes, a long time.

13,975. Is he a member of a union or not?—No, he is not a member of a union.

13,976. You say he had been in the habit of making bricks for you before?—For some years previous to this.

13,977. Was he doing anything else in your employ at that time?—He was in our employ as a sort of jobbing brick-setter, and, in fact he was a man who could be set to almost any sort of jobbing work.

13,978. You say you set him to take the surface soil off?—To take the surface soil off and to cast the the clay.

13,979. And did he commence to do it?—Yes.

13,980. What took place upon his commencing to do this work?—I was waited upon by two men who said they were sent by the brickmakers.

13,981. Did they say they came from the union?—They came from the union. They were deputed to

come from the union to see about making the bricks for me; it was early in February.

13,982. When was that?—It was early in February.

13,983. Of this year?—Of this year.

13,984. What did they say?—They said they had come to see me about the bricks, and I told them I had a man in my employ who was a good brickmaker, and that I intended to give him the brickmaking. They said I had better employ them, because if I did not employ them I might meet with annoyance, but that if I did employ them they would make as good bricks as could be made, and that then I should not be annoyed in any way. I said, "Do you mean that I "must look upon that as a threat that the union will "annoy me?" Well, they said, they did not say so, but they thought that if I considered the matter I would find it to my advantage to employ them. I I told them that I did not wish to have anything to do with the club at all, that I should certainly make my bricks independent of them. They then said I had better consider the matter, because if I did not allow them to make the bricks I might ultimately see that I had better have done so. I said I did not intend to have anything to do with them, and that I had made up my mind.

13,985. You in fact refused their application and determined to make your own bricks?—I determined to make my own bricks.

13,986. Upon that did you continue to make the bricks?—Yes.

13,987. During the time that Twigg continued to make the bricks did any of the union men come to him?—I do not know that they came with a distinct object to him.

13,988. Do you know whether they offered him any money if he would leave your work?—I do not know that they did.

13,989. He is here, is he not?—He is here, and he will speak for himself.

13,990. Did any other deputation come to you from the union after the one that you have spoken of?—They did not come from the union; but finding that it would be some time on in the season before I could have my own bricks made by myself, I sent to see if I could purchase bricks, but they also told me at the same time that if I did not allow them to make the bricks I should not get them set. They would not allow the bricksetters to set them. They told me so at that time. I then sent away to see if I could purchase bricks to suit my purpose in order to begin the work earlier than I should have to have done if I had waited for my own bricks being made; and my regular bricksetters that I had at the works constantly employed there went off. I may say that we were refused after that to be supplied with bricks from the district. It seems that the country is divided into districts by the brickmakers, and that our works were in the Manchester brickmakers' district. I was told (I forget who sent me the notice) that I would not be supplied with bricks from any district because I was making my own bricks. I then sent our brickmaker off to Swinton, which I understood was in another district, to see if he could purchase bricks there, and in the event of purchasing, to see if he could find men to set them, as I understood that the bricksetters were not to be allowed to set those bricks that we should purchase anywhere else. He went away and met with such bricks as he recommended me to purchase.

13,991. Out of the district?—Out of the district, in the Swinton district; and he found men also that would set the bricks in that district. I immediately arranged to purchase something like 200,000 bricks, on the understanding that we should have them set when we bought them. I then laid in about 20,000, and sent him off, as soon as they well admitted of being set, to find those men that would come and set them.

13,992. Did you get any men to set them?—No; by the time that he went the second time some of the brickmakers, forming a deputation from the brickmakers' union, had been to those men and persuaded them not to come and set these bricks.

13,993. Do you know what men they were?—From the Manchester union, or from some of the other unions.

13,994. But do you know who the bricksetters were that the men went to?—There is one of them here. I do not know their names.

13,995. Do you know the names of those men that were engaged?—I do not know the names of them.

13,996. You only know that there were some engaged?—I only knew that there were some engaged. I did not inquire about their names because I depended entirely upon our bricksetters to see that that arrangement was carried out. We found then that we could not get bricksetters to set these bricks that had been bought out of the district, and I immediately advertised for bricksetters. Three young men came belonging to the union and offered to set the bricks. I told them that I expected that if they came to set those bricks they would be turned out whenever it was found out that they were setting those bricks. However they continued.

13,997. Who were they?—I did not take down the names, but we have them in our books, and I daresay our bricksetter can give the names, he is here. They continued for about a fortnight, and after they had worked three or four days each week there was a deputation came from their union and turned them out. They were not allowed to set the bricks.

13,998. Did they tell you that this deputation had come from the union and told them they must leave off the work?—Yes, that they must go out.

13,999. Did they come back to you again afterwards?—They came back. They said they had gone to some of their meetings, and that they had fined them as much as they had earned at our works; and they came back stating that they would continue to work for me now on account of the severity of the fine, but whether that was true or a mere story I cannot tell.

14,000. I believe you refused to employ them again?—I refused to employ them. I said they had deceived me once and I should certainly not employ them again. Immediately after two men came who were not union men, who seemed to be very respectable men, and I engaged them, and they said that they could find more, and they brought me other two men.

14,001. Non-union men?—Yes, non-union men.

14,002. And did they do the work for you?—They did the work, and in all I got six men ultimately, and they certainly have been most respectable. They have behaved like men and done their work well, and continued without losing an hour all this whole summer.

14,003. Have they been at all interfered with by union men?—No, I am not aware that they have.

14,004. I believe when you advertised for bricklayers you said that union men would not be preferred?—I did.

14,005. Have you had any damage done to any of your bricks?—Yes, I had some damage.

14,006. When was that?—Just lately.

14,007. Was it in June of this year?—In July, think. I have the date of it here (*referring to a memorandum book*).

14,008. Was it the time that Twigg was working for you?—Yes.

14,009. And how long after he had begun to work for you in the brickfield were the bricks destroyed?—It was just lately that the bricks were destroyed; it was on the 6th of July.

14,010. How many bricks were destroyed then?—About 500.

14,011. How were they destroyed?—By some person walking through and amongst the bricks, those that were soft. Fortunately there was only a very small number that were so soft that they could destroy them; the others were too hard for them. It was evident from the footprints that they had been trying

ELEVENTH DAY.

Mr. R. Wilson.

17 Sept. 1867.

to destroy them also. The weather had been so unfavourable that we had very few very soft ones, and they walked through and destroyed about 500 of them.

14,012. What is your belief as to the cause of that damage being done?—I have no doubt at all that it was in consequence of our making the bricks ourselves. They had drawn stockings over their shoes to prevent our tracing exactly the print, and we found one of the stockings close by afterwards.

14,013. That was the only occasion, I think, upon which actual damage was done?—That was the only time. I expected to have been annoyed much sooner, but I have no doubt that the inquiries which were being made at the time prevented them from annoying us. I should have expected it to have been much worse if it had not been from those inquiries.

14,014. And those are the only occasions?—Yes.

14,015. And those are the only occasions on which you have come into contact with the brickmakers?—Yes; we only make our own bricks; we do not make them for sale.

14,016. (*Mr. Barstow.*) You say that you have no doubt it was done in consequence of your making your own bricks, but you did not mention the names of the parties by whom you have no doubt it was done?—Well, from the circumstance of its having been a concocted scheme, seemingly, by their having drawn stockings on to their boots and shoes, it seemed to me not to be a mere casual thing done by a drunken man.

14,017. But do you think that it was done by the union?—I have no doubt at all from what I have heard, not directly but indirectly, that it was in consequence of that.

The witness withdrew.

J. Twigg.

JOHN TWIGG sworn and examined.

14,018. (*Mr. Chance.*) Have you been in the employment of Messrs. Nasmyth and Company, engineers, for some years?—Yes.

14,019. You have been employed, I think, in different matters for them, have you not?—Yes.

14,020. You remember this year being directed by Mr. Wilson to take off the surface soil of some land belonging to them?—Yes.

14,021. That was for the purpose of making bricks?—Yes.

14,022. After you had been engaged in this work, did any man come to you from the union?—Yes, two men came to me.

14,023. Do you know who they were?—No.

14,024. Had you ever seen them before?—Never, that I know of.

14,025. What did they say to you?—They asked me if I was in the union; I said I was not. They said that I had no right then to be preparing for that job if I was not in the union, I said that I had a right to do anything that my master ordered so far as I could do. One of them offered me 5*l.* to give over and not do any more.

14,026. What did you say to that?—I told him I could not give over.

14,027. Did they say anything more to you?—He said he would find me another job if I would leave that.

14,028. Did you refuse to leave the job?—Yes, I said I could not leave it, I had been employed there a good while and could not leave that job.

14,029. Did they say anything more to you?—No, they said I must take what followed if I did not leave it.

14,030. Did they say that they would do anything to you?—No, they said nothing more.

14,031. Those were the words that they used?—Yes.

14,032. Did they then leave you?—Yes, they left me.

14,033. And you continued on the work?—I continued on the work all the summer.

14,034. Did they come to you at any time afterwards?—I never saw them afterwards.

14,035. Mr. Wilson had some bricks destroyed, had he not?—Yes.

14,036. Was that soon after the visit of those men to you?—No, it was in the middle of the summer.

14,037. Some time afterwards?—Yes.

14,038. Did they ask you to join the union?—They did not ask me to join it; they asked me was I in the union.

14,039. Did they not also ask you to join the union?—No.

14,040. Did not one of them offer to pay your contribution if you joined?—I offered to pay the contribution, but they would not have it.

14,041. Then you were willing to become a member of the union?—I was willing to pay the same as the others paid.

14,042. But they would not take you into the union?—No.

14,043. You were not afterwards interfered with by them at all, were you?—Not afterwards.

14,044. They did nothing more to you?—No, nothing.

The witness withdrew.

Mr. R. Ellerton.

Mr. ROBERT ELLERTON sworn and examined.

14,045. (*Mr. Barstow.*) You are a bricklayer, I believe?—Yes.

14046. In the spring of 1864 were you building some houses in Radnor Street?—In 1863.

14,047. Were you using machine-made bricks or hand-made bricks?—We were using hand-made bricks for the backs, and machine-made bricks for the fronts.

14,048. I believe you also had contracts for other houses in the same street?—Yes.

14,049. With reference to this did you see a man named James Kay?—Yes, he came several times.

14,050. What did he say to you?—He said that if he saw us using machine-made bricks they should not let us use hand-made bricks.

14,051. What did you do upon that; did you continue to use machine-made bricks?—Yes, we continued to use the machine-made bricks. At that time I was a member of the bricklayers' union, and they called a special meeting to know whether I was to use them or not, and they told me to go and use them, and they would back me up in using the machine-made bricks.

14,052. If you were a bricklayer what had Kay to do with you?—It was on account of the bricks. He was a brickmakers' delegate was James Kay, and he said he would stop the hand-made bricks if he saw us using the machine-made bricks.

14,053. Did he in effect stop you from building those houses?—Yes, we had to give up a contract for 12 houses in the same street.

14,054. In the autumn of 1864 were you building some houses in Crowther Street, Salford?—In 1863.

14,055. Did anything happen to them?—Yes, we got them nearly a floor high on the Thursday night, and on the Friday morning we found the biggest part of them pushed down.

14,056. How many men do you suppose it would take to push them down?—I cannot say. The person who saw them said that he should guess there would be 50 or more on the ground.

14,057. At 12 o'clock at night?—Yes.

14,058. Who was the person?—He was a mechanic, but I cannot say where he would be or anything about him. He was coming home from his work—he had been working late.

14,059. Did you inquire at the time where he lived?—I knew the row of houses that he lived in, but I did not inquire his name.

14,060. Could you judge at all, apart from that information, how many men had been up there?—No; there had been such a week of it, and it was such a wet night, that you could scarcely tell.

14,061. But you are a bricklayer—how many men would it take to do mischief of that sort in the time allowed, because they must have begun, I suppose, after dark?—At that time it was dark at 5 o'clock at night, and dark till seven next morning.

14,062. How many men do you suppose that it would take?—A dozen might have done it for that matter.

14,063. What was the damage to you in money?—I considered about 10*l.* at the time.

14,064. Were those houses built with machine-made bricks?—Yes, and at the time that we were building those houses we were building houses for Mr. Cradlin of hand-made bricks.

14,065. Were they pushed down or destroyed?—No; but James Kay went to the master brickmaker and told him that if he did not cease supplying us with bricks they should stop his work, and Mr. Cradlin told me afterwards that he and this Mr. Crowder, the master brickmaker, had given the men 10*s.* to let us go on and finish the job for them—four of the delegates, this Kay and three others.

14,066. But is this pushing down of your housse the only damage to your property which has ever been done?—Yes; that is the only damage.

14,067. You are a bricklayer?—Yes.

14,068. Are machine-made bricks as good as hand-made bricks?—Yes; I have always considered them so.

14,069. Are they better?—There is not so much waste in them.

14,070. Does it suit you as a bricklayer to use them better than hand-made bricks?—Yes, you do not get so much waste and you get them cheaper.

14,071. Do you suppose that if both machine-made bricks and hand-made bricks had fair play in the market, machine-made bricks would supersede hand-made bricks?—Yes; I believe they would.

14,072. And it would be for the benefit of the public that they should be used?—Yes.

14,073. And in your experience have you been prevented from using them by the action of the brick-makers' union?—Yes, and the bricklayers together.

14,074. It cannot matter to a bricklayer whether he sets a machine-made brick or a hand-made brick?—No; but I had a contract with Mr. Butterworth, and they stopped me from using them, and took my men away from me and would not let me finish the job.

The witness withdrew.

Mr. John Ashworth sworn and examined.

14,075. (*Chairman.*) I believe you are a brick-maker, are you not?—Yes.

14,076. How long have you been in business as a brickmaker?—About 20 years.

14,077. Where do you carry on your business?—A little off Regent Road, Salford.

14,078. Do you remember going to your brickcroft one morning in June 1864?—Yes.

14,079. Did you find that anything had happened to your bricks?—There were about 60 odd thousand of bricks destroyed.

14,080. How had they been destroyed; had they been trampled upon?—Yes.

14,081. Were they entirely destroyed?—Those were quite destroyed, or else there were more damaged, but those I took a particular calculation of.

14,082. How many men did you employ at that time?—I should think there were 30 men and boys together.

14,083. Did you notice whether any damage had been done to any other property of yours?—The barrow handles had been sawn off.

14,084. At that time were you employing union men or non-union men?—All union men.

14,085. Could you account for the outrage in any way?—I could not account for it only in one way, and that was having a son in the croft; I had a son there who was not a unionist, and they would not allow him to work; I could only account for it in that way.

14,086. How many sons have you?—I have two sons in the brickyard.

14,087. Was one of them a member of the union?—Yes.

14,088. And the other was not?—No.

14,089. And the other who was not was working in your croft, was he?—He would have worked but they would not let him.

14,090. Had he been working for you?—He had been working sometimes at some works, such as carrying slack to what they call the burner.

14,091. For you or for somebody else?—For me—for the burner.

14,092. But still he was at work in your yard?—Yes.

14,093. And he was a non-union man?—Yes.

14,094. And you have no other mode of accounting for the destruction of your property but the employment of your son, who was a non-union man, in your yard?—No, I have not,

14,095. I believe there were some four men taken up on suspicion, were there not?—Yes.

14,096. I believe that they were afterwards discharged, the evidence not being enough?—Yes.

14,097. Did you afterwards continue your brick-making as usual?—Yes, we started at work again.

14,098. After that was a man named Patrick Cullens taken up?—Yes.

14,099. Was he an operative brickmaker?—They told me at the time that he was a contribution man.

14,100. But he was a man who was either a contribution man or a unionist in some way?—Yes, I did not know him only by what they told me.

14,101. After he had been taken up do you remember some men coming to you from the union about that matter?—Yes, there were two men came to my field.

14,102. Do you remember who they were?—Only what my son told me.

14,103. What were the names which were mentioned to you?—Jonathan Edwards was one, and the other he did not know.

14,104. Did they come as from the union?—They were union men—this Jonathan Edwards was.

14,105. But did they come to make some proposition from the union?—No, they came to draw men away from work.

14,106. Did they draw the men away from the work?—All of them.

14,107. And they all went, did they?—Yes.

14,108. Do you remember any union man coming to make a proposal about this man Cullens, who was taken into custody?—I believe it was the day after those men were drawn away that George Mannering and James Kershaw came to me when I was working; I set to working myself, for the union men would not work.

14,109. Did your sons work with you?—Yes, I took them with me.

14,110. Your two sons whom you have mentioned?—Yes.

14,111. Then you say some of the union men came to you?—Those two men came to me, George Mannering and James Kershaw, and called me off the kiln; we were burning, and I said to them, "If you have anything to say, say it openly, I want no private

ELEVENTH DAY.

Mr. J. Ashworth.

17 Sept. 1867.

conversation." With that they would not say anything without I would come off the kiln.

14,112. If they had said it there at the kiln would others have heard?—Yes.

14,113. And they wanted to be private with you?—Yes.

14,114. Did you come off and go and speak with them?—My sons persuaded me to come off and go to hear what they had to say, and so I did do accordingly. I went on one side away, and they came to tell me that I must pay 50*l.* before I must make any more bricks.

14,115. Did they say why?—I asked them what it was for, and they said it was for the expenses of taking Cullens up.

14,116. And what did you say to that?—I said I should never pay 50 pence.

14,117. Upon that what did they say?—They said I had better not be too hasty about it or I should very likely have to rue that.

14,118. Did they then go away?—Yes; I told them to go away.

14,119. Did you then begin to burn bricks?—I began to burn them and put them all in the kiln, I and my sons.

14,120. Were you able to get any more men?—Yes; I believe we had two that were not union men; we could not get union men.

14,121. And you got two men?—Yes, besides my sons.

14,122. Was that a great hindrance to your business?—Oh, yes, it was a great hindrance to me in my business, because everything was lying wet, and all exposed to the weather.

14,123. And you could get no men but your two sons and those other two men?—That was all.

14,124. After that, as you could not get men, did you attempt to make bricks by machinery?—Yes, they told my sons, and I understood them to tell me, that they should make no more bricks for three years. This was what they told them, and I said they would never stop me from making bricks.

14,125. Then did you attempt to begin to make bricks by machinery?—Yes; after I had called all up, I set to and got a machine.

14,126. After having made bricks by machinery, could you find any market for your bricks?—Well, just a while at first; I did till the brickmakers and the bricklayers had combined together, and then I could find no market.

14,127. The bricklayers, I suppose, were not allowed to set any machine-made bricks?—Oh, no; I lost several customers. They would not have the machine bricks from me.

14,128. For fear of the brickmakers?—Yes.

14,129. Is it a constant practice with them, that they will not allow the bricklayers to set any machine-made bricks?—It is a constant practice. They have amalgamated together.

14,130. What, the bricklayers and brickmakers?—Yes, they have; that is the point of it.

14,131. Does that extend all over the Manchester district?—All over the Manchester district.

14,132. Does it extend, as far as you know, into the other union districts?—I cannot say anything about them.

14,133. Now did you continue attempting to make those machine bricks up to August 1865?—Yes.

14,134. At that time did you receive an anonymous letter?—Yes.

14,135. Have you it with you?—I believe they have it (*a copy of the letter was produced*).

14,136. "To Mr. Ashworth, Friday morning, "August 5th, 1865. Dear sir,—I think it my duty to "inform you that at a meeting of the operative "brickmakers, held in their own hall yesterday, there "was a committee appointed to consider the best "means of shooting you or otherwise putting an end "to your existence. In writing this I put myself in "quite as much danger as yourself if it should come "to the knowledge of this society of ruffians, and so "beg that you will not let my trouble be thrown "away, but put yourself upon your guard at once. "Now considering that I have done my duty I beg "to subscribe myself—A Well-wisher. P.S. If you "should value this communication any, please adver-"tise the receipt of it in to-morrow's *Guardian* in "the following words—'Received Well-wisher's "'letter. J. A.'" Is that the letter?—Yes, that is the letter.

14,137. And the copy is correct?—Yes.

14,138. You received that letter you tell me in August 1865?—Yes.

14,139. Did you advertise the receipt of it in the way suggested?—I did.

14,140. The writer of it I suppose you do not know?—No.

14,141. If you did I ought not to ask you who he was?—No, I should like to know.

14,142. Did you hand the letter to the police?—Yes, I did.

14,143. Having received that letter did you show it or noise it about among the masters?—Well I did not let the masters know much about it, for I had not much dealings with them.

14,144. But was any reward offered for the detection of the offenders?—There was a reward offered about the spoiling of the bricks. The masters came to me to ask me what I would subscribe, and I offered 50*l.* and they added 150*l.* to it. That was 200*l.* offered for the spoiling of the bricks.

14,145. That reward was offered, was it?—It was.

14,146. You mentioned that your bricks had been spoiled in the way you have told us; were there other bricks spoiled about that time?—I lived in Salford; two masters in Manchester had their bricks spoiled, but nothing near the quantity that I had destroyed.

14,147. And was it this destruction of property that lead to the offer of this reward?—Yes.

14,148. There was a bill of this sort, was there not (*showing a bill to the witness*)?—Yes, there were scores of bills put up.

14,149. The offer was one of 200*l.*?—Yes.

14,150. There was a mention in that notice of about 150,000 bricks having been destroyed?—Yes, I believe there was, but I only account for my own.

14,151. The date of this letter you told us was the 5th of August 1865?—Well, I believe it was in August.

14,152. I have taken it from the letter itself; it is the 5th of August 1865?—That will be right.

14,153. Did you at that time know a person of the name of William Parkes?—I did know him.

14,154. Was he a dyer at that time, in the employment of Mr. Worrall?—I believe he was a dyer or something at the works, but I cannot say what.

14,155. In Salford?—Yes.

14,156. Do you remember 10 days after you received that letter something happening to William Parkes somewhat near your house?—Yes.

14,157. Did you know whether William Parkes was at all dressed like your son Thomas?—He was dressed as near like my son as possible in the cap that he wore on his head, but I cannot say for his dress, and he was something like him about the head of him.

14,158. Do you remember about 10 days after you received this letter something happening to William Parkes?—Yes.

14,159. Just tell us what it was?—This was on Sunday night. I did not see it.

14,160. But you can tell us; we will have him afterwards?—I got up on the Monday morning, which I do mostly early, between six and half-past six, and I saw a lot of people, and I went to look at what was to do, and this was the place where they had beat him.

14,161. How far was that from your house?—Hardly 70 yards.

14,162. Was it in the Regent Road?—In the Regent Road; they had dragged him from the Regent Road to the corner of some buildings.

14,163. He had been very much abused, and he was

nearly killed, was he not?—Yes. If you had seen the stuff that came from his head, you would have thought he would never have lived.

14,164. I believe he was picked up by a policeman and taken to the dispensary, was he not?—Yes. I went to see him at the dispensary afterwards before 10 o'clock.

14,165. And was he in a very bad state?—I would not have given a farthing for his life.

14,166. Do you remember how long he was there?—I cannot remember.

14,167. Never mind, he will tell us himself. Now, do you remember whether any bottles were found about that place?—I saw the bottle they had beaten him with.

14,168. They had beaten him with a bottle, had they?—Yes, as far as I could judge.

14,169. Then was the bottle you saw broken?—It was broken I should think in nearly a dozen pieces.

14,170. Had there been anything in the bottle?—Yes, blasting powder.

14,171. Had there been a fuse at the neck of it?—Yes, about that length (*holding up his finger*).

14,172. Was the blasting powder scattered on the ground?—It all lay by the side of the bottle where it had come from, and parts of the bottles.

14,173. In addition to that bottle, was there any other bottle found?—There was another bottle found at the other side of my house, I saw that too; that was what we call a cider bottle, and this other was a porter bottle.

14,174. Had it been broken?—No, it was not broken at that time. It was filled with blasting powder, and the fuse was hanging out.

14,175. Then your house, as I understand, was somewhere between the two places where the bottles were found?—Yes.

14,176. I believe you do not know the man who did this?—No.

14,177. In consequence of this having been done to this man Parkes were you in constant expectation of some outrage being committed upon you?—Quite so.

14,178. Did the thought act upon you so much as to prevent you going out late at night?—Yes, I kept my house pretty well at night.

14,179. Do you know of any other reason for this sort of outrage upon you, or for this attempt at a man's life who seems to have been mistaken for you or your son, except the fact that one of your sons was a non-union man who worked with you?—I cannot say anything different as to spoiling the bricks, but this outrage was because, perhaps, I was making by machine.

14,180. Except those two causes of making bricks by machine, and the fact that you employed your own son who was a non-union man, had you ever given them any offence at all?—No. I can challenge the men to-day whether I have committed any offence against them.

14,181. Do you make bricks by machinery now?—No.

14,182. Have you had deputations calling upon you upon that subject?—A deputation of the masters came to me while I was making by machine.

14,183. Did they make by hand?—Yes, they made by hand; that was after Parkes had left. They came to me and they wanted to go through my works on the Saturday night, and I agreed with them very friendly. I said, "You can go through and see all that can be seen," and they went through with me.

14,184. They were friendly with you?—Yes, they went through with me and talked about the bricks. Then they said they thought that if I would ask a sum for my plant and things they thought I could get it. They thought the men had had enough.

14,185. Did you agree to anything of that sort?—No, I had promised it to the company at the time. I told them so.

14,186. Did you afterwards dispose of it to a company?—Yes, and it was turned into a company.

14,187. Was your reason for giving it up this sort of thing which had taken place?—Quite so; it was no good making by machinery when I could not sell them.

14,188. And with the prospect of having outrages of this sort committed?—Yes.

14,189. Have you sustained a great deal of loss in consequence of this?—I should think I have.

14,190. A good deal?—Yes.

14,191. Do you remember a man of the name of William Street coming to you?—Yes.

14,192. Did any other persons come to you besides the deputation of the masters?—No, when a letter was sent to me I showed it to the station-master at Cross Lane and let him read the letter, and he said, "I have something more to tell you," and I said, "What is that? Let me know all about it," and he says, "To tell you the truth they have prepared a "house for these men to go to after they have taken "your life."

14,193. Did they mention the house?—Yes, he mentioned the house and the man's name; he mentioned John Moseley's house at Eccles. John Moseley was one of the men who was to harbour the men when they had done the deed.

14,194. Do you know John Moseley?—Yes.

14,195. Was he a union man?—Yes.

14,196. Did he live at Eccles?—Yes.

14,197. What is the name of the station-master?—I called him Shepley, but, I believe, there is another name to call him by.

14,198. Has he told you that?—Yes.

14,199. How long was it after you had received the letter and after Parkes had been injured that he told you this?—It was before Parkes was hurt; it was about three days after I received the letter.

14,200. He told you that the house had been prepared to harbour the men after they had killed you, and that the person who kept the house was a man of the name of Moseley?—Yes; and he told me the way the men were to go to this house.

14,201. What did he say?—My house was fronting that road, and after they had done the deed they were to strike off the Regent Road, down the river side to Eccles, that is about four miles, and down the river side to his house; he told me that, so I thought he knowed all about it.

14,202. Do you know a person of the name of Street?—Yes.

14,203. Is he a gauger for the union men?—Yes.

14,204. Did he come to you at all?—He came on the 10th of this last August.

14,205. What did he say to you?—He came to me and told me I must discharge a man who was working for me.

14,206. Which man did he mean?—The man was painting some houses for me.

14,207. What was his name?—Peter Rider.

14,208. Is Rider a union man?—No.

14,209. He told you that you must discharge him?—Yes.

14,210. Did he say why?—No. I asked him if he knew the consequence of getting a man discharged, and he said he had nothing to do with that. He said that Rider had no right to work there or for any other brickmaster.

14,211. Had Rider been employed by you at the time when you had been making machine bricks?—Yes, he had.

14,212. Is he employed by you now?—No.

14,213. He had to go?—Yes; I had to bag him or they would have stopped the work.

14,214. Are you employing union men now, or not?—Yes.

14,215. Are they all union men?—Yes.

14,216. You would not be allowed to employ non-union men?—No, not unless I had to fight them again.

14,217. You told me that one of your sons was a union man, and that the other was not?—Yes; they have taken him in since.

14,218. And now he is allowed to work for you?—Yes.

The witness withdrew.

ELEVENTH DAY.

T. Ashworth.

17 Sept. 1867.

THOMAS ASHWORTH sworn and examined.

14,219. (*Mr. Barstow.*) Are you the son of the last witness?—Yes.

14,220. You are a brickmaker?—Yes.

14,221. And you keep a beerhouse in Regent Road, Salford?—Yes.

14,222. Do you remember a man named Cullens being apprehended on the charge of destroying bricks belonging to your father?—Yes.

14,223. Do you remember on the Sunday, whilst he was in custody, some men coming to your house about it?—Yes.

14,224. Who were they?—John Mulholland, Septimus Walker, and George Green.

14,225. Are they union men?—Yes.

14,226. And brickmakers, I suppose?—Yes.

14,227. Are you a member of the union?—Yes.

14,228. Were you a member of the union at the time when they came to your house?—Yes.

14,229. Did they speak to you about Cullens being apprehended?—They came to me and asked me whether I would intercede with my father and see whether I could not settle matters between him and them, and they should arrange to pay half the damage for the bricks spoiled.

14,230. Did they say anything about getting Cullens out?—Yes; this was the arrangement.

14,231. They proposed the arrangement that he should not appear against Cullens?—Yes; that he should not appear against Cullens, and they would see whether they could not arrange between masters and men, seeing if they could not pay the difference for the bricks being spoiled.

14,232. Did they say anything about the men coming back again?—They would come back again if they could make an arrangement between my father and me.

14,233. If he would not appear against Cullens, his old men would come back again to work?—Yes.

14,234. What did they say with reference to the bricks being spoiled?—They said that they would pay half the damage done, and they thought the masters would pay the other half.

14,235. Whom did you understand by "they" at the time?—The three men that came to my house.

14,236. They said that they would pay?—They were authorized by the body.

14,237. Then you at the time understood that they meant the union?—Yes, that was my understanding.

14,238. And that the masters would pay the other half?—Yes; they thought the masters would, they said.

14,239. Did you see your father?—Yes, I saw my father.

14,240. Did he do anything in the matter?—No; I asked him and he said, No, he would let the thing take the course it was doing.

14,241. After that, what happened at your father's yard?—Nothing, only these two men coming.

14,242. Did the men leave work, or were they out at the time?—They left work after this man got off. He was to pay 50*l.*, or they would withdraw the men.

14,243. Was Cullens prosecuted?—No.

14,244. How was that?—I do not know; he got off; my father tried to prosecute, but the man got off.

14,245. What do you mean by "tried to prosecute"?—He had him up at the Town Hall to prosecute him for destroying the bricks.

14,246. I suppose the magistrates would not commit him?—He got off; he did not get committed.

14,247. Were the men at work at this time?—No; they withdrew the men away.

14,248. At what time?—I do not know the date.

14,249. Were they out at the time that these men came to your house or not?—Yes, they were out at this time.

14,250. Were the men working at the time that these three men came to your house?—They were not working then.

14,251. I believe you were turned out of the union in consequence?—Yes.

14,252. What had you done?—I had done nothing.

14,253. You continued working for your father?—Yes, I continued working for my father, hoping to get the bricks in that were left on the ground. If I had not done that they would have spoiled on the ground as they were.

14,254. Do you remember the circumstance of George Mannering and a man named Kershaw coming to your father?—Yes.

14,255. Did you hear afterwards from your father what they had come about?—He told me what they had come about; he would not have gone off the kiln except that I persuaded him to go.

The witness withdrew.

W. Ashworth.

WILLIAM ASHWORTH sworn and examined.

14,256. (*Mr. Chance.*) You are the brother of the last witness?—Yes.

14,257. Do you remember a large number of bricks belonging to your father being destroyed in the year 1864?—Yes.

14,258. At that time were you working for your father?—Yes.

15,259. And I believe you were not a member of the union?—No.

14,260. Your brother who was last called was a member of the union?—Yes.

14,261. Do you remember a man of the name of Jonathan Edwards, and another brickmaker, coming to your father's yard?—Yes.

14,262. Do you know the name of the other brickmaker?—No, I do not.

14,263. Were the men working at the time?—Yes.

14,264. Did either of these men say anything?—No, Jonathan Edwards said all the men must stop.

14,265. He said that to the men who worked?—Yes.

14,266. Did all the men upon that cease working?—Yes.

14,267. Do you know whether Jonathan Edwards was a union man?—I suppose he must have been.

14,268. You do not know it as a fact?—He must have been when he came and ordered this.

14,269. Did you see two other men, George Mannering and James Kershaw, come to your father's brickyard?—Yes.

14,270. Do you remember how long after that was? I should think a day or two after.

14,271. Did they come to see your father?—Yes.

14,272. Were there any other men present except your father and yourself?—There was only my brother and my father and me.

14,273. What took place upon that occasion?—They asked my father to come off the kiln.

14,274. Did they want to speak to him privately? Yes.

14,275. So that you might not hear what they said?—Yes.

14,276. Did he go?—Yes.

14,277. Did he go at once?—No, he said, "Speak up aloud."

14,278. And when they asked him again he went?—Yes.

14,279. Did he withdraw with them out of your hearing?—He withdrew just a few yards.

14,280. Did you hear what was said?—I heard them say he must give them 50*l.* for law expenses for having apprehended Cullens.

14,281. Did they say what the consequences would be if he did not?—I did not hear them say what it was.

14,282. You did not hear what followed?—No.

14,283. What did your father say to that?—I cannot recollect what he said.

14,284. Did he refuse to pay 50*l.*?—Yes, he said if fifty pence would pay it he would not pay it.

14,285. Do you remember a man named Rider working for your father?—Yes.

14,286. When was that?—Last month, I believe.

14,287. Was he a non-union man?—Yes.

14,288. Had he been working for your father when your father was making machine-made bricks?—Yes.

14,289. Did you know a man of the name of Ward?—Yes.

14,290. Do you remember him coming to your father?—I remember him coming to the yard.

14,291. Did he say anything to Rider?—No, I did not know that he said anything to Rider.

14,292. To whom did he say anything?—He told me to tell my father that he must stop Peter Rider.

14,293. Did he say for what reason Peter Rider must stop?—No, he did not say any reason.

14,294. Do you know the reason why he was to stop?—I expect I know.

14,295. Was it your fault?—It was on account of working while we had the brick machine.

14,296. Had you a brick machine at the time?—No.

14,297. (*Mr. Barstow.*) Do you know what the value of the bricks were which were spoiled at that time?—No.

The witness withdrew.

JOHN PARKES sworn and examined.

14,298. (*Chairman.*) Are you a dyer?—Yes.

14,299. Have you been so for some time?—Yes.

14,300. Where do you work?—I worked for Mr. Worrell.

14,301. Is that at Salford?—Yes.

14,302. Do you remember August 1865?—Yes.

14,303. Were you coming from Eccles on the Sunday night, I think about the 15th of August 1865?—I was coming on the 13th.

14,304. On the 13th of August 1865?—Yes.

14,305. What time of night was it?—About a quarter to 11 when I was leaving the side of the "Swan."

14,306. How far is Regent Road from the place you left at Eccles?—Nearly a mile.

14,307. When you got to Regent Road it was some time about 11, or a little after?—Yes.

14,308. Was it a dark night?—Yes, very dark, and mizzled with rain.

14,309. Do you know Mr. John Ashworth?—Yes.

14,310. How far were you from his house when something happened to you?—About 150 yards.

14,311. That was before you got to it?—Yes.

14,312. Are there plenty of houses about there, or how was it where you were attacked?—It was very dark where I was attacked. There were six houses that were built lower down.

14,313. It was very dark at that place?—Yes.

14,314. Just tell us what happened to you?—I got struck in the head at the first onset.

14,315. From behind?—No, on the top of the head, and I leaned with my head against the wall.

14,316. Was the man in front of you when he attacked you?—He was at the side of me.

14,317. How many men did you see at the time?—There were only three that I could see.

14,318. A man came up at the side and struck you?—Yes.

14,319. Where did he strike you?—On one side.

14,320. What did he strike you with?—I could not tell you what it was.

14,321. Was it a violent blow?—It was a violent blow, and it stunned me, and I did not recover afterwards.

14,322. Do you mean that you do not remember what happened afterwards?—No, they dragged me across the road.

14,323. Did you fall down?—Yes.

14,324. Do you remember what was done to you when you fell down, or were you insensible?—I was insensible.

14,325. When you came to your senses were the men still there?—I did not come to my senses for nine days.

14,326. Then you recollect but one severe blow on the side of your head, to which you have pointed, and you say that you were rendered insensible for nine days?—Yes.

14,327. You do not recollect anything that happened to you afterwards?—I do not recollect anything after.

14,328. When you had then come to your senses did you find that you had received any other injury, besides that on your head?—Yes.

14,329. What other injuries?—All the front of my head was injured, and my left side right down to my foot.

14,330. What happened to your left side?—I was bleeding, and my eye was cut open and knocked lower in my head.

14,331. Is your eye still injured?—Yes.

14,332. You found that your eye was injured, and as you have described the whole of that side of your face?—Yes. I received all my wounds on my left side.

14,333. What other part besides your head was injured?—I was not injured in any other part except down to my leg.

14,334. Do you mean that your whole body from your head to your knee was injured?—Yes.

14,335. Were there bruises upon your body?—I had not any bruises upon my body; it was only on my arm and on my leg.

14,336. Had you severe bruises on your arm?—Yes.

14,337. Any more besides that?—The whole of my arm was bruised.

14,338. And down to your knee you said?—Yes.

14,339. Were your thighs hurt?—My thigh and leg was a whole mass of bruises, it was black.

14,340. Had you bled much, do you know?—I do not know whether I had bled, but a deal was seen next morning.

14,342. Had your face been cut open?—Yes.

14,343. That side of your face?—Yes.

14,344. Was your mouth injured at all?—No.

14,345. But the side of your head and your eye were injured?—Yes.

14,346. Your eye has never been the same since?—No.

14,347. Can you see with it at all?—Yes, a little.

14,348. The whole of the side of your face and your left side down to your knee was injured?—Yes.

14,349. And your arm was full of bruises?—Yes.

14,350. I believe when you came to your senses you were in the infirmary?—Yes.

14,351. How long did you remain in the infirmary?—A fortnight and two days.

14,352. Have you recovered the use of your arm?—Yes.

14,353. Is your head still affected?—I am not affected in any way at present except my eye; that has been the worst.

14,354. Had you done anything at all to give offence to anybody that you know of?—No.

14,355. Are you a member of any union?—No.

14,356. How long were you off your work before you were able to return to it in consequence of these injuries?—13 weeks.

14,357. Did you belong to any club that supports people in sickness at the time?—I belong to a club to

ELEVENTH DAY.

J. Parkes.

17 Sept. 1867.

which I pay 2*d.* a week to support us in sickness; we get 4*s.* 10*d.* a week; it is 5*s.* a week, but there is 2*d.* stopped for contributions.

14,358. Did you receive from them in the time of your trouble?—Yes.

14,359. 5*s.* a week?—Yes.

14,360. You received 5*s.* a week?—Yes.

14,361. But 2*d.* was deducted, and you got the benefit of 4*s.* 10*d.* a week?—Yes.

14,362. Is that the cap which you had on that night?—Yes.

14,362*a*. Do you know whether William or Thomas Ashworth ever wore a similar cap to that?—Thomas did once wear one similar to it.

14,363. And you were at the time going in the direction of Mr. Ashworth's house?—I had to pass both of them.

14,364. You had not got up to the house, but you were going towards it?—Yes.

14,365. Did you know, or had you time to see before you were struck, either of the men so as to know him?—No.

14,366. The two Ashworths, I believe, lived with their father?—Only one lived with his father, the younger son.

14,367. Have you ever stood alongside of either Thomas or William, so as to be able to say whether you are much about the same size?—I was much about the same as Thomas before I was hurt; there was very little difference in stature.

14,368. Was Thomas at that time wearing a cap like yours?—Yes.

14,369. I understand you to say that you never had anything from any other club except the 5*s.* from your own?—No; though it has been rumoured very strongly that the brickmakers allowed me 1*l.* a week.

14,370. Is that true?—No. I never had a sixpence from them. I wish that to be very well known.

14,371. You distinctly say that you never had a farthing from them in any shape or description, and the only money which you had was from your own club, which is for the excellent purpose of supporting its members in case of sickness?—Yes.

14,372. That is all?—Yes.

The witness withdrew.

P. Callinan.

PATRICK CALLINAN sworn and examined.

14,373. (*Mr. Barstow.*) You are a constable of the Salford police force?—Yes.

14,374. Do you remember the night of Sunday the 13th of August 1865?—Yes.

14,375. On the following morning did you find the last witness?—I did.

14,376. How did you come to find him?—I was going along Regent Road, near the gasworks, and I found a cap in a pool of blood.

14,377. That was the first thing you found?—Yes; about 80 yards further on I found the last witness leaning against the wall in the new street, opposite the beer-house, six yards up the street, leaning against the wall.

14,378. Was he sensible?—No; he was not sensible; he could not tell me anything.

14,379. Was he standing or leaning against the wall?—He was standing, leaning against the wall.

14,380. You took him to the dispensary?—Yes.

14,381. Did you search the place where you found him?—Yes.

14,382. You did?—Yes; I found a stone bottle broken in a pool of blood.

14,383. What sort of a stone bottle was it?—It appeared to be a large stone bottle, one of those jar bottles with a narrow neck.

14,384. What do you suppose it had been used for?—I could not say.

14,385. You could not give any opinion?—It was broken in pieces. I found the neck with a cork in.

14,386. Like a stone porter bottle?—Yes. I found the neck with the cork in it tied down.

14,387. There was a cork in the neck of the bottle?—Yes.

14,388. Was there anything else?—Yes; a fuse through the cork tied tightly down with a brass wire.

14,389. That was the neck of the bottle, and you found fragments of the bottle about?—Yes.

14,390. What did you find among the fragments?—There was powder scattered about in the blood.

14,391. Was there any powder adhering to the fragments of the bottle that you found?—Yes, in the bottom of it.

14,392. And another bottle was given to you?—The same morning.

14,393. Who gave it to you?—A young man named Johnson.

14,394. Did he give you an account of where he found it?—He told me he found it at the back of the toll-bar, opposite Cross Lane, at the side of a mill; it was a cider bottle.

14,395. It was broken when it was given to you?—Yes; young Johnson broke it to see what was in it.

14,396. Had it a cork in it?—Yes, and a fuse tied down.

14,397. A fuse similar to the other which you have just described?—Yes.

14,398. You found Parkes leaning against the wall?—Yes.

14,399. In what state was his face when you found him there?—It was in an awful condition, particularly the left side, and his eye was nearly hanging out just above it; I could put my finger in.

14,400. Were there any other wounds on the head?—Yes.

14,401. What wounds were there on the head?—There were several wounds about the middle of the head, particularly the left side.

14,402. Were there any more on the face?—Yes, over the eye.

14,403. (*Chairman.*) Was he bleeding?—Yes.

14,404. (*Mr. Barstow.*) Were there any wounds on the forehead?—I do not remember.

14,405. You did not examine him under his clothes?—No.

14,406. (*Chairman.*) Did you get assistance to take him to the infirmary?—I took him to the dispensary myself.

14,407. And he was insensible all the time?—Yes.

14,408. (*Mr. Barstow.*) With what did you think that the blow had been given?—The wound over the eye might have been done with a broken bottle.

14,409. It was cut?—Yes.

14,410. It was not the sort of blow which a stick would give?—No.

14,411. How were the other wounds given, were any of the other wounds cut, or were they done by a blunt instrument?—They might have been done by the bottle.

14,412. (*Chairman.*) He was not down on the ground as if he had been kicked, he was leaning against the wall?—Yes.

14,413. Those bruises on his arms might have been done by a thick stick?—Yes. I did not see those.

14,414. (*Mr. Chance.*) Were his clothes cut at all?—No.

14,415. Did they appear to be dirty at all?—He appeared to be dirty on the left side.

14,416. Did he appear to have been down at all?—I could not say.

14,417. (*Chairman.*) He was standing against the wall?—Yes.

14,418. Could you form an opinion by the footmarks as to about how many men had been engaged in it?—No, the place was dry and clean at the time.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

TWELFTH DAY.

Assize Courts, Manchester, Wednesday, 18th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq. Q.C. | GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq. | JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, ESQ., Q.C., IN THE CHAIR.

(*Chairman.*) Before we proceed with the evidence this morning, I wish to state that our attention has, I am glad to say, been very properly called to the question as to what cases we consider to come within the meaning of the word "intimidation" in the Act of Parliament under which we are acting. As it is, I think, most desirable that no misapprehension should exist upon the subject, I will state what we consider to be the meaning of that word in the Act of Parliament, and the sort of cases which we consider to fall within the scope of our inquiry under that particular head. The words of the Act of Parliament under which we sit are to the effect that we are to inquire into any acts of intimidation, outrage, or wrong alleged to have been promoted, encouraged, or connived at by trades unions or associations, and as to the causes of such acts, and the complicity therein of such trades unions or associations. Now, looking at the word "intimidation" there, in connexion with the words to which it is joined in the Act of Parliament, namely, "outrage or wrong," we think that any threats, whether actual or implied, of any violence or injury to the person or property, whether those threats are accompanied by actual violence or injury, come within the meaning of that expression; and we shall feel it our duty to inquire into any cases of that nature which may be brought before our notice.

Mrs. SARAH POTTER sworn and examined.

Mrs. S. Potter.

14,419. (*Chairman.*) Are you the wife of William Potter?—Yes.

14,420. What is he?—He is a roller coverer.

14,421. Where do you live?—In George Street, Barton Lane, Eccles.

14,422. Do you know a man named Mosedale?—Yes.

14,423. What is he?—A brick-burner.

14,424. Does he live in Eccles?—Yes.

14,425. And I believe he is a member of the union?—I believe he is, but I do not know for sure.

14,426. Do you know his wife, Mrs. Mosedale?—Yes.

14,427. Do you remember the assault into which we inquired yesterday, upon a man named Parkes, near Mr. Ashworth's?—Yes, I do remember something about a man being hurt.

14,428. Did Mrs. Mosedale tell you anything that was expected about it before it happened?—No; Mrs. Mosedale came into our house one day, and she said that there was something to do amongst the brickmen, and that they were for killing Ashworth.

14,429. Was that before or after anything that happened to Parkes?—Well, I cannot be certain whether it was before or after.

14,430. Where was she when she said this?—I was in my own house and she came in.

14,431. How far do you live from Mr. Ashworth's?—I do not know where Mr. Ashworth lives.

14,432. However, she came into your house and said there was something to do amongst the brickmen, and that they were for killing Ashworth?—Yes.

14,433. What else did she say; did she at any other time say that she was expecting any one?—Well, she did say once that there was some men to come to their house, but I do not know whether it was at the same time, or before, or after, but she did not tell me what the men's business was, nor anything.

14,434. Did she tell you of this at the same time as she told you what you have just mentioned?—I cannot be certain whether it was at the same time or not.

14,435. How far does she live from you?—She lives next door but one.

14,436. You say that you knew Mosedale?—Yes.

14,437. Did you see him last Saturday?—Yes.

14,438. Where did you see him?—Last Saturday but one I saw him.

14,439. Where did you see him?—I saw him in my house.

14,440. Had he ever been in your house before?—No, he never was in our house before in his life, before last Saturday but one.

14,441. What did he say to you?—His wife had told him that I had had a summons, and he came to ask me if I would let him look at it, and I gave it to him to look at.

14,442. A summons to attend this inquiry?—Yes.

14,443. Did he read it?—Yes.

14,444. What did he say?—He said I could go with him to attorney Roberts.

14,445. Did he take the summons?—He took it with him, but he sent it back again by one of the neighbours on the Friday after.

14,446. He kept it nearly a week?—Yes.

14,447. Then you did not go with him?—Oh, no; I never saw him afterwards till I saw him here.

14,448. He took the summons away from you last Saturday but one?—Yes, the same Saturday that I received it.

14,449. And he kept it till the Friday, and then sent it back to you?—Yes.

14,450. Was that all that he said; did he say why you were to go?—He never said anything more. I did not know then what the summons was for, and he said that he did not know.

14,451. That is all that he said, was it?—Yes.

The witness withdrew.

JOHN MOSEDALE sworn and examined.

J. Mosedale.

14,452. (*Mr. Barstow.*) Are you a brickmaker?—No, I am a brick-burner.

14,453. Are you a member of the brickmakers' union?—Yes.

14,454. Where do you live?—At Eccles.

14,555. But whereabouts in Eccles?—In Barton Lane.

14,456. Is there any number to your house?—No; George's Street they call it.

14,457. Is George's Street another name for Barton Lane, then?—It is George's Street, Barton Lane Eccles.

14,458. Did you go to Mrs. Potter's house last Saturday week?—Yes, I believe I did.

TWELFTH DAY.

J. Mosedale.

18 Sept. 1867.

14,459. What did you go there for?—I heard tell of her being summoned, and I went to see whether she was summoned or not.

14,460. What did you say to her?—I told her to tell all that she knowed.

14,461. I should think she might have done that without being told by you. Why should you go to tell her to tell all that she knew?—I never was in her house before in my life, and I thought I would see what sort of furniture she had.

14,462. That is not the same reason which you gave us just now. You said that you went to see if she was summoned?—Yes, I heard she was summoned.

14,463. So you told us?—And I wanted to know what she was summoned for.

14,464. And you went to see what sort of furniture she had?—Yes.

14,465. You might have done that at any time before. Now what did you go there for?—Why, because we were neighbours, you know.

14,466. But you had never been near her house before?—Well, that was the first time, then.

14,467. What made you go then the first time?—Why, can't I go where I like?

14,468. Do not answer me in that impertinent manner.—I am not answering in an impertinent manner. I do not think I am.

14,469. If you speak so I will have you taken down.—The sooner I am down the better. I have a right to speak as well as you.

14,470. (*Chairman.*) Your duty is to answer questions that you are asked, and if you show contempt or disrespect in that way we will most unquestionably send you to prison. Remember that I caution you. Answer the questions that are put to you properly. You have nothing else to do but that.

14,471. (*Mr. Barstow.*) What did you say to Mrs. Potter with reference to being summoned?—I do not remember saying anything to her except what I have told you.

14,472. You said nothing to her?—Only what I have told you.

14,473. Did you ask her whether she had been summoned?—Yes.

14,474. What took place upon that?—She said she had.

14,475. Anything else?—Not that I know of.

14,476. Did you ask to see her summons?—Yes.

14,477. There was something else, you see, did she show it to you?—Yes.

14,478. What did you do with it?—I put it in my pocket. I asked her whether she would lend it me.

14,479. What did you want it lent for?—I had no reason at all for having it lent me. I sent it her back.

14,480. How long did you keep it?—Three or four days, I should think. It was in my pocket all the time.

14,481. What made you take it away?—I do not know, I am sure. I was drunk.

14,482. Did you ask her to go anywhere with you?—No.

14,483. Did you ask her to go and see anyone?—No.

14,483*a*. Are you quite sure you did not?—Yes.

14,484. Did you ask her to see Mr. Roberts, the attorney?—No.

14,485. Will you swear you did not?—Yes, I said I was going to see him myself.

14,486. Although you say you were drunk, you say you quite distinctly remember that you did not say that?—Yes.

14,487. Do you remember there being some dispute between your union and Mr. Ashworth?—Yes, I heard summat about it; I have seen it in the papers.

14,488. Did you hear anything besides what you saw in the papers?—No.

14,489. Did you ever attend any meeting of the union about that time?—No, I cannot remember any.

14,490. Do you remember a man named Parkes being beaten?—Well, I heard tell of that affair happening; it was published in print that week end, I think.

14,491. Do you remember anything being said among the brickmakers about the dispute between Mr. Ashworth and the union?—No.

14,492. Nothing whatever?—No.

14,493. Did you ever hear it said that it was intended to use any violence towards him?—No.

14,494. You swear that you never heard anything of the sort?—Yes.

14,495. (*Chairman.*) How long have you been a member of the union?—I should think seven or eight years.

14,496. Have you filled any office in it?—No.

14,497. You have never been president, or secretary, or anything of that sort?—No.

14,498. Have you ever been a delegate of the district?—No, not that I can remember; I never was.

14,499. Do you mean to tell me that you could have been a delegate of a district and not remember it; have you or have you not been a delegate of a district?—No.

14,500. Was the first information you had of any injury being done to a man named Parkes contained in the papers?—Yes.

14,501. You never heard of that before?—No.

14,502. Did you ever hear that it was probable that either Mr. Ashworth or his sons would be injured?—No.

14,503. You never heard that he had been threatened?—No.

14,504. Nothing of the sort?—No.

14,505. Is it that you do not recollect, or that you never heard of it?—I never heard of it.

14,506. You never heard of it until the injury was done to Parkes?—No.

14,507. You never heard of his having a threatening letter?—No.

14,508. Do you know where Mr. Ashworth lives?—I know where he used to live, in Regent Road.

14,509. How far is that from your house?—It will be rather over three miles.

14,510. Do you remember now from having heard of it the night when that man Parkes was injured?—Yes.

14,511. It was in 1865 we understand?—I don't know what year of our Lord it was in.

14,512. Did any men come to your house that night?—Yes.

14,513. At what time did they come?—11 o'clock; not men, but one man.

14,514. Who was that man?—William Snape.

14,515. What is he?—A paviour; he paves for Mr. Bradwell.

14,516. What time did he come?—We turned out of Mr. Fisher's at 11 o'clock, and we went straight to our house, him and his wife, to have supper with us.

14,517. And nobody else came?—No.

14,518. You are sure of that?—I am confident of it.

14,519. Did you not expect anybody else that night?—No.

14,520. You never told anybody that you were expecting people?—No.

14,521. And that was the only person who came to your house that night?—Yes.

14,522. Did you ever hear that Mrs. Potter said that some communication had been made to her about people going to your house that night?—No.

14,523. How came you to go and ask for Mrs. Potter's summons; because you have told us one story about your going to her house to see her furniture. How came you to go and ask to see her summons, what was the reason?—Well, I do not know, to tell you the truth, to give you the reason. I was drunk, I tell you.

14,524. But you were not so drunk as not to remember what you said, so you were not so very drunk?—Well, you know a chap can think of some things when he is drunk and not of others.

14,525. You say you remember some things which you said when you were drunk, but that you do not remember others. Now I ask you what was the reason

that you wanted to see her summons. Do you remember asking for it?—I wanted to see whether she would be summoned the same day as me or not. That was what I wanted to look at her summons for.

14,526. Why did it interest you whether she was summoned the same day or not?—Why I do not know why it interested me. I know nothing about it.

14,527. And there was no reason in the world but what you have just stated why you went and asked to see her summons?—No.

14,528. What made you keep the summons five days?—Well, I sent it her back.

14,529. But why did you keep it for five days before you sent it her back?—Because I thought nothing about it. I did not know that I had it.

14,530. You remember asking for it?—Yes, I remember asking for it, but I forgot all about it till my missus told me.

14,531. And although you remember asking her for it, you have not the slightest notion why you asked her for it?—No.

14,532. Then how did you happen to remember just now that the reason for your going was that you wanted to go and see her furniture, and that there was no other reason in the world?—Well, you know a chap remembers some things when he is tipsy and not others.

14,533. But you are not tipsy now. I want to know why you remember that the reason of your going there was to see her furniture, and for no other reason whatever, that you can remember?—I can tell no reason, only I did not know where I was going, or something of that sort.

14,534. Was your reason for going there then to see her summons?—Yes, that was the only reason that I know on.

14,535. Had you any notion that she was going to say something about you?—I knew she could not do. I defy any man in England to say anything against me.

14,536. So you say. But are you aware that she mentioned something about you, about your going there that night?—I do not know what she has said.

14,537. Did you ever go to any other persons to see their summonses?—No.

The witness withdrew.

John Collins sworn and examined.

J. Collins.

14,538. (*Mr. Chance.*) Are you a brickmaker?—Yes.

14,539. Are you a member of the Manchester brickmakers' union?—Yes.

14,540. How long have you been a member of that union?—Between 30 and 40 years.

14,541. Have you ever held any office in the union?—Never.

14,542. No office of any kind?—Not whatsomever.

14,543. Have you attended the meetings?—Very seldom, I have at odd times.

14,544. Do you know Thomas Ashworth, the son of John Ashworth?—I do.

14,545. He is also a member of your union, is he not?—Yes, he is.

14,546. And he has been so for some years?—Yes.

14,547. Does he keep a beer-house?—Yes.

14,548. Was he keeping a beer-house in 1865?—Yes.

14,549. Do you remember a dispute between your union and Mr. Ashworth?—I am not aware that there was any dispute whatsomever.

14,550. Do you not know that Mr. Ashworth was making bricks by machinery?—He was.

14,551. Was not that brought before the meeting of your union?—It was brought before the members, but I was not there at the time that it was brought forward.

14,552. But you heard of it?—I did.

14,553. Had you been in the habit of going to Mr. Ashworth's beer-house?—Yes.

14,554. And had other members of the union also been in the habit of going there?—Yes.

14,555. It was frequented in fact by the union men?—Yes.

15,556. Do you remember hearing of a resolution passed by the meeting that members of the union should not frequent Ashworth's beer-house?—I was not there at the time.

14,557. But did you hear of such a resolution being passed?—I did.

14,558. Do you remember when it was that that resolution was passed?—I cannot say.

14,559. Do you remember an attack which was made upon Parkes in August 1865?—I remember it of course, I have reason to remember it, I saw the state he was in the next morning.

14,560. Can you tell me whether this resolution of which you had heard was passed before the attack upon Parkes or afterwards?—That resolution I know nothing at all about.

14,561. When did you hear of it?—I heard of it afterwards.

14,562. Who was the person that told you?—I cannot say. It was talked of among the operative brickmakers generally.

14,563. Do you know from what you heard whether the resolution was passed before the attack upon Parkes or after?—I cannot say.

14,564. Was it about the same time?—I cannot say.

14,565. Do you remember the time when Mr. Ashworth was making bricks by machinery?—I do.

14,566. Was it after he had been making bricks by machinery that you heard that the resolution had been passed?—It was after.

14,567. Then the resolution was passed, I suppose, in consequence of Mr. Ashworth making machine bricks?—I cannot say.

14,568. Do you not believe that it was so?—I cannot say. It is not for me to tell a story in front of you.

14,569. But do you not believe that that was the reason?—I cannot say.

14,570. But have you not heard it discussed?—I had heard it afterwards, but not previously.

14,571. Was it not stated by those with whom you conversed about this matter that that was the reason?—What, after the affair was done?

14,572. Yes.—I cannot say, I am sure.

14,573. You say that you heard it talked about amongst the men?—Afterwards I say.

14,574. You must have heard some reason given why that resolution was passed?—There was no particular reason given to me.

14,575. But surely you must have heard some of the members say why they did not go into Ashworth's beer-house. They must have given some reason for it, and you must have heard it?—Yes, I heard it afterwards.

14,576. Well, what was the reason given?—Because he was a son of Mr. Ashworth's.

14,577. And it was also said, I suppose, that Mr. Ashworth was in disfavour with the union because he was making machine bricks?—I dare say that that would be the foundation of it.

14,578. You went to the house, did you not, after you heard that this resolution was passed?—I was in the habit of going there many times, being a neighbour.

14,579. And you continued to go there?—I did.

14,580. Were you fined by the union for going to the beer-house?—I was.

14,581. What were you fined?—A sovereign.

14,582. Had you known of the resolution before you went?—I had not.

14,583. And you were ignorant of the resolution which was passed at the time?—I was not there at the time the law was made.

TWELFTH DAY.

J. Collins.

18 Sept. 1867.

14,584. And you were ignorant of the resolution having been passed until you were fined?—Yes.

14,585. (*Chairman.*) You paid the fine, I suppose?—I did.

The witness withdrew.

Mr. GEORGE TAUNTON sworn and examined.

Mr. G. Taunton.

14,586. (*Chairman.*) I believe you are a master brickmaker, are you not?—Yes.

14,587. Do you live at Cheetham?—Yes.

14,588. I believe there is a master brickmakers' association, is there not?—Yes.

14,589. And I think you are chairman of it?—Yes.

14,590. How long has that association existed?—I think nearly 20 years.

14,591. Have you been a member all that time?—No.

14,592. How long have you been a member?—About 10 or 11 years I think.

14,593. Can you give me any notion how many members it has?—There are about 70 members I think.

14,594. You are the chairman, as you say; what other officers have you?—We have a committee consisting of 12, a treasurer, and a secretary.

14,595. How often do you meet?—Well, there are general meetings the first Wednesday in every month, and there are committee meetings in the interval if we have any bad debts out. It is called every week, perhaps, if it is requisite.

14,596. What are the principal objects of your association, to protect your own trade?—To protect our own trade and our interests. Formerly I believe the fundamental principle of it, and what it was formed for, was this: it was owing to a great deal of swindlers, and what we call speculative builders, being in Manchester and Salford, and particularly in Hulme, and they used to get bricks, and get a floor high from one master brickmaker, and then perhaps they would go to another brickmaker and get another floor, and leave the first maker unpaid for that, and they would perhaps finish with another brickmaker, and then they went to Lancaster. As the phrase at that time of the day was they went to Lancaster to get "whitewashed." That was the speculative builders, what we call "jerry men." That was the phrase that we used.

14,597. And they came and put a floor up and then went away, and got another person to put up another floor?—Yes.

14,598. What was the reason of their going about in that way?—Well, it was swindling. I cannot think of any other word to apply to it.

14,599. How was it swindling?—They would get the bricks and not pay for them.

14,600. That I understand.—Then they would get another floor and not pay for that perhaps. It is generally understood that we receive it by floors.

14,601. Without paying, off they went?—Without paying off they went. Then when we took any law proceedings against them then they used to go to Lancaster.

14,602. They did not always go to the same place, otherwise you would have known where to find them?—At that time of the day 20 or 25 years ago I think they used to go to Lancaster chiefly from here.

14,603. Your object was to protect yourselves against things of that sort?—Yes. If they do not pay now our association has been the means of driving a lot of those people out of the town; they have gone to some place or other. Latterly I believe they have got to Southport, and Crewe, and other localities.

14,604. Against what sort of injuries was this association to protect you? Was there anything with the bricklayers, or anything of that kind?—Well, we never had anything to do with them. We have had cases here and there where one of those swindling parties, those jerry builders, has been using bricks, and just latterly we could ask the bricklayers through the operative brickmakers to assist us in those difficult cases. I think we have only resorted once to that, because it has been an expensive thing to withdraw the men. I believe we have only done it in one case, and that was only half a day, I believe, and that was a very extreme instance. I will furnish you with a defaulters' list.

14,605. Do you belong to the operative brickmakers' union in Manchester?—Yes; if you take an active part in working they compel you to subscribe to their union; that is, they do not allow you to attend any meetings, of course, but if you take any active part as a workman you have of course to be a subscriber.

14,606. You have told me of your masters' association, but you say that you are obliged to belong to the Manchester operative brickmakers' union?—I am obliged to belong to it if I work.

14,607. Do you mean if you employ hands to work?—No; if you work yourself, supposing you set bricks or burn them. Many of the masters take an active part and work in it, and if they do that then they have to pay a contribution.

14,608. Otherwise you are not allowed, as masters, to do any work unless you belong to the operative union?—You must subscribe to it.

14,609. But you are not allowed to attend a meeting?—No.

14,610. Are you at all bound with reference to the price at which you have to sell your bricks?—Yes, we have fixed our prices generally on an understanding amongst us that we sell our bricks at a certain price.

14,611. Is that an agreement amongst the masters' association by yourselves?—Yes.

14,612. That you shall all sell at a given price?—Yes.

14,613. Do you come to any agreement between yourselves or with the operative brickmakers' union as to the price of labour?—No, they do all the dictation in that matter.

14,614. Who do?—The operatives.

14,615. But do they dictate to you?—Yes, they tell what we are to pay them.

14,616. That is what I wanted to understand?—Yes, they charge us so much per 1,000.

14,617. Then you have, if I may so call it, your directions from the operative union as to the price which you are to pay for labour?—Just so.

14,618. And if you do not pay them what happens?—We should have a strike.

14,619. And sometimes a little more?—Yes, very likely, perhaps.

14,620. Of course that comes into part of the question of labour, and the time of working comes into the same consideration, I suppose?—Yes, the hours are fixed, that has been latterly done.

14,621. Had you ever any bricks spoiled yourself?—Yes.

14,622. When?—On the evening of the 24th of June 1864, I believe it was.

14,623. Where were your works then?—In Bank Street, Cheetham.

14,624. That is in the Manchester district, is it not?—It is in the Manchester district.

14,625. Have you any notion why your bricks were spoiled?—I have no notion at all.

14,626. After three years' reflection upon it you cannot give any reason why your bricks were spoiled?—I cannot, unless it was that I strongly advocated machinery; I had spoken pretty freely, perhaps, upon machinery amongst our association at different times.

14,627. That we understand is a deadly offence?—That is obnoxious to the brickmakers; it is the means of lowering wages, and it will naturally be obnoxious, no doubt.

14,628. But you exercised your freedom of opinion, and you can give no other reason why your bricks

were spoiled but that?—I cannot, and I only surmise that.

14,629. It has been said that the invention or employment of machinery tends in the end to increase the labour and the number of hands employed, although it may not at the moment have that effect; has that been your experience?—I believe it would increase hands, perhaps, but then they would not get so much wages as they do.

14,630. They may or they may not; but you know that it is said among political economists that the result of the employment of machinery has been of a considerable benefit to the operative classes, and that they have gained by it, not only in wages but in the number of hands employed. You have heard that, I daresay?—That point is very right.

14,631. But it may be attended with immediate loss at the moment to the person who may be employed in making whatever may be the article in question without machinery?—Yes; you see there is a great difference between clay being worked in machinery and cotton and silk and all those matters, because it is a heavy rough material, and there is a great deal of wear and tear on the machinery for little value.

14,632. What is your experience with regard to machine-made bricks and bricks made by hand? In your judgment, as far as that particular trade is concerned, would fewer hands be employed throughout the country if bricks were made by machinery?—In my experience in machinery I have not seen any machines that could compete with hand labour. I say that from the experience that I have had amongst it. Those machines which have been commenced here have all of them failed; the owners have all of them I think been insolvent.

14,633-4. But have there not been certain causes at work which might account for the insolvency besides the business?—Well, the frustration no doubt would have a tendency; but I can speak for other counties. I have a cousin that makes bricks by machinery in Nottinghamshire, where there were no unionists existing, and he was only telling me as he was looking at this machine up here, about a month ago, "I lost 500*l.* or 600*l.* by machine; it is in its infancy yet."

14,635. Then in your judgment are hand-made bricks better than machine-made bricks, or is it the other way?—Hand-made bricks are the best, with the exception of those made by Ibbotson and Platt's machine. I believe that would pay and make as good a brick and as cheap a brick if they could be mixed. It makes a class of bricks which we call stock and second bricks which are used for frontages; but that machine, and no other machine that I have seen, I think could compete with what we call the common bricks, which are mostly used, and of which there is the greatest consumption.

14,636. Have you changed your opinion then since your bricks were spoiled?—Well, I have rather changed my opinion since then, because all the companies are gone down, and I have thought they had not got the machine yet up to the mark.

14,637. Then I suppose there would be great difficulty in this district in making bricks by machinery for fear of damage?—There would be great difficulty. There is a very strong combination between brickmakers and bricklayers.

14,638. Against machine-made bricks?—Yes, it would take a great deal of capital to break through that combination.

14,639. And perhaps some physical force?—I cannot speak to that.

14,640. Have you an insurance company among yourselves to pay for damage?—We have.

14,641. Is that in case of any wilful damage being done by anybody?—That is the nature of the insurance.

14,642. It is against wilful damage and not accidental damage?—No, it does not come under accidental damage. We could not have much accidental damage in our business; it is not a combustible article.

14,643. Did you after your bricks were spoiled get any per-centage of the damage from the insurance company?—75 per cent.

14,644. Is that insurance company part of the masters' association, or is it a different company?—It is apart from the general association; it is voluntary. There are some members in and some are not.

14,645. Is it a distinct company?—It is distinct from the general funds.

14,646. We understand that Mr. Ashworth began to make machine bricks?—Yes.

14,647. That as you have told me was an offence to the unionists?—Yes.

14,648. Did any deputation wait upon you with reference to Mr. Ashworth making bricks by machinery?—Yes.

14,649. Who came?—John Holland and George Mannering.

14,650. Two of the union men?—Yes.

14,651. The object was I suppose to get you to interfere or intercede (call it what you like) with Mr. Ashworth to induce him to give up his machine?—Yes; I have heard that he was inclined to give up, but then he had been agait a good while then.

14,652. And was it mentioned to you by them that they had imposed a fine of 50*l.* upon him?—Yes.

14,653. Did they offer to remit that fine of 50*l.* if he would give up making bricks by machinery?—They told me that they had not come officially, but they had no doubt but what the 50*l.* would be rescinded, and byegones should be byegones, if I and my friend, Mr. Miller, would only be the conciliating parties to induce him to give it up, and then the fine would be rescinded.

14,654. Did you see Mr. Ashworth on the subject?—Yes, I saw him along with the parties that I am speaking of.

14,655. You mentioned something about defaulters. Was your association originally formed for the purpose of meeting your debts in the way you have described?—Just so.

14,656. That was the original and primary object of your association?—Yes, that was the original object.

14,657. I suppose there is an understanding among you that if a man be a defaulter in that way none of you employ him while he continues to be a defaulter?—We do not sell him any bricks until he has paid his accounts; although he may be an insolvent and go through the Bankruptcy Court, we do not sell him any bricks until he has made an arrangement with us of 20*s.* in the pound.

14,658. Did you know a man of the name of James Kay?—Yes.

14,659. Did your association employ him?—Our association employed him.

14,660. Was that for the purpose of getting at those defaulters, or for any other purpose?—No.

14,661. Was it for any other purpose?—No, not for any other purpose.

14,662. Did he stop bricks?—Yes, he had to inform our makers that no bricks must go to so and so.

14,663. Supposing there was a defaulter, would the men be called off from working with him?—We should stop the supply, and then consequently he would not have any bricks to go on with.

14,664. But did you not also call the men off from working with him?—Never but once I think.

14,665. You did so once?—Yes, once I believe. I cannot recollect any more than once.

14,666. Did you employ Kay for that purpose?—We employed Kay for that.

14,667. There was some defaulter, and the men were working for the defaulter, and you employed Kay to draw them off?—Yes, this man was a great swindler, and since that I believe he has gone to New Zealand. You will see his name on the defaulters' list, his name was Coleman. He was building, but now he has "skedaddled" off again. We put rather more pressure there than we do generally.

TWELFTH DAY.

Mr. G. Taunton.

18 Sept. 1867.

14,668. There was no other occasion on which you remember that Kay or anybody else was employed to draw the men off, but it was done in the case of this man?—Yes, to inform us where these parties were.

14,669. Are there any machine-made bricks now in Manchester?—Yes, there is one going on with Johnson, the wire worker in Bradford, I believe. He has put one down lately, but with the exception of that I think there are none.

14,670. I suppose from what we have heard of the sort of things that have been done, and the outrages that have been committed, the machine-made bricks have never had what you call fair play in this district?—Not since the combination came with the brick-makers, but previous to that of course they had a better opportunity.

14,671. When was that combination formed?—I should think it is two or three years ago perhaps. It would be the time that Kettle's affair was on here, the goal job. It would be the time that Mr. Bramall's affair was on.

14,672. They have never had fair play or fair competition since that time at all events?—No, but previous to that of course they had pretty fair play.

14,673. I think you explained to me that you considered that machine-made bricks for certain purposes are better than the hand-made bricks, but that the hand-made bricks for certain other purposes are better than the machine-made bricks?—Yes, they are of different classes.

14,674. Can a machine-made brick be made cheaper than a hand-made brick?—I question it very much; I never had a machine, and I only speak from what men I have seen employed about it. I have taken an estimate about it sometimes. I have had notions about it. When there is anything fresh you must go on with the times. When you are in a business you must keep with the times, and of course I have looked into it, and I have taken a calculation both of Mr. Atken's machine and this of Marsland's in Ardwick, and I thought really they were costing more than hand-made bricks, rating men at 3*s.* 6*d.* a day, or something like that.

14,675. You include of course the labour as well as the expense of the machine?—The labour as well as the expense of machinery.

14,676. Do they cost less in labour?—They would cost less I think by hand.

14,677. Then actually according to you the machine-made bricks would cost more in labour?—Taking labour and wear and tear both together, I believe they would, with the exception of Platt's; I do not know whether that would.

14,678. Then in your judgment a machine-made brick would actually cost more in labour than the hand-made brick?—Labour and wear and tear, taking all together, I believe it would with those machines that I have seen working, there is such a great stress on the machinery.

14,679. But independently of the wear and tear of the machinery, you told me that in point of labour there would be as much in the machine-made brick as in the other?—I do not think there would.

14,680. But taking the labour altogether of those who are employed in whatever requires manipulation with regard to the formation of the brick, and also of those who are employed about the machinery, would there be as much labour in making the machine-made brick as in making the hand-made brick?—I think you mean the labour, leaving out the wear and tear?

14,681. I do.—Well, I should question that very much. I do not think they would, because the wear and tear is so much, and they break down, and so on.

14,682. That is as to cost. I am speaking of labour. Taking labour before you get the profit, you must look at the capital employed, the interest of the money, and the wage. Now, as a matter of fact, do you imagine that in point of labour, taking only the operative view of the question, there would be as much labour and as many hands employed in the one case as in the other?—There would be more hands employed to work a machine than are employed to work a stove by hand.

14,683. Then, taking the two together, the hands employed in hand work, with regard to making the bricks, and the hands employed when the bricks are made by machinery, would there be more operative work and manual labour in the one case than in the other?—I think there would be more hands employed by machinery, I have no doubt of it, but at less wages.

14,684. The rate of wages would depend upon a variety of causes, but there would be more hands employed?—There would be more hands employed, I have no doubt.

14,685. And it might be true in these cases, as in other cases which political economists have written about, that the operatives in the end would gain by the employment of machinery. That would follow from what you have said, supposing you are right?—Yes, I daresay, but still it would have a tendency to lower wages.

14,686. That you know entirely depends upon other causes; it depends upon the price of food, and the demand, and other things, which I need not go into now?—Yes; you see we pay about 13*s.* a day for operatives, while the machine pays only 3*s.*, or perhaps 2*s.* 10*d.*, or so forth. We pay from 10*s.* to 20*s.* A burner gets from 20*s.*, and it is all piecework of course.

14,687. Individuals might suffer, but it would follow that more hands would be employed, subject only to what you mention about the question of wages, which is another question altogether?—Yes.

14,688. It might be in the end the greater benefit to these men, who are mistaken altogether in their objects?—Well, there would be a great deal of laborious work saved no doubt by machinery.

14,689. (*Mr. Barstow.*) Even in a machinery yard you would have to employ a burner, would you not?—Yes.

14,690. In that case what you put as to wages would not apply. What is there in the fact of bricks being made by machine which should lessen the wages of a burner?—There is more skill wanted in burning bricks than in any other part belonging to it.

14,691. But I suppose he would have to burn machine-made bricks just the same as he has now to burn hand-made bricks?—Yes, I suppose he would.

14,692. Can you have anything to alter the condition of a burner with machine-made bricks from what it is now with hand-made bricks?—No.

14,693. Then that instance which you have given of the reduction of wages fails, does it not?—Yes, but I say the union charges that machine, where perhaps if there was no union existing the wages might come down.

14,694. Why should not the union exist if bricks are made by machine, why should that alter any union regulation?—I do not know why it should, but I have no doubt it would alter it.

14,695. That is not the fault of the machinery, that is the fault of the members of the union?—No doubt, but it would have a tendency to lower wages.

14,696. That is your opinion?—Yes, you could get worse men to work at the machine, and besides you do not want the skill in working the machine that you do in the other departments.

14,697. (*Chairman.*) In some parts of the machinery surely you want more skill?—The engineer of course would want skill.

14,698. Would not his wages be higher even than a burner's?—Well, I question that very much.

14,699. Of course I do not know, but surely in the case of a first-class man who was employed at machinery more skill would be required than in the case of a mere burner?—You want a good deal of skill to burn; to get the heat to the right pitch you must have a good deal of experience.

14,700. So you must have a good deal of skill to manage some parts of the machinery?—Yes, but as far as the labour of brickmaking by machinery goes any sort of amateur hand would do for that.

14,701. (*Mr. Chance.*) If you applied to other

trades which you are now advocating with regard to machine-made bricks, you would have no machinery at all ?—I suppose not.

14,702. I suppose that the immediate effect of introducing machinery in all cases is to lower wages ?—It has had that effect, I believe, generally.

14,703. And ultimately the effect has been to increase the wages ?—Yes, very likely.

14,704. But the labour is diffused among different branches ?—It is.

14,705. Your opinion is singular, is it not, as to machine-made bricks being inferior to hand-made bricks ?—I think I gave you a description in my previous evidence that there is one class of goods which are made which are an exception, namely, Ibbotson and Platt's machine-made bricks.

14,706. If that is a good machine, by whomsoever it is made, why should not that machine be used ?—Well, it is a large complicated affair, and it takes a many hands to work it. It turned out good bricks, and you see the consequence is that it makes them dearer. They cannot sell them at the price of common bricks. We have bricks which are worth from 38*s.* and 50*s.* a thousand, down to 19*s.* a thousand.

14,707. If that is the case surely it would work its own cure. Why should the brickmakers combine together if the machine-made bricks do not answer ?—Do you mean the operatives ?

14,708. Why should the brickmakers combine together against machine-made bricks if machine-made bricks are not so good as hand-made bricks ?—You mean the bricklayers.

14,709. The brickmakers ?—Of course the brickmakers naturally think that it will have a tendency to lower wages, there is no doubt.

14,710. You say that if the masters work they are compelled to subscribe to the union ; but supposing the masters do not work themselves, do they then subscribe to the union also ?—No.

14,711. It is only in those cases where a master works that he subscribes to the union ?—He can please himself whether he subscribes or not. I believe if you are not a member and still subscribe you have your funeral expenses ; I believe they allow 10*l.* out of the burial fund ; but then you must die first of course.

14,712. Is a master brickmaker who works compelled to subscribe to the union ?—Yes.

14,713. Is anything done to him if he does not subscribe ?—I think there has been no objection to paying.

14,714. But supposing he did not pay ?—I do not know what the result would be. There might be a little "blind-horsing" as it is called.

14,715. You mean to say trampling bricks ?—I mean trampling bricks.

14,716. So that in fact the master brickmakers who work are compelled to subscribe ?—Yes ; it is optional, most likely, if you do not work.

14,717. (*Mr. Barstow.*) As a matter of fact, do you admit a man who makes bricks by machinery to be a member of your masters' union ?—No, we do not ; with the contention that we should have we have thought it better not. We should have a great deal of contention, no doubt.

14,718. (*Chairman.*) You would get into a quarrel with the operative brickmakers immediately ?—Yes.

14,719. (*Mr. Chance.*) In fact, brickmaking by machinery has never had a fair chance ?—Well, it has not since the combination came on. Previous to that of course it had a better chance.

The witness withdrew.

JOHN LOMAS sworn and examined.

J. Lomas.

14,720. (*Mr. Barstow.*) You are a clog maker, are you not ?—Yes.

14,721. And you carry on business at No. 78 Oldham Road ?—Yes.

14,722. In April 1863 were you building two houses near the Queen's Park, Cheetham ?—Yes, right opposite the entrance.

14,723. Were you building them with machine-made bricks ?—I began them with hand-made bricks up to the 1st of April, and then the party with whom I had made a contract for hand-made bricks could not supply me in consequence of not having them ready for me. I had five bricklayers at the time standing, and they declared they would have their wages whether I got them bricks or not. I applied to a brickmaker not far from the place, and he wanted 6*s.* a thousand more. I offered him 4*s.*, but he would not take it. I offered him 4*s.*, and to cart them off the premises, and he would not take it, and so I declared that I would not give any more, and that the men should not stand, and I went to the machine brickyard in Cheetham and made a contract with them for a quantity of bricks. On the 2nd of April, about half-past 8, Mr. Wogden delivered the first load of machine-made bricks, and at about 25 minutes to 9 I went to see how the men were going on, and when I got there one of the foremen said, "There has been a bother about those bricks going on." I said, "Never mind "them ; they will not sell me hand-made bricks, and "I shall have machine-made bricks." A man of the name of Kay came. I did not know him ; he was a stiff man. I had seen him on a picket job in the Oldham Road, not far from me. He asked me what I was going to do ? I said, "I am going to build two houses." He said, "That is not what I mean." I said, "That is an answer to your question." He said, "That is not what I mean." So I said, "What do you mean ?" He said, "You know me ; you saw me on "that job picketing in the Oldham Road. I may as "well tell you straight out. You are going to use "machine-made bricks, are you ?" I said, "I am ; I "cannot get hand-made bricks unless I pay an extra-"vagant price for them, and I am not willing to do "so." He said, "Well, then, cart them back." I said, "Yes, if you will furnish me with hand-made bricks "and pay me for what I have paid for the machine-"made bricks." He said, "We shall not do anything "of that sort ; if you will cart them back we will "forgive you." I said, "Forgive me for what ?" He said, "Why, for having those bricks on the pre-"mises, and I will furnish you with as many as you "want." I said, "I shall not do anything of the sort "unless you pay me the money which I have paid at "the machine yard." I have the receipts here.

14,724. (*Chairman.*) How much was that altogether ?—The first is 23*l.* 1*s.*

14,725. But how much was it altogether that you paid for the machine bricks ?—What I paid for the machine bricks at that time was 27*l.* So he refused to refund the money, and I said, "Then I will use them." We were standing in the middle of the field opposite the buildings, and he said, "If you do not "send them back you may mark the consequences ; I "will shift your head."

14,726. (*Mr. Barstow.*) What did he mean by saying that he would "shift your head ?"—I suppose he meant that he would blow my head off. I said, "You can blow away if you have a mind ; that will make no difference to me." I said, "I shall not take "them back for my right hand unless you refund the "money ;" and I said, "I will tell you what I will do "with you ; I will make a report at the police station "as I go down," and I did so ; and the superintendent came almost every day to see how things were going on, and on the 9th of May he called on the Saturday morning and said, "How are you going on, Mr. Lomas ?" I said, "All right, we have not been interrupted yet." He said, "Have you seen any of those brickmen about ?" I said, "I have seen several," and then about half-past 11 on the same Saturday evening a girl came running down and said the buildings were on fire. So when I got up I found there had

TWELFTH DAY.

J. Lomas.

18 Sept. 1867.

been three canisters of powder gone off, with 12 lbs. of powder in each canister. It shifted all the flooring boards, set some of the benches on fire, and some of the window casings, and several of the other fittings.

14,727. Did you examine the damage which had been done ?—On the following Sunday morning and Monday.

14,728. What did you find on the Sunday morning ?—We found that three canisters of powder had been discharged with something like a gallon can of oil with a large fuse.

14,729. Just describe what you saw ; you say there were three canisters of gunpowder ; had they all gone off ?—It had all gone off in the building.

14,730. Then you found only the remains of those canisters ?—We found only the remains of the canisters, but the lamplighter found another near the building full of powder, with a large fuse to it. It was supposed that they had been disturbed at the time of placing them, and the lamplighter took it to the station at 4 o'clock on the Sunday morning.

14,731. The building was set on fire, was it ?—Yes.

14,732. Was any damage done besides what you tell us, namely, the flooring boards being blown out, and so on ?—The flooring boards were blown up, and the benches were set on fire, and some of the window casings were burnt, and the boards over the windows were shaken, and I had to take them out and put fresh ones in.

14,733. What was the amount of damage which it did ?—About 60*l.*

14,734. Did it cost you that to replace it ?—Yes, with the expenses of having to pay the officers for watching afterwards.

14,735. Did you weigh the powder which was in the other canisters ?—Yes, one of the officers opened it.

14,736. And it weighed 12 lbs. ?—Yes, it weighed 12 lbs.

14,737. Was it fine powder or blasting-powder ?—It was blasting-powder—coarse powder.

14,738. What was the name of the brickmaker who wished to charge you 6*s.* a thousand for bricks ?—His name was Rowbotham, out of Lamb Lane. This (*producing a paper*) is what I received from Captain Peel for the services of the officers for 477 hours. It was on the 9th of May that it was blown up, and from the 10th of May I paid for 477 hours for the services of night policemen. I had my own men in the daytime.

The witness withdrew.

G. Goodir.

GEORGE GOODIR sworn and examined.

14,739. (*Mr. Chance.*) You are a self-acting spinner ?—Yes.

14,740. Do you remember in 1864 being employed as a watchman in Mr. Armitage's new mill, Pendleton ?—Yes.

14,741. Do you remember one day when you were watching being attacked by four men ?—Yes.

14,742. Do you remember what day it was ?—Yes, on the 22nd of May 1864.

14,743. Could you judge from the appearance of the men what they were ?—Brickmakers.

14,744. Did you see whether they were armed with anything ?—Some of them had sticks or bludgeons ; two of them were as if they had bricks in their hands.

14,745. What time of the night was it ?—Between a quarter and half-past 12 o'clock.

14,746. Were you by yourself ?—Missing a dog, I was.

14,747. Was it a large or a small dog ?—A small dog ; it was a valuable dog, but they killed it.

14,748. Did they do anything to you ?—Yes.

14,749. What did they do ?—They hit me all four on the top of the head at once, two with sticks and two with bricks, and they laid out on me one on each side. The other two set to throwing bricks at the dog because he was making a noise till they killed him. These two took me a few yards away from there, and as soon as they did that a vast many men came down off the top of the wall from the canal bank. The wall was level with the canal bank, so they jumped down into the yard.

14,750. Before they came, were there any expressions used by any of the men who attacked you ?—No, I never heard anything at all.

14,751. Was there any noise or scuffle ?—No, not before they came ; I had been through five minutes before, and everything was very calm and quiet.

14,752. How many men do you suppose came ?—Between 20 and 30 men, as near as I could guess. I was bleeding very fast then.

14,753. Tell us what took place after these men joined ?—They set to pushing the new-built walls down.

14,754. How much of the walls did they push down ?—A very great length. I daresay all put together it would be something above 100 yards.

14,755. How high were the walls ?—Some of them were nearly 10 feet high, some not so high, and some higher ; there was a blank shade wall and the other was a mill wall.

14,756. After this were you attacked by the men ?—I was kept by two men out of the four, and one of them stated to me that they were brickmakers and that these were machine bricks which they came to destroy. They said, "We are determined to put down this building."

14,757. Had you any idea who the men were who kept you there ?—Not by name, but I could have told them if I had seen them.

14,758. You have never seen them since ?—No.

14,759. Do you know any of the men who were present upon that occasion ?—No. I have been called up a time or two to see people whom they caught on suspicion. They were some that they thought had something to do with it, but I could not recognize them.

14,760. What else took place ?—While they were knocking them down one of the men who held me on one side said, "Now, my lads, go at it as hard as you can ;" they kept knocking it down ; there was one end left and they said, "Come on, knock it down," but some said, "No." They started dragging me away from there up towards the cabin which was made for us, and first one kept thumping me and then another, as they were going away, with bricks and one thing and another that they had in their hands.

14,761. Did they strike you with the bricks ?—Yes ; the last blow that hit me down was with something that caught me across my back, and I feel the effect of it yet many a time.

14,762. All this time were they dragging you along the ground ?—They dragged me down something like 10 yards twice.

14,763. While they were dragging you were they pushing against you ?—When they were dragging me the second time and were coming away from doing a mischief they took me more towards the cabin, and when they were very nearly all gone away, first one hitting me and then another, one hit me across the back, and one man said, "Die thee, the b——r," and sent me with my head against the wall. They said, "Kill the b——r," many a time over, while they were agait of me and thumping me as they were coming past.

14,764. Then did they drag you as far as the cabin ?—Yes, they sent me with my head against the cabin door.

14,765. Then they left you ?—Yes ; it was this way : while they were agait of me with my face to the wall so that I could not see where they were all the time.

14,766. You were very much injured ?—Yes, and a very bad job for me, I assure you.

14,767. Were you in the infirmary ?—Yes, I was in the infirmary under Dr. Haywood.

14,768. For what length of time were you in the

doctor's hands?—I was under the doctor about six weeks; I did not earn anything for 16 weeks.

14,769. You were out of work the whole of that time?—Yes, I could not do anything; I could scarcely walk about.

14,770. Do you work now?—I work at it, but it affects me very much.

14,771. And you feel the effects of working in consequence of the injuries you received?—Yes; the first thing of a morning when I get up I feel quite hazy.

14,772. Did they attack you suddenly?—Yes.

14,773. They came upon you quite suddenly?—Yes. I had been in not five minutes before, and everything was right and straight and nobody about.

14,774. Did the dog give you an alarm?—It made a great alarm, but they killed it.

14,775. Before the men came did the dog give any alarm?—It started back; it had not a chance of seeing them; they were at the back of the building, just turning the corner of this building; they sprung at me.

14,776. They came on you too quickly for the dog?—Yes, the dog had not the chance of knowing they were there; the dog was a yard or two yards behind me when they attacked me at first.

14,777. (*Mr. Barstow.*) Had you done anything to these men before?—I do not know that I ever saw them in my life.

14,778. Had you informed against anybody?—No; there were two that I gave descriptions about as well as I could. I could have told them again if I had seen them, but I had never seen them.

14,779. Can you attribute this attack to anything but the watching of the property?—It was done to me for watching.

14,780. (*Chairman.*) Mr. Armitage, by whom you were employed, made machine-made bricks?—No, he was building a mill with them.

The witness withdrew.

JOHN WARBURTON sworn and examined. *J. Warburton.*

14,781. (*Chairman.*) Are you a contractor?—Yes.

14,782. Do you know Mr. Benjamin Armitage?—Yes.

14,783. He was a cotton manufacturer at Pendleton?—Yes.

14,784. In 1864 did he begin to build a new mill there?—He did.

14,785. Were you the contractor for the brickwork?—Yes.

14,786. Did you use for that purpose machine-made bricks?—Yes.

14,787. Where did you get them from?—We got some of them from this machine here, and off Ashton New Road.

14,788. In May 1864 do you remember something happening?—Yes.

14,789. What happened, do you remember?—The walls of the weaving shed were thrown down.

14,790. How much walling was knocked down?—I should think from 200 to 300 yards; about 250 yards.

14,791. Could it have been knocked down simply by men pushing against it?—Yes.

14,792. Would it have required many men to have joined in doing it?—I should think it would take from 20 to 30 men.

14,793. It would take from 20 to 30 men pushing against it to knock it down?—Yes.

14,794. Were you ever threatened about this?—No.

14,795. Were you able to proceed with the work so far as you had gone without interruption or threats?—Yes.

14,796. Had nothing been said or done to you before the walls were knocked down?—Not to me.

14,797. Nor to anybody?—Not that I am aware of.

14,798. You never heard anybody say it?—No.

14,799. Not in your presence?—No.

14,800. Were you able to go on with the job after this?—Yes.

14,801. Do I understand that you built the walls up again?—Yes.

14,802. The walls which had been knocked down?—Yes.

14,803. Did you build them up with machine-made bricks or hand-made bricks?—Machine-made bricks.

14,804. Did anything happen afterwards?—No.

14,805. It was only on this one occasion?—Yes.

14,806. You remember the watchman being injured, do you not?—Yes.

14,807. As far as you were concerned, you had no threats nor anything said to you?—No.

14,808. You received no letter or anything of that sort?—No.

14,809. Nor any of your men?—No, not that I am aware of.

14,810. Do you remember whether Mr. Armitage had to employ men at day work after this?—Yes.

14,811. Was that to do the job which you had contracted to do?—Yes.

14,812. You having contracted to do the job, how came he to employ men at day work?—It was through the clerk of the works, because we could not agree.

14,813. You contracted to do the work, did you not?—Yes.

14,814. What I ask you is, whether, although you contracted to do the work, Mr. Armitage employed men to do the day work?—He employed men after I left the job.

14,815. But while you were at the job?—No.

14,816. Did you do the whole of your job?—No.

14,817. How much of your job did you do?—I should think about half of it.

14,818. What made you leave off?—Because the clerk of the works and me could not agree.

14,819. And because the clerk of the works and you could not agree, was that the reason for breaking your contract?—Yes.

14,820. How so; I want to understand how it was; explain it?—I left the job and would not stop any longer with him.

14,821. Was that the only reason why you left the job?—Yes.

14,822. Or was it because you could not get the bricks as you wanted?—Benjamin Armitage bought the bricks, I had nothing to do with it.

14,823. What was the nature of the dispute between you and the clerk of the works?—It was thought that he wanted this other man to come and finish the job.

14,824. What other man?—Henry Martin.

14,825. What does it signify what was thought; what happened between you and the clerk of the works to make you leave off the job, and not finish your contract?—We had words; he said that the work was not good enough.

14,826. There was nothing said about the bricks?—Yes.

14,827. He said that your work was not good enough?—Yes.

14,928. And upon that you went away?—Yes.

14,829. When you had only half done it?—Yes.

14,830. And then Mr. Armitage employed men to do the day work?—Yes.

14,831. Do you know who it was?—No.

14,832. Are you quite sure that you were never threatened?—I am certain of it.

14,833. Nor your men?—I never heard of anything of the sort.

14,834. And you never said you were?—No.

14,835. And you never gave that as the reason for giving up your work?—No, I did not.

14,836. Nothing of the sort?—No.

14,837. (*Mr. Chance.*) Did you contract for a certain sum?—I was the bricklayer; I only had the brickwork.

TWELFTH DAY.

J. Warburton.

18 Sept. 1867.

14,838. You entered into a contract to find the labour for the mill?—Yes.

14,839. Did you enter into that contract for a certain specified sum?—No, for so much per yard, to be measured when done.

14,840. And you were paid for as much as you had done?—Not exactly. I have not been paid yet for what I did.

14,841. (*Chairman.*) Did they say that you ought to have finished your job, and that you had improperly left it?—Who?

14,842. Mr. Armitage.—No.

14,843. How is it that you have not been paid, because this was in 1864?—The job has never been measured.

14,844. How is that; has there been any dispute going on all this time?—There was no dispute.

14,845. There was no dispute at all?—No.

14,846. Did your brother employ men?—Yes.

14,847. Is he in partnership with you?—At that time he was.

14,848. Where is he now?—He is in Pendleton.

14,849. In consequence of your using machine-made bricks did your brother's men refuse to work for him?—The brickmakers refused to let me have bricks.

14,850. Did they stop the supply of bricks to your brother?—Yes.

14,851. And because you could not get any more bricks did you dissolve partnership with your brother?—Yes.

14,852. Do you remember working for Mr. Cotterell?—Yes.

14,853. How long ago is that, 12 months?—Yes, 12 months since. We work for him regularly when he has anything.

14,854. What is he?—A cotton manufacturer.

14,855. Did you upon an occasion when working for him want some hand-made bricks?—Yes.

14,856. Did you see Jamas Kay?—Yes.

14,857. Did he come to you upon that occasion?—Yes, he did.

14,858. What did he tell you?—That we should have to stop.

14,859. Did he say why?—Yes; because I had been using machine bricks.

14,860. Did he say anything more?—No.

14,861. Did he say nothing about a fine?—Yes.

14,862. Do you not call that something more. You have not told us that yet, you seem to think nothing of it. He said that you were to pay a fine, did he?—Yes.

14,863. How much?—*5l.*

14,864. What was it for; just tell me what he said. What was the fine of *5l.* for?—What he said was, that if I paid *5l.* I could have hand-made bricks.

14,865. What was the fine to be paid for, for using machine bricks?—Yes, for using machine bricks.

14,866. He told you that you were to pay a fine of *5l.* for having used machine-made bricks?—Yes.

14,867. Did he say that he came from the union men for that purpose?—Yes.

14,868. Did you pay the fine?—Yes.

14,869. Was your reason for paying it that you might get the hand-made bricks?—Yes.

14,870. And you got them after?—I got them after, and I am using them now.

14,871. (*Mr. Chance.*) Are machine-made bricks better than hand-made bricks?—For that I cannot say exactly.

14,872. (*Mr. Barstow.*) Can you tell me whether these brickmakers who stopped your having hand-made bricks were the masters or the men?—I cannot.

14,873. I should think you could. Who stopped you?—Thomas Kay stopped me.

14,874. Did he tell you from whom he came?—Yes, he had come from the operatives.

14,875. He told you that he had come from the operatives?—Yes.

14,876. I should have thought that you could have said before that Kay was the man who stopped you?—It was so.

The witness withdrew.

J. Tinsley.

James Tinsley sworn and examined.

14,877. (*Mr. Barstow.*) Are you an excavator?—Yes.

14,878. Do you live at Pendleton?—Yes.

14,879. Do you remember an assault upon Mr. Armitage's watchman?—I remember a job being done, but I know nought about it.

14,880. Do you remember, on the Sunday morning after the job was done, meeting an excavator, an acquaintance of yours?—It was on Sunday night.

14,881. What was his name?—He goes by several names. He went by the name of Smith when he was with me.

14,882. Did he come to lodge with you?—He had nowhere else to go to. I took him, and he laid on the squab at night.

14,883. Did he tell you anything about the assault upon Mr. Armitage's watchman?—He said that he had killed the b——y dog, that is all.

14,884. That is all he said?—Yes.

14,885. Did he say who was with him?—He said old Sawyer, Thomas Pepper, Bob Rigby, and somebody else.

14,886. Did he mention Larry?—Yes, and Larry, and I have never seen him since.

14,887. Is that all he told you?—Yes.

14,888. You did not ask him anything else?—No; I did not want to be bothered with him.

The witness withdrew.

Mr. B. Armitage.

Mr. Benjamin Armitage sworn and examined.

14,889. (*Mr. Chance.*) You are a cotton manufacturer at Pendleton?—Yes.

14,890. In the year 1864 did you commence building a new mill there?—Yes.

14,891. Did you contract with John Warburton to build it?—To do the brickwork.

14,892. And you were to find the bricks?—Yes.

14,893. Did you provide him with machine-made bricks for the purpose?—Yes.

14,894. Do you remember in May finding that a portion of the building had been pushed down?—Yes.

14,895. How much of the wall had been pushed down?—Altogether there would be 300 or 400 square yards of 9-inch brickwork knocked down.

14,896. Do you know why that was done?—For using machine-made bricks.

14,897. Had anything ever been said to you by anyone about using machine-made bricks?—Not directly.

14,898. I suppose you mean that it had been done indirectly?—Yes.

14,899. Will you tell us what occurred?—I was told that I should get into trouble with it.

14,900. Who told you so?—I cannot say particularly, but at that time there was a great feeling against machine-made bricks. Mine was the second mill which had been erected in Pendleton. When the first mill was erected there were a good number of brickmakers knocking about, and if they had had the chance of doing damage no doubt they would have done it. I was cognizant of that, but I had no idea when I started to use machine-made bricks that there would have been any attempt to interfere with my using them, because I was not a maker. The opposition was more against the makers than the users of them.

14,901. You bought them from some person in

Manchester who made them?—I made my contract with the makers adjoining the lands for supplying me a portion, and for the other portion I contracted with the Ardwick Brick Company.

14,902. Have both those makers ceased making machine-made bricks?—Yes.

14,903. Had you carters in your employ who carted those bricks?—I could not get anyone belonging to me or anyone in the neighbourhood to cart them, because anyone carting machine-made bricks would be interfered with and not allowed to cart any hand-made bricks. The consequence was I had to make arrangements with a coal carter, who brings coal through Pendleton, to load with machine-made bricks as back carriage; by that means I was able to get the bricks supplied.

14,904. Had you applied to the brick carters?—It was of no use. I had not applied, but I was told it was no use, because previous to that men who had carted machine-made bricks in Pendleton were not allowed to cart any other kind of bricks, and for that reason it was no use my applying.

14,905. And you did not apply?—No.

14,906. And you applied to the coal carters?—Yes.

14,907. Do you know whether those men whom you employed to cart the machine-made bricks were at any time threatened or abused in any way?—Yes, the bars were drawn out so as to throw the carts up in the streets; it is the bar that let the cart down.

14,908. That has the effect of turning the cart over the axle?—Yes.

14,909. You know that that has been done when these men were carting your bricks?—Yes.

14,910. After your wall was pushed down, did you have to employ other labour?—Yes.

14,911. How was that?—The first thing I had to do was to employ somebody to protect the place, and I employed two armed men night and day till the whole job was completed, which cost us about 100*l.*, and whenever I went about the job myself I was regularly armed, because I was threatened with my life if I proceeded with them.

14,912. Who threatened you?—It was indirectly; Mr. Agnew, a neighbour of mine, intended building a mill with machine-made bricks, and he had a threatening letter, that if he proceeded he might have some outrage committed upon him, and regularly after that I went about armed.

14,913. From what you heard of others you expected your life to be in danger?—Yes.

14,914. There were no direct threats made towards you?—No, they would never face me; they were always sneaking about, these hand-made brickmakers, but they never faced me directly in daylight.

14,915. You had to rebuild the walls?—Yes.

14,916. And in consequence of what occurred Warburton failed to carry out the contract?—From the annoyances of one kind and another the man was a good deal agitated; and from the damage done, and through being advised to employ another brick setter, to finish the day work out, I took it out of Warburton's hands; I was wrongly advised, there is no question about that, because I believe it was a collusion between the man whom I employed as clerk of the works and the man he had in view. Warburton was discharged through that. I believe that Warburton fully intended finishing the job, and had he been allowed to go on with the job in a quiet and peaceable manner, I believe he would have finished it.

14,917. You discharged him in consequence of being misinformed?—Yes.

14,918. Did it entail upon you an additional expense?—It cost me three times as much to finish the job as what I agreed with Warburton to finish the whole job for.

14,919. Supposing Warburton had finished the job as he intended, it would not have cost you so much?—No.

14,920. Therefore this additional cost was in consequence of your being misinformed?—Not only that; when I commenced this mill I had contracted for my machinery, and a large portion of that machinery was already completed and ready to put in the mill, and I was obliged to go on with the job, and the consequence was I had to employ other people in day work to finish the job out.

14,921. That arose from the walls being pushed down?—There is no question about that.

14,922. What was the amount of the damage you suffered in consequence of the walls being pushed down?—With that and the cost of watching, and a great many other expenses incidental to this outrage, I consider that my loss was between 300*l.* and 400*l.*

14,923. You had no fault to find with Warburton for the way in which he did his work?—None at all; he did his work in a workmanlike manner.

14,924. Did you after this finish your work with machine-made bricks?—Decidedly; I was determined to do it.

14,925. In your opinion are machine-made bricks better than hand-made bricks?—There is no question about it, and any honest man will say so.

14,926. You have had a good deal of experience in building these two mills, as to the respective quality of the two bricks?—Yes.

14,927. Are machine-made bricks good for more than one purpose?—They are generally good; they are good for any purpose that bricks are used for, not only because you can make machine-made bricks all the year round, and you can employ a larger amount of labour, but you have a better brick.

14,928. And were the bricks that you used made by the Lancashire Brick and Tile Company's machine?—Yes; and the others were made by Marsden, of Bolton.

14,929. Are those better than hand-made bricks?—There is no question about machine-made bricks being better than hand-made bricks; they weigh considerably more; they are straighter and smoother, and you can set them leveller, and they are cheaper.

14,930. Cheaper?—Yes, they are cheaper and better.

14,931. And they can be made all the year round?—Yes, and they employ a larger amount of labour.

14,932. The immediate effect would be to lower the wages?—I do not think that machinery directly lowers the wages.

The witness withdrew.

J. Clifford.

JOHN CLIFFORD sworn and examined.

14,933. (*Chairman.*) What are you?—I am a labourer at present.

14,934. In 1864 what were you?—A brick master.

14,935. Where did you carry on your trade?—At Ridgy Lane, Staleybridge.

14,936. How many hands did you employ at that time?—I had nine men and two boys and two women.

14,937. And you made bricks there?—Yes.

14,938. In 1864 did anything happen to your bricks?—Yes.

14,939. What time in 1864 was it?—It was on Whitsun Friday night, in May.

14,940. In May 1864 something happened to your bricks?—Somebody walked on 11,000 bricks.

14,941. Had that been done in the night?—Yes, between Friday night and Saturday morning.

14,942. Could you at all form an opinion as to how many men it took to do it?—It would take four or five.

14,943. In what union was that district of yours?—In the Ashton union.

14,944. What men were you employing, union men or non-union men?—Non-union men.

14,945. Have you any mode of accounting for that injury to your bricks, except that you were employing

TWELFTH DAY.

J. Clifford.

18 Sept. 1867.

non-union men?—It was at the time they asked me, and I would not have them.

14,946. Which of them?—Thomas Barrett and several more that I do not know.

14,947. How long before your bricks were spoiled did they come to you?—A few days before.

14,948. Were they members of the Ashton union?—Yes, I know they were.

14,949. They came to you from the union?—Yes, they brought me a list.

14,950. A list of what?—A list of their prices.

14,951. Did they complain that you were employing non-union men, and also the wages that you were paying?—Yes, they did.

14,952. What were you paying?—I was paying a little less than the club price. I was paying the price I had always paid for 20 years.

14,953. You were paying the price you had always paid for the last 20 years?—Yes.

14,954. It was somewhat less than the union price?—Yes.

14,955. Do you remember how much less it was?—No, I cannot exactly say.

14,956. But it was less?—Yes.

14,957. And they complained of it?—Yes.

14,958. Did they also complain of your employing non-union men?—Yes; they wanted me to send my men off and take a gang of their men.

14,959. Did you refuse?—Yes.

14,960. Did they say what would happen to you?—No.

14,961. Did they threaten you at all in any way?—No, they did not threaten me, but they said it would be better for me if I did take their men.

14,962. Was this only a few days before this affair happened?—Only a few days.

14,963. And they spoiled somewhere about 11,000 bricks?—Yes.

14,964. Were there any walls knocked down?—There were one or two bits knocked down, but they were not much.

14,965. The bricks were mainly trampled upon?—Yes.

14,966. Did they put anything in your clay?—No.

14,967. At any other time have you had anything done to your property?—In the beginning of November in the same year they came at night and burned two parts out of three of my shed. Then they killed a dog that I would not have taken any money for.

14,968. They destroyed two-thirds of the shed?—Yes.

14,969. How was it destroyed?—They set fire to it.

14,970. Could you tell how it was set a light; was it done with naphtha or anything of that sort?—It must have been done with something of that sort.

14,971. Did they collect any of your wheelbarrows?—No, they collected a few hurdles together.

14,972. They collected them together?—They took them into the middle of the shed and set fire to them there, because I saw the remains of them lying there.

14,973. And two-thirds of the shed were destroyed?—Yes.

14,974. And they also killed a dog which you valued very much?—Yes.

14,975. Was that dog shot, or how was it killed?—They drove a pick into the back of its neck, and with a clay hack, which had a sharp point, they cut it under the jaw.

14,976. That was the way it was killed?—Yes.

14,977. This was done the same night?—Yes.

14,978. Was the dog on the premises at night?—It was in the shed.

14,979. It was locked up in the shed?—Yes.

14,980. You had no watchman on the premises?—I had not at that time.

17,981. The dog was locked up in the shed, and they killed the dog, and set fire to the shed in the way you have described?—Yes.

14,982. Did they destroy any bricks at night in November?—Yes.

14,983. How many?—2,500.

14,984. Were they destroyed by walking upon them?—Yes,

14,985. Did they use any needles?—No.

14,986. When were you informed that your shed was set on fire?—The next morning. I was the first man in the yard, which I always was.

14,987. And then you saw what had been done?—Yes.

14,989. In order to destroy the 2,000 bricks could you form an opinion of how many men had been employed?—No.

14,990. Upon any other occasion were your bricks injured?—In the latter end of November.

14,991. The same month, and the same year?—Yes, they came to the house and threw a bottle of combustibles into the chamber window, and it caught a chair back, and bounced back and broke the neck off, and it fell back into the street.

14,992. In the same month of November this occurred; at what time in the evening?—Two minutes to 12.

14,993. Was it the window of the chamber in which you slept?—Yes.

14,994. Are you a married man?—Yes.

14,995. Was anybody else in the room?—My wife and four children.

14,996. Then you say they threw a bottle in through the window?—Yes.

14,997. So that the bottle went through the window and hit the back of the chair?—Yes.

14,998. And that blow sent it out again?—Yes, and it went off in the street.

14,999. You heard it go off?—I saw it go off.

15,000. Did you notice afterwards whether there was anything else in the bottle that went off besides gunpowder? Were there any slugs or nails in it?—We could not see anything. I had a whistle and I whistled the police, and six came directly and examined it, and the bottle had been wrapped in a bit of rag steeped in gas tar to keep it from breaking when it went in the chamber.

15,001. Was there a bit of rag round it;—Yes, they gas-tarred the rag, and wrapped it round the bottle to keep it from breaking.

15,002. The rag was wrapped round it so that if it went in the bottle itself would not break until the fire had reached the gunpowder and it had blown up; that is what you mean?—Yes.

15,003. It was somewhere about 12 at night?—Two minutes to 12.

15,004. Had you done anything at all to offend them in any way whatever beyond what you have told us, namely, employing non-union men, and employing them at less than the price they said they ought to have?—Yes.

15,005. That is what you had done?—Yes.

15,006. At that time was your place, where this occurred, near the brickyard?—About 300 yards from it.

15,007. Do you remember anything else being done to either yourself or your bricks besides on these two occasions?—No; but there was one bottle found the next morning.

15,008. Where was it found?—At Cockbrook.

15,009. Is that near your house?—Yes.

15,010. How far from it?—About a quarter of a mile off. It was buried in a heap of ashes.

15,011. Was that bottle filled with anything?—It was filled with powder and had a fuse to it.

15,012. It had not been lighted?—No; the deputy constable of Staleybridge has it now for anything I know.

15,013. It had a fuse to it and it was filled with powder?—Yes.

15,014. The moment that this bottle hit the back of the chair and went back and exploded, you whistled?—Yes.

15,015. In a moment — directly?—Under two minutes. I was awake at the time it was done.

15,016. Of course that would give the alarm and

they would not stop to throw the second bottle?—They would be off. After it was done I employed a watchman while I stopped.

15,017. After that you employed a watchman?—Yes.

15,018. Was the watchman kept always armed?—I bought him a revolver and two big dogs. I bought them both. He told me he would not go unless he had two.

15,019. How much longer did you remain there continuing your business?—Till August after.

15,020. August of the next year?—Yes.

15,021. Did anything else happen to you?—No.

15,022. Had you any threats or intimidations; were you called anything?—Yes, and I dared not go near the district where they were at night.

15,023. What was the sort of thing they called after you?—"Knobstick."

15,024. Wherever you went?—When I went into that district they always minded what they said for fear I should have the law on them for it.

15,025. You were called that repeatedly?—Yes.

15,026. You said you dare not go; where was that?—Not to Ashton; not after dark.

15,027. In consequence of your fear of them?—Yes.

15,028. It continued all the time you were there, did it not?—Yes.

15,029. Up to August?—Yes.

15,030. And then you gave it up?—I gave it up. I thought it was better to give it up than lose my life.

15,031. It was considering that your life was in danger as well as your property which made you give up the business?—Yes.

15,032. That was the reason why you gave it up?—Yes.

15,033. Are you making bricks now?—No.

15,034. You gave up brickmaking altogether?—Yes.

15,035. In consequence of this?—Yes.

15,036. What are you doing now?—I am a labourer.

15,037. What do you labour at?—I do any job; getting a bit of cellaring out for cottages.

15,038. Laying the foundations of cottages?—Yes.

15,039. It has injured your business?—Yes; I lost above 100*l.* upon it.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

THIRTEENTH DAY.

Assize Courts, Manchester, Thursday, 19th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, ESQ., Q.C. | GEORGE CHANCE, ESQ.
THOMAS IRWIN BARSTOW, ESQ. | JAMES SHEIL, ESQ., Secretary.

PERCIVAL ANDREE PICKERING, ESQ., IN THE CHAIR.

Mr. EDWARD HINDLEY sworn and examined.

15,040. (*Chairman.*) Are you a builder?—Yes.

15,041. Where do you live?—At Prestwich.

15,042. Had you a contract for constructing the Prestwich reservoir?—Yes.

15,043. When was that?—It lasted better than 12 months the work that was going on.

15,044. But in what year was the contract?—We ended in March 1866, that was when I stopped.

15,045. With whom did you make the contract?—With Colline; he had the contract.

15,046. For what did you make the contract?—For the bricklayers' work under him.

15,047. Had you a boy named William Stevenson?—Yes.

15,048. What were the bricks which you used there?—The bricks were Manchester common bricks; we had them from Broughton.

15,049. Prestwich is in the Manchester district, is it not?—Yes.

15,050. In March 1866 did any people come to you from the bricklayers' union?—Yes, there was a dispute. I will tell you how it was. This lad I had had for seven or eight months, and one Monday morning I was going round to look at my men (I had five men working at this job and this boy), and just as I was going away George Ramsbotham said to me, "Here, I want you." I said, "What is it?" He said "There was a meeting at the club house on Saturday "night concerning this lad."

15,051. Is Ramsbotham a member of the bricklayers' union?—Yes. He said, "I was not there, but Ryle was, and Ryle told me this." This George Ramsbotham was my foreman that I left on my work, and so of course they told him things, and he had to communicate with me, I not being there regularly. He said, that the conclusion of this meeting was that this lad must either be legally bound apprentice or shift altogether, or the union would take my men off the work. So I said, "If that is all we can soon put that right." So I mentioned it to this lad. This lad said he did not want to go away; he said rather than go away he would do anything, and he would be bound if it was agreeable to me. So the day following, the Tuesday, I ordered indentures to be written out and I paid for them and this lad was to pay me back at half-a-crown a week till he had paid me, which of course he did do. Then on the Thursday following I told them what I had done, and Peter Yates, one of the men, said at once, "We have "had another meeting, and he is not to be bound at "all, you are not to have him. We will have no "more bricklayers made; if you want any more men "you may get them from the club-house." I said, "Why did not you tell me that on Monday morning?" I said "The lad is bound now." Then they said, "Then we shall stop working." Then I said, "Stop, then, I cannot help it;" and they did stop.

15,052. And they never worked afterwards?—No. I had to give up that job in consequence. It was too big for me. I could not manage it with this lad and me, but I went on with the other jobs that I had at gentlemen's places in the neighbourhood.

15,053. Did they threaten to injure any of the non-union men who were working with you?—There were no violent threatenings that ever I heard of. They came sometimes and persuaded some of them to come away, and said that I was employing non-union men, and they advised them not to stop, and some went away and some stopped with me.

15,054. Do you remember a man of the name of George Ashton?—Yes.

THIRTEENTH DAY.

Mr. E. Hindley.

19 Sept. 1867.

15,055. Was he a union man?—Yes. There was a fellow called "Berry Bill;" he threatened he would "rump" him if he did not go about his business.

15,056. Did that mean that he would kick him?—Something of that sort I suppose, or beat him in some way or other.

15,057. They threatened that if he did not leave his work they would do it to him?—Yes.

15,058. Do you know a person of the name of James Kay?—That was when I was going on with my other work, when those men would not work for me. They stopped me from buying bricks then. They would not let me have any bricks; but they were a good while before they could manage to do it on their own bottom, for those bricklayers belonged to the Whitefield bricklayers' union and not to Manchester.

15,059. Where is Whitefield?—It is the next township to the Manchester district.

15,060. Is it in the Manchester district?—No, it is out of the Manchester district. Those were Whitefield bricklayers with the exception of one.

15,061. Were you doing any job in the Whitefield district?—No, the job was in the Manchester district, and we were using the Manchester bricks.

15,062. Then how came the Whitefield bricklayers to interfere with you, you being in another district?—It was concerning this lad.

15,063. Were your men Whitefield men?—One man came out of Salford, and Peter Yates was a Whitefield one, and another. Then George Ramsbotham was a man from Prestwich; Joseph Luff was out of Salford.

15,064. Were those Whitefield men union men?—Yes, they were all union men at that time.

15,065. Now you say that the Whitefield men got assistance from the Manchester men?—They came to the Manchester brickmakers and wanted them to stop me from having bricks for my other jobs, and the brickmakers would not take any notice of them at the time. Then after that they went to the Manchester bricklayers' union, and I suppose that they got at the soft side of them, for the union ordered Charles Lester, the delegate, to go and tell James Kay to warn them that they must let me have no bricks.

15,066. Was Lester the bricklayers' delegate?—Yes.

15,067. And Kay was the brickmakers' delegate?—Yes. So Lester tells Kay to do this, and of course Kay did it; and the first time the carts went down they were at George Hollier's brickyard loading bricks, and "Old Nick," as they called him, came and said, "Hindley must not have any; tip them down." He made them tip them up again and would not let them go.

15,068. Then Kay made them do that?—Yes.

15,069. Where do you get your bricks from now?—Well, I bought after that from men named Thorpe and Briggs.

15,070. Is that in the Manchester district?—It is out of the Manchester district. They did not belong to the Manchester union.

15,071. In what district is that?—It is in what they call the Whitefield district.

15,072. I suppose you are obliged to get them as you can?—Yes, you are right there; I am obliged to get them as I can. Sometimes I had to give parties I was working for money and let them come down and buy them in their name and then turn them over to me. I did it in that way in an instance or two.

15,073. Have you ever had bricks spoiled?—No, I have never had anything of that; I am not a brickmaker, you know.

15,074. Have you ever had any injury done to any of your property?—No; I cannot say I have had anything of that sort. There has been nothing of that sort. The greatest annoyance has been that I could not get any stuff for money to go on with my work.

15,075. (*Mr. Barstow.*) But you think that was done by the interference of the bricklayers' union?—Yes. Those Whitefield bricklayers got at the soft side of the Manchester bricklayers, that was it.

15,076. Had you any quarrel with any union whatever except what you have told us about the boy Stephenson?—No; I have never had a quarrel with a union man in my life. I always got on as comfortable as possible.

15,077. (*Chairman.*) Then it was all about this lad?—It was all about this lad.

15,078. And there was no other cause that you are aware of at all?—No, not at all.

15,079. (*Mr. Barstow.*) How did you come in the first instance to have him bound to you?—They ordered me to do that.

15,080. (*Chairman.*) George Ramsbottom was your foreman, was he not?—Yes.

15,081. And he said he had been told by Ryle?—Yes; Ryle was at this meeting.

15,082. He was a union man?—They were both union men.

15,083. (*Mr. Chance.*) Was the having this boy in your employ in the first instance against their rules?—When this boy came to me he said he had been a couple of years with a man at Bury, and I said "I "will try thee, and see how thou shapest, and if thou "suitest me thou cans't be bound." And those union men worked with him for seven or eight months without anything being said.

15,084. But was the employment of this boy against the union rules?—At first they said nothing about the boy's age. The boy was 17 years of age then, and the second time they communicated this to me they said they would not have him on any occasion whatever. I said, "What is the reason for that?" They said he was too old then, but before they said they would not have any under 15.

15,085. That is he was beyond the age at which they allow an apprentice to be bound?—Yes, but they did not tell me that at first.

15,086. Is it a fact that the bricklayers do not allow a working labourer ever to become a bricklayer?—Yes, they will not allow it. They will not allow anyone to become a bricklayer now that starts after he is 15 years of age. If they see a labourer getting out the trowel or setting a brick, or anything of that sort, they will stop him directly.

15,087. Do you mean to say that after a man has once passed the age of 15, and is a labourer, he can never become a bricklayer?—No, he must not, according to the bricklayers' rules.

15,087*a*. Then if he remains in that district he has no chance of ever becoming anything better?—No, not in that trade.

15,088. Does that rule apply to the brickmakers?—No, it is a bricklayers' rule; I cannot speak as to the brickmakers.

15,089. Then if you take an apprentice he ought not to be over 15 years of age?—No, that is the rule now; it did not use to be so.

The witness withdrew.

Mr. J. Thorpe.

Mr. James Thorpe sworn and examined.

15,090. (*Mr. Barstow.*) What are you now?—A farmer. I was a brickmaker, but I sold out in consequence of bad usage.

15,091. Do you live at Thatchleech near Prestwich?—Yes.

15,092. When did you leave off making bricks?—About last July.

15,093. July of this year?—July of the last year but this, 1866.

15,094. How long had you been a brickmaker up to that time?—A couple of years.

15,095. Were you a member of the brickmakers' union?—No.

15,096. Did you yourself work at the brick-

making? No, I employed men, but not union men, non-union men.

15,097. Had you a contract to supply a Mr. Robinson with bricks?—Not a written agreement, but we had a verbal one; and we served him with something like 100,000 bricks at the national schools, Prestwich, but the last April but one they turned out against our bricks, because they said it was in the Manchester district.

15,098. Who turned out against them?—My carter delivered those bricks, and they were taking the last lot of bricks that ever we sent, and the men that were working dragged their trowels ——

15,099. But I asked you who turned out against them?—The men that were working at this national school.

15,100. What men?—The bricklayers; they were Manchester bricklayers I think.

15,101. What reason did they give for turning out?—That the bricks were being carted into the Manchester district.

15,102. Then your brickyard was out of the Manchester district?—Yes.

15,103. And you carted your bricks into the Manchester district?—Yes.

15,104. And therefore the bricklayers turned out?—That is it.

15,105. That is because the bricklayers and brickmakers had amalgamated, is it not?—I think so.

15,106. Do you know the last witness, Edward Hindley?—Yes. The same week we made a contract with Hindley for 50,000 bricks, and the Whitefield union men came to us and asked us if we were not serving Hindley with bricks. We told him we were, and they told us we must not sell him any more. We told them that we had a written agreement for 50,000, so they said we might serve him those, if we had a written agreement, but we must not sell them any more till we had settled with the union and the neighbourhood. I gave over fetching bricks knowing there was a bother, except a man named Wilson, and the union men would not start setting them.

The witness withdrew.

CHARLES JOHNSON sworn and examined.

15,107. (*Chairman.*) How old are you?—18 next October.

15,108. What are you?—I work in the Manchester union. I am not in the union, but I work in the brickyard.

15,109. In what brickyard?—In Regent Road.

15,110. Whose is it?—Mr. Traunter's.

15,111. Where do you live?—At No. 4 Dalton Street.

15,112. Do you know a person of the name of James Kay?—No, I do not know him when I see him.

15,113. Have you never said that you know him?—No, not that I know James Kay.

15,114. Do you know a person of the name of Kay?—No.

15,115. Have you never said that you know him?—No, I have never said that I knew James Kay.

15,116. Do you know him by sight?—No.

15,117. Did you never say so. Now be careful, because you are very young, and you ought to know the importance of telling the truth, and you are upon your oath. Do you know a person of the name of Manning or Mannering?—I know him when I see him.

15,118. But have you worked in the same yard with him?—No.

15,119. Do you live in the same street with Mannering?—No.

15,120. Do you know him?—Yes, I know him when I see him.

15,121. Have you seen him lately?—I do not know when I saw him last.

15,122. Did you see him on Monday, the 2nd of September?—No.

15,123. Have you never said that you did?—No.

15,124. Did you see him on Thursday the 5th of September?—Not that I remember.

15,125. Have you seen him within the last fortnight?—No, not that I can remember.

15,126. Will you swear that you have not?—Yes.

15,127. Have you never said that you have?—No.

15,128. Now do not be alarmed. Remember that it is your duty to tell the truth. Do you know Tatton Street?—Yes.

15,129. Has anybody been speaking to you about this. Who has been speaking to you?—There was a man speaking to me one day.

15,130. But last night, did you never speak to anybody?—No, I have never spoken to anybody.

15,131. You came after the court was adjourned yesterday, did you not?—Yes.

15,132. Did anybody speak to you afterwards?—No.

15,133. Now just think, because it is a very serious thing that you should say what is not true. I ask you again, have you never said anything to anybody about this?—I have never said anything to anyone nor anybody to me.

15,134. Have you never said that you saw Kay and Mannering walking together?—I do not know Kay.

15,135. Do you know any of the brickmakers' delegates?—No, I am not in the union, and I do not know anything about them.

15,136. I ask you again, have you never said that you saw Kay and Mannering walking together in Tatton Street, on Thursday the 5th of September last?—No, because I cannot tell Kay if I see him.

15,137. But have you never said so?—No.

15,138. Do you know Williams the police superintendent?—No.

(*George Williams was pointed out to the witness.*)

15,139. Do you know that man?—Yes, I know him.

15,140. Did you never say to him that you had seen Kay and Mannering together in Tatton Street on Thursday the 5th of September?—No; I do not know Kay, so I cannot say it. I have seen plenty of men, but I could not tell who they were, going to their work and coming away.

15,141. Did you ever tell him anything of the kind?—No.

15,142. Did you ever mention the name of any person you had seen at all?—No.

15,143. Did you never mention Mannering's name to him. You understand whom I mean by Mannering; it is spelt Mannering, but it is pronounced Manning. You have worked with him, have you not?—No, I never worked with Mannering.

15,144. But you know him?—I know him.

15,145. Have you never said that you had seen Mannering at all?—No.

15,146. Not to Williams, nor to anybody?—No, because I was not near anybody that morning.

15,147. But you can see a person who is not near. Is it fear which is operating upon your mind and preventing your telling us the truth?—No.

15,148. Have you ever been spoken to or threatened by anyone if you spoke out here?—No.

15,149. You never said then to anyone that you had at any time seen Mannering; is that what you say?—No, I have not seen him.

15,150. Have you ever said that you have seen him?—No.

15,151. I ask you once more, have you ever pronounced the name of Kay at any time to anyone?—No.

THIRTEENTH DAY.

C. Johnson.

19 Sept. 1867.

15,152. Did you describe the dress of anybody whom you saw to this man Williams whom I have pointed out?—No.

15,153. You never did?—I could not tell the dress.

15,154. But did you describe the dress?—No.

15,155. Has anybody ever spoken to you, not last night, but at any time, about your giving evidence here?—No.

15,156. Nobody at all?—No.

The witness withdrew.

Mr. G. Williams

Mr. George Williams sworn and examined.

15,157. (*Chairman.*) You are superintendent of the detective police at Salford, are you not?—Yes.

(*The last witness, Charles Johnson, was brought up.*)

15,158. Do you know that boy?—I do.

15,159. We understand that his name is Charles Johnson?—It is.

15,160. When did you see him last?—To the best of my knowledge, it would be a week last Tuesday. It was about a week after the boy alluded to having seen those parties.

15,161. Where did you see him?—On a brickcroft behind the Regent Road barracks. From information I had got I went there to him.

15,162. What did you ask him?—I asked him whether he was Johnson who was called the "counter out" at the brickcroft behind the Regent Road Barracks. He said, "My name is Johnson."

15,163. That is the same boy?—Yes. In order to see whether it tallied with the information I had, I did this.

15,164. Did you make any note at the time?—I did. The boy would see me sitting down on a bank at the time to write this down, and I said, "Do you know George Mannering?" and he said, "Yes." I said, "Do you know a man named Kay?" and he said, "Yes;" and I said, "Do you know what I have come about?" he said, "No." I said, "Well, I know what information you can give. Did you not on Thursday morning, the 5th instant, see Kay and Mannering together?" He looked round to his mates. I said, "You need not look at them." My note is this:—"Between seven and eight o'clock, on "the 5th instant, a young man, named Johnson, saw "Kay and Mannering walking along together in "Tatton Street, in the direction of Regent Road. "Kay was first in dark clothes and black cap. Man- "nering had light corduroy trousers, dark coat, and "a hat on. Mannering is a man of about 40 years "of age, fresh complexion, rather sandy, about five "feet six inches high, a short stiff man, droops his "head when looked at in the face. Kay is a man "of about five feet eight inches high, 55 years of "age, brown and sunburnt, glides very much with "one eye, supposed to have two fingers off one hand." I said, "Did you hear what the men said?" He said, "No, they were speaking together as if they were meeting." The expression the boy used was that they were dressed up as if they were going away on a cheap trip. He saw them going, and he said they walked quickly.

15,165. At what time was it that he saw them together?—Between 7 and 8 in the morning on the 5th instant.

15,166. You have no doubt of the accuracy of your note?—No doubt whatever.

15,167. Was anybody with you?—They would not hear it, but there was a gentleman, Mr. Ashworth, who was some 200 yards off. But then I was going to tell you that I sent for this boy post-haste yesterday, and did not let him know the reason why. When he came here I said, "Do you know the reason why you have come?" He said, "No, except it is to say what I told you on Thursday last on the brickcroft." The boy knew me quite well. I said, "Do you know what you have been sent for here about?" He said, "No." I said, "It is about your seeing Kay and Mannering together." I said, "I have it here in my pocket-book." He said, "And what time had I better be here in the morning?" I said, "You had better be here at half-past 10," and I gave him 5*s.* for his day's expenses.

15,168. After you had written the note, and you saw him on that day, did you read him out the note you had made then?—No, I did not, because there was a reason, there were the men surrounding us.

15,169. Just so. Then did you yesterday evening, when he came here after the court was adjourned, read him the note, or merely state what you have said?—I merely stated the purport, and showed it him in my book.

15,170. Could he have seen it?—He could have seen it. It was at this table.

15,171. Did he then say, "I recollect it?"—Yes, the boy never denied it.

15,172. Just repeat again what you said to him yesterday when he was here?—I said, "Do you know what you have come here for?" He said, "No, sir, not except it is what you saw me about when I saw you last." I said, "Yes, it is about that; you know what it is." "Well," he says, "I forget now exactly what it was I told you." I said, "Did you not tell "me that on the morning of the 5th instant you saw "Kay and Mannering together near your brickcroft, "speaking and walking quickly?" He said, "Yes."

15,173. You wrote it out at the time the boy made the statement to you?—I did. The boy would see me sitting on the bank about 120 yards away from the men.

The witness withdrew.

C. Johnson.

Charles Johnson recalled and further examined.

15,174. (*Chairman.*) You have heard what Williams has said?—Yes.

15,175. Do you recollect it?—No, it is not at all true.

15,176. Nothing of the sort took place?—No.

15,177. Nothing of the sort took place at the time he mentions?—He was talking to me, but I never said anything of the sort to him.

15,178. Did he sit down on the bank and write?—I never saw him. I was under a shed, so that I could not see him.

15,179. You have heard what he said as to what happened yesterday, when you came here, have you not?—Yes, I heard what he said.

15,180. Is that true?—It is not all true. He asked me what I came here for, and I said, "No;" and he said, "It is about what you told me that day," and I said "I do not know anything about it."

15,181. What had you told him on that day?—I do not recollect what I told him.

15,182. But you recollect it sufficiently to know that he told you something?—He said, "It is about what you told me that day.

15,182*a*. What did you say in answer to that?—I did not say anything.

15,183. Do you mean to tell me that you do not recollect anything at all that you told him on that day?—No.

15,184. Do you not recollect whether it was about your having seen anybody? You must recollect that?—No.

15,185. What did he talk to you about?—He was

asking me different questions about them, but I did not know.

15,186. About whom ?—About Kay and Mannering, but I did not know Kay.

15,187. He asked you different question about Kay and Mannering ?—Yes.

15,188. Did you tell him anything ?—No, nothing of the kind.

15,189. What did you say when he asked you different questions about Kay and Mannering ?—Well, I cannot recollect.

15,190. Did you say nothing at all about anybody ?—No.

15,191. Do you remember his sitting down and writing ?—No, I never saw him at all. I never saw him afterwards.

15,192. Do you mean to tell me that you do not recollect anything that you said to him ?—No.

15,193. And nothing that he said to you ?—No.

15,194. Will you swear that you do not ?—Yes.

15,195. You had better hear the question. Will you swear that you did not tell him anything of the sort that he has said, namely, as to having seen either Kay or Mannering at that time ?—Yes.

15,196. You will swear it ?—Yes.

15,197. What did you say to him yesterday ?—To whom ?

15,198. To Williams when he spoke to you ?—I never said anything to him, only he asked me what I came here for, and I said, "I do not know." That was all.

15,199. And you said nothing more ?—No.

15,200. Are you quite sure ?—Yes.

12,201. Do you remember saying that you had come here with regard to that which you had told him before ? Did he say that, whatever it was ?—No, not that I can remember he did not.

15,202. Do you remember nothing at all ?—No.

15,203. And you said nothing ?—No.

15,204. It is not in my province to give an opinion ; I have no right to do that. You can stand down.

The witness withdrew.

Mr. Frederick Bagulay sworn and examined.

Mr. F. Bagulay.

15,205. (*Mr. Chance.*) Are you manager to Messrs. Bates and Company ?—I am one of the partners.

15,206. What are they ?—Builders and brickmakers.

15,207. Have you a brickyard upon the bank of the canal at Droylsden ?—Yes.

15,208. Is the canal the boundary line between the Manchester district and the Ashton-under-Lyne district ?—Yes.

15,209. On which side of the line is your brickyard ?—On the Ashton side.

15,210. Have you a large plant there ?—Yes.

15,211. What is the value of the plant which you have there ?—The value of the plant is about 800*l.*

15,212. Have you a large number of bricke there ?—About 500,000.

15,213. Are you able to dispose of those bricks ?—No.

15,214. Why not ?—We are not allowed to cart them over the canal. The Manchester brickmakers will not allow us to use them over the canal.

15,215. Does that prevent your selling them ?—Yes. We have a large and populous district between Manchester and our place and Droylsden, but not between our place and Ashton-under-Lyne.

15,216. Then you make them for the purpose of sending them to the Manchester District ?—Yes.

15,217. By whom were those bricks made, were they made by the Ashton union men ?—Yes.

15,218. Were the prices which you paid the brickmakers' the union prices ?—Yes.

15,219. Are the union prices settled by the Ashton under-Lyne union the same as those which are settled by the Manchester union ?—There is not much difference, though there may be some little difference in the prices. I think it is rather more for the burning of the bricks in Manchester perhaps than it in is in Ashton, but the other parts of the trade are much the same.

15,220. The prices paid to the burner are the only difference ?—I believe so.

15,221. Have you received a notice from the Ashton-under-Lyne brickmakers, telling you that they would take possession of your yard ?—Of the other two yards.

15,222. You have two other yards besides this yard ?—Yes, which are now in the Manchester district.

15,223. How far is the boundary line from those other two yards ?—About a mile.

15,224. Then it would be some distance into the Manchester district ?—A mile into the Manchester district.

15,225. Have you received any notice from the Ashton union that they intend to take possession of your yards ?—Yes, to work them.

15,226. To work them with their men ?—Yes.

15,227. What would be the effect of that upon your brickyard, supposing the Ashton men were to carry out their notice ?—We should then have a plant altogether of about 1,000*l.*, and about 3,000,000 bricks, for which we should have a very limited market.

15,228. For the same reason that you gave with regard to your other brickyards ?—Yes.

15,229. But will the Manchester union allow the Ashton men to carry out that notice ?—No ; not without some trouble, I daresay.

15,230. Then at present it is simply a notice ?—At present it is simply a notice.

15,231. For what time is the notice given ?—October is the time.

15,232. Next October ?—Yes.

15,233. Do you remember in the year 1865 cutting the main sewer in Gorton ?—Yes.

15,234. How far is that from Manchester ?—About a mile and a half or two miles perhaps.

15,235. Were you able to get the bricks for that work in the Manchester district ?—No.

15,236. Then what did you do in consequence ?—We went to Ashton for them ; to Guide Bridge, about a mile from Ashton.

15,237. Did you order any bricks there ?—We had ordered the bricks to be made in Manchester, but we did not want to wait for them, so we got some ready made in Ashton, or Guide Bridge.

15,238. You had already ordered some bricks ?—Yes.

15,239. And then not being able to get those you went to Guide Bridge ?—Yes.

15,240. Was that to Mr. Harrison ?—Yes.

15,241. Do you remember upon that whether any of the Manchester union men came to you ?—Yes, when we had got 5,000 bricks upon the ground.

15,242. When you had got 5,000 bricks from Mr. Harrison on the ground one of the Manchester union men came to you ?—Yes.

15,243. Who was that ?—One was a man of the name of May Holland.

15,244. Did he come by himself ?—I believe there was another man with him.

15,245. Did you see them ?—I did not see them myself.

15,246. Who did see them ?—My partner saw them.

15,247. Do you know from your partner what it was that was said ?—He said we must not use these bricks.

15,248. What did you do upon that ?—We had to stop the job till the new bricks were made in Manchester.

15,249. Did he tell you that you must order some more bricks from Manchester ?—We had ordered the bricks, and then we should have had to wait about

THIRTEENTH DAY.

Mr. F. Bagulay.

19 Sept. 1867.

five weeks for them, and we got them in order to commence. He told us that we must not use those bricks at all.

15,250. Did he tell you what would be the consequence if you did use the bricks?—I do not know that there was any threat at all.

15,251. After waiting some time did you get the Manchester bricks?—Yes, we did.

15,252. Were you then allowed to use those bricks?—They would not let us use those bricks which we got in Manchester till we carted the others away.

15,253. Had you to cart them back again to the Ashton-under-Lyne district?—Yes.

15,254. Out of the Manchester district altogether?—Yes.

15,255. Do you remember in 1866 having in your employ a brickburner of the name of John Lonsdale?—Yes.

15,256. Was he a good workman and a trustworthy man?—Very good.

15,257. What was his duty?—His duty was to burn the bricks, and to look after the yard in our absence; to count out and sell the bricks.

15,258. In which of your yards was he working?—In the one in Manchester.

15,259. Is he a member of the Ashton union?—He is a member of the Ashton union and of the Manchester union as well.

15,260. He is a member of both unions?—Yes, I believe so.

15,261. Had you any communication with the Manchester union in respect of that man?—No.

15,262. They went to the workman, to Lonsdale?—Yes.

15,263. Do you know what they said to him?—They said that he must not have that job.

15,264. Did they tell him why?—Well, I cannot say, I am sure.

15,265. Did he leave?—He did leave.

15,266. Of his own accord?—He left because he knew he must leave.

15,267. Did you discharge him?—We kept him on at other work.

15,268. Did they send any man in his place?—We got another man in his place, a stranger to us.

15,269. Was he sent by the union?—Yes.

15,270. Is his name Job Eccleston?—No; Job Eccleston was moulding the bricks that this man was to burn, and he was the man sent by the union to tell him he must not work.

15,271. In August this year had you a letter from the secretary of the Ashton-under-Lyne Operative Brickmakers' Union?—Yes.

15,272. Was his name Charles Smith?—Yes.

15,273. I believe the object of that letter was to tell you that the two yards which you have mentioned would be put in the Ashton-under-Lyne District?—Yes.

15,274. Did you send an answer to that letter?—Yes.

15,275. I think you said that you did not see by what means they could prevent the Manchester brickmakers from monopolising the trade of Manchester?—Yes.

15,276. I believe the result of what has taken place has been a very heavy loss to you?—Yes.

15,277. And if this notice is carried out I think you have told me that the loss will be still heavier?—It will be a very great loss indeed if we have to keep all those bricks in stock.

15,278. Have you ever had any damage done to your property?—Yes, we had about 40,000 bricks spoiled in 1863, I believe.

15,279. In which of your yard was that?—In one of the yards in Manchester.

15,280. Were they spoiled by being trampled upon?—No, it was very wet weather, and all the walls were thrown down; they were all in walls.

15,281. How many men do you suppose would be engaged in such a work as that?—Two or three men might have done it in the course of a couple of hours.

15,282. Had you any watchman on the premises?—No.

15,283. Have you any reason to know who has done it?—No.

15,284. Do you know of any cause why that damage should have been done to you?—Only that we had been carting bricks out of the Ashton union. The best bricks which we only made then in Ashton we had been carting into the Manchester union.

15,285. Is that the only reason which you can assign for this damage having been done to you?—It is.

15,286. Carting bricks against the rules of the Manchester union?—Yes.

15,287. You always employed union men?—Always.

15,288. Is it your belief then that the damage was done by union men belonging to Manchester?—Well, we cannot see any other party that should do it for we have never had any dispute with anyone except this boundary dispute.

15,289. You had no private quarrel with any of your workmen, or with anybody else?—None at all.

15,290. Is there any other occasion on which any damage has been done to your property?—I believe not.

15,291. I think you stated before that no threat had been used to you?—No.

15,292. (*Mr. Barstow.*) Did you say that the union sent you another man in the place of John Lonsdale?—We got one recommended. They could not employ the man, but they recommended a man.

15,293. And I suppose that if you had not taken their recommendation something disagreeable would have happened?—Well, I do not know that it would. If we could have found a man in their union it would have been agreeable for them no doubt.

15,294. You might have taken any union man I suppose;—Yes, any Manchester union man.

15,295. You tell me you have never, so to say, fought the union at all?—Not at all.

15,296. And yet you have suffered all this loss of which you have told us?—Yes.

15,297. You seem to have been quite as badly off as if you had fought with them?—Well, I do not think quite as bad.

15,298. In what respect would you have been worse off if you had fought with them?—Well, we might perhaps have been in some personal danger if we had had a fight with them.

15,299. You really think your would have been in some personal danger?—Well, we might have been if we had a fight.

15,300. Was that an apprehension on your mind that you would suffer some personal injury?—We have always tried to be conciliatory with them and to do as they told us.

15,301. But was it for your own interest or for fear of the consequences?—Well, the consequences as much as anything.

15,302. (*Chairman.*) Can you mention the names of anybody who came—was George Knight one of the men who came to your partner?—I am not aware that he was.

The witness withdrew.

Captain William Charles Sylvester sworn and examined.

15,303. (*Chairman.*) Are you in any employment?—I am chief constable of the borough of Salford.

15,304. Were you in court yesterday when the boy Charles Johnson came?—I was.

15,305. Were you present when Williams the detective spoke to him?—I was present when superintendent Williams spoke to him.

15,306. Will you be kind enough to tell us, if you recollect, what passed?—Mr. Williams asked him if he knew what he had come for. He said "No." Williams then said, "Do you not remember seeing me on the brickcroft?" In reply the boy said, "Yes." Williams asked him if he remembered what he had told him, and in reply the boy said, "Yes." Williams said, "Is that so?" The boy said, "Yes." Mr. Williams then took out a pocket-book, and said, "See, it is written down here, you may look at it if you like." I then asked the boy if he had seen Mannering and Kay together. I said, "You saw Mannering and Kay together I think?" Those were the words I used, and he said, "Yes." Mr. Williams then served him with a summons to appear here to-day, at the same time telling him that he would be required.

15,307. That took place in this court yesterday afternoon after the Court was adjourned?—In this court immediately after the adjournment of the Court.

15,308. That was pretty well all that passed?—That was all I heard.

The witness withdrew.

John Kettle sworn and examined.

J. Kettle.

15,309. (*Chairman.*) I believe you were foreman to the late Mr. Bramall?—Yes.

15,310. He was the contractor for these courts, was he not?—Yes, and the county gaol also.

15,311. We understand that there was a strike there?—Yes.

15,312. In what year was that?—The 11th of April 1864.

15,313. Just mention shortly the circumstances connected with that strike—did the bricklayers' labourers first strike?—They did.

15,314. And after that did the bricklayers themselves strike?—Yes, the bricklayers were knocked idle through the labourers striking.

15,315. Did the joiners also go with them soon after?—In a while after they did.

15,316. The labourers of the bricklayers first struck, then the bricklayers were idle and they struck, and afterwards the joiners struck. Was that so?—Yes.

15,317. That you say was in the year 1864?—Yes.

15,318. Were the places of those men filled up with any other persons?—They were filled up with non-society men.

15,319. Were those men who struck all union men?—Yes.

15,320. Then what happened? You employed, you say, other hands who were non-union men?—Yes, with the exception of three. There were three that were on the work before the strike, the society objected to give them turn-out pay, and because they would not give them turn out pay, they came back to work against the society.

15,321. What were the names of those three?—Thomas Wilfred, William Ratcliffe, and Samuel Upton.

15,322. After that were your works picketed at all?—Yes, they were picketed by the joiners and the bricklayers and the labourers.

15,323. Did those men who picketed the works belong to any union or to more than one union?—There were three separate unions; the joiners' union, the bricklayers' union, and the labourers' union.

15,324. Those three unions joined together in sending men to picket your men at work?—Yes.

15,325. Are all those three unions in Manchester?—Yes.

15,326. Were the men who were at work exposed to any insult or outrage, or anything of the kind, while they were at work?—On the 23rd of May, about 10 minutes past 8, on their road home from their work, those three bricklayers whose names I have mentioned, along with some others, were going along the road and they were waylaid.

15,327. Do you remember where it was?—It was this side of the railway arch in Ducie Street.

15,328. What happened?—The labourers, I believe the chief of them were bricklayers' labourers——

15,329. The men who were attacking, or the men who received the attack?—The labourers who attacked those men. They were armed with soda-water bottles and sticks, and one of them was armed with an iron bar about 14 or 15 inches long, with a screw or knob at the end.

15,330. Of how many did the attacking party consist?—There were about six or eight of them I should think, and they ill-used one of the men of the name of Wilfred very badly. They had to get an adjournment before the magistrates on account that he was not fit to be brought into court.

15,331. Then I gather from that that somebody was taken up for this assault?—Yes.

15,332. Who was taken up?—John Nolan and Thomas Daly.

15,333. Was it as they were going home from their work in the evening that they were attacked?—Yes.

15,334. Then you say Nolan and Daly were apprehended?—Yes.

15,335. Were they committed for trial?—They were committed for the sessions.

15,336. And when it came on were the witnesses forthcoming?—No.

15,337. The witnesses were out of the way, were they?—The main witness, that was Wilfred, was taken up to London by the society belonging to the bricklayers.

15,338. He was got out of the way, was he?—He was got out of the way; he was taken up to London.

15,339. From whom did you get information as to that, because I suppose you do not know it of your own knowledge?—I had it no longer since than yesterday from the man that took one of them.

15,340. What was the name of that man?—Richard Coppock.

15,341. Is he a bricklayers' unionist?—Yes.

15,342. Then he told you that he had taken Wilfred up to London?—I saw him and I asked him what he was summoned for. He told me he was summoned on account of taking Wilfred out of the way from prosecuting Nolan. He said, "Of course I acknowledge "I did take him, and I will speak the truth when I "am brought up."

15,343. Had you a bricklayer of the name of Benjamin Bradburn working with you?—Yes.

15,344. He was a bricklayer, was he?—Yes.

15,345. Was he assaulted?—He was assaulted in Deansgate.

15,346. Do you remember when that was?—It was about February 1865.

15,347. The other was in May 1864, I think?—The other was in May 1864.

15,348. Was anybody taken up for that?—Yes, there were three taken up.

15,349. Was anyone convicted for it?—I think they all three got two months each.

15,350. Do you know the names of the three?—I do not.

15,351. Do you know a joiner of the name of Mills?—Yes.

15,352. Was he assaulted?—He was, I believe, but I did not take any interest in that, as he was not working under me.

THIRTEENTH DAY.

J. Kettle.

19 Sept. 1867.

15,353. As he was not working under you, your attention was not so much called to it?—No.

15,354. Have you ever received any threats of violence to yourself?—Yes.

15,355. Who communicated the threats to you?—One of the society of bricklayers.

15,356. What is his name?—Gomer Roberts.

15,357. Is he a member of the bricklayers' society?—Yes.

15,358. When was this?—I have not got the dates.

15,359. But was it in 1864 or 1865 when he told you?—It is not above six months since.

15,360. About six months ago Gomer Roberts told you of some threats of violence towards yourself, is that so?—Yes.

15,361. Who is Gomer Roberts?—He is a bricklayer.

15,362. He is a member of the bricklayers' union?—Yes.

15,363. But what is it that he told you?—He told me that a certain party when he was on the committee proposed to go and shoot me, or to blow the house up, or something to that effect.

15,364. At the bricklayers' committee?—Yes, at the bricklayers' committee or the executive; I cannot say which of them.

15,365. He told you that when he was on the bricklayers' committee, a certain party proposed to shoot you?—Yes, or to blow the house up.

15,366. Do I understand you to say that he told you that as having been proposed at the committee?—Yes, and one of the bricklayers I believe, left the chair. They said if anything of that kind was proposed they would not sit there.

15,367. What was the name of the chairman?—I could not tell, but perhaps he is summoned. I did not make any mention of that when I was called up to London, but the Sunday after I came back I happened to light on Gomer Roberts again. He was rather fresh in drink the first day, so I asked him if he remembered telling me. He said "Did I tell you?" I said "Yes." "Well," he said, "if I told you it "was truth," and he acknowledged to it yesterday when I was speaking to him outside.

15,368. Did he mention the name of the chairman?—No, he did not mention the name of the chairman, but he mentioned the name of another that was there as well as he.

15,369. Who was that?—James Toole.

15,370. Do you know from your brother whether any threats of violence have been offered to him?—My brother was working at Northwich and one went over there and made it his business to see him, and told him, as private information, that he had it on good authority that they intended to shoot me.

15,371. Do you know the name of the man who is said to have told your brother that?—Yes.

15,372. What is his name?—John Hamlett.

15,373. Do you know a person of the name of Zachariah Evans?—Yes.

15,374. Do you know a person of the name of Richard Wright?—Yes.

15,375. Are they union men?—Yes.

15,376. To what union do they belong?—The bricklayers'.

15,377. Have they told you anything at all about the minute books of that society?—Yes.

15,378. What did they tell you?—That they were destroyed.

15,379. That the minute books of the bricklayers society were destroyed?—Yes.

15,380. When did they tell you that?—It will be about a month or five weeks ago.

15,381. Did they say by whom the books had been destroyed?—Yes.

15,382. By whom did they say they had been destroyed?—George Barton and Henry Davies.

15,383. Are they bricklayers?—Yes.

15,384. Are you using machine-made bricks at the gaol?—Yes.

15,385. Have attempts been made by anybody to prevent you getting any bricks?—Yes, I have connexion with nine houses with another man separate from the gaol for which we purchased 220,000 bricks from Mr. Pimlet.

15,386. That other person with whom you are a partner is a person of the name of Brady, is he not?—Yes, John Brady.

15,387. You are engaged with him in building some houses in Stock Street?—Yes.

15,388. Is that in Cheetham?—Yes.

15,389, Did you then together buy these 220,000 bricks?—Mr. Brady attended and bought them.

15,390. It is a partnership concern?—Yes.

15,391. Did you pay any deposit?—Yes, 50*l.*

15,392. And how many of those 220,000 bricks were delivered?—They delivered about 11,000.

13,393. After having delivered 11,000 what happened?—James Kay went to the job and asked the man that had charge of excavating the houses if that was the job that I was connected with. He said, "No, I think it is Brady." So he knew by that that of course they were the right houses. He went straight back to Pimlet's croft. The cart was part loaded, and he made them empty the bricks out of the cart.

15,394. And have you been able to get any more than 11,000 out of the 220,000?—We had to serve them with an attorney's letter. Mr. Pimlet then put himself in communication to see if they would allow him to deliver the bricks according to contract. They would not allow him, and he had to send the bricks in opposition to the brickmakers. Last Friday morning he started to deliver again. He has delivered up to the day before yesterday altogether about 29,500 bricks.

15,395. When was this contract made to deliver those bricks?—On the 13th of July last.

15,396. And you have had 29,500 out of the 220,000?—Yes.

15,397. If there had not been this sort of obstacle in the way, how many ought to have been delivered by this time?—He was to deliver them on the ground so that we could use them in three months.

15,398. At stated intervals and in stated quantities?—As we required.

15,399. Should you have got more by this time if it had not been for these obstacles?—Yes, we should have had at least 150,000 on the ground by this time.

15,400. You would have had them if it had not been for what has happened?—But for the brickmakers stopping Mr. Pimlet from delivering the bricks.

15,401. Whereas you have only had 29,500?—Yes. We have had about 50,000 from different places to keep us going.

15,402. Have Pimlet's men struck work in consequence?—Yes, last Friday when he began to deliver the bricks again they all struck work.

15,403. Had they tried any other means to get you out of this place before they had recourse to threats and things of this description that you have mentioned?—Yes, they sent a deputation to Mr. Bramall.

15,404. You were his foreman?—Yes, I was his foreman. They sent word to him to say that he must discharge me, otherwise he would have no men belonging to the Manchester society.

15,405. Do you mean that the brickmakers' union men did that?—Yes.

15,406. They sent to Mr. Bramall the contractor to say that he must discharge you or else he should have no men from that society?—Yes.

15,407. The ground of your offence (though I think that is not so very much a question for us now) is appointing somebody to be leader of the gang?—Appointing a man to go before the rest.

15,408. The usual rule, I suppose, being that the senior man becomes the head man, and you appointed a man in whom you had confidence to be a leader of the gang?—They have no law, but it is only a custom.

15,409. But is that the practice which I have mentioned?—In some cases, but not in all.

15,410. You appointed a man to be a leader of the gang in whom you had confidence, and that was the ground of complaint?—That was the practice with the society.

15,411. Did they also go to the architect?—Yes, to Mr. Waterhouse.

15,412. The same union men?—I believe George Burton went to Mr. Waterhouse.

15,413. And they insisted that you should be removed?—Yes, and he lodged about seven or eight different complaints that I had given offence to the society, so that I had to go Mr. Waterhouse and to clear up to his satisfaction that they were a lot of falsehoods that they had told me.

15,414. And you did clear them up?—Yes, to his satisfaction.

15,415. You have mentioned different cases of assaults upon men and so on, and refusing to let you have your bricks. Is there any other means to which they have had recourse for the purpose of carrying out their objects?—Knowing that the dispute with me was with the bricklayers, two or three weeks ago I made an application to the bricklayers to know if they would allow their men to come and build, and to say that I would employ their men. The bricklayers had two or three meetings and they decided by a majority of two to one to open all the jobs in the town, and to allow all the men in the town to join if they thought proper. But then the brickmakers stepped in and they said that if they allowed those men to come in that had been using machine-made bricks, they would not let them have bricks. They must either throw me over or throw the brickmakers over.

15,416. The bricklayers had the choice of throwing you over or the brickmakers?—Yes.

15,417. And I suppose they threw you over?—Yes, they threw me over instead of the brickmakers.

15,418. Is Pimlet a brickmaker?—He is a contractor.

15,419. (*Mr. Chance.*) When your works were picketed by the joiners and bricklayers' labourers how many men were employed in picketing?—On some occasions there would be about four or five labourers, and there would be about 16 bricklayers, and about six or seven joiners.

15,420. So that there would be about 27 men altogether?—Yes.

15,421. Were they employed simply for the purpose of watching?—For the purpose of watching and preventing us from getting men.

15,422. Did they use any means of coercion or threats or annoyance in any way to prevent the men coming?—They went to the railway station, and if they saw anyone that was like a bricklayer they popped him into a cab and took him down to the club-house and offered him bribes not to work.

15,423. It was not merely to persuade people not to come?—No, they bribed them not to come.

15,424. The bricklayers work in gangs, do they not?—Yes.

15,425. Do they work one man after another?—That is the labourers. The man that goes forward is the principal man. He has to look round and see what the bricklayers require next, and whatever he tells them to bring they bring.

15,426. Is there any rule as to who is to be the first man?—No.

15,427. Have you ever heard of a rule amongst the labourers that the slowest man shall be the leader of the gang?—Well, it is to their advantage to have the slowest, because the slower he works the less they will have to work.

15,428. No doubt, but is that the fact?—No, it is generally the first man. It is left to him. If he is not competent it is left to the labourers to decide whether they will allow another. It is left to themselves.

15,429. It is an advantage of course to have a slow man, inasmuch as they do not do so much work?—They do not do so much work.

15,430. Is that a reason why they should choose the slowest man to be their leader?—They do not choose at all. It is the man who is generally first, if he works well they do not object to him, but if he goes too fast it is ten to one but they will shift him.

15,431. If he goes beyond what they consider to be the proper rate of work they will change him for somebody else?—Yes, if he goes too fast they will drive him away.

The witness withdrew.

BENJAMIN BRADBURN sworn and examined.

B. Bradburn.

15,432. (*Mr. Barstow.*) You are a bricklayer, I believe?—Yes.

15,433. Are you a member of any union?—No.

15,434. In February 1865, were you working at the new gaol here?—Yes.

15,435. Do you remember on the 22nd of February being in Deansgate?—Yes.

15,436. Was any one with you?—Yes.

15,437. Who were with you?—William Bradburn and Edward Dignam.

15,438. Were you assaulted there?—Yes.

15,439. Just tell us what happened?—It was on the 22nd of February. The weather was bad, and we could not work, and we went down Deansgate for a walk, me and William Bradburn, and Dignam. As we were going down three chaps met us, and called us knobsticks, and struck us and kicked us.

15,440. Did they knock you down?—Yes.

15,441. With what did they strike you?—With their hands and feet.

15,442. Were you knocked down?—No, not in Deansgate.

15,443. Did they use anything besides their hands and feet?—Yes, one drawed a knife.

15,444. What did he do with it?—He ran at me with the knife, and struck me, and I knocked his hand away, and got inside the house.

15,445. Were you hurt at all?—Not badly.

15,446. You had a few bruises?—Yes.

15,447. Whereabouts?—On my face.

15,448. Do you know whether the other men were hurt?—No, neither of them was hurt badly. They had just a knock or two.

15,449. Then those men were apprehended?—Yes.

15,450. Do you remember what their names were?—No, I do not know their names.

15,451. Should you know if you were to hear them?—Yes.

15,452. Was John Hughes one?—Yes, John Hughes was one.

15,453. Was Patrick Cooley one?—Patrick Cooley was another, and Sharn.

15,454. Where were they taken to, was it to the police court?—Yes.

15,455. Were they sentenced there, or were they sent to the sessions?—They were sentenced there.

15,456. Do you remember to what they were sentenced?—Two months each.

The witness withdrew.

THIRTEENTH DAY.

D. Callaghan.

19 Sept. 1867.

DANIEL CALLAGHAN sworn and examined.

15,457. (*Mr. Chance.*) Are you a bricklayer's labourer?—Yes.

15,458. Are you working on the new gaol now?—Yes.

15,459. In the year 1864 were you working for Mr. Bramall?—I had been; that was when I started with him.

15,460. Have you worked with him since?—I have been working there since.

15,461. Do you remember in August 1864 being attacked by any men?—Well, I cannot give you a proper account as to the date of the time, because I never expected that there would be such like inquiries made after that as what there has been.

15,462. But was it in the year 1864?—Yes.

15,463. Was that after the union men had gone out on strike?—Yes.

15,464. And you had taken the place of one of them?—No, they stopped me at my work.

15,465. Did you go to work?—They stopped me at the work that I had been at. I had been a union man myself belonging to this town. They stopped me at my work where I had been working.

15,466. Why did they stop you?—On account of the levy that had been put on. I refused paying the levy, and for that they stopped me at my work.

15,467. When was that?—In 1864.

15,468. That was before you engaged with Mr. Bramall?—Yes.

15,469. Then when you had engaged with Mr. Bramall you were no longer a member of the union?—No, they would not let me.

15,470. Do you remember at any time after you commenced working being attacked by any men?—I had been attaked at my work where I had been working when they stopped me.

15,471. Where was that?—I had been working for Mr. Griffiths and Mr. Johnston, in Rumford Street, out of Oxford Road, when the delegate belonging to the labourers, Johnny Nolan, came to me.

15,472. At this time you were a member of the union, you say?—I was a union man at the time.

15,473. Now tell us what took place?—Johnny Nolan came to me at the job where I was. There were five labourers besides me, and he inquired of every man for to show him the ticket. This ticket means that any man that has not it must not work; that is a ticket belonging to the union. It is like a token that a man is clear on the books, and that he can work anywhere where he can get work. So I had none. He inquired of every one before he came to me. I was slushing a load of lime about three yards off where they had been filling their hods, and this lime had been boiling in the hole the same as if it had been boiling on a fire. Every man passed on comfortable till he came to me. "Dan," he says, "where is your ticket?" I says, "I have none." "How is that?" he says. "Because I cannot afford to pay 2*s.* 3*d.* every Saturday night," says I. "What do you mean by the 2*s.* 3*d.*" says he. "I mean 1*s.* for the levy, and 1*s.* 3*d.* for a ticket," says I. "I cannot afford to pay that, and I will not pay it." Through that means he and me got into words over this levy, and he told me that he would put me into the boiling lime, where I suppose the hole would be 10 or 12 feet every way, and the lime boiled up, every lump as big as a little barrel. He ran at me to put me into it, but his father-in-law, who was a labourer working on the premises, and who stood there, got hold of him and took him away.

15,474. What was the name of the man who took him away?—That was his father-in-law. He was a labourer on the premises.

15,475. Did he do anything more to you on that occasion?—No, he did not, because his father-in-law took him away, and the week following he and some other men came and met the men that were working at this prison where I am working now, and through that means he got locked up, he and another man, and then he could not be delegate any longer, because he had been locked up. I had been turned over I expect to the bricklayers because of refusing to pay this levy, and the bricklayers' delegate had taken his place and his own. That was to answer for doing labourer's business and bricklayer's business at the same time.

15,476. What was he locked up for?—He was locked up for striking the men that worked at the gaol.

15,477. Did you see him do that?—No, I did not. I was at my work where I tell you. I had been at my work at the same place where I tell you, and he wanted to stop me.

15,478. You did not see that?—No, I did not.

15,479. I want to know what you can tell me?—I am just going to tell you if you will let me. I had been turned over to the bricklayers because he was locked up and could not get to stop me. So the bricklayers' delegate answered instead of him, and in a week after the bricklayers' delegate came to me.

15,480. Who was that?—Why Bill Arkwright. Bill Arkwright is a bricklayer and was a delegate for the bricklayers at the time he met me on the Monday on the Stockport road; we had not been working. He says "Dan, I have just been to your job." I said, "What did you go there for?" He said "I am going "to stop you. I got orders from the committee on Wednesday night to stop you." I said, "They are "not working. I expect they will be there to-mor-"row. You can come to-morrow, I will be there." Accordingly he did come on the Tuesday morning at breakfast time and stopped me, and so I told him I would not be stopped by him. He says, "You must stop." I says, "What will you stop me for?" and he said, "Because you have not paid the levy."

15,481. I think you are making rather too long a story. You have told us of one occasion when Nolan threatened to put you amongst the lime. Did he at at any time assault you or beat you?—Not at any other time; he has had no chance since.

15,482. Were you once attacked in the union club-house?—Yes, I was.

15,483. When was that?—That was afterwards when I was working here.

15,484. Who were the men who attacked you in the union club-house?—There was one man, I cannot think of his name now, though I know his name very well, and he got two months for it.

15,485. How many men were there?—There were five or six.

15,486. Why did they attack you?—For just going on.

15,487. That was after you had been working here?—That was when I had been working here.

15,488. Then did you go to get summonses for those men?—Yes.

15,489. When you went to get summonses were you attacked then?—Yes, I have been attacked after that.

15,490. Who attacked you when you went to get the summonses?—The picket that was on here watched me when I went to get the summons. I had been late the morning before, and so I went time enough and they watched me into Bridge Street.

15,491. Who were they?—One man was named Johnny Riley who was on picket here.

15,492. Was John Murray one?—Murray was the man that I was going to get a summons for. He was in the club room and came downstairs hearing that I was downstairs standing at the bar the same as I stand here. He never spoke to me while he called for a glass of ale and paid the halfpence for it, and so soon as he took it off the counter he throwed the ale in my face and said, "You damned knobstick, what do you come here at all for?"

15,493. Did anybody else do anything to you?—Yes, while I wiped this off my face everybody had a clout and a thump at me. I could not see them because my eyes got filled with it, and I got shoved out by my wife.

15,494. Did Patrick Toolan do anything to you?—That was the week following. They nearly killed me five of them, they nearly kicked the teeth out of my head.

15,495. You say that Murray and some others assaulted you in the club-house?—Yes.

15,496. Did you then go and get summonses for that assault?—Yes I did.

15,497. Against whom did you get summonses?—I got one for one man that did not belong to the club at all. He was a factory man.

15,498. Who was he?—I cannot call his name into my mind now.

15,499. Who else was there?—This man got two months that I am telling you about, but I cannot tell you his name, and Murray was bound over to keep the peace.

15,500. Did anybody else go up with Murray?—There was a man named Riley that went up with him.

15,501. You got summonses against them?—Yes, Riley got off. I asked the magistrates as much as I could for him because he was a man with a very heavy young family, and I did not want to do anything to him.

15,502. Murray was bound over?—Murray was bound over to keep the peace.

15,503. When you went to get those summonses for those men were you again assaulted?—This was the second attack which was made upon me.

15,504. But you told us just now that you got a summons for him when he attacked you in this club-house, when he threw the beer in your face?—Yes.

15,505. Was that the occasion when you got a summons against him?—That was the occasion when I got a summons against him.

15,506. Were you attacked afterwards when you went to get the summonses for that?—Not by that party.

15,507. By any party?—After that I have been attacked by a man named Brennan.

15,508. How long was that afterwards?—That was twelve months afterwards.

15,509. What did you do?—I was going to the market with my wife and the man that used to lodge with me, and I stood facing the "Gate and Goose," at the Cross——

15,510. Never mind all the particulars, but did Brennan on that occasion assault you?—Brennan comes up to me and another man, and he gets hold of me by the handkerchief, and he said, "You damned "knobstick, why do you stand before a man on the "causeway? Shift off the causeway, and do not stand "before a man on the causeway. If it was not that "the policeman stands so near you I would have your "life." A policeman stood about ten yards off at the time, and I do not think I was above 100 yards from the police station.

15,511. Was Brennan a union man?—Yes, he was.

15,512. Have there been any other occasions when you have been beaten or assaulted by union men in any way?—No, there have not.

15,513. Only on those occasions of which you have told me?—Yes.

15,514. Have you been called names and abused?—Yes, I cannot walk the streets for them at the present day no more than then. I dare not go anywhere where they are.

15,515. Then you said just now that your teeth had been knocked out?—Yes, they had.

15,516. When was it that that was done to you?—At the time that I got those men fined. They paid one of their passages to America, and the other went down to the county of Durham.

15,517. When you went to get those warrants they did attack you then?—They did.

15,518. Who were the men who attacked you then?—Well, one man is of the name of John Kelly. They paid his passage to America.

15,519. Tell us first the names of the men who attacked you?—Kelly was one, and another man of the name of Toolin and this Riley that I begged of the magistrates to do nothing to on account of his family. That was three and how many more I cannot tell, because they knocked me out of sense and reason altogether on the floor.

15,520. You got warrants against those men?—I did.

15,521. What was done to them?—They paid one of the passages to America and the other went from here to the county of Durham, and was never seen till about two months ago I saw Toolin in this town.

15,522. Who went to America?—John Kelly.

15,523. What became of Toolin?—He has not been seen in the town to my knowledge till within about these last two or three months.

15,524. And Riley you say you begged off?—Yes.

15,525. How did you know that this man went to America?—I was told by their parents. Their parents did not live above 400 or 500 yards off where Kay lived. They told me that their passage was paid to America the very same week, not above three days after I got the warrant for them.

15,526. And Riley, you say, you begged off?—Yes.

15,527. Are these the only occasions on which you have been beaten?—Those are the occasions on which I have been beaten.

15,528. (*Chairman.*) Where was it that this assault was committed in which your teeth were knocked out and your eye injured?—At the end of the street where I lived.

15,529. What is the name of the street?—Agnes Street.

15,530. Was it in the street?—No, it was in a beer-shop.

15,531. At what time of the day was it?—About 12 o'clock, as near as I can tell.

15,532. You went into the beershop. Had you then applied for warrants or were you going to apply for them?—I had been going for a summons for this Murray.

15,533. You had been going for a summons for Murray, and then as you came back did you go into the beershop?—No; I had been going for the summons for Murray, and those men met me and seduced me not to get a summons for him. They begged me to get none for him because of his being a widow's son.

15,534. You were going for a summons against Murray?—Yes.

15,535. Then which of them came up to you and begged you not to do so?—This man that was on picket here, Johnny Riley.

15,536. Who else?—Nobody else.

15,537. Then Riley came up to you and persuaded you in the beerhouse?—He persuaded me in Bridge Street.

15,538. He persuaded you in Bridge Street, and then you went to the beerhouse in Agnes Street?—Yes, we stopped about an hour, him and me, and then I said, "It is too late to go to work now, I will go home to dinner."

15,539. You stopped with him in Bridge Street and then you went to Agnes Street?—Yes.

15,540. To a beerhouse there?—Yes, and we met those other men.

15,541. How many men went in together?—I dare say about five.

15,542. Did you know the other four?—I knew every one of them that was in the house.

15,543. Did you know the other men who went into the beerhouse with you?—Yes.

15,544. Can you tell me the names of those four men who went into the beerhouse with you?—Riley was one.

15,545. Was Kelly another?—Kelly was another.

15,546. Was Toolin another?—Toolin was another.

15,547. There is only one more?—I cannot think of the other man's name.

THIRTEENTH DAY.

D. Callaghan.

19 Sept. 1867.

15,548. Do you know the name of the public-house?—I know the man's name that keeps it.

15,549. What is it?—Johnny McCaul.

15,550. Were there any people in the room besides you?—There was a man and his wife at the time we went in; it was in the kitchen we sat.

15,551. How long was it before they began this assault upon you?—Well, we played cards for two quarts of ale, and after that they started.

15,552. What did they do; where were you seized first?—The landlord and me had not been good friends because I did not go there two years before then, and this was the start of it. He and I started arguing, so I got up to go out because I judged something was going wrong, and as soon as I stood upon the floor I was struck with a quart jug on the head by Kelly, just here (*describing the same*).

15,553. Did that knock you down?—No, that did not.

15,554. Upon that what else was done?—He struck me a bit higher up with a glass.

15,555. Who did that?—The same man.

15,556. Did it break the glass?—Yes.

15,557. Did that cause blood to come?—Yes, it did, it covered me all over with blood.

15,558. What was the next thing which happened?—It knocked me down on the floor.

15,559. That blow knocked you down?—That glass knocked me down.

15,560. You being on the floor what happened when you were on the floor?—Well, I got hold of Kelly by the leg as quick as I could because I was doubtful of his kicking my face and I stuck to him until they nearly broke my fingers to get them loose.

15,561. Did they seize your fingers?—They seized my fingers and bent them back to get them loose from Kelly's legs and during that time I could not tell who they were that were kicking me, because they were kicking me everywhere.

15,562. Were you kicked on the head?—Yes; you can see the mark from there right into my eye (*pointing out the same.*) They kicked my teeth out of my mouth.

15,563. And they were all at you in this way?—Yes, they were.

15,564. And did they beat you with any stick, or was it simply kicking?—Kicking. They struck me with nothing only the gill glass and the jug.

15,565. Then did you manage to get up after a bit?—The landlord of the house and his wife went out altogether from the house and left them and me to it. My wife came in and I was sitting on the floor and I do not know which way I got up.

15,566. Had they gone?—They had gone everyone.

15,567. Then I suppose your wife took you home?—Yes, my wife and another man took me home. That was Riley, the man that I went with from Deansgate.

15,568. Did you suffer a great deal of pain?—I did suffer a great deal of pain. I was about a month off my work, and when I came to work I could not stop; when I did stop I would be ready to fall upon my face.

15,569. Did you lay any information against them?—I did, I got warrants for them for that lot.

15,570. Then before Kelly could be apprehended I understood you to say that he was taken off to America?—Yes, he was.

15,571. So that he was never apprehended?—No, he was not.

15,572. Toolin you say went away?—Yes.

15,573. And you have never seen him until very lately?—I have never seen him until very lately.

15,574. Did you ever do anything against Riley?—No, he and his brother came to the house at different times to make a settlement with me and I told him that I wanted to do nothing against him any further than this, that I settle with him till the case was heard because I said it might be a bit of a hindrance in the other men's cases if I settled with him.

15,575. Are you sure that Riley had been one of those who kicked you?—I am confident sure that Riley kicked me as well as the others.

15,576. Did you then, having come to no settlement with him, take out a warrant against him?—I got one warrant for the three.

15,577. Then you could not serve it upon Kelly because he made off, as also did Toolin; but was the warrant served on Riley, and was he apprehended?—No.

15,578. What became of him?—When I would not settle with him, Riley went and got an attorney, and and he was there on the court day; he gave himself up; he was not apprehended.

15,579. Being in court, and having given himself up, what became of him?—As I told you, I told the magistrate I did not want to hurt Riley at all, because his family were very young, and he had nobody to give any assistance except himself, and by that means I expect they let him off.

15,580. How many children had Riley?—I cannot say.

15,581. But he had a young family?—He had a young family.

15,582. Then there is no other reason that you know of for their having made this violent assault upon you, except that you were a non-union man?—There was no other reason in the world, except that I came to work at the gaol.

The witness withdrew.

Mr. G. H. Carr.

Mr. George Henry Carr sworn and examined.

15,583. (*Chairman.*) Are you a railway clerk?—No.

15,584. What are you now?—At the present moment I am out of a situation.

15,585. Have you been a railway clerk?—I have.

15,586. Where were you last?—I was last with the Detroit and Milwaukie Railway Company, in the United States of America.

15,587. How long is it since you came back from America?—I left there on the 6th of April.

15,588. Have you been a railway clerk in this country?—Yes.

15,589. With what railway?—I have been with the Lancashire and Yorkshire, I have been with the Great Western, and I have been with the Manchester South Junction and Altrincham Railway.

15,590. Do you remember, in May 1864, seeing an assault committed?—I cannot tell you as to the dates, but I recollect seeing an assault committed in Strangeways.

15,591. Do you remember who committed it; was Nolan one?—Yes.

15,592. And was Toolin another?—He was another.

15,593. Were there others committing an assault? There were others there.

15,594. Do you remember upon whom the assault was committed?—Of course I heard the name afterwards; I did not know the man at the time; his name was Wilfred.

15,595. Were they Wilfred, Ashton, and Ratcliffe?—I cannot say who the three men were, but I saw one man attacked.

15,596. But can you say whether three men were assaulted?—I cannot.

15,597. Was there more than one assaulted?—I cannot say, because my attention was taken by the man who was worst hurt. I saw the parties attack this Wilfred; I was on the opposite side of the street.

15,598. Where was it that the assault took place?—It was opposite what was Birch's beerhouse at that time.

15,599. In what street?—In this street here—in Great Ducie Street you may call it. It was close to the railway arch.

15,600. Then you saw Nolan and Daly and some others attack somebody else?—Yes.

15,601. And this man whom they attacked was a man named Wilfred?—Yes, I found out that afterwards.

15,602. Did you notice whether there was more than one man attacked or not?—I did not.

15,603. What did you see them do to Wilfred?—I saw them strike him. One man pulled out a sort of life-preserver, as I thought, out of his pocket and struck Wilfred on the head with it.

15,604. Was it a wooden thing with a knob at the end?—No, it was just in the form of a life-preserver.

15,605. Do you remember which of those men whose names you have mentioned pulled it out?—Well, I believe it was Nolan.

15,606. And he struck Wilfred on the head?—Yes.

15,607. What was the effect of the blow—did it knock him down?—Yes, it knocked him down.

15,608. Did you see anything else done to Wilfred at the time?—I saw him kicked and abused by several parties whom I could not recognize.

15,609. You saw him kicked and abused by several parties?—Yes.

15,610. Was this in the evening?—This was in the evening. I had finished my work at night.

15,610*a*. Was it dark?—No, I should think it would be about a quarter past six, or something like that. I was going down smoking my pipe after I had had my tea.

15,611. You saw several persons kicking him on the ground?—Yes, they came out of the small street there previous to coming to the railway arch, and they seemed to attack him just at the point where this public-house is, and they seemed to spring upon him there. I was walking down on the other side of the street, the fishmarket side of the street, and of course, naturally seeing the man abused by a great many I rushed as I thought to his rescue, and got knocked down. I caught hold of one man.

15,612. Did you get knocked down?—Yes.

15,613. With a stick?—No, it was a sort of trip. I caught hold of one of the men that had got hold of Wilfred at the time, as I thought, to apprehend him, and he tripped me in some way and got away.

15,614. You do not know the name of the man that you got hold of?—No, I have not the slightest idea of who he was.

15,615. Did they get away then?—Yes.

15,616. I believe you were examined before the magistrates, were you not?—Yes, I was examined in the first place before, I did not know who it was, it was at the Salford New Bailey.

15,617. And I believe at that time you were able to swear to Nolan?—Yes I was.

15,618. Could you swear to Daly too?—No.

15,619. Was he in custody at that time?—Yes, but I swore to Nolan and not to Daly.

15,620. After you had given that evidence before the magistrate were you dogged about by anybody?—I was.

15,621. By whom?—I cannot tell you, but I fancied there were certain parties watching me. I never could go out at night, and I did not consider myself safe. Whether it was imagination or not I cannot say, but that was my impression, because Nolan being as one might term it the head centre of the bricklayers.

15,622. He was one of the delegates, I believe?—I do not know what position he had, but I found out afterwards that he was as we may take it the head centre of the body and the union of bricklayers, so that I felt frightened of going out, and I thought I might have imagined it. Of course when I was walking along the road I turned round and I saw some one dogging me, though I might think they were doing so when they were not.

15,623. But you did think so?—I did.

15,624. How long did you consider this went on?—I considered it went on as I imagined until the time that I went to sign my depositions.

15,625. But how long was that?—I cannot say; I suppose it was about seven days from the first time that I went down to the court in Salford.

15,626. After that did you receive some information that you were to meet some one at the station?—I did.

15,627. Some friend, I believe, told you to meet two men in Strangeways?—Not a friend of mine; it was a friend of my brother. I had told my brother; my brother was then a railway clerk as he is now, and this was a friend of my brother. He is only a young man, and you must imagine, I being 10 or 11 years older, did not, as it were, recognize him. I spoke to him, and all that sort of thing, but he was not a companion of mine.

15,628. You mean this friend of your brother's?—Yes; my brother is about 10 years younger than I am.

15,629. What is his name?—His name is William Greenwood.

15,630. Did he tell you to meet two men in Strangeways?—He told me to meet two men in Strangeways.

15,631. Where is Strangeways?—That is Strangeways there in front of the assize courts.

15,632. When were you to meet them?—I was to meet them in the evening.

15,633. At what place?—At the shop just before you get to the "Ducie Arms."

15,634. What sort of a shop was it?—Well, it is a newspaper shop. Prince is the name of the man that keeps it now.

15,635. Did you go at the time appointed to meet them?—I did.

15,636. About what was the time appointed to meet them?—Just as you say; it was about——

15,637. But about what?—To the best of my recollection, I cannot tell exactly, but it might be between seven and eight, or somewhere about that time.

15,638. Did you meet two men there?—Of course I did.

15,639. Do you know who the men were?—I did not know them by name, because I had never met the men before.

15,640. But you might have learned the men's names afterwards as you did Wilfred's?—I did not.

15,641. You do not know their names now?—I do not. I believe one of the names was Ken, or some such name.

15,642. Some name like Ken or Kelly?—Yes; as I said the other day.

15,643. Never mind that; what passed between you and these two men?—In the first place we went in, and I believe it was the "Ducie Arms," that was adjacent in fact, the next place; we went in there and they put before me the true case about this man being assaulted. Of course, I being a non-union man, I did not understand at all about the union. They put it before me and told me to swerve in my evidence if I possibly could.

15,644. What did they put before you; did they say anything about the unionists doing you an injury if you did not?—No, not at all, they just put the facts of the matter before me.

15,645. What were the facts of the matter which they put before you?—I will tell you the facts that they put before me. The facts that they put before me were these: "This man Wilfred that had been "assaulted, we have tried to entice away from the "gaol, and we gave him 2*l.* to go away from the gaol, "and not work there, and he in spite of our teeth "after receiving the 2*l.*, goes and works there again. "We go there again and offer him more money, of an "amount I cannot tell you, and he goes there and "works again." Well, then, as a final affair they go in and offer him, I do not know the amount. They say, "We will pay your railway fare to Leamington "or anywhere you like to go to, and give you a card

THIRTEENTH DAY.

Mr. G. H. Carr.

19 Sept. 1867.

"so that you can go and commence work, if you will "only leave this job." He agreed to those terms and received the money, and then went and started at work here. They told me that that was the reason that they had assaulted him, or at least that he had been assaulted; of course not that they had assaulted him.

15,646. And then?—And then what?

15,647. What did they propose that you should do. You said just now that they proposed that you should swerve in your evidence?—Yes.

15,648. Did they propose that?—Well, one of them said that I ought to swerve in my evidence on that account.

15,649. Did you agree with them to swerve in your evidence?—I did not.

15,650. What did you say in answer to that proposition?—Well, the answer I gave them was that I wished I was out of the mess.

15,651. But did you say nothing at all as to whether you would or would not comply with their request?—I did not.

15,652. Did they say that they were afraid that some of the union men might do you an injury if you came forward and gave evidence?—No.

15,653. Nothing of the sort?—Nothing of the sort, there was no intimidation used to me at all.

15,654. But was there persuasion?—Most decidedly there was persuasion.

15,655. To do what?—For me to swerve in my evidence.

15,656. Did it persuade you?—No, it did not.

15,657. Did you say what you would do in any way whatever?—I did not say what I would do at all, though I felt in my own mind afterwards. This was after the first time that I had been up before the magistrates, this case that you mentioned about my meeting those two men there. I think I was up there four times; three times before I signed my depositions.

15,658. This took place before you signed your depositions?—Yes, of course that took place before I signed my depositions. But then I was up there four days, three days before I signed my depositions, and this took place before then.

15,659. What did you agree to do?—I did not agree to do anything at all.

15,660. Did you leave them under the impression that you were going to say the same thing as you said before, or that there was to be any difference?—The time that you mentioned just now when I went into the "Ducie Arms" and had a glass of something to drink, I did not leave them with any impression that I was going to swerve at all in my evidence.

15,661. Having finished that, tell me what day did you afterwards go to sign your deposition?—Well, I cannot tell you the day.

15,662. Did you after this go to sign your deposition?—Most decidedly. I went two days after the first meeting with those two men.

15,663. Did you go with your father?—I did. I went on the day that I had to sign my deposition.

15,664. As you were going with your father did you meet one of those men that you had met before, Ken or Kelly, or whatever his name was?—Yes.

15,665. And anybody else with him?—Well, I forget. I think there was some one with him, but I cannot say positively.

15,666. Did you go with him into any public-house?—I did.

15,667. And your father too?—Yes.

15,668. What public-house was it?—Well, I cannot tell you the name of it.

15,669. Where was it?—I can tell you where it was.

15,670. Where was it?—It was in Salford, right opposite the end of New Bailey Street; I believe it is the "Blue Bull" or the "Brown Bull," or something of that sort.

15,671. Did either of the men give your father any money; I believe they did.

15,672. How much?—10*l.*

15,673. Did he give you any out of it?—He did not give me a farthing.

15,674. Did you receive any money at all out of it?—I did not receive any money myself. I did not get any money myself, but of course it was tantamount to getting it myself.

15,675. After your father had got this 10*l.* did you go into court?—I did.

15,676. Were you sworn to give evidence?—I was sworn to give evidence.

15,677. Then in your evidence I believe you would not swear that Nolan was the man?—I would not swear that Nolan was the man. I said (as you will be able to tell if you have the depositions) that I believed he was the man, but I would not swear to him.

15,678. Although before you had sworn to him?—I had.

The witness withdrew.

W. Mills.

WILLIAM MILLS sworn and examined.

15,679. (*Mr. Barstow.*) You are a joiner, are you not?—Yes.

15,680. Are you a member of any union?—No.

15,681. In 1864 you were working as a joiner at these assize courts?—Yes.

15,682. Did you come here in consequence of the strike among the joiners who were previously employed?—No, I was working at Nottingham at the time, and saw an advertisement in the papers of men wanted in Manchester. I came here and engaged for six weeks. I got there in June 1864; on the Sunday I went out to get a glass of beer ——

15,683. You got there in June 1864?—Yes.

15,684. Were you employed on that day?—I was employed before I came here. I was engaged to come here.

15,685. Had you been at work in June 1864?—Yes.

15,686. How long had you been at work that day?—Before I came here I had been at work.

15,687. Had you been at work doing joiner's work at these assize courts before the day you speak of in June 1864?—No, not a minute.

15,688. How long had you been in the town?—As near as I can judge, about a fortnight.

15,689. Were you a fortnight in Manchester without doing any work here?—No, I was working at these courts.

15,690. You do not understand me; what time did you come to Manchester?—In the beginning of June.

15,691. Do you know now that there had been a strike with the joiners previous to your being engaged at the work here?—Yes, I know now. I did not know then.

15,692. Do you know a man named Elijah Stanton?—Yes.

15,693. How long have you known him?—Close on 15 years.

15,694. Of what trade is he?—A joiner.

15,695. Is he a Nottingham man?—Yes.

15,696. Do you know whether he is a member of any union?—I do not know.

15,697. Did he ask you some day in June to go and see his brother?—Yes.

15,698. Was his brother an old acquaintance of yours?—I worked with him.

15,699. Is he a member of the union?—Yes.

15,700. Is he a member of the joiners' union?—Yes.

15,701. Did you go with him?—Yes, I went with Elijah to see his brother.

15,702. Where did you go?—To Nightingale

Street. I went with the intention of going to his brother's house, but he was not at home, he was at a beerhouse opposite.

15,703. Do you know the sign of the beerhouse?—The "Bull's Head Inn," Nightingale Street.

15,704. Did you see John Stanton there?—Yes.

15,705. What happened?—I asked him how he was; he was talking to some parties that were in with a dog and I offered my hand to shake hands with him. He says, "Stay a minute Will, sit you down." I sat down close beside of him, and when he had been talking to these men about the dog, he says, "Where are you working?" I says, "At the assize courts." He made use of these expressions. He said, "Do you mean to come out you b——r." I said, "No, I do not; I am engaged for six weeks, and six weeks I will stop." He then struck me close to the eye and broke the bridge of my nose, and he struck me in the other eye. I had two black eyes and my nose was cut.

15,706. Did he do anything else but strike you twice?—No, nothing else; as soon as he had done it he made his way out into the kitchen; a man asked me to go in the kitchen and wash my eye. I said, "No, I will go out the same way as I came in."

15,707. And you laid information against him?—Yes, for which he suffered a month.

The witness withdrew.

George Burton sworn and examined.

15,708. (*Chairman.*) Are you a member of the bricklayers' union?—Yes.

15,709. How long have you been so?—About 20 years.

15,710. I believe you were once president, were you not?—Yes.

15,711. Have you been president more than once?—Only once, that is, during one time.

15,712. When was that?—Six months ago my term of office expired.

15,713. How long had you been president?—Nine months.

15,714. Do you remember who was secretary at that time?—William Brown.

15,715. You remember the strike at the gaol?—Yes.

15,716. Were you president at the time?—I was not president, but I was present at the meetings.

15,717. Your meetings took place every fortnight?—Once a week, every Monday evening.

15,718. Was there a committee?—Yes.

15,719. Do you remember the strike?—Yes.

15,720. Do you remember a resolution being passed by your society to make an alliance with the joiners' and the brickmakers' unions?—No, I know of no alliance, not distinctly an alliance.

15,721. Was there some co-operation between you?—Yes; a certain amount of co-operation between the joiners' and the brickmakers' unions, but it was not at the same time.

15,722. When was that?—It would be something like eight months after the strike took place in the gaol.

15,723. The strike took place in the gaol in 1864?—Yes.

15,724. And this resolution for co-operation was about eight months afterwards?—Yes, towards the latter end of the year.

15,725. Was the nature of the co-operation or agreement this, that you should all support each others' interest?—Yes.

15,726. That if one union was offended the other should draw off their men, and so act together?—Yes, that if they requested our assistance we should give it them.

15,727. In that way, by drawing off the men?—Yes.

15,728. So that you would act jointly altogether?—Yes, to a certain extent.

15,729. We have been told that your delegate was a man of the name of Lester?—Yes.

15,730. And Kay was the delegate of the brickmakers?—Yes.

15,731. Was a man named Guy the delegate of the joiners?—Yes.

15,732. It was a near question whether there should be this union between you all?—No.

15,733. I thought you carried it by your casting vote?—That is simply a meeting that took place with respect to machine-made bricks.

15,734. When was that?—I think it was in November, at the Ebenezer schoolrooms. There had been a resolution passed previous to that in the Assembly Rooms, Free Trade Hall, that we would not use any machine-made bricks on account of the struggle we had while on the gaol.

15,735. You came to a resolution not to use machine-made bricks, and you would not work for any one who did?—Yes.

15,736. That was the resolution which was carried by your casting vote?—Yes, it was the second time. The first time it was unanimous that we should not use the machine-made bricks under any circumstances on account of the opposition we had met with here; we had given the machine an unrestricted sale for five or six years, and we found that the machines were a complete failure up to that time. In fact this dry machine, which has supplied the fronts for this gaol was a failure; the gaol was never intended to be faced with these Platt's machine bricks. I am speaking now as a practical bricklayer. The machines that had been out previously had made common bricks; they were an inferior article. The common bricks made by all the machines, with the exception of this dry or Platt's machine, were failures. It is a complicated piece of machinery, and makes bricks with dry material instead of moisture.

15,737. I think you said that the machine-made bricks were a failure?—An inferior article.

15,738. You mean that they are inferior to the hand-made bricks?—Yes, inferior to the hand-made bricks of the same class. The magistrates had the machine in the gaol to utilize the clay on the interior fence; they would have utilized this clay only the bricks were so inferior that they could not put them to the face; they are not put to the face, they are put at the interior of the walls.

15,739. With what did they face?—Platt's dry machine bricks.

15,740. That you say is an exception; all the other machine-made bricks are a failure?—Yes.

15,741. What was this resolution which you carried by a casting vote?—It was the second trial of what had been passed at the Free Trade Hall. It was passed at a previous meeting by a great majority that we should not use any machine-made bricks. This second meeting was a meeting convened through our own president, he convened a meeting for the purpose of re-trying the case. We considered that he had been tampered with in the meantime, because he was of a contrary opinion at the other meeting, and in that meeting he was entirely for them. As the chairman of that meeting, I saw the difficulty. There was a file of columns down the room and I divided the voters down these columns. I put one party one side and the other party on the other, and I appointed people to count the votes and they were counted and were found to be equal, and I gave my vote against the machine-made bricks conscientiously.

15,742. That was the way it was carried?—Yes.

15,743. Having established this sort of united action, what happened; did you attempt to prevent the supply of any bricks to anybody in consequence of this resolution?—No.

15,744. Do you know Mr. Marsden, of Bolton?—Yes.

15,745. Did he supply bricks to the assize courts?—Yes.

THIRTEENTH DAY.

G. Burton.

19 Sept. 1867.

15,746. Did a deputation wait upon him?—James Power and George Lees.

15,747. Was Moody one?—No, James Power and George Lees were the two parties, I believe.

15,748. Did you arrange the terms and resolve that if they were not agreed to you would strike?—No; it was previous to the passing of this resolution respecting machine-made bricks; it was to this effect, that if Mr. Marsden stood with us we were prepared to use the machine-made bricks unrestricted, and if he went against us our body would take measures in the case. It did not throw out any intimidation, but they requested to know whether he was prepared to go with us or against us. There was an unrestricted sale at the time. We had passed no resolution against machine-made bricks, and they were getting hard up for bricks for the gaol. There was a machine in Cheetwood of Mr. Atkins, of the same description as the one working on the ground. They could not make the bricks, they were of an inferior quality, and they could not be used, and they went to Mr. Marsden to get bricks; but previous to them going we had in the meantime requested Mr. Marsden to know whether he was going with us or against us, or would he stand neutral in the affair till we had settled with Mr. Bramall.

15,749. What do you mean by going against you?—Not to supply them with material for the gaol until we had the dispute settled, and Mr. Marsden promised to stand neutral in the affair till it was settled.

15,750. And not to supply them?—And not supply them; the moment they asked Mr. Marsden to supply them he supplied them without saying anything to anybody.

15,751. He supplied them without your permission? There was no permission required in the matter.

15,752. Upon his supplying them what did you do?—A meeting was formed and a resolution adopted not to use machine-made bricks.

15,753. Upon that what did you do with Mr. Marsden who went against you?—We did nothing to him.

15,754. But you sent delegates?—I do not know whether they sent a deputation up.

15,755. You did not do anything to him?—No.

15,756. You did not do anything in any way to prevent his supplying them?—No.

15,757. When you were president, were there minute books kept in your society?—Yes.

15,758. Who kept the cash-books?—The cash-books were kept by the treasurer.

15,759. And there was also a book for the contributions?—Yes, a rough book which was kept by the secretary.

15,760. Who had the right of paying money, the treasurer?—Yes, the treasurer.

15,761. Your minute-book, I suppose would have contained also the strike and all the resolutions which you passed, would it not?—Yes, the minute-book at the time, but I was not then president.

15,762. Did you ever destroy any books?—No, I had nothing to do with the books during the strike.

15,763. Were you present when any books were destroyed?—No.

15,764. Just remember?—I was never present when any were destroyed.

15,765. Did you ever hear of them being destroyed?—No, never.

15,766. Do you mean to say that as far as you believe none of the books have been destroyed?—I have no doubt that many books have been destroyed, but they were considered books of no value; there might be books going on for years.

15,767. Have you ever heard of any books being destroyed lately?—No.

15,768. Do you know a man named Hylatt?—Yes.

15,769. He is president now, is he not?—Yes.

15,770. Did you ever claim any money for having destroyed those books or any books?—No.

15,771. Will you swear that?—Yes.

15,772. Have you never upon any occasion claimed any money for having destroyed books?—Yes.

15,773. I mean books belonging to your society?—I know that I have never upon any occasion received any money.

15,774. I did not ask you that; I did not ask whether you had received any money; I asked whether you had claimed any money.—No.

15,775. Have you ever claimed any money for anything that you did not get?—Yes.

15,776. Did you ever claim any money for anything connected with the books?—I made a certain claim for some money for making entries in a book, but not for destroying any book.

15,777. When did you make that claim?—Perhaps it might be seven weeks ago.

15,778. Where did you make the claim?—At the committee.

15,779. Who were on the committee at the time that you made the claim?—There were four on the committee, the secretary, the treasurer, the president, and the vice-president.

15,780. Was Hylatt one?—Yes.

15,781. And the treasurer?—Yes.

15,782. Who is he?—Joseph Stein.

15,783. Who was the secretary?—William Brown.

15,784. How many more were there?—The vice-president was Thomas White.

15,785. You made a claim?—Yes.

15,786. How much did you claim?—I claimed 22*s*.

15,787. What was the claim for?—For re-entering the minutes.

15,788. How came you to re-enter the minutes?—I was requested by the officers of the society to re-enter them for the time that I had been in office, and I re-entered them.

15,789. Do you mean to say that they had been entered before?—Yes, in a rough state.

15,790. In what book had they been originally entered?—In the old minute book.

15,791. Does that exist now?—Yes, for anything I am aware of.

15,792. Where is that?—In the possession of our president who followed me.

15,793. Who followed you?—Henry Davies.

15,794. You had entered it in an old minute book, and that old minute book you handed over?—Yes.

15,795. Was that the book which you had when you were president?—Yes.

15,796. And was it as president that you made those entries?—Yes.

15,797. And about seven weeks ago you were requested to re-enter it?—It might be a little more than that; it was the time that I made the claim.

15,798. That is about the time; seven, eight, or nine weeks ago?—Yes.

15,799. Were you requested to re-enter it in another book?—Yes.

15,800. By whom were you requested to do so?—By Henry Davies.

15,801. Is he in office now?—He is the president who followed me; he is not in office now.

15,802. Was he president at the time when he made that request to you?—I believe he was just at the expiration of his office.

15,803. Did you make the entry in another book?—Yes.

15,804. How came you to make a re-entry in another book; it had already been entered in one book?—I was requested so to do; to re-enter the minutes that I had made in the book.

15,805. Why?—The simple reason he gave was that they wished to present a clean book for 12 months. His three months and my nine months were 12 months.

15,806. Your nine months were in 1864?—No; mine were in 1866, and up to March 1867.

15,807. Did the old book in which you had entered contain entries of 1866?—Yes; no further than 1866, I think.

15,808. Were the old entries which you now had to re-enter entries in reference to the year 1866?—Six months of 1866, and three months of 1867.

15,809. You had already made entries of the six

months of 1866 and the three months in 1867, in the old book ?—Yes.

15,810. And Davies requested you to make the entries again in the new book ?—Yes.

15,811. The same entries ?—Yes.

15,812. How many ?—Nine months' entries.

15,813. What sort of entries were they ; what were they about ?—Just rough minutes of the proceedings of the Monday evening meetings.

15,814. Was not the old book gone, and was not it stated that it was gone before you were asked to make the entries in the new book ?—I positively state that I copied from the old book.

15,815. What has become of it ?—Henry Davies has it in his possession yet.

15,816. At this moment ?—Yes.

15,817. Do you mean that the 22*s.* which you claimed were for having made the entries in a new book ?—Yes.

15,818. From entries already made ?—Yes.

15,819. And you claimed 22*s.* for it ?—Yes.

15,820. Can you give me any reason why these old entries should be re-entered in a new book ?—I cannot swear to the entry of the minutes.

15,821. You just said something about the delegates ?—It was relative to the delegates' business in summoning men up, and the general routine of their business.

15,822. Do I understand you to say that the new minutes which you made were not all that the old book contained ?—Not the whole.

15,823. You have left out in point of fact, some of the old entries in the new book ?—Yes.

15,824. And made, as it were, a fresh lot of entries ?—Just so.

15,825. How came you to leave out the old entries ; did they relate to these proceedings that you did not wish to be seen ?—Nothing relative to the gaol was in the book at all.

15,826. I do not ask you that ; some of the old entries related to things which you did not wish to be seen ?—Yes ; I suppose that was the reason.

15,827. So you made, as it were, a fresh book, these fresh entries containing omissions of certain other entries which you did not wish to be seen ; that is it, is it not ?—Yes, of course there were certain omissions made.

15,828. And you made the new book all right and clean to be seen ?—There is nothing that was obnoxious in the other one. I was averse to this being altered, but he said it was simple to clear up the 12 months.

15,829. Did he give you directions as to what you were to omit, or was it your own instinct that told you ?—No.

15,830. You say that there were some omitted, who gave you the suggestion as to what you were to omit ?—No one.

15,831. You understood what they wanted ?—Yes.

15,832. And you made certain omissions ?—Yes.

15,833. And for that you claimed 22*s.* ?—Yes, decidedly.

15,834. Did Davies help you ?—No.

15,835. Did he claim any money at the same time ?—I cannot say ; I never heard him claim any.

15,836. Are the books always kept in the box ?—Usually there is a box for the purpose.

15,837. At the place where you meet ?—During the time a man remains in office he has possession of the book.

15,838. Does he keep it in his pocket ?—He carries it about because he takes it home with him.

15,839. When the book is old what is done with it ; is it destroyed ?—They are sometimes deposited in the box and sometimes not. I cannot say where all the books have been deposited, because I have not been in office all the time.

15,840. When the book is full, and the man in office does not want it, is there a place of custody for it ?—There is a box for the purpose.

15,841. Where is the box ?—In the club-house.

15,842. Where is that ?—At the "Bridgewater Arms," Liverpool Road.

15,843. Have you many ?—I cannot say, there are two or three full boxes ; I cannot say what is in them. I have never seen the interior of them.

15,844. Supposing a book is not destroyed, and is no longer in actual use by the officer, it ought to be kept in a proper place like that, in custody ?—Yes, it is usual to put them there.

15,845. Who has the custody of that box ?—It is the vice-president who should have the keys of the boxes.

15,846. Who is the present vice-president ?—Thomas White.

15,847. He ought to have the keys of all those boxes ?—Yes.

15,848. Do you think the old book exists ?—I understand that it does exist intact.

15,849. And in the box or in somebody's possession ?—It is in the possession of a man now attending here in this court as a witness.

15,850. What is the name of the man ?—Henry Davies, the man that had possession of it when I gave up the office.

15,851. Then it is not of much use if that is the case, your having made a book with the new entries ?—I was not aware that it was going to be destroyed.

15,852. It was not to be kept ?—I was not aware that it was going to be destroyed.

15,853. It was not of much use having made a book with the clean entries if you kept the old one ?—Decidedly not.

15,854. Did you get that 22*s.* ?—No.

The witness withdrew.

Mr. Samuel Whitehead sworn and examined.

Mr. S. Whitehead.

15,855. (*Mr. Chance.*) You are a contractor at Cheetwood Lane, are you not ?—Yes.

15,856. Do you remember in June of this year making streets for Lord Derby ?—Yes.

15,857. Did you require some earth to fill them up ?—To fill up a hole in Derby Street.

15,858. Did you make a contract with a person of the name of Booth to take away material from the site of the new gaol ?—Yes.

15,859. Had you a tramway fixed so as to be able to do that more easily ?—Yes.

15,860. Do you know a man of the name of Robert Chadwick ?—I do not know him except from seeing him come to me on the 28th of June.

15,861. Had you ever seen him before ?—No.

15,862. Was he a member of the brickmaker's union ?—He is a member of the brickmaker's union—the keyholder for the district.

15,863. When he came to you did he say anything to you ?—Yes, Mr. Higgins and me were standing together ; he is my partner, and Chadwick said, "Mr. Higgins, do you know what you are doing ?" He said, "Why, what do you mean ?" He said, "You are removing this earth from the gaol, I understand." Mr. Higgins said, "What of that ?" He said, "It is "against our rules to allow anything to be done at the "gaol that has anything to do with us." Mr. Higgins being a brickmaker knew what the consequences would be.

15,864. What was the consequence ?—They would stop his jobs. Chadwick came to us at half-past 11 on the Friday, and he said these words to Mr. Higgins and me, and Mr. Higgins said, "If you think we are doing something wrong you had better call a meeting." He said, "Very well we will have a meeting at 1 o'clock on the same day." So they wished me to go to the meeting and I went, and I should think there would be about 200 brickmakers at the meeting.

THIRTEENTH DAY.

Mr. S. Whitehead.

19 Sept. 1867.

15,865. Brickmakers or bricklayers?—Brickmakers.

15,866. Where was the meeting held?—In Cheetwood Lane, in the croft; they held their meetings in the field somewhere about the centre of the district, and there would be about 200 members present. So Robert Chadwick laid the case down, and he said he heard that we were wheeling stuff out of the gaol, and he found it so. He said that he spoke to Higgins and me, and Higgins said if he thought he was doing wrong he was to call a meeting, and he did so; and they wished me to withdraw and they would discuss the matter, and they said they had come to the conclusion that we were to stop at once. I said, "It is "very near Saturday, you will let us go the week out; "it is very hard for Booth's men to be thrown out in "the middle of the afternoon." He said I must withdraw again and they would talk the matter over. I had to withdraw and when I came back they said we must stop at once. I then went to a different part of the works. I did not get down into Sherborne Street till between 3 and 4 o'clock, and when I went down the wagons were not stopped. I had not been back to the westward, and I had not been many minutes before John Kay and George Yates came. Kay said, "Mr. Whitehead, I understand you agree to stop the wagons." I said, "We are going to, I am only just come back, and they said they were to be stopped at once." He said, "The order was to stop at once," and I said yes, that I had only just come back. I said, "You can let us go on to-night?" He said, "I cannot "stop you; you can do as you like, but I tell you if "you go on with the work we shall withdraw the "men from Higgins's job at once." I called Higgins off the stage and told him what the men said, "Very well" he said, "we had better stop the men," and we had to stop the men at 10 minutes to 4 o'clock.

15,867. You stopped for fear of what they would have done to you?—Yes, they would have stopped Mr. Higgins's jobs; he had something like eight jobs of brickmaking.

15,868. It would be a considerable and permanent loss to him?—Yes.

15,869. What amount of loss?—His contract was for 8*d.* a yard taking it up. They filled it into wagons and we had an engine and tramway fixed, and we had occasion to keep the tramway in the street for a fortnight to take the surplus earth from the sewer; we could work this and take 200 of their wagons up as well.

15,870. And how long did you stand idle?—We never did any more with the gaol; we went on with our own contract, but we had to keep that wagon road in.

15,871. What loss did you suffer in consequence?—I could clear 5*d.* a wagon; the loss would be about 45*l.* I could have got it out very well in a fortnight and done all our work at the same time.

15,872. The only reason was because of the strike in the gaol?—Yes, they stopped us because they said they would not allow any one to interfere with their work.

15,873. There was no dispute at all?—No, there was no dispute whatever, but they told us what the consequence would be, and we wanted 200,000 bricks to build the sewer, and I knew they would not let me have them if I went on; they would stop all Mr. Higgins's jobs.

The witness withdrew.

H. Davies.

HENRY DAVIES sworn and examined.

15,874. (*Chairman.*) What are you now?—A bricklayer.

15,875. Are you a member of the bricklayers' union?—Yes.

15,876. How long have you been so?—17 years or thereabouts.

15,877. Are you in any office now?—Yes.

15,878. What are you now?—A committee man.

15,879. How many committee men are there?—Four, exclusive of the president, secretary, and treasurer.

15,880. There are four besides those three; that makes seven altogether?—Yes.

15,881. There are how many committee men; you are not president, secretary, or treasurer now?—No, but I have been.

15,882. Have you ever been president?—Yes.

15,883. Did you succeed Burton as president?—I did.

15,884. When was that?—In April 1867.

15,885. This year?—Yes.

15,886. What is to be your term of office?—Three months.

15,887. Had you ever been president before?—Many a time.

15,888. Were you president in 1864 or 1865?—No, I was not.

15,889. What was the last time you were president before this year?—Previous to 1867 the last time was 1863.

15,890. Has the president the custody of the books?—Yes.

15,891. Which of the books?—The minute book.

15,892. Who makes the entries in them?—The president.

15,893. He makes the record of the proceedings?—Yes, for the evening.

15,894. Does he make any entries in any other books?—Decidedly not.

15,895. Does he keep them?—He keeps them in his custody while he is in office.

15,896. After he ceases to be in office he puts them in a place of deposit?—He gives them to his successor.

15,897. If the book is full, where is it put?—In the fire; when they have done their duty they are committed to the flames.

15,898. You have not destroyed any books;—No.

15,899. But you say when the books have done their duty they are committed to the flames?—I have heard so.

15,900. You have not burnt any yourself?—No.

15,901. When did you hear of any being destroyed?—Not recently.

15,902. How long ago was that?—Four or five years since.

15,903. Four or five years since you heard of books being destroyed?—Yes, useless books.

15,904. That was because the book was useless?—Yes, only an encumbrance to the box.

15,905. You mean that the books were taken to get rid of the encumbrance?—That was the object, to get rid of the encumbrance.

15,906. Have you heard of that being generally done with a book when it was full?—Yes, invariably.

15,907. Have you often heard of it?—No; only on one occasion.

15,908. When was that?—In 1862 or 1863.

15,909. Were you present?—I was not present when they were burnt. I have asked for various books when I have been in office, and they were destroyed.

15,910. The answer was that they were destroyed?—Yes; they are done away with.

15,911. Various books have been destroyed?—Yes, such as minute books and old ledgers.

15,912. And cash-books?—I do not know where the cash books are.

15,913. Any old book which was an encumbrance or full was destroyed?—Yes; just like the president's book.

15,914. And the treasurer's book?—I cannot say.

15,915. Is the only book which you have heard of as having been destroyed a minute book?—Yes. I may state that the treasurer's book is his own private property.

15,916. How far do your present minute books go back if you destroy them when they are full?—I cannot say. I have some in my pocket.

15,917. All of them ?—All that were said to have been destroyed.

15,918. Having got them in your pocket, just let me see them ?—Here they are (*producing the same*), those that are said to have been destroyed.

15,919. How far back do they go ?—I cannot say ; I never looked at them.

15,920. Who has got the present minute book ?—The present president.

15,921. Who is he ?—John Hylatt.

15,922. The present president has got that ?—Yes.

15,923. Am I right in saying that the present book is a continuation of that book ?—Yes, and some of them we copied off for 12 months back.

15,924. Did you help to copy them ?—The three last months.

15,925. One of the witnesses, Burton, re-copied out the nine months ?—Yes, during his office.

15,926. And the three months for which you succeeded are also copied out ?—I cannot say ; there are only nine months in Burton's time and three in mine.

15,927. That was what I wanted ; nine were copied out again by Burton and three by you ?—I know I copied three.

15,928. Who asked you to copy them out again ?—It was suggested.

15,929. Who suggested it ?—Various committee men, not the present committee.

15,930. Can you give me any names of those who suggested it ?—I think, if I mistake not, I do not wish to keep anything back, I believe the present treasurer was one ; I believe Shaycross, the late committee-man, was one.

15,931. They suggested that you should make fresh entries ?—Yes.

15,932. Did you copy your three months altogether, or did you leave out some ?—I omitted some.

15,933. Why was it suggested that you should make new entries in a new book and leave out some of the old entries ?—The simple reason was, that when this inquiry was first spoken of, we were not aware but that there was something or other that might bring us into the clutches of the law. I am here to speak the truth ; there is nothing that I am ashamed of.

15,934. You cannot answer more straightforward than that. You made certain omissions ?—Yes, very slight ones.

15,935. You made certain omissions which you did not wish to be made public ?—Yes.

15,936. And you made a certain claim for the labour ?—I did not.

15,937. Burton says that he made a claim of 22*s.* ; you made none ?—I made none.

15,938. (*Mr. Barstow.*) I believe this book which you have given me is from October 1864 to the 24th of June inclusive ?—Yes, I think so ; it is there.

15,939. This is the original book ?—That is the original.

15,940. Of which a copy was made in the new book ?—Yes.

15,941. So that whatever there is of any sort which is questionable we shall find here ?—Yes, decidedly.

15,942. It would save us trouble if you would tell us what parts were omitted ?—I believe there is one omitted in my portion ; Mr. Stone's job, down the railway ; that is the only one of any note that I recollect of.

15,943. What is the date of that ?—I cannot say ; you will find the difference by comparing the present president's book and that.

15,944. I wish you could point out to us what is omitted ?—That one in particular ; and you will see from that and the one that the present officer has what I have really omitted. If I told you what is omitted I should perhaps be speaking an untruth.

15,945. (*Mr. Chance.*) You say that the treasurer's book is his own private property ?—Yes ; we always consider it as such. I will tell you why it is considered as his own private property. He is elected every six months ; and provided he should have to give up his situation as treasurer, he may be in the middle of his officership, and he has to turn over the money to a fresh one, and in any dispute that may arise hereafter, he would have nothing to refer to.

15,946. But the treasurer at the time being has the same book as the man that succeeded him ?—No ; he makes no entries but the incomings and outgoings.

15,947. Who is the treasurer ?—William Steyn.

The witness withdrew.

RICHARD COPPOCK sworn and examined.

R. Coppock.

15,948. (*Mr. Barstow.*) What are you ?—A bricklayer.

15,949. Are you a member of the bricklayers' union ?—Yes.

15,950. How long have you been a member ?—29 years.

15,951. Do you remember in 1864, an assault upon some bricklayers arising out of the strike at this building ?—Yes, I think I do.

15,952. Do you remember three men, named Wilfred, Ratcliffe, and Upton being assaulted ?—Yes.

15,953. Do you know what those three men were ?—Yes, I do.

15,954. What were they ?—Bricklayers.

15,955. They were bricklayers employed in this building ?—Yes.

15,956. I believe they were not union men ?—Yes, they were.

15,957. They were union men ?—Yes.

15,958. And had been union men ?—Yes, and they were then ; they had not run out of benefit.

15,959. They stayed in when the others went on strike ?—Yes.

15,960. That was their offence. We have heard who assulted them ; they were assaulted by Nolan and others. Do you remember information being laid against Nolan for the assault ?—Yes, I think I do.

15,961. Had you any conversation with Wilfred on the subject ?—No.

15,962. Did you see him about it at all ?—Not in the least ; after he was assaulted I never saw him for a time.

15,963. For how long ?—Perhaps a month, perhaps may be wrong a week.

15,964. Had you any conversation with him upon the subject of the assault when you saw him a month after ?—Yes.

15,965. Did you endeavour to induce him in any way not to proceed against Nolan ?—No.

15,966. You did not say anything upon the subject ?—No.

15,967. Did you at any time ?—No, never.

15,968. You never did anything whatever ?—I never saw him from the assault till the time I tell you.

15,969. Did you travel with him to London any time after the assault ?—No, never.

15,970. Did your hands give him any money ?—No, never.

15,971. You never gave him any money ?—No, not a farthing.

15,972. Are you quite sure that you did not take him away to London ?—As sure as I am that I kissed the book.

15,973. If we have heard that that is so our information is not true ?—I am positive it is not, if you have got that information.

15,974. Had you anything else to do with any other men that were assaulted ?—Yes, with Upton and Ratcliffe.

15,975. Had you any conversation with them about being assaulted by Nolan ?—No, I had not.

15,976. You had not any conversation at all ?—No.

THIRTEENTH DAY.

R. Coppock.

19 Sept. 1867.

15,977. You never spoke with them upon the subject?—No, I did not.

15,978. Did you take either of them away?—Yes, both of them.

15,979. Where did you take them?—To London.

15,980. You took Ratcliffe and Upton, but you did not take Wilfred?—Yes.

15,981. Of course you must have paid something to get them to London?—Yes.

15,982. Did you give them any money besides taking them to London. You paid their fare?—Yes.

15,983. You paid their fare and you paid for whatever refreshments they had?—Yes.

15,984. Did you give them any money?—Yes.

15,985. How much did you give them?—7*l.* apiece. There were two men that took them away; there was me and a man named Shaddocks; we divided the money in our possession to keep both these men right. I kept possession of one 7*l.* and my mate kept possession of the other 7*l.*

15,986. And when you got them to London you then gave them the money?—No, we did not.

15,987. What did you do then?—We gave it before I left them.

15,988. What did you do?—I stayed with them a week and gave them the money as they wanted it. I was one of the cashiers of the lot.

15,989. Did you four live together in London?—Yes, we did, and slept in one house.

15,990. And as they wanted money you gave it to them?—I did.

15,991. Did you keep them there till after the charge against Nolan was dismissed?—No.

15,992. How long did you keep them there?—One week; I think it would be a fortnight after that that he was dismissed.

15,993. I suppose they promised you not to come back to Manchester?—No, I do not think they did.

15,994. It was understood that they would not do so?—I think so.

15,995. You took good care that they did not come back here?—How could I help it; they had the money and they could come back if they chose.

15,996. Was that money your own money?—No, I should not pay it, not I.

15,997. Who gave you the money to give them?—Do you mean personally?

15,998. Yes, personally?—Power gave it me.

15,999. At that time Power was the treasurer of the bricklayers' union, was he not?—Yes.

16,000. (*Chairman.*) Who was the other man who went up to town with you?—Shaddocks.

16,001. You gave 7*l.* to one man, and Shaddocks gave 7*l.* to the other?—Yes.

16,002. What did you yourself get for that?—I got 10*s.* a day, and I travelled all Sunday; I got 3*l.* 10*s.* and I think I deserved it.

16,003. You got 10*s.* a day besides your expenses?—I got my lodgings, that is all; I had to pay for my own keeping.

16,004. You got that besides your fare?—Yes, I got my fare, and you do not live in London the same as you live here.

16,005. Which is the cheaper?—Here, where I live, in Manchester.

16,006. (*Mr. Barstow.*) Do you know who got Wilfred away?—Yes.

16,007. Who got him away?—Just mention his name, and I will tell you.

16,008. I thought you got him away?—Not I.

16,009. Did Kenny?—No.

16,010. Just think a minute?—It would be Friday before I saw Wilfred.

16,011. Whom did you see with him?—Stretton.

16,012. Who is he?—He is a bricklayer.

16,013. Is he a member of the union?—Yes.

16,014. Did you know from Stretton what he had given to Wilfred?—Yes.

16,015. What did he give to Wilfred?—60*l.*; that is right enough; is it not?

16,016. Do you know where Stretton got his 60*l.*?—No, how could I when I was in London.

16,017. He did not tell you?—No.

16,018. But he told you that he had given Wilfred 60*l.*?—Yes.

16,019. (*Chairman.*) Did Power pay you and the other man 7*l.*?—I do not know; we got 14*l.*, and we were in company, and consequently, for fear of fellows robbing them, we had 7*l.* a-piece to pay them; that is about the size of it.

16,020. And who paid the 60*l.*?—I could not tell that; how could I when I was away many hundred miles.

16,021. (*Mr. Chance.*) How much did Power give you?—14*l.*

16,022. And he paid your expenses too?—Yes, I think he did; yes, you are right. I think that makes 2*l.* I forgot that; I think it might be 2*l.* each for our expenses.

16,023. That would make 6*l.* more?—No, no, 4*l.*

16,024. You say you each had 7*l.*?—Yes, that is 14*l.*; but we could not bear the expenses. I think we had 2*l.* each, and I think it was no more.

16,025. Then there was your living in London, who paid for that?—We were not without a little cash for our living.

The witness withdrew.

J. Power.

James Power sworn and examined.

16,026. (*Chairman.*) What are you now?—An operative bricklayer.

16,027. Are you a member of the bricklayers' union now?—Yes.

16,028. And you have been so for some time?—Yes.

16,029. Were you ever treasurer during the strike at the assize courts?—I was.

16,030. Did you pay money to Coppock, the last witness?—Yes.

16,031. Do you remember the assault taking place upon some persons of the name of Wilfred, Ratcliffe, and Upton?—Yes.

16,032. Coppock tells us that he took Radcliffe and Upton away up to London?—Yes.

16,033. And he got some money for that purpose, which you paid him?—Yes.

16,034. Do you remember how much you paid Coppock?—No, I do not know.

16,035. He gave the men 7*l.* each and got his own expenses paid and their expenses, and got 10*s.* a day besides for himself?—I think it would be something like that.

16,036. And I suppose you paid the other man whose name was mentioned for taking one of the other men away?—Yes.

16,037. He and Shaddock went up to town with Radcliffe and Upton?—Yes.

16,038. Was Stretton the man who went away with Wilfred?—Yes.

16,039. It was somewhere about 60*l.* which was paid to Wilfred?—No; I do not know for that.

16,040. Who would pay that?—I do not know.

16,041. The money you paid was the union money was it not?—No; it was not.

16,042. Whose money was it?—The labourers' association; it did not belong to our union.

16,043. It belonged to the bricklayers' association?—No, the labourers' association.

16,044. Were you treasurer of that association?—I was not.

16,045. Of what were you treasurer?—The bricklayers' association.

16,046. Where did you get the money from?—The labourers gave it to me.

16,047. Ratcliffe and Upton were bricklayers, were they not?—Yes.

16,048. And you got money from the bricklayers' association?—No, from the labourers' association.

16,049. Did the money belong to the labourers' association?—Yes.

16,050. Then the labourers' association gave you the money, and you gave it to them in the way you have described?—Yes.

16,051. You do not know who paid the 60*l.* for Wilfred?—I do not.

16,052. Have you never heard?—No.

16,053. I believe on one occasion you paid Kenny some money?—Yes.

16,054. 27*l.*?—Yes.

16,055. What was that for?—I really cannot say.

16,056. Do you remember when it was?—Yes.

16,057. When was it?—I cannot recollect the date.

16,058. Give us the year?—Probably about three years ago.

16,059. Whose money was that?—The labourers' money.

16,060. Do you not remember the sum without going into it particularly?—I infer that it would be that.

16,061. Who directed you to pay it?—I was applied to by Kenny for the money, and I paid it to him.

16,062. For what purpose did he apply to you for the money?—I suppose in continuation of the arrangement of the affairs in reference to the labourers.

16,063. What affairs?—In reference to the assault upon Radcliffe and the others.

16,064. That money was in reference to the assault upon Radcliffe, Wilfred, and Upton?—Yes.

16,065. And you gave the money to Kenny?—Yes.

16,066. It was afterwards brought before a meeting after you had paid it?—It was a long time after, some 18 months after.

16,067. I suppose you gave an explanation to the whole meeting of what had been paid and what it had been paid for?—I did not.

16,068. Who gave it then?—Kenny gave the explanation.

16,069. And the explanation was satisfactory to the meeting?—They had nothing to do with it; it did not belong to them at all.

16,070. They explained at the bricklayers' meeting that the money had come from the labourers' association?—Yes; we had never paid a shilling in reference to anything of the sort in our lives.

16,071. Was Nolan a labourer or a bricklayer?—A labourer.

16,072. And Nolan was the person who was said to have committed the assault?—He was; it was in consequence of that that we took action in the matter. An offer was made to us through Mr. Kettle to compromise matters.

16,073. There was an offer made to you to compromise matters with Nolan, and that was the reason why you took action in the matter?—Yes.

16,074. Nolan was a labourer?—Yes.

16,075. And you were the treasurer of the bricklayers' association?—Yes.

16,076. I suppose, as you have been treasurer of the bricklayers' union, you have had to do with the money that was spent upon the strike?—Yes.

16,077. There was a general union of the bricklayers; where was the bricklayers' meeting held?—At Liverpool Road, in Manchester.

16,078. I suppose you have a union with the bricklayers' associations elsewhere?—Yes.

16,079. Where have you unions?—We have branches throughout the whole of the country.

16,080. Can you mention some of the places with which you have connexion in that way. We have heard of Stockport; that is one, I suppose?—Yes.

16,081. Ashton?—Yes.

16,082. St. Helen's?—Yes.

16,083. Liverpool?—Yes.

16,084. Birkenhead?—Yes.

16,085. Sheffield?—Our seat of government is there at present.

16,086. With what other places have you connexion?—Grimsby, Hull, Carlisle, Coventry, Wolverhampton.

16,087. Dudley?—I cannot say.

16,088. And Huddersfield or Wakefield?—I do not think so at present.

16,089. Newcastle?—Yes.

16,090. Durham?—No.

16,091. Gateshead?—No.

16,092. Is there any association of that sort in London?—Not belonging to us; that is the London association; we do not go into that district at all.

16,093. Do you go into the Wakefield district?—I think we do; I am not sure.

16,094. You have an executive committee, have you not?—No.

16,095. You talked about the seat of government; at that time was the seat of government in Manchester?—Yes.

16,096. I believe there was some disturbance about the payment of this money on strike which caused the seat of government to be transferred from Manchester to Sheffield?—No, it was not so. I do not understand the question.

16,097. The seat of government was at Manchester?—Yes.

16,098. When you say that the seat of government was at Manchester, it that the seat of the executive committee formed to act for all the different bricklayers' associations?—Yes.

16,099. And at that time of which you speak the executive committee sat here in Manchester?—Yes.

16,100. Of how many members does the executive committee consist?—Seven, and the secretary.

16,101. How are you elected?—The lodge of the place where the executive is held elects the executive, consequently that is the executive lodge.

16,102. Had you at that time an executive lodge here?—Yes.

16,103. Were the members of that executive lodge all men belonging to the bricklayers' Manchester association?—Yes, the same as at present in Sheffield.

16,104. The Manchester association had a lodge, and that lodge chose the executive committee for the whole of the bricklayers' associations?—Yes.

16,105. How came the government to be transferred from Manchester to Sheffield?—It is liable to removal every year.

16,106. Where was it last year?—At Manchester.

16,107. Where was it the year before?—At Manchester.

16,108. How long had it been at Manchester?—It had been at Manchester 14 years.

16,109. And though it is liable to be removed from year to year, you seem to have had it at Manchester for 14 years?—Yes.

16,110. Do the other bricklayers' associations give a vote as to where it shall be?—Every year a notice goes round with our report asking them to give their votes which shall be the executive lodge, and consequently upon the majority the lodge is chosen.

16,111. The majority decide where the executive lodge is to be?—Yes.

16,112. Manchester having held it for 14 years, at last it is gone to Sheffield?—Yes.

16,113. Do you know why that was?—No.

16,114. Had there been any disturbance about money?—No, none whatever.

16,115. Do you remember whether you spent as much as 920*l.* on the strike?—Yes; we would do so again if we had an opportunity.

16,116. Are you pretty rich?—Yes.

16,117. Was any disturbance made about the expenditure of the 920*l.* in Manchester?—No.

16,118. Nothing of the kind took place?—No.

16,119. And no fault was found with the expenditure?—No; I never was questioned in reference to that at all.

THIRTEENTH DAY.

J. Power.

19 Sept. 1867.

16,120. But without being questioned you might have heard?—I did not.

16,121. You never heard of that being the cause why the committee was transferred from Manchester to Sheffield?—No; Sheffield was selected in due course.

16,122. This has happened for the first time in 15 years?—At the delegate meetings it was so decided that the executive should be removed from town to town every two years, or something like that; that was the first commencement of the removal.

16,123. As a rule now, if any place is selected to have the executive committee, it is to be held for two years, and then it is to be transferred to somewhere else?—Yes, I understand so, subject to the majority.

16,124. That is the sort of practice which there appears to be an inclination to adopt?—Sheffield may be the centre for the next 10 years.

16,125. But the majority rule it?—Yes.

16,126. Is the object of your association to have united action in reference to strikes?—I do not understand the question.

16,127. Supposing there is a great strike taking place among the bricklayers at Manchester; if you want money to carry on the strike, do you send round to all the different places in which you are associated all over the country to get them to subscribe?—No; the executive support us in money.

16,128. Have the executive any control over the funds of the whole association?—They hold funds for local purposes.

16,129. What is your united action; you mention several places all over the country where you have an association, and you have the executive committee?—Yes.

16,130. What are the powers of the executive committee with reference to other associations?—Whatever their present rights, rules, and privileges are the executive supports them if they are violated.

16,131. Supposing they are violated; supposing that the executive committee at Sheffield decided that either here or anywhere else their rules had been violated, what do they do upon that?—Support us on the question.

16,132. That is, if you want money they support you?—Yes.

16,133. They collect money?—They have it on their hands; they never collect money.

16,134. Where does the money come from?—We have never been so situated as to require collecting.

16,135. Have they the power of disposing of such funds as exist?—Yes.

16,136. The funds of each association are all connected with the executive committee?—Yes.

16,137. Supposing there is a want of money, do they say what is a proper occasion, or on which the money shall be spent. The Manchester bricklayers' association has to subscribe so much?—No.

16,138. How do they do it?—The question never arose.

16,139. I do not understand how the executive committee get the funds to supply you with if you want it?—They have them at their disposal.

16,140. Before they have them they must get them. How do they get them?—By us remitting our contributions to that place.

16,141. How is your contribution settled?—We remit so much per member per month.

16,142. Each member subscribes so much every month to the general funds of the amalgamated union?—Yes.

16,143. How much is the amount per month?—3*d.* per head.

16,144. Is that subscribed by each member of each association?—Yes.

16,145. How much does each member subscribe to the general funds of the united association?—3*d.* per head.

16,146. Per month?—Yes.

16,147. Can you give me any notion of what the income would be at that rate?—I really cannot.

16,148. Pray try?—I cannot give any notion.

16,149. Were you ever a member of the executive committee?—Yes.

16,150. What was the amount ever spent by you at any time for a strike?—The gaol was the heaviest we ever had here.

16,151. Do you know how much you spent upon that?—I do not know.

16,152. Was it several thousands or one thousand?—I cannot give you an answer.

16,153. You can give me some answer?—There is no one knows how much it cost.

16,154. We have heard of a strike in 1854, which cost as much as 154,000*l.* You heard of that?—Yes, I did hear of that.

16,155. Cannot you give me any idea how much your strike here may have cost you?—I cannot say.

16,156. Several thousand pounds?—No, nothing of the sort.

16,157. Was it somewhere about 900*l.* or 1,000*l.*; you mentioned that sum?—I did not mention it.

16,158. I thought you assented to that?—I did not. I do not know how much it cost at all.

16,159. Is this money sent up to the executive committee and put into any bank?—Yes, subject to their control.

16,160. They meet at certain times and pass resolutions?—Yes, once a week.

16,161. What are the purposes of your society besides strikes and the expenses incurred thereby?—We pay for accidents and burials for all our members.

16,162. The executive committee do not do that?—They allow that.

16,163. Have they the complete control of all the funds of the union?—Yes.

16,164. When you want money for a funeral or an accident it is to the secretary of the united association that you apply for that money?—The secretary of the local lodge has the power of taking so much money out of the subscriptions for current expenses, accidents, and funerals, and he remits the balance.

16,165. If you want money for a strike it is remitted from the general committee?—Yes.

16,166. But for an ordinary accident and funeral account you deduct the sum from the amount to be sent up to the general committee?—Yes; if anything is overpaid for the current month it is balanced every fortnight.

16,167. If any money is paid for the purposes which we mentioned, as to which it may be doubtful whether they are legal or not, you apply to the executive committee for permission to spend it?—We never raise such questions; there is no such question raised, because we could get no such money.

16,168. The executive committee have the power to let the money be spent in what they think right?—No; we get in every month a report, which is sent to every lodge and read on the Monday after, consequently we should see such money reported, and we should send a deputation directly to inquire into it and remonstrate.

16,169. Still they have the power; you leave it to their discretion to say how they shall spend the money?—No; they have the general laws to look to the same as I have, and they cannot infringe them.

16,170. They cannot go beyond them?—No.

16,171. Have you had a meeting in Manchester lately?—Yes.

16,172. When?—Last Monday.

16,173. Did you come to any resolutions then?—Not to my recollection.

16,174. Who was it that gave you the money towards paying Kenny the 27*l.*?—One of the labourers' association.

16,175. What is his name?—I believe his name was Rush.

16,176. What was he?—I think he was one of the secretaries of the association.

16,177. Who sent you the money which you paid Coppock?—It was part of the same money.

16,178. How much did you get altogether?—I really cannot say; we got various sums.

16,179. Whatever you got, you got from the man Rush, who was the secretary?—I might have got money from others in the same association, but I cannot remember their names.

16,180. Cannot you remember their names; was it the president or the treasurer?—They might be some of the officers.

16,181. You cannot recollect their names; Rush is the only name which you can recollect?—Yes.

16,182. I think you said that there was a meeting last Monday?—Yes.

16,183. When was there a meeting before that?—The Monday before.

16,184. Where was the meeting, here in Manchester?—Yes, we meet every week.

16,185. Had you any special meeting besides those two?—No.

16,186. Was it a numerous meeting?—No, an ordinary meeting.

16,187. Do you know James Kay?—Yes, I have seen him several times.

16,188. He is pretty well known?—I have seen him several times.

16,189. When did you last see him; was he present at either of those meetings?—No, he never comes to us except on special business.

16,190. Did there happen to be any special business on either of those Mondays to bring him there?—No.

16,191. This inquiry has never been mentioned at any of your meetings?—No. THIRTEENTH DAY.

16,192. When did you last see Kay?—It may be a month or two months ago. *J. Power.*

16,193. But you did see him a month or two months ago at Manchester?—Yes. 19 Sept. 1867.

16,194. It may be a month ago?—It may be more, but I have seen him recently. I cannot say as to the time.

16,195. It may be less than a month?—I cannot swear as to when I saw him.

16,196. Can you say whether it may have been less than a month when you saw him?—I cannot say when I saw him.

16,197. Where was he when you saw him?—I may have seen him accidentally. I cannot say when or where.

16,198. You are certain it may be a month or two. Can you speak positively as to a month or two?—I cannot, because I had no interest in seeing him.

16,199. How far will you be positive?—I cannot say positively as to the time at all.

16,200. But you think it was one or two months ago?—I have heard of him being in the streets since.

16,201. Since you saw him?—No, not since I saw him. I have heard of his being in the district within a month. I have not seen him myself. Will you allow me to say a word?

16,202. Yes, if relevant to this inquiry.—Yes. We, during our experience of 22 years, have never paid a shilling for anything relevant to this inquiry.

The witness withdrew.

Adjourned to to-morrow at 11 o'clock.

FOURTEENTH DAY.

Assize Courts, Manchester, Friday, 20th September 1867.

PRESENT:

PERCIVAL ANDREE PICKERING, Esq., Q.C. | GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq. | JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, Esq., Q.C., IN THE CHAIR.

Mr. B. T. Williams stated that he was instructed by Messrs. Shaen and Roscoe to appear for the Amalgamated Society of Carpenters and Joiners; and requested the Court to concede to him the privilege of suggesting questions to a witness who might say anything affecting the character of that society. He stated that the society desired to give every possible information to the Court, and to disclaim any participation in any acts of violence or course of policy of that nature. FOURTEENTH DAY. 20 Sept. 1867.

The *Chairman* stated that when cases affecting the society for which Mr. Williams appeared were brought before the Court they would willingly receive from him any suggestion as to questions to be put to witnesses.

Mr. JOHN KNOWLES sworn and examined. *Mr. J. Knowles.*

16,203. (*Chairman.*) What is the business which you carry on?—I am the representative of Messrs. Knowles and Sons, colliery proprietors at Pendlebury, near Manchester.

16,204. How far is that from Manchester?—About four miles from Manchester.

16,205. Are you a partner in the firm?—I am a partner in the firm.

16,206. How many partners are there?—There are several partners.

16,207. You say that they have collieries at Pendlebury?—Yes; and also at Pendleton, Edge Croft, Clifton Hall, Clifton Moss, Stone Clough, Little Lever, Ratcliffe, and the Cleggs, near Rochdale.

16,208. And do you work them all?—Yes, I and my partners; I am the managing partner of the Pendlebury district.

16,209. How many hands do you employ?—We employ about 3,000 altogether.

16,210. Is there a union among the colliers?—We do not countenance the union; in fact we will not employ union men.

16,211. My question was whether in fact there is a union among the colliers?—Oh, yes, there is.

16,212. How long have you been carrying on this business?—A great many years.

16,213. At this moment you are not employing union men, are you?—No, we are not.

16,214. Did you formerly employ them?—The principal time when we gave over employing union men might be between 1844 and 1846, but previously to that time we had had disturbances so as to cause us to decide not to employ union men.

16,215. Something took place previously to that time which led to your employing non-union men?—Yes.

16,216. And for the last 20 years you have been always employing non-union men?—Yes.

16,217. And you still employ non-union men?—We still employ non-union men. Of course they may

FOURTEENTH DAY.

Mr. J. Knowles.

20 Sept. 1867.

get into our works without our knowledge, but we discharge them when we happen to know of it.

16,218. Within the last 12 months or so have any men left your work in consequence of their joining the union?—About 1,400 left in November last.

16,219. Do I understand you to say that it was in consequence of their joining the union (you employing non-union men) that those 1,400 men left your works?—Yes.

16,220. Then did those 1,400 men become union men?—A few of them were in the union previously to that time; that we did not know of, and they left work and induced the others to leave, and then, after having left our employment, they at once joined the union to get the advantage of the subscriptions which might be paid.

16,221. Then in all about 1,400 left?—Yes.

16,222. Had you had any dispute at the time with them about wages or anything of that sort?—None whatever.

16,223. Then was it a sort of sudden resolution?—It was a resolution which was come to in the Pendlebury district, on the 8th of November, and they induced a large proportion to stop from their work on the Friday morning, the 9th.

16,224. And you had had no dispute to lead to it in any way?—None whatever.

16,225. Not in reference to wages or anything?—No, all our men on being employed came into our employment with the understanding that they did not join any colliery union.

16,226. And that has been the understanding for the last 20 years, has it not?—Yes, it has.

16,227. Some of them had privately joined the union unknown to you?—Yes.

16,228. And they had persuaded the others, and it led to this?—Yes.

16,229. At the time that this circumstance took place were your wages high?—They were higher than they had ever been; in fact, the men had just had an advance given to them, and they had scarcely received any advantage from it.

16,230. I suppose that you have never had any negociations or deputations from them, have you?—No, and we do not recognize them.

16,231. You do not recognize their existence?—No.

16,232. When the colliers left your work, was the colliery trade in any other part of the country in a depressed state?—Yes, in Staffordshire particularly, and also the mining population in Cornwall were very much in want of work.

16,233. That was just at the time when those men left as you have described?—Yes.

16,234. Upon having 1,400 men leave you, what did you do for hands?—We sent out our agents to different parts of the country and brought men to the works.

16,235. How many men did you get?—Altogether, the number that we brought from Staffordshire and Cornwall might be 500—300 from Staffordshire and about 200 from Cornwall; but I think that an equal quantity, about 500 others, came of themselves, knowing that the wages were remunerative, and they receiving very little where they were living.

16,236. Where did those men come from?—The majority of them came from Staffordshire, and some came from Cornwall.

16,237. I suppose you took means to make it known?—Yes, we sent about 3,000 placards up and down the country for the purpose of informing them that we were wanting colliery hands.

16,238. Those men having joined the union, had you any houses in which union men resided?—Yes, we had many houses.

16,239. Were the houses occupied by some of those men who then joined, or by some who had been union men before?—Both cases, but principally those who were induced to join immediately; there was a stoppage.

16,240. Some of those, at all events, you say were tenants of yours?—Yes.

16,241. Upon this having taken place did you give the men any notice, or what did you do with them?—We gave them notice to leave the cottages because we wanted them for the new hands.

16,242. They had occupied those cottages as being in your employment, and you, of course, wanted those cottages for the new hands, as you tell us?—Yes.

16,243. What was the nature of the tenancy?—It was simply a fortnightly tenancy or a weekly tenancy.

16,244. Could you get the cottages vacant in time for the new hands?—We could not, because it would take a week or so to get them out of the cottages.

16,245. Did you then engage other rooms for those other men?—Well, we prepared our work and store rooms in the different collieries for the accommodation of the new hands, purchasing beds and bedding and all the requisites for living.

16,246. How many should you say that you had in the store-rooms under those circumstances?—I daresay we had 150 at a time, and then as we had cottages emptied we put them into the cottages.

16,247. Did you anticipate that those new hands, to the number of about 1,000, would probably be annoyed by those who had joined the union?—Yes, we had every reason to think that they would, and the results which did take place showed it.

16,248. In expectation of that, did you engage the services of any police or anything of that sort?—Yes, we did.

16,249. Of the county police?—The county police and also the borough police.

16,250. Did you engage them for any period of time?—No, there was no particular period.

16,251. But did you employ and pay them for a certain amount of time?—I daresay we employed them for six months.

16,252. I need scarcely ask you whether that did not cost you something, at all events?—It did. I think in our Pendlebury district we had 12 policemen; in Ratcliffe we had about seven, and perhaps about the same number at Little Lever and Stone Clough.

16,253. This district which you have been speaking of is the Pendlebury district?—Yes.

16,254. I think you mentioned that you have also collieries at Stone Clough and Clifton?—Yes, Clifton is in the Pendlebury district.

16,255. Had you ever had a turn out of colliers before this?—In 1863 we had a turn out from the same cause at Clifton Moss, Stone Clough, and Little Lever, and that lasted 12 months.

16,256. Was that from a similar cause?—Yes, the men joined the union.

16,257. Do you know about how many men?—It might be 200 or 300.

16,258. They joined the union; did they find that that did not answer, and did they give it up?—Yes.

16,259. In 12 months you say?—They gradually came in, but 12 months was the ending of it.

16,260. You always persisted in having nothing to do with the union and not even recognizing their existence?—Yes.

16,261. They had been out for 12 months, and then they thought better of it and came back?—Yes.

16,262. Had you had previously any turn out in the Pendlebury district?—The one previous to that was in 1850.

16,263. We will not go into that, that is beyond our time, which is limited to 10 years?—There was no turn out between 1850 and 1863.

16,264. Do the wages at all depend upon the price of coal?—They do. Our practice is that in any change in the price of coal, on its advancing or reducing, we have changed the wages of the colliers at the same time, so that it really has been a good guide.

16,265. The turn out at Pendlebury of which you first spoke was in November 1866, was it not?—Yes.

16,266. How long did that turn out in November 1866 last?—Six months; it ended in May.

16,267. What did the men who were turned out do; did they get money from the union?—Yes.

16,268. What was the rate of wages which those 1,400 men who turned out then were then receiving per week?—Taking the men and boys together the average would be 22*s.* per week; the boys would get less, but the men would get more.

16,269. Taking the average at 22*s.*, how much would the men get?—About 29*s.* per week. There are double the number of men that there are of boys, so that the proportion can scarcely be worked out.

16,270. And that would have extended over a period, if they had been with you, of six months?—Yes, I would say that that is the average of the wages that they get, and that depends upon the amount of time they work. Being paid by the piece they may make more or less, but that is actually the average.

16,271. Have you now a full complement of workmen?—Yes, we have.

16,272. And does it still include those whom I may call strangers from Staffordshire and Cornwall?—It does not include all of them; many of them are working, and many of the old hands who have given up the union are at work.

16,273. Several of those who had joined the union have thought better of it and have come back to you?—Yes, a large proportion.

16,274. Of course, in coming back to you they have had to give up their membership of the union?—They had.

16,275. In March last did any fire take place in any of your store-rooms?—Yes, there was a fire in our Pendlebury store-room, and that store-room was a room adjoining where some of the people were residing. It burnt both the store-room down and this place, which had been prepared for them to live in.

16,276. Was it at night when the fire was discovered?—It was early on Sunday morning, about a quarter past 1 o'clock, or 1 o'clock. I will not be certain as to the exact time.

16,277. Was the store-room where the fire was discovered one of those rooms which you had had prepared for the new comers?—That particular store-room was simply a shed which we originally kept oil in for the use of the colliery.

16,278. Was there oil there?—Yes, oil, and tallow, and hemp, and other things.

16,279. Things which would have burnt pretty freely?—They did burn freely. All those stores had been put into this shed out of the old store-room where the people were living.

16,280. So that you had all those combustible materials in one place, and there the fire was discovered?—Yes.

16,281. And in a room adjoining those other rooms where the new comers were living?—Yes.

16,282. So that it would have gone on and burnt down the place where they were?—Yes, and it did burn it down.

16,283. How much did it burn?—There would be about 500*l.* worth of stores.

16,284. Can you give us at all any estimate of the amount of damage done by that fire?—Well, the buildings would be worth 300*l.* and the stores 500*l.*, that makes 800*l.* altogether.

16,285. The fire was discovered about the time you say, and you took immediate measures of course to put it down?—Yes, there were policemen there. It was found out a few minutes after it was set on fire. If it had not been discovered early we should have had a very serious explosion.

16,286. Will you mention how that would have occurred?—Close to these works was a gasometer, with a large pressure of gas on it to force the gas down the pit (I name its being a large pressure for that purpose), and not very far from that was a powder magazine, and also another store-room, so that it is the most dangerous place to set on fire that you could possibly have.

16,287. Had you any gun-cotton?—Yes, some gun-cotton.

16,288. What quantity of powder had you?—There might be a ton or so, but I cannot tell the exact quantity. It was our usual quantity which we keep for the works.

16,289. I suppose, for the purpose of injuring your property a place could hardly have been selected which was more likely to produce that injury than the place where the fire was discovered?—No, I do not think it could.

16,290. There was a store-room and a powder magazine, and also the place where the gun-cotton was?—Yes.

16,291. Had the fire not been discovered in the way it was and put out, I suppose the destruction of your property and the loss of life would have been very considerable?—The loss of life would have been immense in the village.

16,292. Had you had any reason to expect that some damage would be done, so as to be on the look-out?—Well, a short time before it had been rumoured about that some great mischief would be done, either to the works or to the mill belonging to one of the partners, or perhaps to some of the houses where the partners resided.

16,293. Had any letters been sent?—No threatening letters whatever.

16,294. Did any letters come to you at all from the union?—Yes, two letters have come.

16,295. Have you got them?—Yes (*handing in the letters*).

16,296. This is a letter from persons professing to be the committee?—Yes; they are of no moment. There was no reply sent to the first letter, because being a committee we did not recognize it.

16,297. That letter, I see, bears date December 12th 1866?—Yes.

16,298. Will you read it?—"Committee Rooms, Pendlebury, Windmill Inn, December 12th 1866 ——."

16,299. Is that the committee room of the union?—Yes.

"To Messrs. Andrew Knowles and Sons,

"GENTLEMEN,

"WE, a committee formed of your own men, "wish to know the reason why you object to us join- "ing the union, seeing other masters allow their men "that privilege, and master and men are working "harmoniously together. If you would admit of a "deputation composed of your own men, a deputation "of your own men will meet you at any time and "place you may appoint. An answer to this note "will greatly oblige

"Yours respectfully

"THE COMMITTEE."

16,300. Then the other letter you have given to me is a letter dated "Pendlebury, May 16th 1867." Will you read that (*handing the letter to the witness*). That letter you are now going to read is from some of your men, and it is signed by Chapman, the secretary, as he is called, is it not?—He is not a man of ours.

16,301. He writes for your men, but he himself writes as the secretary of the union?—Yes.

"SIR, Pendlebury, May 16th, 1867.

"WE are ashamed of writing to you through "our conduct in the strike, knowing that we put you "to a great deal of trouble and expense by our un- "manly conduct, but we were led on by men who "said fine things and made great promises (who, we "believe, had had their great feelings hurt because "you would not speak to them). Fools that we were "to heed them, men who we believe care very little "for us so long as they can get their 30*s.* per week, "and themselves thought to be somebody. But we "have had enough, and more than enough, and many "of us were young and inexperienced in such things, "but thought at the time it was wrong to strike in "the manner we did without a moment's warning, "but we were overruled; fools I say we were again "to heed them.

"But now to the point. We humbly beg that you

FOURTEENTH DAY.

Mr. J. Knowles.

20 Sept. 1867.

" will look over our conduct for the past, and we pro-
" mise amends for the future. We are forced to keep
" in the union while we are out of employment; you
" will see that, if we withdrew from the union, and

" gone, and we should have to leave the country to
" seek other employment. We were led to join the
" union under a belief that it would do us good, and
" the rules went to say that we were not to do any-
" thing that would injure either employer or em-
" ployed, rules which have been foully broken by the
" present strike. But we, the leading members of the
" lodge which is held at the 'Windmill Inn,' and
" which is the most influential lodge in the whole dis-
" trict, pledge ourselves to withdraw from the union
" if you will look over our fault this time, and take
" the few members we have out of employment to
" their work again, with the privilege of turning our
" lodge into a sick lodge, as we have some money on
" hand which we do not want to leave, and we also
" think that if you will grant us these things, that
" turning of our lodge into a sick lodge will be the
" means of smashing up the union in Pendlebury.
" Hoping you will consider our petition, and if you
" can grant us our request and we promise not to be
" so soon led to enter a trades union again.

" Signed on behalf of the leading members of the
" above lodge.

" I remain, your humble servant,

" JOHN CHAPMAN,

" John Knowles, Esqre. Secretary.

" P.S.—You must not think that it is on my own
' account that I write this. I was not working for
" you at the time of the strike, and I do not think I
" shall ever work in the pit again.

" J. C."

" SIR,

" If you can agree with our proposition you
" will greatly oblige by writing in return, and I will
" ever remain your humble servant,

" JOHN CHAPMAN,

" John Knowles, Esqre. Secretary."

16,302. Was that the reply you wrote (*handing a letter to the witness*) ?—Yes.

16,303. What is the date of that ?—

" SIR, May 23rd, 1867.

" IN reply to your letter of the 16th instant, I
" can enter into no negociations on the subject therein
" named.

" Yours truly

" JOHN KNOWLES."

16,304. I think you have also told us that you did take some men back ?—Any man coming back on his own account we would take on, and they knew that at the time.

16,305. But you would not recognize the union and had nothing whatever to do with it ?—Yes, that was it.

16,306. (*Mr. Barstow.*) Has the union any price list ?—No, no price list at all; I do not know of any.

16,307. You pay your men by the piece I think you said ?—Yes, we do.

16,308. Are you aware whether you pay your men as highly as union men are paid ?—Yes, we do; and the consequence of that is that they are induced to come to us by the price which we give.

16,309. You think that you give as high prices as any other colliery master in the trade ?—Quite so; we have to do that to induce them to come to us.

16,310. In what way did you anticipate that the union men would interfere with the working of your pit ?—We had had experience of that many years before.

16,311. But can you tell us in what way you supposed they would interfere with your business ?—Well, they would dictate to us what we should do as regards the working of the collieries.

16,312. That is a very general answer, you know; it seems to me that you did not anticipate any difficulty on the ground of wages, because you were paying the highest wages in the trade ?—No.

16,313. Then in what other way did you anticipate that the union would interfere with you ?—They would pass laws and regulations for the working of our collieries, which would interfere with us.

16,314. But I rather want to know what you thought those laws and regulations would be ?—Well, I will tell you what happened once in 1833 ——

16,315. I will take this as an illustration of what may happen now, but of course we cannot go into what happened in 1833 ?—No, I am only showing you the beginning of it; of course I am now telling you my father's experience of it. At that time there was a dispute about the works; a certain number of men came to the colliery, took the engine men's place, and let men down the pit and brought our colliers out, and there was a riot then, and there were 18 men sent to Lancaster for it.

16,316. What was the ground of that; what was the reason they gave for taking your men out ?—It was a dispute about wages; they wanted them to stop, and we were then paying more wages (so I am informed) than our neighbours; they wanted them stopped so that they could get more, and they fetched the men out of the pit.

16,317. In that case they would have interfered with you in point of wages, although you were paying the highest price ?—Yes, at that particular time.

16,318. Were those men whom you introduced, particularly the Cornish men, satisfactory pit hands ?—They were after they had been down a certain time. Of course being miners, they could not get into the working of the coal so soon as the others, but they are satisfactory, no doubt.

16,319. Then the effect of the strike has been to introduce a thousand new labourers into your district ?—Yes, but part of them have returned. They have kept going backwards and forwards from Staffordshire and from Cornwall to here.

16,320. But a portion of them remain I suppose ?—Yes.

16,321. I suppose that would rather have a tendency to lower the rate of wages ?—It has not done so as a matter of fact. There has been a reduction in the rate of wages on account of the reduction in the price of coal, but there has been no reduction in the rate of wages in consequence of those men being imported into the district.

16,322. Is the labour market now fully supplied, or not ?—It is fully supplied with us.

16,323. In speaking of this building of yours you used the words "set on fire;" do you attribute the fire to the work of an incendiary ?—I do.

16,324. What reason have you for saying so ?—Because the place was perfectly safe, and there was nothing to cause a fire of the material which was in it, and there were men about the place who would easily have discovered any smouldering or any smell arising if it had been caused by spontaneous combustion.

16,325. Were you insured ?—No, we were not.

16,326. Then of course you did not have it surveyed ?—No, not at all.

16,327. Did you find matches or naphtha, or any combustible material about the place ?—It was all burnt down; there was plenty of oil and tallow of our own in the place.

16,328. But did you find anything such as anybody would have brought to set fire to the building ?—I think they would have very easily set fire to it by putting a match to it.

16,329. Had anybody been seen about the place ?—No. The way in which we think it was set on fire was from the back. To get at the front of the place they must be in the colliery yard, but it could be got to from the back.

16,330. No one was apprehended, I suppose ?—No.

16,331. Can you give any opinion as to whether or not the fire was the work of anyone connected with

the union ?—I think it must have been because of the rumours which were afloat that some mischief must be done.

16,332. You had a dispute with the union, and there were rumours afloat that mischief would be done ?—Yes.

16,333. Putting those two things together you argue that the fire was the work of some union men ?—Yes, and from the expressions which were used at the time when the fire was raging.

16,334. Were you there at the time of the fire ?—No, I was not.

16,335. Did the fire bring a large crowd of people ?—A great number. (*The witness produced a paper.*)

16,336. You are apparently going to read some expressions which you tell me were used at the time. Who told you the expressions ?—It was one of the managers of our colliery, an under-manager.

16,337. Is he here ?—He is not here. His name is Peter Higham ; he said that he heard Thomas Fletcher ——

16,338. I suppose that if we saw it necessary we could have Peter Higham here ?—Yes, you could.

16,339. Is he still in your employment ?—Yes. This is information which I got at the time after the fire. I tried to ascertain what I could, but I could not bring it home to anyone. "Thomas Fletcher, George Pil-" kington, and Jesse Booth were on the contrary side " of the road. Those men stood on the opposite side " of the road during the fire, and they expressed a " wish that the bloody place was on fire, and the " knobsticks in it."

16,340. Part of their wish, it seems, was gratified ?—Yes.

16,341. But that was during the time that it was on fire, I suppose ?—Yes.

16,342. Was there anything else ?—There is a man named McManus, who works for Mr. Walworth. He said that Robert Tattersall, the smith, of Clifton, had told him that he was afraid that there would be mischief done, and he also said in Worsell's beershop that it would happen on a Sunday morning.

16,343. (*Chairman.*) Is Robert Tattersall a union man ?—No ; he is a smith. I have seen Robert Tattersall, and this is what he says. First of all he said : " I did not make any remark," and then afterwards he says, " I may have made a remark that it was an " unfortunate affair, and that I was afraid something " serious would happen before it was over. A month " last Saturday I called at the house at the bar and " had a glass of beer with James McManus, and it " was then that it was named." Those are the rumours which I heard.

16,344. Are those all the rumours ?—Then McManus said he heard two men in a jerryshop at Pendleton, opposite the street leading to Mr. Barningham's, say that there would be a row before many days.

16,345. Are the other rumours of the same kind as those ?—Yes, they are.

16,346. They do not come nearer ?—They do not come nearer. I am only telling you as far as I could get.

16,347. There were rumours about before this that something would be done to your property ?—Yes.

16,348. And they seem not to be traceable to anyone ?—No, I cannot trace them to anyone.

16,349. (*Chairman.*) You had no private animosity against anybody, had you ?—No, we had not.

16,350. And you know of no reason at all why your premises should have been destroyed, except the quarrel with the union ?—That is all.

16,351. (*Mr. Chance.*) What was the building made of which was burnt ?—It was a brick building. It was originally two cottages and a shed at the end of it, and the two cottages were made into rooms for the men to sleep and live in.

16,352. Could they be set on fire from the outside ?—Where the shed was they could be easily set on fire from the outside.

16,353. Was the shed built of wood ?—No, of brick.

16,354. Then how could it be set on fire ?—By simply putting a light through the wall at the back into the interior.

16,355. Were there many combustible materials exposed about which would easily take fire ?—Yes, it was a store-room, with oil, and tallow, and hemp.

16,356. The oil, I suppose, was kept in vessels ?—Yes, in barrels.

16,357. And was the tallow in barrels too ?—Yes.

16,358. Was there wood about which would take fire ?—No, there would be no wood about in the place, it would simply be hemp and ropes.

16,359. Were any of your men allowed to smoke there ?—Not at all ; it was not a place where they would go ; it was in the middle of the night.

16,360. You cannot conceive how an accident could have occurred ?—I cannot see how it could have occurred there.

16,361. You do not think that it could have occurred from spontaneous combustion ?—No, because the police were in the yard going about, and any smell which would have been caused by spontaneous combustion would have been easily detected. It was found out about a quarter of an hour after it was set on fire.

16,362. (*Chairman.*) Were there policemen watching your premises at this time ?—There were.

16,363. Where ought they to have been ?—There was a policeman in the yard at the time.

16,364. (*Mr. Barstow.*) Were the new hands actually in the adjoining shed at the time that the fire broke out ?—Yes, some few.

16,365. (*Chairman.*) And I believe that one of the policemen discovered the fire, did he not ?—I think he did.

16,366. A man named Alcock I understand discovered it ?—I do not know his name, but he went to our manager immediately.

16,367. (*Mr. Barstow.*) Of course if the fire had caught the powder the adjoining shed would have been blown to pieces ?—There would have been a serious injury ; hundreds of lives would have been lost for certain.

16,368. (*Chairman.*) You said that you imagine they had put a light in the shed from behind ?—Yes.

16,369. Did they open the door and go in, or did they put it through a hole ?—Put it through a hole.

16,370. Was there a window ?—I cannot describe the exact position ; we thought it could be done there ; it is only a supposition.

16,371. But you think something could have been thrown there which would easily have caught ?—Yes, it is but low, so that if they could not get it through the wall they could put it through the slates and let it drop down, or even they might have been so sharp as to get round to the front and throw it in, and then get back.

16,372. (*Mr. Chance.*) Was the combustible material close to where this hole was ?—It was all filled in the shed.

The witness withdrew.

JOHN WALWORK sworn and examined.

J. Walwork.

16,373. (*Mr. Barstow.*) What are you ?—A wheelwright.

16,374. Where do you live ?—In Pendlebury.

16,375. Do you remember the colliers' strike at Messrs. Knowles' colliery ?—Yes.

16,376. Do you remember exactly when it was ?—Well, I cannot tell exactly the date, but I can remember the time very well.

16,377. You remember Mr. Knowles getting some new hands ?—Yes.

16,378. Had some of those new hands lodged with you ?—Yes.

16,379. Do you remember when it was that those

FOURTEENTH DAY.

J. Walwork.

20 Sept. 1867.

new hands came to lodge with you?—I remember the time, but I cannot exactly tell you the date.

16,380. Can you remember the month?—I do not know that I can.

16,381. Can you remember about the time of the year?—It was the back-end of last year.

16,382. About October or November perhaps?—Well, I should say it was somewhere about that time, to the best of my knowledge.

16,383. How many men lodged with you?—Six.

16,384. Did anything happen to your house whilst they were lodging there?—Yes.

16,385. What was that?—I had my front window broken, and the men had to be guarded to and from their work——

16,386. Keep to the windows first; how many windows were broken?—There were two windows with six panes in the front room below, and one pane in the room above.

16,387. At what time of the day was this done?—About 7 o'clock, as near as I could think.

16,388. Did you see anybody do it?—No.

16,389. Did anyone see who did it?—No, there was one of those lodgers who went into the front room to write a letter, and they were shouting, "Turn those bloody knobsticks out of your house."

16,390. The people in the street were shouting, "Turn those bloody knobsticks out?"—Yes; and when he went into the room there were several stones came through the window at him, and he made his way back again into the kitchen.

16,391. Then there was a light in the room, was there?—Yes, he went with a candle into the room to write this letter.

16,392. And the people outside could see that there was somebody in the room?—Yes.

16,393. Were you in the house at the time?—No.

16,394. Was anybody taken up for this?—No.

16,395. Did you give information to the police?—Yes, information was given to the police there and then.

16,396. And they came on the spot?—They came on the spot.

16,397. Did they find anyone there?—No, they could not find anyone there nor anyone about.

16,398. This crowd who were shouting out had dispersed?—Yes.

16,399. You said something about the men being guarded?—They were guarded to and from their work.

16,400. Who guarded them?—Police-constable Cock guarded them to and from their work.

16,401. How long did they live with you?—I should think about four or five months.

16,402. Did this continue all the time that they were living with you?—Yes, there was threatening language used all the time.

16,403. But were they guarded to and from their work all the time that they lived with you?—Yes, they were guarded to and from their work all the time that they lived with me.

16,404. Have you ever heard threatening language used to them?—Yes.

16,405. By whom have you heard that language used?—I cannot exactly say. It was shouted out in the street whilst I was in the house.

16,406. But did you see the persons who shouted to them?—I do not know that I did, I only heard someone calling.

16,407. I did not mean to ask whether you saw them so as to know them again, but what sort of people were they?—They appeared to be colliers.

16,408. You saw them well enough to know that?—Yes.

16,409. You live in a colliery district and know colliers as well as possible, I suppose, when you see them?—Yes.

16,410. Is that all you know of any act of violence?—No. I removed from that place to a place called City Walk, close by the colliery, and I believe that last Christmas-day I was returning home, me and my "missus" were going down together, and I saw a drunken man coming up, and I said to my "missus," "We will step on one side and let this man go along, "as he appears to be drunk, and seems to have as "much as he can manage with him." The moon was shining bright at that time as he was passing, and he saw it was me, and he came and laid hold of me, and got hold of my shirt front and pulled it out, and he said, "I suppose thou art a bloody knobstick." I said, "Not that I am aware of;" he said, "I will give thee a bloody good whiz." That means a good strike, you know. I said, "You had better not if you can get any other shift;" and then my wife caught hold of him instead of me.

You can stand down.

The witness withdrew.

W. Holford.

WILLIAM HOLFORD sworn and examined.

16,411. (*Mr. Chance.*) Are you a collier?—Yes.

16,412. In November last year were you working for Messrs. Knowles?—Yes.

16,413. How long had you been working for them?—Well, I cannot say I am sure.

16,414. Had you been working for them for sometime?—Yes, five or six weeks I daresay.

16,415. Were you one of the new hands engaged by them in consequence of the strike?—Yes.

16,416. Where did you come from?—I came from a place called Wigan.

16,417. Were you ever threatened or annoyed by the union men at Pendlebury?—I do not understand you.

16,418. Was anything ever said to you by any of the union men at Pendlebury?—No.

16,419. Were you ever called a "knobstick?"—Oh yes.

16,420. Were you often called a "knobstick?"—Well, several times.

16,421. Was that by the union colliers?—Yes.

16,422. Did they ever beat you at all?—No.

16,423. Do you remember one night in September a bottle being thrown into your house?—Yes.

16,424. Into what part of your house was it thrown?—It was thrown through the front chamber window.

16,425. At what time?—Between 11 and 12 o'clock at night.

16,426. Who was in the room at the time?—Only me and my "missus."

16,427. You were in bed I suppose?—Yes.

16,428. Did the bottle explode?—Yes, if it was a bottle; but I do not know whether it was a bottle of some kind, or a fire-arm, but it made a big noise.

16,429. And it woke you up I suppose; was it on fire?—Yes, I thought the room was in a blaze, with little bits of stones and bottles and things.

16,430. Did it set anything on fire in the room?—No.

16,431. But you found bits of bottle and bits of stone?—Yes.

16,432. Did you find any nails about?—No, bits of bottle and stone on the floor, and on the bed beside of us.

16,433. You were not injured?—No.

16,434. Had anything ever been said to you by anyone about coming to Pendlebury?—No, no different to anybody else that came the same time as me.

16,435. But did anybody ever say to you that you would have to rue or be sorry for having come to Pendlebury?—Well, they said they was ashamed of me coming, and they asked me the reasons I came for.

16,436. Who said that?—It was some of those union men; I do not know which of them.

16,437. Did they ever tell you that you would repent coming to Pendlebury?—They told me that I

should rue it; they thought I should have more sense than to come.

16,438. Was this before the bottle was thrown into your window?—Yes.

16,439. Had you any private quarrel with anybody?—No, I never had a word with any man since I came.

16,440. You do not know any reason why any man should throw a bottle through your window?—No, I do not.

16,441. Was it your belief that it was to make you rue coming to Pendlebury that this bottle was thrown?—I thought it was for the purpose of frightening me away, but still I remained; I did not go away.

16,442. You are working there still?—Yes.

16,443. Was anything else done to you?—No.

16,444. They call you "knobstick," I suppose, still?—Yes.

The witness withdrew.

Samuel Potts sworn and examined.

16,445. (*Chairman.*) Do you remember the Pendlebury district in November last?—I do.

16,446. There was a strike, we understand, among the colliers?—Yes, there was.

16,447. Was there much disturbance going on?—There was a great deal of disturbance.

16,448. We understand that several additional constables were employed to protect Mr. Knowles' property?—There were 10 besides Inspector Bent.

16,449. There were several summonses against persons for breaches of the peace?—Yes, I reported a great many.

16,450. Were non-union people and their families the subject of insult or injury in any way at that time?—Yes, to the very utmost.

16,451. Were they hooted?—Yes, they were.

16,452. Were stones thrown at them?—There were stones thrown in a great many instances.

16,453. When they were seen leaving their houses?—Going to and from their work. There was one place in particular, the "Windmill," where the union club-house is. Police-constable Alcock used to bring them down as low as there, and I met them there and took them home. I lived in a house, almost the centre of a row, under Messrs. Knowles and Son, and all the way coming by there a great many of the factory people stopped till they got a hundred or so together, and then shouted and made a great annoyance as they passed by. It was night and day continually.

16,454. How long did this go on?—I have no exact date, but I should say it would be five months altogether.

16,455. While the strike was going on?—While the strike was going on. There was one instance while I was in Pendlebury. A young lad was summoned for annoying in company with others. There were about 20 or 30 lads that had got tin cans, and they were shouting and ringing them close into the fresh comers ears, and a lot of the union men that I knew were union men were standing a short distance off and harrying them on and saying, "Go it, lads! Give it 'em!"

16,456. What month was it when that took place?—I think it would be in December.

16,457. In December last?—In December last.

16,458. (*Mr. Chance.*) Is it all quiet now?—Yes, it is all quiet and peaceable now.

The witness withdrew.

Joseph Robinson, jun., sworn and examined.

16,459. (*Mr. Barstow.*) Did you come into the employment of Messrs. Knowles at the end of last year?—Yes.

16,460. Do you remember at what time you came?—No, I do not.

16,461. You came here from Bilston I believe?—Yes.

16,462. Do you remember of being assaulted on the 9th of February last?—Yes.

16,463. Was that at Clifton?—That was at Clifton Moss.

16,464. Just tell us what happened to you.—I was going home on the Saturday night and I was met by four or five young men in a field, and they asked me if I was a "knobstick." I told them I did not know what they meant by that. They said, "Are you in the union?" I said, "No;" so I was struck by one of them. I started to run and I was met by another or two. I could not see, and it was dark. I was knocked down and kicked and jumped on scandalous.

16,465. I believe a man named Wolstenholme was apprehended?—I cannot say. I could not tell any of them; it was dark.

16,466. Was not a man prosecuted?—Not that I know of.

16,467. Was no one taken up in consequence of that assault?—No.

16,468. Were you assaulted at any other time?—I was insulted one Sunday at home by having the window smashed by a lot of them.

16,469. Where were you living at that time?—At Clifton Moss.

16,470. Did your house face the street?—Yes, it was going up to the pit where I worked.

16,471. Were you in the house at the time?—I was in my house washing myself when there came a party to the door.

16,472. Of about how many did the party consist?—I think seven or eight of them came at first, and there were two that lodged with me standing at the door when they came.

16,473. That is to say, two of Mr. Knowles's new hands?—They were working for Mr. Knowles, and were lodging with me. They began to talk to them and question them, and asked if they would join the union, and go and leave Mr. Knowles, and they would find them work; and they told them it would not do for them, they were in a strange country. So then there came another lot up, and when this t'other lot came up, one that lodges with me, John Barnett, said, "I will go and put my jacket on;" and then they struck him and knocked him in the house, and the row began then. One of those union men began.

16,474. Barnett was standing at your door?—Yes.

16,475. Did the men strike him?—Yes, the men struck him.

16,476. And they knocked him down?—Yes, they knocked him down. My door was shut, and there came a great thump at the window and smashed that other pane.

16,477. Did you pull Barnett into the house?—They knocked him into the house, and then I shut the door, and then they began to break the windows. My child was sat in her little chair before the window, and I picked the child up to take it out of the way, so that I could not see who they were.

16,478. How many windows did they smash?—I should say they smashed about eight or ten windows.

16,479. Do you not know a man of the name of Wolstenholme at all?—I do not.

16,480. Have you never appeared against him?—No.

16,481. Did you ever go before the magistrates?—No.

16,482. Did you give information to the police about breaking your windows?—Yes, the police came out. I was taken ill down the pit on the Friday night, and I was bad, otherwise I should have appeared before the magistrates on Saturday.

FOURTEENTH DAY.

J. Robinson, jun.

20 Sept. 1867.

16,483. Some proceedings were taken then?—Yes.

16,484. Do you know what was done to the men?—I believe some of them went to Stafford, but I am not sure.

16,485. It would not be to Stafford; but they went to prison, you say. Do you know who they were?—No, I do not; I did not stop long after.

16,486. Then it is not correct to say that anyone was punished for assaulting you?—No.

16,487. Are those two cases of which you have told us, when you were assaulted by those four or five young men in the fields and when you had your windows smashed, the only times when any violence has been offered to you?—Yes, I have been threatened several times going home; they have shouted "knobstick," and threatened me.

16,488. I suppose that all the new hands were shouted at and threatened?—Yes, when they were coming for their reckoning, they were called it then.

16,489. (*Chairman.*) Where are you working now?—I am working at Bilston.

16,490. Is that in Staffordshire?—Yes.

16,491. Then had you to leave your work here in consequence of the way in which you were treated?—Yes, I did not like to stop; I was frightened to stop.

16,492. You have a family, have you not?—Yes.

16,493. How many children have you?—One child.

16,494. And you were frightened and went back to Bilston?—Yes.

16,495. Were those men punished for an assault on you or upon your father?—One was punished for an assault upon my father.

16,496. Was anybody punished for the assault upon you?—No.

16,497. Then what you mentioned about a person being punished was for an assault upon your father?—Yes.

16,498. When was your father assaulted?—Not at the same time that I was.

16,499. Do you remember when it was?—No, I do not; it was on a Saturday that he was struck, but I do not know when it was.

16,500. And it was for that that the man was punished?—Yes.

The witness withdrew.

J. Robinson, sen.

JOSEPH ROBINSON, sen., sworn and examined.

16,501. (*Mr. Chance.*) Are you a collier working for Messrs. Knowles?—Yes.

16,502. Did you come into their employment in the November of last year?—Yes.

16,503. Where did you come from?—I come from Bilston in Staffordshire now.

16,504. When you came to Pendlebury were you called "knobstick?"—Yes.

16,505. Were you often called "knobstick?"—No, not very often.

16,506. Did a good many people call you "knobstick?"—We were never called "knobsticks" in our own country till we came over here.

16,507. Were you never called a "knobstick" until you came to Pendlebury?—No.

16,508. Were you ever assaulted or beaten at Pendlebury?—I went to Pendlebury to reckon under Messrs. Knowles, and I was going back to my home where I lived, and as I was going by the "Robin Hood" door, six or seven men stood there, and they said, "Knobstick! knobstick!" I passed on, me and my "missus," and I got a little boy in my hand. As I was going up the road a little higher I met a man coming down as I was going up, and he up with his fist and knocked me down, and knocked down the little boy, and before I could gather myself up he ran away. These men would not let me go into the house after him, and some little boy said, "It was Wolstenholme that knocked that old man down;" so I walked my way home and fetched a summons against Wolstenholme, and I found he was the right man and he suffered for it.

16,509. How far was it from the "Robin Hood" to where those men struck you?—I suppose 20 or 30 yards.

16,510. Did they all seem to be of the same party?—Yes.

16,511. Were you ever at any other time ill-treated?—No, I was never insulted at any other time, nor have I been insulted since; they have baa'd at me as I was going by.

16,512. Where are you working now?—In Staffordshire.

16,513. What made you leave Pendlebury?—Well, I was working at Moss; I was not working at Pendlebury.

16,514. But you were working for Messrs. Knowles?—Yes. It is nearly all lamp work here; in our country we work by candles, and I am getting an old man and the lamps hurt my eyes.

16,515. You did not leave because you were called a "knobstick" and beaten?—No.

16,516. You did not care about it?—No.

The witness withdrew.

H. Jones.

HENRY JONES sworn and examined.

16,517. (*Chairman.*) Are you a miner?—Yes.

16,518. Did you work for Messrs. Knowles?—Yes.

16,519. Are you working for them now?—Yes.

16,520. You do not belong to the union, I suppose?—No, I do not.

16,521. In February last were you attacked by anybody?—Yes.

16,522. Who attacked you?—Well, I could not say.

16,523. But how many men?—I could not tell you how many men there were.

16,524. Were there more than three or four?—I could not tell you how many there were.

16,525. But were there more than one?—Yes, there was more than one.

16,526. Were there more than two?—I could not say how many there were.

16,527. Were there so many that you could not count them?—I did not see them.

16,528. Tell me what happened to you?—I was going out of my house No. 6 on the Clifton Moss into the next door.

16,529. What time in the evening was it?—It was near upon 12 o'clock I should think; I was knocked down and knocked senseless. I could not tell who did it.

16,530. Where were you hit?—I was cut under the eye.

16,531. With what?—I could not tell; I was knocked down senseless. I could not see who did it.

16,532. But did you gather from the nature of the blow what it was?—I should think myself it was a kick.

16,533. But they could not kick you in the eye?—I think it was a kick.

16,534. Anything may have happened to you after you were knocked down, but do you remember where the blow was or what it was by which you were knocked down?—I could not tell whether it was a fist or a stick; it was dark.

16,535. Well, it hit you in the eye?—I was caught in the eye the first time, and I never remembered anything besides.

16,536. You only remember the blow coming upon your eye, but whether it was a stick or a fist you do not know?—No, I was insensible; I could not tell anything about it afterwards.

16,537. When you came to your senses where were you?—They had brought me into my own house then.

16,538. It was quite dark?—Yes.

16,539. Were some of the men caught running away ?—Yes.

16,540. I believe they were afterwards sent for trial, were they not ?—Yes.

16,541. Were they found guilty and punished ?—Yes.

16,542. What did they get ?—They had 12 months I believe.

16,543. How many of them ?—Two of them.

16,544. And they were sent for trial for this assault upon you ?—Yes.

16,545. Were they unionists ?—Yes.

16,546. Are you working for Mr. Knowles now ?—Yes.

16,547. We understand there were some new hands obtained when the other men struck ; were you one of the new hands ?—Yes, I was one of the first lot that worked for Mr. Knowles up there. I was one of the new hands that went after the strike.

16,548. Where did you come from ?—From Bilston.

16,549. In Staffordshire ?—Yes.

16,550. Were the new hands who came hooted at ?—Yes, and they were called "knobsticks," and such as that ; and baa'd at, and such as that.

16,551. And were stones thrown at them ?—Well, they never threw any at me any more than that night, you know.

The witness withdrew.

JOHN BARNETT sworn and examined.

J. Barnett.

16,552. (*Mr. Barstow.*) Are you a member of any union ?—No.

16,553. Did you come to work for Mr. Knowles at the end of last year ?—Yes.

16,554. Did you come from Bilston ?—Yes.

16,555. After you came here were you hooted at and subjected to insult by the union men ?—Yes.

16,556. Do you remember standing at Robinson's door one Sunday ?—Yes.

16,557. What happened to you then ?—Well, we stood there talking and there came about six or seven men up.

16,558. What men ?—Well, colliers.

16,559. Were they men who were working, or men who were out on strike ?—Well, I believe they were men who were out.

16,560. What did they say to you ?—They came up and said, "There is a lot of fine scamps there ;" and I said to them, "You had better go on about your "business ; we will not have anything at all to say to "you." They said, "Can't men speak ?" and I said, "Yes, you can speak if you like." I did not say any more then.

16,561. What happened to you ?—Well, they stood about the door talking, and they came a bit closer to the door and began to talk about a knobstick and working for Mr. Knowles, and asked me if we would leave him and they would find me a better place if we would join the union and go with them ; and some of them were going to ask the reason why we sent coal up into our country while we were out there for wages. I was in my shirt sleeves at the door and it was rather cold, and I said I would go into the house to put my jacket on, and as I turned one man struck at me and knocked me down and knocked me into the house.

16,562. He struck you with his fist ?—Yes.

16,563. Did anything happen after that ?—Yes, they threw great stones.

16,564. Was the door shut then ?—The door was shut and locked.

16,565. Did the men try to enter the house after you ?—Yes.

16,566. And you and the people who were with you shut the door ?—Yes.

16,567. Then what happened after that ?—They began to throw stones ; they had their pockets full of stones.

16,568. Did you see them take the stones out of their pockets ?—Yes.

16,569. They had come prepared in fact ?—Yes.

16,570. They broke the windows I believe ?—Yes.

16,571. Were any of those men taken ?—Well, I believe some were taken for it.

16,572. Do you know whether a man named Richard Howarth was taken ?—Yes.

16,573. Was he one of that party ?—I cannot say.

16,574. Did you appear against him ?—I was here, but I could not swear to him.

16,575. He was sworn to by somebody who was there ?—Yes, he was sworn to by somebody who was there.

16,576. What was done to him ?—Well, I believe he had 12 months, but I am not certain.

16,577. Were you assaulted on any other occasion ?—Well, no more than shouting "baa" to us, and "knobstick," as we walked up the road.

16,578. You were never struck ?—No.

16,579. Nor were you windows broken, nor anything of that sort ?—Not afterwards.

The witness withdrew.

MATTHEW BOWLING sworn and examined.

M. Bowling.

16,580. (*Mr. Chance.*) Do you work for Messrs. Knowles ?—No, I work for Mr. Henry Hannan, Pendlebury Mills.

16,581. You are not a collier ?—No.

16,582. Do you remember the strike amongst the colliers at Messrs. Knowles' last year ?—Yes.

16,583. It was the latter end of last year, was it not ?—It was.

16,584. Do you remember walking one day in December and being attacked by some men ?—Yes, it was at the night part.

16,585. Where were you going to ?—I was making my way home to Pendlebury Mills, coming down from Manchester here.

16,586. How many men attacked you ?—To tell you true I cannot. It was dark at night, and I being a stranger, I could not tell you how many it was, for I was knocked down at once.

16,587. Were there more than one ?—Yes, there was a crowd of them.

16,588. Was anything said to you before they attacked you ?—I said to them when they started of me I was not a collier nor yet a knobstick ; I was working for Mr. Henry Hannan ; and they called me a "bloody knobstick" then and knocked me down.

16,589. Did you say this to them before they struck you ?—Yes, I did.

16,590. Then had they called you a "knobstick" before they struck you ?—No, I received a blow before that.

16,591. And then it was that you told them that you were not a "knobstick ?"—Yes, I told them that I was not a "knobstick," that I worked for Mr. Henry Hannan as a labouring man.

16,592. And then you say they knocked you down, as I understand ?—Yes, they knocked me down and left me for dead in the lane.

16,593. Did they say anything to you before they struck you again ?—Not to my recollection ; nothing more than a "bloody knobstick."

16,594. But did they say they did not believe you ?—No, they did not.

16,595. Then you did not call them any names ?—No.

16,596. Do you know any reason why they should have struck you ?—I do not know. I was innocent enough, I was innocent as a child amongst them.

FOURTEENTH DAY.

M. Bowling.

20 Sept. 1867.

16,597. Do you suppose that they mistook you for a non-union man?—They did I believe.

16,598. Were you very much injured?—Yes, very much.

16,599. Whereabouts did they strike you?—I had this ear split open and my skull knocked in, and this cheek bone broke, and this lip cut open and laid on my chin, and this side kicked through.

16,600. Do you know what it was they struck you with?—No, I do not.

16,601. Was it with something hard?—With something harder than their fists.

16,602. Not their fists?—No.

16,603. You were afterwards in the infirmary, were you not?—No, I was under Dr. Martin.

16,604. Were you then taken home?—Two parties came and took me home; I did not know who they were and I have never learned that since.

16,605. Did they kick you while you were down on the ground?—They must have done, by the wounds I had on me.

16,606. And how long was it before you recovered?—I was a fortnight at home, and when I went to work I was hardly fit to go; but they wanted me to go, and I did go. I shall never recover it altogether as long as I live.

16,607. Do you feel the effects of it still?—Yes.

The witness withdrew.

T. Halliday.

THOMAS HALLIDAY sworn and examined.

16,608. (*Chairman.*) What is your business?—Well, my "missus" is in business. Of course I am a collier's agent. My "missus" looks after a little shop, by the way.

16,609. Where do you live, then?—At Little Lever, near Bolton.

16,610. Then she looks after the shop, and you are a colliery agent?—Yes.

16,611. Is there a colliers' association there?—Yes.

16,612. A union club, I suppose?—Yes.

16,613. What is your office?—I will explain. My office is to do whatever the miners require to be done while they are at work.

16,614. Is there a president?—Yes.

16,615. Who is the present president?—The man that has been the president from the time it was originated, on the 17th of August 1863.

16,616. What is his name?—His name is John Worrall, of Clifton.

16,617. Is he a miner?—He is now a miner.

16,618. Have you a secretary?—Yes.

16,619. Who is he?—Moses Cotton. He has been the secretary also from the commencement.

16,620. Were you an officer from the first?—I have been an agent from September following August, that is from a month after the origination of the association until now.

16,621. Are you vice-president or treasurer, or anything of that sort?—No, I am agent; but since that time I have been made treasurer.

16,622. When were you made treasurer?—In December, or about the December quarter in 1863.

16,623. Where do you hold your meetings?—We meet in what we consider a delegates' meeting, of a representative from each colliery, or what is known to be a lodge, every fortnight.

16,624. Where do you meet?—At the Church Inn, Farmworth, known more generally as H Wood.

16,625. How far is that from here?—Eight miles, I believe, from this place.

16,626. That, you say, is a meeting of the delegates from the lodges?—Yes.

16,627. Where have you your lodges?—At various places behind Bolton; Little Hulton, Pendlebury, Clifton, Kearsley, Outwood, Ratcliffe, Bury, Bagslet, Littleborough, Shaw, and so on right through the whole district. We include all that.

16,628. All over Lancashire?—No, to Shaw near Oldham we extend; Littleborough, and Pendlebury, and all intermediate places.

16,629. This district which you describe has an ambit of how much round Manchester?—It does not come this side of Manchester at all; it is on the north-east and north-western side of Manchester.

16.630. There is a lodge in each district, and the delegates from each lodge meet every fortnight, do they?—Yes; for instance, it will be the fornightly meeting next Monday.

16,631. Does each lodge send one delegate, or more?—Each lodge sends one delegate only.

16,632. How many delegates have you?—I think we have now since the dispute one or two less than we had at that time. We have perhaps 48 now.

16,633. You had 50 then?—Yes, 50, 51, or 52.

16,634. Then you 48 meet; and do you pass resolutions that are binding upon all the lodges?—Clearly; at least they pass resolutions which go before the lodges again, and then they become binding.

16,635. Then has a separate lodge a power to differ from you, and not to agree to your resolutions?—They are bound by the resolutions after that are passed at the meeting.

16,636. Do those resolutions relate to such things as the wages of the men, and matters of that description?—The resolutions go through about three questions; one is for a death fund, the resolution appertains to that, the rules of which are registered under Government.

16,637. Under the Friendly Societies' Act, I suppose?—Yes; and also to ascertain in case of dispute for lodges where accidents arise. Of course lodges have the management of their own funds. The districts do not do anything with that, only if a dispute arises they all come down to the district meeting for their opinion, and are ruled to a certain extent by that.

16,638. Then there are accidents?—Yes.

16,639. Is there anything else?—Yes, the third point is looking after the protection of the wages of the men, and also, I ought to say, to look after better enactments of law at London, such as looking after better ventilation, &c., and also to attend in such a case as you yourself were in at Liverpool, where there was a compensation for a poor widow, who, very fortunately for her, got 300*l.* damages.

16,639*a*. That is an action?—Yes. Resolutions as to such cases as these are passed at a district meeting.

16,640. How much is the subscription?—Usually our weekly subscription, when there is no dispute and when all is going on right, is 6*d.* per week per full member. We have full members, and we arrange down according to age till they come to be considered to be a quarter of a member, that is, to pick up the boys; for instance, to the age of 18 a person is considered to be a full man; at the age of 16 he is considered to be three-quarters of man; at the age of 12 he is considered to be half a man; down to 10, where the law allows, he is considered to be a quarter of a man.

16,641. And the contribution is regulated accordingly?—Yes, out of the 6*d.* one penny per week goes to the funeral funds (that is 1*s.* per quarter), 2*d.* for accident, and 3*d.* for what is known to be the union fund proper, as masters understand the union.

16,642. How much per week does that make altogether for the full man?—6*d.*

16,643. That money being subscribed, is it paid to the treasurer of each lodge?—Yes, to the treasurer and secretary of each lodge.

16,644. And each lodge has the disposition of its funds?—Yes, with its committee and members. The members meet every fortnight to understand what is going on.

16,645. In case of a strike do you get the money from the collective funds of all the lodges?—I said a short time ago that there was a fortnightly meeting; 3*d.* out of that 6*d.* comes to this fortnightly gathering,

and there is a treasurer and a secretary appointed to receive those moneys which are remitted to their lodges by members, and keep them and appropriate them rightly according to their rules.

16,646. But suppose there is a society in need of money, independent of the district, do the remaining 47 lodges subscribe?—Clearly, if it is required. There is just one point, if you will allow me to explain it. Where strikes do take place they are after no other thing can be done. For instance, that is my occupation; if a master shall attempt to reduce the wages, of which he gives notice, I am appointed by the men to go and see to that matter, to reason the matter over, hear the masters' side of the question and report thereon.

16,647. And do you lecture both the men and the master?—Sometimes I do; I lecture about various things; I have the pleasure to do so, I am glad to say.

16,648. Very effectively, I daresay. Supposing this strike takes place, you, as the agent, give the information at the meeting of the delegates, and then the amount of money comes from the general fund belonging to the 48 lodges?—There is a link between that. Before a strike, as it is understood, can possibly take place, the men say that they are going to be reduced. I am appointed to go and see the master and ascertain from him why that is. I report to the delegates and say that the reason is so and so. It may be because he is out-competed by somebody else. I state the matter; they look it broadly in the face, and then they come to the conclusion whether it shall be so or not, and if the members say it shall be supported, if there are not sufficient funds, a levy is put on to meet the case.

16,649. Each of the lodges?—Each of the lodges.

16,650. You having explained no doubt in detail the case to the delegates?—Clearly the masters' side; the men know their own.

16,651. Do you remember the strike at Messrs. Knowles's?—Yes, I recollect both.

16,652. In the strike which took place in November last year, did you go to him to try and explain your views?—I will tell you that——

16,653. Do not give me too long a lecture?—I vouch I will not lecture; but there are thousands of pounds hanging upon this question. Mr. Knowles has in his mind that which perhaps other masters have, that the union is intended to do him an injury instead of being a good to the men only and the masters jointly. That being so, before you, the Commissioners, I want to be able to have this matter thoroughly set out——

16,654. We have our own manner of proceedings here. You must answer the questions, if you please, because the time will not allow us to hear a declaration upon the subject. Did you go to Mr. Knowles upon the subject; you may say yes or no to that surely?—I went after he had locked out some 500 men to Andrew Knowles, John Knowles's brother, in Market Street (no, they had removed to King Street I believe at the time), to ask him if I could have an interview with him. He said, "No." I told him certain parties were locked out, and I wished to talk to him about it, and he would not hear me, so I withdrew and thanked him.

16,655. Do you as an active member take measures to persuade colliers to belong to your union?—I only persuade sometimes; I do if I can get the chance to persuade them. As I have done in the past, I very likely might do again, provided they were men that were worthy to be invited at all.

16,656. And the funds are merely distributed for the reasons you have mentioned?—Clearly, only that.

16,657. That means of course that you have never known of any distribution of funds for any improper purposes?—Just so.

16,658. That you mean to say?—Yes.

16,659. And you do say it?—Yes.

16,660. And I suppose you keep accurate accounts of how the money has been distributed?—Yes, actual accounts.

16,661. Who keeps the books?—I am appointed treasurer, as I told you. I only received them the night before last, and I have brought them, and the secretary has brought his also.

16,662. Who enters the cash payments?—The secretary.

16,663. What do you enter?—I enter the receipts what I receive from the secretary, and assist the secretary as it comes in.

16,664. When there is a vote for expenditure whose is the hand which pays it, the treasurer's or the secretary's?—Mine is the hand which pays it. I ought to say this: that what documents come into the district meeting the president will have his eye upon, and then it may be that the secretary would pay that and hand over the balance, but usually I pay the money.

16,665. You receive the money from the secretary?—Yes, except sums which are paid at the district meeting only.

16,666. You pay the money and it is the duty of the secretary to enter the items in a book?—Just so.

16,667. What is the utmost amount you have know as a levy to pay for a strike?—I will change the phrase. We have not had what is considered a "strike;" we have had a "lock-out." I changed the phrase because I consider it was a better one.

16,668. You mean by a "lock-out" the same thing as I mean by a "strike?"—Yes; it is a "lock-out" first, and the world ought to know this, that Knowles locked out 500 men at Lever and Ratcliffe, and afterwards we gave to the men the open chance of declaring that they were union men and of being so. We let Knowles take their own course, and in this case we have paid as much as 5*s.* per fortnight to meet the demands of the men.

16,669. That is an answer to the question. You have paid 5*s.* per fortnight, you say?—Yes.

16,670. Each member?—Each full working member, excepting they are sick.

16,671. Each full working member in health and gaining his wages has paid as much as 5*s.* fortnightly for the support of what I call a "strike," and you call a "lock-out?"—Yes.

16,672. Have you any communication with other colliers' associations throughout the kingdom beyond this district?—We have what is said to be a national association of coal miners.

16,673. Does that extend all over the kingdom?—It is considered so.

16,674. Do you take in from Northumberland to Cornwall?—No, we do not go as far as Cornwall; the furthest place is in Staffordshire, some miles from Bilston.

16,675. How far north do you go?—To Northumberland, and there are some few in Scotland.

16,676. I suppose you are the important man on that association?—If there is any importance about it at all, very likely I may be one.

16,677. Do you send round and communicate with them in the case of any strike or want of money?—I ought to say that there are no thorough arrangements about any strike. There is no strike proper.

16,678. But you send round and get something?—We send round and beg.

16,679. And sometimes you get something?—Not always I am sorry to say. Sometimes we get something, and sometimes not. According to our success in begging we should have to pay.

16,680. Do you go round to different mills and places to beg?—In the case of the late lock-out we found that our money would not enable us to go on and pay the people. A man with a family of children cannot live on 9*s.* a week or anything like it, and in that case they requested that the committee would allow them to go and get money from the people who were prepared to give 1*s.* a head for the children. That has been done not only in the latter but in the former lock-out.

16,681. Where do you go?—We go to the mills; we have not gone to the collieries. A common man, or shopkeeper, or anyone is at liberty to give.

FOURTEENTH DAY.

T. Halliday.

20 Sept. 1867.

16,682. You go and ask them to give to your national association?—No, that is a district affair. The national association is supported by the 1*d.* a week from men that belong to it mainly.

16,683. In addition to the 6*d.*?—No, that goes out of the 6*d.*; that is what is said to be the union money, the 3*d.* per week.

16,684. How is the money for the national association distributed?—For instance, we are now trying to get certain measures in the House of Commons. There has been a committee appointed, and I believe they have now concluded their examination and have tendered their report for getting an amendment of the Mines Inspection Act. We may be seeking compensation or various other things. The money is applied for those purposes only.

16,685. Only for general public purposes?—For general public natural purposes.

16,686. For getting any alteration of the law which you think desirable, or anything of that sort?—Yes, or finding the widow the means to pursue the employers in case of a breach of the Act. These are some of the purposes in that national movement.

16,687. I suppose you go about and hear what takes place, at all events, in this district?—Yes, I go about a good deal, sometimes more than I like, because I feel so tired.

16,688. I suppose you have heard of disturbances consequent upon strikes?—I do not know that I hear very much about disturbances.

16,689. We have had evidence to-day about assaults and other matters taking place in Pendlebury. I am not suggesting that you are in any way connected with them, but you have heard of them, no doubt?—I understand you. I have heard them. There is one which I had not heard of; there are only two that I have heard of. I have heard of the boilers and of the conflagration, and also of the Pendlebury Moss concern.

16,690. Have you taken any means, by lecturing or otherwise, to raise a different tone of feeling. Supposing the union men were calling men "knobsticks," or assaulting them, what have you done to prevent that?—I have had meetings in the various localities, and have exhorted the people to keep within the bounds of the law, because it would answer our ends better by far than any other course that they might possibly take. It would damage our reputation, and we have been seeking for these four years to gain a reputation for good conduct.

16,691. No doubt you have heard of conduct of that sort of which you disapprove taking place in this Pendlebury district?—I have heard of those two cases; the last case I never heard anything about.

16,692. But you have heard about the fire?—Oh, yes, and I was sorry to hear of it.

16,693. You heard that it was attributed to the union?—Speaking truthfully I had not heard that it had been attributed before this day to the miners' union. It did occur to me that another thing might have been attributed to us, and that was a boiler which unfortunately exploded at Ringley. I was sorry for that, because it was a destruction of property.

16,694. Have you heard of violent assaults being made, and of men being taken up and sentenced to imprisonment for them, which were connected so far with the union that the word "knobstick" was used against the men that were assaulted?—Yes, I have heard of that.

16,695. No doubt that was a source of grief to you?—It always is.

16,696. And you have done your best to discourage all these things?—I have done my best and shall do so, so long as I shall continue where I am, and when I cannot do that of course I had better go to my pick again, from whence I came.

16,697. Do your men interfere in any way, so far as you know, with men who are not unionists being employed by masters?—Perhaps I had better mention one thing, that there are some men who believe in having the advantages of a union, but who do not want to pay anything. There are some who believe in drawing but not in paying, and they are persons generally that do not attend to their work in working days it may be, but who stop off drinking for days, and after doing that they desire to do just as they please. They think folk must stand back while they have the benefit of their streugth and all that, and other people complain about such things as these——

16,698. That is not an answer to the question I put to you. I ask whether any of your men take active measures against non-unionist men who are employed by masters?—They ask them to join the union.

16,699. Do they picket them?—No, we need no picketing, because men can get work as they are, only not so well, only in so large an affair as Knowles's lock-out.

16,700. Is the trade pretty good in the colliery business?—In the summer time it is not so brisk as it is in the winter; in the summer it was brisker than usual, and would have been much more brisk only for the depression in the cotton trade.

16,701. Do you know whether Mr. Knowles's men were picketed by the union men?—In the sense that I have read in the paper lately about picketing I do not know that they have been picketed at all.

16,702. Would a matter of that sort be brought before your meeting?—If there had been pickets appointed to go to places during that lock-out we should have heard something about it.

16,703. Do you ever remember pickets to have been appointed on any occasion?—On one occasion only, and I will explain the occasion. When the lock-out had commenced at Lever and Ratcliffe——

16,704. Mr. Knowles's?—Yes, Mr. Knowles's. In that district the miners were prepared to accept of the consequences. The other men who were in, whom Knowles did not know anything about, when they found that they would be able to find money to support those persons, provided Knowles did lock them out, then appointed on a certain evening, when there was a meeting, a deputation to wait on the lodges (this is the only case) to tell them they were at liberty to acknowledge their connexion with the union.

16,705. Did they use any other sort of persuasion besides that?—Not at all.

16,706. Were there no threats of any kind?—No threats. No complaints did we hear about what was done at all, and nothing at that time I believe is reported as being wrong. That is the only time, and it is the truth; in fact, I believe you believe me.

16,707. You have all your books, you say, up to the time it commenced in 1863?—Yes, from our commencement up to this moment.

16,708. And you have the same books now that you had when you first went in in September 1863?—Yes.

16,709. Are all the entries the same now as they were?—They are the same now as they were; they have not been re-entered.

16,710. I mean, have there been no alterations?—There have been no alterations in the entries.

16,711. Nor as far as you know in the other books?—No. Of course we vouch for all being straight like that, and give you the keys to get at the boxes, and anything you desire as Commissioners. We have the books there, and they are open for your supervision.

16,712. We understand that as many as 1,400 men left Mr. Knowles's. Was the subject of their leaving discussed before it took place at your lodge?—Not before Knowles had locked out some 500.

16,713. But the 500 joined the union, and that was the reason?—But there were other men belonging to the union at the time.

16,714. There might be one or two men belonging to the union working with Mr. Knowles whom he did not know belonged to the union. Several men (say 500 if you like) suddenly left and belonged to the union. Was the fact of their coming to you known and discussed at your meeting before it happened?—There was more than 500 belonged to us.

16,715. But there were but a very few at first, and then suddenly about 500 left him. Was it known to

you beforehand that they were going to leave him and going to belong to you?—There is just a word there which is not exactly right; that is, you say some few belonged to the union—a large number belonged to the union, not less perhaps than 600 or 700 persons.

16,716. Unknown to him?—Unknown to him.

16,717. But I suppose it was very well known among you that Mr. Knowles professed not to take union men?—It was known to us that he had taken men from other collieries without putting the question to them whether they were union men or not.

16,718. But before this lock-out took place was it well known that Mr. Knowles did not employ union men?—It was well known that they said they would not employ union men.

16,719. There may have been a great many, such as you say, 500 men, but he did not know that they were union men?—Just so, and I believe it will be so in the future also.

16,720. Then will you swear that those 500 men were union men; of course you must have known it?—Yes.

16,721. And you also knew that it was unknown to Mr. Knowles?—I knew that it was unknown to Mr. Knowles.

16,722. Then did you know that anything was going to take place with regard to the lock-out before it did take place?—No, not before it commenced, not at all.

16,723. Then did you support the 1,400 men during the six months?—Yes, with the help we received. We paid the men as well as we could.

16,724. May I ask what it cost you in round numbers?—I said to the president since I came here, "Have you reckoned what that lock-out cost us?"

16,725. Was it as much as 4,000*l.*?—I believe it cost us four times 4,000*l.*, as much as 16,000*l.* I will not be sure because we have not the minutes here. I mean in the former and the latter lock-outs.

16,726. The full men, and the half men, and the quarter men?—Yes, in the former and the latter lock-outs.

16,727. You, I suppose, have no ninth part of a man?—I think that would be going down a little too close. I would not like to be nice upon that point. If I had more time I would have been ready, because it would have been a feature which I should like to have given to the world.

16,728. Then you say that when the lock-out began there were 500 or 600 union men there unknown to Mr. Knowles?—Yes.

16,729. What led to that?—I ought to say that we had had excursions to Hollingworth, close by——

16,730. It is scarcely necessary to go into all this.—This will lead to the point in a moment.

16,731. If it will lead to the point in a moment, I shall be very glad, but be as short as you fairly can.—I will. They were told they were to go. Some men went to this place and some went home, and the underlooker was sent, or said he was sent, to ascertain who were union men and who were not. Some men said they were union men, and some men would not say, and they were discharged for it.

16,732. That was the beginning of it?—That was the beginning of it.

16,733. Did the men against Mr. Knowles's order leave their work to go to this excursion?—No, that was not in connexion with it; but those things caused the manager under Knowles afterwards to make inquiries.

16,734. And then he found out upon inquiry that some of the men were union men?—Yes.

16,735. And then he discharged those men?—They were discharged.

16,736. Did the other men deny it?—The other men acknowledged that they were union men, and he dismissed them also.

16,737. Did the men who went to Hollingworth have Knowles's permission to go there?—They went after they had done their work; in the afterpart of the day.

16,738. (*Mr. Chance.*) It was first a lock-out, and then a strike?—Yes; we allowed the men to acknowledge their connexion with us, and we found what support we could for them while they were out of work.

16,739. (*Chairman.*) What led you to make inquiries whether they were union men or not?—Some of the men complained to me beforehand of the extortionate charges of the underlookers for powder and candles and things of that sort, they being above the average price for the candles, which the underlookers expect them to purchase from the place; that is the point.

16,740. I do not understand you at all. What made the underlooker inquire whether the men belonged to the union or not?—I am not prepared to say. I cannot tell. I had nothing to do with it.

16,741. You told us a story about an excursion to Hollingsworth, and you said it would explain the whole thing; now we are further than ever from that. What has the excursion to Hollingsworth to do with the underlooker making his inquiries?—The excursion to Hollingsworth was prohibited, and yet some of the men went there; but these men had complained also about having to pay extortionate prices for their candles and things of that sort.

16,742. Was it because of their going in spite of your prohibition, and having also complained of other things, that the underlooker made inquiries whether they were union men or not?—I cannot say.

16,743. Was it a union excursion?—Yes.

16,744. If they went in spite of Mr. Knowles' prohibition I can understand why the underlooker inquired whether they were union men?—The body of the men did not go.

16,745. Listen to the questions, and answer them, as we have been very patient with you. What I ask you is this: you say that this was a union excursion, and Mr. Knowles prohibited his men from going?—Yes.

16,746. Is it because some of the men went in spite of that prohibition upon this excursion that the underlooker inquired of them whether they belonged to the union?—I cannot say; it will have to be a surmise; the underlooker has not told me so.

16,747. (*Mr. Barstow.*) If these men went out of working hours how would it be known to Messrs. Knowles?—Because the question was put to them, "Were you at Hollingsworth yesterday?"

16,748. Are you quite sure that these men went after working hours?—The party I refer to went after working hours.

16,749. Are you quite sure that Messrs. Knowles's men went after working hours, or did they leave their work to go to Hollingsworth?—They dared not leave their work.

16,750. Are you sure they did not leave their work to go to Hollingsworth?—They went after they had done, at noon.

16,751. Can you tell me of your own knowledge that the men did not leave their work at Messrs. Knowles's to go to Hollingsworth?—Of course they left in the afterpart of the day.

16,752. They left their work?—Yes.

16,753. I asked that question before. The men left their work without Messrs. Knowles's permission to go to Hollingsworth, and the inquiry of this man was, it being union holiday, whether they went to Hollingsworth, and upon that I suppose Mr. Knowles discharged the men who had left his employ?—They were not discharged then, it was two months after.

16,754. Did an inquiry take place?—I do not know.

16,755. I thought you said so?—No. After they had come back from Hollingsworth these things were going on in the underlookers' minds for sometime before they acted.

16,756. But the question is, whether you know the origin of the strike or lock out, whatever it was?—No, I do not know the true origin, it is only a conjecture.

The witness withdrew.

FOURTEENTH DAY.

M. Cotton.

20 Sept. 1867.

Moses Cotton sworn and examined.

16,757. (*Mr. Barstow.*) We understand that you are secretary to the colliers' association, and have been so ever since it was formed?—Yes.

16,758. Tell me the name of your association?—The Miners' Provident Benefit Society.

16,759. We have heard from the last witness what the objects of that society are. Do you remember a strike or lock-out at Mr. Knowles's pits last year?—Yes.

16,760. Do you remember several breaches of the law taking place during the continuance of the lock-out?—Yes, I remember them.

16,761. Do you remember several members of your union being taken before the magistrates in consequence of the breaches of the peace?—Yes.

16,762. Do you know whether those men were defended by attorney or counsel, or did anybody appear for them before the magistrates?—Not that I am aware of.

16,763. You do not know whether there was or not?—No.

16,764. Do you know whether any funds were furnished by your union for the purposes of their defence?—There was none found.

16,765. None whatever?—No.

16,766. You say for certain that no funds were found for their defence?—No.

16,767. Do you know whether any individual subscriptions were made for the purposes of their defence?—No.

16,768. You do not know whether that was so or not?—No.

16,769. You yourself did not contribute?—No.

16,770. (*Chairman.*) You have got your books, if we want to see them?—Yes.

16,771. (*Mr. Barstow.*) And they are the same books?—They are the same books; we had no other since we commenced.

16,772. And they are exactly in the same state as they have always been?—Yes.

16,773. There is nothing torn out?—No.

16,774. And no re-entries?—There are no re-entries.

16,775. (*Chairman.*) If you furnished funds for that defence would it have been your duty to have entered it in the book?—Yes.

16,776. And for what it was given?—Yes.

16,777. You give the money to the treasurer. If any money is to be paid for any purposes, does he pay it, or who pays it?—I sign a note to the treasurer for funeral money.

16,778. How do you enter it?—For whatever it is paid I enter it in full.

16,779. You do not enter it merely as cash?—No, every item for what it is paid. I have had none other book since the commencement but this (*handing in the same*).

16,780. (*Mr. Chance.*) What book do you call this?—The cash-book for the funeral fund.

16,781. And for the funeral fund only?—The funeral fund only.

16,782. (*Chairman.*) There is a large payment of 100*l.* in February of this year to the national association; how came you to pay as much as 100*l.*?—It was a levy of 3*d.* a week from all our members.

16,783. What was it for?—For any purpose that the national association wished.

16,784. How often do you pay such money as that?—Every month.

16,785. But you do not pay 100*l.* every month?—No.

16,786. For what purpose was 100*l.* demanded then?—I do not know.

16,787. It is a very large sum?—Yes.

16,788. What is the meaning of "victim members?"—It is members on strike or lock-out.

16,789. I find "victim members" in February of this year, 848*l.*; were all those members on strike?—Yes.

16,790. I find on February the 11th, "National Association 100*l.*;" and then I find February the 25th for "National levy," another 100*l.*—the same year. Have you paid 200*l.* this year to the National Association?—We have paid it.

16,791. 100*l.* twice in the same month?—Yes.

16,792. That is an enormous amount of money. ThenI find on March 25th, for "National Association levy," another 100*l.*; that is 300*l.* in less than one month. From February 11th to March the 5th there is no less than 300*l.* paid?—Yes.

16,793. Have you paid as much as that?—Yes.

16,794. How many members have you?—It was estimated at 4,000 then.

16,795. Then I find on April the 8th "National levy 100*l.*;" do you pay as much as 100*l.* a month to the National Association?—We did so then.

16,796. Why did you do so then; surely you must have some notion?—It was a levy made by the national council of so much per member.

16,797. What was it for; surely you must have some notion?—I cannot tell in what way they have distributed it, because I sit in a room by myself.

16,798. You also walk abroad and hear things; surely you can have some notion before you give a cheque for the money to go. Here are two sums of 100*l.* each in February, another sum in March of 100*l.* also, and another in April, to the National Association, that is 400*l.* in a short time this year; surely you must have some notion what it is for?—It was to support the National Association.

16,799. How did the funds go? We understand that your lodge is only one of 48; in two months 200*l.* goes, and in four months 400*l.* goes. Supposing the 48 lodges supply at the same rate it would be a very large amount?—That is the whole amount for the 48 lodges.

16,800. This is a book of the general district?—Yes, the book of the general district secretary.

16,801. This includes the whole 48 lodges?—Yes.

16,802. Is that about the rate of payment which you make per month. Do the 48 lodges supply as much as 100*l.* a month to the National Association?—We have not subscribed lately, and if you look further you will see.

16,803. You do not know what this is for at the beginning of the year; that was in February. I find also on the 14th of January 100*l.* to the National Association; then on the 11th of February another 100*l.*; on February 25th there is another 100*l.* to the National Association; and on March 11th there is another 100*l.*; on March 25th there is another 100*l.*; and on April the 8th there is another 100*l.* I do not see through May that there is a similar item. Can you give me no explanation at all why that money has been paid?—The Derbyshire men were out.

16,804. The Derbyshire men were out?—Yes.

16,805. When was that?—About that time.

16,806. And of course you suppose that the money went towards them?—Some of it would go towards them no doubt.

16,807. Was there any other strike going on at the time?—Yes, Messrs. Knowles's men were out.

16,808. Would you pay money for that?—There was a levy put on all alike.

16,809. Would the money of the National Association go to pay for the strike at Messrs. Knowles's?—Part of it; if you look at the income side you will see what we received from the National Association back.

16,810-1. Which book shall I look in?—The same cash-book.

16,812. Among the receipts?—Yes.

16,813. I see that the National Association received 270*l.* at the beginning of the year; then I find your contributions put down for your 48 lodges 675*l.* in January; that is so, is it not?—Yes, the whole of the contributions are together.

16,814. I find January the 28th, "Received 30*l.* from the National Association;" that is so?—Yes.

16,815. And February the 11th, 230*l.* received from the National Association?—Yes.

16,816. Then all this money was for the strike?—Yes.

16,817. I find as much as 400*l.* on the 25th of February from the National Association?—Yes.

16,818. Do you think that any of the expenses of defending the members of your union if they got into trouble would come out of that money?—No.

16,819. Are you quite sure of that?—Yes.

16,819*a*. It only goes to support men on strike, but not to support the men who have got into trouble?—No.

16,820. Then you never knew anything of that sort?—No.

16,821. Not for any damage done?—No, nothing of the kind.

16,822. Do you do it on your own responsibility, because we have heard of men injuring other people for not being members of the union, and being punished for it. Do your body take no notice of it?—No.

16,823. You never paid any money for anything of that sort?—No.

16,824. You seem to have received a great deal of money, for on March the 11th I find another sum of 300*l.* received from the National Association, and I find on March the 25th 287*l.* received from the National Association, and again in April the 8th 200*l.*; therefore you received more than you paid?—Yes, we have received more than we paid.

16,825. A good deal more?—Yes.

16,826. The strike ceased by May, did it not?—Yes.

16,827. It did not go on beyond that?—No.

16,828. I saw an entry of J. Lubbock's and Bury Hall's deputation to Stafford; did you send a deputation to Stafford in April last?—Yes.

16,829. What was that for?—To warn the men of what was going on.

16,830. To tell the people at Stafford that the strike was going on here?—Yes.

16,831. How many delegates did you send?—One went first.

16,832. Was that to get them to prevent their men from coming over here?—To tell the men to stop at home till things were settled quietly.

16,833. The strike seems to have cost you a good deal of money?—Yes.

16,834. (*Mr. Barstow.*) We understand that Mr. Knowles' men have gone in again now?—Yes, them that could go in.

16,835. A large proportion of them?—Yes.

16,836. About how many have gone in again?—We had only about 80 the last time I paid them any money.

16,837. They have gone in at Mr. Knowles' own terms?—Yes,

16,838. (*Chairman.*) I find your victim members, that is men on strike, going on as late as July; "Victim members 237*l.* 19*s.* 9*d.*," in July. Was the strike going on in July?—We had 160 men from Shaw, belonging to our district of Oldham; they would be included.

16,839. I find it going on in August; is there any strike now? On the 27th of August I see "victim members" down; is that the men who were in the strike before?—Yes.

16,840. Is there any strike going on now?—No.

The witness withdrew.

CHARLES MASON sworn and examined.

16,841. (*Mr. Chance.*) Are you a warper, living in Newcastle Street, Hulme?—Yes.

16,842. In November 1857 were you in the employ of Messrs. Weaver, spinners, in Jersey Street, Ancoats?—Yes.

16,843. Were you a member of any union then?—No.

16,844. Had you been at any time previous to that a member?—About three months I was a member, in the last 15 years.

16,845. Do you remember being at the Blue Bell public-house?—Yes.

16,846. Was there a man of the name of Alfred Doherty with you?—Yes.

16,847. Who was Doherty?—He is a warper.

16,848. Is he a member of the union?—Yes.

16,849. Was he at that time?—I believe he was.

16,850. Was anybody else with you at the public-house?—No; but there were two men that I observed, one the secretary of the warpers' club, in another room as I passed in; he was called Walland.

16,851. He was in the same public-house in another room?—Yes.

16,852. Do you know whom he was with?—I do not know; the other man was before the magistrates with Walland, but I forget his name.

16,853. Was his name Hewitt?—I believe that is the name.

16,854. You did not know that that was his name then?—I did not know his name then, but I knew Walland.

16,855. Did Doherty bring you a glass of ale?—He did instead of the waiter.

16,856. Did you ask for a glass of ale?—I asked for nothing, but he took me in a room where there was no one but himself and me.

16,857. Did he bring you a glass of ale?—We went into the room, and he left me alone, and went out and brought the glass of ale in.

16,858. Had you asked for any?—No.

16,859. Had any conversation taken place between you and Doherty before this?—I cannot tell you whether there was or not; he brought me out and took me down the town; he pressed me to go into the Blue Bell two hours before that, and I would not do that. This was going on 11 o'clock at night.

16,860. You refused at first, and afterwards you went in?—Yes, he pressed me all the way up, and at last I gave way and went in, and when I saw these two other men in this room, and him bringing the glass, I said "I have ordered no glass; what do you know I am drinking?" or something like that, so when the ale was brought in it was a very red coloured ale; I saw the sediment in the centre of the glass, and my suspicion was aroused, knowing I was in a bit of bother, and I threw it under the grate and put the glass down, and he followed right sharp after me.

16,861. You say there was sediment at the bottom of the glass?—No, as if something had been put in the middle of the ale.

16,862. What did it look like?—More like laudanum, or something of that sort, to stupify me. I cannot tell what it was.

16,863. It was something that aroused your suspicion?—Yes.

16,864. Did you say anything to him at the time?—No, I walked very quickly out. I said, "All right," and away I went. I got to about 100 yards from my house, and he walked and conversed with me all the way, but before I got 10 yards from the door, the other two men came out; I looked back and saw the other two men.

16,865. Walland and Hewitt?—Yes.

16,866. Did they leave the public-house soon after you?—Yes, when I came out they all followed me; they followed us out.

16,867. What took place after that?—As we went along I saw another man before I got across the street of the name of Hall. He asked me for a job on the Monday, and he ran up the entry.

16,868. Was he a warper?—Yes; he came from Chorley.

16,869. Was he a member of the union?—Yes.

16,870. Before you saw Hall had there been a whistle?—No, not till after that. I went up the top end of the other entry; he had to run from the top

FOURTEENTH DAY.

C. Mason.

20 Sept. 1867.

end of the Blue Bell end up to my corner before he met me.

16,871. You mean Hall had to run?—Yes.

16,872. Did you see him running?—He went up the entry, and when I got up into the street, Doherty was conversing with me all the time, we were talking first one thing and another respecting the club and that, and when he found I was so stubborn he gave a whistle, and a man came out of the entry and made a rush at me. He had something wrapped round his arm, and a ginger-beer bottle with the neck knocked off. So when he threw the vitriol in my eyes I said, "Good God Almighty! you have been at the bottom of this, Doherty;" and there was a lamp in the street just at the corner, so that I could see it was the same man.

16,873. You say that this man was Hall?—Yes.

16,874. John Hall?—Yes.

16,875. Do I understand you to say that before Hall came to you there was a whistle?—This man had not come out of the entry when the whistle was made.

16,876. Who gave the whistle?—Doherty.

16,877. After the whistle this man came out of the entry?—Yes; and he made a throw at me, and I bobbed down, or else I should have been blinded.

16,878. Where did you feel the vitriol?—It splashed my hat and went through my hat, running down on to my eyes.

16,879. Then you told Doherty of this?—I went into the house, and Doherty followed me in. I said, "You villain, get out, you have been at the bottom of all this; get out of my house or I will have you taken up." He asked me to open my eyes. I said, "No, you villain, get out."

16,880. Where was it that this took place?—In my own house. After a while the doctor came, Dr. Dean, and he asked if there was any cream or oil in the house; we had some cream in the house. I said, "Doctor, I must not open my eyes." He opened my eyes and put the cream into my eyes. Then a constable came in, but Doherty was gone, but next day he was apprehended, working at Eccles.

16,881. Was he taken before the magistrates?—He was taken before the magistrates, and Walland and Hall; there were four of them, and the other men and Hewitt were discharged.

16,882. Doherty, Walland, and Hewitt were taken before the magistrates with Hall?—Yes.

16,883. What took place there?—Hall and Doherty got committed.

16,884. Were they committed for the assizes at Liverpool?—Yes.

16,885. Were they afterwards committed there?—One was sentenced to four years and the other to six years. Doherty to four years, and Hall to six years.

16,886. Were your eyes injured by the vitriol being thrown upon them?—Yes, I went through an operation with Mr. Dean the year following.

16,887. In consequence of that?—Yes.

16,888. Were you prevented from attending to your work for some time in consequence?—Yes, I was about 12 months before I could do any work.

16,889. Do you know any reason at all why these men should have injured you in this way?—Yes, I learn my wife and two sisters to warp.

16,890. Was anything said to you in consequence of this?—They offered to give me money not to learn women at all.

16,891. Did they give any reason why you should not learn them?—They said it was against their rule, and they would not permit it.

16,892. Was that because they thought it would interfere with their labour?—Because they thought it would be the means of ultimately introducing women into the market, and it would reduce wages.

16,893. Was that the only reason you can assign for this injury being inflicted upon you?—That is the only reason.

16,894. Had you ever had any private quarrel with Doherty or Hall?—No, we were very particular friends; we were like brothers.

16,895. Up to that time?—Yes.

16,896. (*Chairman.*) Did you fix the date of this occurrence; you said November 1857?—The beginning of November 1857.

16,897. At that time was it unusual for women to be employed in your trade?—No. Mr. Bicton, in Mosley Street, has had women for five years, and I believe at the time he was learning women there was vitriol thrown at him.

16,898. Who was it told you that it was against their rules that women should get into your trade?—I cannot exactly point one individual out.

16,899. Did several say so?—Yes, several belonging to the union. I know there were one or two delegates waited upon me, and they told me.

16,900. Delegates had waited upon you for that purpose?—Yes.

16,901. Do you remember any of their names?—No.

16,902. How long before this happened had delegates waited upon you about it?—I daresay it would be the beginning of 1857.

16,903. They had waited upon you?—Yes, several times.

16,904. And there had been various things said to you about it?—Yes; they have offered me money even since this occurred. They have offered me money not to prosecute, and they have offered me money to send me out of the country, and Doherty's mother wanted me to sign a petition after he was transported to try and get him out, and I would not do it. She said that it was all his uncle Walland, or else he would never have done it.

16,905. Where are you living now?—98, Newcastle Street, Hulme.

16,906. Do you carry on the same business?—No, I am a commission agent; I put money for gentlemen on horses.

16,907. You are no longer in that business?—No, I could not be if I wished.

16,908. Why would not they engage you?—The masters would, but the masters would not put up with the inconvenience of having all the other men turned out.

16,909. Why would not they engage you; because you are not a club man?—The masters have no control over warpers.

16,910. Why so?—The club is so strong, and the party who takes the warpers on will not engage non-club men at all.

16,911. The only men whom he can employ in the warping business are men belonging to the union?—Yes, and if a job is wanted and a non-union man applies he has no chance at all. If a man is out he is sent for to come and fill this place.

16,912. Where was this warping club held, at Hulme?—At Ancoats.

16,913. Does it exist now?—Yes.

16,914. You have nothing to do in that business at all now?—No.

16,915. After this did you hear of any other attacks made or any other assaults made upon any other person for similar reasons to those which existed in your case?—No.

16,916. Were there many warpers in the district of Ancoats?—Yes.

16,917. Are there now?—Yes, but not so many now as there were then, because a good many mills are closed.

16,918. (*Mr. Chance.*) Could you not belong to the club now if you liked?—I do not think I could now.

16,919. Have you ever applied?—No.

16,920. Was Doherty at all drunk when he did this to you in November?—No, he had only two or three glasses of ale that night at most.

The witness withdrew.

ALFRED DOHERTY sworn and examined.

16,921. (*Chairman.*) What are you now?—I am a warper.

16,922. You have been so for some time, have you not?—Yes.

16,923. Are you a member of the warpers' union?—Yes.

16,924. Have you any office in it?—No, and never had.

16,925. How long have you been a member?—Since I learnt the trade, about 15 years.

16,926. Where does the union meet?—At Mr. Pointon's, Newton Street, Manchester.

16,927. How many members are there?—I cannot say.

16,928. A good many?—Yes, above 100.

16,929. Are there any other warpers' unions with which you are associated elsewhere?—Not that I am aware of.

16,930. How often do you meet?—Fortnightly.

16,931. Do you pay fortnightly?—Yes.

16,932. How much do you pay?—1*s*.

16,933. And there is a president, secretary, and treasurer?—Yes.

16,934. Who pays money if any money is wanted for anything?—I do not know; I never was in any office, and therefore I do not know.

16,935. We understand that you were in trouble through throwing vitriol upon Charles Mason?—No, I was not in trouble for throwing vitriol, but acting in collusion.

16,936. Hall threw it?—Yes.

16,937. Where was it that it was thrown?—At the corner of Crowther Street, Manchester.

16,938. Did he throw it?—Yes.

16,939. And you were taken up, were you not?—Yes.

16,940. And you were tried at Liverpool?—Yes, I was.

16,941. And were found guilty and sentenced to what?—Four years' penal servitude.

16,942. Had you before on that same day given any ale to Mason to drink?—We were out together.

16,943. Had you gone into some public-house and offered him a glass of ale?—We were treating each other.

16,944. Did you go out of the room and get a glass of ale for him?—No.

16,945. Did you offer him a glass of ale?—I did not, not any individual glass; we were treating each other; it came in our turns.

16,946. Did you offer him a glass of ale?—In that respect I did. I thought you meant in some other way.

16,947. You were treating each other, and he offered you a glass and you offered him a glass?—In that sense I did.

16,948. Did you hand him a glass?—No, I handed him no glass to my knowledge.

16,949. Did you at that time put anything into any ale that you wanted him to drink?—Far from it. I would not be guilty of any such action.

16,950. You did not put anything into any ale that night; no powder or laudanum?—Nothing whatever.

16,951. How came this vitriol to be thrown by Hall; what was the reason of the assault?—I do not know.

16,952. You do not know at all?—No.

16,953. Had you known that there were any complaints made of his employing women in the warping business?—I had.

16,954. That was against the rules of your union to have women employed in the warping business, was it not?—Yes, it was.

16,955. I suppose your notion was that bringing women into the business would lower the wages of the men?—Yes.

16,956. That had been the ground of complaint against Mason for some time?—Yes.

16,957. Was Hall, the person who threw the vitriol, a member of your union?—Not that I am aware of. I never saw him before that.

16,958. Did you hear that he was a member?—No, I never knew him at all.

16,959. Was he a weaver?—I do not know if he was. I know nothing about him. I never saw him before.

16,960. You never heard at all that he was a member of the union?—No, I never heard his name mentioned.

16,961. Do you know a man named Walland?—Yes.

16,962. Is he a member of the union?—Yes, at Oldham.

16,963. A warpers' union?—Yes.

16,964. There was another man ot the name of Hewitt; was he a member of the union?—Yes, the same that I belong to.

16,965. Did you see them there that night?—Yes, I did.

16,966. Where was that?—At the "Blue Bell," in Mill Street.

16,967. The same public-house where you and Mason treated one another with beer?—Yes.

16,968. Was Walland anything in the warpers' union at that time; was he president?—Not to my knowledge. I do not know.

16,969. You must know whether he was the president or not?—No, I am not in the habit of attending the club.

16,970. Was he secretary?—I do not know.

16,971. He has been, has he not?—He has been for Manchester; this was a separate branch then.

16,972. Has he been secretary for the warpers' union at Manchester?—Yes, many years.

16,973. Is he now?—No, not to my recollection. I do not belong to the same club as he does.

16,974. You do not know whether he was at that time secretary or not?—I do not.

16,975. You do not know him well, do you?—I never saw him before that day, and an unlucky day for me, too, it was.

16,976. You never saw him before?—No, never.

16,977. Was he to pay you any money on that day?—I never saw him before or even knew anything about the transaction.

16,978. Were you to receive any money from anybody that day?—No, there was no communication with me or anyone as regards pay.

16,979. What was Hewitt; was he a member of the warpers' club?—Yes.

16,980. What was he then; did he hold any office?—I cannot say.

16,981. He was a member of the warpers' club?—The same that I belong to.

16,982. Were Walland and Hewitt both in the "Blue Bell" public-house?—Yes.

16,983. Were they drinking in the same room with you?—No.

16,984. After this vitriol had been thrown into Mason's eyes, did you go to the house of Mason?—I did.

16,985. Did you ask him to open his eyes?—Not to my recollection. I do not recollect it.

16,986. Were his eyes shut, and was he in pain?—He seemed to be in great bodily pain.

16,987. And his eyes were shut?—I could not tell that.

16,988. You have spoken of something that had just been thrown in his face, and it was near his own house?—Not many yards from his house.

16,989. And he rushed in great pain into his own house?—Yes.

16,990. And you followed him?—I did not follow him; I went with him.

16,991. Did not you ask him when you got into the house to open his eyes?—I might have done.

16,992. Did not he tell you to go out?—Yes; and then I went out of course.

OURTEENTH DAY.

A. Doherty.

0 Sept. 1867.

16,993. How long after that was it that you were taken into custody ?—I think it would be the day after, the morning following.

16,994. And you were tried at Liverpool and sentenced to four years' penal servitude ?—Yes.

16,995. When did you come out ?—In April 1861.

19,996. Since you have been out have you received any money from anyone ?—Yes.

16,997. Who gave it to you ?—I had it given to me at Manchester.

16,998. By whom ?—By some of the officials belonging to the warpers' club.

16,999. How much was it ?—20*l.*

17,000. Were there several persons present when it was given to you ?—There was above 100 present.

17,001. Who was it that gave it to you ?—The president of the society.

17,002. When did he give it to you, when you came out ?—It was in April 1861.

17,003. How long was it after you came out that it was given to you ?—Not many days.

17,004. Who was president then ?—Nathan Bowker.

17,005. Had you applied for it ?—No, I neve expected anything.

17,006. Was it at a meeting ?—Yes, a regular ordinary meeting.

17,007. Did you go there as one of the members to attend the meeting ?—Yes.

17,008. Was it put to the vote that you should have 20*l.* ?—No, not then ; I think it had been a resolution passed previously ; he presented it to me then.

17,009. You had no notion that you were to have 20*l.* before you went in ?—Yes, before I went into the club.

17,010. You had only been out of prison four days ? —I had not been out many days.

17,011. Who first gave you an idea that you were to have 20*l.* from the warpers' club ?—My brother.

17,012. When was that ?—The day that I came home.

17,013. And accordingly you attended the next meeting and the president gave you 20*l.* in the presence of 100 people ?—Yes.

17,014. That was in consequence of a previous resolution that you were to have it ?—Yes.

The witness withdrew.

Mr. JONAH THOMPSON sworn and examined.

Mr. J. Thompson.

17,015. (*Mr. Barstow.*) What are you ?—I am a builder.

17,016. Where do you carry on business ?—At Bolton.

17,017. On the 15th of May 1866 did a man in your employ stop you in the street ?—Yes.

17,018. And ask you for his wages ?—Yes.

17,019. What was his name ?—Edward Caton.

17,020. Were his wages due at the time ?—No.

17,021. It was on a Tuesday ?—It was on a Tuesday.

17,022. When would he be paid in the ordinary course of business ?—On the Saturday following ; he had been paid 1*l.* 5*s.* 7*d.* on the Saturday previous for five and a half days' work.

17,023. He had been at work on the Monday ?—Half a day.

17,024. How much did he claim from you ?—Half a day's wages.

17,025. I suppose it was his intention to leave your service ?—I believe they had been having some beer, he and some others, and that was the reason that they wanted something to drink.

17,026. You did not pay him ?—No.

17,027. Was he violent at that time ?—He seized the horse's head and said that I should not go until I did pay him.

17,028. Were you riding ?—Yes, I was driving a horse in a conveyance.

17,029. How did you get rid of him ?—I sent my son and told him to bring a policeman, and upon that he let go.

17,030. Where did you go to then ?—I went to some quarries, two and a half miles out of Bolton, and came home to my dinner.

17,031. When you got home did you see anything else ?—I had not been in the house many minutes previous to Caton coming, and Abraham Williams coming with him, and each demanded their wages.

17,032. Williams was a man whom you had never seen before ?—No.

17,033. And he was not in your employment ?—No.

17,034. And never had been ?—No ; they said they were old butties, and that they had been together before, and wanted some money to go on the spree with.

17,035. Did Williams demand any money from you ? —Yes.

17,036. But he had not the smallest claim upon you ? —No.

17,037. What did you say to Caton ?—I said I would pay no money until I knew from my son what was due to him.

17,038. Did they go away peaceably ?—No ; they collected a crowd of 300 or 400 people in St. Mark's Street, right opposite my place.

17,039. Then you sent for a policeman, did you not ? —I sent a man on horseback for the police.

17,040. And they were taken before the magistrates and bound over to keep the peace ?—Yes.

17,041. And locked up in default of sureties ?—Yes, they were locked up.

17,042. When you left the court did you see a man named Seddon ?—I saw him on a job something like half an hour or three quarters of an hour after.

17,043. It was shortly after these men had been locked up ?—Yes.

17,044. Was he a man in your employ ?—No, he never had been.

17,045. Do you know what he is ?—He is a mason.

17,046. Is he a member of any union ?—Yes, the masons' union.

17,047. Is he an officer of the union ?—Not that I know of.

17,048. You do not know whether he is a delegate? —No.

17,049. You know now that he was a member of the masons' union ?—Yes ; he was released from prison that morning, where he had been for striking a woman.

17,050. That was not a union business ?—No.

17,051. What did he say to you ?—He said if I allowed those men to go to prison he would give me a club law and make me rue it. I ordered him off the premises. I was on a job I had been building.

17,052. He also was bound over to keep the peace, was he not ?—Yes.

17,053. On Wednesday the 13th of June did anything happen ?—Yes.

17,054. What was that ?—There was a party named Richard Clarkson whom I had engaged on the Wednesday previous to this, and he started on the Thursday morning, and I make up my books on Thursday night and pay on Friday night, and keep a day in hand.

17,055. Clarkson had begun to work on Thursday and you made up your books to Thursday night ; that is, he was entitled to one day's pay ?—Yes ; he was paid that on the Friday night ; he worked on Saturday, and I think Monday was a very wet day, and Tuesday was very wet likewise, but I went up to the job that he was at, and it was raining very heavy, and I said, "Men, you had better go to the shop ; you are doing neither me nor yourselves any good ;" and the whole four went to the shop and worked that day.

17,056. Did he demand his wages ?—On the Wednesday morning at 10 minutes past 6 I met him as I was coming out of the door ; I said, "Now man, this is no time to come to work." "Well," he says, "we do not care much about it, give us a bit." I said, "It is a very strange time to ask for your bit at "10 minutes past 6 in the morning ; you know I pay "only once a week." They went away from me

without a single sentence more being said; and at noon, between 12 and 1 o'clock, another man came with him that was working with him and demanded to see me in the office.

17,057. Do you know who the other man was?—I really forget his name now; he was a mate of his that I engaged at the same time.

17,058. Did he see you?—Yes, I was in the house.

17,059. What happened?—I told my missus to open the door, and when he came in he demanded his wages. I told him that it was no use coming to ask me for his wages as he had got his answer in the morning, and I should only pay as I promised. He began with some abusive language, and I asked the missus to open the door for him and let him go out; she went to open the door, and he let into her breast and knocked her down, and I got him outside with the assistance of the carter, and then outside they kicked up a row again for about half an hour. I sent off for the police, and had the man locked up at once.

17,060. He was sentenced to a month's imprisonment?—He was sentenced to a month's imprisonment.

17,061. Did something happen on the 5th of July?—Yes.

17,062. What was it?—A deputation consisting of a joiner, a mason, and a bricklayer arrived at my house about half-past 9. I was gone out; they were told that I should be home between 12 and 1 o'clock. In place of that I happened to be home about 11, and had to go out again. I got home about half-past 12, and the deputation came and wished to speak to me privately.

17,063. And you refused to see them?—I said anything that they had got to say must be said in the office, and publicly; that is how I did my business. Of course they went away.

17,064. It was after that that your men were called off?—When I got to the job the delegates that had applied to me had been there and drawn the men off; they were all to leave off at 3 o'clock.

17,065. I believe there were 44 men?—Yes, they drew off all they could; I had about 19 men left when they drew them off.

17,066. I suppose you made efforts to supply the place of the men who had left your employment?—Yes.

17,067. Were your workmen then molested?—Yes, in every shape possible.

17,068. What was done to begin with; were your works picketed?—They were picketed most strongly.

17,069. Just describe to us in what way?—From six to 20 pickets were put on, but most positively two pickets on each job from morning till night.

17,070. How many jobs were there?—Six.

17,071. Did the pickets endeavour to prevent men coming to you for employment?—Yes, they paid them for going away when they could get hold of them.

17,072. In what way did they prevent them?—They persuaded them off, and they would give them a sum of money to go to town.

17,073. Did they use any violence towards them?—Yes, in several instances.

17,074. What took place?—It went on till the middle of August, and my men were nearly tired of it.

17,075. You mean the non-union men?—Yes.

17,076. The men in your employment were tired of the annoyance?—Yes; their meat was taken to the place, but they had to go home at night; we had a place like a barracks; they got up a memorial about the 20th of August to the mayor for extra protection, and it was granted.

17,077. Were any of the men who came in place of the union men assaulted?—Yes.

17,078. Who, for instance?—Charles Harris had his head split open with a brick; a brick was thrown at him on a Sunday night, and his head cut open and his hat smashed.

17,079. Do you know the date?—It would be sometime about the beginning of August.

17,080. What did they do to him; cut his head open?—Yes, they cut his head open.

17,081. Do you know who threw the brick?—I cannot positively say to that.

17,082. No one was convicted?—No; the party that was supposed to have thrown the brick was got out of the town, and the man who had his head cut open was sent out of the town, both in one day.

17,083. How do you know that he was sent out of the town?—We can tell by the people who were with him in the train.

17,084. You know that he left the town?—Yes.

17,085. Who were with him when he went off?—Some of the bricklayers.

17,086. Who; we want to have them here to inquire?—I do not know whether I could say positively who were there or not, but Henry Wilcock was one.

17,087. Can you give any information as to who can tell us who these men were?—I can safely refer you to the names of Henry Wilcock, a bricklayer, John Burns, a bricklayer, and Thomas Fairbrother, a joiner.

17,088. Why do you refer to these men?—As being the men who escorted him out of the town.

17,089. Do you know that they did escort him?—Yes.

17,090. Why do you say they got him out of the town?—Because I could bring proof of people who saw them escort him to the train when he went to the train, and escorted him out of the town; as the train went off they were there to see him go.

17,091. They were on the platform?—Yes.

17,092. And they paid his fare?—Yes, I think that can easily be proved.

17,093. But you do not know yourself?—No.

17,094. Do you know whether they gave him any money?—No, I did not see any paid.

17,095. Your carter, Gorton, was assaulted?—Yes.

17,096. How was that?—Four or five set on him one Saturday night.

17,097. What was he doing?—I cannot say; he was not at his work at the time; in fact I did not hear tell of it till Sunday morning.

17,098. He was assaulted by five or six men?—Yes.

17,099. Do you know where it was?—It was in Fletcher Street and Bridgman Street; it was in the corner public-house that it occurred.

17,100. Does Gorton know who the men were?—Yes, we had them up before the magistrates.

17,101. What was done to them?—I believe the magistrates said that they were perfectly satisfied of the conduct of the men, but that there was not evidence enough to commit them, and there were so many things of that sort, and so much bribery went on, that you could not get a conviction hardly.

17,102. Why do you say that?—We know it.

17,103. In that case were the witnesses bribed to stop away?—Yes, there was no dispute about it in that case.

17,104. I suppose if these men were to come here they would not dispute it?—I should like to see them come, because I think we have evidence to bring after, which they could not say they they did not do it.

17,105. What are the names of the men?—John Beebee, he is a joiner.

17,106. A union man?—A union man; Hugh Irvine, he is a joiner.

17,107. Is he a union man too?—Yes, on strike at the time.

17,108. Who else?—I really forget; there were five or six of them altogether in company.

17,109. A man named Hulme, who was a mason working for you, was assaulted?—That occurred after that.

17,110. And there was a man named Taylor, a joiner; was he assaulted?—Yes.

17,111. Do you know who assaulted him?—John Beebee and Samuel Rigby.

17,112. A man named Hough was assaulted too?—Yes.

FOURTEENTH DAY.

Mr. J. Thompson.

20 Sept. 1867.

17,113. Then I believe there was an effort made to settle your disputes by arbitration, which failed?—Yes, after the memorial went in from the men, the mayor tried to settle it.

17,114. How long had this picketing of your works continued?—13 weeks.

17,115. That was until the end of February this year?—Yes.

17,116. Do you consider that all the annoyance resulting from this dispute is over?—No.

17,117. Are you threatened at all now?—Yes, we are annoyed and threatened down whatever street we go, both our men and ourselves.

17,118. They continue to threaten you now?—Yes.

17,119. (*Chairman.*) What other offence had you given to the union men except the prosecution of Clarkson?—We had given no offence.

17,120. Is Clarkson a union man?—Yes, he is a member of the joiners' union.

17,121. Clarkson came in and demanded his wages, and you did not give them to him, and then he assaulted your wife, and you prosecuted him?—Yes.

17,122. Is there any other ground of complaint? Are there reasons why you have been assaulted or threatened, except for the one circumstance that you had prosecuted Clarkson?—That is the whole that we are aware of. Till the mediation took place, when the masons said before the mediator that there was a strike then brewing for the prosecution of the two masons, Caton and Williams, we did not know that we had done anything wrong.

17,123. When the matter was referred to arbitration, before the arbitrator it was alleged that there was a strike pending because you had prosecuted Caton and Williams?—Yes.

17,124. You had prosecuted them for similar things?—Yes.

17,125. They demanded their wages, and you refused to give them?—Yes.

17,126. It was not that you were not going to pay the wages, but that you were not going to pay them on the day on which they asked for them?—No.

17,127. One case was the strike of the masons because you prosecuted Caton and Williams, and the other case was that of the joiners, because you prosecuted Clarkson?—Yes.

17,128. By whom were you threatened and assaulted?—The whole of them, both the bricklayers, the joiners, and the masons.

17,129. And you are sure that all the three trades joined in threatening you?—There were many dozen assaults.

17,130. I take the joiners, the masons, and the bricklayers?—Even now the men cannot go up and down. On Monday last I had a man, who is here now, that was insulted by them.

17,131. The men who have assaulted and threatened you are still doing so. You speak of some joiners some masons, and some bricklayers. Is that so?—Yes.

17,132. And you know of no other cause except the one you have mentioned, the prosecution of Clarkson, and Caton, and Williams?—Yes.

17,133. You know of no other offence?—No.

17,134. When did the prosecution of Caton and Williams take place?—The 15th of May 1866.

17,135. When was the prosecution of Clarkson?—The 14th of June 1866, on a Thursday.

17,136. With the exception of those two causes of offence you do not know of any other?—No other.

17,137. (*Mr. Barstow.*) And you pay the wages like any other man in your business; there is no difference in that respect?—At the time of the strike I had a man that received 1*s.* less wages than the standard.

17,138. Is it usual to pay builders' wages on Saturday?—The masons are paid on the Saturday, but the joiners are paid on the Friday night.

17,139. (*Chairman.*) You did prosecute both Caton and Williams?—They were taken up for annoyance.

17,140. Nothing came of it?—They were bound over, and locked up in default of sureties.

17,141. (*Mr. Chance.*) You tried also to get other non-union men?—Yes, I went all over the country.

17,142. (*Chairman.*) Do you employ non-union men now?—Yes, while I live I will employ non-union men in all my work. I have committed no offence, and it is the only offence I have.

17,143. A question is suggested for me to ask you. Have you been convicted by the magistrates of Bolton of any offence?—Yes, for sending the men from my own house front.

17,144. When were you convicted?—The same week as the memorial.

17,145. When were you convicted?—On the 22nd it should have been brought before the magistrates; it was put off until the Saturday, because Mr. Roberts could not attend.

17,146. Tell me the month?—The 22nd of August 1866.

17,147. You were taken up and charged before the magistrates of Bolton with some offence?—For an assault upon some workmen in the front of Fletcher Street.

17,148. You were charged before the magistrates at Bolton with an assault upon some workmen in front of some street?—Yes, they were coming there to annoy me.

17,149. Were you convicted?—I was bound over in my own sureties to keep the peace.

17,150. What was the nature of the assault?—It was sending the men away.

17,151. Was there any assault committed?—No, I never touched any of them.

17,152. You were bound over to keep the peace?—It was creating a disturbance in Fletcher Street.

17,153. What sort of a disturbance was it?—There were 12 or 15 of the workmen employed in other places at the top of the street.

17,154. What workmen?—Masons, bricklayers, &c.

17,155. Union men?—Yes.

17,156. They came between 12 and 1?—Yes, they got a number of factory operatives passing backwards and forwards to create an annoyance.

17,157. How do you mean factory operatives?—Innocent people going past.

17,158. What did they do?—They got them to assist in making a noise in the front.

17,159. A noise in shouting?—Yes.

17,160. What did they shout?—"Knobsticks," and other things.

17,161. Were there a good many of them?—Yes.

17,162. When they shouted out "knobsticks" what did you do?—I went and ordered them away, and said if they did not go away I should send for the police. I believe I called one of the men something he did not like at the time, and I sent for the police, and there was a charge against me for creating a breach of the peace.

17,163. There must have been something more than that?—No.

17,164. You were bound over to keep the peace. If all that happened was that these men collected a mob in front calling out "knobsticks," and compelled factory workmen to join with them in calling out and creating an annoyance, and all you did was to come out and say you would send for the police, how was it you were bound over to keep the peace?—I believe it was for threatening them or calling them some names.

17,165. Did you use any threats of violence?—No.

17,166. Then you had not broken the peace. According to that there would not be a reason for binding you over to keep the peace?—I forget the word I used, whether I called him a thief or something of that sort.

17,167. But that is not a reason for binding you over to keep the peace; you ought to tell us the whole case which was gone into before the magistrates. You were bound over to keep the peace; therefore say what you did.

Merely calling a man a name is not a sufficient reason for you to be bound over to keep the peace unless you threatened him ?—I did not threaten him.

17,168. What did you say; it must have been explained in court ? Was the summons for an assault ?—No, I did not commit any assault.

17,169. It resulted in your being bound over to keep the peace, and you come here to tell us the story, and you ought to tell it on both sides ?—I do not wish to tell anything else.

17,170. We must see, if any question is suggested, that it is fairly brought out on both sides. Now, I ask you, how it was you were bound over to keep the peace ?—I believe it was for creating an annoyance; I believe they reckoned that it was through me that it was created.

17,171. Do you mean that it might be through you that the men came into the street, and you were bound over to keep the peace for that, because that is nonsense ?—Yes.

17,172. It cannot be. You are on your oath and you ought to tell us; you have made your charges for the other things, and you ought to answer us. You were taken up before the magistrates, and bound over to keep the peace; you ought to know why it was ?—I do not know.

17,173. What did they say that you did ?—I believe I have told you as near as I can.

17,174. You have given me no possible reason why you should be bound over to keep the peace. Who appeared against you ?—Mr. Roberts.

17,175. Mr. Roberts would act professionally; but what did the witnesses say that you did ?—I forget who they were.

17,176. But you cannot forget what they said. Somebody must have given evidence against you. Are you certain of this, that you were bound over to keep the peace ?—I was bound in my own recognizances to keep the peace for a month.

17,177. Why and wherefore you do not know ?—No; if I could assist you in getting to that I would be very glad to do it.

17,178. Did you seize anybody ?—No.

17,179. Did you claim the ground on which the men were congregating ?—Certainly.

17,180. Did you, in order to take them off the ground which you considered your own, seize some men ?—I did not seize any men.

17,181. Did you ride in among them ?—My son rode very near through them on a pony.

17,182. Did any stonemasons, whom you employed, leave your employment ?—Those who had been taken away had left me, besides those two who went out on strike.

17,183. Did you publish a placard containing the names of those men who had left your employment ?—Yes, there was a placard published. I gave the names to the publisher.

17,184. You ordered it to be published ?—Yes.

17,185. How many names did you give ?—44.

17,186. Was there also in the placard a warning for other people not to employ those men ?—No, not a word was said about it.

17,187. Was there the mere statement in the placard of these men's names, and of the fact that they had left your employment ? Publishing men's names without saying why or wherefore is idle; you must have said something on the placard ?—I do not think anything was mentioned about their having left my employment.

17,188. Do you mean that you only put in the placard the names of the men ?—I advertised, "Wanted bricklayers, masons, and so on."

17,189. Did you not say, "The 44 men whose names "are written here have left my employment, and I "want more men in their place ?"—I believe the heading of the bill was "The Builders' Strike."

17,190. And then you go on to mention the names of the 44 men, and say that they have left your employment ?—The case of Clarkson was mentioned in the same bill.

17,191. Clarkson having demanded his wages ?—Yes.

17,192. And having been convicted ?—Yes.

17,193. As an explanatory reason for the 44 names being there what was on the bill ?—We understood that it was the strike, and I think there was an article from the "Builders' Journal," stating that the men had left my employment.

17,194. Did the bill also give a sort of warning not to employ these men, or anything of the sort ?—No, nothing of the kind.

17,195. It was merely the fact stated that they had left your employment ?—Yes.

17,196. Was there nothing in the shape of warning or recommendation for others not to employ them ?—No.

17,197. What was your object in publishing the 44 names ?—To let the public see how I had been treated by those men, for the defence of my wife and myself.

17,198. There are two societies of joiners ?—Yes, I believe there are.

17,199. One is called the "General Union" and the other the "Amalgamated Society ?"—I cannot tell the terms; I know them by No. 1 and No. 2.

17,200. What is the number of men in the General Union ?—I do not know that.

17,201. Can you tell me whether No. 1 or No. 2 has any branch at Bolton ?—Both of them have; there are two lodges at Bolton, one is called No. 1 and the other No. 2, but what the names of the societies are I cannot say.

17,202. You cannot say whether there are two societies of joiners beyond the fact that there are two societies at Bolton ?—I do not know.

17,203. Are they two lodges of the same society ?—I cannot say.

17,204. You do not know the names of the unions ?—No, I know there are such things, but I do not belong to them myself.

17,205. There are two societies, and the men you speak of were members of one or the other at Bolton ?—Yes.

The witness withdrew.

ANDREW BARRY sworn and examined.

A. Barry.

17,206. (*Mr. Chance.*) Are you a joiner by trade ?—Yes.

17,207. Are you in Mr. Thompson's employ ?—Yes.

17,208. How long have you been with him ?—About a year and a half.

17,209. Do you remember the disturbance which took place between him and some of his workmen ?—I was not there at the time the disturbance took place; I have been employed after.

17,210. Did you go soon after the disturbance ?—Yes.

17,211. Did you go to him to supply the place of some of the union men ?—Yes, and I worked for him before the strike.

17,212. Are you a member of the union ?—No.

17,213. Have you ever been ?—No.

17,214. When you went into his service were you at all threatened or annoyed by members of the union ?—Yes, frequently.

17,215. Do they say anything to you ?—Yes, they say they will make me suffer for working for him.

17,216. Can you give me the names of any of the men ?—I do not know them by name.

17,217. Has this happened more than once ?—Yes, several times.

17,218. Were they members of joiners' union ?—Yes.

17,219. And members of other unions as well ?—They were all union men.

17,220. Were there any amongst them who were

FOURTEENTH DAY.

A. Barry.

20 Sept. 1867.

members of the bricklayers' or masons' union ?—No, they were all joiners.

17,221. Is Mr. Thompson's work picketed ?—Yes.

17,222. How many men were engaged in picketing? —Six men.

17,223. Was it as you went to work that they made use of these expressions ?—Yes, in going and coming from work.

17,224. Were you ever struck by one of them ?—Yes, on Monday last.

17,225. Is that the first time they struck you ?—Yes ; but I have often been stopped in the streets and pressed to join the union.

17,226. Last Monday was the first occasion when you were struck ?—Yes.

17,227. Do you know the names of any of the men who struck you ?—No.

17,228. At the time you were struck was there more than one man ?—There were three men.

17,229. Before striking you did they say anything to you ?—They called me a dirty black and a knobstick. They said it was a shame for me to be working for Jonah Thompson, because as soon as Jonah Thompson had finished his job he would never get another job in Lancashire, and that I would find myself asleep one night never to wake again.

17,230. You do not know their names ?—No.

17,231. Were you struck by more than one ?—No, only one.

17,232. Where were you struck ?—On the forehead.

17,233. With the fist ?—Yes.

17,234. Did they do you much injury ?—No, I ran away from them.

17,235. Do you remember a man of the name of Clarkson being prosecuted ?—I was not working for Mr. Thompson when he was prosecuted ; the week he was prosecuted I started working for him.

17,236. Did you hear of his being taken up before the magistrates and committed ?—Yes.

17,237. Did you know the man ?—I did not know him.

17,238. Have you seen him ?—Yes.

17,239. Of which union is he a member ; is he a joiner ?—Yes ; he belonged to the General Union.

17,240. Do you know whether his wife was allowed any sum of money for her relief while he was in prison ? —Yes, I heard his wife got 14*s.* a week while he was in prison.

17,241. From whom did you hear that ?—From different members.

17,242. The members of that union ?—Yes.

17,243. Do you know the name of any one of them ? —No, I do not know their names.

17,244. You are sure that they were members of the union ?—Yes.

17,245. Did you also hear that Clarkson himself had received any money ?—Yes.

17,246. What was that for ?—I heard that he received his full pay while he was in gaol.

17,247. Do you work for Mr. Thompson now ?—Yes.

17,248. (*Chairman.*) Do you know if there are two societies of joiners ?—I know there are two lodges in Bolton.

17,249. Do you know whether there are two societies, one called the " General Union," and the other the " Amalgamated Society of Joiners ?"—I do not know about the " Amalgamated."

17,250. You have heard of the " General Union ?" —Yes.

17,251. Are the two lodges at Bolton, as you understand, belonging to the General Union, or does one belong to one society and another to another ?—There are two lodges, and they both belong to the General Union.

17,252. Both the lodges belong to the General Union ?—Yes.

17,253. And you know nothing of the Amalgamated Society ?—No.

The witness withdrew.

G. Haworth.

GEORGE HAWORTH sworn and examined.

17,254. (*Chairman.*) What are you ?—A joiner.

17,255. Have you been so many years ?—Yes, ever since I was able to work.

17,256. And a member of the joiners' union ?—Yes.

17,257. Have you been so many years ?—Yes.

17,258. Of which union are you a member ?—There is the General Union.

17,259. There are two clubs or unions, I mean the General Union of joiners and another, the Amalgamated Society ?—Yes.

17,260. Where does the General Union hold its meetings ?—It extends almost all over the country.

17,261. Have they lodges in different districts ?—In different towns.

17,262. We understand that there are two lodges in Bolton ?—Yes.

17,263. They are both lodges of the General Union ?—Yes.

17,264. How is that, that there are two in one town ? —I do not know. I have an opinion of my own that it is advantageous to have two where there seems to be so many joiners in one town ; too many joiners in one lodge is not beneficial.

17,265. There are a good many joiners in Bolton, and it is more desirable that they should be separated into two lodges ?—Yes.

17,266. Are there lodges in all the different towns of England where there are joiners ?—Yes.

17,267. How does the General Union meet ; are there delegates from the different lodges ?—The bodies in the town meet once a fortnight.

17,268. The lodges do ?—Each lodge.

17,269. Is there no general committee of the whole union to which the lodges send delegates ?—Meeting regularly ?

17,270. No, periodically ?—Our general committee meets in Manchester; that is what we consider the seat of government.

17,271. You meet in Manchester, and have you delegates sent from all the different lodges to form that committee, or how is it selected ?—Only at the delegate meeting.

17,272. How many members are there on the committee at the seat of government ?—I cannot exactly say.

17,273. One hundred ?—No, nothing of that sort.

17,274. Twenty?—No, I should think a dozen would form the committee ; I cannot speak positively.

17,275. How are those 12 elected ?—They are elected within the district.

17,276. Within what district are the present 12 elected ?—They are elected within a certain radius of Manchester.

17,277. What is the extent of the radius ?—I think it is six or seven miles.

17,278. Is that for a given time, or do they go on ; how long does that committee exist ?—It is elected every 12 months.

17,279. Does each lodge collect its own subscriptions from its members ?—Yes.

17,280. Have they the right of the distribution of it ? —They do what they think proper with it, so long as they pay all due demands with regard to government.

17,281. What is the Amalgamated Society of Joiners ? —I cannot speak to that ; I have no connexion with it at all.

17,282. You have heard of it ?—Yes.

17,283. Where is it supposed to exist ?—Bury is the nearest place to my knowledge.

17,284. You have no connexion with that ?—Not as far as working together goes; we work at the present time in Bolton with the Amalgamated Union.

17,285. How do you work with them ?—We work in the same shop with them ; if a man belongs to a society of any description he is right ; we expect a man to belong to some union.

17,286. And he is wrong if he does not belong to a union?—Yes.

17,287. And do you allow your men who belong to your general union to work with men who do not belong to any society of joiners?—Of course we do not if we can avoid it, if we can do it with persuasion.

17,288. A little persuasion?—Yes, we are sometimes placed where we cannot get the chance of persuasion.

17,289. But when you get the chance of persuasion you make use of it?—Yes.

17,290. Have you ever known the persuasion assume different forms; is it only confined to language, or does it go beyond that?—I have heard of it going beyond that, to slight threats. I have heard tell of it.

17,291. Were the threats sometimes carried into execution?—I cannot say.

17,292. You have heard of it?—I cannot say that I ever saw it.

17,293. You have heard of it?—I have heard tell of some slight affairs; what I have heard tell of has been the same as is of daily occurrence; they have originated through beer more than anything else.

17,294. By a sort of collision between the unionists and the non-unionists?—Yes.

17,295. And a little brought on too by the beer?—In general that way.

17,296. Supposing unionists to have been turned off and non-unionists to have been employed, have you heard of men being picketed when non-union persons have been employed; have you heard of pickets being employed to watch them?—Yes, I have.

17,297. And those men of course you pay for their labour?—Yes.

17,298. Has that frequently occurred?—It has occurred twice to my knowledge. I have only been in two strikes.

17,299. What do the pickets do; do they use any persuasion?—They watch the premises of the employers.

17,300. The premises of the employers, and they watch the employed there too?—Certainly; they watch the premises of the employers to catch the employed, and if they can lead them by persuasion they do so.

17,301. And if they cannot?—I never saw coercion used.

17,302. I never said you did, but perhaps you have heard of it?—I have heard of little bits of scrimmages, but not during the working hours.

17,303. But they scrimmage afterwards, after they go back?—All the scrimmage I have heard tell of has been after the working hours if they fall into a beer-house; if persuasion will not do it, of course I have heard of coercion being used to a certain extent, but to no great extent.

17,304. Do you remember Thompson's men being picketed?—Yes.

17,305 Did your society pay the pickets there?—Yes.

17,306. And you as secretary would make entries of it?—Yes.

17,307. How do you enter that, "pickets" or "cash"?—We paid the pickets their full wages the same as if they had been in actual work; we allowed them 3*s.* a week extra for their picketing, both of them, while they lasted.

17,308. How would that appear in your book; how would you as secretary enter that in your book?—It is classed altogether; he is paid weekly 1*l.* 13*s.*

17,309. Does his name appear in the book as a man paid?—Yes.

17,310. He is not called a "victim member" or anything of that sort? You have no particular name? You write the man's own name?—I write his name one side of the book, and he writes his name the other side when he receives the money.

17,311. How long did this go on, paying the men picketing at Thompson's?—I cannot say how long it was. I am not prepared to give the exact dates; it was when the strike first took place.

17,312. Do you remember the names of the men?—John Beebee and Thomas Fairbrother.

17,313. Did you hear of Caton and Williams getting into trouble?—I remember Clarkson.

17,314. Clarkson was a joiner?—Yes.

17,315. You heard of his being charged with an assault upon the wife of Mr. Thompson?—Yes.

17,316. And he was sent to prison for it?—Yes, for a month.

17,317. And your society paid his wages while he was in prison?—Our society?

17,318. Some society?—I believe that the whole money he received from the Bolton lodge was 4*s.* I cannot exactly swear, but I think it was perhaps 3*s.* 6*d.*, or something of that sort, the whole money he drew from us.

17,319. For what was it paid?—It was paid when he came out of prison to pay his railway fare back to Bolton; it was a little bit of philanthropic feeling about us; we did not like to see a man without a penny in his pocket who had suffered that length of time.

17,320. Your philanthropy did not go beyond the 3*s.* 6*d.*?—I do not think it did; I have an entry in my book to show you.

17,321. If you can without inconvenience look at the book and see how much you did pay him we shall be glad?—I can do presently.

17,322. Are your books here?—They are, every one of them.

17,323. When was this payment made?—When he came out of prison.

17,324. When was that?—I cannot recollect the dates.

17,325. Do you remember the year; it was the 14th of July 1866, we should find the entry immediately?—Certainly.

17,326. Did you pay his wife anything while he was in prison?—She did not get a farthing from the Bolton lodge. I do not know whether she had anything paid or not, but nothing was paid to her from the Bolton lodge.

17,327. Are you the secretary of Bolton lodge No. 1?—Yes.

17,328. Then she might have had it from Bolton lodge No. 2, and you not have known it?—She might have. He was a Preston man and belonged to the Preston lodge; he had nothing to do with us.

17,329. Supposing anybody was to pay him for the time he lost while in prison, it would be the Preston lodge to which he would have to look?—I should expect so.

17,330. He would not come within the jurisdiction of either the Bolton lodge No. 1, or the Bolton lodge No. 2?—Not till his clearance came from one lodge to the other.

17,331. You would not pay at all with the chance of getting it back from the Preston lodge?—No.

17,332. Did you attend a meeting between Mr. Thompson and the other man with regard to arbitration?—No, not as to arbitration.

17,333. To whom was it referred?—It was referred to a mediator, not to an arbitrator.

17,334. Did you appoint the mediator?—Yes.

17,335. At that time the strike was going on against Thompson, was not it?—Yes.

17,336. Was one of the conditions you proposed for withdrawing the strike that Thompson should pay the expenses?—We expected that he would pay us the expense.

17,337. Was the sum mentioned?—Mr. Lever Rushton advised us to withdraw the expenses, and if Mr. Thompson would only give an acknowledgment that he was in the wrong, then the dispute would end.

17,338. The acknowledgment was to be in the shape of money?—That was our beginning.

17,339. Did you ask for as much as 360*l.* to be paid you by way of expenses for the strike?—The joiners?

17,340. Yes.—I think not.

17,341. Where there other clubs besides the joiners concerned in this mediation?—There were the bricklayers, masons, and plasterers.

17,342. And the joiners besides?—Yes.

17,343. Was the sum total of the money which Mr.

FOURTEENTH DAY.

G. Haworth.

20 Sept. 1867.

Thompson was asked to pay about 360*l.*?—It would be considerably more than that for the four bodies combined together.

17,344. How much would your body want?—I cannot exactly say; I have been taken rather on the bounce, you know.

17,345. Have you a shrewd suspicion that it was somewhere about 300*l.* for your body?—It would not exceed 200*l.* very much.

17,346. Not much?—No.

17,347. Then what would the others be?—I cannot say; each body had their own.

17,348. Was it mentioned in your presence what the other bodies claimed?—It might be, but I do not recollect what it was.

17,349. You said that it was a good deal more altogether than 360*l.*; did it amount to 1,000*l.* in round numbers?—I do not know what the masons might have expended; I should think they would expend more than us.

17,350. Taking it in that way it would be nearly 1,000*l.*?—I do not think it would be 1,000*l.* The plasterers' expenses were very small comparatively speaking to ours.

17,351. The conditions upon which you assented to withdraw the strike were, that he should pay the expenses whatever they might be?—We expected that, we expressed that wish to Thomas Lever Rushton, Esq., as the mediator.

17,352. And he advised you to withdraw all claim?—He advised us to withdraw all claims as far as money went.

17,353. Did you do so?—The body that meet there as a committee could not rule the other body. This was laid before them.

17,354. Did you withdraw it or not?—We could not do it then.

17,355. Did you refer it afterwards to your general body?—Yes.

17,356. What did your general body say?—Thomas Lever Rushton wanted Mr. Thompson to make an open acknowledgment that he was in the wrong.

17,357. You could not come to an agreement, you being only delegates from your committee?—No.

17,358. It was referred to your general body; what did the general body do?—It was not accepted.

17,359. You would not withdraw your claim to the money?—No, we would not.

17,360. What did the strike cost you altogether?—Well, I do not know.

17,361. A mere trifle?—The strike and one thing and another cost us perhaps a little over 300*l.*

17,362. Is your joiners' general union at all associated with the "Operative Carpenters?"—It is that union.

17,363. It is the same thing?—Yes.

17,364. Was Fairbrother a member of your union?—Yes.

17,365. Do you know of his being at all engaged in getting away witnesses who were prepared to prove an assault, and seeing them off to London?—I am not aware.

17,366. Do you remember giving Fairbrother any money about that time?—Never a farthing.

17,367. You would have been the person, if money had been given, to pay it?—Sometimes I pay money and sometimes not.

17,368. Would you enter such a thing as that, "Paid money to Fairbrother?"—Yes.

17,369. Were Beebee and Irvine joiners or masons?—Beebee is a joiner.

17,370. And Hugh Irvine?—Yes, he is a joiner too.

17,371. Were they and three or four others ever up before the magistrates for assaulting a man named Gorton, a carter of Mr. Thompson?—I heard of Beebee being up.

17,372. For assaulting the carter?—Yes at the "Farmers' Arms."

17,373. Did your society employ somebody to defend him?—Yes.

17,374. Whom did you employ?—Mr. Hall.

17,375. Is he a solicitor?—Yes.

17,376. What did it cost you?—Three guineas.

17,377. For defending him for that assault?—Yes.

17,378. Did you defend Irvine at all?—I heard so.

17,379. How came you to pay money to anybody for defending the assault upon Mr. Thompson's carter; was it because it arose out of the strike?—It was a drunken squabble.

17,380. You did not always pay for drunken squabbles?—We did not make a general practice of it.

17,381. You must have a very large fund if you pay for drunken squabbles; but did not you know that the assault upon the carter arose out of this union strike?—It might have done at the first onset; I have no doubt but that it did.

17,382. What was the origin of Mr. Thompson's strike?—It originated through Clarkson.

17,383. Clarkson demanded his wages, did he not? There was some question about wages?—Yes.

17,384. How did you understand the circumstance?—I understood it only from Clarkson's tongue telling me.

17,385. Because Clarkson demanded his wages in the way that has been mentioned your union caused the strike to take place among Thompson's men; is that it?—Clarkson was a total stranger in the town. He came from Preston. He came to work for Thompson, and he worked a week or two there, and he happened to come into the yard a little later than common one morning, and Mr. Thompson made a bit of an answer, "Was this any time to come in the morning?" Clarkson took it up rather abruptly, and they got to words, and Thompson told him that he could do without him.

17,386. And Clarkson committed the assault of which we have heard?—He committed no assault. I saw Clarkson shortly after, and I told him if I was him I would go back to Thompson's, and ask for my money so long as he was discharged. When he went back Thompson told him he only paid once a week, and that was upon a Friday, and a stranger in the town, being discharged on the Tuesday, and being compelled to wait till Friday, was rather hard. That Clarkson did not like, and he had a partner with him that came with him, of the name of John Johnson, and he was very hard of hearing. He was with him when he went to the man, and being hard of hearing he did not hear the dispute.

17,387. And Clarkson assaulted Thompson's wife?—So he said.

17,388. Was that the subject of the strike as far as you were concerned?—Yes; the real origin of the strike was not paying the man when he was discharged.

17,389. He was discharged on the Tuesday, and had to wait till the Friday for his money, and that was the origin of the strike?—Yes.

17,390. (*Mr. Barstow.*) Was not the strike owing to Thompson appearing against Clarkson?—In court?

17,391. Yes.—No, it was not.

17,392. (*Mr. Chance.*) You told us just now that scrimmages often arose between the union and the non-union men; do you generally defend men if they are taken up for assaulting non-union men?—We always support our own lot as far as lies in our power.

17,393. When one of these scrimmages takes place you make it a practice to defend your own men?—Yes, we defend our own men.

17,394. Is not that a very strong encouragement for these scrimmages?—There have been very few in Bolton.

17,395. Whatever numbers there may be, is it not a very strong encouragement, when an assault of this kind is made by union men, if you provide funds out of your union to defend them?—I cannot dispute that.

17,396. Can you tell me how many members there are in your association?—In the country?

17,397. Yes.—About 10,000 in round numbers.

The witness withdrew.

Adjourned to to-morrow at 10 o'clock.

FIFTEENTH DAY.

Assize Courts, Manchester, Saturday, 21st September 1867.

PRESENT :

PERCIVAL ANDREE PICKERING, Esq., Q.C. | GEORGE CHANCE, Esq.
THOMAS IRWIN BARSTOW, Esq. | JAMES SHEIL, Esq., Secretary.

PERCIVAL ANDREE PICKERING, ESQ., Q.C., IN THE CHAIR.

ELI FIELDING sworn and examined.

17,398. (*Chairman.*) I believe you are the secretary of some union ?—Yes.

17,399. What union is it ?—The "Self-acting Minders."

17,400. What do the minders do ?—Spin yarn in mills.

17,401. Minders are in the spinning yarn trade ?—Yes, in the factory.

17,402. Where do you come from, Bolton ?—Yes.

17,403. Is the union of which you are secretary existing at Bolton ?—Yes.

17,404. Do you know at all of how many people it consists ; how many members have you ?—Between 300 and 400.

17,405. How often do you meet ?—We meet every Thursday night and oftener, if necessary.

17,406. Have you the custody of the books of the union ?—Yes.

17,407. You are the secretary ?—Yes.

17,408. It is your duty to enter all the monies that are paid, is it not ?—Yes.

17,409. Your object is for the protection of your trade as well as other purposes ?—Yes.

17,410. What other purposes are there as well as the protection of your trade ; do you pay money for funerals and in cases of sickness and accident ?—Yes, for sickness, death, and for loss of limbs.

17,411. The seat of your society is Bolton, but have you connexion with other unions of the same sort ?—Yes.

17,412. Where ?—We have our central place in Manchester.

17,413. Do you send delegates to Manchester ?—Yes.

17,414. How often do you send delegates, or do you send one to act for some time for you ?—It should be every three months, but oftener if required.

17,415. Every three months there is a meeting at Manchester, the central place, of delegates ?—Yes, that is a quarterly meeting.

17,416. Where are the other unions from which the delegates come besides yours at Bolton ?—For every district.

17,417. Just mention some of the other districts.—Leeds, Preston, Barnsley, all round, and they are all amalgamated in Manchester.

17,418. Are all those other unions in Lancashire, or all over the country ?—In Cheshire, Yorkshire, and Derbyshire.

17,419. They are all amalgamated together, and the seat of government where the delegates meet is Manchester ?—Yes.

17,420. They meet quarterly ?—Yes.

17,421. Is there a delegate from each town which has a union ?—Some send two or three, according to the number of members.

17,422. How many do you send ?—Sometimes we send one and sometimes two.

17,423. Who has the control of the funds ; have you the control of all your funds at Bolton ? I suppose you pay a certain subscription ?—I order it to be paid.

17,424. How often is the subscription, once a week or once a fortnight, or once a month, or how is it ?—The members subscribe weekly.

17,425. How much ?—1*s.* each, weekly.

17,426. Is the money placed to the account of the treasurer of the union ?—Yes.

17,427. Have you the power of ordering the disposition of that money of your club at Bolton as you please ?—The committee has to do that.

17,428. You have a committee ?—Yes ; and if the committee cannot do it, it is referred to the general meeting of the whole body, and they have to do it.

17,429. You say that you have the disposition of the money which you yourself subscribe among the 300 or 400 members ?—Yes.

17,430. What money do you subscribe to the general amalgamated body of delegates who meet here ?—In Manchester do you mean ?

17,431. Yes.—Sometimes it is more and sometimes it is less ; sometimes it is a farthing and a halfpenny a-head.

17,432. Have you a general body in Manchester ?—We have a general body in Manchester.

17,433. I suppose you have strikes in your trade ?—Yes.

17,434. Can a man work below a given rate of wages ?—Yes, if we allow it.

17,435. Do you allow it as a matter of fact ?—No.

17,436. Do you allow your union men to work with the non-union men ?—No.

17,437. If a master only employs non-union men, what do you do with him ?—We put it down as a black, and no respectable man will go near his shop.

17,438. You mean that no member of your union, which is your definition of a respectable man, will go near his shop ?—No.

17,439. And if he does go near his shop, what do you do with him ?—If he goes near, and if we cannot prevail upon him to keep away, we turn him out of the club.

17,440. Do you ever do anything else with him ?—No.

17,441. You use no physical force ?—No.

17,442. You do nothing of that sort ?—No.

17,443. I suppose you occasionally picket the non-union men ?—Yes, occasionally.

17,444. When did you last picket ?—It might be about three months since.

17,445. Whose premises where they that you picketed ?—Mr. Tomlinson's.

17,446. Is he at Bolton ?—Yes.

17,447. How many men do you send to picket the premises ?—It just depends.

17,448. How many did you send then ?—Sometimes we send two, or less ; sometimes three or four, and sometimes half a dozen.

17,449. How many did you send to picket Mr. Tomlinson's ?—Sometimes we sent more and sometimes less.

17,450. How long did the picketing go on ?—I dare-say it would last a good share of the three months, if not quite.

17,451. What did you pay the pickets ?—Nothing but the weekly wages.

17,452. That came out of your funds ?—Yes.

17,453. Did you get any assistance from other unions, or were your own funds enough ?—No.

17,454. What did that strike cost you altogether ?—I cannot say, we never reckoned it up ; it cost a good lump.

17,455. You have got your books here ?—Yes.

17,456. And did you enter pickets in those books ?—No, we did not put it down as pickets.

17,457. How did you put it down ?—As wages. We paid them the same as the men who were not picketing.

17,458. Was there any disturbance at the time between the pickets and the non-union men ?—It was represented as such.

FIFTEENTH DAY.

E. Fielding.

21 Sept. 1867.

17,459. Something very like a disturbance?—Yes.

17,460. What was the sort of thing that they said was done; were any blows exchanged?—They said so, but they could never prove it; we did not believe that ever there were; not through our men.

17,461. Do you believe that it was through the other men?—I do not know whether they ever left the door or not.

17,462. Do you know a person of the name of Benjamin Mason?—Yes.

17,463. Does he live in Bolton?—Yes.

17,464. Did you ever hear of his being constantly followed by the pickets or by your union men?—They have walked along with him, beside of him, but they have not said anything to him or done anything to him.

17,465. Have they been near enough to strike him?—I daresay they have, but I think they never have done.

17,466. Have they threatened him?—No.

17,467. Nothing of the sort?—No.

17,468. Was that a case of picketing?—Yes.

17,469. What other cases of picketing have you known lately?—That is the last.

17,470. That lasted three months; is it over now?—We have no pickets on; they have not been on for three weeks.

17,471. Is Mr. Tomlinson still employing non-union men?—Yes.

17,472. Have you given up picketing him?—Yes.

17,473. What made you give it up; did you find it of no use?—Because he will lick himself at the finish.

17,474. So you think you will gain your purpose that way?—Yes.

17,475. When was Mr. Tomlinson's strike over? You said that your men picketed him for three months?—They came out the latter end of last year.

17,476. How long before that was there another case? Have you had many cases of picketing in your union?—No, we had only one previous to that.

17,477. When was that?—That would be about 18 months since, as near as I can think.

17,478. You have never paid the men for doing anything else except picketing?—No.

17,479. Has any one of your men been charged for assaults?—Yes.

17,480. Who was that?—Jonah Winn and Benjamin Mason.

17,481. They were charged for assaulting non-union men?—No, those were the men who met the charge against the non-union men.

17,482. Was any fine put on?—No, they could not prove it.

17,483. Did you defend them?—Yes.

17,484. You paid money for defending them?—Yes.

17,485. To whom did you pay it?—Mr. Roberts.

17,486. Have any of your men been charged at any other time for assaults, whether the others were paid or not?—No, I never heard of any.

17,487. Are these the only men that you remember to have been charged for assaults, and for the defence of whom you paid money?—Yes.

17,488. They are the only men?—Yes.

17,489. About how much did you pay for the defence of those men?—About 30*l.*

17,490. Can you give me any notion how much the picketing cost you for those three months?—We paid the men 10*s.* a week whether they were picketing or not.

17,491. (*Mr. Chance.*) Unless I know how many men you employed I cannot form an opinion as to the amount?—There were 21 in all, besides their piecers and creelers that they had to employ themselves. We had all them to pay besides.

17,492. (*Chairman.*) You did not pay the men who picketed more than the men who were out on strike?—No.

17,493. How did you select the men to picket?—They picked them out themselves.

17,494. They chose themselves to picket?—Yes, they went on in their turns.

17,495. And you paid 21 men for each day for three months?—Yes, 10*s.* a week.

17,496. 10*s.* a week each man?—Yes.

17,497. You paid 21 men 10*s.* a week for each man?—Yes, I paid them for their children under nine years of age besides that.

17,498. How much did you pay for the children?—1*s.* 6*d.* a week.

17,499. (*Mr. Barstow.*) Does it take a long time to learn this trade of self-acting winding?—Yes.

17,500. (*Chairman.*) Do you allow men to have apprentices without your permission?—Some have two and some three. There are no apprentices in a mill; they are a great length of time before they become perfect.

17,501. May they have as many young ones to teach as they please without your permission?—Oh, yes.

17,502. Although there are no apprentices they may teach as many young hands as they like?—They may bring the mill full if they like.

17,503. Provided they belong to your union?—We do not meddle with children.

17,504. Provided the masters who teach them are members?—No.

17,505. (*Mr. Chance.*) What wages do the minders get?—They vary from 16*s.* up to 30*s.* odd.

17,506. You say that the men belonging to the union are respectable men; do you take into consideration the character of a man?—No, we never meddle with characters, only as far as this, we pay men when they are out of employment, and if they be discharged for drink or felony we do not pay them.

17,507. Unless felony is committed in the interests of the union, then you pay them?—Yes, if they are following up any of the rules of our trade.

17,508. (*Chairman.*) If your own particular union runs short of money do you then ask for money from the Amalgamated Union, the delegates of which sit here?—We do our best; if we want money we put an extra contribution on our own men.

17,509. Do you use for any purposes the money of the Amalgamated body from which the delegates come; do you get money from them when there has been a heavy strike?—We have certain rules to go by so that we can claim their assistance.

17,510. On what occasions do you claim money from them?—When we claim money from them we have to bring the case before them before bringing the shop out.

17,511. For what things can you get money from them?—For anything.

17,512. But you spend your own money first, and if you have not enough you ask them?—Yes.

The witness withdrew.

W. Ellison.

WILLIAM ELLISON sworn and examined.

17,513. (*Mr. Barstow.*) What is the name of the society of which you are secretary?—The Ironfounders' Society of Great Britain and Ireland.

17,514. You are secretary of the local branch?—Yes.

17,515. What do you call that local branch?—The Little Bolton Branch of the Ironfounders' Society of Great Britain and Ireland.

17,516. How many members have you in your lodge?—230.

17,517. What do you contribute?—1*s.* a week contribution.

17,518. I suppose that at Bolton you have both lodge meetings and general meetings?—We have no lodge meetings at all; they are general meetings, quarterly and special.

17,519. Then I suppose you send delegates to some general meeting of your body?—No, we do not; our body is governed by an executive committee in London.

17,520. I suppose the object of your society is the protection of your labour?—Yes; and for sickness, funerals, and accidents.

17,521. It is the protection of labour with which we have to do.—I am aware of that.

17,522. I presume that that is the cause sometimes

of differences between the society and the masters?—Yes.

17,523. And, not to go into particulars, those differences sometimes result in strikes?—We have had no strike in Bolton for the last eight or nine years to my knowledge.

17,524. Do you know Mr. Edge of Bolton?—Yes.

17,525. You had some difficulty with him I believe?—Not that I am aware of.

17,526. In August 1866 were not your men on strike at Mr. Edge's works? Do you remember any demand for an advance of 2*s.* per week being made there?—Not that I am aware of.

17,527. Were you secretary at that time?—Yes.

17,528. And I suppose such a thing would come under your knowledge?—It would.

17,529. Did no such thing as a strike happen at that time?—Not that I am aware of; I have our minute book here; we keep all our minutes in a book.

17,530. Please turn to the 6th of August.—We had a special general meeting on the 1st of August; they did not allude specially to Mr. Edge's case.

17,531. Was this after your meeting?—Yes.

17,532. The advance of wages was demanded after the meeting?—Yes, generally in the town; not particularly at Mr. Edge's.

17,533. Are you aware whether Mr. Edge consented to raise the wages?—I am not.

17,534. What was the result of the refusal to raise the wages?—The result was that the men left.

17,535. I believe that was your only strike?—We did not call it a strike, we called it a lock-out.

17,536. The masters call it a strike, and the men call it a lock-out?—Yes, we call it a lock-out.

17,537. In consequence of that strike or lock-out, whichever it was, I suppose Mr. Edge endeavoured to supply himself with workmen from elsewhere?—He did.

17,538. Did you take any measures to prevent those workmen coming to his employment?—No.

17,539. Were Mr. Edge's premises picketed?—They were not.

17,540. Do you mean that no men of your society watched Mr. Edge's premises?—I do.

17,541. I do not say, did they have the authority of the society, but I ask, did no member of your society, with or without the authority of the society, picket Mr. Edge's premises?—No, they did not.

17,542. You know that of your own knowledge?—I do of my own knowledge.

17,543. Are you aware whether any men, whether of your society or not, watched Mr. Edge's premises?—I do not know anything about the men not belonging to our society.

17,544. Has it come to your knowledge that any body of men watched Mr. Edge's premises?—I am not aware of any body of men watching Mr. Edge's premises, none whatever.

17,545. Are you aware whether any non-society hands who came to work there were assaulted?—I am.

17,546. They were assaulted?—Yes.

17,547. Who assaulted them?—There was a street brawl, nothing near the shop at all.

17,548. Not near the shop?—No, it was at the top end of Deansgate, near the "White Lion," and the shop is in Burke Street, a quarter of a mile from it.

17,549. Who were the parties at the brawl?—I do not know; I can only give the particulars as to what the foreman, a non-society man, told me. This was after he left Mr. Edge's employment, and he said that it originated through him; he had had some beer, and three of our men stood at the top of Deansgate; he went up to them and asked how they were getting on; that led to words, and he struck one of them and then they struck him back.

17,550. Is that man a member of your society?—No, he has not been for years.

17,551. He has not become a member since, has he?—No, he has not.

17,552. In consequence of that brawl was there any charge brought before the justices?—I believe there was.

17,553. Who were brought before the justices?—I cannot say, because I did not take any particular notice, because I was not one to attend the court.

17,554. You do not remember who were the defendants before the justices?—No.

17,555. Do you know their names?—No.

17,556. Do you know whether any of them were society men?—I think three men were society men; there were three men in the affair at any rate.

17,557. Do you know what was done to them?—I cannot say. I believe they were bound over to keep the peace. I am not positive.

17,558. We do not expect you to know these things positively; we only ask what you may know; if you know you will tell us, I am sure?—Of course I will.

17,559. Were they defended by anyone before the justices?—They were not.

17,560. No one appeared for them?—No; we censure such conduct in our society.

17,561. You would not under any circumstances defend the men who had misconducted themselves in a riot of this sort?—No; our society censures such conduct as that.

17,562. While you have been secretary has it happened that you have paid money for the defence of men?—No.

17,563. How long have you been secretary?—Three and a half years.

17,564. During that time you have never paid for the defence of any of your members before the justices?—We have not.

17,565. I understand you to say that you have not paid anything for picketing?—We do not agree with that system; we have not paid anything for that; in some branches they do, but the general society will not back it out; our branch is opposed to picketing.

17,566. It is the very ground of your society that you pay men on strike or when they are locked out?—Yes, in case of any dispute between masters and men we pay them.

17,567. They picket the premises where they have been at work, or not, as they like?—We leave that to themselves; we are never responsible for it if they do.

17,568. Have you heard of any other non-society men in Mr. Edge's employment being assaulted?—Not that I am aware of.

17,569. The only man you know of is this foreman?—The foreman; it may have been so, but not to my knowledge.

17,570. What is his name?—Samuel Lax.

17,571. Do you remember a man named James Wilkinson being assaulted?—I do not.

17,572. And some other man being beaten in the street by members of your society?—From Mr. Edge's shop?

17,573. Yes.—I am not aware of it.

17,574. It has not come to your knowledge?—No, it has not; if it had done I would have told you of it in a minute.

17,575. You have told us all with reference to Mr. Edge's case?—Yes. We had a case this year.

17,576. Tell us about that case?—We had a dispute with Mr. Marsden, of the Britannia foundry, the latter end of 1866.

17,577. Did any breach of the peace result from that?—Yes, he gave our men notice for a reduction of 2*s.* a week; they brought the case to the society, and we investigated it, and sent it to London to our executive committee, and they investigated it, and ordered the men to come out and resist the 2*s.* a week reduction by Mr. Marsden. When he heard that he withdrew his notice and let them work full price: a week or two after the masters had a meeting and they ordered Mr. Marsden to give our men notice again to reduce them; the notice was up on the 30th of December last year; our men came out and some of them are out yet through this notice. I believe about March a breach of the peace took place between our men and the non-society men; they were all drinking together

FIFTEENTH DAY.

W. Ellison.

21 Sept. 1867.

in a public-house, and they came out into the street and fought close to the shop. It was settled by the men. It came before the magistrates, but the magistrates discharged it. It was settled prior to going into court. They settled it among themselves.

17,578. The non-society men and the society men were all drinking together?—Yes, in a public-house.

17,579. Are those all the breaches of the peace that you know of?—Yes, they are, in our society.

17,580. Are you in a position to know the fact that your society has not paid any money for picketing?—No, we do not pay any money for picketing.

17,581. (*Chairman.*) I understand that you send up to London?—Yes.

17,582. You call your society a branch; does the principal society exist in London?—No, we are all principals; but our society is governed by an executive in London.

17,583. How many branches do you know of in your moulders' union; you called yours a branch?—We have somewhere about 107 branches.

17,584. Are they scattered over the country?—Yes.

17,585. Tell me generally where they are scattered; is it throughout Lancashire or throughout the country?—Throughout the country, England, Ireland, and Wales.

17,586. And the executive committee which regulates you is in London?—Yes.

17,587. Do you send delegates to London?—No.

17,588. How do you communicate with London, only as occasion calls for it?—They are elected in the executive from seven branches near London.

17,589. Seven branches near London elect an executive committee?—Yes.

17,590. Give me the names of the seven branches for the government of the society?—"For the general "government of the society there shall be an executive "committee, which shall consist of seven members "elected from the governing branch, Greenwich, "East London, North London, and Chelsea branches, "namely, two from the governing branch, one from "Greenwich, two from East London, one from "North London, and one from Chelsea."

17,591. That executive committee regulates and rules your society?—No, our rules are made at the delegates' meeting. Sometimes that takes place every five years.

17,592. In London?—No, it is left to the society; sometimes in London, and sometimes in Manchester.

17,593. What power has the body in London over the branches?—They have none; they see that the laws are strictly conformed to, and they deal with cases where the law does not strictly deal with them, where the law is silent.

17,594. And they deal with cases which may be against law, do they not?—No, we do not deal with cases against the law.

17,595. Have they any power over the funds in London?—The law provides for our funds.

17,596. Your branch has its own contribution and its own fund?—Yes.

17,597. That money I suppose goes for the purposes of your branch, and only of your branch?—For the general body of the whole society.

17,598. Of your branch?—No, the branch of trade; not of our branch only.

17,599. Of how many members does your branch union consist of which you are secretary?—230.

17,600. Do the subscriptions of those 230 go for the benefit of those 230, or do you give them elsewhere?—The benefit of them goes to the society at large.

17,601. Which is the society at large, the 107 branches?—Yes.

17,602. You remit it from one branch to another?—Yes.

17,603. Where is the central place?—Each branch has its own money in its own district; they have their own banking account; but supposing our executive committee required some money in London to invest in some other bank in London they would send for it from our branch.

17,604. And if you had any you would send it?—Yes, we must send it to be invested by the society in London.

17,605. How is the money of your particular branch used?—It is used for donations principally, and for sickness, superannuations, and accidents.

17,606. You said that there had been no strikes in your trade?—We do not call them strikes.

17,607. Lock-outs?—We have had one only.

17,608. You pay the wages of the men who are locked out?—We do if they are sanctioned by the executive; they get 11*s.* per week.

17,609. When was the last, the one you mention?—Mr. Marsden's case was the last one.

17,610. How much did that cost you, have you any notion?—I should say it would cost us something like 50*l.*

17,611. How long did it last?—The dispute with us only lasted 12 weeks, strictly speaking it only lasted six weeks; we only paid them the dispute money six weeks; but for the children under six years of age, their wives and families, we paid 14 weeks.

17,612. (*Mr. Chance.*) I do not understand you about the funds; are the funds which are contributed by you at Bolton used solely for your members, or are they used for the other branches?—That depends.

17,613. Supposing an accident occurs in another branch, could they come into your branch for the purpose of receiving a donation towards it?—No; if they are short of money anywhere the executive writes to the branch where there is the most money, and they have to send a remittance.

17,614. Can the executive distribute the money as they think just, and as occasion arises?—Yes.

17,615. Supposing a master reduces the wages below what you consider just, in such a case as that you withdraw the men?—Our men draw off us; I do not understand you.

17,616. Supposing Mr. Marsden wanted to reduce 2*s.*, in such a case as that would you object to it, and would the men strike?—Of course they are locked out.

17,617. You draw off the men; you take them away?—We took the men away from Mr. Marsden's; that is what we do if the executive committee sanctions it.

17,618. He was willing to employ them if they would work?—Yes.

17,619. Is there not a distinction between a lock-out and a strike; where you take the men away that is a strike?—No, the cause is through him.

17,620. He is willing to receive them?—If they will not work for a certain figure he locks them out; he says, "I do not want your services any longer, unless you work for a certain figure," and he locks them out.

17,621. He is willing to receive the men if they will work for a certain price?—Yes, if they work at what he thinks fit.

17,622. I want to know the distinction between a lock-out and a strike?—Supposing we want a general advance; we will say that we will go in for 2*s.* a week, and we will say that if the masters will not give it us we will strike.

17,623. You consider that the difference between a strike and a lock-out depends upon whether it is your calling for an advance of wages, or whether it is the masters asking for a reduction of wages?—It does. If the affair takes place on our part we call it a strike, if it takes place on the masters part we call it a lock-out.

17,624. I thought that a lock-out was in consequence of the master sending off his men and refusing to take them in upon any terms?—It is a lock-out.

17,625. He does not lock them out, because he is willing to take them back if they will come back at the reduction?—Yes.

17,626. (*Mr. Barstow.*) Then according to your

definition, and according to the resolution of the 1st of August, it does not in the least matter; it is a mere quibble about names?—I was mistaken in using the word lock-out for strike.

17,627. You resisted me very strongly when I used the word "strike;" what are the words there?—"That "we confirm the decision of the committee appointed "to manage the wage question with regard to mem- "bers paying as a levy their advance of 2*s.* per week "towards those who have to come out; the same 2*s.* "to be paid to them to make their donation into an "actual allowance."

17,628. (*Chairman.*) I suppose if there is a dispute between the masters and men the case is brought before the executive committee, and they decide whether it is a proper dispute or not for a lock-out or a strike?—Yes.

17,629. Have you ever known a case where you have decided that the masters are in the right upon a matter, whether as a lock-out or a strike?—Many a lot.

17,630. You have known a dispute between your men and masters brought before the executive committee, and they have decided for the masters?—Yes, many a time; that is quite common. I have brought two letters with me in which cases were decided for the masters.

17,631. Was that a dispute about wages?—Yes.

17,632. A case of a strike?—It was the masters reducing the wages.

17,633. And they decided that the masters were right in reducing the wages?—Of course they decided they were right so far as the circumstances took it.

17,634. Can you tell me at all the sort of circumstances in which the executive committee came to the conclusion that the masters were right in claiming a reduction; it does not appear from our inquiry here that that is quite a matter of course, but an exception?—They have settled plenty of cases in favour of the masters, but circumstances alter cases they say; and it is not the time for us to waste money with regard to strikes or lock-outs, and therefore, rather than waste money in strikes or lock-outs at the present time, we are willing that the men should have a reduction rather than come out.

17,635. Whether right or wrong, trade not being good, they thought it was not worth while wasting money upon it, and that the men had better give way?—Yes. I was requested by our branch to ask the Commissioners this: The masters of Bolton had an association like we had at the time the lock-out took place at Mr. Marsden's, and they issued a circular with the men's names attached to it, and the men have been kept out of work since then.

17,636. The men who were locked out or struck?—Yes.

17,637. How many men were there?—32.

17,638. A circular was issued with their names attached to it?—Yes.

17,639. Who issued the circular?—The iron masters.

17,640. Had these 32 men been working for Mr. Marsden?—Yes.

17,641. They issued a circular; what do you say upon that; was it injurious to the 32 men?—It was injurious; when they asked for work elsewhere the masters said they could not engage them because their names were on the circular.

17,642. What you seem to complain of is that the names of the 32 men who had struck against the masters should be known to the world?—Yes, of course.

17,643. Why?—We think that the masters' actions ought to be made known as well as the men's.

17,644. Could not you have published the names of the masters?—We do not do anything of the sort.

17,645. You complain of the masters publishing the names of the 32 men who struck. Supposing the name of Mr. Marsden was equally sent round to Manchester upon whose premises and works this strike had arisen; that would be the same case?—Of course; we did not publish Mr. Marsden's name.

17,646. It was well known?—Yes, it was publicly known; but this was a private thing carried on between the masters, and they do not make their actions known the same as the men do; it is kept more to the masters privately,

17,647. Do you mean that a circular of these names was sent privately round to the masters?—Yes, that is what I mean.

17,648. You would have liked it to have been in the papers?—We did not want their names to appear at all.

17,649. Why?—What we want in the papers is, that the actions of the masters should be made known as well as the actions of the men.

17,650. Mr. Marsden's conduct was publicly known?—Not publicly known. I said his actions were known privately among the masters after his publishing the circular.

17,651. There had been a strike, or whatever you may choose to call it, at Mr. Marsden's, which was generally known throughout the whole of Bolton, and probably throughout the whole of Lancashire?—Yes.

17,652. And you object to the names of those 32 men who had struck being publicly known?—Yes.

17,653. Therefore, although Mr. Marsden's name was publicly known throughout the whole of Lancashire, you object to the names of the 32 men being known in the district?—We should not object if Mr. Marsden's name was known, but we object that he should have issued the men's names; we call it a gross act of intimidation against our men.

17,654. (*Mr. Barstow.*) That seems just the same as the master tailors in London this year. I believe they published a list of the men, and they bind themselves not to employ them?—I am not at all acquainted with the actions of the tailors.

17,655. I only know it from the newspapers; there is some litigation about it now?—I know that something is going on between the tailors.

17,656. (*Mr. Chance.*) Supposing a master were to reduce his wages improperly, would not they have made his name known throughout the whole of your unions?—No.

17,657. It would be brought before the meeting?—Yes.

17,658. Therefore his name would be known to all the union men in your society as a master who had improperly dismissed his men?—No, we do not bring the names before all the members of the society: only locally.

17,659. Would it be brought before the general meeting?—Yes.

17,660. Therefore the name of the master who improperly reduced his wages would be brought before a public meeting?—Before a meeting of the members.

17,661. You would let the master's name be known to the meeting as a master who had reduced his wages improperly?—Yes.

17,662. What is the difference between the two cases?—The masters did not send it out; they sent it out in a private circular.

17,663. It being brought before your meeting it would extend through all the other branches of the society?—No.

17,664. (*Chairman.*) Where did Mr. Marsden send the names of the 32 men?—When I went on a deputation to him he told his cashier to reach down the wage book, and said the names of the men to the secretary in Liverpool.

17,665. What secretary?—The secretary of the General Masters' Iron Association, the general Lancashire branch.

17,666. What followed upon these men's names being published; have they been unable to get employment?—Yes.

17,667. Are some of them out now?—Yes.

17,668. How many?—14, I believe.

17,669. Are you paying them?—We are paying them their donation.

FIFTEENTH DAY.

W. Ellison.

21 Sept. 1867.

17,670. The 14 men?—Yes.

17,671. Does that donation amount to so much as their wages?—They are receiving 7*s.* a week now.

17,672. You are supporting these men so long as they are unemployed?—No; we pay a man 9*s.* a week for his donation for 13 weeks, then 8*s.* for his donation for 13 weeks, then 7*s.* for six weeks, then 5*s.* a week for 52 weeks; his donation ceases at the end of two years.

17,673. It extends over a period of two years?—Yes.

17,674. (*Mr. Barstow.*) Do you give any name to a master who employs non-union men, or any name to his shop?—No.

17,675. You take no notice of it whatever?—No.

17,676. You were not in court when the last witness was examined?—Part of the time.

17,677–8. Did you hear him say that when a master employs non-union men they called his shop a black shop, and that no respectable man would go to it?—No, we do not call them any ill names; we bring our men out and leave them to themselves; we bring deputations to the masters and try and arrange things, but we try all the means we possibly can before we bring the men out, in the way of deputations to the employers.

(*Chairman.*) You said that you wanted to mention to the Commission that case which you named. It is not within their province to inquire into it. I explained the other day what the things were with which it was our duty to inquire, namely, cases of intimidation, outrage, and wrong; and I have explained what was considered to be the meaning of the Act of Parliament. That case, whatever it may be, is not within our province. I am glad to hear anything you have to say, but we have nothing to do with that. There is a Commission sitting in London who will investigate everything connected with the whole system of unions; our province is confined to those particular words in the Act of Parliament which I have mentioned to you, but a Commission is sitting in London consisting of very eminent persons, members of parliament and others, where everything relating to trades unions can be mentioned. If your body should think it right to mention anything relating to trades unions you can mention it before them.

(*Mr. Barstow.*) That very subject which you mention now has been repeatedly discussed before. I know that the subject of the iron trade has not been discussed yet, but it will be discussed very shortly.

17,679. (*Chairman.*) Are you in the trade now?—No, I am debarred from working in the trade now. I cannot get a job.

17,680. How are you debarred?—Through being secretary.

17,681. Do you mean that you have too much to do?—No; I did work at my trade, but it is 12 months since I worked at it. I cannot get a job in the town. I have asked every foundry in the town and I cannot get a job; they do not like to employ officers of trade societies, especially in the iron branch.

17,682. What do you do?—I keep a news shop and a tobacconist's shop now.

17,683. How long is it since you have given up being a moulder, ever since you have been secretary?—No, I worked over two years at the trade after, but I had to work on sufferance; I worked in several shops. The masters said they had nothing against me so far as regards my work, but I was discharged and they could not give me any ground for discharging me.

17,684. (*Mr. Barstow.*) Is there greater bitterness of feeling in your trade between the employer and the employed than there used to be?—It has originated in the last few months; we worked amicably together until the last six months, and we have had bitter feelings lately with the masters.

17,685. About wages?—About wages.

17,686. That resolution of the 1st of August had something to do with that, had it not?—Yes, of course it had. The Bolton society was the last in our trade to ask for an advance, and the other societies had had it twelvemonths before we asked for it, and we told the masters why we asked for it. The reasons that we gave the masters they said were just, and they gave it without a murmur. There was only 62, I believe, getting it out of our members, out of 230 men, and of course when we asked for the advance we asked because everything had risen in proportion which we consumed in our households; our money which we were getting would not maintain our families as they ought to be maintained, and we thought that we were justified in asking for an advance of wages.

17,687. I thought you said that the trade in your branch was very bad at present?—In August last that sort of trade was exceedingly good.

The witness withdrew.

M. Morgan.

MARK MORGAN sworn and examined.

17,688. (*Mr. Chance.*) Are you the secretary to the tailors' union?—To the tailors' branch at Bolton.

17,689. Have you more than one branch at Bolton?—Two branches.

17,690. Have you a general society of which your society forms a branch?—There are two separate societies.

17,691. But is there a general society to which those two branches belong?—Yes, there is the general amalgamation.

17,692. Where does the general amalgamation society hold its meetings?—In Manchester.

17,693. How many branches are there belonging to the society?—I should think that there are about 80 towns belonging to it.

17,694. Over what part of the country does that society spread?—It is through all the provinces.

17,695. Does it include London?—No, London is independent.

17,696. Then your society has nothing whatever to do with the London society?—Not so far as the amalgamation goes; they have a separate amalgamation in London.

17,697. Then do you subscribe to the general society?—We subscribe to the Manchester amalgamation.

17,698. Are there also contributions to your branches?—Yes, to the branches.

17,699. What are the contributions to the branch society?—4*d.* a week.

17,700. And how often are those usually collected?—Every fortnight.

17,701. What are the subscriptions to the amalgamated society?—We pay 3*d.* a member per quarter.

17,702. You have the control over your own funds as far as the branch is concerned?—Yes.

17,703. And are the funds of your branch only applicable to the purposes of the branch?—No one has anything to do with our funds, only the branch, any further than paying the amalgamation levy; that is a quarterly levy.

17,704. Then the amalgamations, as I understand you, have no power over your funds?—Not in the least.

17,705. Your funds are entirely separate and independent?—Yes.

17,706. And I suppose that all matters connected with the advance or the reduction of wages come before your society?—They do.

17,707. When a master reduces his wages is that brought before your meeting?—If a master wishes to reduce the price of a garment it is brought before a general meeting, and if the general meeting concludes to oppose it they can do so; but the proper course is to get the sanction of the amalgamation, and if the amalgamation do not recognize it the town is at liberty to strike, but it has to support itself.

17,708. Then, unless the amalgamated society

recognize the strike, they will not pay towards it?—No, the town must support its own men.

17,709. You are at liberty, as I understand, to draw off your men, but you must support them?—We must support them.

17,710. Have strikes happened in your society lately?—There has been one this year.

17,711. And was there one also in 1866, last year?—There was one in 1866, but I was not secretary during that strike.

17,712. How long have you been a member of the union?—Well, I was not a member at the time that strike occurred; I had been a member up to the January previous to that.

17,713. During that time you had ceased to be a member?—I had.

17,714. I dare say you can tell us what occurred?—Well, I can tell you some portion of it which I got from the public papers at the time; that I think was Mr. Horrocks's strike. The strike I think was over making police clothing. We have what we call a price list, in which there is the price for every garment agreed upon between the masters and the men. From what I understand there was some police clothing wanted making, and Mr. Horrocks sent in a tender; but previous to doing so, he asked his men what they would make the garments for; the men I think offered to make the garments at a slight reduction off the price list. Mr. Horrocks went in and got the job, and after agreeing to make the clothes, a difference arose between him and the manufacturer as to the price of the cloth, and then he wanted to reduce the men, and the men naturally objected. That I believe was the sole origin of that strike at Mr. Horrocks's.

17,715. And then I suppose they left work?—They left work.

17,716. In consequence of Mr. Horrocks refusing to give the price which they demanded?—They told him at what price they would make the garments, and then afterwards he wanted to reduce them again.

17,717. Do you remember whether any disturbances took place in consequence of that strike?—A disturbance occurred not far from Mr. Horrocks's workshop.

17,718. Do you know whether Mr. Horrocks endeavoured to get fresh hands?—He did get fresh hands.

17,719. Were those fresh hands non-union men?—They were.

17,720. I suppose that would be necessary, the union men will not work with the non-union men?—In some cases they will, but in that case they would not.

17,721. Is there any rule in your society that non-union men shall not be allowed to work with union men?—In the case of a strike, if the society brings men, and non-union men go in, the society men are not allowed to work with them; but if a man coming into Bolton gets work in a non-society shop we do not prevent him from working if he is a society man, and we do not prevent non-society men from working in a society shop. We may ask non-society men perhaps to join the society, but we do not further interfere with them.

17,722. When you draw off your men in consequence of a strike, you do not allow the society men to go in?—We do not.

17,723. And in this case Mr. Horrocks got fresh hands?—He did.

17,724. Upon that were Mr. Horrocks's premises picketed?—They were.

17,725. Is that the practice under those circumstances?—Whenever a strike occurs we always put the men in that shop on picket.

17,726. How many men were employed on Mr. Horricks's premises?—I think there were about ten men brought out there, and if they all remained in the town they would all be put on picket.

17,727. What would be the object of putting so many men on picket?—It is to keep them employed; they were put on in turns.

17,728. Are they not put on all at once?—They go on in turns.

17,729. Do you pay them wages during that time?—We allow them 9*s.* a week during the time they are on strike. When they are receiving this strike money we appoint them out in numbers to picket.

17,730. Do you not pay the men on picket any more than the men on strike?—No, it is men that are on strike. If a shop has struck, and there is work to be had anywhere, we do not picket.

17,731. What is the object of picketing?—The object of picketing is to watch the shop, and see what men are at work there.

17,732. Supposing that they are non-society men, is the object always to endeavour to prevent non-society men from working?—The object of the picket is to try to get the non-society men to leave the place.

17,733. Supposing the non-society men object to leave the place, what do the pickets do then?—They are expected to take no further notice of them.

17,734. But do they not, as a general rule, make use of some intimidation or coercion to induce them to join the union or leave the place?—I do not know; it was before I was secretary. I know that men do use words occasionally to men that are working.

17,735. Have you heard the word "knobstick" very often used?—Yes, that is common enough.

17,736. I suppose when men are on picket that is a common mode of addressing a non-union man?—When on picket or off picket.

17,737. Do you remember, at the strike at Horrocks's, a man of the name of John Campbell committing an assault upon some men who were working for Horrocks?—I remember reading in the papers at the time of a man being sent to prison for it, but from what I gathered at the time I think the other parties were the aggressors, though Campbell suffered for it.

17,738. The magistrates seem to have thought differently?—The magistrates thought different.

17,739. Did your society provide funds for defending Campbell?—I think if there could have been an attorney got in time to defend him the society would have paid his expenses, but I do not think there was an attorney engaged.

17,740. Would it be your practice to pay the expenses of the attorney whenever an assault was committed by a picket on a non-society man, and he was taken before the magistrates?—No; but if we thought the non-society man made an attack upon one of our pickets, or upon one of our society men, then we should consider it our duty to engage a pleader for our man.

17,741. But in all cases where there is an assault by one of your pickets on a non-society man, do you not pay the expenses of the defence?—If he caused the assault, and the society was aware of it, I do not think they would pay the expenses of an attorney. If they actually knew that the society man was the offender, I do not think that the society would pay the expenses.

17,742. Have you ever had a case arise in your experience as secretary where that occurred?—No.

17,743. You mentioned just now that there was a strike this year?—Yes.

17,744. Where was that?—At Mr. Roscoe's, in Bradshaw Gate.

17,745. Was there any breach of the peace in that case?—No.

17,746. There was picketing as usual I suppose?—The men that we brought out there went away out of the town, with the exception of three, and they got work. If there was picketing it might be for about three days, but the men that remained in the town got work the same week.

17,747. But the natural result of picketing is to lead to a breach of the peace, is it not?—I do not think it is.

17,748. A number of men go picketing and calling non-society men "knobsticks;" what is more likely than that to cause a breach of the peace?—A picket is not put on to insult men. If we put on a picket we tell them, "If you can meet with those parties, try and

FIFTEENTH DAY.

M. Morgan.

21 Sept. 1867.

"persuade them to leave the place; if they wish to "leave the town we will give them a card." We do not expect them to begin to blackguard parties because they will not agree with them.

17,749. But, as a fact, of course it very often does lead to a breach of the peace. Do you remember another person also being sent to prison for throwing stones at a non-union man?—No, I do not remember that in Bolton.

17,750. You cannot tell me of your own knowledge whether any money has ever been paid for defending any of those men for committing an assault?—I do not know; I cannot tell whether there was any money paid or not. I do not know that any money was paid for defending Campbell; I do not think he was defended.

17,751. Have you your books here?—Yes. I find here on November 5th 1866, there is the commencement of Mr. Horrocks's strike or lock-out, whichever you like to call it.

17,752. I suppose if any money was paid for defending a charge of assault it would appear there?—Yes, it would have to be entered what it was for.

17,753. Under what head would it appear?—Well, it would be for lawyer's expenses "paid for defending So-and-so."

17,754. Is there any entry of lawyer's expenses in the book?—Here are the donations that were paid——

17,755. If you will hand the book up I will look through it.—You will find entries at both ends of the book, all connected with that business (*handing the book to the Court*).

17,756. I see the expression here that Mr. Horrocks's shop shall be "in block;" what does that mean?—It is drawing the men out and not letting them have any men.

17,757. It looks as if it was blocking them up so that no person could work for them?—The society men are drawn out and he is allowed to have no society men work for him; that is what "blocking" means.

17,758. If any payments were made for defending a man under those circumstances would they appear in the minute book?—There would have to be a minute of what the expense was for.

17,759. This is not the cash-book, is it?—No.

17,760. Have you the cash-book there?—Yes.

17,761. Is there an entry about defending anybody in 1866; I suppose if any money were paid for any purpose of that kind it would be the duty of the secretary to enter it in this book, would it not?—Yes.

17,762. Who would pay the money?—The secretary would make a cheque, and the landlord of the house would pay the money.

17,763. Have you not a treasurer?—We have a treasurer, but the landlord pays all monies.

17,764. Does this book contain all the disbursements and receipts?—It contains all I think from 1864.

17,765. (*Chairman.*) I see here, "Secondly, that "the men be called from Mr. Roscoe's and Brooks's "shops until the machines are dispensed with?"—Yes, I think that that is last April.

17,766. And that "300 bills be printed and "circulated of the names of those who would not "comply with the wish of the society?"—Yes.

17,767. So that I see you publish the names of those who will not comply with your wishes?—We did publish the names of about four.

17,768. The last person who was here as a witness belonging to another society complained that the masters published the names of those who went away on strike, and I see here that 300 bills were printed and circulated with the names of those who would not comply with the wishes of the union. Did you do it?—Yes, we did.

17,769. What did you do with the bills?—We sent them round to various towns.

17,770. To how many towns did you send them?—It was within about 10 or 12 miles round Bolton, just to the tailors' society.

17,771. And the consequence of that would be, I suppose, that those men would not get employed in any of those towns; that is so, is it not?—There were only four men; the men did not leave the town.

17,772. But if they did that would be the consequence of it, and that was your object?—It was our object to let the society men know the parties who would not agree to our rules.

17,773. And it was also an object that they should not be employed in any other town?—We knew very well they would not go out of the town.

17,774. Then what was the use of sending the bills round to other places?—It was to let the other tailors know who those parties were.

17,775. But what was the use of letting them know who they were if the men would not leave Bolton?—Some of those men had been working in Blackburn and Manchester, and towns round about.

17,776. But you said you thought that they never would leave Bolton?—No, I did not think they would ever leave Bolton.

17,777. But was it, in case they left Bolton, to make it impossible for them to get work?—If they went to other towns and met society men I daresay the society men would object to work with them.

17,778. That was your object, of course?—Well, that was an object.

17,779. Have you ever heard of anything of that sort before?—It is the first case that I have known.

17,780. Did you send a bill round to each town? There were 300 bills; how many towns do you think you sent them to?—We might send them to about 10 towns, for about 10 or 12 miles round.

17,781. What was the machine that caused this resolution?—It was a sewing-machine that Mr. Roscoe got into his shop, and his men, without consulting the society, agreed with him to work at a certain price, and the society thought that they should have consulted the members before they took this upon themselves.

17,782. Then the tailors are against machinery being used as well as others?—Some of the tailors are against it.

17,783. Your union is against it?—At that time there was a feeling against it, but I think had those parties come and explained to the society what they were going to do, that would never have occurred.

17,784. Has that feeling worn off now?—The feeling has partly gone off now, but there was a feeling against it, and that caused the strike.

17,785. But is there a feeling against the machine among tailors?—There is a feeling against the machine among tailors.

17,786. Is there any machine now employed among tailors for sewing?—Yes.

17,787. Do your union tailors work with them?—Yes.

17,788. How many places are there where a machine is used?—There are about three places at which the machines are worked.

17,789. Do you allow your union men to work there?—Yes.

17,790. Do they get the same wages there as they get at other places where no machines are used?—No, they do not get the same wages, because the machine gets one half of the work.

17,791. But do the men employed in the tailoring business where machines are used get the same wages as your union men who are employed in other places where no machine is used?—Yes, they get the same wages.

17,792. Then you allow them to work where the machines are used?—We allow them to work where the machines are used.

17,793. It was only last April that this resolution was come to; what was the dispute between your men and Mr. Roscoe?—Mr. Roscoe brought a machine in, and those men agreed with him to work after the machine, and would not satisfy the society what price they were getting for their labour.

17,794. Then it was the men who did not get your permission as to the wages which they were to receive, and that was the reason that you endeavoured to

punish them in this way?—We withdrew the other men out of the shop. We asked them to leave and they would not.

17,795. Were they getting low wages, or would they not tell you what wages they were getting?—They would not tell us what wages they were getting; they would give us no information.

17,796. And because they would not tell you what it was they were individually receiving you withdrew the other men from the shop, did you?—The other men were withdrawn.

17,797. How many were withdrawn?—I think there were three.

17,798. I see also that your society undertook to regulate the times at which your men should work, did they not?—Yes.

17,799. "Moved, that the hours of work be from "7 in the morning to 7 in the afternoon, and on Sa- "turdays from 7 in the morning to 2 in the afternoon?" —Yes.

17,800. Supposing any of your men, without your gracious permission, chose to work a little later to get a little more wages on Saturday, would you allow that?—Yes, we allow that, and then they get paid overtime for it.

17,801. What is the effect of your resolutions; is it that a man may work, but that if he works beyond those hours he must have extra wages?—Yes.

17,802. But he must not work at the same wages as the other men beyond those hours?—What caused that resolution to be passed was that there were some men who were working about 20 hours a day.

17,803. Well, why should they not do it if they liked?—Because it was injuring the other men that were working along with them.

17,804. Then you have in your opinion a right to control freedom of labour among the operative tailors? —The reason that that resolution was passed was that there were men working 20 hours a day, and there were men in the same shop who could not work 10 hours a day.

17,805. Then you think that you have the right to restrict the freedom of labour by saying, "You shall only work a given time?"—By restricting the hours of labour the labour was divided.

17,806. Therefore you will not allow a man to work more than that given time unless he gets something extra for it?—No.

17,807. You control as much as you can the freedom of labour amongst the operative tailors?—The masters were solicited and they were willing, and then the resolution was passed. A deputation waited upon the masters.

17,808. That is the freedom of labour which you permit to exist in the tailoring trade?—It was a resolution, as it were, between the masters and the men, and that is the minute which was passed.

17,809. (*Mr. Chance.*) John Campbell was the man who was sent to prison, was he not?—Yes.

17,810. He was a member of your union, was he not?—Not being the secretary at the time I do not know, but I fancy he must have been.

17,811. I see an item here, "December the 31st, Campbell's sister, 8*s.*;" that was soon after the strike took place. What item was that?—Campbell's sister was depending upon him for a livelihood. When he was sent to prison the society agreed to pay her 8*s.* a week to keep her on until the time when he came out of prison. There was a grant given to her of 8*s.* a week; I think there is four weeks there at 8*s.* a week.

17,812. During the time he was in prison she received 8*s.* a week from the society?—Yes.

17,813. I see another 8*s.* here?—There are four 8*s.*, I think.

17,814. That would correspond with the time that Campbell was in prison, a month?—Yes.

17,815. Then I see, under the date of January the 14th, "John Campbell, 1*l.*?"—Yes, that was after he came out of prison. The trade was dull at that time, and the man had nothing to take out, and they gave him 1*l.* to do what he had a mind to.

17,816. That was the action taken by the society after Campbell had been convicted for assaulting another man?—They did not think that Campbell was the man that should have been sent to prison.

17,817. But he was sent to prison?—He was sent to prison, there is no doubt about that.

17,818. Those payments were made by the union to Campbell and his family?—Yes, they were made to his family.

17,819. (*Chairman.*) I find another entry on March the 27th of this year, "Proposed by John Ray, and "seconded by Joseph Burn, that the society do not "recognize machines;" and that was carried. Is that so?—Yes.

17,820. Then do you mean to tell me that the effect of that resolution of yours not recognizing machines is that any man may go and work there nevertheless. What does your non-recognition of machinery mean? —Machines were not recognized at that time.

17,821. But what is the effect of your not recognizing them?—We consider that it would throw a number of men out of labour.

17,822. That I understand; but what is the effect of your not recognizing them: did you prevent your men from working where the machines were?—At that time we did, as I think I told you before, but we do not at present.

17,823. I find these words, "Proposed by John "Thompson and seconded by James Carr, that men "and masters dispense with machines on the 6th of "April." You seem to have given them about eight or nine days to dispense with machinery, was that it? —Yes, there was some short time I know.

17,824. What action did you take upon that resolution?—We had a general meeting, and the result was that Mr. Roscoe's and Mr. Brooks's men were drawn out.

17,825. That was for the purpose of compelling Messrs. Roscoe and Brooks to dispense with machines?—Yes.

17,826. When did you come to a different disposition upon this matter and allow your men to work for Roscoe and Brooks?—It may be two months ago now.

17,827. What made you alter your course of action after coming to the three resolutions which I have read out against machinery?—If a man or a society does a thing which he thinks is injuring him, and he wishes to retract, he is at liberty to do so, is he not?

17,828. Yes, we are quite aware of that.—Very well; that is the view that the society took of it.

17,829. Then you thought that those resolutions against machinery had the effect of injuring you instead of benefiting you?—Yes, we found it out.

17,830. And so you gave up those resolutions?— Yes, we gave up those resolutions.

17,831. You found out that your resolutions against machinery were prejudicial to your interests?—We did.

17,832. This is a resolution of November 27th 1866, what is the meaning of it: "Any man finishing "and preparing work for machinery to receive one- "half the price of all the work so done?"—I was not the secretary then, but I can tell you how we are acting now.

17,833. But can you tell me the meaning of that; I suppose you have a pretty shrewd notion of what it means?—I can tell you the regulation now, whatever the machine does a man gets one-half; take the edges of a coat, a man would receive 1*s.* 6*d.* or 2*s.* for the edges of a coat, and if the machine does it he receives one-half of the money; the master takes one-half of what the machine does and the man gets the other; if it is a 2*s.* edge they get 1*s.* each, and the same for any portion of a garment; the man has to prepare it and finish it.

17,834. (*Mr. Barstow.*) I suppose women could make clothes by machines as well as men?—Yes, there are women who work machines as well as men. You asked me a question respecting the sending of those bills out exposing those men. The master tailors had a placard up in their cutting-rooms with the names of

FIFTEENTH DAY.

M. Morgan.

21 Sept. 1867.

men who were discharged from various towns. If I was to go into some of the shops in Manchester and ask for work they would ask me, "Where do you come from, from Bolton? What is your name, So-and-so?" They would say, "We cannot give you any work here: "you have been connected with the society in Bolton "as a society officer, and we cannot employ you." I have been refused in two shops myself through it.

17,835. Then it is a sort of retaliation?—Well, I think that if the masters are allowed to combine the men ought to be allowed to combine.

17,836. It is no question about their having a right to combine; there is no doubt about that?—I think that if the Commissioners would examine some of the masters as well as the men it would do them good.

17,837. When Mr. Pickering opened the Commission he said that he would be glad to hear any cases of that kind if they were brought forward, but none were brought forward.—It is a pity that some were not brought forward.

17,838. The Act of Parliament authorizes us to inquire into combinations both of masters and men, and that was stated most distinctly.

17,839. (*Mr. Chance.*) The masters say that John Thomas is a union man?—Yes.

17,840. And you try to make non-union men join the society?—Yes.

17,841. They say, "We prefer non-union men to union men, and we employ non-union men?"—Yes. Have there been any of the employers summoned to appear before the Commission, or any Commission which has been sitting?

(*Mr. Barstow.*) Not with regard to combinations.

17,842. (*Mr. Chance.*) There must be intimidation or injury to person or property.—Suppose I go and ask for work, and then I am told, "You belong to the "society; you are secretary, and I cannot give you "work on that account?"

17,843. It is no threat or intimidation to you; it is simply that the master will not employ you because you happen to be a member of a union.—But is it not intimidation on the master's part to tell a man that he shall not work for him because he is a member of a union?

17,844. (*Chairman.*) It is not intimidation within the meaning of this Act. The intimidation must be a threat of actual or implied violence or injury to his person or property, and it is coupled with the words "outrage and wrong," but "intimidation" means either some threat of violence or injury. There is a Commission sitting in London which will deal with the general nature of trades' unions and those sort of combinations, whatever they may be. We have nothing to do with anything except intimidation, outrage, or wrong. We are sent down here to examine into cases of that description, whether of the masters or of the men; it certainly applies to both. There must be acts of that description so far as our province is concerned.—That I understand.

(*Mr. Chance.*) It is not for us to say whether the course taken by masters or a man is right or wrong; we have simply to say whether anything comes within the meaning of the words "intimidation, outrage, or wrong."

17,845. (*Mr. Barstow.*) If you think for a moment you will see that there can be no intimidation in declining to enter into a contract with a man?—Yes; but I think if a master declines to employ a man because he may take an active part in a society it is not right.

The witness withdrew.

Mr. Charles Harris Hawthorn sworn and examined.

Mr. C. H. Hawthorn.

17,846. (*Chairman.*) What are you?—The manager of Mr. Horrocks's No. 6 establishment.

17,847. Where is his establishment carried on?—At 6, Oxford Street, Bolton.

17,848. Mr. Horrocks is a tailor, is he not?—He is a tailor and draper.

17,849. Do you remember a strike among his men taking place in November last year?—Yes.

17,850. How many of his men left in consequence;—Well, I cannot tell you the exact number; I should think perhaps 14 or 15.

17,851. What was the occasion of it?—There are two societies, and we were employing both societies at that time. We had got a large contract on, and they were not agreeable for us to employ the two societies, and we were to pay the best price for all garments; and we at two different dates——

17,852. I do not quite understand your explanation; you say that there were two societies?—There are the No. 1 and No. 2 tailors' societies.

17,853. There are two tailors' unions in Bolton?—Yes.

17,854. Were you employing men from each of those unions?—Yes.

17,855. There was some dispute; what was that dispute?—They struck against us for employing the two; they wanted to make it one society.

17,856. Did they both strike because you employed them both, or did one strike because you were employing the other?—No. 1 struck, and they would not allow the others to work.

17,857. No. 1 struck because you employed No. 2?—Yes.

17,858. The one union would not allow you to employ the other?—No.

17,859. And the consequence was that both went out?—Yes.

17,860. Why did No. 2 go out?—The two societies had a meeting, and they fixed among themselves which should be a No. 1 shop and which should be a No. 2 shop through the town.

17,861. Then those two societies had a meeting and came to an agreement as to which of the union men should work at particular shops?—Yes.

17,862. Which did you get the favour of, No. 1 or No. 2?—The No. 2 wished to work for us, but No. 1 compelled us to employ them.

17,863. Then although you preferred to employ the two unions it was arranged for you that you should only employ one?—Yes.

17,864. How long have you had the pleasure of having your business arranged for you by these societies?—Only these last three years.

17,865. Under those circumstances what did you do?—We employed non-society men.

17,866. The consequence was that all your hands consisted of non-society men?—Yes.

17,867. They did not belong either to No. 1 or to No. 2?—No.

17,868. Then I suppose the consequence was that you were picketed?—Yes, we were.

17,869. Had you the shop watched by men both from No. 1 and No. 2, or which had the care of you?—Both the societies.

17,870. How many men came to picket you?—I should think there would be nine or ten.

17,871. In consequence of that what did the men do; did the non-society men who were with you get insulted or assaulted, or anything of that sort?—Yes, they followed them, and called at them through the streets "knobsticks;" and one of the union men, a stout man, went upstairs into the work-room and struck one of them.

17,872. Do you mean to say that he actually came into your shop and went upstairs and struck one of the non-society men?—He did.

17,873. What happened; did they submit to it?—I heard a noise in the work-room and I went up myself, and he had then got hold of the man by the throat, and I threw them both down myself; and one of the other workmen, a non-union man, and I laid hold of him while he was down, and carried him and pushed him downstairs.

17,874. How many tailors were sitting working together when this stout man, as you call him, went upstairs and seized the other man by the throat?—I should think seven or eight.

17,875. What did the other six do?—They were looking at him, they were afraid of him.

17,876. Seven tailors were there, and one strong man came up and seized a man by the throat, and the other six were afraid?—They never attempted to touch him till I got up.

17,877. I suppose they all had those large scissors which one sees; they were all armed in that way?—Small scissors they generally have.

17,878. However, they did nothing, and were all afraid, but you went up and got hold of the big man, and then you turned the big man out?—Yes.

17,879. Was that big man a tailor?—He was.

17,880. Do you remember anything else besides?—Yes; as the men were coming to their work three men met one of them, stopped him, and struck him, and then there were several stones thrown at him, but they had a by-word, which this man called out, and got the others to his rescue.

17,881. I do not thoroughly follow you; one of your men was coming to his work, you say?—Yes.

17,882. Three men threw stones at him?—Yes.

17,883. Did they hit him?—They did.

17,884. Upon his being hit, what else did they do?—Two of the non-society men secured this society man who had been throwing stones.

17,885. What became of him?—He was sent to prison for a month.

17,886. And he was one of the society men, you say?—Yes.

17,887. Did any system of intimidation go on against the non-society men by those union men who picketed them?—They threatened them what they would do; they said they would give them a certain time to stay in the town, and then they were going to drive them out.

17,888. How long did they say they would allow them to remain in the town before they drove them out?—I should say two months at least.

17,889. After that they were to go?—Yes, they kept giving them first one week, and then another, and it kept on till this man was taken prisoner.

17,890. Which man?—The man for throwing stones; and after that they were perfectly quiet, and we heard no more of them.

17,891. And your non-society men remained with you?—Yes.

17,892. Do you know the man's name who was sent to prison?—John Campbell.

17,893. He was not the same big man as we heard of before, was he?—He was not.

17,894. Was the violence or intimidation such that you requested the services of the police?—Yes, several times.

17,895. And how long altogether did that sort of intimidation go on?—I should say about eight or ten weeks.

17,896. It began in November 1866, and lasted for about eight or ten weeks after that?—Yes.

17,897. Did they station any men at your shop to prevent customers coming?—One, I think.

17,898. What was the name of the man whom they stationed there?—Samuel Ray.

17,899. Was he there for the purpose of preventing customers from entering the shop?—He was on the picket, and he came across to the window where there were a quantity of customers, and tried to persuade them not to come in.

17,900. Did he succeed?—He did not.

The witness withdrew.

JONATHAN EDGE sworn and examined.

J. Edge.

17,901. (*Mr. Barstow.*) What are you?—An iron-founder.

17,902. Where do you carry on business?—At Bolton.

17,903. How many hands did you employ last year?—About 70 in all.

17,904. That was in every branch of your trade?—Yes.

17,905. On the 6th of August last year your moulders turned out, did they not?—They threatened to do so.

17,906. Did they make a demand from you for a rise of wages?—Yes.

17,907. That was 2*s.* a week?—Yes.

17,908. I believe you refused to give it?—I did.

17,909. In consequence of that did they leave your employment?—They did.

17,910. I believe you endeavoured to supply their places with non-society men?—We did; I advertised.

17,911. And was your advertisement answered by men who came to your employ?—Yes.

17,912. Were any efforts made to prevent the non-society men coming into your employment?—Yes, they were picketed by the moulders in the street.

17,913. Your premises were picketed?—Yes.

17,914. In what way were they picketed?—They congregated round within 100 yards or 200 yards of the works at the meal times, and they annoyed the non-society men.

17,915. Were those your old workmen?—Yes, some of them, and others besides.

17,916. They came to your premises at meal times?—Yes.

17,917. But they did not regularly keep watch up and down the street, did they?—Yes, they did for a number of days, for two or three weeks.

17,918. Did they walk two and two together up and down?—Yes, they walked up and down.

17,919. And tried to prevent anyone who looked like a workman from coming to your place?—Yes.

17,920. Did you hear of any man working for you being assulted or intimidated?—Yes.

17,921. What was that?—They met the picket at the end of the street, and they struck them.

17,922. Whom did those men who you say were on picket strike?—One person of the name of Samuel Lax.

17,923. Was that your foreman?—Yes.

17,924. Who struck him?—A man of the name of Hayes on that occasion.

17,925. Who was Hayes?—He was a moulder.

17,926. A union man?—Yes.

17,927. What time of day was this?—This was the dinner hour.

17,928. Was anything done upon that?—No, not upon that occasion.

17,929. Was Lax struck again?—Lax was intimidated by a man of the name of Ratcliffe.

17,930. How did he intimidate him?—He got through the fence of the yard, and threatened his life, for which he was taken before the magistrates.

17,931. Is Lax here?—I do not know.

17,932. What was done to Ratcliffe?—He was bound over to keep the peace.

17,933. Was anything else done to Lax?—He was annoyed many times in all, but I could not speak to the occasions.

17,934. Do you know of anything happening in Deansgate with respect to Lax?—I cannot speak to that. I know there was a deal of annoyance, but I cannot speak to that point.

17,935. Then that is all that you know about Lax?—Yes.

17,936. Was there any other of your men assaulted?—There was one of the name of Atkinson, who was assaulted and very badly used.

17,937. Was a man named James Wilkinson assaulted?—I do not know the name.

17,938. Who assaulted Atkinson?—There was a man of the name of Henry Brooks.

17,939. Is he a society man?—Yes, a moulder.

FIFTEENTH DAY.

J. Edge.

21 Sept. 1867.

17,940. Where did he assault Atkinson?—It was in a street called Anthony Street or Well Lane.

17,941. Was he taken before the magistrates?—Yes.

17,942. What was done to him?—Nothing was done to him: he was mistaken in identifying him, but the man admitted in court being in the scuffle.

17,943. Was Atkinson very severely beaten?—Yes, very.

17,944. What was done to him?—His face was cut.

17,945. Was it done with the fist?—We supposed that it was done with a kick.

17,946. He was knocked down and kicked?—Yes, he said he was kicked.

17,947. Do you know of any other case?—No, not of assault.

17,948. Now, have you yourself been threatened at all?—Yes, I have been threatened by the moulders; but of course I did not take any notice of their threats to me.

17,949. Do you mean by men who had been in your employment?—Yes.

17,950. What threats did they use?—One told me that he would "knock my bloody head off;" that was the expression he used.

17,951. Is that all?—That is all of that kind of annoyance.

17,952. Perhaps he had had "a sup of beer?"—Well, I cannot say. I walked down the street before the non-society men to keep them from being molested.

17,953. Did you have the non-society men escorted by the police to your works?—Yes.

17,954. That was done of course from fear of being attacked by the others?—Yes, to prevent the disturbance.

17,955. Were they put up in your place, or did they lodge in the town?—They lodged in the town, close by within a few yards.

17,956. How long did this continue?—About two months, until we had a case before the magistrates, and then it ceased.

17,957. After which case did they cease?—There was Ratcliffe and Henry Brooks, and Winterbottom.

17,958. What was Winterbottom's case?—For an assault on Atkinson; there was Edward Horrocks; they were all in the court on the same day.

17,959. Did any solicitor appear for them?—I believe not.

The witness withdrew.

Mr. H. Hargreaves.

Mr. Henry Hargreaves sworn and examined.

17,960. (*Mr. Chance.*) What are you?—I am the manager of a cotton mill.

17,961. Of whose cotton mill?—John Thomason and Sons.

17,962. Do you remember in December 1866 the self-acting minders turning out of work?—Yes.

17,963. On what grounds was it that they left their work?—They said bad work.

17,964. I do not quite understand what you mean by "bad work;" did they not do their work properly?—Well, they said they could not make good work of it.

17,965. Of the cotton that they had to use?—Yes.

17,966. Did they complain of the cotton?—Yes.

17,967. Was there any good grounds for that complaint?—Not exactly; there was a ground, it was not so good as we had had it.

17,968. Whose fault was that; was it the fault of the people who supplied you?—The employers said that the cotton turned out was not so good as they expected.

17,969. Did they all leave your work because of it?—They all stayed away quite unknown to me on the 15th of December last, and did not come near.

17,870. Was that the only reason why they left your work?—Yes.

17,971. Was there no dispute about wages or anything of that kind?—No.

17,972. And were those men who left your employment members of the union?—Yes.

17,973. Upon their leaving your work did you endeavour to get fresh hands?—Yes, they left on the 15th, and we commenced on the 17th to get fresh hands.

17,974. And I suppose you got non-society men?—Non-society men generally, I think.

17,975. How many did you get?—There were 21 turned out, and we got 21 fresh ones in their places.

17,976. Upon getting the fresh hands was anything done by the members of the self-acting minders' society?—They commenced picketing the mills on the morning of the 17th, at 6 o'clock.

17,977. How many men were on picket?—About 12.

17,978. Were the non-society men interfered with at all?—Yes.

17,979. What was done to them?—They were insulted, and several of them were taken before the magistrates. Two of them are here.

17,980. What are their names?—Mason and Winward.

17,981. Were they the two men whom you had up before the magistrates?—No, they were the two men that were insulted.

17,982. When you say that they were insulted, do you mean that they were called "knobsticks?"—Yes, and all such like names.

17,983. Were any threats used against them?—Yes, they misused one badly; he had to run for his life.

17,984. Which was that?—Winward.

17,985. Did they beat him?—They beat him.

17,986. Did they hurt him badly?—They hurt his leg; he had a very bad leg.

17,987. What did they beat him with?—With their feet.

17,988. They kicked him?—They kicked him.

17,989. Do you know the names of the men who beat Winward and kicked him?—Yes; Richard Ball and John Henry Ryland were their names.

17,990. Were they two of the pickets?—Yes; they took them before the magistrate at Bolton.

17,991. Did they also beat Mason?—They insulted him.

17,992. But they did not beat him?—They did not personally beat him.

17,993. Were Ball and Ryland committed?—Yes.

17,994. What term of imprisonment were they committed for?—It was taken to a higher court, and there was some flaw in the indictment.

17,995. There was an appeal against the conviction, was there?—Yes.

17,996. Was the appeal proceeded with?—It was quashed on account of informality.

17,997. And then no further proceedings were taken?—No.

17,998. Were the men defended before the magistrates by any attorney?—Yes.

17,999. Who defended them?—Mr. Richardson and another lawyer; I forget their names.

18,000. Somebody at Bolton, I suppose?—Yes.

18,001. Was it necessary for you to get the assistance of any police to protect your premises?—We had them there continually, night and morning; we had them the whole of the day from 6 to 6.

18,002. Was it to protect the non-society men?—To protect the non-society men.

18,003. Have you ever been threatened or ill-treated in any way?—No, I scouted the men off.

18,004. Did the pickets endeavour by intimidation generally to prevent the non-society men from working?—Yes.

The witness withdrew.

FIFTEENTH DAY.

B. Mason.

21 Sept. 1867.

BENJAMIN MASON sworn and examined.

18,005. (*Chairman.*) What are you ?—A self-acting minder.

18,006. Do you live in Bolton ?—Yes.

18,007. What is the name of the firm by whom you are employed ?—Messrs. Thomason.

18,008. They are cotton spinners, are they not ?—Yes.

18,009. Do you remember a strike about last December ?—Yes.

18,010. How long have you been employed by them ?—Ever since January last.

18,011. After the strike you were employed, were you not ?—Yes.

18,012. Their men went out and you went in ?—Yes.

18,013. When you went in were you at all assaulted or disturbed by those men who had gone out ?—They followed me home occasionally.

18,014. Did they ever assault you ?—No ; they called me knobstick and this and the other.

18,015. Did they ever strike you ?—No.

18,016. Did they say anything which they would do to you if you did not leave off work ?—Yes, they said they would strike me and kick me.

18,017. Were you constantly kept in fear of some injury being done to you ?—Yes.

18,018. Did this happen often ; every day, or repeatedly ?—It happened several times, when they got a chance ; sometimes I used to slip them.

18,019. At night as you went from your work ?—Yes.

18,020. Were there several men about picketing the works ?—Oh, yes.

18,021. Do you remember on Saturday night, the 16th of February last, being followed by some of the turn-outs ?—Yes.

18,022. Were you then going home from your work ?—Yes.

18,023. What time was it ?—Somewhere about 3 or 4 ; it might be a little before 3.

18,024. How many men followed you ?— There might be a dozen or more, and a crowd with them.

18,025. Had they sticks with them ?—Not that I saw.

18,026. What language did they use ?—They called me "knobstick" and "blackguard," and said I was a "waster."

18,027. That was on Saturday ?—Yes.

18,028. On the following morning were any stones thrown at you ?—There were stones thrown at my bedroom window the same night, of about two or three pounds weight.

18,029. Were you in bed at the time ?—Yes.

18,030. Are you a married man ?—Yes.

18,031. Was your wife with you ?—Yes ; but it happened that my bed was below instead of upstairs.

18,032. But it was thrown through the window upstairs ?—Yes, into the bedroom.

18,033. Was anybody sleeping in that room ?—No.

18,034. But you happened to be sleeping, with your wife, downstairs ?—Yes.

18,035. That was a bedroom, was it ?—It was the bedroom window that they pitched the stone through.

18,036. How came you to be sleeping downstairs ?—Because I apprehended danger.

18,037. Because you apprehended danger you left your own bedroom and came downstairs ?—Yes.

18,038. This stone of 2 lbs. or 3 lbs weight was thrown in at the window ?—Yes.

18,039. It came right into the room, I suppose ?—Yes ; and it made an impression upon the wall which divides the building at the back.

18,040. It was thrown with so much violence as that, was it ?—Yes.

18,041. You had not any private quarrel with anybody, had you ?—No.

18,042. Had you any reason for suspecting anybody except those turn-outs ?—I had no reason to suspect anybody else.

18,043. Did you hear the stone thrown, and do you remember what time of the night it was ?—Yes, it was in the morning, from 2 to 4.

18,044. Did it go right through the window ?—Yes, it wakened me.

18,045. It went right through the window ; the window was not open, I suppose ?—No.

18,046. It went right through, straight into the room in the way you describe ?—Yes, where I should have been lying only I went downstairs, but as soon as I heard the stone come through I went upstairs to see what was the matter, and I found the stone, and I found an impression in the wall. It is a lathed wall on both sides and plastered.

18,047. I believe those are the only occasions on which such things have happened to you ?—Yes.

18,048. How many weeks did this threatening and following continue ?—I cannot tell exactly, but it continued several weeks.

18,049. Did it continue two or three months ?—No, it did not continue two or three months, a month or two.

The witness withdrew.

J. Winward.

JOHN WINWARD sworn and examined.

18,050. (*Mr. Barstow.*) Are you a self-acting minder ?—Yes.

18,051. Did you go into Messrs. Thomason's employment after this turn out ?—Yes.

18,052. Were you molested as you went to and from your work ?—Yes.

18,053. Was anything done to you more than following you and insulting you ?—Yes, I was kicked.

18,054. I suppose you were called a knobstick ?—Yes.

18,055. And other abusive names ?—Yes.

18,056. Who kicked you ?—Ball and Ryland.

18,057. They were taken before the justices ?—Yes.

18,058. And they were committed by the justices ?—Yes ; but there was an appeal.

18,059. What did they do to you ?—They kicked me.

18,060. Did they knock you down ?—No, I made my escape as well as I could, and ran into a neighbouring house close by.

18,061. Has anyone else assaulted you ?— Well, I have been called names several times by different people.

18,062. You have not been beaten more than this once ?—No.

18,063. Has any relation of yours been insulted ?—Yes, my wife.

18,064. What have they done to her ?—Well, they called her names.

18,065. Who called her names ?—Those turn-outs.

18,066. Did they do anything to her, or did they only call her names ?—No.

18,067. How long did they continue to persecute you in this way ?—Well, as near as I can guess, they were picketing night and morning for about 10 or 11 weeks.

18,068. And then when the picketing ceased they ceased to insult you too ?—Yes.

The witness withdrew.

FIFTEENTH DAY.

21 Sept. 1867.

Chairman. We have now gone through all the cases which are ripe for investigation, and which have been presented to our notice; but from the information we have received we think it right, and indeed we feel that it is our duty to adjourn this inquiry. I may say that we have given directions that all the boxes, books, papers, and documents which have been in our possession for the purpose of this inquiry shall be immediately returned to their respective owners. I shall have another opportunity, of which I shall most gladly avail myself at the final close of this inquiry, to tender our best thanks to the authorities and individuals who have in their several capacities rendered us their assistance and services in the course and conduct of this inquiry, and also for the facilities which have been so kindly afforded to us in allowing us the use of these assize courts. It only remains for me now to say that this inquiry is adjourned, and that due and proper notice will be given of the time when it will be resumed.

Adjourned.

INDEX OF WITNESSES.
